

Immortality Cultivation: I Farm in the System Space

#Chapter 911 - Read Immortality Cultivation: I Farm in the System Space Chapter 911

Chapter 911: Chapter 409: Demon Cultivator of the Cangyun Realm Chapter 911: Chapter 409: Demon Cultivator of the Cangyun Realm After observing for a moment and confirming that he had not caused irreparable damage to Immortal Crossing Island, Lin Jing then withdrew his gaze.

Following thatâ€¦

He immediately summoned the System and reentered the System Space.

Upon entering the System Space, Lin Jing took out Ye Mingyi's Space Ring and the Daoist Treasure he had previously used for defense.

After taking them out, Lin Jing picked up the defensive Daoist Treasure and began to examine it.

It was a tortoise shell-shaped Daoist Treasure, only palm-sized.

When used, one only needed to inject Spiritual Power into it, and a layer of tortoise shell-shaped Spiritual Shield would unfold, enveloping the user for protection.

Ye Mingyi had been using this treasure to defend himself against Lin Jing's attacks.

...

Unfortunately, though the treasure could block attacks, it was capable of withstanding the life-devouring power of the Samsara Holy Fruit.

Even protected by the treasure, Ye Mingyi was still devoured clean of his vitality by the Samsara Holy Fruit, leading to his complete fall.

There's nothing particularly special about this Daoist Treasure, and after inspecting it, Lin Jing simply put it away, paying it no further mind.

Next was Ye Mingyi's Space Ring.

Lin Jing then extended his Divine Sense towards the Space Ring.

But just as his Divine Sense probed, it encountered a backlash from the prohibitions left on the Space Ring by Ye Mingyi.

The backlash was extremely strong, and with it, a vast surge of Demonic Qi also made its presence known.

Seeing this development, Lin Jing immediately retreated.

After the surge of Demonic Qi emerged, it swiftly transformed into the visage of an old face rising amidst the demonic vapors.

The old Demon Cultivator's face appeared, scanning the area before bursting into loud laughter.

"Ha ha ha!"

"Damn Xuanqing Realm cultivators, you sealed me away for so long, and finally, I'm free."

"When I get out, I will definitely lead the cultivators of the Demonic Path of our Cangyun Realm and Jiuyou to annihilate every single one of the Xuanqing Realm cultivators!"

Hearing the Demon Cultivator's words, Lin Jing couldn't help but be surprised.

"I didn't expect this Demon Cultivator to not be from the Xuanqing Realm, but rather a cultivator from the Cangyun Realm."

!

!

The Xuanqing Realm is where Lin Jing currently resides in the Cultivation World, and the Cangyun Realm is another Cultivation World that is roughly equivalent to the Xuanqing Realm.

The two Cultivation Worlds are located differently but are both accessible to the Outer Spatial Void, where they may encounter each other.

Apart from the Xuanqing and Cangyun realms, there's also the Jiulin Realm.

These three Cultivation Worlds seem to belong to the same spatial area and can meet in the Outer Spatial Void.

Although entering the Transcendence Tribulation Stage allows access to the Outer Spatial Void, if not necessary, no cultivator of that stage would venture there.

The Outer Spatial Void is extremely dangerous; even Mahayana Realm cultivators could fall if they are not careful.

NovGo.co

What's more, apart from Xuanqing Realm cultivators, those from the Cangyun Realm and Jiulin Realm also lurk within, and if you encounter a native cultivator, you might still remain unharmed.

But if one meets cultivators from the other two realms, it's quite a different story...

Cultivators from the three realms are sometimes hostile to each other in the Outer Spatial Void, but not absolutely; if it benefits themselves, they may choose to cooperate.

However, generally speaking, encountering cultivators from the other two realms is far more dangerous.

For a genius cultivator like Lin Jing who reached the Transcendence Tribulation Stage at a young age, if he encounters cultivators from other realms in the Outer Spatial Void...

Even if he does nothing, it's very likely he would be targeted for assassination by cultivators from the other two realms.

After all, eliminating a genius from another realm's Cultivation World would be advantageous in the resource struggles within the Outer Spatial Void.

Fortunately, aside from native cultivators, it is exceedingly difficult for others to enter another Cultivation World.

Even if they manage to force entry, the suppressive force of the Heavenly Dao would reduce their Cultivation.

If not for this, the three major Cultivation Worlds might have long been at war, leading to widespread havoc and destruction.

Lin Jing knew about all this because he had read about it in the Elixir Alliance's Scripture Pavilion.

Moreover,

Aside from Lin Jing, there are very few below the Mahayana Realm who are aware of this information, as those who enter the Outer Spatial Void are mostly Mahayana Realm cultivators.

So,

The information regarding the Outer Spatial Void and the other two worlds is not really accessible to cultivators of Lin Jing's Cultivation.

Only Mahayana cultivators are allowed to peruse it.

The reason Lin Jing could access it was thanks to his status as an Elder of the Elixir Alliance, which allowed him to check in advance.

“

Inside the System Space, the voice of the Demon Cultivator from the Cangyun Realm had barely faded when a system warning was issued:

“Warning!”

“A special Spiritual Body has entered the System Space, proceed with elimination immediately!”

The sound of the System warning immediately alerted the Demon Cultivator:

“Who’s there?”

“Who’s speaking?”

While speaking, the Demon Cultivator looked towards Lin Jing:

“Is it you?”

“Do you want to kill me?”

But just as his words fell, he felt an extremely terrifying danger about to befall him.

Yet the young man standing not far in front of him made no moves, nor did he show any sign of energy.

Clearly, it wasn’t the young man who was causing the dangerous sensation.

While the Demon Cultivator was preparing to seek out the source of danger, that inexplicable and terrifying crisis suddenly befell him without warning.

“What is this?”

“Ah! no!”

With a resentful howl, the newly appeared Demon Cultivator from the Cangyun Realm instantly perished, disappearing without a trace.

Lin Jing had decided to inspect Ye Mingyi’s Daoist Treasure and his Space Ring in the System Space in order to be prepared for such occurrences.

Chapter 912: Chapter 409 Cangyun Realm Demon Cultivator_2 Chapter 912: Chapter 409 Cangyun Realm Demon Cultivator_2 Indeed, an unexpected event had occurred.

Lin Jing had thought that under the devouring of the Samsara Holy Fruit, Ye Mingyi would find a way to leave his body and hide his Soul Spirit.

Yet, what emerged from the Space Ring was not his Soul Spirit, but a lingering soul self-proclaiming to be a Demon Cultivator from the Cangyun Realm.

Thus, it seemed that Ye Mingyi had truly perished, with no possibility of any remnant soul surviving.

After all, no matter how cunning and full of schemes Ye Mingyi was, he would never have anticipated that Lin Jing would obtain the Samsara Holy Fruit, and naturally, he hadn't prepared for it.

Therefore, when Lin Jing took out the Samsara Holy Fruit, the unprepared Ye Mingyi was destined to fall.

...

...

Not until the spiritual body of the Cangyun Realm Demon Cultivator had completely dissipated did Lin Jing pick up the Space Ring again and extend his Divine Sense into it once more.

On this attempt, perhaps because of the influence of the Cangyun Realm Demon Cultivator, the backlash of the prohibition was still present but much weakened compared to before.

Even to the extent that it could not pose any threat to Lin Jing.

Then, Lin Jing mobilized his Divine Sense and began to forcefully decrypt the Space Ring.

After several days of continuous decryption, Lin Jing had finally completely broken the prohibition on the Space Ring, allowing his Divine Sense to probe inside.

As soon as he entered the Space Ring, Lin Jing was immediately dazzled and captivated by what he saw.

True to being a former Supreme Elder of the Seven Seas Hall, Ye Mingyi's Space Ring contained many treasures.

Firstly, about the Spirit Stones, there is no need to go into detail.

Lin Jing glanced and saw a mountainous pile of Spirit Stones, all gathered there.

These Spirit Stones were all Superior, with not a single Medium Grade or Low Grade stone.

Besides the pile of Spirit Stones, next to it, there was another pile of even more brilliant Supreme Grade Spiritual Power, also heaped up there.

At a glance, Lin Jing saw that there were, at the very least, hundreds of thousands of these Supreme Grade Spirit Stones—this count was something Lin Jing had not even dared imagine before.

Apart from the Spirit Stones, in another corner of the Space Ring, there were over a dozen Daoist Treasures lying there.

Among these Daoist Treasures, Lin Jing also spotted the Transcendent Celestial Mirror used for teleportation to Immortal Crossing Island.

When Ye Mingyi had taken out the Transcendent Celestial Mirror, it had already acquired several cracks, and now, the cracks appeared more numerous than when Ye Mingyi first revealed it.

From the looks of it, even though the Transcendent Celestial Mirror could still access Immortal Crossing Island, its uses were likely limited.

Apart from the Transcendent Celestial Mirror, the other dozen Daoist Treasures here were also extraordinary.

These Daoist Treasures varied in type, including both offensive and defensive ones, and even a Pill Furnace was among them.

Moreover, these Daoist Treasures were not of low rank, at least all above Medium Grade.

However, Lin Jing's main target was not these Daoist Treasures but the Innate Dao Treasure, the Disaster Heavenly Book, which had once belonged to Ye Mingyi.

After a brief inspection, Lin Jing passed over these Daoist Treasures and continued his search.

Eventually, after some searching, Lin Jing found a wooden box in another corner of the Space Ring that could isolate Divine Sense.

Lin Jing then directly took this wooden box out from inside the Space Ring.

Upon retrieving the wooden box, Lin Jing proceeded to open it.

Opening the wooden box, the Disaster Heavenly Book lay inside.

However, the Disaster Heavenly Book was already damaged, with cracks sprawling all over it, and one part of it had completely split open.

The Disaster Heavenly Book was damaged.

Lin Jing had heard about the damage to the Disaster Heavenly Book long ago.

NovGo.c0

It happened during a fierce battle between the ancestor of the Changyun Clan, the Supreme Elder of the Shocking Seas Alliance, both wielding Innate Dao Treasures, and Ye Mingyi.

Had the Disaster Heavenly Book not been damaged, Lin Jing would never dare reveal himself under Ye Mingyi's watchful eyes.

Moreover, not just Lin Jing, but the ancestor of the Changyun Clan, the Supreme Elder of the Shocking Seas Alliance, and even other members of the Seven Seas Hall did not wish for the existence of such a potent weapon as the Disaster Heavenly Book.

Destroying the Disaster Heavenly Book was inevitable.

Lin Jing sought the Disaster Heavenly Book because it was an Innate Dao Treasure, distinct from other treasures.

If the Disaster Heavenly Book could be restored, it could also be a great weapon threatening people.

However, to use the Disaster Heavenly Book, a sacrifice was needed to unleash its maximum power, and Lin Jing did not favor such an evil Innate Dao Treasure.

Even if it could be restored, Lin Jing needed to consider carefully.

The reason he wanted to find it was, whether to repair it or not, such evil weapons of mass destruction were safest when kept in one's own hands.

...

...

Having confirmed the existence of the Disaster Heavenly Book, Lin Jing then returned it to the wooden box.

After that, Lin Jing also placed the wooden box back inside Ye Mingyi's Space Ring.

While putting back the wooden box, Lin Jing noticed a token next to it.

This token was neither gold nor jade, and it emanated a rising Demonic Qi, clearly forged from no ordinary material.

Moreover, it was engraved with the characters “Jiuyou.”

Upon seeing the “Jiuyou” on the token, Lin Jing immediately understood that this token must belong to a Demon Cultivator of the Cangyun Realm.

He had previously stated that he planned to lead the Jiuyou Demonic Path of the Cangyun Realm to exterminate the cultivators of the Xuanqing Realm.

But right after he finished speaking, he was eradicated by the System Space, and his grand dream of annihilating the Xuanqing Realm cultivators naturally burst as well...

After that...

Lin Jing scanned inside Ye Mingyi’s Space Ring once more and, seeing nothing else of interest, withdrew his Divine Sense from the Space Ring.

After checking the items inside Ye Mingyi’s Space Ring, Lin Jing then left the System Space.

Coming out of the System Space, Lin Jing reappeared on the beach where he was before.

Next...

He turned his head, looking in the direction of the desert of Immortal Crossing Island.

When Lin Jing had last left Immortal Crossing Island, he was at the Trial Grounds in the desert.

Additionally, there, he had encountered the skeletal remains of Elder Feiling and obtained the latter half of the Lin Family’s Alchemy Dao.

However, when he had left last time, Lin Jing had not taken Elder Feiling’s skeletal remains with him but had left them on Immortal Crossing Island.

Now, having located the Lin Family’s position, although Ganlin Island no longer existed, the Lin Family’s secret grounds were still there.

It was time to bring Elder Feiling’s skeletal remains back for a proper burial.

He could not let his remains stay here indefinitely.

Thinking this, Lin Jing soared into the air, flying toward the direction of the desert.

On his previous visit to Immortal Crossing Island, Lin Jing was merely at the Foundation Establishment Stage, but this time, he had reached the Transcendence Tribulation Stage.

Compared to last time, his cultivation had immensely increased, naturally making him much faster than before.

From the seaside beach to the desert oasis, it took Lin Jing less than four hours.

Upon reaching the oasis, Lin Jing entered the water, fished out the skeletal remains of Elder Feiling, and paid his respects.

Then.

He gathered up Elder Feiling's skeletal remains.

As for the other skeleton, which had caused Elder Feiling's fall here, Lin Jing did not bother with it and let it stay there.

Despite how powerful this skeleton had been in life, under the erosion of time, it would probably only last a few tens of thousands of years at most before completely decomposing, melding into the sands and silt of the oasis.

Having taken Elder Feiling's skeleton, Lin Jing was about to leave when suddenly a disturbance occurred; an entrance, reflecting a world of swirling sands, appeared above the oasis.

It turned out to be the entrance to the Trial Grounds, suddenly appearing at that momentâ€¦

Lin Jing looked up at the sky, where a full moon hung.

Lin Jing then realized that tonight was the night of the full moon, and the entrance to the Trial Grounds typically opened on such nights.

Glancing at the entrance to the Trial Grounds, Lin Jing could not help but shake his headâ€¦

The timing of the appearance of the entrance to the Trial Grounds was indeed curious; he had just arrived, and it had appeared, almost as if Immortal Crossing Island did not welcome him and wanted him to leave.

However, Lin Jing was not in a rush to go out this time.

He still had an important task to complete.

He had yet to acquire the Transcendent Celestial Golden Lotus.

It would not be too late to leave after getting the Transcendent Celestial Golden Lotus!

Chapter 913: Chapter 410: News of the Transcendent Celestial Golden Lotus Chapter 913: Chapter 410: News of the Transcendent Celestial Golden Lotus Afterward, Lin Jing turned around and left the place.

Once he left the desert region, Lin Jing returned to the beach where he had previously seen the Immortal Crossing Island stele.

Then, setting out from there, Lin Jing flew toward the interior of Immortal Crossing Island.

Due to the use of the Samsara Holy Fruit just now, the outermost layer of the dense forest had turned completely yellow, and the entire forest was devoid of Demonic Beasts, making the surroundings eerily quiet.

It was not until he climbed over the mountain at the outer edge of the forest that the yellow color gradually faded, returning to a lush green.

After walking some more and climbing over a few more mountains...

The sounds of insects and birds in the forest began to emerge, and the entire forest regained its former vitality, no longer feeling lifeless.

...

Lin Jing continued inward...

Before long, Lin Jing arrived at the place where he first met Xiao Jin and Xiao Hei.

This place was not far from the Old Ape's territory, and soon he would reach the Old Ape's previous location on Lake Center Island.

Whether it was still there, he did not know.

Thinking this, Lin Jing continued forward.

Soon, Lin Jing reached the lakeside where the Old Ape used to reside.

Looking across the lake, Lin Jing was taken aback to find that Lake Center Island, where the Five Elements Spirit Tree had been, had completely disappeared.

The entire island, along with the Five Elements Spirit Tree, had vanished without a trace.

Seeing this, Lin Jing furrowed his brow and directly extended his Divine Sense toward the center of the lake.

He saw that where the island should have been, there was now only a flat lakebed.

This lakebed was extremely smooth, not naturally formed, as if someone had directly sheared off the entire island.

NovG0.co

Seeing this, Lin Jing frowned and pondered,
“Could they have met with an accident?”

“No...”

“From the three scenes I saw before, I clearly saw Xiao Jin and Xiao Hei; they should not have encountered any accidents.”

Thinking this, Lin Jing stretched out his Divine Sense to explore outward, hoping to find traces of Xiao Jin and Xiao Hei.

However...

After extending his Divine Sense, Lin Jing searched around but failed to find any trace of the two beasts or the Old Ape.

And besides these three, within the range of Lin Jing’s Divine Sense, he could not detect any other Demonic Beasts above the Nascent Soul Stage.

Now at the peak of his Tribulation cultivation, his range of Divine Sense was expansive.

If he couldn’t find them, something must be wrong on Immortal Crossing Island.

After exploring, Lin Jing withdrew his Divine Sense and then looked ahead.

His position was still on the outskirts of Immortal Crossing Island, just past the lake and a bit further before reaching the more internal areas.

Last time he had entered, the Old Ape had mentioned that the Demonic Beasts inside Immortal Crossing Island were even more formidable and extremely dangerous, posing potential deadly threats to Lin Jing.

Thus, Lin Jing did not advance further inward after arriving here last time.

However, this time, his cultivation had improved since the last time, and he was not afraid even if he truly encountered formidable Demonic Beasts.

Therefore, he planned to venture further inside this time.

Having made up his mind, Lin Jing did not hesitate, directly leaping into the air and flying toward the inner part of Immortal Crossing Island.

While the outskirts of Immortal Crossing Island were limited in size, its inner areas were extensive.

Lin Jing continued flying for several hours but still could not traverse Immortal Crossing Island and remained in the internal areas.

Along the way, he expanded his Divine Sense, exploring for any potentially appearing Demonic Beasts.

However, despite his exploration, he still found no traces of Demonic Beasts at the Nascent Soul Stage or above.

The highest he encountered were only at the Golden Core Stage.

As for Demonic Beasts above the Golden Core Stage, they seemed to have vanished suddenly—“all without a trace”—and not just the Demonic Beasts, even the rare Spirit Plants were nowhere to be seen.

Similar to the previously vanished Lake Center Island, the dense forest only contained multiple deep pits and open spaces.

Besides...

Lin Jing also realized the disappearance of all higher-level Demonic Beasts without any massive fight marks or the scent of blood.

It was as if the high-level Demonic Beasts of Immortal Crossing Island had collectively relocated and left altogether.

Following this, Lin Jing continued flying deeper into Immortal Crossing Island.

In this manner, several more hours quickly passed.

Lin Jing had finally traversed the inner part of Immortal Crossing Island and arrived at the central area of Immortal Crossing Island.

Upon entering the center of Immortal Crossing Island, Lin Jing encountered something different—a transparent barrier.

Upon seeing the transparent barrier, Lin Jing stopped moving forward and descended from the air, landing in front of the barrier.

The barrier was completely transparent, allowing Lin Jing to see some scenes inside, though his Divine Sense could not penetrate through.

This transparent barrier acted like a spatial partition, isolating everything beyond it.

Had his Divine Sense not been blocked, Lin Jing might have easily overlooked it.

Upon reaching the barrier, Lin Jing observed and tested it briefly, finding that the barrier seemed intended solely to block outsiders from entering the central area of Immortal Crossing Island and did not attack or counter.

Since the barrier could block his Divine Sense, it certainly wasn't easy to break.

Lin Jing looked at the clear barrier in front of him, choosing not to attempt breaking through.

Chapter 914: Chapter 410 News of the Transcendent Celestial Golden Lotus_2 Chapter 914: Chapter 410 News of the Transcendent Celestial Golden Lotus_2 Rather than initiating, Lin Jing directly called out the System, silently saying to himself:

“System!”

“Enter System Space.”

Following that, the scene in front of Lin Jing blurred, and he was enveloped by the tearing force brought on by the teleport.

The next moment...

The scene in front of him cleared up, and Lin Jing found himself within the System Space.

After entering the System Space, Lin Jing spoke again:

“System!”

“Enter Observation Mode.”

Following that...

The scene in front of Lin Jing changed again, and within the blink of an eye, his view shifted to the outside from Observation Mode.

Once the observation perspective appeared, Lin Jing controlled the view and peered into the screen.

When Lin Jing controlled the Observation Mode and ventured into the screen, he was instantly stunned by the sight within.

...

The scene inside the screen was completely different from what could be seen on the outside.

From the outside, the screen showed a lush dense forest, but upon entering, Lin Jing saw a winding, rugged mountain range.

Moreover, aside from the mountain range, Lin Jing also found traces of other Demonic Beasts.

Moreover, this Demonic Beast, Lin Jing had seen before.

novG0.co

It was the black bear that had attempted to snatch the Spirit Fruit from the old ape at Lake Center Island when the Five Elements Spirit Fruits matured.

Despite so much time having passed, its unique aura still allowed Lin Jing to recognize it immediately.

Since this black bear was here, the old ape, as well as Little Gold and Little Black, were likely also present.

Afterwards, Lin Jing continued to control the observation view and explore further inside.

This time, unlike previously in the outside world.

Inside the screen, there were numerous Demonic Beasts with high Cultivation levels.

Not far ahead, Lin Jing saw two shadows, one gold and one black, swiftly streaking across the sky in front of the observation view.

Seeing this, Lin Jing quickly controlled the observation perspective to look at those two shadows.

Indeed...

As Lin Jing expected, the two shadows were none other than the Golden Giant Eagle, Little Gold, and the black hawk, Little Black.

At that moment, Little Gold was leading, with Little Black following closely, both moving at high speed, playfully chasing each other.

Seeing this, Lin Jing couldn't help but breathe a sigh of relief.

As long as they were alright.

However, just as the two creatures were playfully chasing each other, suddenly a gray shadow appeared from below, rushing towards them.

The gray shadow was faster.

In an instant, it appeared directly in front of Little Gold.

Then Little Gold was suddenly startled and quickly flapped its wings to stop its forward flying motion.

At this point, Lin Jing also caught a clear glimpse of the gray shadow.

It was the venerable senior, the old ape.

Seeing the sudden appearance of the old ape, not only Little Gold, but also Little Black behind quickly stopped.

Upon seeing the stern expression on the old ape's face, the two creatures immediately drooped their heads, resembling children who had made mistakes.

"Come, follow me back!" the old ape said to the two creatures.

After speaking, it turned around and flew down into the mountains below.

Little Gold and Little Black, heads still drooped, followed the old ape down as well.

Seeing this, Lin Jing also controlled the observation perspective to follow the three creatures into the mountain range below.

Entering the mountains, the three creatures came to a valley below and then descended into it.

Lin Jing, controlling the observation perspective, also entered the valley.

As soon as he entered the valley, Lin Jing noticed a lake at the center of the valley, and at the center of the lake was an island identical to the one he had seen in the outside world,

where the Five Elements Spirit Tree Lin Jing had once tended grew.

Seeing this, Lin Jing instantly understood.

It seemed they had 'relocated.'

The Five Elements Spirit Tree had also been moved from the previous island to this location.

Back on the island, the old ape, facing the two creatures, spoke sternly:

"You two, running around again..."

"Don't you know that Immortal Crossing Island is about to open, and you can't just go out as you please?"

"If you accidentally leave the range of the light screen, once you go out, you can't come back, and when the external cultivators arrive at Immortal Crossing Island, they will capture and roast both of you."

Upon hearing this, the two creatures couldn't help but shiver, then they quickly lowered their heads and whimpered softly, as if they knew they were in the wrong.

Seeing this, the old ape seemed to feel pity, and he sighed helplessly.

"Forget it..."

"Though you two are mischievous, at least you know what's important and wouldn't easily leave, right?"

The two creatures nodded repeatedly.

Little Gold even came closer, stretched out its head, and rubbed against the old ape, seemingly demonstrating its good behavior.

The old ape found this comforting and gently stroked Little Gold's head while speaking:

"This place is different from where we used to live, aside from us, there are other Demonic Beasts that have moved here too.

If you accidentally provoke them, even I might find it hard to rescue you."

"Do you understand?"

The two creatures whined and nodded continuously, indicating that they understood.

Little Gold even gestured and chirped at the old ape, seemingly saying that neither it nor Little Black had invaded any other Demonic Beast's territory.

The old ape watched Little Gold's gesticulation and suddenly paused.

Then...

The old ape stared at the two creatures for a long time until a while later, he directly spoke to the two creatures,

"Did you two go again to that unoccupied mountain range in the north?"

Upon hearing what the old ape said, Little Gold froze, then immediately lowered its head, and Little Black did the same, burying its head into its chest after the old ape finished speaking.

"Speak..."

The old ape looked at the two creatures and spoke again, but his tone had become much harsher than before.

Although Little Gold and Little Black could not speak, they still possessed intelligence like two children, and the creatures seemed to realize their mistake.

After a moment, the two creatures slightly raised their heads, glanced at each other...

After eye contact, the two creatures slowly raised their heads to look at the old ape again.

Then...

After hesitating for a while, the two creatures nodded slightly, but right after nodding, they again lowered their heads, as if preparing themselves for the upcoming storm.

Seeing the two creatures admit, the fire that had just subsided in the old ape flared up again.

Then, no longer indulging the two creatures, the old ape directly scolded,

"You two really don't know what's good for you."

"Last time, a Demonic Beast at the Dao Integration Stage had just gone in to explore that place and disappeared, and there's still no news."

"How long has it passed, and you two run there again."

"Don't you know that the Transcendent Celestial Golden Lotus might possibly be located there on our Immortal Crossing Island?"

“That place is so dangerous, yet you dare to go there, are you not wishing to live?”

Little Gold, upon hearing this, buried its head even lower.

While Little Black, at that moment, moved forward a bit and pulled out a dark vine root from its shiny black feathers.

This vine root was equally dark.

As an Alchemist, Lin Jing immediately recognized that this vine root was a grade-seven Spirit Plant, one of the supporting herbs used in making the Longevity Life-Extension Elixir.

After pulling out the dark vine root, Little Black placed it right in front of the old ape.

The old ape took the vine root, looked at it carefully, and then directly spoke:

“You two...”

“Even if there are High-Grade Spiritual Plants there, you can’t just venture out like that.”

“Don’t you realize how dangerous that place is?”

“Furthermore...”

“I naturally know that there are many rare plants there.”

“But you can’t just go there casually, and you mustn’t go there anymore...”

As the old ape continued to ‘preach’, the two creatures kept their heads down, not daring to lift them, enduring the scolding.

As Lin Jing watched this, he silently controlled the observation perspective, leaving the scene.

The old ape, Little Gold, and Little Black were all safe, and Lin Jing was relieved; he also decided not to disturb them, choosing not to meet them.

From what the old ape had said, Lin Jing learned that the mountain range to the north was potentially the location of the Transcendent Celestial Golden Lotus.

Furthermore, since Lin Jing had seen Little Gold and Little Black in the second picture, it was very likely that the Transcendent Celestial Golden Lotus was there.

Lin Jing planned to head there now, to the northern mountain range to investigate...

Chapter 915: Chapter 411: Obtaining the Immortal Golden Lotus, Unexpectedly Entering the Void Chapter 915: Chapter 411: Obtaining the Immortal Golden Lotus, Unexpectedly Entering the Void Lin Jing left the old ape and controlled the observation angle, continuing to explore northward.

On the way, he passed by some other peaks and encountered other Demonic Beasts, and finally, after some time, Lin Jing arrived within a serene mountain range.

Here, there were no Demonic Beasts, but there were many rare Spirit Plants; more importantly, Lin Jing felt a strangely familiar sensation about this place.

Upon seeing this mountain range, Lin Jing swiftly recalled the second image he had previously seen.

After comparing his memories, he realized that the terrain here closely resembled that depicted in the image just before it had disappeared.

Having confirmed his rough location, Lin Jing then proceeded forward based on the location displayed in that second image.

As Lin Jing continued onward, finally, as he passed over a mountain peak, the scene suddenly changed dramatically from before.

...

Upon reaching this location, everything became familiar.

This was the exact location shown in the second image, where the Transcendent Celestial Golden Lotus was indicated.

Upon arriving, Lin Jing completely set his mind at ease.

Then, Lin Jing continued moving forward and, before long, he saw the Mountain Spring Pool covered in green algae and the decayed Black Lotus that was in the second image.

However, unlike last time, there were skeletal remains of a Demonic Beast beside the pool.

It seemed that a Demonic Beast had died here.

At this moment, Lin Jing recalled the old ape's words and immediately understood that this must be the Dao Integration Demonic Beast that had come to explore here.

A Dao Integration Demonic Beast dying here did not surprise Lin Jing.

After all, this was the location of the Transcendent Celestial Golden Lotus, which, like the Samsara Holy Fruit, is one of the three great World Fruits.

Seeing that the Samsara Holy Fruit could devour a person's vitality, the Transcendent Celestial Golden Lotus must also possess other unknown special dangers.

Now having reached the location of the Transcendent Celestial Golden Lotus, Lin Jing did not rashly leave the System Space.

The dangers associated with the Transcendent Celestial Golden Lotus were still unclear to him, hence the need for utmost caution.

At this time, the last thing he should do was leave the System Space.

Instead, he should first use Observation Mode to explore and see what dangers the Transcendent Celestial Golden Lotus posed.

Following that...

Lin Jing controlled the observational angle, diving into the algae-covered pool.

Just as he entered the pool, Lin Jing spotted dangers lurking beneath the water.

Several varicoloured serpent-like Demonic Beasts continuously roamed beneath the algae.

Occasionally, they would lift their heads with eyes emitting a green glow, peering through the water surface at the outside world.

Seeing nothing unusual outside, they would retract their heads and continue roaming as before.

These serpent-like Demonic Beasts, aside from their colorful appearance which made them seem highly dangerous, also had sharp fangs several inches long at the corners of their mouths.

Seeing this, Lin Jing understood.

These serpent-like Demonic Beasts were probably specifically guarding the Transcendent Celestial Golden Lotus.

Below the visible Black Lotus on the water surface, was a pitch-dark lotus stalk and Lin Jing controlled the observational angle, following the stalk downward.

At the bottom of the pool, he discovered a huge snake that was dozens of meters long and several fathoms wide.

This giant snake was significantly larger than the ones Lin Jing had seen earlier, and its colors were also more vivid.

At the moment, the giant snake was sleeping with its eyes closed.

Beneath its coiled body, at the root of the Black Lotus, a few traces of colorful light peeked through.

It seemed that this must be the root of the Transcendent Celestial Golden Lotus.

Lin Jing controlled the observational angle and maneuvered around the coiled body of the giant snake, probing beneath it.

He indeed saw a segment of lotus root with nine colors, embedded in the mud under the giant snake.

However, half of that lotus root had turned black, only the latter half still displayed the nine colors.

NovG0.00

After exploring, Lin Jing soon realized.

It seemed this Black Lotus was indeed the Transcendent Celestial Golden Lotus, with the blackened portion likely having rotted.

Only the half emitting the colorful light was the intact Transcendent Celestial Golden Lotus.

After exploring, Lin Jing instantly made a decision.

If he wanted to acquire the Transcendent Celestial Golden Lotus, he would need to act as quickly as he did with the Samsara Holy Fruit.

Otherwise, not only would those colorful serpent-like Demonic Beasts potentially attack, but the giant snake at the bottom of the pool would likely emerge immediately.

Since that giant snake and those serpent-like Demonic Beasts could stay by the Transcendent Celestial Golden Lotus, they must not be underestimated and treated like ordinary Demonic Beasts.

Although Lin Jing had now reached the Transcendence Tribulation Stage of cultivation, he did not want to accidentally turn into a pile of bones due to carelessness.

However...

When he had retrieved the Samsara Holy Fruit, the System Space had been unable to operate for a period.

Being one of the three major World Seeds, acquiring this Transcendent Celestial Golden Lotus would likely result in the same situation.

In that case, when collecting the Transcendent Celestial Golden Lotus, he needed to prepare more thoroughly to deal specifically with any attacks from those serpent-like Demonic Beasts.

After deciding,
Lin Jing immediately exited Observation Mode.

Then, Lin Jing adjusted his own state and also prepared the Jinhong Furnace in advance.

Once everything was ready, Lin Jing immediately activated the Fixed-Point Teleportation Function.

Using the Fixed-Point Teleportation Function, Lin Jing chose a teleportation location not far from the Mountain Spring Pool.

“Ding!”

“System notification: Host uses Fixed-Point Teleportation, deducting one Harvest Point.

Current remaining Harvest Points: 137,254.”

Chapter 916: Chapter 411: Obtaining the Transcendent Celestial Golden Lotus, An Unexpected Journey into the Void_2 Chapter 916: Chapter 411: Obtaining the Transcendent Celestial Golden Lotus, An Unexpected Journey into the Void_2 With the activation of Fixed Point Teleportation, in the next moment, Lin Jing’s vision began to blur, and he felt a tearing force generated by the teleportation coursing through his body.

Then, the next moment...

Lin Jing left the System Space and appeared at the location he had just selected.

As soon as Lin Jing appeared, he heard the system’s prompt tone:

“Ding!”

“System Prompt: Congratulations to the host for finding one of the three great World Seeds, the Transcendent Celestial Golden Lotus, and for receiving the reward: 1,000,000 Harvest Points.”

“Ding!”

“System Prompt: The Transcendent Celestial Golden Lotus is currently being collected and no operations within the System Space can be performed.

Please wait momentarily, host.”

As the system’s prompt fell, a force belonging to the System Space extended, enveloping the Transcendent Celestial Golden Lotus.

This force instantly alarmed the colorful snake-like Demonic Beasts in the water.

In a flash, they surged out of the water towards Lin Jing.

...

“So fast...”

Seeing the Demonic Beasts charging towards him, Lin Jing couldn’t help but exclaim in surprise, having barely reacted in time despite prior preparation.

Though the aura emitted by these snake-like Demonic Beasts was much weaker than Lin Jing’s, their speed was extraordinary.

Furthermore, as they attacked, Lin Jing clearly saw the sharp fangs they bared, glistening with colorful pearls of light, which Lin Jing knew immediately must be a potent poison.

However, fortunately, Lin Jing had made preparations in advance.

As the snake-like Demonic Beasts flew towards him, the Jinghong Furnace had just been infused with Spiritual Power, forming a golden light barrier around it.

“Bang!”

“Bang!”

“Bang!”

Several loud impacts were heard as the Demonic Beasts, caught off guard, collided directly with the golden light barrier surrounding the Jinghong Furnace.

The massive force of the impact made Lin Jing take two steps back.

As for the snake-like Demonic Beasts, after the collision, they were left dazed and dropped to the ground.

Seeing this, Lin Jing immediately flipped the furnace, positioning its mouth towards the fallen Demonic Beasts, then he activated the Five Elements Divine Art and used the Jinghong Furnace.

Instantly, multicolored rays of light surged out of the Jinghong Furnace.

Upon touching these rays, the still-dizzy Beasts that hadn't reacted let out piercing shrieks.

NovG0.c0

Enveloped by the multicolored light, the bodies of the Beasts disintegrated as if they were wood decayed over many years, falling apart at the slightest touch.

And like that, the snake-like Demonic Beasts struggled in immense pain, their flesh dissolving away continuously.

In no time at all, the flesh of the Demonic Beasts completely disintegrated, leaving nothing behind but clean, white bones.

After resolving the crisis brought by these snake-like Demonic Beasts, Lin Jing was just thinking of relaxing a little when an even greater danger loomed.

At this moment...

The entire Transcendent Celestial Golden Lotus was enveloped by the power of the System Space and was slowly rising from the green-algae-filled Mountain Spring Pool.

The giant serpent that had been slumbering at the bottom of the pool was also awakened.

It raised its head from the water and looked at Lin Jing with its bright, large eyes.

The aura of the giant serpent was much stronger than that of the smaller snake-like Demonic Beasts and was even more terrifying than Lin Jing's.

Lin Jing estimated that the giant serpent's Cultivation level must be at least in the late Mahayana stage.

Upon seeing Lin Jing, the giant serpent immediately opened its huge mouth, ready to launch an attack.

However, just at that moment...

The system wrapped around the Transcendent Celestial Golden Lotus and disappeared, taking it into the System Space.

As soon as the Transcendent Celestial Golden Lotus was brought into the System Space, a sudden change occurred...

The pool that the Transcendent Celestial Golden Lotus had been planted in suddenly transformed.

An extremely terrifying suction force emanated from it.

In an instant, the water in the pool vanished, leaving behind only a bottomless, dark hole whose destination was unknown...

Even the giant serpent that had been about to attack Lin Jing was taken by surprise by the terrifying suction from the black hole and was drawn into it.

Just as Lin Jing hadn't had time to rejoice, the suction from the black hole increased again and pulled Lin Jing in as well...

...

...

The gravitational pull generated by the black hole was exceptionally powerful, yet fortunately, Lin Jing's cultivation was not low.

Although he was sucked into the black hole, Lin Jing was not injured.

However, inside the black hole, Lin Jing couldn't control his own body.

He could only be dragged along by the terrifying gravitational force and plummet deeper into the black hole.

This time, for some unknown reason...

Although the System had already swallowed the Transcendent Celestial Golden Lotus into the System Space, the System Space still hadn't returned to normal.

None of the functions of the System Space could be used.

Lin Jing could only be dragged toward the depths of the black hole, unable to enter the System Space to hide.

During this process, Lin Jing could even see the giant serpent in front of him, also immobilized, its body unable to move.

But its two gleaming eyes were staring fixedly at him.

In the abyss-like black hole, Lin Jing and the serpent fell for a long time.

After roughly several hours, Lin Jing finally saw a speck of light in the pitch-black bottom of the hole.

Lin Jing looked toward the bottom of the hole and found that, apart from the pitch darkness, there were occasional twinkling lights.

It looked just like the starry night sky.

Very soon...

Lin Jing and the serpent drew closer to the luminous bottom of the hole, and the bottom that resembled a starry sky was almost within reach.

Just then, the serpent in front vanished without a trace.

While Lin Jing was puzzled, he felt as if he had been flung out, passing through a barrier, and had arrived in a special space.

After coming out, Lin Jing immediately looked around.

This place was pitch black, with no sky or ground, and not even spiritual energy existed—only specks of stars and the endless void remained.

Lin Jing was now floating in this void.

Seeing everything around him, Lin Jing suddenly thought of a place—the Outer Spatial Void!

Only the Outer Spatial Void could be like this.

Had he been thrown directly into the Outer Spatial Void by the black hole?

But before Lin Jing could get a clear view, a terrifying presence came from beside him.

Lin Jing swiftly turned and looked in that direction.

He saw that the giant serpent was now glaring at him, lunging towards him.

However, just at that moment, the pleasing sound of the System's prompt came once again:

“Ding!”

“System prompt: The collection of the Samsara Holy Fruit is complete.

System Space functions have been restored to normal.”

At this critical moment, Lin Jing was finally able to enter the System Space once again.

With his current level of cultivation, Lin Jing was certainly no match for the serpent.

It was better to flee immediately.

So,

Lin Jing didn't hesitate and directly summoned the System, entering the System Space.

As Lin Jing entered the System Space, only the giant serpent, stunned to see Lin Jing suddenly disappear, was left behind at the original spot.

After entering the System Space, Lin Jing didn't delay, not even taking a moment to look at the Transcendent Celestial Golden Lotus that had been collected into the System Space.

He immediately activated Observation Mode, reappearing in the outside world with an observer's view.

At this moment, Lin Jing saw the serpent snap out of its daze and then quickly reacted.

Soon after, the serpent let out an angry hiss, and after the hissing, it frantically searched nearby for Lin Jing's figure, as if it had gone mad.

Presumably, it thought that Lin Jing was hiding nearby, concealed in form.

Meanwhile, Lin Jing, within Observation Mode, watched the serpent and also surveyed the surroundings.

This was a space of void, dark everywhere, with only some distant twinkling stars adding a touch of detail to this pitch-black space.

This place was very similar to the descriptions of the Outer Spatial Void that Lin Jing had seen in the Elixir Alliance's Scripture Pavilion; if nothing unexpected happened, this was probably the Outer Spatial Void.

Looking at this space, Lin Jing couldn't help feeling somewhat speechless.

He hadn't expected...

The Outer Spatial Void that others tried countless methods to reach, he had blundered into so foolishly...

Chapter 917: Chapter 412 Land of Immortal Remnants Chapter 917: Chapter 412 Land of Immortal Remnants Inside the boundless void, the giant serpent continuously searched for Lin Jing's traces, angrily shattering any occasional drifting meteorites with its tail.

This scene was fully captured by Lin Jing in Observation Mode; he chose not to rashly go out, but rather, watched as the giant serpent went mad.

Originally, Lin Jing had planned to leave on his own after the serpent had calmed down.

However, just as the serpent was raging, its body suddenly split open in the middle for some unknown reason.

The split was extremely neat, as if it had been cleaved by some invisible sword.

Moreover, the wound was very deep, almost severing the serpent into two.

The appearance of this terrifying wound immediately caused the serpent to panic and hastily move away from the area it had just been in.

...

Seeing this, Lin Jing suddenly remembered the description of the Outer Spatial Void he had seen in the Elixir Alliance's Scripture Pavilion...

Spatial cracks.

Spatial cracks were crises that could appear at any time in the Outer Spatial Void, capable of severing anything.

Even the hardest Daoist Treasure in the world could not withstand it.

novGo.co

Moreover, spatial cracks appeared silently and invisibly; only by using Divine Sense to probe could one detect signs of them and thus avoid them in advance.

Actually, in the Outer Spatial Void, crises like spatial cracks were nothing unusual.

There were naturally even more dangerous occurrences.

One of them was the spatial vortex.

Although spatial vortices appeared less frequently than spatial cracks, and were not as concealed as spatial cracks,

Spatial vortices were far more dangerous; spatial cracks could be detected early and avoided by Divine Sense, and even if one did encounter smaller spatial cracks, at most they would result in injury, not posing a real threat to life.

But spatial vortices were different.

Once a spatial vortex appeared, it would engulf all cultivators nearby, and within the range of the vortex, no matter how they tried to escape, they could not.

Once caught in a spatial vortex, one could only watch helplessly as they were sucked into the center of the vortex, disappearing without a trace.

As to where the spatial vortex would transport those it engulfed, it was unknown.

After all, no one who had been sucked into a spatial vortex had ever reappeared.

...

The giant serpent, almost severed into two halves by the spatial crack, looked towards the area it had just left, sensing danger but unable to find anything.

This circumstance terrified the serpent.

After turning its head to look around and finding nothing, it glanced one last time at the place where the spatial crack had appeared, then immediately dragged its injured body and fled from the area.

After the serpent left, Lin Jing controlled the observational viewpoint to look towards the place where the spatial crack had appeared.

The appearance of spatial cracks was unpredictable in time and location, but each occurrence did not last long, especially those smaller cracks, which usually only appeared for a moment before disappearing.

By the time Lin Jing probed, the spatial crack had already disappeared, leaving nothing behind except the blood spilt from the serpent's wound, floating nearby.

After observing, Lin Jing exited Observation Mode and returned to the System Space.

Upon returning to System Space, the first thing Lin Jing did was go to the edge of System Space, to the place of the three separate zones, to check the newly acquired Transcendent Celestial Golden Lotus.

Immortal Dao Realm World Seed: Transcendent Celestial Golden Lotus (Incomplete)

Growth Environment: Transcendent Lotus Pond

Growth Lifespan: ???

(The lifespan of the World Seed is tied to the Immortal Dao Realm; as long as the Immortal Dao Realm exists, the World Seed thrives; if the Immortal Dao Realm perishes, the World Seed too will vanish.)

(Transcendent Celestial Golden Lotus, one of the three major World Seeds of the Immortal Dao Realm, possesses the power of transcendence.)

Note: The World Seed is currently incomplete and can't produce the power of transcendence.

(The transcendental power possessed by the Transcendent Celestial Golden Lotus allows cultivators to surpass the Void Immortal phase and achieve true immortality; infusing Immortal Yuan is required to repair its incomplete state and restore its transcendental power to its normal condition.)

Seeing the information about the Transcendent Celestial Golden Lotus, Lin Jing couldn't help but feel puzzled.

Void Immortal phase, True Immortal...

Could this be the classification of realms after achieving immortality?

That's what the description seemed to indicate.

The realms after achieving immortality had never been widely known.

If it were the Ancient Era, when the channels between the Immortal Realm and the Cultivation World for ascension were still open, perhaps people then might have known.

But now, with the Immortal Realm closed off, it had been a million years since anyone had ascended.

As for the few remaining pieces of information about the Immortal Realm left behind before, not to mention the classification of realms after ascension, such highly confidential matters were even less likely to be known.

Naturally, Lin Jing did not know either.

After checking the Transcendent Celestial Golden Lotus, Lin Jing subsequently closed the System panel and then left the System Space.

Like the Samsara Holy Fruit, the Transcendent Golden Lotus was also in an incomplete state and required Immortal Yuan for repair.

Now that he knew the current situation of the Transcendent Golden Lotus, staying in the System Space was meaningless; Lin Jing reasoned it would be better to find a way to locate Immortal Yuan.

Of course.

Before looking for Immortal Yuan, he definitely needed to establish his current location and then find a way to leave and return to the Cultivation World.

After transporting him and the giant serpent, the black hole had disappeared; Lin Jing wanted to return through the black hole but could not.

Now, to get back to the Cultivation World, he would have to find another method.

Or...

He could choose not to return.

He could go looking for Elder Bai and the forefathers of the Changyun Clan.

Elder Bai and the Changyun Clan's forefathers had left for the Outer Spatial Void and had not returned since.

Chapter 918: Chapter 412: Land of Immortal Remnants_2 Chapter 918: Chapter 412: Land of Immortal Remnants_2 “

Having arrived in the Outer Spatial Void myself, naturally, I could also try to find out about their whereabouts.

Moving in the Void required the constant use of Divine Sense to search for any possible spatial cracks.

After coming out of the System Space, Lin Jing immediately urged his Divine Sense to unfold in the Void.

However, as soon as he did, Lin Jing immediately realized.

His Divine Sense was severely suppressed, and the range he could explore was roughly only one-tenth of what it had been before.

Such suppression of Divine Sense caused Lin Jing's brows to furrow.

The suppression of Divine Sense was not a small matter.

...

It would inevitably affect his speed, increase the time required for his exploration, and make him even more vulnerable.

The Outer Spatial Void was already vast and boundless, and encountering other cultivators here was extremely difficult.

Furthermore, finding a way back was even more challenging.

Now that his Divine Sense was suppressed, his speed of exploration had slowed down quite a bit.

With this method, it seemed it might take an unknown amount of time to leave.

Looking at the endless void before him, Lin Jing subsequently thought of the System Space.

With the range of Divine Sense limited, the Observation Mode of the System Space was not part of Divine Sense, and presumably, it should not be restricted.

With this in mind, Lin Jing immediately activated Observation Mode.

In Observation Mode, after experimenting, Lin Jing found that using Observation Mode to explore was the same as always, unaffected by any restrictions.

In this case, it would be easy to handle.

Lin Jing could use Divine Sense to explore for possible dangers around him, while also using Observation Mode to explore farther distances, thus slowly determining his whereabouts.

Subsequently...

After observing, Lin Jing found that in the direction where he was located, three directions were completely void, with not even a flicker of starlight to be seen.

Only one direction had twinkling stars.

Lin Jing then set off in this seemingly different direction.

...

...

The Void was vast, with only floating meteors and the occasional appearance of spatial cracks.

Lin Jing had traveled in this Void for many months, but he had not encountered any living creatures, not even the fleeing giant serpent he'd seen before.

In the Void, unable to determine his position, he did not know where he was or how far he was from the gathering place of cultivators in the Void.

Even the direction he was heading in, he could not be sure whether it was right or not.

But Lin Jing could only keep moving in this one direction, hoping to encounter other cultivators.

That day...

After traveling a distance, Lin Jing entered the System Space to rest for a moment.

After resting, he planned to set off again.

However, before leaving the System Space, Lin Jing habitually used Observation Mode to check his surroundings.

Since entering the Outer Spatial Void, in order to avoid accidents, Lin Jing always explored his environment before leaving the System Space to ensure his safety.

However, this exploration brought him an unexpected joy.

In Observation Mode, Lin Jing discovered two cultivators had entered his exploration range.

This discovery made Lin Jing breathe a sigh of relief.

What Lin Jing feared the most was being transported to some unknown area of the Outer Spatial Void.

The Outer Spatial Void was boundless, and its scope was incalculable.

If he truly got lost in the Outer Spatial Void, it would be really troublesome.

Fortunately...

In just a few months, he had encountered other cultivators, which proved that his transmission location was not particularly remote.

As long as he reached the gathering place of the Human Race in the Void, everything would be easier to handle.

The two people were an Elder and a middle-aged cultivator, both of whom had peculiar attire that Lin Jing had never seen before, which was also significantly different from what he was accustomed to seeing.

From this, it could be inferred that these two were likely not from the Xuanqing Realm, but from other parts of the Cultivation World.

After seeing the two, Lin Jing did not rashly appear but instead controlled the Observation Mode's perspective to follow them.

He wanted to see if he could obtain some useful information from their conversation.

The two seemed to be searching for something, flying forward while observing their surroundings.

After searching for a while, the two stopped, apparently communicating with Divine Sense for a moment.

After their exchange, the two landed on a huge meteor floating in the Void.

After stopping, the Elder among them took out an Array Plate, and then took out a Supreme Grade Spirit Stone to activate it.

Once the Array Plate was activated, the Formation in it immediately appeared and enveloped both of them.

Seeing the Formation begin to operate, the two sat down cross-legged and began to meditate to recuperate.

“

Seeing this, Lin Jing understood.

It turned out that the Array Plate the elder had taken out was one used to convert the Spiritual Power within Spirit Stones into Spiritual Energy.

There was no Spiritual Power in this Outer Spatial Void, and if there was a loss of Spiritual Power, one could only recover it through Spirit Stones or other Spiritual Objects.

And at this moment, they were indeed recuperating their Spiritual Power.

While they were recovering their Spiritual Power, Lin Jing did not rashly show himself but continued to use Observation Mode, watching and quietly waiting.

Both of these people were in the Mahayana Realm.

The elder was in the late Mahayana phase, while the other, a middle-aged cultivator, was in the early Mahayana phase.

N0vg0.co

Both of their cultivations were not low, and their recovery was very fast.

In less than four hours, both had fully recovered and opened their eyes.

As the two awoke, the middle-aged cultivator spoke to the elder,

“Curved Elder...”

“Now that we’ve almost recovered, if we encounter that giant snake again, we should be able to capture it directly.”

The elder nodded and said,

“Exactly!”

“When we meet it again, we will certainly be able to seize it.”

Lin Jing, upon hearing this, immediately understood what was going on; these two had come here in search of that giant snake.

As the one known as Curved Elder finished speaking, the middle-aged man spoke up again, addressing the Curved Elder,

“Curved Elder...”

“Actually, I still don’t quite understand.”

“Why would a giant snake suddenly appear in this Land of Immortal Remnants, which is clearly a dead zone, and moreover, this giant snake seems to be an unclaimed Demonic Beast.”

Curved Elder responded directly,

“Where this giant snake came from, I am not too clear.”

“But I felt a trace of an aura similar to Immortal Energy emanating from it.”

“Immortal Yuan...?”

The middle-aged cultivator couldn’t help but exclaim,

“Curved Elder, are you saying that this giant snake may have come into contact with Immortal Yuan?”

“That’s a possibility...”

Saying this, Curved Elder paused for a moment, then turned his head, looked at the middle-aged cultivator, and said,

“You must know, the place we are at now is the Land of Immortal Remnants.”

“There have always been rumors that within this Land of Immortal Remnants, there are nine Immortal Yuan hidden, it’s just that no one has been able to find any trace of them.

Although some believe this rumor, there are also some who think it’s just an unfounded tale.”

“However, a hundred years ago, quite a few people witnessed an Immortal Yuan tearing through the sky and entering the Xuanqing Realm.”

“It was the appearance of this Immortal Yuan that made everyone ecstatic, rushing to this Land of Immortal Remnants to search for Immortal Yuan.”

“Especially within the Xuanqing Realm, those two old men with the surnames Bai and Changyun, it’s said that they need Immortal Yuan for a big matter and were more eager than anyone, arriving at this Land of Immortal Remnants immediately.”

“But...”

“After so many years of searching, among the Immortal Yuan of this Land of Immortal Remnants, other than the two old men from the Xuanqing Realm who obtained one,”

“no one else has ever been heard of obtaining this Immortal Yuan.”

“But now...”

“I felt a trace of an aura similar to Immortal Yuan from the breath of that giant snake; if we catch the giant snake, we might be able to use it to find another Immortal Yuan.”

“As long as we obtain the Immortal Yuan, we can directly leave with it and return to the Cangyun Realm.”

“As long as we bring the Immortal Yuan back to the Sect without being discovered, we will have made a great contribution to the Sect.”

“As long as this matter is done covertly without anyone knowing, we will be absolutely safe and won’t have to be hunted like those two old men from the Xuanqing Realm.”

At this point, the middle-aged man also couldn't help but sneer and then said,

"It's just that those two old men from the Xuanqing Realm had bad luck, being seen by quite a few at the time they obtained the Immortal Yuan."

"Now they're trapped in the Land of Immortal Remnants, their allies outside probably still don't know their current situation."

"Even the exit of the Land of Immortal Remnants has been blocked by us and the people from the Jiulin Realm, they are in a dire situation, unable to leave."

"They also won't be able to hold onto that Immortal Yuan."

Chapter 919: Chapter 413: Disguise, Exposure Chapter 919: Chapter 413: Disguise, Exposure Upon hearing the two men's conversation, Lin Jing couldn't help but frown.

They suggested that this place was called the Land of Immortal Remnants, and Elder Bai and the ancient ancestor of the Changyun Clan seemed to have been cornered here because of Immortal Yuan.

Just as Lin Jing was planning to continue his inquiry, the two men ended their conversation and proceeded to search for the giant serpent.

Unfortunately, the two had only conversed for such a brief moment before setting off to find the serpent, leaving Lin Jing with limited information.

Especially regarding Elder Bai and the ancient ancestor of the Changyun Clan—who were under siege and whether they were injured.

Lin Jing was utterly oblivious to these matters.

And what exactly was the situation with the Land of Immortal Remnants where he was currently?

...

According to the two, the Land of Immortal Remnants didn't seem to be the Outer Spatial Void, but a special space with an entrance and exit.

Moreover, the entrance and exit were guarded by cultivators from the Cangyun Realm and the Jiulin Realm...

Lin Jing had been here for several months before encountering these two, and if he missed them, he feared it would be a long time before he met others.

Even if he met other people, it was highly likely they would still be cultivators from the Cangyun Realm and the Jiulin Realm.

After some contemplation, Lin Jing decided to take a risk and make contact with these two men, to see if he could get any valuable information from them.

Of course, he couldn't just approach them directly.

If he appeared rashly, it would surely raise the two men's guard and they would be doubly wary of him.

To make contact, it was imperative to do so casually, and it would be best to be seen as 'one of them.'

Pretending to be one of their own was easy...

When dealing with Ye Mingyi, Lin Jing had encountered the soul remnant of a demon cultivator from the Cangyun Realm, and inside Ye Mingyi's Space Ring, there was also an Identity Token of that demon cultivator.

NovGo.c0

Lin Jing still had a fresh memory of that demon cultivator's aura, capable of imitating it perfectly, and with that Token, he could cause quite a deception.

There was no need for him to follow them; he merely had to 'happen to run into them' and ask a few questions, then he would leave on his own.

Minimizing contact would also decrease the chance of exposing himself.

Having made this decision, Lin Jing subsequently took out Ye Mingyi's Space Ring and extracted the Identity Token from it.

While retrieving the Token, Lin Jing casually scanned the ring's contents and discovered several powerful Talismans of the eighth and even ninth orders, preserved in special wooden cases.

These Talismans were so powerful that they could pose a threat to even Mahayana-stage cultivators.

For safety, Lin Jing carried these Talismans on his person.

After preparing, Lin Jing then activated the Changyun Hidden Technique to start changing his body shape, appearance, and even his aura.

In no time, a middle-aged man with a lean figure, exuding Demonic Qi, appeared within the System Space.

This man, with eyes cold and sharp, his whole body swirling with Demonic Qi, and the fearsome Token at his waist, resembled none other than a peerless Demon Lord.

Naturally, this middle-aged man was Lin Jing in disguise, and with the help of the Changyun Hidden Technique, the ruse was nearly perfect.

For brief interactions, the two were likely unable to discern the truth.

After his disguise, Lin Jing used Observation Mode to scout ahead in the direction the two were traveling.

Once he'd determined their direction, he used Fixed Point Teleportation to carefully avoid them, then repeatedly teleported ahead of them until he was in their path.

Fortunately, the two were preoccupied with searching for traces of the giant serpent and weren't moving fast, which allowed Lin Jing to get in front of them.

Once he arrived at the chosen location, Lin Jing exited the System Space and, like the two other cultivators, pretended to be searching for something.

While pretending to search, Lin Jing also engaged Observation Mode to keep an eye on the two men's positions.

Soon...

Through Lin Jing's careful planning, the three met.

Upon seeing Lin Jing, the two men were startled and came to a halt, while at that same moment, Lin Jing also turned to look at them and slightly furrowed his brow.

Then.

The middle-aged cultivator among the two men raised his hand, cupped his fist toward Lin Jing, and transmitted a message:

"May I ask, friend, are you a person from the Jiuyou Demonic Path?"

Hearing this, Lin Jing, with furrowed brows, looked at the two and replied through transmission,

"Who might you be?"

The middle-aged man responded,

“We are from the Liuyue Dao Sect of the Xi Cang Continent.”

After speaking, he pointed toward the elder at his side and transmitted once more,

“This is Elder Qu from our sect.”

Hearing this, Lin Jing turned to look at the elder.

As Lin Jing looked at the elder, the latter also fixed his gaze on Lin Jing, and despite the distance between them,

Lin Jing could clearly see a light glimmering within the elder’s eyes which sharpened and became more intense and captivating...

Upon seeing the elder’s eyes, Lin Jing instantly felt as if the elder had seen right through him, and all of his disguises seemed to become ineffective at that moment.

This sudden turn of events startled Lin Jing.

But it was the elder who made the first move, the palm of his hand opening to reveal a giant hand formed from Spiritual Power, rapidly reaching out toward Lin Jing.

It was only after Lin Jing’s concealment had completely failed that the middle-aged cultivator reacted.

Seeing Lin Jing’s cultivation at the Transcendence Tribulation Stage, his face contorted with rage as he charged toward Lin Jing.

However, Lin Jing had already swiftly taken out an extremely powerful ninth-order Talisman and thrown it out as soon as the elder breached his disguise.

Chapter 920: Chapter 413 Disguise, Exposure_2 Chapter 920: Chapter 413 Disguise, Exposure_2 Both of them had higher cultivation levels than Lin Jing, and the elder was even in the late Mahayana Realm, a whole great realm apart.

Lin Jing was definitely no match for the two of them.

Therefore, Lin Jing was very decisive.

When his identity was exposed, he promptly threw out his strongest 9th Level Talisman, momentarily halting their pursuit.

As expected, those Talismans were extraordinary.

As soon as Lin Jing threw them, they emitted a terrifying aura, and soon after, a massive thunder dragon appeared.

Seeing the terrifying thunder dragon, the middle-aged cultivator's expression changed, and he quickly retreated.

...

Even the giant hand formed from spiritual power was instantly dispersed by the thunder dragon.

And that wasn't all.

After dispersing the spiritual power giant hand, the thunder dragon continued relentlessly, charging towards the two Cangyun Realm cultivators.

Seeing the thunder dragon approaching, they hastily retreated while simultaneously using their Daoist treasures and spells constantly to drain the thunder dragon's spiritual power.

Seeing that the two were too preoccupied to care, Lin Jing seized the opportunity, turned around, and fled the scene.

After getting some distance away, Lin Jing decisively summoned the System and entered the System Space.

It was only after entering the System Space that Lin Jing finally breathed a sigh of relief.

He was very puzzled; he had disguised himself well, yet they recognized him immediately upon encounter.

This was a problem Lin Jing needed to clarify.

Therefore...

After entering the System Space, Lin Jing immediately activated Observation Mode, located those two Cangyun Realm cultivators, and continued to observe them.

The 9th Level Talisman was indeed extraordinary; even after Lin Jing had entered the System Space, the thunder dragon it transformed into continued to wreak havoc for a good while before its power was completely exhausted and it dissipated.

It was only after the 9th Level Talisman completely vanished that the two finally relaxed.

"That damn cultivator..."

The middle-aged cultivator still had fury in his eyes as he looked in the direction Lin Jing had escaped, and he cursed.

After cursing, the middle-aged cultivator turned to the elder and asked, “Elder Qu...”

“You were so decisive earlier; you directly used the Divine Art ‘Eye of Truth’ on him as soon as he appeared.

Did you sense something was off the moment he showed up?”

Elder Qu, also looking in the direction Lin Jing had fled, replied, “Although he was well-disguised, it was clear that he is not familiar with the Jiuyou Demonic Path.

People of Jiuyou Demonic Path are naturally extremely arrogant, never courteous to anyone even in this Land of Immortal Remnants.”

“And...”

“This person is definitely not from our Cangyun Realm or Jiulin Realm.”

The middle-aged cultivator nodded and said, “This time our Cangyun Realm and Jiulin Realm collaborated to capture two elders from the Xuanqing Realm, only deploying cultivators from the Mahayana Realm and above.”

“This person is only at the Transcendence Tribulation Stage; he couldn’t possibly be from our two realms.”

Elder Qu nodded slightly, “Exactly...”

“He must also be from the Xuanqing Realm.”

“Since he has appeared here, he won’t escape today.”

“Let’s go...”

“We’ll catch up to him.

With his cultivation, he won’t get far, and we might even get some clues about the two elders, surnamed Bai and Changyun, from him.”

“Hm...!”

The middle-aged cultivator nodded in agreement, and then followed Elder Qu, chasing in the direction Lin Jing had left.

NovG0.co

After the two set out, Lin Jing also controlled the Observation Perspective, following behind them.

But soon, the two left the range of Lin Jing's Observation Perspective.

After they left, Lin Jing didn't hurry to leave.

Instead, he continued using the Observation Perspective, watching and waiting for the two to return.

Lin Jing's cultivation had been exposed; the two couldn't find him, and with his cultivation, he definitely couldn't run far with Mahayana cultivators in pursuit.

They would chase for a while, fail to find any traces of him, and would surely return.

Lin Jing was very sure of this.

Sure enough...

Before long, the two returned.

At the same time, that look reappeared in Elder Qu's eyes.

Clearly, he had once again activated his Divine Art named 'Eye of Truth'.

After the two returned, Elder Qu first looked around the area, and after observing, his brows furrowed.

Then...

Elder Qu stretched out his hand, placing two fingers on his forehead, then concentrated spiritual power in his eyes, making them shine even brighter.

At that moment, Elder Qu turned his head again and looked around.

After a while, he seemed to have found something when he looked at a certain location, paused for a moment, and then directly went to that location.

Lin Jing, seeing this, couldn't help but feel amazed.

This person's divine skills were so formidable.

Because the place he had discovered was a location Lin Jing had just passed by.

In this boundless void, just passing through this place would hardly leave any traces.

Even if a bit of aura was left behind, it would likely dissipate quickly.

Moreover, Lin Jing had deliberately reduced his movements when he left, but he was still discovered by this person's divine skills.

However, fortunately, Lin Jing was inside the System Space, so even if he had been discovered, it was unlikely anything could be tracked down.

Thus, Elder Qu used his divine arts to continuously follow the route Lin Jing had taken before, step by step investigating, and eventually stopped at the location where Lin Jing had entered the System Space.

Seeing Elder Qu stop, the middle-aged cultivator was somewhat puzzled and then asked,

"Elder Qu..."

"Why did you suddenly stop?"

Elder Qu frowned and then spoke,

"His aura disappeared here."

"Disappeared..." The middle-aged man turned to look around, showing a hint of confusion:

"In the Land of Immortal Remnants, how could he just disappear?"

Elder Qu withdrew his divine skills and then rubbed his temples before speaking,

"At the place where he disappeared, I faintly sensed a trace of spatial energy left by teleportation."

"If nothing unexpected happened, he must have used a Teleportation Talisman to escape directly."

"Teleportation Talisman..."

"Hisss..."

Hearing this, the middle-aged man couldn't help but gasp.

"A Teleportation Talisman, in the Outer Spatial Void, is something that can save one's life.

If accidentally entangled by a spatial vortex, one can use a Teleportation Talisman to escape."

“Such a precious Talisman, to be used like that, he’s really squandering it.”

“And he also used a rank nine Thunder Dragon Talisman just now, which is equally rare.”

“He just used it without hesitation; this person must be very wealthy.

I fear the force behind him in the Xuanqing Realm is also not simple.”

“And looking at his appearance, his age must not be very great; he must be a sacred son or a young master of some top force, right?”

After the middle-aged cultivator finished speaking, Elder Qu looked towards the place where Lin Jing had disappeared and said,

“No matter who he is, within this Land of Immortal Remnants, he can’t escape.”

“He has only one way out if he wants to leave.

We, people from the Cangyun Realm and the Jiulin Realm, have already blocked the Land of Immortal Remnants, even the only exit is being guarded.”

“Although his ability to camouflage and hide is indeed good and can deceive most people, his cultivation is only at the Tribulation stage, which is his biggest flaw.”

“As soon as he steps into the exit, his Tribulation-stage cultivation will inevitably be unable to hide, and then he will certainly die.”

“That’s right...”

The middle-aged cultivator, hearing this, nodded repeatedly in agreement:

“The people from our Cangyun Realm and Jiulin Realm who came here are at least at the early Mahayana stage, while his cultivation is only at the Tribulation stage; that is his biggest flaw.”

“Even if he is able to camouflage, it’s futile; as soon as he passes through the exit, he will definitely be exposed.”

Upon hearing the conversation of the two, Lin Jing couldn’t help but fall silent.

From their conversation, Lin Jing could guess that at that exit, there must be something that could detect one’s cultivation.

And it couldn’t be hidden.

If so, he couldn't continue like this; he needed to think of a way to transcend the Heavenly Tribulation and advance to the Mahayana Realm first.

...

...

While Lin Jing was contemplating, the two outside who couldn't track Lin Jing decided to leave.

"Elder Qu, since that kid from the Xuanqing Realm has already escaped, let's not bother about that kid for now.

Let's continue looking for that giant snake."

Elder Qu nodded, saying,

"Let's go..."

"Let's continue chasing that giant snake."
