

THREE KINGDOMS: I HAVE A JOB TRANSFER PALACE

Chapter 14

"kill!"

Niu Erwa drew out his spear, roared angrily, and charged away with the Overlord's Cavalry.

As a seventh-level soldier, the king's division.

Every cavalryman is a king of soldiers, and their personal combat effectiveness is extremely powerful.

They are the only one with the Overlord's Cavalry under Xiang Yu in the past. The only difference is the tacit cooperation between each other.

This takes time to hone, and cannot be obtained instantly by changing jobs in the job palace.

But even so, the combat effectiveness of the Overlord's cavalry is not comparable to that of these Wuhuan cavalry..

What's more, the attack of enemy troops within ten feet of the city wall will be weakened by 50%.

In other words, the Wuhuan cavalry currently fighting against the Overlord's cavalry has only half its usual attack power.

With such attack power, it cannot even be used by the Overlord's cavalry.

Even the armor defenses of the

Overlord cavalry could not be broken. The attack of the Overlord cavalry could easily kill the Wuhuan cavalry in an instant.

When the black spears were waved, they could always bring a rain of blood. Screams resounded throughout the world, and each one was named Wuhuan cavalry. The Huan cavalry fell off their horses.

In just one charge, hundreds of Wuhuan cavalry were injured.

But the Overlord cavalry did not lose a single person.

Su Puyan, who was watching the battle from behind, turned black. Three thousand Wuhuan cavalry faced two hundred mountain village cavalry, and there were casualties. The gap is so huge.

Even the regular Han army cannot do this. This army must be the elite of the Han people.

As expected, the treacherous Han people cannot be trusted.

Su Puyan was filled with anger.

While saying that he would not stop him from massacring the Han people, In the mountain village, they sent elites to ambush. Are you treating yourself like a fool?

He looked up at the young man standing on the wall with a gun.

How many ambush troops do you have?

"Congratulations to the owner for completing the Thousand Kills achievement and receiving the Thousand Kills gift package. Do you want to open it immediately?"

The lolita sound of the job-changing elf suddenly sounded in my mind. When a job-changer kills enemies, Liu Feng will accumulate enemy kills.

Counting the hundreds of Wuhuan cavalry he killed before, his kills have already reached a thousand people.

"Open!"

Liu Feng's eyes lit up and he didn't hesitate at all.

In the gift package, it is 100% possible to issue a military class transfer order.

You must know that the military unit transferred through the military class transfer order will have all the equipment of that military unit.

There is no need for Liu Feng to spend money and manpower to build additional equipment for them.

This is why Liu Feng has not spent any job transfer points to let other adult men in the village transfer to different arms.

At the same time, in order to wait for the second arm to transfer Order, he also deliberately kept many adult men and did not transfer them to Overlord Cavalry.

Now, the wait is finally over

"Congratulations to the master, you have obtained the seventh-level unit, the Yinggelan Longbow Soldier's job transfer order."

Longbowmen?

Liu Feng was overjoyed. If the Overlord's cavalry is invincible among the cavalry, then the longbowmen are definitely the best among the archers.

Normally, the cavalry is the nemesis of the archers.

However, in later records, At In the Battle of Kujin, the Eagle Army destroyed 10,000 French cavalry with 5,000 longbowmen, which shocked the world. It is reasonable for the job transfer hall to list the longbowmen as a seventh-level unit.

Liu Feng took out the job transfer from the gift bag space He handed the order to the messenger beside him and said:"Take this job transfer order, go to the

village to select one hundred adult men, and go to the job transfer hall in the back mountain to transfer jobs."

"promise!"

The messenger left with the transfer order.

Outside the city, Niu Erwa, with two hundred Overlord cavalry, was still charging back and forth among the Wuhuan cavalry.

The Wuhuan cavalry had been confused since the deputy general was killed.

In addition , They always feel that they have no strength, but when they use it, they always feel weak. Over time, the fighting spirit in their hearts is exhausted.

What is left is a one-sided massacre.

"Ming Jin withdraws his troops."

Although Su Puyan didn't want to do this, he had to do it.

When the remaining soldiers returned from defeat, he led his army back ten miles to set up camp.

Then, while waiting to check the enemy's situation to see if there was any ambush, he sent people to look for the third enemy. There are two roads leading to Dashan Village.

Unfortunately, after searching for a long time, he found that there was only one way into Dashan Village.

However, this gave him an idea.

Since there was only one way in and out of Dashan Village, he was stuck in the On the way, he wanted to see how long the food in Dashan Village could last.

In the blink of an eye, two hours passed.

"Master, the longbowmen have completed their job transfer."

The Lolita voice of the job-changing elf sounded in my mind again, "One of them failed to enter the job-changing gate and has been tied up by the longbow soldiers and is rushing towards his master."

Failed to enter the job transfer gate?

Liu Feng narrowed his eyes. This person was undoubtedly a spy sent by the enemy.

After a while, ninety-nine longbow soldiers climbed onto the city wall and detained an ordinary-looking adult man.

"Sir, what are you doing?"

The man asked Liu Feng with a puzzled look on his face.

Liu Feng glanced at him lightly and ignored him, but looked at the longbowmen.

The longbowmen wore lightweight armor and had leather straps on their wrists. and leather blocks for protection.

There are also protective leather sheaths on the finger joints, and a short sword is hung on the waist.

He holds a longbow about six feet long in his hand, which is longer than the longbow in his memory. There are various points on the back. Carrying two pots of arrows, each pot contains 12 arrows.

The arrows are made of dark iron and can easily pierce the armor of the cavalry.

Their range can reach up to 300 steps, and their lethality is terrifying.
