

THREE KINGDOMS: I HAVE A JOB TRANSFER PALACE

Chapter 5

What are the unique features of these life occupations after changing jobs?

Liu Feng was a little curious.

At this time, the job transfer elf flew over and said crisply: "Although you can't fight on the battlefield after the life job change, they also have their irreplaceable role.

A powerful life job changer can use the items they create Attach additional attributes."

Is there such an ability?

Liu Feng thought carefully for a moment and then looked at his job transfer point.

The previous killing of the Wuhuan cavalry resulted in a total of 1,200 career transfer points.

After spending 500 career transfer points, he completed the second job transfer and became a second-level military commander.

Now, there are still 700 job transfer points left.

Maybe, you can find a few people to try it.

Thinking of this, Liu Feng went down the mountain, found the old man who was the best cook in the village, and took him to the job transfer hall.

Well, when did a building appear here?

The old man looked at the job transfer hall and was surprised.

Having lived here for decades, I know everything around me.

He never knew that there was such a building in the open space in the back mountain.

Entering the job transfer hall, Liu Feng said to the job transfer elf: "Little elf, transfer him to the job of chef."

The job transfer elf stretched out his hand and said like a money fan: "Master, the job transfer point that others need to transfer is Master. Twice that, the first transfer will cost 100 transfer points."

Liu Feng nodded and asked the transfer wizard to deduct 100 transfer points.

The job-changing elf then happily took the still dazed old man into the chef's job-changing door.

About a quarter of an hour later, the old man came out of the chef's job transfer door, knelt down on one knee to Liu Feng, and said loudly and forcefully: "Thank you for your kindness, my lord, I will die to serve your lord, Old Chen."

Liu Feng was stunned for a moment. Is this a sign of loyalty?

He helped the old man up and said: "Get up, don't kneel down in the future. You go and try your abilities first, and prepare lunch for us by the way."

"Yes, my lord."

Old Chen stood up and bowed respectfully before leaving.

Perhaps feeling Liu Feng's doubts, the transfer elf explained: "Master, anyone who completes the transfer in the transfer hall will be 100% loyal to the master. Never betray.

Those with ill intentions toward the lord cannot enter the job transfer gate."

Liu Feng suddenly realized that this setting is not bad.

At least he doesn't have to worry that the people he trained will turn against him in the face of battle.

"How long does it take to change the class of Overlord Cavalry?"

Liu Feng looked at the service transfer gate again and asked with a frown.

Lao Chen, who transferred later, completed the transfer and became a first-level chef.

But the thirty teenagers who went in first had not yet completed the transfer.

Transfer Elf Explained:"Master, the Overlord's Cavalry is a seventh-level unit, and the task of changing jobs is naturally much more difficult than changing to a chef.

According to estimates, they should need about two hours."

Liu Feng frowned slightly and asked,"Then can I put the transfer hall away again?"

The job transfer elf stretched out a finger and shook it:"No, someone changes jobs in the job transfer hall, and the master cannot take back the job transfer hall.

Liu Feng said depressedly:"Is it possible that I have to stay here all the time?"

The job transfer elf said with a smile:"The master does not need to stay here all the time. They will go find the master by themselves after completing the job transfer.

There is no need to worry about the safety of the Job Transfer Hall.

The transfer hall is indestructible, and the door to the transfer hall is closed. No one can open it from the outside without the owner's permission."

This feels relieved.

Liu Feng nodded, turned and left.

After he left, the door of the transfer hall slammed shut.

Half an hour later, the chef Lao Chen led the village cooks to prepare enough food for the entire village. The food.

The food was very simple, just some ordinary vegetables and wild vegetables dug in the mountains.

Some of the dishes were cooked by Lao Chen himself and were brought to Liu Feng.

These dishes were neither the color nor the aroma. Other dishes can be compared.

Liu Feng picked up a wild vegetable and tasted it. It was very delicious.

When the wild vegetable was eaten, it turned into a stream of energy flowing through the body, tempering the body.

Can this wild vegetable actually increase strength?

Lao Chen's job transfer skills , should be to increase the strength attribute of his food.

Let the people who eat his food increase their strength.

Of course, for Liu Feng today, the increase in strength is minimal.

Even if he eats it for a year and a half, he will not feel it at all. Changes.

But for ordinary people, it is definitely very obvious.

If you eat the food cooked by Lao Chen for a long time, maybe everyone in Dashan Village can become a strong man.

Yes, very edible skills.

Liu Feng showed a satisfied smile on his face.As the job-changing elf said, career-changing people may not be able to go to the battlefield to kill enemies.

But their role is irreplaceable.
