

Talent 221

Chapter 221: Returning to Zhonghai, Empress Yue's Excitement!

“Indiscriminate Attack!”

At Yagyu the Killing Sword’s command, several Emperors made their move.

Boom!

A series of attacks landed within the Sakura God Tree’s internal space. Under such intense assault, those with the talent for invisibility had no chance to evade.

Beside the tree’s core.

Ye Tian silently lamented; he had originally planned to steal all the sakura sap, but now, some still remained.

“Forget it, let’s leave this bit of sakura sap. Maybe the people of the island nation can revive the Sakura God Tree. It wouldn’t be bad to come back and harvest more later.”

With this in mind, Ye Tian gave up on continuing to extract the sakura sap.

As for the Emperors’ attacks, he couldn’t completely avoid them, and being discovered was inevitable.

Moreover, the exit was blocked, so he had to forcefully break through.

“Spatial Imprisonment!”

Ye Tian used his spatial talent to freeze the area.

Then, he teleported to the wooden door.

At that moment, the door was blocked by two Emperors.

“Scram!”

With a single strike, Ye Tian killed the two Emperors and forcefully burst out.

All this was done in the blink of an eye.

After rushing out of the Sakura God Tree, Ye Tian passed through the Sakura Hall and entered the outside world, becoming invisible again.

Yagyu the Killing Sword’s face darkened; he had failed to stop his opponent.

Now that the opponent had entered the outside world and become invisible, it was impossible to find him unless he attacked the entire base.

But would he dare?

Attacking the entire base would mean destroying it.

“Lord Sword Emperor Yagyu, only about 50 jin of sakura sap is left. Losing over ninety-nine percent of it, the Sakura God Tree, this wondrous object, is likely ruined!” said an Emperor with a heavy expression.

“We must save the sakura sap at all costs. This wondrous object is a gift from heaven, the hope for the rise of our Sakura Super Base. Without it, our development will be significantly hampered!” Yagyu the Killing Sword declared.

“Yes!”

The Emperors of several major forces responded.

“Lord Sword Emperor Yagyu, the mysterious Emperor who stole the sakura sap just now seemed to be... Yagyu Hakaru!”

An Emperor spoke up.

“Yes, I saw it too. It looked like Yagyu Hakaru, but isn’t he dead?”

“Yagyu Hakaru is extremely reckless and unbridled. It might indeed be his doing. That corpse might be problematic.”

“Lord Sword Emperor Yagyu, we should examine Yagyu Hakaru’s corpse. If it’s a fake, we’ve all been fooled!”

In fact, not only these Emperors noticed, but Yagyu the Killing Sword also recognized the face of the man, identical to Yagyu Hakaru. However, he was too angry to mention it at the moment.

Now that the other Emperors mentioned it, he naturally decided to investigate Yagyu Hakaru’s corpse.

“Let’s go check Yagyu Hakaru’s corpse!”

Yagyu the Killing Sword said.

Yagyu Hakaru’s corpse was placed in his original residence. Everyone arrived at Yagyu Hakaru’s palace and began to examine the body.

Upon a thorough inspection, they discovered the issue.

“The body has been tampered with; this is not Yagyu Hakaru’s corpse!”

Yagyu the Killing Sword was furious.

He was certain that the Emperor who stole the sakura sap was Yagyu Hakaru.

“Good, very good. Yagyu Hakaru, you’ve hidden yourself so deeply, possessing talents in space, soul attacks, and invisibility. You’ve probably been using the sakura sap for years to enhance these three talents. Now that they’ve improved significantly, you began planning to seize the sakura sap!”

“Yagyu Hakaru, you are too selfish. You are a criminal of our Sakura Super Base and a traitor to the island nation!”

Yagyu the Killing Sword roared continuously, his voice echoing for miles.

The other Emperors were also furious. By stealing over ninety-nine percent of the Sakura God Tree, they were deprived of their interests, even affecting their descendants’ access to the sakura sap.

This was tantamount to opposing the entire Sakura Super Base!

Alas, they couldn’t find Yagyu Hakaru, nor did they know how to search for him.

Perhaps Yagyu Hakaru had already fled the Sakura Super Base at the first opportunity.

The long-dead Yagyu Hakaru had no idea that he was being blamed for such a significant issue, becoming a criminal in the eyes of the Sakura Super Base, doomed to be infamous forever.

For several days, Yagyu Hakaru was nowhere to be found. The Emperors gave up on searching for him but publicized his crimes, revealing the destruction of the Sakura God Tree but concealing the matter of the sakura sap.

That night,

Ye Tian arrived at the headquarters of the Hanazono Sect.

He enveloped a pavilion with his copy talent, where a meeting was being held inside.

“Good, five Emperors are here!”

Ye Tian smiled coldly.

The five Emperors of the Hanazono Sect were not very strong; the strongest barely reached the level of the thirty-six Emperors and were not particularly formidable.

Such five Emperors, he could kill in an instant.

Boom!

Ye Tian burst in, using spatial imprisonment to lock the void.

Pfft! Pfft! Pfft!

With each slash, he killed the five Emperors of the Hanazono Sect in just five strikes.

Simultaneously,

Ye Tian used his fire domain talent and Five Elements Transformation talents. Its immense power almost instantly destroyed the Hanazono Sect's headquarters, burning many Grandmasters, Kings, and Saints to death.

The Hanazono Sect was annihilated in a single breath.

"Hanazono Sect, you brought this upon yourselves for daring to attack Huaxia's major base!"

Ye Tian felt no cruelty; he would kill as many cold-blooded islanders as there were.

Swoosh!

He activated his invisibility talent and left.

Soon after, several Emperors arrived at the Hanazono Sect headquarters, only to find the burnt ruins and numerous corpses, including the remains of the five Emperors.

“The five Emperors of the Hanazono Sect died from sword techniques. The perpetrator has disappeared. The primary suspect: Yagyu Hakaru!”

An Emperor declared after inspecting.

Unavoidably, Yagyu Hakaru was blamed again.

...

After destroying the Hanazono Sect, Ye Tian did not stay in the Sakura Super Base. He left directly and returned to the Huaxia lands.

Soon, Ye Tian was back at Zhonghai Super Base.

In the Tian Pavilion,

Ye Tian sat with Empress Yue in a room.

“Yue’er, I made a great harvest in the Sakura Super Base!”

Ye Tian eagerly took out a barrel of sakura sap.

“What is this?”

Empress Yue curiously looked at the sakura sap.

“This is sakura sap, a miraculous substance from the Sakura God Tree. It can enhance a person’s talents and even elevate someone’s cultivation talent to the Morning Star level. It can also improve special talents, raising even weak talents to the top level,” Ye Tian explained.

“That’s incredible!”

Empress Yue was amazed.

Such a treasure was unheard of to her.

“Yue’er, try some!”

Ye Tian suggested.

“Okay!”

Empress Yue drank some sakura sap, finding it tasty and feeling a warm sensation deep in her soul as the energy of the sakura sap was absorbed by her talent marks.

Empress Yue quickly absorbed the sakura sap energy using her Moon Hand talent.

Time passed,

Ye Tian observed Empress Yue’s talent situation and soon noticed changes in her talents.

Human: Empress Yue

Cultivation Talent: Dawn

Strength Talent: Mystic

Defense Talent: Mystic

Speed Talent: Pseudo-Mystic (90%)

Moon God Talent: Mystic

Moon Blade Talent: Top

Moon Hand Talent: Top

Originally, Empress Yue's Moon Hand talent was only high-level, but now it had transformed into top-level.

"Husband, my Moon Hand talent has evolved to top-level!"

Empress Yue exclaimed in surprise.

"Yue'er, you can start collecting treasures that increase talents. Focus on those that can enhance your own strength. Even if they can only increase weak talents, collect them," Ye Tian advised.

"Okay!"

Empress Yue nodded excitedly.

With the sakura sap, her strength was sure to grow rapidly.

Chapter 222: Insane Boost in Talent level!

Empress Yue had gone to collect treasures. Though, it was rare to find treasures that can enhance the talents of an Emperor-level being, finding just one would be a huge gain.

Meanwhile, Ye Tian started his closed-door cultivation, aiming to use the sakura juice to enhance his other talents.

"Let's start with the healing talent!"

Ye Tian's healing talent was copied from the Sakura Super Base, a mere basic level healing talent, perfect for experimenting.

Swallowing a dose of sakura juice, a gentle energy surged into his soul.

Ye Tian seized this opportunity to activate the talent imprint of his healing ability, absorbing the energy of the sakura juice.

Boom!!!!

His healing talent began to transform, rapidly advancing to an intermediate level, and as he absorbed more sakura juice energy, it gradually elevated to a high level.

Half an hour later, the energy from the sakura juice was depleted.

“I didn’t reach the top level!”

Ye Tian wasn’t surprised.

The energy from a dose of sakura juice could only elevate a talent from high to top level, not from basic to top.

Ye Tian drank another dose of sakura juice, finally elevating his healing talent to the top tier.

Top-tier healing talent was far more powerful than the basic level, capable of curing almost all diseases, injuries, and even weak states, with only a few rare injuries beyond its reach.

The second talent Ye Tian chose to enhance was the Substitute Death talent.

Substitute Death was an incredible talent, but his was only of an intermediate level, with significant limitations: firstly, it could only be used once every three years; secondly, it had a distance limit of over 1 million miles.

Valuing this life-saving talent, Ye Tian naturally wanted to elevate it to the top tier.

“Gulp!”

Ye Tian swallowed two doses of sakura juice, attempting to raise his Substitute Death talent to the top tier in one go.

Half an hour later.

Ye Tian felt disappointed and puzzled as his intermediate Substitute Death talent had not advanced to the top, not even to the high level.

“What’s going on?”

Ye Tian was perplexed.

After drinking another dose of sakura juice, he managed to elevate the Substitute Death talent from intermediate to high level.

“I understand now. Generally, a talent only needs a dose of sakura juice to upgrade from high to top level. However, some talents are special and require more sakura juice to make that leap. Substitute Death is a heaven-defying talent, naturally requiring a lot of sakura juice to reach the top tier!” Ye Tian finally understood.

So, he continued to drink sakura juice, consuming a total of one and a half jin before finally elevating it to the top tier.

In other words, Ye Tian used a total of one jin and eight taels of sakura juice to elevate the Substitute Death talent to the top tier.

If those at the Sakura Super Base, especially the Emperor-level beings, knew this, they would feel heartache, but Ye Tian, having acquired a large amount of sakura juice, didn’t mind at all.

Elevating the Substitute Death talent to the top tier, although costly, greatly satisfied Ye Tian.

The top-tier Substitute Death talent could be used once every three months, and as long as it was within a billion kilometers, it could be activated, almost allowing Ye Tian to use the top-tier Substitute Death talent on Earth without any distance limitation.

Such a Substitute Death talent was indeed heaven-defying!

Next.

Ye Tian aimed to enhance his third talent, the high-level Soul Transfer talent, which was also incredible and greatly beneficial to him. Thus, Ye Tian also wanted to elevate it to the top tier.

To his surprise, this talent required a total of five tael of sakura juice to reach the top tier.

The top-tier Soul Transfer talent was much more powerful than the high-level one, allowing Ye Tian to occupy the bodies of other beings while maintaining his full talent level, not degrading a level, and the cooldown time was not a year anymore, but three months.

With this, the top-tier Soul Transfer talent became incredibly heaven-defying and even more useful.

Afterwards.

Ye Tian elevated talents like Shadow Clone, Endurance, and Beast Control to the top tier, using not too much sakura juice in the process.

Finally.

Ye Tian was left with only one talent yet to be enhanced.

“Time Talent!”

Ye Tian’s Time Talent was just at the basic level, but its effects were incredibly heaven-defying, almost more useful than the Space Talent.

However, Time Talents were exceedingly rare. Ye Tian had only encountered one beast with Time Talent and never found it in any other beast, thus unable to copy any other Time Talents.

He had thought it would be a long time before he could enhance his Time Talent, but the sakura juice gave him hope.

“Gulp!”

Ye Tian drank down a jin of sakura juice and immediately activated the Time Talent imprint to absorb the juice’s energy.

Time slowly passed—

Half an hour later, Ye Tian opened his eyes, filled with disappointment.

A whole jin of sakura juice, and yet it had not elevated his Time Talent from basic to intermediate. The difficulty of enhancing supreme talents was beyond his expectations.

“Keep drinking!”

Ye Tian swallowed another jin of sakura juice, but still, the level of his Time Talent did not increase.

However, Ye Tian could feel the Time Talent slowly improving, indicating that the sakura juice was effective, albeit weak.

Drink!

Drink!

Drink!

Ye Tian was not concerned about using up the sakura juice. If it could enhance his Time Talent, no amount was too much.

Five hours passed!

Ye Tian had consumed a total of 10 jin of sakura juice, finally triggering a transformation in his Time Talent.

Under his Copied Talent observation, the Time Talent finally advanced from basic to intermediate.

Seeing this, Ye Tian breathed a sigh of relief.

Intermediate Time Talent was much stronger than the basic level, able to accelerate time by five times or slow it down by the same amount, and it gained a new ability—Time Stasis!

Time Stasis created a momentary pause in time. The so-called pause was relative; it was ineffective against incredibly powerful beings, but for peers, this ability was monstrous, capable of turning the tide of battle.

However, Time Stasis couldn't be continuously used, basically available once an hour, but it became one of Ye Tian's trump cards.

"Intermediate Time Talent is strong, but it should be able to continue advancing!"

Ye Tian eagerly continued to drink sakura juice, crazily consuming it jin by jin, treating it like water.

Ten days later.

Ye Tian had consumed a total of 500 jin of sakura juice, a quantity that would surely be deemed wasteful by the Emperor-level beings of the Sakura Super Base.

But Ye Tian didn't care, feeling that his Time Talent was about to transform again.

Another jin of sakura juice went down his throat!

Boom!!!!

The Time Talent began to transform.

For a moment, Ye Tian felt his consciousness in a continuous state of stasis.

He didn't know how long it lasted before he slowly regained consciousness.

The first thing he did was to check his talent status.

【Time Talent: High】

Looking at those words, Ye Tian was ecstatic.

“Keep drinking!”

Ye Tian took another sip of sakura juice, preparing to refine the juice to enhance his Time Talent further, thinking of elevating it to the top tier, but soon he was stunned.

“It's ineffective now!”

Chapter 223: High-level Time Talent, The Blade of Time!

Ye Tian clearly felt that the sakura juice no longer had any effect on enhancing his time talent. Let alone drinking a jin, even drinking all of it wouldn't elevate his time talent to the highest level.

Time talent is undoubtedly the most mysterious talent in the world and is extremely difficult to enhance.

“It seems that the sakura juice is not useless. To further improve time talent, I can only copy the time talent of other beings. Well, having high-level time talent is already against the heavens and more than sufficient!” Ye Tian comforted himself.

High-level time talent can accelerate time by tenfold or slow it down by the same factor. Its time stasis effect has also significantly strengthened. Even an Emperor-level being of the same rank, once affected by Ye Tian's time stasis, would definitely be frozen for a second.

Being frozen for a second might not seem much, but it could be fatal if one lacks life-saving measures.

Moreover, high-level time talent now includes an additional ability – The Blade of Time!

The Blade of Time does not contain much attack power, but it is terrifying, especially for those with little life remaining. To them, The Blade of Time could easily spell their doom.

The Blade of Time can reduce one's lifespan!

With Ye Tian's current strength, using The Blade of Time could reduce someone's lifespan by ten years in one go. He could use it up to ten times in a day. However, if he forced its use beyond that limit, his own lifespan would be halved.

“The Blade of Time is not very useful against young and strong fighters, but it's horrifying against old monsters whose lifespans are nearing their end. Even if their power is unimaginably strong, they would still perish once hit by The Blade of Time!”

Ye Tian was very satisfied with The Blade of Time, considering it a trump card.

Of course.

What he cared about most was the ability to accelerate time, which could improve his training speed tenfold!

He could train for ten days, while only one day would pass in the outside world, effectively making his training time ten times longer than others!

Afterwards.

Ye Tian tested and found that the sakura juice had no effect on copied talents. This was probably due to the multiple transformations of his copied talent, making it hard to enhance further, just like his time talent.

“Although the sakura juice is of little use to me, it can be greatly beneficial for Yue’er, my sister Little Yu, and other core members of the Tian Pavilion in the future. But it can’t be called sakura juice anymore; it needs a new name!”

After pondering for a while, Ye Tian came up with a name.

“Divine Talent Elixir!”

The name Divine Talent Elixir was very apt, and to Ye Tian, it sounded much better than sakura juice.

A few days later.

Empress Yue finally acquired a treasure at a great cost.

“Husband, I have traded with the Battle Axe Emperor for a treasure – Sword Grass. It helps martial warriors condense sword technique talent. For those below the King level, it can condense intermediate or higher sword technique talent. For Emperors, it can only condense weak sword technique talent, but it’s still very precious. For Emperors without any weapon-class talent, it can double their strength! Initially, he was not willing to trade, but when I mentioned that I had obtained a treasure that could elevate high-level talents to the top level, regardless of the type, he agreed to the exchange!” Empress Yue said happily.

“You actually got Sword Grass!!!”

Ye Tian was truly astounded.

Weapon-class talents and other talents like fist and claw techniques are very difficult to enhance, as they can be combined with strength talents – a desirable combination for many.

Over ninety percent of Emperors lack these types of talents, indicating how difficult it is to acquire them. A single Sword Grass, if placed in the Sakura Super Base, would undoubtedly lead to a battle among Emperors.

The Battle Axe Emperor, feeling that Sword Grass could only grant weak sword technique talent to Emperors and already possessing top-level Battle Axe talent, deemed it useless, thus trading it with Empress Yue for such value.

“A huge profit!”

Ye Tian was overjoyed for his wife.

“With the Sword Grass, I can condense weak sword technique talent, and then use the sakura juice to elevate it to the top level!” Empress Yue said excitedly.

You should know that although her Moon God talent can comprehensively enhance speed, strength, defense, and reaction capabilities with great amplification effects, it still falls short compared to top-level sword technique talents.

Once she possesses the top-level sword technique talent, she can cultivate gold-level sword techniques, and her strength will undoubtedly skyrocket.

At that time.

Even at the same realm, she would be able to defeat the Battle Axe Emperor, not to mention that she is about to break through her fourth physical limit soon, which will greatly increase her combat power.

“Yue’er, quickly assimilate the Sword Grass. I will guard you!”

Ye Tian said with great anticipation.

“Okay!”

Empress Yue sat cross-legged and began to assimilate the Sword Grass.

Humming sounds filled the air.

Streams of sword laws infused from the Sword Grass into Empress Yue's body, forging her sword technique talent.

Half an hour later, the Sword Grass turned to dust, and Empress Yue finally developed her sword technique talent.

[Sword Technique Talent: Weak]

“Yue'er, quickly take the Divine Talent Elixir!”

Ye Tian urged hurriedly.

“What's the Divine Talent Elixir?”

Empress Yue asked, puzzled.

“It's the sakura juice, just a new name I gave it!” Ye Tian explained.

“That makes sense. If we continue to use the name sakura juice, it might not be good if it gets exposed. The name Divine Talent Elixir is indeed better!” Empress Yue also approved of this name.

Immediately, she took out a tael of Divine Talent Elixir and swallowed it.

Ye Tian had given her plenty of Divine Talent Elixir, so she was not short of it for the time being.

Swallow!

Absorb!

Swallow!

Absorb!

After using a total of four taels of Divine Talent Elixir, Empress Yue finally elevated her sword technique talent to the top level.

“Husband, my sword technique talent has been raised to the top level!”

Empress Yue said excitedly.

“Yue’er, your next main task is to cultivate sword techniques. Start from the basics to lay a solid foundation. With the Enlightenment Stele, comprehending sword intent won’t be difficult!” Ye Tian said.

“Understood!”

Empress Yue nodded.

Following that, Ye Tian also gave some Divine Talent Elixir to Little Yu, elevating several of her talents to the top level, which multiplied her strength many times over.

Ye Tian decided not to use the remaining Divine Talent Elixir for the time being.

Such a rare treasure, even for Tian Pavilion members, must be granted only to those who have made significant contributions, are loyal, and have no bad records.

Randomly bestowing it would definitely lead to major problems.

In the following days, Ye Tian and Empress Yue began their closed-door cultivation.

With the tenfold time acceleration, their cultivation speed increased dramatically.

In just half a month, Empress Yue broke through her fourth physical limit and also comprehended sword momentum and intent. She cultivated three bronze-level sword techniques to perfection and began to try cultivating silver-level sword techniques.

Ye Tian also made significant progress. His Sword Dao realm had reached 15%. Although it was still far from 20% Sword Dao realm, in a few more months, he would be able to successfully step into 20% Sword Dao realm.

Additionally, Ye Tian was not far from breaking through his seventh physical limit.

Chapter 224: Tianfu Base, Teleportation Array Design Diagram!

On this day.

Ye Tian and Empress Yue were in seclusion when a message arrived from the Battle Axe Emperor.

“An Emperor-level Emergency Meeting!”

Ye Tian frowned.

It must’ve be a major issue; otherwise, the Battle Axe Emperor would not convene an emperor-level meeting.

And it was probably about a significant matter concerning Zhonghai Super Base!

Although Ye Tian was the strongest in Zhonghai Super Base, many matters of the base were managed by the Battle Axe Mercenary Hall, such as the maintenance of formations, public order, and the City Gate.

Ye Tian, despite his great strength, was not yet capable of replacing the Battle Axe Mercenary Hall.

“Yue’er, the Battle Axe Emperor has sent a message to hold an emperor-level meeting. Did you receive it too?”

Ye Tian asked.

“Yes!” Empress Yue nodded. “Not only did the Battle Axe Emperor send a message, but the emperor-level elders of the Moon God Sect also sent one. It seems to be related to other super bases and appears to be a major incident!”

“Then let’s go check it out!”

Ye Tian and Empress Yue immediately ended their seclusion to attend the emperor-level meeting.

Battle Axe Mercenary Hall, Headquarters.

Ye Tian and Empress Yue arrived hand in hand!

Emperor Qin, Emperor Kurong, and other emperors arrived one after another, gathering in a large hall.

Once all the emperors were seated, the Battle Axe Emperor distributed a set of documents to each of them.

“Tianfu Base!”

Ye Tian looked at the information about a base and his expression slightly changed.

Tianfu Base was mysterious and powerful, even more so than Zhonghai Super Base, because it possessed multiple powerful legacies.

Rumor has it that Tianfu Base not only guarded three or four five-star space rifts but also occupied half the territory of a beast world behind a five-star rift, battling the beast world to a standstill and even gaining the upper hand.

Of course.

Whether this rumor was true, Ye Tian did not know.

Since Tianfu Base was far from Zhonghai Super Base, the emperors were too lazy to visit, and there was almost no interaction between the two super bases.

“Everyone, take a look. Tianfu Base contacted us recently and sent us a design diagram, and the purpose of Tianfu Base is mentioned in the documents!” said the Battle Axe Emperor.

Ye Tian quickly went through the documents and finally understood the purpose of the meeting.

“Teleportation array!”

Ye Tian knew about teleportation arrays from novels, but this was the first time he heard of one in the real world, and Tianfu Super Base had already developed one.

Ye Tian naturally did not believe that people of Tianfu Super Base created the teleportation array design diagram on their own; it must have been obtained from some relic.

“This is a basic teleportation array design diagram. It allows free teleportation within a hundred thousand miles. It can be used between small bases, but it’s not very useful for our super bases. With our emperor-level speed, a hundred thousand miles is but a moment,” said the Battle Axe Emperor, showing a design diagram.

The emperors nodded, agreeing that a basic teleportation array was indeed not very useful.

However, the documents mentioned that Tianfu Super Base had not only a basic teleportation array but also intermediate, advanced, and top-level teleportation array design diagrams.

However, giving away design diagrams for anything above intermediate level would not be easy; a certain price must be paid.

The intermediate teleportation array design diagram could teleport over a distance of one million miles, which was enough for rapid transportation between super bases and large and small bases nearby. This would be very convenient. In case of an emergency at a large base, the super base could send reinforcements in time. The super base could quickly gather resources from other bases, and the large bases could acquire knowledge from the super base, benefiting each other.

However, the price set by Tianfu Super Base for the intermediate teleportation array design diagram was 1 million yuan qi stones.

For the advanced teleportation array design diagram, allowing free teleportation within 10 million miles, Tianfu Super Base set the price at 10 million yuan qi stones.

As for the top-level teleportation array design diagram, Tianfu Super Base had not set a price, probably because the distance between Zhonghai Super Base and Tianfu Super Base was less than 10 million miles.

Once the advanced teleportation array is constructed, the warriors of Zhonghai Super Base could instantly arrive at Tianfu Super Base.

However,

This was just the price for a design diagram; constructing the teleportation array would also incur a huge cost.

Constructing an advanced teleportation array would require the help of someone with high-level space talent, or it could be built using space stones to form the foundation of the teleportation array. Zhonghai Super Base did not have space stones, and although Tianfu Super Base did, the stones were extremely expensive, not cheaper than the design diagrams.

“Battle Axe Emperor, Tianfu Super Base is really asking for too much. Our Zhonghai Super Base is already heavily consuming yuan qi stones. The veins we have can barely sustain our consumption. If we purchase these teleportation array design diagrams, who will foot the bill of these yuan qi stones?” Emperor Qin expressed his dissatisfaction.

“Emperor Ye Tian, do you have any suggestions?”

The Battle Axe Emperor turned to Ye Tian.

Ye Tian spoke, “I suggest we should still construct the teleportation array. As for the high-level space talent required, I can help with the construction, so we don’t need to buy space stones, saving that expense. As to why we should build the teleportation array, I want to ask everyone,

if all the super bases in Huaxia and other regions become interconnected and our Zhonghai Super Base is not, won't we fall far behind?"

"If other super bases are communicating with each other and we are not, we will definitely lag behind!"

The Battle Axe Emperor and others nodded in agreement.

Ye Tian continued, "I recently visited other super bases and learned that some things valuable to our Zhonghai Super Base are not considered precious there. Conversely, what we don't value much is needed by others. Once the teleportation array is operational, trade will flourish, bringing opportunities to every super base and accelerating their development. Although the advanced teleportation array design diagram costs 10 million yuan qi stones, the cost can be shared among the many powers of Zhonghai Super Base. Moreover, once the teleportation array is established, if one day Zhonghai Super Base faces a crisis, we can seek help from other super bases. This is beneficial for the whole of Huaxia!"

"I agree with building the teleportation array!"

Empress Yue immediately supported Ye Tian, her husband.

The emperors of the Moon God Sect also expressed their support.

"I also agree with Emperor Ye Tian's opinion, what do you all think?"

The Battle Axe Emperor asked the other emperors.

"Since Emperor Ye Tian has said so, we also agree!"

One by one, the emperors agreed to construct the teleportation array.

After the emperor-level meeting ended, the Battle Axe Emperor got busy contacting people from Tianfu Super Base to negotiate the purchase of the advanced teleportation array design diagram.

Three days later.

An emperor from Tianfu Super Base arrived, bringing the advanced teleportation array design diagram.

The Battle Axe Emperor immediately informed Ye Tian, as the foremost powerhouse of Zhonghai Super Base, his involvement was essential.

Moreover, with a top-level space talent, Ye Tian's help was crucial in constructing the teleportation array.

Chapter 225: Trading for Advanced Teleportation Array Designs!

Battle Axe Mercenary Hall.

Ye Tian came alone and soon met an Emperor-level powerhouse from Tianfu Super Base.

“Emperor Ye Tian, this is Emperor Xing Huo from Tianfu Super Base!”

The Battle Axe Emperor introduced to Ye Tian.

“Emperor Xing Huo, this is Emperor Ye Tian, the strongest in our Zhonghai Super Base~!”

The Battle Axe Emperor then introduced Ye Tian to Emperor Xing Huo.

Ye Tian briefly greeted the other party before they both sat down.

In secret.

Ye Tian used his copying talent to check the other's talents.

Human: Zhang Xing

Cultivation Talent: Moonlight

Strength Talent: Mystic

Defense Talent: Mystic

Speed Talent: Top

Fire Spear Talent: Mystic

“Three Mystic-level talents, and judging by the aura, he has broken through the physical limit twice or thrice, belonging to the rank of the thirty-six Emperors,” Ye Tian deduced.

He didn’t regard such a level of powerhouse highly, but the fact that Tianfu Super Base casually sent one indicated their strength.

“Emperors, I am here to trade the designs for an advanced teleportation array, 10 million yuan qi stones, and the space stones needed for constructing the advanced teleportation array costs another 10 million yuan qi stones!”

Emperor Xing Huo spoke directly, his tone somewhat arrogant.

In fact, Emperor Xing Huo looked down on Zhonghai Super Base, as the gap between them was vast. Both were super bases, but Zhonghai and Tianfu were leagues apart.

He didn’t want to waste time at Zhonghai Super Base.

“We don’t need the space stones, our Zhonghai Super Base can construct the teleportation array!”

Ye Tian said.

Upon hearing this, Emperor Xing Huo was visibly surprised: “Does your Zhonghai Super Base have a High-level Space Talent?”

High-level Space Talents were very rare, even in Tianfu Super Base. There were only a few, and two of them, due to cultivation talent issues, had difficulty advancing to the Emperor level.

There was only one Emperor-level High Space Talent, but they also had a Top-level Space Talent.

Tianfu Super Base valued these High Space Talents greatly, always protected by Emperor-level powerhouses.

He had visited several super bases, none of which had High Space Talents, and all had reluctantly purchased space stones.

“I have a High-level Space Talent!”

As Ye Tian spoke, a spatial blade appeared in his hand, its terrifying aura spreading.

Emperor Xing Huo’s expression changed drastically, fear evident on his face.

He sensed a threat to his life. If the spatial blade targeted him, he wouldn’t even have a chance to escape.

This spatial blade could instantly kill him!

“So strong!”

Emperor Xing Huo dared not underestimate the Emperor of Zhonghai Super Base anymore, his face becoming serious, shedding his previous disdain.

“Emperor Xing Huo, I can construct the teleportation array, so we don’t need to buy space stones. Shall we proceed with the trade for the advanced teleportation array designs?” Ye Tian asked.

“Yes, yes, yes!!!”

Emperor Xing Huo nodded repeatedly, his attitude having completely changed.

The Battle Axe Emperor, witnessing this scene, couldn't help but sigh that strength was everything.

Although he was stronger than Emperor Xing Huo, he knew the latter wouldn't fear him much, as he wasn't powerful enough to drive Emperor Xing Huo to despair, unlike Ye Tian, whose strength had indeed done so.

The trade then commenced!

During these three days, various forces gathered 10 million yuan qi stones. Since Ye Tian was involved in constructing the teleportation array, he saved Zhonghai Super Base 10 million yuan qi stones, thus he didn't need to contribute any yuan qi stones himself.

During these three days, various forces gathered 10 million yuan qi stones. Since Ye Tian was involved in constructing the teleportation array, he saved Zhonghai Super Base 10 million yuan qi stones, thus he didn't need to contribute any yuan qi stones himself.

"This is 10 million yuan qi stones, count them!"

Ye Tian and the Battle Axe Emperor handed over a storage bag containing 10 million yuan qi stones to Emperor Xing Huo. After checking, Emperor Xing Huo took out a design diagram.

"Both Emperors, you must be well aware of the importance of the advanced teleportation array design. You must ensure that it does not leak from your Zhonghai Super Base, or Tianfu Super Base will surely hold you accountable!"

Emperor Xing Huo reminded them.

This rule wasn't set by him but by Tianfu Super Base, and he had to mention it.

As for taking an oath?

It was pointless because many people would be involved in constructing the teleportation array, and it wasn't feasible to have everyone swear an oath. Moreover, once such designs are handed over, they can be spread even if an oath is taken.

Therefore,

Tianfu Super Base didn't demand other super bases to take an oath but just to ensure confidentiality and not to trade the designs, or they would not be lenient.

"Don't worry! We won't leak it!"

The Battle Axe Emperor assured.

Zhonghai Super Base, being far weaker than Tianfu Super Base, naturally wouldn't commit such an offense.

Moreover, soon all the major super bases would have the advanced teleportation array designs, so who would they sell them to?

After the trade, Emperor Xing Huo left in a hurry.

"Emperor Ye Tian, I've checked, and the materials needed for this advanced teleportation array are not only numerous but also very precious. Some can even be used to forge Morning Star-level weapons!"

The Battle Axe Emperor frowned.

"If an advanced teleportation array could be built with ordinary materials, that would be strange. How long will it take to gather all the materials?" Ye Tian asked.

After some thought, the Battle Axe Emperor replied, "If all the major forces work hard, it should take about half a month to gather everything!"

"Good, in half a month, I will personally assist the array masters in constructing the advanced teleportation array!"

Ye Tian promised.

“Then we will rely on Emperor Ye Tian at that time!”

The Battle Axe Emperor thanked him with a fist salute.

During this half month, Ye Tian entered seclusion again, and with the help of tenfold time acceleration, his cultivation finally broke through, surpassing the seventh physical limit.

Meanwhile, his Sword Dao Realm, with the help of the Enlightenment Stele and tenfold time acceleration, also made some progress, reaching 17%.

The progress in the Sword Dao Realm was indeed slow, but there was no way around it. After all, Ye Tian’s swordsmanship talent was only at the Morning Star level. If it could be elevated to the Moonlight level, then his understanding of the Sword Dao Realm would accelerate.

Unfortunately, while there were many with top-level swordsmanship talent, Ye Tian only encountered one with Morning Star-level swordsmanship talent in the Temple Space, belonging to a genius from the ancient civilization era.

Whether he could meet a Morning Star-level swordsmanship talent genius in this era was uncertain.

So, improving his swordsmanship talent depended on luck.

On this day.

Ye Tian arrived at the Teleportation Hall.

This was a hall built specifically for teleportation arrays within Zhonghai Super Base.

The Teleportation Hall, located in the Zhonghai area of the super base, was vast, as it was not only to house the advanced teleportation array but also to establish several intermediate teleportation arrays to connect the nearby bases to Zhonghai Super Base.

Although Zhonghai Super Base did not purchase the intermediate teleportation array designs, they could deduce them from the advanced teleportation array designs, which wasn't very difficult.

Therefore, they didn't purchase the intermediate teleportation array designs.

Entering the Teleportation Hall, Ye Tian went to the second floor, where the advanced teleportation array was to be constructed.

"Emperor Ye Tian, all materials for the teleportation array have been gathered, and we can set it up anytime!"

A top array master approached Ye Tian and reported respectfully.

Chapter 226: Frantic Construction of the Teleportation Array!

"Then let's get started!"

Ye Tian nodded and said.

He had already examined the design for the advanced teleportation array. If one were to set it up alone, it would be quite troublesome due to the intricate and dense array patterns. Only with multiple array masters working together could it be completed in a short time.

Ye Tian's task was to use the power of space to construct spatial array patterns, connecting them with other patterns to form a complete spatial teleportation array.

Without the advanced teleportation array design, Ye Tian wouldn't have known about these spatial array patterns, but upon seeing them, he learned them instantly.

Over the past few days, he had fully comprehended these spatial array patterns and could easily inscribe them.

Boom!!!

One by one, the array masters began inscribing patterns and used rare materials to construct a massive array altar.

Each array master was extremely diligent, not daring to be the slightest bit lax.

Several hours passed.

A colossal teleportation array altar had been established on the second floor of the Teleportation Hall, perfectly embedded into the ground.

“Master Ye Tian, please proceed!”

An array master said respectfully.

“Alright!”

Ye Tian manipulated the power of space from the void to inscribe spatial array patterns.

Swoosh, swoosh, swoosh!!!

He inscribed one spatial array pattern after another on the teleportation altar, linking them with other patterns to create a massive teleportation array space with countless entrances and exits, connecting to unknown locations of other teleportation arrays.

Time ticked by, and the teleportation array shone brightly. Wisps of spatial power spread out, causing the other array masters to step back to avoid being affected.

After a full hour, Ye Tian finally completed the construction of the advanced teleportation array.

“Done!”

Ye Tian sighed in relief.

Next, he began constructing an intermediate-level teleportation array, which was much simpler. In just an hour, an intermediate-level teleportation array was built.

Now came the testing phase!

Each teleportation array had a unique marker and coordinates. The array's teleportation space could record the coordinates of other teleportation arrays, allowing for teleportation to a designated array upon inputting the coordinates.

Now, they were about to test whether teleportation between the two arrays was possible.

A King-level practitioner, somewhat nervous, stood in the intermediate-level teleportation array, inserting a yuan qi stone as energy into the array's slot to activate it.

“Teleport!”

Whoosh, the King-level expert vanished.

In the next instant!

The King-level expert appeared on the advanced teleportation array on the second floor, completely unharmed.

The teleportation was successful!

They continued to construct other intermediate-level teleportation arrays.

For several days, Zhonghai Super Base was busy creating teleportation arrays, establishing a total of 12 intermediate-level teleportation arrays.

Subsequently, Ye Tian and other array masters entered various large bases near Zhonghai Super Base, helping them construct intermediate-level teleportation arrays.

Of course.

This was not free, as certain resources and yuan qi stones were required. Otherwise, wouldn't Zhonghai Super Base be at a loss?

Many large bases were not stingy with their resources and yuan qi stones, eagerly agreeing to construct teleportation arrays. After all, being able to connect with a super base and enter it at any time was something they were extremely happy about!

On this day.

Ye Tian arrived at Demon Sea Base with a group of array masters.

Boom!!!

As Ye Tian descended, an aura enveloped Demon Sea Base, and all the King-level practitioners sensed it, flying out.

Yun Mengli saw Ye Tian and immediately greeted him respectfully: "Greetings, Master Ye Tian!"

Immediately.

He saw the many people behind Ye Tian, including King-level and even Saint-level beings.

"They are array masters, each one a high-level practitioner or above!"

Ye Tian introduced.

"Array masters!!!"

Yun Mengli's expression changed.

There were easily over a hundred array masters, and all of them were high-level or above. Such a lineup was incredibly luxurious.

He was puzzled why Ye Tian had brought so many array masters.

Could it be to rebuild the defense system for Demon Sea Base?

“Yun Mengli, now, every large base has built an intermediate-level teleportation array. Intermediate-level teleportation arrays allow for free teleportation within 1 million kilometers. Once they’re built, the large bases can freely travel between each other and to the super base, which is very convenient. Of course, there are restrictions on which warriors from the large bases can come to the super base, not just anyone can come.”

Ye Tian explained.

“Teleportation array!!!!”

Yun Mengli heard about such an array for the first time and, after thinking about it, immediately got excited.

If a teleportation array were built, it would be much easier for the warriors of Demon Sea Base to enter the super base. Moreover, in case of danger, they could quickly request assistance from the warriors of Zhonghai Super Base.

Additionally, the large bases could interact and trade with each other, fostering rapid development.

Building a teleportation array was purely beneficial for Demon Sea Base.

“Thank you, Master Ye Tian, for building a teleportation array for Demon Sea Base!”

Yun Mengli expressed his gratitude.

“Don’t thank me yet. Zhonghai Super Base paid a great price for the teleportation array design, so each large base must pay a certain price for us to build one,” Ye Tian said.

“Of course, how much would it be?”

Yun Mengli inquired.

“100,000 yuan qi stones!”

Ye Tian quoted a price.

“100,000!!!!” Many King-level practitioners behind Yun Mengli gasped.

Such a large number of yuan qi stones was beyond the capability of a single large power, and even for the Yun family, it would be a significant strain.

Yun Mengli did not hesitate and immediately said, “Master Ye Tian, 100,000—I agree on behalf of Demon Sea Base, but we will need a day to gather them!”

“Alright, you have one day,” Ye Tian agreed.

Following that, Yun Mengli held a meeting at Demon Sea Base. Each large power had to contribute a certain number of yuan qi stones, or they would have to leave Demon Sea Base.

Demon Sea Base was about to establish a teleportation array and establish close contact with Zhonghai Super Base. The King-level practitioners could enter Zhonghai Super Base anytime. Who would want to leave Demon Sea Base at such a time?

Thus, each large power agreed, though it was a significant expense, they could earn it back.

The large powers of Demon Sea Base quickly gathered the required 100,000 yuan qi stones.

Once the stones were given to Ye Tian, he immediately began constructing the teleportation array.

In just an hour, the teleportation array was successfully built!

Demon Sea Base was slightly farther from Zhonghai Super Base, so the intermediate-level teleportation array had to make a stop at another large base, taking a few extra seconds.

Though, a few extra seconds was nothing.

In the teleportation hall of Demon Sea Base, Ye Tian and a group of array masters stood at the center, with Yun Mengli also present.

He wanted to experience teleportation.

After embedding the yuan qi stones, Ye Tian activated the teleportation array.

“Teleport!”

In a swoosh!

The next moment, Ye Tian arrived at another major base: Longyang Base!

Then,

Ye Tian teleported again, returning to Zhonghai Super Base from Longyang Base.

“We’re back!”

Many array masters laughed.

Yun Mengli walked out of the teleportation hall and saw the familiar Zhonghai Super Base, stunned.

In the past,

To reach Zhonghai Super Base, he had to cross the perilous Changling River, always a heart-pounding journey.

But now, in less than ten seconds, he had traveled from Demon Sea Base to Zhonghai Super Base.

It was incredibly convenient!

Although each teleportation consumed some yuan qi stones, it saved a lot of time and danger, making it extremely convenient.

“Let’s go back!”

Yun Mengli left with a smile, teleporting away.

Chapter 227: Above Emperor level, God level!

Half a month later.

Most of the major bases had constructed intermediate teleportation arrays and started to engage in trade with each other. Zhonghai Super Base also saw several new faces.

These newcomers were King-level figures and a few Grandmasters from various bases, who had been granted permission to freely enter Zhonghai Super Base, though they did not have the residential status of the base.

Zhonghai Super Base had obtained the teleportation array coordinates of Tianfu Super Base and had sent Emperor-level figures there, initiating some trade with them.

On this day,

Ye Tian planned to take Empress Yue to Tianfu Super Base to have a look and learn more about it. Staying in Zhonghai Super Base might lead to a narrow perspective!

In the teleportation hall, on the second floor with the advanced teleportation array.

Ye Tian spent 100 yuan qi stones to activate the teleportation array.

Whoosh!

In a flash of light, Ye Tian and Empress Yue entered a teleportation channel and quickly arrived at another teleportation array.

It was an immensely large palace, and the teleportation array under their feet was more than ten times larger than the advanced teleportation array in Zhonghai Super Base.

“Top-level teleportation array!”

Ye Tian recognized it at a glance.

Unfortunately, Tianfu Super Base did not sell the designs of the top-level teleportation array. Even if they did, the cost would be enormous, and Zhonghai Super Base would not purchase it.

At the teleportation hall, Ye Tian and Empress Yue registered and obtained temporary passes, allowing them to stay in Tianfu Super Base for a few days, but not too long, otherwise, they would need to pay a certain fee.

“Ye Tian, an Emperor-level has visited Tianfu Super Base before. I heard that there’s a building similar to the War God Tower here, called Glory Tower. Shall we go have a look?” Empress Yue suggested.

“Sure!”

Ye Tian nodded. Anyway, he didn’t know where else to go, and Glory Tower seemed like a good destination.

Tianfu Super Base did not allow flying, except during certain special times, and in the Super Base, one’s speed on the streets could not exceed the speed of sound. Exceeding it would lead to arrest by the law enforcement team.

But transportation in Tianfu Super Base was not an issue. People were not delayed by distances, as every district in the Super Base had several basic teleportation arrays for free transport.

Ye Tian and Empress Yue used a basic teleportation array to directly reach the Glory District where Glory Tower was located.

In an instant, they arrived at the Glory District!

Soon after, Ye Tian and Empress Yue reached Glory Tower.

Empress Yue's beauty was breathtaking, attracting the attention of many, but Ye Tian and Empress Yue walked hand in hand, exuding an Emperor-level aura, so ordinary people did not dare to approach.

In Tianfu Super Base, Emperor-level was an extremely revered existence; who would dare to provoke them?

Glory Tower, like the War God Tower, was divided into three leaderboards.

King's List!

Saint's List!

Emperor's List!

Every name on these three lists belonged to the most dazzling stars.

Ye Tian and Empress Yue paid no attention to the figures on the King's and Saint's Lists, but looked towards the Emperor's List.

[Emperor's List Number One: Ouyang Tian, Affiliation: Nine Heavens Palace, Seven-Star Emperor-level strength!]

“Seven-Star Emperor-level!”

Ye Tian saw this level division for the first time, somewhat similar to the ranking on the King’s List of Zhonghai Super Base.

In Zhonghai Super Base, King-level was also divided into one-star King-level, two-star King-level, and so on, up to seven-star King-level, eight-star King-level, etc.

However, there was no such division for Emperor level. It wasn’t due to a lack of desire to categorize, but because Zhonghai Super Base didn’t have a single peak Emperor-level expert. How could they classify levels above one-star Emperor without qualifying experts?

They simply weren’t qualified to make such distinctions.

“Surprisingly, Tianfu Super Base has given birth to a Seven-Star Emperor-level powerhouse. Indeed, it is far stronger than Zhonghai Super Base!” Ye Tian couldn’t help but exclaim.

The Emperor List of Tianfu Super Base had a total of 100 Emperor-level figures, with the last one being a Three-Star Emperor, also immensely powerful.

As for the division of the star-rated Emperor level, Ye Tian had no knowledge of it.

Though Ye Tian was unaware, the Emperors of Tianfu Super Base surely knew.

Coincidentally, an Emperor-level figure emerged from Glory Tower, and Ye Tian approached him.

“Hello, friend!”

Ye Tian greeted.

Qin Yang Emperor was puzzled why a stranger at the Emperor level was suddenly greeting him. However, noticing the strong aura of the other, evidently more powerful than himself, he didn’t dare to ignore him.

“You seem unfamiliar. May I know your name?”

Qin Yang Emperor asked.

“I am Ye Tian, from Zhonghai Super Base,”

Ye Tian introduced himself.

“So, you’re a friend from Zhonghai Super Base!” Qin Yang Emperor’s enthusiasm lessened significantly. If Ye Tian were an Emperor from Tianfu Super Base, he would have shown more respect, but for an Emperor from another super base, his enthusiasm was quite muted.

Of course, he wouldn’t deliberately snub Ye Tian, considering the latter was also a powerful Emperor.

“I’m curious about the classification of Emperor-level strength. Could you explain it to me?”

Ye Tian inquired.

Seeing Ye Tian ask this, Qin Yang Emperor boasted, “It’s normal for you ordinary super bases not to understand the classification of Emperor-level strength in Tianfu Super Base. Let me introduce it properly. Our division of Emperors in Tianfu Super Base comes from the ancient civilization and sects era. During that time, Emperors were divided into ordinary Emperor, one-star Emperor, two-star Emperor, three-star Emperor, all the way to nine-star Emperor. Above the nine-star Emperor, there are two more realms: Sovereign Emperor and Supreme Emperor!”

“Sovereign Emperor, Supreme Emperor!”

Ye Tian’s expression changed with curiosity, “Does Tianfu Super Base have a Sovereign Emperor?”

“Of course not!” Qin Yang Emperor’s pupils dilated as he spoke, “If our Tianfu Super Base had a Sovereign Emperor, what would that mean? Do you understand the concept of a Sovereign Emperor? In the era of ancient civilizations and sects, they were among the chosen

few, even spanning several planetary worlds, it was rare to produce a Sovereign Emperor. The status of a Sovereign Emperor is more revered than many at the God level!”

“God level?”

Ye Tian felt his knowledge was lacking again.

But soon, he learned from Qin Yang Emperor what God level meant.

Above the Emperor level was the God level, a realm sufficient to be called a god on a planet.

An Emperor who had broken through the body’s limits ten times can attempt to reach the God level. Without breaking these ten limits, one can never aspire to the God level.

The difference between Gods and Emperors was vast. Once stepping into God level, one’s physical strength increases a hundredfold, but it will forever remain at that level, unable to improve further.

At the God level, it’s not physical strength that improves, but divine power!

Divine power derives from yuan force. As they progress in their cultivation, God-level powerhouses’ divine power grows stronger, and its amplifying effect increases. However, their physical strength remains fixed, unable to improve even slightly.

Therefore, those at the Emperor level strove to break more of their body’s limits. If they only break through the tenth limit, their achievements as an Emperor wouldn’t be very strong, unless they possess other special talents.

But who among the chosen ones capable of reaching the God level would be content with just breaking through ten body limits?

Like Ye Tian, he certainly wouldn’t be satisfied with just breaking through ten body limits. He aimed to surpass even more.

Chapter 228: The Glory of the Virtual World!

“Emperor Qin Yang, does Tianfu Super Base, lacking Sovereign Emperors and Supreme Emperors, have any God-level beings?”

Ye Tian asked curiously.

“How could there be God-level beings?” Emperor Qin Yang widened his eyes and said, “What kind of realm is God-level? Those with Moonlight-level cultivation talent shouldn’t even dream of reaching God-level. Only those with Dawn-level cultivation talent have the potential to enter God-level. However, talents with Dawn-level cultivation are extremely rare. As far as I know, Tianfu Super Base currently only has six talents with Dawn-level cultivation talent, and all these six talents are from the younger generation. It would take them a very long time to reach the level to challenge God-level. Moreover, would talents with Dawn-level cultivation be content with just breaking through their physical limits ten times to challenge God-level? This is the foundation of reaching God-level, and they might not even attempt it for a hundred years!”

Ye Tian nodded silently, agreeing with Emperor Qin Yang’s statement.

“Emperor Qin Yang, can we external Emperors challenge Glory Tower?”

Ye Tian asked casually.

He hadn’t held much hope, but Emperor Qin Yang’s response surprised him.

“Not now, but it should be possible soon. It is said that the virtual world of Glory Tower will soon cover the entire Huaxia region. Apparently, Tianfu Super Base has found the remaining parts of Glory Tower and can compensate for its deficiencies. Once the virtual world covers the entire Huaxia region, Emperors from other Super Bases will naturally be able to challenge Glory Tower, and even spar with the Emperors of Glory Tower,” Emperor Qin Yang explained.

“The virtual world will cover the entire Huaxia region?”

Ye Tian was somewhat surprised.

Although the War God Tower had a virtual world, it was not open to the public and was only used for challenging levels and for the War God Rings.

Warriors with War God Rings could use them to enter the virtual world for training and combat skills, but it was limited to personal use and could not interact with others. The coverage of the virtual world was also not extensive.

But Glory Tower could cover the entire Huaxia region, which was much more impressive!

Of course,

The War God Tower was more severely damaged, while Glory Tower was fully cultivated. It was hard to say which was more powerful at their peaks.

Ye Tian did not ask any further questions, and Emperor Qin Yang quickly left, fearing that Ye Tian would keep asking questions and he would find it hard to refuse.

In the following time, Ye Tian, accompanied by Empress Yue, toured Tianfu Super Base.

It must be said that Tianfu Super Base was much more prosperous than Zhonghai Super Base, with even more talents with Moonlight-level cultivation.

But what Ye Tian was more curious about was whether Tianfu Super Base had any wondrous objects.

However, this was probably only known to the top Emperors of Tianfu Super Base, and even then, only a few of them.

The reason everyone knew about the wondrous object, the Sakura God Tree, in the Sakura Super Base was because the Sakura God Tree was too large, and its root system extended throughout the base, making it impossible to hide.

But not all wondrous objects were impossible to hide. For example, the Enlightenment Stele, which Ye Tian could easily hide if he didn't allow others to perceive it.

But if he allowed the members of the Tian Pavilion to perceive it, it could no longer be concealed.

After just half a day of touring, Ye Tian and Empress Yue returned to Zhonghai Super Base.

In the following days, information about Tianfu Super Base was brought back by other Emperors and Saints, and Zhonghai Super Base gained a deeper understanding of Tianfu Super Base.

But the more they understood, the more shocked they were.

Tianfu Super Base was indeed too powerful. As a Super Base, it could easily destroy other Super Bases.

On this day.

Tianfu Super Base announced that the virtual world of Glory Tower had successfully covered the entire Huaxia region. All members above the King level could register for an account in the virtual world, but the Glory Ring required for entering the virtual world had to be purchased.

A Glory Ring cost 1,000 yuan qi stones, which was not expensive for the strong at the Saint level.

Carefully calculating, the number of strong beings at the Saint level who would purchase the Glory Rings would determine how much money Tianfu Super Base could make. That amount was sure to be astronomical!

Ye Tian and Empress Yue did not go to Tianfu Super Base to buy the Glory Rings. An Emperor from the Moon God Sect directly purchased a bunch of Glory Rings and brought them back, and Ye Tian and Empress Yue got their rings immediately.

The Glory Ring had no special effects; it merely served as a medium to project one's soul consciousness into the virtual world. Naturally, a person's talents could also be manifested in the virtual world.

Upon refining the Glory Ring, Ye Tian's soul consciousness entered a virtual dark space. Quickly, a virtual frame appeared, resembling the virtual games described in novels over a hundred years ago.

Ye Tian registered, swiftly completing his information. He chose the name "Heavenly Emperor of Ten Thousand Laws" for himself in the Glory virtual world. He felt this name was appropriate given his many talents, though others would unlikely grasp its meaning.

After registration, Ye Tian clearly understood the uses of the Glory virtual world. It offered virtual challenges and battles with martial warriors. Virtual challenges were one of the only ways to enter the Emperor Rankings, while battles between martial warriors involved stakes, and those stakes were points.

Tianfu Super Base now completely controlled Glory Tower, making points a form of currency. These could be exchanged for treasures or used in the points mall to purchase treasures. The items in the points mall were supplied by the Glory Temple.

The Glory Temple was very mysterious, only truly accessible to Emperors, with Saints only qualifying as beginner members. In Tianfu Super Base, the Glory Temple was undoubtedly the leading force. They were the ones who found the missing parts of Glory Tower and promoted the virtual world, establishing teleportation arrays.

Initially, other forces disagreed, preferring to keep to themselves and unwilling to share the teleportation arrays and virtual world with other Super Bases. However, the Glory Temple forcibly changed the mindset of these major powers and single-handedly facilitated this development. Had the other major powers not insisted on charging a fee, the Glory Temple would have even been willing to offer it for free. Many were puzzled by this.

Ye Tian was also very curious, finding the actions of the Glory Temple strange. However, it was undeniable that Tianfu Super Base's current level of development was largely due to the Glory Temple, contributing over ninety percent of the effort.

"First, let's try the challenges in Glory Tower and see roughly where my strength lies among the star-rated Emperors."

Ye Tian was curious.

At the first level of Glory Tower, Ye Tian easily defeated his opponent, breezing through the first level. The second, third, fourth... all the way to the tenth level posed no difficulty. However, from the eleventh level onwards, ordinary Emperors struggled to pass, and weaker Emperors would be instantly defeated by the guardians of the eleventh level.

The guardian of the twelfth level had strength comparable to the weaker of the thirty-six Emperors. At the thirteenth level, the guardian's strength was second only to the Battle Axe Emperor.

When Ye Tian just passed the thirteenth level, he found his personal profile displaying —

【Ye Tian: One-star Emperor-level combat power】 .

Chapter 229: Legendary Sword Technique - Void Breaker, 50,000 Points!

“The thirteenth floor of Glory Tower is equivalent to the level of a one-star Emperor. According to the division of strength, the Battle Axe Emperor belongs to the one-star Emperor level.” (damn that's low)

Ye Tian finally had a preliminary understanding of the star-level division of strength within the Emperor level.

This level of classification was based on the ancient civilization era, and perhaps was a universal division in the universe.

The fourteenth floor.

Ye Tian faced the guardian of this level and easily defeated him, passing the challenge. His information also changed from a one-star Emperor level to a two-star Emperor level strength.

“A two-star Emperor is somewhat stronger than the Battle Axe Emperor. The Battle Axe Emperor indeed has strong talent, but his cultivation is much weaker. If he could break through the physical limit ten times, his combat power would be many times stronger than it is now!”

Ye Tian briefly investigated the strong ones on the Emperor's list, most of whom belong to the realm of breaking through the physical limit ten times.

At that time, he was extremely shocked. Breaking the physical limit was so difficult; how could there be so many who had done it ten times at Tianfu Super Base?

Later, he learned that Tianfu Super Base had a type of pill called the Boundary Breaking Pill, specifically for breaking the physical limits, but it had a significant side effect – it made it difficult to break through future Emperor and God levels in the future.

However, Emperors with Moonlight level cultivation talent had no hope of entering the God level anyway, so they naturally didn't care about this side effect. Thus, many Emperors took the Boundary Breaking Pill, and their cultivation improved rapidly.

But now, the Boundary Breaking Pill had become a rare treasure, hard to trade for.

The Boundary Breaking Pill also originally came from the Glory Temple, but now, very few of them were found, and the ingredients for refining the pills were rare and hard to collect, only occasionally obtained from the ruins of the ancient civilization.

If it weren't for the remaining Boundary Breaking Pills, the strength of Tianfu Super Base would have dropped several levels by now.

In reality, the Boundary Breaking Pill was a treasure that consumes potential, forcing the breaking of physical limits at the cost of one's own potential. This wasn't the path of a genius. True geniuses would not choose this path.

Don't look at those strong ones on the Emperor's list who enjoy the praises and envy of countless people, but they are also pitiable, unable to improve their strength for the rest of their lives. How sad.

Of course, compared to ordinary Martial Disciples, they were also very lucky.

The Battle Axe Emperor has not reached the two-star Emperor level, but Empress Yue is different.

“Yue’er has now mastered the Gold level sword technique. With her other talents, as well as breaking the physical limit four times, she barely qualifies as a two-star Emperor!” Ye Tian evaluated internally.

The fifteenth floor.

Ye Tian also easily passed this level. It was really his extraordinary talent; it would be abnormal if he couldn’t pass.

After passing the fifteenth floor, Ye Tian obtained the strength evaluation of a three-star Emperor, but he still did not enter the Glory Emperor’s list, because the last place on the list had the strength of a four-star Emperor.

Obviously, other super bases had four-star Emperor level powerhouses who registered in the Glory Virtual World, pushing other Emperors off the list, thus raising the standard of the list.

In the future, as time goes by, for example, as Emperors like the Battle Axe Emperor grow, the standard of the Glory Emperor’s list will become higher, and by then, even a five-star Emperor might not be able to get on the list.

The sixteenth floor.

This floor’s guardian did not cause much trouble for Ye Tian, but still forced out some of Ye Tian’s strength, requiring him to go all out to defeat the opponent in seconds.

After passing this level, Ye Tian obtained the evaluation of four-star Emperor level strength.

As he had just passed the sixteenth floor, Glory Tower did not arrange for Ye Tian to enter the Emperor’s list. Ye Tian continued to challenge the seventeenth floor.

At this moment.

Ye Tian truly encountered some pressure. The guardian of this floor was extremely formidable. Ye Tian used all his talents, except for his time, space, and God-level talents, to finally defeat the opponent and pass the seventeenth floor.

After passing the seventeenth floor, Ye Tian's information changed.

【Ye Tian: Five-Star Emperor level Strength】

Naturally, reaching the Five-Star Emperor level meant entering the Emperor's List, and his ranking was quite high.

【Emperor's List Rank 56: Ye Tian, Affiliated Power: Tian Pavilion, Five-Star Emperor level Strength】

Names on the Emperor's List were real names, but during battle, what was displayed to the opponent was one's nickname in the virtual world.

When the Emperor's List was updated, everyone who was viewing the list was stunned.

Tianfu Super Base.

Many Emperors at the base were dumbfounded looking at Ye Tian's name at the 56th rank on the Emperor's List, each asking their friends, trying to find out who this Ye Tian was.

Clearly, Ye Tian was not an Emperor from Tianfu Super Base.

The reason why Tianfu Super Base had so many strong Emperors was entirely because it occupied several of the strongest ancient civilization inheritances in Huaxia, and also because it had the Boundary Breaking Pill. Other super bases didn't have these resources, making it difficult for them to produce strong Emperors.

However, now Ye Tian had suddenly risen to rank 56, and it was shocking for them.

Yet, the 56th place on the Emperor's List was not Ye Tian's limit.

Ye Tian felt that if he continued to challenge, using his space and time talents, as well as other god-level talents, it wouldn't be difficult to pass the eighteenth floor and possess the strength

of a Six-Star Emperor. However, the hope of passing the nineteenth floor was not great, as the strength gap of the guardians increased significantly with each level.

“Forget it, I won’t challenge the eighteenth floor. It’s better to keep a low profile to avoid attracting the attention of certain Emperors. With my current strength, I’m not yet a match for those Seven-Star Emperors,” thought Ye Tian.

Every Seven-Star Emperor has broken through their physical limits more than ten times, experiencing major transformations. Their physical strength was far beyond that of ordinary Emperors. If they possessed Mystic-level talent and weapon-related talents, their power would naturally be terrifying.

For Ye Tian to surpass them at the moment was still a bit difficult, unless he could comprehend his Legendary Sword Technique to a high degree and break his physical limit once more. Only then might he have a chance.

He calculated that passing the first floor of Glory Tower earned him 1 point, the second floor 2 points, the third floor 4 points, with the points doubling for each additional floor. Passing the seventeenth floor earned him 65,536 points, making his total points 131,072.

So many points were quite a lot, enough to purchase many treasures.

Giving away so many points at once, the Glory Temple seemed to have suffered a loss, but in reality, it was not the case. Once the point currency system was activated, many people would exchange their unneeded treasures for points.

In this way, the Glory Temple would control the currency. Even if it was just earning the difference, it was an immeasurable number!

Therefore, the Glory Temple wouldn’t lose at all.

The rewards for challenging Glory Tower were equivalent to welfare or investment, which would be gradually earned back from the warriors. After all, the points earned from challenges wouldn’t last very long.

For example, Ye Tian had his eye on an item in the point mall, but the points required for this item made him gape in astonishment.

【Legendary Sword Technique – Void Breaker! Exchange Points: 50,000 Points】

A Legendary Sword Technique required 50,000 points, and Ye Tian only had a little over a hundred thousand points, which wouldn't last long.

In the future, if he wanted to purchase items from the point mall, he would have to exchange his own treasures for points.

“A Legendary Sword Technique, I definitely can't have too many of those. Points are just numbers if not used. I'll buy it!”

Ye Tian immediately clicked to place an order, purchasing the Legendary Sword Technique – Void Breaker!

Chapter 230: The First Battle in the Virtual World!

Tianfu Super Base.

Emperor Qin Yang was preparing to enter the Glory Virtual World to spar with others, but he habitually glanced at the Emperor Ranking.

“The Emperor Ranking has changed drastically!”

Emperor Qin Yang was shocked.

Previously, some three-star Emperors were at the bottom of the ranking, but now these three-star Emperors had been pushed down.

“They were displaced by Emperors from other super bases. It seems that these super bases also have some strong figures!”

Emperor Qin Yang thought to himself.

Suddenly.

His gaze settled on the fifty-sixth place on the Emperor Ranking—Ye Tian.

“Ye Tian, what a familiar name!”

Emperor Qin Yang recalled carefully and soon remembered where he had seen Ye Tian before.

“Isn’t Ye Tian the Emperor who asked me a bunch of questions last time!”

Emperor Qin Yang’s expression changed dramatically.

In this world, it’s not uncommon to have people with the same name, but someone named Ye Tian who is also an Emperor-level, the likelihood of them being two different people is slim.

Which means.

A five-star Emperor-level powerhouse had actually asked him questions, what an honor!

“Damn, I should have tried to get closer to him back then!”

Emperor Qin Yang regretted.

Tianfu Super Base had many Emperors, and those on the Emperor Ranking were not within the reach of a weak Emperor like him. Even if he did manage to meet them, they wouldn’t pay attention to someone like him.

Because Emperors like him and those on the Emperor Ranking were worlds apart in terms of strength.

Meanwhile,

Ye Tian’s name and information frequently appeared in the hands of big shots from Tianfu Super Base and other super bases.

In no time, the name Ye Tian resounded throughout Huaxia, and even the lesser-known Tian Pavilion became more famous than the Battle Axe Mercenary Hall.

At least, the name of Tian Pavilion had spread beyond Zhonghai Super Base, while the reputation of the Battle Axe Mercenary Hall had not.

Battle Axe Mercenary Hall.

The Battle Axe Emperor was also challenging Glory Tower. After defeating the thirteenth-level guardian and receiving a one-star Emperor evaluation, he quickly failed the fourteenth level and did not receive a two-star Emperor combat power rating.

“Those Emperors from Tianfu Super Base are too abnormal, there are so many four, five, and even six, seven-star Emperor-level powerhouses!” said the Battle Axe Emperor despondently.

Originally, he was the strongest in Zhonghai Super Base, nearly unbeatable.

Although later surpassed by Ye Tian and Empress Yue, he was still among the top few powerhouses in Zhonghai Super Base, and the Battle Axe Mercenary Hall remained the number one force there.

But now, with the connection of all major super bases in Huaxia and the emergence of the Glory Virtual World and Emperor Ranking, terrifying Emperor-level figures appeared, making him feel like he had fallen to the bottom, not even qualifying for the Emperor Rankings.

“The Emperor Ranking is too hard, probably no one from Zhonghai Super Base can make it!”

The Battle Axe Emperor thought.

But when he opened the Emperor Ranking and glanced at it, his pupils constricted in disbelief.

【Emperor Ranking 56th: Ye Tian, Affiliated Force: Tian Pavilion, Five-Star Emperor Combat Power】

“Ye Tian has five-star Emperor combat power and even made it to the 56th place on the Emperor Ranking!!!”

The Battle Axe Emperor was astonished.

He had always thought that Ye Tian was just slightly stronger than him, but he never expected Ye Tian’s strength to have silently surpassed him by so much.

What does a five-star Emperor mean? It’s countless times stronger than his one-star Emperor level strength, definitely capable of easily defeating him multiple times. They are not even on the same level!

At this moment, he no longer had the thought of chasing after Ye Tian!

Glory Virtual World.

After browsing the points mall for a while, Ye Tian decided not to shop anymore and prepared to log off.

At that moment.

A notification came in.

【Silver Spear God Emperor challenges you to a duel, wagering 1000 points. Do you accept?】

【Golden Dragon God challenges you to a duel, wagering 1000 points. Do you accept?】

【Playboy challenges you to a duel, wagering 1000 points. Do you accept?】

A series of challenge requests came in, leaving Ye Tian somewhat stunned.

He was certainly aware of these challenges.

In the Glory Virtual World, there are King, Saint, and Emperor zones. Warriors can only spar within their respective zones. For example, Emperors can only spar with other Emperors, and it's very difficult for Saints to spar with Emperors as it requires fulfilling many conditions.

Generally, sparring between Emperors is random. Winning earns one point, while losing costs one point, which is the wager for the spar.

One can only spar ten times a day to prevent an invincible Emperor from endlessly sparring just to farm points.

Another form of sparring is through challenges, where one can specifically request to spar with someone.

However, there are restrictions on challenges too. For instance, powerful warriors are not allowed to challenge those much weaker than themselves. A five-star Emperor cannot challenge a one-star Emperor, as that would be utterly unfair.

But a one-star Emperor can challenge a five-star, or even a six-star Emperor. That is allowed.

After all, if someone wants to bite off more than they can chew, who's to stop them?

Ye Tian, being a five-star Emperor, would naturally attract Emperors with no less than a five-star rating to challenge him, perhaps even six-star Emperors, as they can challenge those of a five-star level.

In a clash of strengths, it's not impossible for a strong five-star Emperor to defeat a weaker six-star Emperor.

"I've just entered the Emperor Ranking, and so many are challenging me. It seems they've seen my rapid point gains and want to test my strength," thought Ye Tian.

As for the 1000 points wagered in the duel, it was just a small incentive.

As a newcomer, others challenging him for the first time were not allowed to wager too many points, as the main purpose of the Glory Virtual World was not gambling, and excessive betting would be inappropriate.

“Which one should I choose?”

Ye Tian looked at the nicknames of these Emperors, hesitating.

Then, he opened their nicknames, revealing some basic information about them.

【Silver Spear God Emperor, Five-Star Emperor Combat Power, Virtual World Record: 890 Wins, 32 Losses】

The true names were not displayed, so Ye Tian did not know who this person was. However, there weren't many five-star Emperors on the Emperor Ranking, and if he really wanted to, he could investigate and find out.

Ye Tian knew he must have been investigated already, as he was the only newly promoted five-star Emperor, and his nickname “Heavenly Emperor of Ten Thousand Laws” appeared for the first time in the Virtual World.

...

He had just visited the points mall and purchased a Legendary-level Sword Technique. The Glory Temple, which manages Glory Tower, surely knew his identity, and it wouldn't be difficult for other Emperors from Tianfu Super Base to find out about him.

“I'll choose this Silver Spear God Emperor. Even if he's hiding his true strength, having lost 32 battles, he's likely not a six-star Emperor and no match for me. In facing him, I won't need to reveal my full strength and can easily handle him!”

Ye Tian thought.

Click to accept!

Swish!

Ye Tian was transported to a vast virtual space.

At the same time, another Emperor also quickly descended into this virtual space.

“Heavenly Emperor of Ten Thousand Laws, you dare to choose such a name. The Heavenly Emperor is an omnipotent being in ancient legends. You’re quite bold!” said the Silver Spear God Emperor.

Ye Tian responded with a cold laugh, “You’re not timid yourself, naming yourself Silver Spear God Emperor. Do you aspire to be a God Emperor among gods? Your name is even more arrogant than mine!”

The Silver Spear God Emperor’s face turned awkward. He had just meant to tease Ye Tian, not realizing his own nickname to be equally arrogant.

Feeling at a loss, he dropped the topic.

“Let’s start then!”

A Morning Star level spear appeared in the Silver Spear God Emperor’s hand!

On the other hand,

Ye Tian also drew a Morning Star level sword. This wasn’t a real sword, but one provided by the Virtual World. Emperors in duels could only use up to Morning Star level weapons, as per the rules of the Virtual World.

Whoosh!

With a flash of light, the two launched tentative attacks. Sword and spear collided, and they immediately retreated.

However, in the moment of their exchange, Ye Tian was shocked to find that he could see his opponent's talent.

“I can see someone else's talent in the Virtual World?”

Ye Tian was greatly surprised.
