

Talent 231

Chapter 231: Revealing a Portion of True Strength!

As Ye Tian subconsciously activated his talent copying ability, the talent details of the Silver Spear God Emperor came into his view.

Human: Wang He

Cultivation Talent: Moonlight

Strength Talent: Pseudo-Mystic (70%)

Defense Talent: Mystic

Speed Talent: Pseudo-Mystic (70%)

Spear Technique Talent: Top

Wind Blade Talent: High

“Wang He, it’s him!”

Upon seeing the name Wang He, Ye Tian immediately recognized the identity of the Silver Spear God Emperor.

【Rank 53 on the Emperor’s List: Wang He, Affiliation: Ten Directions Sect, Five-Star Emperor level Combat Power】

However, Ye Tian’s focus wasn’t on Wang He’s identity, but on the fact that the talent copying ability allowed him to see the talents of other humans in the virtual world. This meant that he could also copy their talents.

For Ye Tian, this changed the significance of the virtual world entirely.

“If I continuously spar and randomly match with other emperors, once I encounter a remarkable talent I can completely copy the opponent’s talent. Moreover, in the Glory Virtual World, there’s a common area called Glory City. Warriors can trade with points in Glory City and even chat. If I enter Glory City and activate my talent copying, I’ll be able to see many talents, making it easy to copy the ones I need!”

Such were Ye Tian’s thoughts.

“Excellent, the Glory Virtual World is indeed a perfect place for my talent copying!”

Ye Tian was secretly overjoyed.

“Hmph, you’re still distracted during our battle!”

The Silver Spear God Emperor snorted coldly and thrust his spear fiercely. This attack was his signature spear technique – the Golden-level Silver Meteor Spear!

A spear thrust that streaked like a silver meteor.

For other Five-Star Emperors, this spear attack was extremely powerful and incredibly fast.

But for Ye Tian, with his God-level Extreme Speed talent, he could easily dodge this spear, though he had no need to.

“Starfall Slash!”

A Legendary-level Sword Technique was unleashed.

Though Silver Spear God Emperor’s spear technique resembled a meteor, Ye Tian’s Starfall Slash seemed capable of shattering even stars.

In a sense, Ye Tian’s Starfall Slash countered the Meteor Silver Spear.

Additionally, Ye Tian's Starfall Slash was a Legendary-level Sword Technique, while the Meteor Silver Spear was merely a Golden-level Spear Technique.

However, the cultivation of the Silver Spear God Emperor was high, as he had broken through the body's limits ten times, while Ye Tian had only broken through seven times. But the Mystic-level Strength Talent and Legendary-level Sword Technique were enough to bridge the gap in cultivation.

Boom!

Sword and spear collided, sending waves of energy rippling through the void.

"A Legendary-level Sword Technique!"

The Silver Spear God Emperor was shocked.

His experience was not insignificant, and he naturally recognized the level of Ye Tian's sword technique.

To master a Legendary-level Sword Technique indicated that Ye Tian's sword talent had reached the Morning Star level.

Morning Star-level Sword Talent, not to be confused with Morning Star-level Cultivation Talent, is a completely different concept.

A warrior with Morning Star-level Sword Talent was undoubtedly an unparalleled genius in swordsmanship.

Just then, Ye Tian displayed another rare talent.

"Shadow Clone Talent!"

Multiple shadow clones appeared.

These clones were like real entities, possessing the physical qualities of the original body, but incapable of carrying other talents.

However, the sudden appearance of so many clones confused the Silver Spear God Emperor.

Swoosh, swoosh, swoosh!!!

Ye Tian's multiple shadow clones attacked, with the real body hidden among them.

At that moment.

The Silver Spear God Emperor flicked his hand, and countless spear shadows pierced through the void. This was a wide-range group attack spear technique.

Thud, thud, thud!!!

One after another, the shadow clones were penetrated and shattered by the Silver Spear God Emperor.

Suddenly,

A figure approached rapidly, its speed so swift that even the Silver Spear God Emperor barely had time to react.

"Not good!"

The Silver Spear God Emperor was alarmed.

Swoosh!

His Morning Star-level Spear transformed into a curtain of spear shadows as a defense.

"Slash!"

Ye Tian launched this talent from the world of ferocious beasts.

Previously, the Slashing talent was just top-level, but Ye Tian had specifically pondered over the mysteries of Slashing, gaining some initial insight and successfully elevating the Slashing talent to the Pseudo-Mystic level.

The Pseudo-Mystic level Slashing talent was terrifying, capable of easily shattering even Morning Star-level weapons.

Bang!!!

A slashing force hit the opponent's spear.

“Such little power?”

The Silver Spear God Emperor was surprised.

This hardly seemed like the attack power of a Five-Star Emperor. It was too weak.

Because Ye Tian did not use Starfall Slash, the attack power was naturally lacking, but the focus of Slash Strike was on destroying weapons, not killing the enemy.

Crack, crack, crack!!!

The sound of shattering rang out, and the Silver Spear God Emperor saw his Morning Star-level spear turn into countless fragments.

His weapon was broken!

“How is this possible???”

The Silver Spear God Emperor was stunned.

However, it was this moment of shock that gave Ye Tian the opportunity to swiftly unleash another Starfall Slash.

Pffft!!!

A blade of light slashed towards his neck.

Instinctively, he tried to block with his spear, but he quickly remembered his spear was broken...

He couldn't defend against Ye Tian's blade light!

Somewhere in Tianfu Super Base.

The soul consciousness of the Silver Spear God Emperor, Wang He, was forcibly ejected from the virtual world. Shaking his head, he muttered, "I can't believe I lost so quickly!"

"No, it's not right. My strength is almost on par with the Heavenly Emperor of Ten Thousand Laws, Ye Tian, but I underestimated him. His attack was not focused on damage but on shattering my weapon. It must be a talent capable of destroying weapons. I didn't expect such a rare talent. If I had been more cautious, even if my weapon was shattered, my reaction speed and defense would have prevented me from being killed by a single slash."

Wang He concluded.

But he had to admit, Ye Tian was indeed very strong and highly talented.

In terms of cultivation, Ye Tian had only broken through the body's limits seven times, while he had broken through ten times, undergoing a great transformation, yet he lost to Ye Tian. If Ye Tian had also broken through ten times, completing the great transformation, he would have easily killed him!

"The true strength and talents of Ye Tian are now clear. A genuine Five-Star Emperor level combat power, possessing Mystic-level strength and speed talents, and a Pseudo-Mystic-level

talent capable of shattering weapons. His defense talent should also be Mystic-level. Most importantly, he has a Legendary-level Sword Technique, an advantage that other emperors don't have. He has the potential to challenge the Seven-Star Emperor level. This is top-grade intelligence. Even the Glory Hall can't access detailed information about other emperors in Glory Tower. I must be the first emperor in Tianfu Super Base to know Ye Tian's talent situation."

Wang He hurriedly arranged Ye Tian's information and submitted it to the Sect Master of the Ten Directions Sect, Emperor of Ten Directions.

Very soon.

Tianfu Super Base obtained information about Ye Tian's talents and combat power.

Ye Tian's space talent had already been exposed, and the higher-ups of Tianfu Super Base knew about it, but they thought Ye Tian only had a high-level space talent, not knowing he possessed a top-level space talent.

However, they had no idea about Ye Tian's true strength; otherwise, they would have been truly terrified.

At this moment.

Ye Tian was unconcerned about exposing his Morning Star-level Sword Talent. By purchasing a Legendary-level Sword Technique, this talent was bound to be exposed.

As long as his talent copying, supreme level cultivation talent, and time talent remained hidden, he had nothing to worry about.

If someone thought he was just a Five-Star Emperor and tried to deal with him, they would inevitably pay with their lives.

The next day.

An emperor from Tianfu Super Base used a teleportation array to arrive at Zhonghai Super Base.

Ye Tian's Legendary-level Sword Technique manual had arrived!

Chapter 232: The Sword Technique Containing Spatial Power!

Tian Pavilion.

Ye Tian met an Emperor-level figure from Tianfu Super Base's Glory Temple.

"Ye Tian, this is the Legendary-level sword technique you purchased from the points mall — Void Breaker!"

The Emperor-level handed a bead to Ye Tian.

"Isn't it a book or secret manual?"

Ye Tian asked in surprise.

"No!" the Emperor-level explained: "Many powerful sects of ancient civilizations recorded important knowledge in heritage orbs made of special materials. The Legendary-level sword technique, Void Breaker, is recorded in this orb. It contains insights about the technique, and it's certainly not a fake."

"Okay, I trust the reputation of the Glory Temple!"

Ye Tian took the heritage orb and immediately signed an agreement.

The so-called agreement was not to sell or teach this sword technique to others.

After signing the agreement, the Emperor-level from the Glory Temple immediately left.

Once the Emperor-level from the Glory Temple left, Ye Tian eagerly picked up the heritage orb containing the Legendary-level sword technique, Void Breaker, and infused his consciousness into it.

Boom!!!!

A series of images appeared in Ye Tian's mind.

In the images, a man with an unclear face demonstrated the Legendary-level sword technique, Void Breaker, in the void.

He reached out and grabbed a sword, lightly slashed, and the sword seemed to break through space, instantly slicing a mountain thousands of miles away in half.

Then, the content for cultivating the Legendary-level sword technique, Void Breaker, appeared before Ye Tian.

After a long time.

Ye Tian had already comprehended the initial level of this Legendary-level sword technique.

It must be said, this sword technique is extremely formidable, a rare long-range Legendary-level technique, but it can also be used in close combat, making it extremely rare and difficult to cultivate.

Because it initially involves a bit of space.

Using the sword technique to stir a bit of the power of space, creating an effect similar to breaking space.

For warriors without spatial talent, this Legendary-level sword technique is several times more difficult to cultivate than other techniques, but for those with spatial talent and Morning Star-level swordsmanship talent, it's much easier to cultivate.

But how many warriors in the world possess both spatial talent and Morning Star-level swordsmanship talent?

Ordinary people who obtain this technique, even if they have Morning Star-level swordsmanship talent, would find it difficult to cultivate it to minor achievement, let alone perfection.

“This sword technique is very suitable for me, and indeed, I lack a long-range attack method,” Ye Tian said, very satisfied.

Immediately, he began to ponder over the sword technique, Void Breaker.

In just three days, he comprehended the initial stages of the Legendary-level sword technique, Void Breaker.

In ten days, he reached the minor achievement realm of the Legendary-level sword technique, Void Breaker.

According to Ye Tian’s estimate, in a month’s time, he could cultivate the Legendary-level sword technique to major achievement, without needing to reach 20% Sword Dao Realm, as the spatial talent made up for the Sword Dao Realm.

But if Ye Tian wanted to cultivate the Legendary-level sword technique to perfection, without progress in Sword Dao Realm, there was no hope.

“The progress in Sword Dao Realm is too slow, my swordsmanship talent is only at the Morning Star level, it would be great if it could be raised to the Moonlight level!”

Ye Tian sighed.

But in Zhonghai Super Base, he had already confirmed that there was no Moonlight-level swordsmanship talent.

He could only place his hopes in other bases and had already dispatched Saint-King level disciples of Tian Pavilion to enter other super bases to inquire, which was also a task issued by Tian Pavilion.

One day.

A disciple of Tian Pavilion returned and submitted the task.

Immediately, Ye Tian knew about the task situation.

“In Tianfu Super Base, Glory Temple’s Void Breaker Sword Emperor, possesses a Legendary-level sword technique, with Morning Star-level swordsmanship talent!”

Ye Tian saw this information and was immediately overjoyed.

Immediately, he recalled the information about the Void Breaker Sword Emperor in his mind.

The Void Breaker Sword Emperor was undoubtedly a strong figure on the Emperor List, ranked twenty-third, with six-star Emperor-level combat power.

Previously, Ye Tian only knew that the Void Breaker Sword Emperor had six-star Emperor-level combat power, but he was unaware that the Sword Emperor possessed a Legendary-level sword technique.

“The Void Breaker Sword Emperor is an Emperor-level figure of the Glory Temple, which makes things a bit troublesome. It’s said that many Emperors of the Glory Temple are very secretive, and many of them venture in the Beast World.”

Ye Tian frowned.

If he were to seek out the Void Breaker Sword Emperor to replicate his Morning Star-level swordsmanship talent, it would undoubtedly be very difficult and time-consuming.

“First, I’ll send him a challenge invitation!”

Ye Tian entered the virtual world of Glory and sent out a challenge invitation.

It was quite normal for a five-star Emperor-level to challenge a six-star Emperor-level, so there was no problem with this challenge invitation.

Besides, Ye Tian wasn't truly just at the five-star Emperor-level in terms of combat power.

Over the next few days, Ye Tian occasionally entered the virtual world for Emperor-level sparring, though it was random.

Now, many Emperors enter the virtual world, so the Emperors Ye Tian encountered were mostly not very strong, maintaining a streak of continuous victories.

Such a record was undoubtedly splendid.

After encountering numerous Emperors, some of them indeed had impressive talents.

Ye Tian then replicated the talent of one Emperor.

This talent was called: Good and Evil Sensing Talent!

This talent had no offensive or defensive power, nor did it have any combat or auxiliary effects. Its sole purpose was to sense goodwill and malice.

As an Emperor, one can initially sense a person's goodwill and malice, but it's difficult to sense if someone is deliberately hiding it.

However, the Good and Evil Sensing Talent could sense the goodwill and malice deep in someone's heart, which is difficult to conceal.

The Emperor's Good and Evil Sensing Talent was not high, only at the basic level.

But after replicating it, Ye Tian immediately used the Talent God Liquid to elevate the Good and Evil Sensing Talent to the top talent level.

This talent might seem of little use, but at least in the future, it would be harder for others to deceive him. If anyone harbored malice towards him, he could sense it immediately.

On this day.

Glory Virtual World, Glory City.

Ye Tian came here to stroll around and see if there were any decent talents to replicate.

Glory City was huge, spanning ten thousand miles. Any King could enter, so there were many warriors in Glory City, densely packed.

In Glory City, people could trade, but they only left contact information for private transactions in the real world. If any problems arose, the Glory Temple and Glory Tower would not be responsible.

Another advantage of Glory Tower was that two people far apart could meet in Glory City, which was quite convenient.

Ye Tian's sole purpose in coming to Glory Tower was to replicate talents.

“Eh, a Dawn-level Cultivation Talent!”

Ye Tian's gaze suddenly fixed on a young man whose cultivation talent was at the Dawn level.

Human: Zuo Peng

Cultivation Talent: Dawn

Strength Talent: Top-level

Speed Talent: Top-level

Defense Talent: Top-level

Spear Talent: Intermediate

“Zuo Peng, seems to be one of the six Dawn-level talents of Tianfu Super Base, a genius who hasn’t yet fully developed, only 17 years old this year. Too bad I already have Supreme-level Cultivation Talent, replicating his Dawn-level Cultivation Talent is of no use to me.”

Ye Tian shifted his gaze and continued searching for other talents.

For half a day, Ye Tian searched in Glory City.

Finally,

He found a talent that made him very delighted.

Chapter 233: Comprehension, Astonishing Effects!

Witchman: Huo Ting

Cultivation Talent: Morning Star

Strength Talent: Pseudo-Mystic (70%)

Defense Talent: Pseudo-Mystic (60%)

Speed Talent: Pseudo-Mystic (60%)

Fire Talent: Pseudo-Mystic (50%)

Fire Spear Talent: Pseudo-Mystic (60%)

Comprehension Talent: Basic

“To think it’s a comprehension talent, there actually exists such a talent in this world?!”

Ye Tian was extremely excited and immediately copied the other's comprehension talent, fearing that the next second, this witchman named Huo Ting would log off and leave, leaving him no time even to cry.

Those with the same cultivation talent generally have similar comprehension abilities. However, the higher one's cultivation level, the better their comprehension will be. But within the same realm, the difference in a person's comprehension is not significant unless one has a very high cultivation talent and the other very low, which would result in a difference in comprehension.

For example, among those of the same realm at the King level, all possessing Extraordinary cultivation talent and the same top-level talent in sword techniques: if they were to comprehend a sword technique, the time taken to learn and perfect it to the complete realm would not differ much.

But with a comprehension talent, it's different.

Comprehension talent can enhance comprehension, thus greatly speeding up the process of comprehending sword techniques, sword intent, the realm of the Sword Dao, and even the comprehension of mysteries.

Who wouldn't like their talents to become higher? But for now, the only things that can rapidly enhance comprehension are treasures like the Enlightenment Stele and the War God Stele, and they only provide a temporary boost, not a permanent one.

However, possessing a comprehension talent is different. It's like permanently enhancing one's comprehension. Plus, with the Enlightenment Stele, the level of comprehension enhancement would be terrifyingly high!

"No wonder this person is merely at the King level but was able to comprehend so many talents to the Pseudo-Mystic level. The comprehension talent must have played a significant role," Ye Tian guessed.

After copying the comprehension talent, Ye Tian logged off.

Inside the cultivation chamber.

Ye Tian started to integrate this comprehension talent and soon successfully merged with it.

Communicating with the mark of the comprehension talent, he understood everything about it.

“Basic comprehension talent can enhance comprehension by threefold!”

Ye Tian realized.

Threefold enhancement in comprehension might not seem high, but if assisted by treasures like the Enlightenment Stele in cultivating, the effect on comprehending mystic arts would be extraordinary. Others might face bottlenecks in comprehending mystic arts, but it would be much easier to break through these bottlenecks with threefold comprehension.

In reality, the effect of cultivating under threefold comprehension is far more than just threefold.

“Basic comprehension talent only enhances comprehension threefold, but I have the Divine Talent Elixir!”

Ye Tian was excited.

This was why he was so excited upon seeing the comprehension talent. He could enhance the basic comprehension talent to intermediate, high, or even top-level.

But the comprehension talent must be incredibly powerful, requiring a lot of Divine Talent Elixir.

“This comprehension talent is too important. Even if it consumes a lot of Divine Talent Elixir, I must enhance it!”

Ye Tian resolved.

Taking out the Divine Talent Elixir, Ye Tian drank a full jin of it without worrying about wastage.

Boom!

The mark of the comprehension talent absorbed the energy of the Divine Talent Elixir, slowly enhancing the talent.

After a full jin of Divine Talent Elixir was completely consumed, the comprehension talent finally upgraded from basic to intermediate.

“A jin of Divine Talent Elixir only upgraded the comprehension talent to intermediate. It really consumes a lot!” Ye Tian sighed, but he didn’t feel heartache over the loss of the Divine Talent Elixir and continued to consume it.

Several hours passed, and Ye Tian used fifteen jin of the Divine Talent Elixir, barely managing to upgrade the intermediate comprehension talent to high.

“I hope its limit isn’t high-level, like the time talent!”

Ye Tian secretly hoped.

After drinking a sip of Divine Talent Elixir, the high-level comprehension talent improved slightly. Even if it was just a bit, it meant that the high-level comprehension talent could continue to be enhanced, which was enough.

Previously, the high-level time talent couldn’t be enhanced at all with the Divine Talent Elixir.

Drink!

Drink!

Continue drinking!

Continue drinking!

Ye Tian drank the Divine Talent Elixir as if it were water, consuming more as soon as he finished.

Until the next day.

Ye Tian had drunk about 500 jin (250 kilograms) of Divine Talent Elixir. Just when there was almost none left, his comprehension talent transformed.

[Comprehension: Top level]

“Phew~ Finally, I have elevated my comprehension talent to the top level!”

Ye Tian sighed in relief.

He checked and found that after reaching the top level, his comprehension talent could enhance comprehension by twentyfold.

With a twentyfold increase in talent, Ye Tian felt invincible.

He went to a cultivating chamber near the Enlightenment Stele and began to comprehend the realm of the Sword Dao under its amplification, activating his top-level comprehension talent and high-level talent in time.

Boom!

Ye Tian felt as if he were a god, insightfully understanding all the mysteries of Sword Dao, easily comprehending one after another. His progress in Sword Dao was unbelievably fast, reaching an unimaginable level.

Originally, he had comprehended 17% of Sword Dao, but now he felt as if he could step into the 18% realm at any moment.

The next day, Ye Tian’s realm in the Sword Dao reached 18%.

On the seventh day, his realm in the Sword Dao reached 19%.

After half a month, Ye Tian's realm in the Sword Dao finally reached 20%.

And the speed of cultivating sword techniques was even faster. In just one day, Ye Tian successfully enhanced Starfall Slash to the major realm, which could amplify attack by eightyfold.

After spending half a day, Ye Tian cultivated the legendary-level sword technique, Void Breaker, to the major realm. Ten days later, he finally brought the Void Breaker to the perfected realm in one fell swoop.

It became the only legendary-level sword technique Ye Tian had perfected!

This legendary-level sword technique's amplification effect was slightly weaker, only amplifying attack by ninetyfold, not as much as other legendary-level sword techniques. But it far surpassed other attack-type legendary-level sword techniques.

With Ye Tian's current cultivation level, he could slash an enemy tens of thousands of miles away with a single strike through the air.

Such a sword technique was terrifying!

Ye Tian even felt that given some time, he could create numerous gold-level and legendary-level sword techniques.

However, his current sword techniques were sufficient, and there was no need to waste time creating more.

"Let's focus on enhancing my cultivation level first!"

Ye Tian decided.

During this time, he hadn't been focusing on cultivating. Otherwise, he would have already broken through his body's limits eight times.

But just as he was preparing to seriously cultivate, a message came from the Glory Virtual World: his challenge invitation had been accepted.

“The Void Breaker Sword Emperor has accepted the challenge!”

Ye Tian immediately went to the virtual world.

In the virtual space.

Ye Tian and the Void Breaker Sword Emperor arrived almost simultaneously.

“Ye Tian, you dare to challenge with your five-star emperor-level strength, and even wager 5000 points. Are you afraid that I wouldn’t accept the challenge?”

The Void Breaker Sword Emperor said, slightly surprised.

5000 points was not a small amount. Many emperors spend points quickly and may not even have 5000 points. Ye Tian was also worried that the Void Breaker Sword Emperor, a six-star emperor, would look down on a challenge from a five-star emperor, hence the wager of 5000 points.

He was a newcomer, but there was no limit to the wagered points in challenges against veterans, and 5000 points were enough. He wasn’t arrogant enough to wager tens of thousands of points.

Winning would completely offend the opponent.

He believed that seeing the wager of 5000 points and his displayed five-star emperor-level strength, the opponent would surely accept the challenge.

Sure enough.

The Void Breaker Sword Emperor accepted the challenge.

“As fellow swordsmen, I want to experience the sword techniques of the Void Breaker Sword Emperor!”

Ye Tian took out a Morning Star level sword, and a strong Sword Dao aura burst forth, enveloping the entire void.

Chapter 234: A Draw to End It All! The Outcome Ye Tian Desired!

“Indeed, it’s the realm of Sword Dao!”

The Void Breaker Sword Emperor was not at all surprised.

The top brass of Tianfu Super Base had already obtained some information about Ye Tian, and the fact that Ye Tian possessed legendary sword techniques was no secret.

Any martial warrior who comprehended legendary sword techniques must possess Morning Star-level swordsmanship talent.

“Martial artists with Morning Star-level swordsmanship talent are too rare. As a senior, let me give you some guidance!”

The Void Breaker Sword Emperor also unleashed his own Sword Dao, clashing fiercely with Ye Tian’s.

“25% Sword Dao realm!”

Ye Tian smiled faintly.

Clearly, even the Void Breaker Sword Emperor couldn’t comprehend the Sword Dao realm to a higher level. Ye Tian, with the Enlightenment Stele, time talent, and comprehension talent, was able to comprehend the Sword Dao realm to 20%.

Without time and comprehension talents, even with the Dao Enlightenment talent, he didn’t know how long it would take to comprehend the Dao Enlightenment talent to 20%, probably decades like the Void Breaker Sword Emperor did to reach 25%.

At this moment, Ye Tian only released about half of his Sword Dao realm, thus being suppressed by the Void Breaker Sword Emperor's sword realm.

Ye Tian smiled slightly, and his Sword Dao aura surged violently.

10%!

11%!

12%!

In a blink of an eye, Ye Tian's Sword Dao realm surpassed 15%, completely overpowering the Void Breaker Sword Emperor.

Thud, thud, thud!

The Void Breaker Sword Emperor retreated several steps, feeling Ye Tian's Sword Dao aura growing stronger and finding himself completely at a disadvantage.

Instantly, his face turned awkward.

He had intended to instruct Ye Tian in the way of the sword, but now he was being suppressed by Ye Tian in Sword Dao, which was a painful blow to his pride.

Of course.

His real strength wasn't in Sword Dao, but in cultivation, having broken through the physical limits ten times.

And he could roughly sense Ye Tian's realm.

It was clear that Ye Tian hadn't broken the physical limits ten times, probably only seven times.

How could such an emperor, despite his immense talent, surpass him?

“Ye Tian, come and face my sword!”

The Void Breaker Sword Emperor roared.

“Sky-Splitting Sword!”

A golden sword tore through the air, as if it was going to split the heavens.

Such a sword was enough to make Ye Tian take it seriously, even slightly surpassing the twelve ferocious beast overlords.

Clearly, the Void Breaker Sword Emperor was a genuine ferocious beast lord-level fighter.

Ye Tian was well aware that he couldn’t contend with the Void Breaker Sword Emperor without revealing some of his trump cards.

“Then I’ll reveal my top-level spatial talent!”

Ye Tian decided.

Top-level spatial talent was not unique; Tianfu Super Base had top-level spatial talent holders, and among the ferocious beasts, there were also top-level spatial talent holders.

As long as he didn’t reveal his Pseudo-Mystic-level spatial talent, it would be fine. Pseudo-Mystic-level spatial talent was too powerful, and revealing it would naturally cause a lot of trouble.

But even with top-level spatial talent, Ye Tian could ensure his invincibility.

Whoosh!

Ye Tian teleported away, dodging the Void Breaker Sword Emperor's sword.

“Teleportation!”

The Void Breaker Sword Emperor then remembered Ye Tian's spatial talent.

Suddenly,

The void froze, as Ye Tian used spatial imprisonment to lock down the space.

“Spatial imprisonment! You are a top-level spatial talent holder, not just a high-level spatial talent one!!!!!!”

The Void Breaker Sword Emperor was immensely shocked.

High-level spatial talent holders and top-level spatial talent holders are entirely on different levels; their spatial abilities differ vastly.

Under spatial imprisonment, his speed was greatly affected.

Yet, Ye Tian could continuously teleport. Unless his strength far exceeded Ye Tian's, it would be very difficult to break through Ye Tian's teleportation.

“Spatial talent, truly a favored child of heaven and earth!”

The Void Breaker Sword Emperor envied.

Whoosh!

Ye Tian teleported again, appearing behind the Void Breaker Sword Emperor, striking with his sword.

At that moment.

A defensive light shield appeared around the Void Breaker Sword Emperor, a manifestation of his Mystic-level defensive talent.

And outside the light shield was a layer of sword curtain, a defensive sword technique.

Bang!

Ye Tian's sword struck the sword curtain, the immense resulting force causing both to retreat.

In that moment of retreat, Ye Tian secretly smiled.

For he had just seen the Void Breaker Sword Emperor's talent profile.

Human: Hong Biao

Cultivation Talent: Moonlight

Strength Talent: Mystic

Defensive Talent: Mystic

Speed Talent: Pseudo-Mystic (70%)

Sword Technique Talent: Morning Star

The Void Breaker Sword Emperor's talents were few, but with his Mystic-level strength talent and Morning Star-level sword technique talent, he was not someone ordinary emperors could compare with. Even among six-star emperor-level fighters, he was definitely one of the strongest.

"Copy!"

Ye Tian silently copied the Void Breaker Sword Emperor's Morning Star-level sword technique talent.

Once he copied the Morning Star-level sword technique talent, Ye Tian's goal was achieved, but the battle continued.

Ye Tian knew that the Void Breaker Sword Emperor's attack power was formidable, even stronger than some seven-star emperors. The only flaw was his speed. It would be incredibly difficult for the emperor-level Void Breaker Sword Emperor to comprehend his speed talent to the Mystic level, almost impossible to improve.

Ye Tian was well aware that his own attack power was inferior to the Void Breaker Sword Emperor's. Even if he improved his cultivation to breaking the body's limits nine times, his attack power would still not match the opponent's, who had broken the limits ten times and undergone a great transformation. Moreover, like him, the Void Breaker Sword Emperor possessed Mystic-level strength talent and Morning Star-level sword technique talent. Even if his legendary sword technique realm was not as good as Ye Tian's, the huge advantage in cultivation could easily make up for this small flaw.

Of course.

Ye Tian knew if he fully unleashed his Pseudo-Mystic-level spatial talent, advanced time talent, and other talents, he could definitely defeat the Void Breaker Sword Emperor, but there was no need.

Stall!

That was Ye Tian's decision.

He wanted to drag the fight out for ten hours. If the battle had no outcome after ten hours, it would be declared a draw.

Ye Tian didn't want to lose, but he also didn't want to be high-profile. He preferred a low profile, so a draw was the best outcome and one that Ye Tian was happy to see.

Time passed by slowly.

No matter how the Void Breaker Sword Emperor attacked, Ye Tian could always use teleportation to escape, occasionally attacking with spatial blades, making the Void Breaker Sword Emperor wary.

Because the spatial blade was too powerful, if he couldn't deploy his defensive sword technique in time, relying only on his Mystic-level defensive talent might not be enough to safely block Ye Tian's spatial blade attack.

Like this, ten hours quickly passed.

Boom!

Two flashes of light appeared, and both Ye Tian and the Void Breaker Sword Emperor were teleported away, ending the spar in a draw.

"I actually ended in a draw against a five-star emperor?"

The Void Breaker Sword Emperor couldn't believe it even after the spar ended.

Soon, he realized that Ye Tian must have hidden his strength when challenging Glory Tower. If he had displayed the strength he showed today, he could have barely passed the eighteenth floor.

That is to say, Ye Tian could be considered as the weakest among the six-star emperor-level fighters.

Chapter 235: Exotic Fire, Breaking the Eighth Physical Limit!

Exiting the virtual world...

Ye Tian muttered, "Although I exposed some of my strength this time, copying a Morning Star-level swordsmanship talent is worthwhile. If I can copy another Morning Star-level swordsmanship talent, then my swordsmanship talent will surely transform again, becoming a Moonlight-level swordsmanship talent!"

However, Ye Tian also knew very well how rare it was for Morning Star-level sword techniques to emerge, and he had no idea when he would find another talent with Morning Star-level swordsmanship.

But he had already instructed the members of Tian Pavilion to continue searching, and once they found a genius with Morning Star-level swordsmanship talent, he would definitely know immediately.

“Let’s continue cultivating!”

Ye Tian prepared to fully enhance his cultivation.

Ye Tian possessed many Mystic-level attribute talents, but he wanted to cultivate with Empress Yue, which would allow him to activate a tenfold time acceleration, making it more convenient for Empress Yue to cultivate faster.

However, this meant that it would be difficult for him to go to those special cultivation spots.

Unless he asked Empress Yue to join him in cultivating, but that would delay her cultivation.

And Ye Tian did not want to reveal his Mystic-level Moon God talent, as he couldn’t explain it.

“I heard that some attribute treasures can replace certain cultivation spots. The points store should have such treasures, right?”

Thinking this, Ye Tian re-entered the virtual world and browsed the points store.

It didn’t take long for Ye Tian to actually find an attribute treasure —

“First-grade Exotic Fire — Earth Core Fire!”

Exotic Fire!

Ye Tian recalled exotic fires from some novels, but there were some differences here; in this era, exotic fires were born in special places and formed over long periods of evolution.

Exotic fire is also a convergence of fire attribute energy, forming a special treasure.

It, however, is exhaustible.

Exotic fire is not eternal; without the replenishment of fire attribute yuan qi, its energy will gradually dissipate.

Therefore, once an exotic fire is harvested, it will eventually disappear over time unless preserved by some means.

The greatest use of exotic fire was for those with Mystic-level fire attribute talents and Emperor-level cultivators to refine their bodies, thereby breaking physical limits. The refining effect of exotic fire is even better than that of volcanic refining.

But the exotic fire will be consumed, and it also generates antibodies. For example, a cultivator with a Moonlight-level refining talent who uses exotic fire to refine the body, after breaking a physical limit once, will find it difficult to break the physical limit again, similar to using the fire yuan qi in volcanic magma for refining.

“Exotic fire, not bad. If I have exotic fire, I can just stay in Tian Pavilion or with the Moon God Sect, accompanying Yue’er in cultivation, without having to go out!” thought Ye Tian.

He checked the price; the exotic fire only required 8000 points, not too expensive.

After all, Earth Core Fire is just a first-grade exotic fire, the most basic kind, so its value is not too high. Also, there are places with similar refining effects to exotic fire.

There are so many volcanic areas on Earth, just go to any volcano for cultivation. Even if the effect is slightly inferior, it will only waste a bit more time.

Perhaps alchemists might need some exotic fire for alchemy, but alchemists are extremely rare, and those who use exotic fire for alchemy are certainly top-tier alchemists. And how many alchemists are there nowadays?

A piece of exotic fire, generally used sparingly by a top-tier alchemist, occasionally replenished with some fire yuan qi, can last a very long time.

Therefore, the demand for exotic fire among alchemists is not so high, and those with Mystic-level fire attribute talents and Emperor-level cultivators rarely have the luxury of using exotic fire for cultivation.

That's why a first-grade exotic fire only costs 8000 points.

“Purchase!”

Ye Tian placed an order for the first-grade exotic fire — Earth Core Fire!

The next day.

The first-grade exotic fire, Earth Core Fire, was delivered to Ye Tian by an Emperor-level cultivator, completing the transaction.

A certain top-tier cultivation room in Tian Pavilion.

This cultivation room was specially constructed, with an open top, connected to the outside world, capable of attracting moonlight. It was equipped with a levitation array and had two closely adjacent levitating stone slabs.

Ye Tian and Empress Yue each sat cross-legged on a floating stone slab.

Empress Yue harnessed the moonlight to refine her body, while Ye Tian took out the first-grade exotic fire, Earth Core Fire, for his own refinement.

“Tenfold time acceleration!”

Ye Tian activated his advanced time talent's ability to accelerate time.

Under the effect of tenfold time passage, both of their progress speeds were rapid.

For instance, Empress Yue was already close to breaking her fifth physical limit. This was despite spending a lot of time comprehending Mystic-level techniques and sword intent; otherwise, she would have been ready to challenge her sixth physical limit by now.

Such was the terrifying aspect of tenfold accelerated time!

Of course.

Both of their lifespans were also being consumed at ten times the rate, but both Ye Tian and Empress Yue were very young, naturally unafraid of this kind of consumption.

“Refine!”

Ye Tian used his Fire Domain talent to slowly refine his body with the power of the exotic fire.

Boom!!!!

The power of the exotic fire engulfed his entire body, as if turning Ye Tian into a figure made of fire.

“The refining effect is terrifying, worthy of being exotic fire. I previously refined at Fire Dragon Mountain, and the fire yuan qi had a limited effect on me, but now the refining effect of this exotic fire is even better than my first time at Fire Dragon Mountain!” exclaimed Ye Tian excitedly.

With this, it wouldn't take long for him to break through his eighth physical limit.

“A month in the real world!”

Ye Tian estimated.

Time passed day by day, and both of their auras steadily grew.

On the 22nd day, Empress Yue's aura surged greatly as she completely broke her fifth physical limit, significantly boosting her strength.

On the 31st day, Ye Tian also reached a bottleneck, and then, with the aid of the exotic fire, easily broke through his eighth physical limit, with his physical strength reaching 800 Dragon Power.

At that moment, Ye Tian suddenly had a feeling.

“My body is about to undergo a transformation!” Ye Tian thought to himself.

This was not just breaking a physical limit, but more like a sublimation.

Suddenly, he thought of a possibility —

Innate Fire Spirit Body!

He might be close to condensing an Innate Fire Spirit Body.

Although he had broken his eighth physical limit, he had not done so using a single attribute yuan qi, but rather multiple types of yuan qi. Each type of yuan qi's refining effect on the body was insufficient to condense an Innate Body.

This time, using the power of the exotic fire for refinement, and previously refining at Fire Dragon Mountain with fire yuan qi, had brought him to the threshold of condensing an Innate Fire Spirit Body.

Once the Innate Fire Spirit Body was condensed, the refining effect of fire attribute yuan qi would become more pronounced in the future, and the power of his fire attribute talents would greatly increase when using the Innate Fire Spirit Body.

For example, once Empress Yue used her Innate Moon Spirit Body, her Moon God talent, Moon Blade talent, and Moon Hand talent would all be greatly enhanced. This was also an effect of an Innate Body.

“Continue refining!” Ye Tian decided.

Meanwhile, Empress Yue, having stabilized her fifth physical limit, stopped using moon power for refinement and began to comprehend sword intent.

Nowadays, her sword intent had already been comprehended to seventy percent. With tenfold time and the Enlightenment Stele, she firmly believed that she would soon fully comprehend it, allowing her to refine her gold-level sword techniques to perfection, significantly enhancing her strength.

Chapter 236: Astonishing News, The Black Dragon Overlord is Dead!

Empress Yue studied sword intent, while Ye Tian continued to temper his body with the exotic fire.

As time passed, the energy of the exotic fire diminished, having already lost a third of its potency.

If the exotic fire were placed within a volcano to absorb the fire yuan qi, it could recover some energy, but it would take a longer time. However, Ye Tian didn't care about the consumption of the exotic fire, indifferent even if it was completely exhausted.

Another ten days passed, and Ye Tian had used the tenfold acceleration of time to temper his body for a total of 100 days.

On this day,

Ye Tian's body underwent a transformation; he directly absorbed the exotic fire, as threads of fire law power entered his body, altering its essence.

Gradually, scorching flames emanated from Ye Tian's body, seemingly capable of burning the void.

Fortunately, the room for tempering was equipped with a powerful array, or else the entire Tian Pavilion would have been incinerated by Ye Tian's fiery phenomenon.

"The husband is about to condense an innate fire spirit body!"

Empress Yue opened her eyes, gazing joyfully at Ye Tian and said.

She had spent many years constantly tempering her body with moon power, and only a few years ago, with the help of the intense moon power in the beast world, did she condense an innate moon spirit body.

Ye Tian, having reached the Emperor level and in such a short period of time, successfully condensed an innate fire spirit body, breaking his physical limits eight times. Such talent was truly against the heavens.

Others might not be aware of her husband's capabilities, but she was. He did not rely on boundary-breaking pills or similar treasures to forcefully break through his physical limits, but instead practiced normally, perfectly breaking through the limits with limitless potential.

Those on the Emperor's list who had broken their physical limits ten times were not even worthy to carry her husband's shoes. Her husband was the world's number one genius, and in the future, he would surely be the world's strongest!

Empress Yue stopped tempering, her gaze fixed on Ye Tian.

A few hours later,

The flame power converged throughout his body, and Ye Tian opened his eyes, a powerful innate pressure spreading out.

"The innate fire spirit body has successfully condensed!"

Ye Tian smiled slightly.

To say he was extremely excited would be an exaggeration; it was just a small achievement. Moreover, following this condensation of the fire spirit body, he had completely absorbed the exotic fire, further tempering his body and completing about one-tenth of the progress towards breaking his ninth physical limit.

Such progress was already quite remarkable!

“The ninth physical limit is difficult to break in a short time. The more limits broken, the harder it becomes. Unless they use a boundary-breaking pill, an ordinary Moonlight-level cultivation talent might not break the ninth limit even in three to four hundred years. I have a Supreme level cultivation talent; if I really focus on tempering, I could break the ninth limit in seven or eight years. With tenfold time acceleration, it would take less than a year. If in an attribute-dense land, it would take at least six to seven months.”

Ye Tian calculated in his mind.

He wasn't inclined to undertake such arduous cultivation for six to seven months, unless he could use treasures like the exotic fire again. However, exotic fires were undoubtedly of little use to him now, unless it was of a higher order.

But such exotic fires were too rare and difficult to find. There were a few first-order exotic fires left in the points mall, but he didn't bother purchasing them.

“Let's relax for a while!”

That's what Ye Tian planned.

But just as he and Empress Yue began to relax, within two days, a troubling matter arose.

If it were an ordinary issue, Ye Tian could have ignored it, but this time it involved the beast world and the beast overlord.

In Tian Pavilion,

The Battle Axe Emperor personally came to see Ye Tian.

“Emperor Ye Tian, there’s a big problem!”

The Battle Axe Emperor said anxiously.

“What’s the matter?”

Ye Tian sensed something ominous.

The Battle Axe Emperor presented a piece of information: “Emperor Ye Tian, this is intelligence obtained by an Emperor-level practitioner during their training in the beast world. The Black Dragon Overlord is dead, and its corpse was discovered by that Emperor-level practitioner!”

“The Black Dragon Overlord is dead, isn’t that good news?”

Ye Tian said.

“Emperor Ye Tian, please look at this before you comment!”

The Battle Axe Emperor’s face was still pale.

Ye Tian opened the document and browsed through it, his expression growing increasingly solemn.

“The Black Dragon Overlord’s body was actually severed, killed in one strike by another beast!”

Ye Tian was deeply concerned.

The Emperor-level practitioner speculated that the beast might have surpassed the realm of the beast overlords, reaching another level. Otherwise, how could the Black Dragon Overlord be killed in one strike?

“Dawn-level bloodline talent!”

Ye Tian finally recalled the matter of the Holy Dragon Fruit.

On that day, he took two Holy Dragon Fruits, but seven others were taken by seven beast overlords.

Although only a short time had passed and those seven beast overlords might not have reached the God level, i.e., the divine beast level, what if they did?

If one of the beast overlords stepped into the God level, then Zhonghai Super Base must immediately retreat back to Earth, not daring to enter the beast world again. An attack from a divine beast would be more than Zhonghai Super Base could handle, even Tianfu Super Base might not be able to withstand it....

At this moment, the Battle Axe Emperor, aware that the level above Emperor was God, speculated and asked, “Emperor Ye Tian, has a God-level beast been born in this beast world?”

“Not sure, but we can’t rule out the possibility!”

Ye Tian replied.

“If it’s a divine beast...”

The Battle Axe Emperor clenched his teeth, fully aware of what this meant.

“Battle Axe Emperor, first recall all the other Emperors, and only deploy a few Emperors and some Saints to guard the base. Also, keep this matter quiet for now to avoid causing panic. The beast blood, various spiritual medicines, and treasures from the beast world are major resources for Zhonghai Super Base, and we shouldn’t give them up if possible!” Ye Tian suggested.

“Of course!”

The Battle Axe Emperor nodded in agreement.

Ye Tian pondered for a while, then said, “Well, I’ll go to the beast world to investigate.”

Upon hearing this, the Battle Axe Emperor’s expression changed drastically: “Emperor Ye Tian, wouldn’t that be too dangerous?”

Even the Black Dragon Overlord, a terrifying beast that the entire Zhonghai Super Base could only attack with the War God Tower, was killed in one strike. Wouldn’t it be very dangerous for Ye Tian?

“Battle Axe Emperor, don’t worry. Although the Black Dragon Overlord was a beast overlord and completed ten bloodline transformations, its strength was not that strong, only at the five-star Emperor level. In fact, my true strength is not at the five-star Emperor level, but at the six-star Emperor level, and I have the means to preserve my life even against a seven-star Emperor!” Ye Tian revealed a bit of information.

“What!”

The Battle Axe Emperor was stunned.

Ye Tian’s strength was terrifyingly immense!

He didn’t doubt Ye Tian’s words. An Emperor like Ye Tian wouldn’t boast, especially about such dangerous matters. Without sufficient strength, who would go?

Since Ye Tian said so, he must be confident.

Thus, the Battle Axe Emperor agreed to Ye Tian’s suggestion.

Immediately, Ye Tian went to tell Empress Yue. Although she was reluctant, she agreed, as this was related to humanity’s safety and the future of Zhonghai Super Base.

Of course,

It was also for them to have a safe environment for tempering in the future. Therefore, Ye Tian decided to investigate this matter.

And Ye Tian had another plan.

If those beast overlords had not stepped into the God level, and if he had the ability, he would slay them to eliminate future threats.

Chapter 237: The Nine Lives Emperor Cat!

Beast World.

Ye Tian once again passed through the five-star space rift near Zhonghai Super Base, arriving here.

He didn't enter the base on the Beast World side, but directly delved into the Beast World itself.

All along the way.

Ye Tian advanced with his stealth talent activated, to avoid being detected by other Emperor-level beasts and disturbing his purpose this time.

Now, under the influence of his perceptive talent, Ye Tian had comprehended the mystique of stealth, successfully entering the realm of Pseudo-Mystic level. His stealth ability greatly improved, making him almost undetectable even while flying at high speeds.

In this region, Ye Tian flew for several hours, surveyed many areas, and even secretly hypnotized some Emperor-level beasts, but he couldn't extract any useful information.

Suddenly.

A golden figure caught Ye Tian's attention.

It was a great golden eagle!

“The Golden Winged Peng, it’s that one!”

Ye Tian recognized it. This Golden Winged Peng was an old acquaintance. Initially, he had stolen the Void Flower from its nest, which allowed his copy talent to evolve and upgrade. He had also copied the Golden Winged Peng’s Mystic-level flight and top-tier slash talents, both of which greatly benefited him.

This Golden Winged Peng was a terrifying Emperor-level beast that Ye Tian couldn’t contend with initially. To avoid its pursuit, he had to use his stealth talent to hide under a riverbed and only emerged much later.

Later, when he and Empress Yue were searching for the beast with the Soul Spike talent, they saw it fighting another Emperor-level beast, resulting in its defeat.

Now, he saw it again.

It must be said, their fates were deeply intertwined!

“The strength of the Golden Winged Peng has grown considerably since then. Initially, it had completed five bloodline transformations, but now it has completed six.

Unfortunately, the Golden Winged Peng lacks powerful attack talents. Although it’s much faster than the Battle Axe Emperor, who has broken through three bodily limits, its attack power is too weak, making its combat strength far inferior to the Battle Axe Emperor.

Even now, if the Golden Winged Peng encountered the Battle Axe Emperor, it could only rely on its speed to escape.

“The strength of the Golden Winged Peng is still quite formidable among the Emperor-level beasts. It should know some information, right?”

Ye Tian speculated.

So.

He deactivated his stealth talent and teleported in front of the Golden Winged Peng.

Seeing a human appear before it, the Golden Winged Peng became incredibly angry.

It loathed humans!

Previously, one of its treasures was stolen by a human, and it hadn't found the thief yet, so it also hated other humans.

"Hey, this aura... it's that human thief!"

The Golden Winged Peng recognized Ye Tian's identity.

Instantly, it angrily flapped its wings, sending a golden thread-like slash towards him, intending to kill Ye Tian in one strike.

"Golden Winged Peng, a few years ago I might have been unable to withstand your attack. But now?"

Ye Tian smiled faintly and pointed a finger.

Buzz!!!

Space power spread out, freezing the area.

The Golden Winged Peng suddenly found its speed drastically reduced, as if bound by some force.

At that moment.

Ye Tian had a sudden inspiration and began to experiment with a new space ability he had recently comprehended.

When his space talent entered the Pseudo-Mystic level, there wasn't much change, but upon reaching 10% Pseudo-Mystic level, he could begin to intuitively understand space abilities.

The uses of space were numerous, and comprehending the mysteries of space was just the beginning. What abilities could be realized required personal exploration, different from other talents.

Other talents were singular in ability, but time and space were entirely different.

Regrettably, the space talent was extremely difficult to comprehend. Previously, he had copied the space talent from beasts and hadn't bothered with it.

Now, just to advance to ten percent of the Pseudo-Mystic space talent, he had spent a long time. To elevate it to twenty percent of the Pseudo-Mystic level would require even more time.

This was despite his top-tier perceptive talent; otherwise, he wouldn't have been able to advance his space mystique to ten percent of the Pseudo-Mystic level.

And now, the new space ability Ye Tian had developed was space compression!

Space compression means compressing a space into a very small area. If this ability could be perfected, perhaps one day it would be possible to compress a planet's space into a point.

Ye Tian's space compression was still immature. If it were fully developed, he could compress a small piece of space into a point, allowing him to create space rings without the need for space stones.

"Space Compression!"

Ye Tian activated this space ability.

Crack, crack, crack!

The space around the Golden Winged Peng compressed bit by bit. The eagle let out a pitiful scream, feeling as if it was being crushed by a force, its golden feathers shattering.

After a while, the Golden Winged Peng was covered in blood!

“That’s enough!”

Ye Tian stopped experimenting with the Golden Winged Peng and released the space compression.

“Human, I surrender!”

The Golden Winged Peng lowered its proud head, not daring to act rashly anymore.

Even though Ye Tian was its enemy, having stolen its treasure, it knew it was no match for him. Ye Tian could easily kill it, so how could it fight back?

“Surrender?”

Ye Tian was slightly taken aback. He had intended to hypnotize the Golden Winged Peng, but it seemed unnecessary now.

“Golden Winged Peng, do you know that the Black Dragon Overlord is dead?” Ye Tian asked.

“I know!”

The Golden Winged Peng replied, trembling with obvious fear.

“Who killed him?”

Ye Tian inquired.

“I... I dare not say!” The eagle said fearfully.

“Not talking? Then die!”

Ye Tian threatened.

“Alright, I’ll tell!” The eagle submitted again. “It was Lord Nine Lives Cat Emperor. There was a bit of grudge between Lord Nine Lives Cat Emperor and the Black Dragon Overlord. For the sake of the Holy Dragon Fruit, the Black Dragon Overlord teamed up with the Black Tiger Overlord to ambush Lord Nine Lives Cat Emperor. After a battle, the Cat Emperor escaped. Later, not long ago, the Cat Emperor suddenly appeared, first killing the Black Tiger Overlord and then killing the Black Dragon Overlord while it was hunting.”

“The Black Tiger Overlord is dead too?”

Ye Tian was somewhat surprised.

Initially, the Black Tiger Overlord had teamed up with the Black Dragon Overlord to hunt him down. He had thought of taking revenge on them after growing stronger, but they ended up dying at the hands of the Nine Lives Cat Emperor.

Ye Tian had some impression of the Nine Lives Cat Emperor, one of the twelve, now ten, Overlords of the Beasts.

“Has the Nine Lives Cat Emperor become a God-level beast?” Ye Tian asked again.

“I don’t know! How dare I approach Lord Nine Lives Cat Emperor? I only heard about it from other powerful Emperor-level beasts,” the eagle said pitifully.

To confirm the veracity of the information, Ye Tian still forcibly hypnotized the Golden Winged Peng and asked the questions again.

“The Golden Winged Peng didn’t lie,” Ye Tian thought to himself.

“Golden Winged Peng, we have enmity between us, and as a beast, you have killed many humans. Your subordinates have also spilled human blood. Sorry, I cannot let you go! But I won’t make you suffer.” Ye Tian spoke softly.

Immediately, he used his Soul Spike talent on the hypnotized Golden Winged Peng.

In the Glory Virtual World, he dared not reveal his Soul Spike talent, fearing it would provoke a group attack from other Emperor-level beings. It was a powerful means to easily kill peers, and even the strong on the Emperor List would struggle against Ye Tian’s Soul Spike unless they had soul defense treasures.

Therefore, he tried not to use the Soul Spike talent on Earth.

But in the Beast World, he had no such concerns.

Puff!

The Soul Spike pierced through the Golden Winged Peng’s soul.

The Golden Winged Peng, being weaker than Ye Tian, couldn’t withstand his Soul Spike talent and was killed instantly, its soul obliterated.

Chapter 238: The Green Ox Overlord, Eleventh Bloodline Transformation!

Swoosh!

Ye Tian swiftly flew away, continuing his search for the traces of the beast overlords.

He roughly understood the situation from the Golden Winged Peng.

The Black Dragon Overlord and the Black Tiger Overlord had died. As for whether other overlords had perished, it was still unclear, but the strength of the beast overlords was undoubtedly much more terrifying than before.

It's possible that beast overlords like the Nine-Lives Cat Emperor had not yet become God-level beasts, but they were probably close to breaking through. He must seize this opportunity to kill them, or else if time dragged on, it would surely be disadvantageous for Ye Tian.

As Ye Tian delved deeper into the world of the beasts, more clues emerged.

On this day.

Ye Tian saw a region filled with vast numbers of beast corpses, bones, and fur, along with faint traces of blood.

“There's a beast crazily hunting other beasts!”

Ye Tian immediately guessed the reason.

Suddenly.

He thought of a possibility: evolution and upgrading.

Like humans, beasts need to absorb massive amounts of yuan qi to break through their boundaries. The yuan qi in this beast world was actually much more scarce than before, almost the same as on Earth, where the yuan qi had only been recovering for a little over a hundred years, hardly considered rich.

Moreover, on Earth, the major super bases had top or high-level Qi refining chambers, condensing ten or even twenty times the yuan qi, making breaking through major boundaries not a worry in terms of yuan qi content.

However, in the beast world, obtaining the yuan qi needed for advancement could be troublesome because if the absorption of yuan qi slowed down and couldn't keep up with the transformation, it could easily lead to failure in the transformation.

Therefore, many beasts would collect a large number of beast corpses to devour before their transformation, converting the energy of other beasts' corpses into nourishment for their own advancement, to ensure a hundred percent success in ascending.

“If there is an Emperor-level beast overlord attempting to break through to the God-level, given the state of yuan qi in this beast world, it’s not guaranteed that there will be enough yuan qi. Therefore, they would crazily hunt other beasts to supplement themselves!” Ye Tian speculated.

Immediately, Ye Tian’s expression became solemn.

This indicated that a certain beast overlord was likely attempting to reach the God-level soon.

Given the opponent’s Dawn-level bloodline talent, ascending to the God-level beast tier was almost a certainty!

“Find the opponent as soon as possible.”

Ye Tian decided.

“Tracking Talent!”

Ye Tian deployed his rare top-level tracking talent, and immediately various auras in the void became visible, among which he found one particularly strong trail.

Perhaps because the opponent was in a hurry and did not deliberately disperse these auras, nor did they think someone could track them, they were quite careless. Moreover, since the aura had not been left for long and had not dissipated, Ye Tian successfully tracked the opponent’s scent.

“Chase!”

Ye Tian transformed into a fleeing light and pursued.

Along the way, Ye Tian saw very few beasts; they had obviously all been hunted by the opponent.

After a long time, the scent converged in one place, incredibly dense, far more powerful than the faint scent left before.

“The opponent is here!”

Ye Tian was very solemn, and he vigorously activated his invisibility talent, not daring to reveal the slightest hint of his aura.

Because he was not certain of the opponent’s strength. If the opponent had not reached the God-level as he had guessed but had actually achieved it, he would turn and flee without a second thought.

The opponent was a beast overlord, not just any ordinary Emperor-level beast ascending to the God-level. A beast overlord’s strength alone had reached the level of the Glory Emperor’s List, and ascending to the God-level would be unimaginably terrifying!

Battling such a God-level beast, no matter how many tricks he had, he could not guarantee his own life. Unless he broke through ten physical limits and completed the great transformation. Perhaps then, he could battle a beast overlord who had ascended to the God-level after transformation.

This place was a mountain range, surrounded by countless beast corpses, akin to a mountain of flesh and blood.

And at the base of the mountain range was the owner of the scent Ye Tian was tracking.

After scouting for a while, Ye Tian finally found an entrance, leading straight into the underground of the mountain range.

Thus, he proceeded inside, being extremely cautious.

Before long, Ye Tian arrived in a vast underground space, a blood lake composed entirely of ferocious beast blood. This bore witness to the sheer number of beasts the overlord had killed and the amount of blood extracted.

“Which beast overlord is this?”

Ye Tian, driven by curiosity, activated his copying talent, covering most of the lake.

Whoosh!

The talents of a beast appeared in Ye Tian's retinas.

Species: Ten-Horned Green Ox

Bloodline Talent: Dawn

Strength Talent: Mystic

Speed Talent: Top

Defense Talent: Mystic

Healing Talent: Top

Gravity Talent: Top

"It's the Green Ox Overlord!"

Ye Tian recognized it.

The Green Ox Overlord was quite powerful, possessing top-level gravity talent that could suppress an opponent's strength. With its own mystic-level strength talent and top-level healing talent, its power was incredibly terrifying. Although it didn't have overlapping talents, its gravity talent was almost equivalent to overlapping talents.

Thus, the Ten-Horned Green Ox was considered of intermediate strength among the twelve beast overlords previously, slightly stronger than the Black Dragon Overlord.

After sensing for a while, Ye Tian finally understood the approximate realm of the Ten-Horned Green Ox.

“Indeed, it has not yet reached the God-level beast tier!”

Ye Tian was overjoyed.

Previously, the Ten-Horned Green Ox was a beast overlord that had completed ten bloodline transformations. Now, it seemed to be at the stage of having completed eleven transformations, much stronger than before.

“I was wrong. Perhaps the beast overlords are not rushing to break through to the God-level beasts but are aiming for higher numbers of bloodline transformations. The Ten-Horned Green Ox may not be gathering so much beast blood and corpses to break through to the God-level but to strive for the twelfth bloodline transformation!”

Ye Tian thought.

If a human with Dawn-level cultivation talent was born, they naturally wouldn't want to just break through ten physical limits before becoming God-level; they would definitely think about breaking more physical limits. And it was the same for beasts.

The Green Ox Overlord, with its long lifespan and Dawn-level bloodline talent, had significantly increased its cultivation speed and could easily complete the eleventh and even the twelfth bloodline transformation. Would they willingly give up?

It would eventually become a God-level beast, so why not add some foundation for itself?

A God-level beast that broke through after eleven bloodline transformations would definitely not be on the same level as one that broke through after twelve.

“So, I don't have to worry about any beast overlords stepping into the God-level tier, otherwise, I really wouldn't be able to kill them!”

Ye Tian thought.

The Green Ox Overlord, being an overlord that had undergone its eleventh bloodline transformation, and considering its talent situation, should be at the level of a six-star Emperor, but not a very strong one.

Facing Ye Tian, the Green Ox Overlord was even more restrained.

This was because its gravity talent couldn't contend with Ye Tian's spatial imprisonment whatsoever. Once its gravity talent was nullified, the Green Ox Overlord's strength would significantly decrease, even falling to the level of a five-star Emperor.

And what was Ye Tian's strength? He was the most terrifying six-star Emperor, and his soul attack methods could cause damage to an Emperor of any level. If Ye Tian couldn't be killed, over time, the one to die would be the opponent.

Unless the opponent had a soul treasure!

But would a beast like the Green Ox Overlord have a soul treasure?

That would be a joke!

“The chance of killing the Green Ox Overlord is ninety percent!”

Ye Tian estimated.

Chapter 239: Crushing the Ferocious Beast Overlord!

Whoosh!

Ye Tian dispelled his invisibility talent, and his aura leaked out.

Boom!!!!

The blood lake boiled, and a gigantic ox head emerged from the surface of the lake.

This ox head was blue in color, with ten horns on its head emitting a cold light. The ox's large eyes, filled with blood-red cold light, made anyone who glanced at it shiver uncontrollably.

The Ten-Horned Green Ox had appeared and noticed Ye Tian.

“Human!”

The Ten-Horned Green Ox emitted a soul-shaking sound, vibrating the void and causing the entire mountain range to tremble.

“The Green Ox Overlord!”

Ye Tian drew his Morning Star level saber, his fighting spirit boiling.

Boom!!!!

Without a word, the Green Ox Overlord activated its top-level gravity talent, unleashing a powerful gravitational force that seemed to make the entire space much heavier. Even ordinary Emperors would find it extremely difficult to move under the Green Ox Overlord's top-level gravity talent.

But facing Ye Tian, the top-level gravity talent was just too weak!

“Spatial Imprisonment!”

Hum!!!!

The power of space rippled out, and it was a Pseudo-Mystic level spatial talent. Ye Tian held nothing back.

In an instant, space was frozen, with even gravity unable to act within the frozen space.

“What, Spatial Imprisonment? You have top-level spatial talent? No, there's spatial mystery; you are a Pseudo-Mystic level spatial talent!!!!!!” The Green Ox Overlord was shocked.

This was the second time it had seen a being with a higher-than-top-level spatial talent. The first was a Ming Illusion Beast, and the second was Ye Tian, this human.

However, the Ming Illusion Beast was actually disguised by Ye Tian, unknown to the Green Ox Overlord.

“Human, even if you possess Pseudo-Mystic level spatial talent, so what? I am a ferocious beast overlord who has undergone eleven bloodline transformations. You have only broken through eight physical limits, equivalent to our eight bloodline transformations. You haven’t even completed the great transformation, and yet you dare to confront me? I’ve heard human flesh is quite delicious, and I haven’t tasted it yet. Today, I will savor the flavor of an Emperor-level human!” The Green Ox Overlord coldly stated, saliva dripping from its mouth.

“Eat me? Then try it!”

Ye Tian immediately activated his Soul Spike talent.

Swoosh!

The Soul Spike shot forth, but the Green Ox Overlord hardly felt the attack until the Soul Spike entered its soul. By then, it was too late to avoid, as the Soul Spike had already reached the sea of its soul.

Boom!!!

In the soul sea of the Green Ox Overlord, a gigantic ten-horned Green Ox soul collided with the Soul Spike.

Rip!

The Soul Spike pierced through the soul of the Green Ox Overlord, causing a massive collapse of soul power.

In an instant, the soul of the Green Ox Overlord shrunk.

“Argh, damn human, you actually hurt my soul!!!” The Green Ox Overlord roared in anger.

“Sure enough, the Soul Spike talent couldn’t kill it in one strike!”

Ye Tian was not surprised. The Soul Spike talent could instantly kill ordinary Emperors, but the Green Ox Overlord, having undergone the great bloodline transformation, had a soul strength more than ten times stronger than ordinary Emperor-level ferocious beasts. Even Ye Tian’s soul strength couldn’t compare to the Green Ox Overlord’s.

Unless Ye Tian also broke through ten physical limits and completed the great transformation, he wouldn’t be able to annihilate the soul of the Green Ox Overlord in one strike. Otherwise, he could only repeatedly use the Soul Spike talent to eventually annihilate the Green Ox Overlord’s soul.

Moreover, the Soul Spike couldn’t be used indefinitely, and it needed some time before it could be used again, approximately ten seconds.

Although ten seconds didn’t seem like much, for combatants like Ye Tian and the Green Ox Overlord, countless battles could occur in that time.

But Ye Tian possessed more than just the top-level soul talent of Soul Spike; he also had another top-level soul attack talent – the Soul Spear!

Originally a high-level soul talent, Ye Tian used the Divine Talent Elixir to elevate it to top-level, making its attack power not the slightest bit inferior to the Soul Spike.

Swoosh!

The Soul Spear shot forth, once again piercing through the soul of the Green Ox Overlord.

This strike further annihilated a portion of the Green Ox Overlord’s soul, causing it to scream in agony as its aura weakened and its strength diminished significantly.

“Human, I will kill you!”

The body of the Green Ox Overlord moved, causing the entire mountain range to crack.

Boom!!!

With towering rage, it charged at Ye Tian.

Ye Tian did not dare underestimate the attack of the Green Ox Overlord, an entity that had completed eleven bloodline transformations.

Immediately, he activated his Mystic-level defense talent, along with his God-level Five Elements Iron Armor talent.

These two talents combined to increase his defense by 600 times. Even if Ye Tian was struck head-on by the Green Ox Overlord, he wouldn't be severely injured. His teleportation and time talents were just added measures for his defense.

"Mystic-level Strength Talent, activate!"

"Starfall Slash!"

The fully mastered Starfall Slash could amplify attack power by 80 times, while the Mystic-level Strength Talent could amplify it by 100 times. These two talents allowed Ye Tian's total amplification to reach 8000 times. Combined with his own 800 Dragon Power and a 2 times yuan force amplification, his total attack power could reach 12.8 million Dragon Power.

What terrifying attack power!

In terms of attack power, even the Green Ox Overlord was less fearsome than him.

However, the defense of the Green Ox Overlord was still formidable. After all, its defense was also of Mystic level. Although Ye Tian's defense was amplified by 600 times, his cultivation realm was much inferior; he hadn't even completed the great transformation. Even with a 600 times amplification, it was still far inferior to the Green Ox Overlord.

Therefore, Ye Tian's Starfall Slash could only inflict a minor injury on the Green Ox Overlord.

Boom!!!!

The dazzling Starfall Slash, extremely fast, struck the large body of the Green Ox Overlord, which failed to dodge in time. Its skin cracked, blood flowed, but the injury was minor compared to its large body.

Puff puff puff!!!!

Ye Tian continued to slash, simultaneously using teleportation to dodge the Green Ox Overlord's attacks.

Moreover, Ye Tian occasionally launched a soul attack, causing significant damage to the Green Ox Overlord's soul.

Facing Ye Tian, the Green Ox Overlord was completely outmatched, constantly being dominated. With each passing second, its injuries worsened.

In contrast, Ye Tian remained unharmed, leaving the Green Ox Overlord without any chance to inflict damage.

"Impossible, how can you have so many talents!!!!"

The Green Ox Overlord roared in disbelief.

Ye Tian did not respond. With time, space, and soul talents, his combat power was beyond the Green Ox Overlord's imagination. Even if the Green Ox Overlord underwent another bloodline transformation, Ye Tian would still have the upper hand.

He grew stronger with strength, powerful enough that even the Void Breaker Sword Emperor could not contend with Ye Tian, let alone the Green Ox Overlord.

Regrettably, Ye Tian's means of killing were still inferior to the Void Breaker Sword Emperor. If the latter were here, a single slash would suffice to kill the Green Ox Overlord.

However, Ye Tian could kill the Void Breaker Sword Emperor. His methods were too effective against powerful Emperors, and mere attack power could not bridge this gap.

Unless an Emperor could counter Ye Tian's space, time, and soul talents, they would always be suppressed.

Time, space, and soul talents were the confidence behind Ye Tian's daring venture into the world of ferocious beasts.

As long as there were no God-level ferocious beasts, he had nothing to fear!

Chapter 240: The Tragic Demise of the Xuan Turtle Overlord!

"Escape! If I don't, I am doomed to die. Even with my Mystic-level defensive talent and top-tier healing talent, I can't preserve my life!"

The Green Ox Overlord realized this, feeling immense fear in its heart.

It possessed Dawn-level bloodline talents and was destined to become a God-level ferocious beast. How could it die here in such a suffocating manner?

It had to escape!

Once it escaped, it would strive for the twelfth bloodline talent transformation. After completing the twelfth transformation, it would immediately challenge the God-level ferocious beast tier and then return to slay Ye Tian for revenge.

Whoosh!

The Green Ox Overlord burned its bloodline power, desperately activating its speed talent, and fled into the distance.

Unfortunately, under the space talent's influence, the space around it was immobilized, severely suppressing the Green Ox Overlord's speed. Even burning its bloodline power, it struggled to break free from the space talent's confinement.

“Teleportation!”

Ye Tian quickly teleported to the Green Ox Overlord’s side, striking its back with another Starfall Slash.

Boom!!!!

A huge wound, over a hundred meters long, was inflicted, revealing the Green Ox Overlord’s internal organs.

The healing talent was working, but it still couldn’t heal the Green Ox Overlord’s wounds.

Soul Piercing Talent and Soul Spear Talent continuously penetrated the Green Ox Overlord’s soul, bringing it to the brink of death.

Finally,

The Green Ox Overlord’s soul collapsed, its consciousness gradually sinking. Even its healing talent couldn’t be activated, and it was pierced through by Ye Tian’s Starfall Slash, completely shattering its internal organs.

The soul and body almost died simultaneously.

With a thunderous crash!

The Green Ox Overlord’s massive body fell to the ground, causing an earthquake.

Whoosh!

Ye Tian teleported next to the Green Ox Overlord’s corpse, muttering to himself, “As expected of a six-star Emperor-level ferocious beast with top-tier healing talent. It was indeed difficult to kill. If it were a six-star Emperor-level expert like the Void Breaker Sword Emperor, even if I could kill him, I would have to give it my all and it would take a long time. But if the opponent truly wanted to escape, I couldn’t kill them!”

Cultivation realm was his flaw, after all. Breaking through the body's limits eight times and ten times might seem like a small difference, but there's a significant transformation in between.

If he broke through his body's limits ten times, completing the great transformation, killing an Emperor-level expert like the Void Breaker Sword Emperor would be as simple as slaughtering chickens and dogs.

"The Green Ox Overlord is dead by my hands, but I must not attract the attention of other ferocious beast overlords. Otherwise, under their concern, other ferocious beast overlords might hastily attempt to reach the God-level tier, and that would be troublesome!"

Ye Tian muttered.

His spatial perception spread out, covering a million miles in an instant.

In a flash,

Some Emperor-level ferocious beasts appeared in his perception.

Although his battle with the Green Ox Overlord killed many ferocious beasts, many still survived.

These beasts were far away, but perhaps sensing his presence, they could not be left alone.

"Ferocious beasts each occupy a territory, and if I go after them one by one, many might escape. But my Legendary-level Sword Technique, Void Breaker, solves my problem!" Ye Tian smiled faintly.

He gently slashed with his Morning Star-level sword, instantly cutting through the void.

Thirty thousand miles away, an Emperor-level Blood Armor Bull was in full sprint.

It was a Blood Armor Bull Emperor-level ferocious beast, which had casually wandered into this area, only to witness the Green Ox Overlord, a bovine overlord, battling a human and seemingly being killed.

This was explosive news, and it wanted to spread it.

Suddenly!

A flash of sword light cut through space, piercing its body in an instant.

Bang!

The Blood Armor Bull fell, its life force gradually fading.

It was slain by Ye Tian's sword from thirty thousand miles away!!!!!!

“Slash!”

“Slash!”

“Slash!”

Ye Tian continuously swung his Morning Star-level sword, each slash claiming the life of a ferocious beast.

In an instant.

There were no more living ferocious beasts within a million miles; all were slain by Ye Tian.

It could even be said that many of the beasts didn't understand what was happening before they were killed by Ye Tian from afar.

“Let's find the second Ferocious Beast Overlord!”

Ye Tian didn't know where to look for the Ferocious Beast Overlords. Currently, the overlords were in a delicate situation, likely hidden, preparing for their final transformation.

At this time, he could only search for them through clues, like the traces left by the Ferocious Beast Overlords.

Ye Tian was fast, and after spending three days, he finally found the traces of another Ferocious Beast Overlord.

At a volcano's crater.

Ye Tian discovered the Fire Flame Overlord, one of the Ferocious Beast Overlords.

The Fire Flame Overlord, the only fire-attribute beast among the overlords, possessed three Mystic-level fire attribute talents:

Species: Fire Flame Behemoth

Bloodline Talent: Dawn

Strength Talent: Pseudo-Mystic (60%)

Defense Talent: Top

Speed Talent: Top

Fire Dragon Talent: Mystic

Fire Spear Talent: Mystic

Palm Technique Talent: Intermediate

Truth be told, the Fire Flame Behemoth's three basic attribute talents weren't high, perhaps due to its species, which made it hard to improve these basic talents.

However, it had an intermediate-level Palm Technique Talent, which, when combined with its Strength Talent, made its attacks very powerful, even more so than the Green Ox Overlord.

The Fire Flame Overlord had undergone bloodline transformations eleven times and was attempting the twelfth.

When Ye Tian arrived, the Fire Flame Overlord was about to complete its twelfth bloodline transformation, but Ye Tian forcefully interrupted it.

After a battle, Ye Tian killed the Fire Flame Overlord.

Due to its inferior speed talent and lack of healing talent, it was even easier to kill than the Green Ox Overlord.

...

With the death of the Green Ox Overlord and the Fire Flame Overlord, plus the already deceased Black Dragon and Black Tiger Overlords, of the original twelve Ferocious Beast Overlords, only eight remained.

Among these eight, the Xuan Turtle Overlord likely didn't get the Holy Dragon Fruit and posed little threat.

This meant that Ye Tian only needed to deal with the remaining seven Overlords to prevent the emergence of God-level ferocious beasts in this world.

But this task was still daunting!

However, unbeknownst to Ye Tian, a lopsided battle was taking place in a sea area of the Ferocious Beast World.

Ferocious Beast Sea.

A gigantic Xuan Turtle floated on the sea, its shell, usually impervious even to other Emperor-level Ferocious Beast Overlords, was now shattered and broken.

Through the cracks of the broken Xuan Turtle shell, one could see its mangled flesh and organs, yet it was still alive.

It looked towards a cat in the sky, filled with confusion and resentment.

“Nine Lives Cat Emperor, why do you want to kill me??? I understand your killing the Black Dragon and Black Tiger, as they had attacked you, and their deaths were justified. But I have never provoked you, and I don’t have the Holy Dragon Fruit, so I cannot become a God-level ferocious beast. I’m not a match for you!” roared the Xuan Turtle Overlord.

The Nine Lives Cat Emperor looked at the Xuan Turtle Overlord with a mocking gaze, saying, “Xuan Turtle, my intention wasn’t to kill you. I just want to know where the nine Ferocious Beast Overlords who obtained the Holy Dragon Fruit in the previous era and became God-level ferocious beasts went. Did they go to other worlds, or what? If I don’t understand this, I dare not attempt to reach the God-level ferocious beast realm. You’ve lived for ten thousand years and witnessed that era. You’re the only Emperor-level ferocious beast from that time who is still alive. If you tell me, I won’t kill you!”
