

## Talent 251

### Chapter 251

Boom!!!

Ye Tian engaged in combat with the Nine Lives Cat Emperor.

Immediately, Ye Tian activated his Soul Spike talent. His soul power transformed into a spike, piercing towards the soul of the Nine Lives Cat Emperor.

However, the Nine Lives Cat Emperor just shook its head, without even a scream.

“Soul Talent! Haha, I would have feared your soul talent before, but I obtained a soul treasure in the Hall of Inheritance, which protects my soul. Your soul attacks barely harm me!” boasted the Nine Lives Cat Emperor proudly.

“Soul Talent is useless?”

Ye Tian’s expression turned grave.

The strength of the Nine Lives Cat Emperor was far greater than that of Emperor-level ferocious beasts like the Green Ox Overlord. With the ineffectiveness of his soul attack talent, killing the Nine Lives Cat Emperor would cost him dearly.

“No matter what, it must be killed. It seems I need to display all my strength this time!” Ye Tian thought to himself.

Up until now, he had never displayed his full strength against any opponent, whether it was the Green Ox Overlord or the Flame Overlord; he had always held back some power.

But facing the Nine Lives Cat Emperor, if he continued to hold back, he would be in grave danger.

“Time Talent!”

Ye Tian activated his Time Talent, slowing down time tenfold around the Nine Lives Cat Emperor.

Suddenly, the movements and even the thoughts of the Nine Lives Cat Emperor seemed to slow down tenfold in Ye Tian’s eyes, for this was the power of time, beyond the capability of Emperor-level ferocious beasts.

Although the Nine Lives Cat Emperor could not see the power of time, it sensed the changes around it and in its thoughts, experiencing an eerie feeling.

“It’s time!”

The Nine Lives Cat Emperor was startled.

Time around it had slowed down manyfold, while time in other areas remained unchanged.

Abruptly.

A blade of light attacked, and its body, affected by the Time Talent, failed to perceive the trajectory of the light in time.

Bang!!!

The light struck its body but was blocked by its defenses.

Although it had only transformed a small part of its body into a divine body, its defense had greatly increased, and Ye Tian’s Star Slash only caused a minor injury.

“Space Compression!!!”

Ye Tian activated his Space Talent, compressing the space around the Nine Lives Cat Emperor, squeezing it.

Crack, crack, crack!!!

The pressure of space came, making the Nine Lives Cat Emperor very uncomfortable.

The Nine Lives Cat Emperor struggled hard, causing the space to tremble.

At a certain moment!

With a loud bang, the Nine Lives Cat Emperor broke through Ye Tian's space compression. This move had just been initially grasped by Ye Tian, and its power was not yet formidable. Otherwise, the Nine Lives Cat Emperor would not have broken the space compression so easily.

Following this.

Several spatial blades appeared, slashing towards the Nine Lives Cat Emperor.

While the Nine Lives Cat Emperor, constrained by both space and time talents, couldn't dodge, it activated its defensive talents with all its might, using its half-divine body's advantage to withstand Ye Tian's repeated spatial blade assaults.

Of course.

The Nine Lives Cat Emperor was injured!

"Time Talent, Space Talent, these are two supreme treasure talents. I've seen ferocious beasts with Space Talent, but none with a higher level than yours. Your Space Talent must have reached the Pseudo-Mystic level. And Time Talent, I've never heard of anyone possessing it, but you have it. What kind of ferocious beast are you, to be so against the heavens?"

"Honestly, I am very envious of your talents. If I could possess your body, it would be a heaven-defying opportunity. Unfortunately, I don't have the talent to take over bodies," the Nine Lives Cat Emperor exclaimed, astounded by Ye Tian's incredible talents.

Suddenly.

The Nine Lives Cat Emperor took out a claw weapon and fused it into its claws.

This was a Moonlight level claw weapon.

“Nine Lives Claw!”

The Nine Lives Cat Emperor lightly swiped, and space itself was marked with claw trails. It was incredible that it could leave marks in space with mere strength, showcasing its terrifying attack power!

With the boost of the Moonlight level claw weapon and the execution of the Silver level claw technique – Nine Lives Claw, the Nine Lives Cat Emperor’s combat power skyrocketed.

Bang, bang, bang!!!

The spatial blades deployed by Ye Tian were also destroyed by the Nine Lives Cat Emperor.

Swoosh!

The Nine Lives Cat Emperor charged towards Ye Tian, its murderous intent engulfing the void.

“Extreme Speed Talent!”

Ye Tian activated his God-level Extreme Speed talent, instantly surpassing the Nine Lives Cat Emperor in speed.

If the Nine Lives Cat Emperor hadn’t been affected by the Space and Time Talents, its speed would definitely surpass Ye Tian. Unfortunately, under the suppression of Time and Space Talents, its combat effectiveness was greatly reduced.

Ye Tian, wielding a Morning Star level blade, occasionally executed Star Slash and long-distance space-breaking strikes, continuously making it difficult for the Nine Lives Cat Emperor.

The Nine Lives Cat Emperor's speed was completely inferior to Ye Tian, unable to injure him.

"Damn it, this guy's strength is not even close to mine. If it weren't for the Time and Space Talents, I could easily kill him!" the Nine Lives Cat Emperor cursed internally.

Indeed, without the Time and Space Talents, Ye Tian would be no match for the Nine Lives Cat Emperor, whose strength was immense, second only to the Seven Stars Emperor level fighters.

In fact, even Seven Stars Emperor level fighters would find it very difficult to kill the Nine Lives Cat Emperor.

Without the Time and Space Talents, Ye Tian would at best be considered the weakest among the Six Stars Emperor level, naturally no match for the Nine Lives Cat Emperor.

However, Time and Space Talents are also a form of strength. What warrior doesn't rely on talents? Without special talents, wouldn't that make them no different from ordinary warriors?

Ten minutes passed!

Ye Tian's combat power remained at its peak. The Devouring Blood Talent absorbed blood stored in his personal space to fully recover him, with little to no Yuan force expenditure.

Meanwhile, the Nine Lives Cat Emperor was significantly worn down, suffering injuries that were not severe but not light either.

At this point, the Nine Lives Cat Emperor sought to flee.

It knew it couldn't kill Ye Tian and feared that if the battle continued, it might end up dead.

"Escape!"

The Nine Lives Cat Emperor desperately tried to flee, but Ye Tian was determined to kill it.

No matter how it tried to escape, it couldn't break free from the blockade of Spatial Confinement and the influence of Time Talent.

The chase continued, with the two spreading their battlefield over tens of millions of miles.

Mountains and rivers shattered, and space cracked open, as if signaling the end of the world.

Countless ferocious beasts died along their path, with even two Emperor-level ferocious beasts perishing out of curiosity.

In the blink of an eye.

A day of fierce battle passed.

At this time, Ye Tian's spirits slightly waned, but his overall strength was still at its peak, while the Nine Lives Cat Emperor was in a dire state.

Countless minor injuries accumulated into severe wounds!

"Damned monkey, what if I give you a few treasures and you let me go? Aren't you chasing me for the treasures from the Hall of Inheritance? I'll give them to you. There's no need for us to fight to the death!" the Nine Lives Cat Emperor pleaded.

However, it secretly planned to transform its divine body as soon as it returned, quickly advancing to the God level ferocious beast realm, and then seek out Ye Tian for revenge.

Unfortunately, it was mistaken!

Ye Tian's true motive for killing it was not for those treasures; they were just a bonus.

Ye Tian's main purpose was to eliminate a threat to humanity!

Because Ye Tian was human, not the monkey the Nine Lives Cat Emperor thought he was!

## Chapter 252

“Kill!”

Ye Tian’s response to the Nine Lives Cat Emperor was clear: there was no stopping now!

Seeing Ye Tian’s increasingly fierce offensive, filled with intense killing intent, it seemed as though he harbored an irreconcilable hatred against the emperor.

However, the Nine Lives Cat Emperor was very aware that it didn’t actually know Ye Tian.

“If you want to kill me, then let’s die together!”

The Nine Lives Cat Emperor burned its bloodline power and even part of its body, mobilizing a trace of divinity contained in its demi-god physique.

This trace of divinity, merged into its claws and boosted by the intensely rich bloodline power, launched its strongest strike!

“Nine Lives Claw!”

Space itself was torn apart, breaking through the spatial confinement.

The claw light shattered the void, descending upon Ye Tian.

Under the influence of the time talent, the attack’s speed was slowed by tenfold, but it still affected Ye Tian.

This strike seemed to envelop the heavens and the earth, making it impossible for Ye Tian to dodge.

“It’s the divinity that’s affecting space-time!”

Ye Tian guessed.

If his cultivation had been stronger, having completed a major transformation, this trace of divinity wouldn’t have affected him at all. Unfortunately, his cultivation was still too weak, which allowed the divinity to influence space-time.

Unable to dodge, he chose to withstand it directly!

“Mystic-level defensive talent!”

“God-level Five Elements Iron Armor Talent!”

“God-level Strength Talent!”

“Starfall Slash!”

In an instant, numerous talents were activated.

“Slash!”

Empowered by the God-level Strength Talent, the Starfall Slash unleashed terrifying attacking power, clashing with the Nine Lives Claw.

Boom!

The Starfall Slash broke apart, turning into specks of light, while the Nine Lives Claw continued its assault.

In fact, Ye Tian’s Starfall Slash had become many times stronger than before, having copied the God-level Strength Talent of the Azure Dragon, capable of exerting 300 times the attacking power, three times that of the Mystic-level Strength Talent.

This meant that Ye Tian's attacking power had tripled.

However, the Nine Lives Cat Emperor's strength was immense, not only beginning to transform into a divine body but also amplified by a Moonlight-level weapon. This was why Ye Tian's attack wasn't very effective.

Now, the Nine Lives Cat Emperor had further burned its bloodline and flesh, activating a trace of divinity for its strongest strike.

It was natural that Ye Tian's Starfall Slash couldn't withstand it!

The Nine Lives Claw hit Ye Tian directly, shattering the manifested defensive talent shield, but the God-level Five Elements Iron Armor Talent managed to block the claw light.

Then.

The God-level Five Elements Iron Armor was also penetrated. The Pseudo-Mystic-level Diamond Bone Talent activated, blocking this strike with his bones.

Boom!!!

Ye Tian was sent flying, hurtling ten thousand meters away.

"By leveraging my desperate strike, he should be severely injured and on the brink of death, right?"

The Nine Lives Cat Emperor excitedly said.

Actually, it was also taking a gamble. If the trace of divinity couldn't affect the opponent's time and space talents, it would have been completely finished.

But the outcome was favorable!

It won the bet!

Swoosh!

The Nine Lives Cat Emperor flew over, intending to kill the severely injured Ye Tian and take the treasures on him.

But suddenly.

The spatial confinement descended again, and Ye Tian walked step by step, his injuries rapidly healing.

Possessing the Mystic-level Life Talent and Pseudo-Mystic-level Healing Talent, Ye Tian's recovery speed reached a heaven-defying level. Although the Nine Lives Cat Emperor's desperate strike broke through his defenses, it was still far from killing him.

In a few moments, Ye Tian's injuries were mostly healed.

At this point, the Nine Lives Cat Emperor, having burned part of its bloodline and body, was severely injured and weak, far from its peak condition.

"How can you... also have healing talents!"

The Nine Lives Cat Emperor was completely dumbfounded.

It felt like the heavens were too favorable to Ye Tian, with so many powerful talents, including healing ones, seemingly of a high level, possibly even Mystic-level.

"Nine Lives Cat Emperor, if you had fled the moment you sent me flying, with your speed, I might not have been able to catch up. After all, teleportation isn't without limits, each teleportation has a slight interval. In a long chase, you might even be faster than me. Unfortunately, you wasted your last chance, foolishly coming over here!"

Ye Tian mocked.

“No!”

The Nine Lives Cat Emperor, now terrified, turned to flee. But alas, it was too late to escape!

Puff!

A Starfall Slash swept through, severing one of the Nine Lives Cat Emperor’s legs. At the same time, blades of space swiftly descended, completely ending the life of the emperor.

Thus, the Nine Lives Cat Emperor, newly ascended to the ranks of divine beasts, perished at Ye Tian’s hands.

Approaching the corpse of the Nine Lives Cat Emperor, Ye Tian collected the treasures it carried. Beasts like it, though lacking storage bags, had a special place within their bodies for storing items. Their large size allowed them to easily store various objects securely.

Ye Tian found several scattered treasures and ultimately identified eight items originating from the Inheritance Hall. Four belonged to the Nine Lives Cat Emperor, and the other four were likely plundered from other Emperor-level beasts and beast lords.

Ye Tian carefully examined these eight treasures:

1. A Moonlight-level claw weapon.
2. A treasure for soul defense.
3. A pill capable of resolving bloodline flaws.
4. A claw technique inheritance.
5. A secret technique for condensing divine power.
6. A supreme spiritual medicine aiding bloodline transformation.

7. A drop of dragon essence blood.

8. The last item appeared to be a fruit that could enhance bloodline talents, though its success rate was unknown.

Ye Tian could identify these treasures thanks to another of his talents — the Treasure Appraisal Talent, copied from a master appraiser in an auction house. Originally a basic-level talent, he had forcibly elevated it to the top tier using the Talent Divine Liquid. Now, he could even identify treasures like the Saint Dragon Fruit.

Looking at these eight treasures, Ye Tian was very satisfied, particularly with the soul defense treasure, the claw technique inheritance, and the Moonlight-level claw weapon. The claw technique inheritance contained a technique surpassing the Legendary level, a God-level claw technique.

The value of a God-level claw technique was immense, and its revelation would undoubtedly cause a stir. Once Ye Tian integrated the claw technique talent into the Moonlight level, he had the potential to master this claw technique talent, possibly even replacing his sword technique as his strongest attack method for a time.

Together with the Moonlight-level claw weapon, his strength was bound to surge significantly. Therefore, he found the claw technique inheritance and the Moonlight-level claw weapon particularly intriguing.

“Thanks to the Nine Lives Cat Emperor, I got these amazing treasures. Otherwise, where would I find such items?” Ye Tian reflected.

After storing all the treasures, Ye Tian rested for a while, planning to find and eliminate the Golden Horn Silver Emperor in one fell swoop. However, despite searching, he couldn’t find it.

“The Golden Horn Silver Emperor must be hiding, consuming its gains!” Ye Tian frowned.

If the Golden Horn Silver Emperor completed its consumption and quietly advanced its cultivation, it was uncertain how long it would take to reappear. Now, with only this beast lord remaining in the beast world, eliminating it would secure the safety of Zhonghai Super Base.

“I must find a way!” Ye Tian pondered deeply.

Suddenly, he thought of the Contract Talent. This talent allowed him to contract many beasts to work for him. If he contracted a bunch of Emperor-level beasts to help him find the Golden Horn Silver Emperor, wouldn't that be convenient?

Though this method would undoubtedly reveal his presence, he wasn't afraid. With only one beast lord remaining and disguised as an ape beast, his Emperor-level beast subordinates would only see him as a powerful Emperor-level beast, never suspecting a human.

Even if the Golden Horn Silver Emperor discovered and tracked him, he wouldn't need to search anymore.

“That's the plan!” Ye Tian decided.

## Chapter 253

After flying for a while, Ye Tian soon discovered an Emperor-level ferocious beast.

This was an Emperor-level ferocious beast known as the Fierce Sun Beast. Among Emperor-level beasts, it was average, but Ye Tian didn't need an Emperor-level beast for combat, only to find the Golden Horned Silver Emperor. Thus, he didn't need a very powerful one.

In the eyes of the Golden Horned Silver Emperor, both strong and weak Emperor-level ferocious beasts were insignificant, like ants.

Ye Tian appeared before the Fierce Sun Beast and immediately used his Contract Talent.

A ray of light entered the head of the Fierce Sun Beast, forming a complex contract array that merged with the Emperor-level Fierce Sun Beast.

At this moment,

Ye Tian felt he could control the life and death of this Emperor-level Fierce Sun Beast, forming a master-servant contract.

“What a terrifying Contract Talent. The Beast Control Talent only makes beasts acknowledge their master. If the master dies, the beast also dies. The master can also use the light of the soul to harm the beast, but it can’t control the life and death of the beast like the Contract Talent. This Contract Talent is too domineering. It’s no wonder the beasts become loyal!”

Ye Tian sighed.

After the contract, the Fierce Sun Beast, obviously not understanding what had happened, attacked Ye Tian.

So, Ye Tian activated his Contract Talent, inflicting a bit of pain on the Fierce Sun Beast.

Boom!!!!

Terrifying pain descended, and the Fierce Sun Beast howled in agony, rolling non-stop on the ground, overturning mountains.

Half an hour later, Ye Tian finally made the Fierce Sun Beast understand a truth – its life was in Ye Tian’s hands now, and it must obey Ye Tian’s commands, or else there was only one outcome: death!

“Master!”

The Fierce Sun Beast submitted at Ye Tian’s feet, no longer temperamental.

“Good. I give you a command: go find the whereabouts of the Golden Horned Silver Emperor. Once you find it, come to this place to find me.”

Ye Tian gave the Fierce Sun Beast an address, the place he planned to continue his cultivation.

This place was one of his previous cultivation sites – Fire Dragon Mountain.

“Ah, Master, you want to find the whereabouts of the Golden Horned Silver Emperor???” The Fierce Sun Beast trembled. As an Emperor-level ferocious beast, how could it not know of the great name of the Golden Horned Silver Emperor, one of the twelve overlord beasts!

It was rumored that the Golden Horned Silver Emperor had obtained the Holy Dragon Fruit, gaining Dawn-level bloodline talent, and was sure to become a God-level ferocious beast in the future.

Such a ferocious beast overlord, it dared not inquire about!

“Are you going or not?”

Ye Tian’s voice became cold.

“Go, Master, I’ll go!”

The Fierce Sun Beast shivered in fear, hastily agreeing.

“Good, go. If I find out you’re slacking off, you’re dead! I have a secret technique that can track everything about you, so don’t harbor any lucky thoughts!” Ye Tian threatened.

The Fierce Sun Beast didn’t know that Ye Tian was deceiving it. The Contract Talent could contract ferocious beasts and control their life and death, but it couldn’t know the beasts’ situations.

The foolish Fierce Sun Beast believed Ye Tian’s words and left to sincerely inquire about the whereabouts of the Golden Horned Silver Emperor.

“The first Emperor-level ferocious beast is done, continue searching!”

Ye Tian flew off in a certain direction.

In a blink of an eye, three days passed.

In these three days, Ye Tian contracted 20 Emperor-level ferocious beasts, 100 Saint-level ferocious beasts, and a large number of King Beasts, sending them to find the Golden Horned Silver Emperor.

But he didn't continue contracting beasts, as he had reached his limit.

Top-level Contract Talent was not unlimited; it had a limit of 20 Emperor-level ferocious beasts, 100 Saint-level ferocious beasts, and about 1000 King Beasts.

Such a force was already quite terrifying. Although it couldn't attack a super base, it could certainly cause some damage to one.

Ye Tian didn't plan to take these Emperor and Saint-level ferocious beasts with him. Once he found the Golden Horned Silver Emperor, he wouldn't keep these beasts and would kill them all, which was also a way to reduce the pressure on Zhonghai Super Base.

Fire Dragon Mountain.

Ye Tian arrived here and opened a temporary cave dwelling at the mouth of Fire Dragon Mountain, then began to close off for cultivation.

Now, he had many things to cultivate.

Claw Technique, Claw Force, and Claw Intent Comprehension, using Gengjin Stone to temper the body, forging an innate sword body, and attempting to break the ninth physical limit, etc.

Thus, he would be quite busy during this period.

“Forget about the Claw Technique, Claw Force, and Claw Intent for now. These things can't enhance my strength at the moment. Instead, I should absorb the Gengjin Qi from the Gengjin Stone to temper my body, break the physical limit, and forge the innate sword body!”

Ye Tian sat cross-legged and took out the Gengjin Stone.

Immediately, his skin was pricked by a faint Gengjin Qi.

If an ordinary Martial Warrior stood in front of the Gengjin Stone, they probably wouldn't last a moment before being torn into countless pieces by the Gengjin Qi.

The Gengjin Stone, belonging to the metal attribute, was used by Ye Tian with his God-level Five Elements Iron Armor Talent to absorb the Gengjin Qi, beginning the body tempering.

At the same time, he also activated his High-Level Time Talent, accelerating time tenfold.

Boom!!!!

Strands of Gengjin Qi were absorbed by Ye Tian into his body, starting the tempering process.

Every second, Ye Tian felt as if his body was getting stronger.

“The tempering effect is so good!”

Ye Tian was overjoyed.

Compared to Exotic Fire, the Gengjin Stone was many levels higher.

This Gengjin Stone could probably not only help him break the ninth physical limit but even the tenth, completing a great transformation of the body.

However, this required time and couldn't be achieved quickly.

As time passed day by day, Ye Tian was completely immersed in his cultivation, seemingly forgetting about the Golden Horned Silver Emperor.

In fact, he was always mindful of the Golden Horned Silver Emperor, but even if he left now, he couldn't find the Emperor. The reason he had found the other two beast overlords was that they had hunted a large number of ferocious beasts, revealing their tracks.

But the Golden Horned Silver Emperor wouldn't do that. Ye Tian had seen clearly that when the Golden Horned Silver Emperor left, he even disturbed the surrounding void's aura, making it impossible for others to track him. Clearly, he often did this, being a very cautious and careful beast overlord.

Therefore, he could only rely on a large number of beast slaves to search for the whereabouts of the Golden Horned Silver Emperor, like finding a needle in a haystack. Whether finding the Emperor or attracting his attention to come to him, either would achieve his goal.

He just needed to quietly wait.

In the blink of an eye, half a month had passed.

The Gengjin Stone in Ye Tian's hand had become slightly weaker, but he could clearly sense that his ninth physical limit was near.

Another two days passed.

On this day,

Ye Tian felt the shackles in the dark, the ninth physical limit had arrived!

Boom!!!!

He crazily absorbed the Gengjin Qi, using it to temper his body and break the physical limit.

With his supreme-level tempering talent and the treasure like the Gengjin Stone, it would be strange if he couldn't break the ninth physical limit.

Crack, crack, crack!!!

The shackles in the dark were easily broken, and countless yuan qi flooded into his body, enhancing Ye Tian's physical strength.

After half a day,

“Huff~”

Ye Tian exhaled deeply, feeling the immense power within his body, and smiled.

These two breakthroughs of the physical limit were assisted by treasures like strange fire and Gengjin Stone. Otherwise, he would need to prepare a massive amount of yuan qi stones or other treasures to break the limit, as the energy needed was immense.

Now, he had broken the ninth physical limit, possessing the strength of 900 dragons!

The next step was to face the great transformation.

Once the great transformation was complete, his strength would truly possess the transformation. Right now, he was just laying the foundation.

“Hmm? An Emperor-level ferocious beast is approaching. It’s one of the Emperor-level beasts I control!”

Ye Tian sensed and exclaimed with surprise.

## Chapter 254

Ye Tian had given orders to the ferocious beasts under his control: if they did not find the Golden-Horned Silver Emperor, there was no need to report back to him. But now, this Emperor-level ferocious beast had come to him, which meant it must have found a clue.

Quickly.

This Emperor-level ferocious beast arrived at Fire Dragon Mountain and shouted, “Master, I have found the location of the Golden-Horned Silver Emperor!”

Whoosh!

Ye Tian flew out, his gaze not resting on the Emperor-level beast but looking into the distance. "I already know!" he declared.

With a thought, Ye Tian activated the beast contract, killing the Emperor-level beast.

At the same time.

All the ferocious beasts under his control, bound by his contract talent, perished, forcibly slain by him. He had already discovered the Golden-Horned Silver Emperor.

"Indeed, searching for the Golden-Horned Silver Emperor on such a large scale has caught his attention. I guess this Emperor-level beast could find the Golden-Horned Silver Emperor because the latter deliberately revealed himself, intending to trace this Emperor-level beast," Ye Tian mused to himself.

At that moment, far away, a silver beast with golden horns stood, unmistakably the Golden-Horned Silver Emperor. He had discovered the Golden-Horned Silver Emperor, and naturally, the Golden-Horned Silver Emperor had also noticed him.

Whoosh!

The Golden-Horned Silver Emperor flew over, his eyes filled with a stern gaze as he looked at Ye Tian. "I remember you, I saw you once in the Inheritance Hall, and you survived. You do have some skills, having controlled so many Emperor-level and Saint-level ferocious beasts. Such ability is enough to gather a large number of beasts and form a powerful force. In the past, I would have subdued you. But I will soon break through to the God-level and leave this world, so you are of no use to me now!" A murderous intent burst forth from the eyes of the Golden-Horned Silver Emperor.

It wanted to kill Ye Tian.

However, Ye Tian also harbored the same intention towards the Golden-Horned Silver Emperor. "Let's see who lives and who dies!"

Ye Tian immediately made his move.

Boom!!!

A Pseudo-Mystic level space talent created a spatial confinement that instantly locked down the area, freezing the space.

“Pseudo-Mystic space talent!”

The Golden-Horned Silver Emperor’s expression changed. Initially, it thought Ye Tian was just an Emperor-level beast who had completed nine bloodline transformations, merely an ant in its eyes. Even if this ant had peculiar and powerful talents, it was still an ant. It had never seen an Emperor-level beast with nine bloodline transformations stronger than one with thirteen transformations.

And it was not just any overlord among beasts; even among Emperor-level beasts with thirteen bloodline transformations, its strength was top-tier. Thus, it did not believe Ye Tian had any chance of winning.

But when Ye Tian’s Pseudo-Mystic space talent was revealed, it showed a trace of seriousness, albeit only a trace.

Boom!!!

The aura of the Golden-Horned Silver Emperor exploded, even more potent than that of the Nine Lives Cat Emperor. However, Ye Tian had just recently broken through the ninth physical limit, his strength significantly enhanced compared to before. He had been able to slay the Nine Lives Cat Emperor previously, and now it was even easier.

“Time talent!”

The power of time spread to the Golden-Horned Silver Emperor, slowing down its perception of time by tenfold.

Meanwhile.

Ye Tian continuously struck the Golden-Horned Silver Emperor with space blades, occasionally employing Void Breaker and Star Slash.

Under a series of attacks, the Golden-Horned Silver Emperor was bewildered! “How can this be!!!”

The Golden-Horned Silver Emperor couldn’t believe it. The golden monkey before it possessed time talent, space talent, and so many other powerful abilities, which was truly inconceivable. It was gradually becoming apparent that it was no match.

Puff puff puff!!!

More and more wounds appeared on the Golden-Horned Silver Emperor’s body, and the injuries became increasingly severe.

Its defenses were even weaker than the Demi-God Nine Lives Cat Emperor, naturally unable to withstand Ye Tian’s attacks. Moreover, under the dual influence of space and time talents, its speed was no match for Ye Tian’s; it couldn’t land a hit on him, effectively becoming a sitting duck. Despite its overwhelming combat power, it was futile.

Suddenly.

Ye Tian launched his Soul Spike talent at the Golden-Horned Silver Emperor. The power of his soul transformed into spikes, tearing through the void, attacking the soul of the Golden-Horned Silver Emperor.

Pierce!

The Soul Spike penetrated the Golden-Horned Silver Emperor’s soul, successfully injuring him. The Emperor let out a scream of agony. “Without a soul defense treasure, you have no hope of survival!” Ye Tian said coldly.

Immediately, he frenziedly deployed his Soul Spike talent and Soul Spear talent, repeatedly injuring the Golden-Horned Silver Emperor’s soul. However, the Emperor’s soul was strong enough, much more robust than the Green Ox Overlord, and withstood Ye Tian’s ten soul attacks, with its aura hardly weakened.

“Time Talent!”

Ye Tian activated this ability of his time talent, then a Legendary-level Sword Technique cut through the air, targeting the Golden-Horned Silver Emperor’s neck.

Slash!

The blade light directly sliced open most of the Emperor’s neck, blood gushing out. Then the effect of the time talent passed.

“How can this be!”

The Golden-Horned Silver Emperor was terrified. Ye Tian’s power was too terrifying; in that instant, it even felt as if space and time had completely stopped, even its thoughts had halted, unable to do anything. Although it was just a moment, it was dangerous enough. Had its defenses not been strong enough, its head would have been completely severed.

“Escape!”

The Golden-Horned Silver Emperor dared not fight any longer. Ye Tian’s strength was much more terrifying than it had imagined. If it had known how formidable Ye Tian was, it would have focused on breaking through to the God-level beast realm in seclusion, instead of coming here to kill Ye Tian. It regretted its decision!

But it was too late.

Before long, Ye Tian inflicted multiple heavy injuries on the Golden-Horned Silver Emperor, even piercing its body several times.

Finally,

The Golden-Horned Silver Emperor fell with a mournful cry, its massive kilometer-long body crashing into a mountain range. Emperor-level beast blood was a rare treasure among humans,

and Ye Tian, having a large force to nurture, collected the blood of the Golden-Horned Silver Emperor.

Afterward,

Ye Tian found the corpses of other Emperor-level beasts and collected their blood as well. In the following period, Ye Tian collected treasures all over the beast world, his strength making him virtually invincible.

Of course.

Ye Tian didn't dare to be too arrogant. After all, this world was a subordinate planet of the Dragon Clan. If he attracted the attention of the Dragon Clan, it would not bode well. What if the Dragon Clan had the ability to traverse spatial rifts and invade Earth? With Earth's current strength, it absolutely could not withstand the Dragon Clan.

Therefore, after merely a month of scavenging, Ye Tian hurriedly left.

Five-Star Spatial Rift, Zhonghai Temporary Base.

Ye Tian returned here, and an Emperor-level guardian of the base flew out to meet him: "Emperor Ye Tian, you're back!" Ye Tian glanced at him, recognizing him as an ordinary Emperor-level from Zhonghai Super Base, nodded slightly, and then passed through the spatial rift back to Zhonghai Super Base.

Before long, Ye Tian arrived at Zhonghai Super Base. He didn't go to Tian Pavilion or home but went straight to the headquarters of the Battle Axe Mercenary Hall.

Chapter 255

Battle Axe Mercenary Hall Headquarters.

When the Battle Axe Emperor learned of Ye Tian's arrival, he immediately emerged from his seclusion.

“Emperor Ye Tian, you’ve returned!”

The Battle Axe Emperor looked eager. He was very keen to find out from Ye Tian what had happened in the world of ferocious beasts.

During this time, Ye Tian’s delayed return had undoubtedly made him one of the more anxious people.

“The matter is resolved!”

Ye Tian uttered the words that made the Battle Axe Emperor breathe a sigh of relief.

“Resolved?” The Battle Axe Emperor, curious, quickly asked, “Could Emperor Ye Tian elaborate on the specifics?”

Ye Tian nodded and said, “Actually, the Black Dragon Overlord was killed by the Nine Lives Cat Emperor, who is also one of the overlords among the ferocious beasts. It just so happened that some fortuitous event greatly enhanced its strength.”

Then, Ye Tian spoke about the deaths of the various ferocious beast overlords.

When the Battle Axe Emperor learned that all twelve ferocious beast overlords were dead, and that Ye Tian had also slain a large number of Emperor-level ferocious beasts, significantly reducing their numbers in the ferocious beast world, he was utterly astounded!

These were the twelve ferocious beast overlords, terrifying Emperor-level beasts that even the War God Tower couldn’t kill in one strike. Ye Tian had managed to kill several of them.

What he didn’t know was that the strength of the Nine Lives Cat Emperor and the Golden Horn Silver Emperor were infinitely close to the Seven Star Emperor level. If he knew, he would have been even more terrified.

This indicated that Ye Tian’s strength was nearing the Seven Star Emperor level, and he could even compete with those at this level, despite only having broken through his body’s limits nine times.

If he were to break through the limits for the tenth time, completing a major transformation of his body, wouldn't his strength jump to the top of the Glory Emperor Rankings?

Not wanting to reveal his full strength, Ye Tian hadn't disclosed everything. Otherwise, it would be too frightening!

"Ye Tian, with the twelve ferocious beast overlords dead, and most of the Emperor-level beasts fallen, wouldn't our Zhonghai Super Base be able to emulate the Tianfu Super Base and seize half of the ferocious beast world?" The Battle Axe Emperor said excitedly.

"No!"

Ye Tian shook his head and said, "The Tianfu Super Base can control the ferocious beast world because it has many Emperor-level powerhouses capable of maintaining order. Our Zhonghai Super Base, having suffered many losses, wouldn't be able to hold such a large territory even if all the Emperors were dispatched. Moreover, I can't always be in the ferocious beast world. Once I'm gone, the Emperors of Zhonghai Super Base won't be able to fend off those powerful Emperors. Of course, there's another more important reason, a reason that also makes me hesitant to occupy a ferocious beast world."

"What reason?"

The Battle Axe Emperor's expression changed.

Ye Tian's strength was far greater than that of the twelve ferocious beast overlords, yet something was making even him hesitant to claim the ferocious beast world. Could it be that there were even more terrifying beasts in that world?

Ye Tian guessed the Battle Axe Emperor's thoughts and explained, "Don't worry, that ferocious beast world no longer has any beast overlords or powerful Emperor-level beasts. My concern isn't the danger of the ferocious beast world, but the threat from the Dragon Clan!"

"The Dragon Clan!!!"

The Battle Axe Emperor's expression changed again as he recalled the records about the Dragon Clan.

“Battle Axe Emperor, do you know about the Dragon Clan?”

Ye Tian asked.

The Battle Axe Emperor nodded, “A little. I learned about them from the records of an ancient civilization. It's said that the pure-blooded members of the Dragon Clan have terrifying talents, each possessing Morning Star-level bloodline talents. Once they mature, they become divine beasts. Thus, the pure-blooded Dragon Clan is also known as the Divine Beast Clan, the Divine Dragon Clan! Their influence is vast, with many divine beasts, even occupying numerous planets. They are an extremely powerful force in the universe.”

Suddenly.

The Battle Axe Emperor asked in return, “Emperor Ye Tian, does that ferocious beast world have a connection with the Dragon Clan?”

Ye Tian replied, “Correct, that ferocious beast world is likely a subordinate planet of the Dragon Clan. Every ten thousand years, the Dragon Clan takes away the God-level ferocious beasts from that world. Moreover, the Dragon Clan has left some things and legacies there. This shows that the Dragon Clan is still paying attention to this planet. If we occupy this ferocious beast world, should the Dragon Clan's powerhouses descend, and vent their anger on the human race, the consequences, I believe, are clear to both of us!”

“Dragon Clan powerhouses descending!!!”

The Battle Axe Emperor showed a look of fear.

He understood the consequences – the humans remaining in the ferocious beast world would be annihilated, not a single one would escape.

“What a pity!”

The Battle Axe Emperor sighed.

If they really occupied a ferocious beast world, it would be equivalent to possessing the resources of an entire world. Despite being consumed by the ferocious beasts, this was a mature yuan qi world, richer in resources than Earth, where resources are still emerging but not yet fully manifested.

The resources of a ferocious beast world were enough to bring Zhonghai Super Base to a state of complete prosperity, even potentially catching up to the Tianfu Super Base in the future. However, now, Zhonghai Super Base had to abandon this plan.

“Battle Axe Emperor, slow development is also good. At the very least, Zhonghai Super Base no longer faces the threat of the ferocious beast world, and our martial warriors can delve deeper into it, which is much better than before!” Ye Tian said with a smile.

“That’s true!”

The Battle Axe Emperor also smiled.

After chatting with the Battle Axe Emperor for a while, Ye Tian went to see his wife, Empress Yue.

Inside the Moon God Temple.

Ye Tian and Empress Yue talked for a long time. He shared his experiences in the ferocious beast world, nearly without any concealment, even mentioning the Legacy Hall.

After listening, Empress Yue hugged Ye Tian tightly, her face showing obvious concern.

Although she hadn’t experienced this journey herself, she could imagine the dangers involved, where a moment’s carelessness could lead to demise.

“Don’t take such risks in the future!”

Empress Yue said as she embraced Ye Tian.

“Okay!”

Ye Tian kissed Empress Yue, his face showing indulgence.

Then, he said with a mischievous smile, “Yue’er, it’s been a long time since we’ve been intimate!”

Hearing this, Empress Yue’s face turned red. She playfully punched Ye Tian and quickly ran to her room.

Although the two were already married, Empress Yue was still very shy, as if it was their first time.

Ye Tian, thick-skinned, followed her.

After a while, different sounds came from inside.

.....

The next day.

Ye Tian left the Moon God Sect and returned to Tian Pavilion.

At this time, Xiao Xue and other pets had also moved to Tian Pavilion, where they had settled down. After all, Xiao Xue also needed to comprehend the Enlightenment Stele, which was beneficial for understanding mystic arts and cultivating here.

Upon returning, Ye Tian checked Xiao Xue’s cultivation progress.

In terms of cultivation, Xiao Xue was still at the Saint level, but there was significant progress in talent.

Species: War Blood Sky Dragon

Bloodline Talent: Morning Star Level

Strength Talent: Mystic

Defense Talent: Mystic

Speed Talent: Pseudo-Mystic (30%)

Blood Devouring Talent: Mystic

Flight Talent: Mystic

Dragon Flame Talent: Top

Healing Talent: Top

Dragon Roar Talent: Top

Blood Bone Talent: Top

Dragon Soul Talent: Top

“Blood Devouring Talent has reached the Mystic level!”

Ye Tian was very satisfied and immediately copied Xiao Xue’s Mystic level Blood Devouring Talent, as his own was only at the Pseudo-Mystic level.

“Master, you’re back! Xiao Xue has been working hard on cultivation recently and has upgraded the Blood Devouring Talent to Mystic level!” Xiao Xue boasted.

“Um! Xiao Xue is amazing!”

Ye Tian praised, petting Xiao Xue's massive head.

At that moment.

He took out the Divine Dragon Claw Root Grass and said, "Xiao Xue, this is a gift for you. Do you know what this is?"

Xiao Xue's eyes widened in shock and exclaimed, "Divine Dragon Claw Root Grass, heavens, Master, where did you get this? Did you rob a dragon's treasure trove?"

## Chapter 256

"Eh, Xiao Xue, you actually recognize the Divine Dragon Claw Root Grass???"

Ye Tian was quite surprised. He had never known about the Dragon Claw Root before. Xiao Xue, who rarely left the house, where did he learn about the Divine Dragon Claw Root Grass?

Xiao Xue proudly said: "Heritage knowledge. Our dragon race can pass down heritage knowledge to our descendants. My heritage knowledge includes records about the Divine Dragon Claw Root Grass. This is a very rare treasure, even rare among the dragon race. Ordinary pure-blooded dragons don't even have the chance to see it, let alone possess it. I never expected that my master would actually get one!"

Then, Xiao Xue pleaded with a flattering face: "Master, are you really giving me the Divine Dragon Claw Root Grass?"

"Yes, I'm really giving it to you!"

Ye Tian handed the Divine Dragon Claw Root Grass to Xiao Xue.

"Master, you are so kind!"

Xiao Xue was moved.

Such a Divine Dragon Claw Root Grass, its value is even higher than Xiao Xue itself!

Xiao Xue, who had never exerted much effort before, was now receiving such an important reward from its master. How could it not be moved?

However, Xiao Xue had no idea that it had become Ye Tian's treasure trove. Just now, Ye Tian had copied the Mystic-level Blood Devouring Talent from it, and if Xiao Xue consumed the Divine Dragon Claw Root Grass and obtained the Morning Star-level Claw Technique Talent, that too would be copied by Ye Tian.

Of course, even if it knew about this, Xiao Xue wouldn't mind. After all, it wouldn't lose anything but would instead gain a great opportunity.

Such a good thing, Xiao Xue wanted it to happen more often!

Xiao Xue swallowed the Divine Dragon Claw Root Grass in one gulp.

Boom!!!

The energy of the Divine Dragon Claw Root Grass began to transform Xiao Xue's body, creating a claw technique talent for it.

There was a fifty percent chance. Whether it could create a Morning Star-level Claw Technique Talent depended on luck!

As time slowly passed, Ye Tian continuously monitored Xiao Xue's talent situation.

After half a day, Xiao Xue's talent finally changed.

Under the observation of talent copying, another talent appeared among Xiao Xue's many talents—

[Claw Technique Talent: Morning Star]

Seeing this talent, Ye Tian finally smiled.

“Copy!”

The Morning Star-level Claw Technique Talent was now in his hands!

At this time, Xiao Xue also woke up.

“Master, I now have a Morning Star-level Claw Technique Talent. I, Xiao Xue, am truly awesome now!”

Xiao Xue waved its claws, extremely excited.

“I will first pass on a claw technique to you, start cultivating it!”

Ye Tian pointed at Xiao Xue’s forehead, transferring the content of the Bronze-level Little Azure Dragon Claw technique to Xiao Xue.

Xiao Xue received the Little Azure Dragon Claw technique, a Bronze-level technique, and was extremely satisfied. It quickly went into seclusion to comprehend it.

Meanwhile, Ye Tian also went to his cultivation room to start integrating the newly copied Mystic-level Blood Devouring Talent and the Morning Star-level Claw Technique Talent.

He first integrated the Mystic-level Blood Devouring Talent, and it was quickly successful, elevating the Blood Devouring Talent to Mystic-level.

Next was the Morning Star-level Claw Technique Talent!

Originally, Ye Tian didn’t have much expectation for integrating the Morning Star-level Claw Technique Talent, but soon he was stunned!

Boom!!!

Intense pain came, somewhat resembling a talent transformation.

“No way, I just integrated the second Morning Star-level Claw Technique Talent, how could it cause a talent transformation?”

Ye Tian was puzzled.

But he couldn't think too much about it and could only focus on enduring the pain.

Ten minutes later, the pain dissipated, and a wave of exhilaration surged.

“Check!”

With a thought, Ye Tian's own talent situation appeared on his retina.

Immediately, he was shocked.

The other talents hadn't changed, but the Claw Technique Talent had undergone an earth-shattering transformation.

[Claw Technique Talent: Moonlight]

“Can it be? My Claw Technique Talent has actually become a Moonlight-level Claw Technique Talent!!!”

Ye Tian expressed his disbelief in shock.

His Claw Technique Talent had only copied the Azure Dragon's talent and Xiao Xue's talent, both of which were Morning Star-level. The transformation of these two talents directly to the Moonlight-level was unprecedented.

“Strange!”

Ye Tian was somewhat puzzled.

After much thought, he came up with a possibility.

That is, the Morning Star-level Claw Technique Talent of the Azure Dragon was much higher than the average Morning Star-level talents, almost close to the Moonlight-level. Therefore, copying and integrating Xiao Xue's Morning Star-level Claw Technique Talent triggered a transformation, elevating it directly to the Moonlight-level.

“Now this is a real windfall. I was thinking about elevating my Sword Technique Talent to the Moonlight-level, but unexpectedly, the Claw Technique Talent that I just copied has advanced to the Moonlight-level!”

Ye Tian was in a very good mood, extremely happy.

With the Moonlight-level Claw Technique Talent, and having obtained a claw technique inheritance, which included a God-level claw technique surpassing the legendary-level, he could cultivate God-level claw techniques. Once he mastered the God-level claw technique, to what extent would his strength increase?

Even if he hadn't broken through the tenth physical limit by then, his combat power would directly leap to the Seven-Star Emperor level, and not just the weakest Seven-Star Emperor level!

“The next main cultivation task is to cultivate claw techniques!”

Ye Tian planned.

Immediately, he began his closed-door cultivation, and occasionally, Empress Yue would join him in his cultivation.

In just a few days, Ye Tian, with the help of 20 times the understanding ability, the Enlightenment Stele, and Time Talent, successfully comprehended the essence of claw techniques and began cultivating Silver-level claw techniques.

Half a month later, his understanding of claw techniques reached completion, and he mastered several Silver-level claw techniques.

In this way, Ye Tian attempted to forge an Innate Sword Body using Gengjin Stone while comprehending and cultivating claw techniques.

It would be impossible for an ordinary person to cultivate both claw and sword techniques, but Ye Tian managed it thanks to his top-level understanding talent, high-level Time Talent, and the Enlightenment Stele.

One day.

Ye Tian brought a Gold-level claw technique to perfection and began to break through the realm of claw techniques.

With the assistance of the Enlightenment Stele and his 20 times understanding ability, Ye Tian quickly comprehended a bit of the essence of claw techniques and could start cultivating Legendary-level claw techniques.

Thanks to the Moonlight-level Claw Technique Talent, even at the realm of claw techniques, Ye Tian could progress rapidly, and it didn't take long for him to successfully reach the first level of the realm.

At this moment.

Another breakthrough was imminent for Ye Tian.

“My Innate Sword Body is about to be perfected!”

Ye Tian was somewhat excited.

He possessed a Morning Star-level Sword Technique Talent, and the Gengjin Stone would help him forge an Innate Sword Body. Once it was forged, it would also boost his sword techniques.

By then, his strength would increase further.

In the cultivation chamber.

Ye Tian absorbed the Gengjin Qi from the Gengjin Stone, crazily refining his physical body. He treated his body like a sword embryo, forging it into a precious blade.

If someone were to approach within ten meters of Ye Tian, they would feel as if he had transformed into a sword, with countless sword energies traversing the void.

A ten-meter radius around him seemed to become a world of swords!

This was Ye Tian doing it intentionally; if he didn't contain his aura, a radius of ten thousand miles would become a world of swords, which would have too great an impact!

As time passed, the Innate Sword Body began to take shape.

Strand by strand, the laws of the sword were engraved onto Ye Tian's body, helping him complete the final step!

Boom!!!!

Countless strands of Gengjin Qi were devoured by Ye Tian, breaking through the last step.

At this moment.

All the swords within a radius of ten thousand miles began to resonate, as if echoing the king of swords in the cosmic order!

Chapter 257

Battle Axe Mercenary Hall.

The Battle Axe Emperor suddenly sensed that countless swords within the Battle Axe Mercenary Hall began to resonate. It's normal for swords with owners to resonate, as it's usually the owner controlling the sword.

But many of these swords had no owners and were even stored in the treasury, yet they began to resonate on their own.

"This is..."

The Battle Axe Emperor's pupils constricted as he thought of a possibility—

"Innate Sword Body!"

The Innate Sword Body is very similar to the Innate Saber Body, with only minor differences. Both are extremely rare innate physiques, more powerful than ordinary innate attribute physiques.

If a swordsman cultivates an Innate Sword Body, their strength is much greater than that of a swordsman of the same level. The same is true for a swordsman who cultivates an Innate Sword Body.

It's very difficult to cultivate an Innate Sword Body because there's no good method.

For an Innate Fire Spirit Body, one can absorb fire Qi and gradually refine the physique, but for an Innate Sword Body, it's much harder, as it's difficult to absorb any sword Qi, which can't be used for body refinement.

Gengjin Stone is one of the rare treasures that can refine the body and cultivate both Innate Sword Body and Innate Saber Body.

But the Battle Axe Emperor was unaware of such treasures.

"Who exactly has cultivated the Innate Sword Body?"

The Battle Axe Emperor wondered.

There weren't many powerful swordsmen in Zhonghai Super Base, and even fewer at the emperor level.

"Lu Shi Dao Emperor?"

The Battle Axe Emperor first thought of him, but quickly dismissed the idea.

From his understanding of Lu Shi Dao Emperor, the latter wasn't at the level to cultivate an Innate Sword Body yet.

Suddenly.

A name appeared in the mind of the Battle Axe Emperor.

"Ye Tian!"

Ye Tian was also a swordsman, and even more powerful than Lu Shi Dao Emperor, as Ye Tian's sword technique talent was at the Morning Star level, having mastered the legendary-level sword technique, Star Slash.

"Could it really be Ye Tian?"

The Battle Axe Emperor's divine sense traversed the void, approaching Tian Pavilion.

As he neared Tian Pavilion, strands of sword Qi spread out.

At the same time, he felt an overwhelmingly powerful force hidden within Tian Pavilion, mixed with a tremendous sword Dao aura, as if enveloping this space, creating a world of swords.

"It really is Ye Tian!"

The Battle Axe Emperor was now certain.

Soon.

The news of Ye Tian cultivating an Innate Sword Body spread.

And Empress Yue in the Moon God Temple was the first to know about Ye Tian's success.

She had heard from Ye Tian about his goal to cultivate an Innate Sword Body, so seeing the swords of Moon God Sect resonate, she knew her husband had succeeded.

Therefore, she came to Tian Pavilion immediately and waited outside the cultivation chamber, not wanting to disturb Ye Tian.

After a while, Ye Tian's voice came from inside.

"Yue'er, come in!"

Click!

The array opened, and Yue'er walked in.

"Lord Husband, congratulations on cultivating the Innate Sword Body!" Yue'er happily congratulated Ye Tian.

Ye Tian embraced Empress Yue in his arms, affectionately saying, "Then should we celebrate?"

"Sure!"

Empress Yue replied subconsciously.

"How should we celebrate? How about we..."

Ye Tian showed a mischievous smile.

Seeing this smile, Empress Yue instantly understood Ye Tian's intention and her face turned red.

"It's not convenient here, let's... go back!"

Empress Yue said shyly, her face blushing.

"I think here is just fine!"

Ye Tian activated the array, securing the cultivation chamber, making it safer than any place in Zhonghai Super Base.

Several hours later.

Empress Yue left Tian Pavilion with a flushed face, returning to the Moon God Sect.

Unless she was cultivating with Ye Tian, she would usually be stationed at the Moon God Sect.

In the cultivation chamber.

A content Ye Tian began to examine his newly formed Innate Sword Body.

After some testing, he found that the Innate Sword Body boosted his sword techniques by a factor of 1.5. This increase might seem modest, but it was actually significant.

For example, if his sword technique's effectiveness was 10, with the Innate Sword Body, it would be 15.

Crucially, the enhancement from the sword technique could be stacked with his strength talent, meaning the Innate Sword Body could amplify his strongest attacks, a feat unmatched by other innate attribute bodies.

Additionally, Ye Tian discovered that the Innate Sword Body also provided a certain level of defensive enhancement.

Clearly, the Innate Sword Body was truly extraordinary!

“My strength should now be enough to match a weaker Seven-Star Emperor level!” Ye Tian estimated.

With this, he had truly entered the ranks of Earth’s pinnacle.

Even relying on his Time and Space Talents, he was a formidable opponent among the Seven-Star Emperors.

Of course, compared to the top Seven-Star Emperors, Ye Tian still had a long way to go. His Time and Space Talents might not even be enough to counter the top Seven-Star Emperors.

And who’s to say there aren’t Eight-Star or Nine-Star Emperors in the Tianfu Super Base?

Others could be hiding their strength just like he was.

Until he became sufficiently powerful, he needed to keep a low profile.

However, if someone provoked him, there would be no need for subtlety.

But in Zhonghai Super Base, no one dared to provoke him yet!

Comprehending the Sword Dao realm, the Claw Dao realm, cultivating sword techniques, cultivating claw techniques...

Ye Tian was extremely busy. Even with 20 times enhanced understanding and ten times time acceleration, he still felt short on time.

With no significant threats in Zhonghai Super Base, he could focus on his cultivation.

Unless something major happened, Ye Tian rarely left seclusion, except for occasional outings with Empress Yue.

Meanwhile, during Ye Tian's seclusion, some changes occurred in the beast world near Zhonghai Super Base.

...

Dragon Palace!

In the teleportation hall.

A humanoid creature emerged from the teleportation array.

He resembled a human but had two dragon horns on his forehead and wore a dragon robe.

His aura was similar to that of a dragon, indicating his identity as a member of the Dragon Race!

Once a member of the Dragon Race became a deity, they gained the ability to transform their shape, and most chose a human form, as it was more suitable for combat and interacting with other races.

After stepping out of the teleportation array, this Dragon Race member scanned the area with his divine sense and frowned: "The Dragon Palace was opened ahead of schedule, and many beasts entered the legacy hall. Hmph, they probably took away many treasures. I wonder why our ancestors chose to wait here for 150 years until their lifespans ran out, even forbidding members of our race from entering the legacy hall. Could it be as the elders said, that Qingtan True God had a poor relationship with many high-ranking members of our race, leading to such restrictions?"

Unable to figure it out, he stopped pondering it.

Whoosh!

He stepped out of the Dragon Palace, his divine sense sweeping across tens of millions of miles.

Boom!!!

He scanned countless beasts but found no Beast Overlords.

The Dragon Race powerhouse crossed seas and explored numerous mountain ranges, searching many places but sensing neither a Beast Overlord nor any beast with Dawn-level bloodline talents.

“Something has indeed happened! To the Holy Dragon Tree!”

Transforming into a streak of light, he quickly arrived at the Holy Dragon Tree.

Seeing the intact Holy Dragon Tree, the Dragon Race member sighed in relief.

This tree was more precious than the entire beast world. If not for the Dragon Race’s powerhouses wanting to use this world to cultivate the Supreme Bloodline Talent’s Holy Dragon Fruits, they wouldn’t have placed such a precious item here.

Although the Holy Dragon Tree was integrated with the beast world and difficult to extract even by deities, there was still fear of it being seized by beings surpassing deities.

“The Holy Dragon Fruits have been taken by the beasts, but I haven’t detected any beast with Dawn-level bloodline talent using our clan’s secret techniques. Could it be that the nine Beast Overlords have become deity-level beasts and escaped into space?”

“No, that can’t be. If deity-level beasts emerged, our Dragon Race would sense it immediately. There must be another change, but what exactly happened?”

The Dragon Race member was puzzled.

“Why not ask the beasts of this world? They should provide some information!”

## Chapter 258

A member of the Dragon Clan casually captured an Emperor-level ferocious beast, exerting the pressure of a God-level ferocious beast upon it.

“Speak, what has happened in this world? Why can’t even a single Emperor-level ferocious beast ruler be found?” the Dragon Clan member asked.

Under the pressure of the God-level force, the Emperor-level ferocious beast trembled in fear.

It was terrified!

The aura of the Dragon Clan member far exceeded its imagination. The difference in their strength was like that between an ant and the abyss, as if they were not from the same world.

“My lord, I am not very clear, but I heard that recently the Nine Lives Cat Emperor killed both the Black Tiger Overlord and the Black Dragon Overlord!” the Emperor-level ferocious beast honestly replied.

“Black Dragon Overlord? Are there dragons in this world?” the Dragon Clan member inquired.

“The Black Dragon Overlord is not a true dragon, but a sub-dragon!” the Emperor-level ferocious beast explained.

“A sub-dragon? Hmph, daring to call itself the Black Dragon Overlord, how arrogant. If it hadn’t died, I would have killed it myself! A mixed-blood sub-dragon dares to challenge the majesty of the Dragon Clan!” The Dragon Clan member snorted coldly, their dragon might spreading across millions of miles.

The Emperor-level ferocious beast was extremely fearful, guessing the identity of the Dragon Clan member. The mere thought of a divine dragon appearing before it stirred not excitement, but fear.

“Besides this, are there any other anomalies in this world? Speak of everything!” the Dragon Clan member pressed again.

The Emperor-level ferocious beast quickly recounted everything it knew, unsure if its information was of any use.

When the Emperor-level ferocious beast suddenly mentioned a spatial rift, the Dragon Clan member showed a flicker of interest.

“Are you saying there is a spatial rift in this world that can be traversed by Emperors? Is the other side of the rift the world of humans?” the Dragon Clan member asked in astonishment.

“Yes, my lord!” the Emperor-level ferocious beast replied.

“A spatial rift, I must have overlooked that area when I was scanning with my divine sense earlier!” the Dragon Clan member thought to themselves.

Regarding the human world, they had a thorough understanding. Under this starry sky, there are countless human planets, and in the vast galaxy, the overall strength of humans is even stronger than that of the Dragon Clan.

If it were not for the unity of the Dragon Clan, they could hardly be considered a top family in the galaxy.

Although most of the human race’s talents are indeed mediocre, their sheer numbers and unique talents, which many ferocious beasts do not possess, along with their strong learning heritage and high intelligence, are what other races lack.

“Interesting, our Dragon Clan has never dared to enter the territory of humans, but I never expected this ferocious beast planet to be connected to a human planet. If this news is brought back to the clan, it will surely cause a huge sensation, and perhaps some of the elders will take an interest!” the Dragon Clan member mused.

“My lord, I have finished speaking, may I leave now?” the Emperor-level ferocious beast asked cautiously.

“Let you leave?” The Dragon Clan member’s face changed instantly, speaking ominously: “Had you not mentioned the spatial rift, I might have let you go. But now, it’s impossible. My arrival must not draw the attention of humans, so you must die!”

With a movement of their dragon claw, the Emperor-level ferocious beast turned to ashes in an instant.

The Dragon Clan member’s appearance transformed, their dragon horns disappeared, and they looked almost like a human. Changing into a set of clothes, they turned into a handsome and elegant young man.

Then, identifying the direction, he flew towards the temporary base in Zhonghai.

Soon, he arrived at Zhonghai coastal base and saw the five-star level spatial rift hanging in the sky.

“A five-star level spatial rift, allowing only Emperors to pass through. I could get through by paying a certain price, but doing so would create too much commotion. Besides, each world has its own rules. If that world does not allow the existence of beings above the God-level, or suppresses the power of God-level beings, then it would be too dangerous for me to go there!” the Dragon Clan member frowned to themselves.

God-level beings were not invincible.

As a member of the Dragon Clan, he was acutely aware of this.

For instance, some seemingly weak planets could suppress even the powers of a God-level entity entered, due to the rules of that world.

Such planetary worlds are often forbidden for God-level beings, except for those who are invincible at their level and dare to enter such planets.

However, he, being only average among his peers and not even considered a prodigy of the Dragon Clan, did not dare to venture into such areas. Entering an unfamiliar planetary world recklessly was akin to seeking death.

The Dragon Clan member observed the base from outside, noticing its array and various detection equipment, realizing that entering would surely expose his identity.

He took out a treasure, which rendered his entire body invisible.

This state of invisibility wouldn't last long, but it was sufficient for his needs.

He didn't enter the base but skirted around it, approaching the nearby five-star spatial rift and slowly extending his consciousness into the other end of the rift — Earth.

Suddenly!

With a loud boom!

The space vibrated intensely, and on Earth's side, there were tumultuous winds and continuous anomalies.

“Not good, I must leave quickly!”

The Dragon Clan member immediately fled and vanished in an instant.

Soon after, a group of Emperor-level beings arrived but found no trace of anyone, although the incident was reported upward.

From a distance.

The Dragon Clan member became visible again, his face filled with both surprise and excitement.

“It's a planet that has just awakened recently. And this planet is not simple at all; just having revived, it is already comparable to this ferocious beast world, with limitless potential.”

The Dragon Clan member was tempted.

Such a newly awakened planet in the universe was extremely precious, likely nurturing many valuable things within.

The only pity was that this planet suppressed God-level powers.

Just now, his consciousness reached Earth, and it triggered the suppression of the world's will of Earth.

If he himself entered Earth, his strength would immediately drop to the Emperor-level, unless he could counter the world's will and ignore the world's force, allowing him to exert his full combat power.

However, beings capable of countering a world's will were among the most powerful in the universe, and such powerful entities would not deign to invade a mere planet.

Moreover, this planet belonged to humans, a race generally not dared to be offended by other forces.

"No, I must report back!"

The Dragon Clan member left and entered the Dragon Palace, departing via teleportation.

All this happened unbeknownst to the warriors at Zhonghai Super Base, and Ye Tian, who was in seclusion, was also unaware.

On this day.

Ye Tian emerged from seclusion. He hadn't reached his tenth physical limit yet and estimated it would take some more time. He exited because he ran out of Gengjin Stones.

Originally, the Gengjin Stones were sufficient to break through the tenth physical limit, but because he needed to condense his innate sword body, he used a lot of Gengjin Qi, leading to excessive consumption of the Gengjin Stones.

However, Ye Tian was not far from breaking through his tenth physical limit and was not in a hurry.

Now, Ye Tian was ready to fully focus on advancing in the Claw Dao Realm.

After such a long period of comprehension, aided by his Moonlight-level claw talent and top-level understanding, his Claw Dao had finally caught up with his Sword Dao Realm, reaching 20%.

Now, Ye Tian aimed to advance to 30% of the Claw Dao Realm. Once achieved, he could perfect a Legendary-level claw technique and even progress to refining a God-level claw technique!

A God-level claw technique, his first divine skill!

He was very excited about this prospect!

## Chapter 259

A month later, Ye Tian emerged from seclusion.

“I’ve finally reached the 30% realm of the Claw Dao!”

Ye Tian hadn’t expected that his mastery of the Claw Dao would surpass his Sword Dao, stepping into the 30% realm first. Moreover, he successfully perfected a legendary-level claw technique to the complete realm.

This legendary claw technique was named the Great Heavenly Dragon Claw!

The Great Heavenly Dragon Claw, a legendary claw technique, in its perfected realm, could not only amplify attack power by a hundredfold but also possessed a dragon’s intimidating aura.

By perfecting the Great Heavenly Dragon Claw, Ye Tian’s strength had significantly increased.

Additionally, Ye Tian had refined a Moonlight-level claw weapon, which could merge into his palm, boosting his attack power and easily shattering the enemy's weapons.

If combined with the slashing talent, a Moonlight-level claw weapon becomes even more terrifying, capable of easily breaking even Moonlight-level weapons.

Originally, Ye Tian wanted to continue his seclusion until he mastered a god-level claw technique, but considering the lengthy time required, he paused his cultivation.

Mastering a god-level claw technique was not easy; it requires a claw realm of at least 35% to begin practicing a god-level claw technique to the entry-level.

A 40% Claw Dao realm could cultivate a god-level claw technique to the minor accomplishment realm.

A 50% Claw Dao realm could cultivate it to the major accomplishment realm.

A 60% Claw Dao realm could cultivate it to the perfected realm.

But advancing in the Claw Dao realm becomes increasingly difficult, even with tenfold time acceleration and twentyfold comprehension abilities, making it hard to reach 35% in a short period.

Initially, Ye Tian didn't expect it to take too long, but after reaching the 30% realm of the Claw Dao, he found that comprehension slowed down considerably.

By his estimation, even with time talent and top-tier comprehension talent, reaching 35% in the Claw Dao would take about half a year.

Half a year might seem lengthy, but for others, even with Moonlight-level claw talent, mastering a god-level claw technique would take hundreds of years.

For him to achieve it in just half a year was incredibly exceptional.

“Half a year is too long, I’ve been in seclusion long enough. I should balance work and rest, and cultivate for a few days,” Ye Tian muttered to himself.

Leaving the cultivation chamber, he called his sister, Ye Yu, to his side.

His sister, Ye Yu, still at the Saint level, had now unlocked 23% of her deep brain domain, reaching the peak of the Great Saint level in combat, making her a significant figure in Zhonghai Super Base.

“Brother, you’re out of seclusion!” Ye Yu greeted her brother with joy.

“Yes, Xiao Yu, tell me about the recent developments in Tian Pavilion,” Ye Tian asked.

Ye Yu hurriedly reported, “Brother, Tian Pavilion now has twenty-three Saints and hundreds of Kings, not to mention numerous Grandmasters and Great Martial Warriors. Also, Yiyi has become a senior array master!”

“Yiyi, she’s a senior array master now? That’s great!” Ye Tian nodded in satisfaction.

Yiyi, Lin Yiyi, one of the first siblings to join Tian Pavilion, possessed Morning Star-level array master talent and was destined to become a Morning Star-level array master.

Now she had begun her cultivation, already a King-level practitioner, and even her array master realm had reached the senior level. With enough points to comprehend the Dao Steles, she could become a top-tier array master in a short time.

Ye Tian inquired about a few more matters, pleased with Tian Pavilion’s current progress.

The only regret was that apart from Ye Tian, Tian Pavilion had yet to have an Emperor-level expert stationed there.

Of course, many Emperor-level warriors were willing to join Tian Pavilion, but Ye Tian did not accept any of them. Those who joined midway without being cultivated by Tian Pavilion themselves lacked loyalty, and there was a risk they might take over his Tian Pavilion if he were away for a long period.

Ye Tian certainly did not want such a scenario to happen.

After all, with him present, Tian Pavilion, even without an Emperor-level guardian, was an untouchable force.

Having roughly understood the development of Tian Pavilion, Ye Tian let Ye Yu go about her tasks while he entered the virtual world of Glory.

“Now that my strength has solidly entered the Seven Star Emperor level, it’s time to reveal my Six Star Emperor level strength. Otherwise, some might think I’m weak and cause trouble, which wouldn’t be good!”

Entering the virtual world, Ye Tian began challenging the 18th level of the Glory Tower. Once he cleared this level, he would attain Six Star Emperor level combat power and earn 131,072 points.

Such a large amount of points was a significant sum for Ye Tian, allowing him to purchase many valuable items.

On the 18th level of the Glory Tower.

Ye Tian started a fierce battle with his opponent. He chose not to use his time and space talents but fought with his inherent abilities. After a brutal fight, he finally defeated his opponent with the Great Heavenly Dragon Claw, clearing the 18th level.

At this moment, Ye Tian’s combat power rating changed from a Five Star Emperor level to a Six Star Emperor level.

Simultaneously, his ranking on the Glory Emperor List also changed.

[Emperor List Rank 33: Ye Tian, Affiliated Force: Tian Pavilion, Six Star Emperor Level Combat Power]

Many martial artists kept an eye on the Emperor List, and as soon as it was updated, it attracted a lot of attention, with many shocked by Ye Tian's combat power.

In the virtual world.

Many martial artists communicated with each other, spreading the news of Ye Tian clearing the 18th level of the Glory Tower and attaining Six Star Emperor level combat power.

On the virtual world's public chat platform—

“Did you hear? A new Six Star Emperor level warrior has emerged in Huaxia, from Zhonghai Super Base, known as the Heavenly Emperor of Ten Thousand Laws!”

“The Heavenly Emperor of Ten Thousand Laws? Wow, I once queued against him in the virtual world, and although he instantly defeated me, it's an honor to be killed by a Six Star Emperor!”

“The talent of the Heavenly Emperor of Ten Thousand Laws is too high. He gained Six Star Emperor level strength so quickly. I think he has the potential to reach the Seven Star Emperor level!”

“Hehe, how do you not know that the Heavenly Emperor of Ten Thousand Laws is deliberately concealing his strength? What if he already had Six Star Emperor level strength and is only revealing it now?”

“Whether he's concealing his strength or not, having Six Star Emperor level combat power is a fact, and that's enough. Are you as strong as the Heavenly Emperor of Ten Thousand Laws? If not, then keep quiet!”

Many martial artists argued, making Ye Tian's fame surge. The nickname “Heavenly Emperor of Ten Thousand Laws” from the virtual world also became widely known as Ye Tian's title.

In Tianfu Super Base, Glory Temple.

In a side hall, several Emperors wearing golden robes sat together, each holding information about Ye Tian.

“Ye Tian, nicknamed Heavenly Emperor of Ten Thousand Laws in the virtual world, Six Star Emperor level combat power, possesses many talents and has great potential. According to information provided by the Void Breaker Sword Emperor, he already had near Six Star Emperor level strength before and is very tough to handle. Even the strong Void Breaker Sword Emperor among the Six Star Emperors couldn’t defeat him, only managing a draw. I suggest we invite Ye Tian into our circle, what do you think?”

One Emperor put down the information and spoke.

“Agreed!”

“Agreed!”

“Agreed!”

The other Emperors expressed no objections, all agreeing to invite Ye Tian.

“Who shall we send to contact Ye Tian?”

## Chapter 260

Several emperors discussed and then decided to send the Void Breaker Sword Emperor to invite Ye Tian. At least the Void Breaker Sword Emperor had sparred with Ye Tian before, making them somewhat familiar with each other, which naturally made it easier to approach him.

After the meeting, the emperors left the side hall.

Soon after, the Void Breaker Sword Emperor received the notification.

In a certain ferocious beast world, deep within a mountain.

The Void Breaker Sword Emperor had just slain an Emperor-level ferocious beast and picked up the communicator, murmuring, “Those guys have asked me to invite Ye Tian. It seems they

recognize Ye Tian's strength and potential! Well, I've been quite bored recently, so I might as well make the trip!"

Whoosh!

The Void Breaker Sword Emperor transformed into a streak of light and flew towards a space rift.

...

At Zhonghai Super Base.

Ye Tian was strolling on the street with Empress Yue when he suddenly looked thoughtful.

"What's wrong, husband?" asked Empress Yue, noticing Ye Tian's expression.

"A guest has arrived at Tian Pavilion; I need to go back for a bit," Ye Tian said.

"Alright, then let me accompany you," Empress Yue suggested, taking Ye Tian's arm.

"Okay," Ye Tian nodded gently.

Soon, the two returned to Tian Pavilion.

Inside Tian Pavilion, Ye Tian met the Void Breaker Sword Emperor.

In the guest hall.

Ye Tian and the Void Breaker Sword Emperor sat in chairs, with everyone else from Tian Pavilion having left.

"I didn't expect the guest to be you, Void Breaker Sword Emperor," Ye Tian expressed his surprise.

The Void Breaker Sword Emperor was a Six-Star Emperor-level warrior and a high-ranking figure in the Glory Temple, with a significant status in the Tianfu Super Base.

Why would such an important figure come to Zhonghai Super Base to find him?

If it was about recruiting him, they should have approached him earlier, not now.

It had been a while since he challenged the Void Breaker Sword Emperor, and his sudden visit left Ye Tian both puzzled and surprised.

“The Heavenly Emperor of Ten Thousand Laws, let me address you as such for now. I’m here actually on the instruction of some higher-ups in the Glory Temple,” the Void Breaker Sword Emperor stated directly.

Ye Tian accepted the Void Breaker Sword Emperor’s address of him.

In reality, he knew that many warriors in the virtual world referred to him as the Heavenly Emperor of Ten Thousand Laws, a nickname he himself had chosen and quite liked.

Others addressing him as such, he took it as a default.

“Void Breaker Sword Emperor, are you saying you’ve been instructed by some high-ranking individuals in the Glory Temple? Could it be the Seven-Star Emperors? What do they want from me?” Ye Tian was puzzled.

The Void Breaker Sword Emperor laughed, “Heavenly Emperor of Ten Thousand Laws, you’ll find out who instructed me to come here. They’ve invited you to the Glory Temple.”

“Sorry, but I’m not very willing to join the Glory Temple,” Ye Tian declined immediately.

He had his own force, which, although far from comparable to the Glory Temple, might one day match it. Why join the Glory Temple and be bound by their rules?

He wasn’t naive enough to join the Glory Temple, regardless of how good their offer was.

However, the reality was not as he imagined.

The Void Breaker Sword Emperor explained, “Heavenly Emperor of Ten Thousand Laws, you’ve misunderstood. I’m not here to invite you to join the Glory Temple, but just to invite you to enter it. Anyone recognized as a Six-Star Emperor by the Glory Temple is eligible for this invitation. This invitation is not about joining the Glory Temple but to enter as a guest, to visit, or to understand the circles behind the Glory Temple.”

“The circles behind the Glory Temple?”

Ye Tian’s interest was piqued.

He had long heard that the Glory Temple was shrouded in mystery, to the extent that many great emperors from the Tianfu Super Base did not fully understand it, and even rarely saw the emperors of the Glory Temple. The Glory Temple was undoubtedly the most mysterious force, and the emperors behind it were enigmatic yet belonged to a different circle from the ordinary emperors.

“Am I going to enter that circle? That circle must be very mysterious and knowledgeable about many secrets,” Ye Tian speculated. He even had a vague feeling that this visit to the Glory Temple would bring a great surprise.

“Are there any constraints?” Ye Tian asked.

“Of course not!” said the Void Breaker Sword Emperor. “Heavenly Emperor of Ten Thousand Laws need not worry. If you truly fear a trap, you can refuse the invitation. But I still hope you can visit the Glory Temple. You will see a different world, far beyond ordinary circles. Despite being ranked 23rd among the emperors, I am only just at the bottom of that circle!”

“Alright, I am willing to go!” Ye Tian agreed.

“Heavenly Emperor of Ten Thousand Laws, when are you free? I can take you there, to avoid the hassle of arranging for another emperor-level guide who you are unfamiliar with,” the Void Breaker Sword Emperor asked.

“Is a few hours okay?” Ye Tian inquired. He wanted to inform Empress Yue to avoid her worrying.

“Sure!” the Void Breaker Sword Emperor nodded.

Subsequently, Ye Tian informed Empress Yue, who cautioned him to be careful and gave many instructions before letting him leave. Then, Ye Tian instructed his sister Ye Yu about some matters and resolved a few issues. After that, he and the Void Breaker Sword Emperor took the advanced teleportation array from Zhonghai Super Base to the Tianfu Super Base.

Glory Temple.

Ye Tian and the Void Breaker Sword Emperor arrived here.

The majestic temple exuded supreme dignity, resembling the abode of ancient deities, extraordinary among mortal constructions. Ye Tian could even sense countless laws embedded in the temple, becoming part of it, eternal and indestructible.

“Let’s go in,” the Void Breaker Sword Emperor said.

Ye Tian took a step forward and entered the Glory Temple, with the Void Breaker Sword Emperor accompanying him. While walking, the Void Breaker Sword Emperor explained, “Heavenly Emperor of Ten Thousand Laws, the Glory Temple itself is actually a Dawn-level divine artifact, capable of suppressing any emperor. But this Glory Temple is more of a facade. Only a few emperors stationed here, while the real emperors are elsewhere. Inside the Glory Temple, there is a teleportation array, a transcendental, top-level one, also known as the Morning Star-level (???) teleportation array, capable of crossing small worlds.”

“Are the emperors of the Glory Temple in a certain small world?” Ye Tian was surprised.

“Correct,” the Void Breaker Sword Emperor acknowledged. “Those emperors are indeed in a small world. Earth and those ferocious beast worlds are real planetary worlds. Within planetary worlds, many secret realms and rare small worlds are born. Some small worlds are even larger than planetary worlds but still depend on them. The main world is the planetary world, and no matter how large, a small world remains so. Our Earth has such a small world, currently under the control of the Glory Temple. But... the Glory Temple is not what you think it is!”

“What do you mean?” Ye Tian was puzzled.

At this moment, the Void Breaker Sword Emperor sighed, “Ye Tian, what do you think caused the sudden great changes on Earth? Was it natural?”

“Could it be... it wasn’t?” Ye Tian felt a jolt in his heart and ventured a guess.

He felt he was about to uncover an incredible secret.

“It certainly wasn’t a sudden occurrence. I’m not clear about the specifics, but it’s related to the forces behind the Glory Temple!” the Void Breaker Sword Emperor revealed astonishingly.
