

Talent 281

Chapter 281: Negotiation Time!

“Hmph, do you think your identity is enough to scare us? You have true gods on your side, but do you really think we don’t have any behind us?” Emperor Apos coldly stated.

In reality, they didn’t have any true gods backing them, but bluffing was still an option. After all, the Dragon Clan was unaware of their true strength.

It must be said that Emperor Apos’s bluff did cause Long Tianlin to hesitate for a moment, but that was all.

He believed that beings like true gods would not deign to participate in the struggles over a mere star. It would be beneath their dignity.

Long Tianlin, still with hands clasped behind his back, said, “I’m not trying to intimidate you with my background. I, too, would like to spar with one of your nine-star Emperor-level humans. Do any of you dare to withstand ten of my moves?”

“Ten moves?” Emperor Apos and the others were furious.

Everyone was at the nine-star Emperor level, but Long Tianlin’s arrogance was astonishing, thinking they couldn’t withstand ten of his moves?

“I, Emperor Apos, would like to spar with you and see your capabilities!” Emperor Apos stepped forward and declared.

At that moment, Long Tianlin extended a hand and gently reached towards Emperor Apos.

“This is my God-level claw technique—Golden Dragon Extreme Claw. I wonder if you can withstand it?”

As soon as he finished speaking, a golden dragon claw emerged from the void, covering the entire starry sky, and grabbed towards Emperor Apos.

“A God-level claw technique!!!”

Emperor Apos was shocked.

To master a God-level claw technique, one needed a Moonlight-level claw technique talent and also comprehend the Claw Dao to at least 35%. Only then could one master a God-level claw technique.

For instance, Ye Tian, with a 20-fold increase in comprehension and a 10-fold acceleration of time, plus the enhancement from the Enlightenment Stele, had not yet reached the 35% realm in Claw Dao, and was still far from it.

Yet, Long Tianlin had managed to comprehend the Claw Dao beyond 35% and even mastered a God-level claw technique.

Such talent was astounding!

The key was, Long Tianlin's strength talent was also of God level. A God-level strength talent combined with a God-level claw technique, such synergistic effects made Long Tianlin's strength reach the pinnacle of the nine-star level, just one step away from the legendary Emperor realm.

The Emperor realm, for these external forces, was also a legend; their planets had never produced an Emperor.

Only in the central region of the Milky Way, in the thriving human domains, could Emperor-level and even higher, Sovereign-level powerhouses emerge.

Under the Golden Dragon Extreme Claw, Emperor Apos was struck and flew away, severely injured.

But after the strike, Long Tianlin did not attack further.

Seeing this, Emperor Apos quickly activated a healing talent to recover from his injuries.

“I concede!”

Emperor Apos admitted defeat.

If the nine-star Emperor level were divided into six tiers, with the first being the highest, he would be in the fifth tier, while Long Tianlin undoubtedly belonged to the first tier. The gap between them was immense.

Ye Tian watched Long Tianlin, genuinely astonished by his strength.

“This dragon’s power is formidable, possessing a God-level claw technique and divine strength talent. Setting aside my time and space talents, I would need to break through my physical limits for the fifteenth time to match him. Otherwise, without the time and space talents, I wouldn’t even be able to react to, let alone dodge, his attacks!” Ye Tian thought to himself.

At this moment, he truly witnessed the power at the nine-star limit!

“Long Tianlin’s strength far exceeds those human nine-star Emperors, but he did not dare to kill, probably fearing the hidden few!”

Ye Tian’s gaze discreetly shifted towards a certain part of the void.

He faintly sensed several presences, though they were not clear.

But he was certain that there were people there, who had just appeared.

Ye Tian did not use the Eye of Insight to penetrate that location. He had a feeling that if he used the Eye of Insight, while he could see those few individuals, they too would sense his presence.

Ye Tian’s guess was not wrong. The reason Long Tianlin did not make a move was indeed due to the fear of the several strong beings lurking in the shadows.

“Half-gods of humanity, huh? As expected, they have come!”

Long Tianlin thought to himself.

A true demigod was not like the previous Nine Lives Cat Emperor, but one who has successfully transformed their divine body or divine power, standing just one step away from becoming a God-level Emperor.

Such Emperors are referred to as demigods!

If they were ordinary demigods, Long Tianlin would not take them seriously. He could annihilate a group of ordinary demigods, even God-level beings, with just one swipe of his claw.

However, the demigods in the shadows were not ordinary. They were demigods transformed from eight or nine-star Emperors. Such demigods were extremely fearsome, with combat power comparable to Sovereign Emperors, but were not worthy of the title of Sovereign Emperor.

The title of Sovereign Emperor was not given lightly. It must be earned by reaching the power of an Sovereign Emperor without transforming the divine body, divine power, or divine soul.

And he was striving for this title!

Yet, not having truly reached the power of a Sovereign Emperor, he was no match for those demigods. However, he had life-saving methods and was not afraid.

If those demigods dared to make a move, he could always call upon the demigods of the Dragon race who were in seclusion.

In that case, a real battle would commence!

He believed humans would not dare to start a war, for they would surely suffer heavy losses.

Of course, he did not wish to start a war either!

“What do you want to do?”

The Myriad Fire Emperor among the nine-star Emperors spoke up.

Long Tianlin said solemnly, “Negotiate, how about that? Otherwise, if this ferocious beast army behind me charges in, how many Martial Warriors and Emperors will you lose?”

“Fine, let’s negotiate!”

The human nine-star Emperors agreed.

“Then let’s negotiate here!”

With a wave of Long Tianlin’s hand, a magnificent platform appeared in the sky.

On the platform was a round table surrounded by several seats.

Long Tianlin sat in one of them.

In the next moment, three beams of light appeared, condensing into three figures, unmistakably the projections of the three God-level Dragon race powerhouses.

The human nine-star Emperors naturally knew these were not the actual bodies of the three God-level Dragon race beings but mere spiritual projections with little power, a minor technique akin to projection technology in science.

The two sides sat down to begin negotiations.

As for the other human Emperors, they naturally stood at a distance, watching. They were not worthy of participating in such negotiations.

At the meeting.

The Myriad Fire Emperor spoke directly, "Speak, what will it take for your Dragon race to retreat? State your conditions!"

"No, we will not retreat!" Long Tianlin smiled, "If you insist on making our Dragon race retreat, then there's no need for this negotiation."

The Myriad Fire Emperor frowned and pondered for a moment before asking, "Then what do you want?"

Long Tianlin spoke candidly, "First, allow our Dragon race to enter Earth and occupy a territory. Second, tell us the real purpose of your forces coming to Earth. I've observed that Earth's yuan qi revival is somewhat different from other planets' yuan qi revival. Yuan Qi revivals are extremely rare, usually occurring on planets that have experienced a period of a strong cultivation civilization, leading to excessive absorption of yuan qi and the planet's degeneration. Then, after countless years, the world's power recovers, and yuan qi erupts, causing the revival. But Earth seems different. It definitely contains significant secrets. How about sharing these secrets with us?"

"What secrets? We're just interested in Earth's resources, so we've been trading resources with the Earth's Emperors. You can investigate if you don't believe me!" The Myriad Fire Emperor said with a laugh.

"Really? Just for trading resources, why send so many great Emperors, even nine-star Emperors and demigods? Nine-star Emperors are considered ordinary prodigies in the galaxy. Why would they stay on a star for so long? Just for trading resources? Heh, you can come up with such an excuse, do you think this dragon is a fool?" Long Tianlin asked coldly.

...

I think celestial bodies like planets are sometimes collectively referred to as stars.

Chapter 282: A Year Later, The Secret!

The demigods were discovered by Long Tianlin; it was not surprising to several Nine-Star Emperors.

They wanted Long Tianlin to find out, to instill fear and prevent a war from breaking out.

But Long Tianlin was not easily fooled!

Several Nine-Star Emperors began to discuss, even secretly consulting with the demigods.

After a long time, the Myriad Fire Emperor spoke: “We have discussed and agreed to allow you to occupy a small area of Earth, but we won’t allow too many dragons to appear. Only less than thirty dragons are allowed to stay on Earth. Moreover, we major powers have no secrets, so we can’t tell you anything.”

“Is this the result of your hours of discussion?” Long Tianlin was very dissatisfied with this outcome and coldly said, “If this is all you have to offer, then sorry, our dragon race does not accept!”

“If you don’t accept, then let’s battle. Our major powers and Earth’s native martial artists will join forces against you, using all our strength to severely damage your dragon race! I remember your dragon race doesn’t have many pureblood members. If you lose some, it should be your dragon race that feels the pain, not us!” the Myriad Fire Emperor declared resolutely.

“Oh, using all your strength?” After hearing this, Long Tianlin laughed, “If that’s the case, then don’t blame our dragon race. You are just a small power on the edge of human territories, while our dragon race is not. If we leak the situation on Earth, and if any top power gets interested and sends strong individuals to investigate, what if they discover something? I wonder if you can defend Earth? Of course, if Earth is just an ordinary high-level planetary world, then you might be able to defend it. But if not, then...”

As Long Tianlin spoke, the faces of the emperors turned pale, but they quickly regained their composure.

“How about this: us dragons can occupy a large area, without a limit on the number, but must not initiate a war. As for Earth’s secret...”

The Myriad Fire Emperor hesitated for a while, then finally said, “Earth is special and will soon give birth to numerous wondrous objects, with a somewhat high quantity and level. Currently, the wondrous objects on Earth are from an older era, just regaining their effects under the influence of yuan qi. Regarding the existing items, we have not fought over them.

Originally, we planned to harvest these items when they erupt in large numbers, but to avoid attracting the attention of Earth's emperors and the mutual restraint among major powers, we have been hiding behind the scenes and not making a move. Just as you guessed, the so-called trade resources were merely a facade." the Myriad Fire Emperor sighed helplessly.

"Numerous wondrous objects, so that's how it is!"

Long Tianlin was moved.

A world capable of giving birth to numerous wondrous objects was too valuable, no wonder these human powers dared not give up Earth and had been plotting for so long.

If not for the threat to these powers, they would not have spoken up.

"How about this, you humans occupy the land, and us dragons take the seas, with no aggression towards each other. How does that sound?"

Long Tianlin proposed.

"Agreed!"

The Myriad Fire Emperor and the others consented.

Negotiations concluded!

Three god-level dragons remained silent throughout, merely playing a supporting role, with the real decision-maker being Long Tianlin.

Whoosh!

Long Tianlin retreated!

And the emperors from the Glory Pavilion and others also left, dismantling the array here.

Beast World.

As soon as Long Tianlin returned, Long Ao whispered, “Prince Tianlin, how much truth do you think lies in the humans’ words?”

Long Tianlin calmly said, “The emergence of numerous wondrous objects should be true, but whether there are other secrets is uncertain. However, one undeniable fact is that Earth is truly precious. After we enter Earth, we can slowly uncover its secrets. If there are other secrets they’re not disclosing, couldn’t we discover them ourselves?”

“You’re right, Your Highness!”

Long Ao agreed.

“Prepare to enter Earth’s maritime territory!”

Long Tianlin commanded.

“Yes, Your Highness!”

A group of emperor-level beasts responded.

...

Earth Immortal Realm.

As soon as the emperor-level beings of the external forces returned, several Nine-Star Emperors and demigods secretly convened a meeting.

“The appearance of the dragon race has disrupted our plans!”

“Yes, although we didn’t reveal our true secrets, the value of the massive amount of wondrous objects is immense. Once the dragon race gets involved, we’ll lose a significant number of these items.”

“We have no choice; we cannot contend with the dragon race. If the top human powers find out, we won’t get any benefits, and our long-term planning will be for naught!”

“We can’t hide any longer. We need to actively enter Earth’s main world. Anyway, in a year, the wondrous objects will emerge in large numbers. Appearing a year earlier isn’t much of an issue. Once the wondrous objects are out, those dragons who benefited should leave, right?”

“Let’s hope they leave. Then they won’t know our true purpose!”

“The Emperors of Earth must also be won over. They are a strong force, and this generation of Earth’s humans has great potential. In the future, we still hope to develop Earth into a branch world, establishing a sub-sect here and accepting many disciples!”

“Yes, we should do that. Let’s share the secret with the native emperors of Earth, as we can’t hide it for much longer anyway.”

After a discussion, these Nine-Star Emperors and demigods left.

Zhonghai Super Base.

One day, the emperors of Zhonghai Super Base were utterly stunned, witnessing projections of the dragon race, Eight-Star Emperors, Nine-Star Emperors, and god-level dragons.

In the past, any one of these would have caused a sensation, but now they all converged together.

In the blink of an eye, three days passed.

The emperors of the dragon race entered Earth one by one and then the seas, avoiding conflicts with the human emperors.

Everything was peaceful!

That day.

A piece of intelligence reached Ye Tian, revealing the secrets of the external forces, which they had voluntarily disclosed.

“A large number of wondrous objects are emerging!”

Ye Tian was somewhat surprised.

Extraordinary items!

Each item was extremely precious, like the War God Stele and the Enlightenment Stele. They were both highly valuable four or five-star wondrous objects. The Sakura God Tree was also a wondrous object.

“The War God Stele must be an ancient wondrous object born from Earth, and the Sakura God Tree probably also originated long ago, just dust-covered. After the resurgence of yuan qi, it showed the effects of a wondrous object. These precious items were probably overlooked by the external forces, or they would have claimed them already. It’s not surprising, considering how weak and small the island country is, with no one entering the Earth Immortal Realm. Thus, the news of the Sakura God Tree remained undisclosed.”

Ye Tian mused.

Items like the War God Stele were ancient wondrous objects, and the Earth’s wondrous objects hadn’t truly appeared in this era.

Their emergence was set for a year later!

“In a year, all the forces will fight over them – the dragon race, external forces, and Earth’s native forces. It will be quite lively!”

Ye Tian was naturally interested in these items.

After a year, he too would compete for these opportunities.

But was this really all the secrets?

“The external forces revealed their intentions so easily; it doesn’t seem like their style. If I could capture a Nine-Star or Eight-Star Emperor and hypnotize them, I would know everything!” Ye Tian suddenly thought.

But for now, his strength wasn’t enough, nor would he really oppose the entire external force alone.

Once he reached the Nine-Star Emperor level, he might start investigating these secrets.

“I’ll wait and see. I’ll know soon!”

Ye Tian thought to himself.

Chapter 283: Threefold Weak Water!

The external forces no longer concealed their existence, and naturally, Ye Tian saw no need to hide the emperors of Zhonghai Super Base.

Thus, he compiled information, integrating the existence and objectives of the external forces into a document, which was then delivered to the leaders of each power.

Soon, the leaders of the various powers at Zhonghai Super Base received the materials sent by Ye Tian.

Battle Axe Mercenary Hall.

The Battle Axe Emperor, looking at the document in his hands, became increasingly alarmed as he flipped through the pages.

“External forces, ancient civilization sects!”

Only now did the Battle Axe Emperor realize the origins of those emperors he encountered that day. They were not emperors from Earth but from ancient civilization sects that had once again come to Earth, though they had been hiding in the world of Earth Immortals.

The document also revealed the purpose of these ancient civilization sects – seeking wondrous objects!

“So, Earth is about to produce a large number of wondrous objects. What a great opportunity!” thought the Battle Axe Emperor excitedly.

He had just broken through his fourth physical limit not long ago, but he was well aware that his talent was not high, with a mere Moonlight level cultivation talent. If nothing unexpected happened, he would only reach the emperor level in this lifetime.

Moreover, lacking Mystic level attribute talent and relying only on yuan qi to temper his body, it was difficult for him to break through physical limits.

But if he could obtain one or two wondrous objects, he could rise completely and even hope to break through several physical limits in a short time, potentially breaking his tenth physical limit in the near future.

Once he broke through his tenth physical limit, his strength would increase many times over, making him a four or five-star emperor level powerhouse.

“Wondrous objects, I must compete for them!” The Battle Axe Emperor clenched his fists, determined.

Many emperors shared his thoughts, but how many emperors were there on Earth? Moreover, with the powerful external forces, their chances of obtaining wondrous objects were slim, and death was a more likely outcome.

However, before a great opportunity, everyone is irrational, including the Battle Axe Emperor.

Meanwhile, the emperors of the external forces were no longer confined to the Earth Immortal Realm and began descending to Earth one after another.

Then, they made a startling decision – to establish super bases!

Consequently, super bases of external forces appeared worldwide, each typically having one or even more seven-star emperor level powerhouses in charge.

Additionally, these external forces brought many Martial Warriors from the Earth Immortal Realm, increasing the numbers in these super bases.

The super bases of the external forces soon issued a notice that affected many super bases.

The notice announced that the newly established super bases welcomed all Martial Warriors and emperors to join.

This completely shocked the world!

For a while, many emperors left their super bases and chose to join the super bases established by the external forces, with some even bringing their entire forces.

In the eyes of these emperors, the external forces were very powerful, and the super bases they established had more prospects.

However, could they really become important to the external forces? More likely, they were just being used.

Tian Pavilion.

The Battle Axe Emperor came before Ye Tian and reported, “Heavenly Emperor of Ten Thousand Laws, our Zhonghai Super Base has seven emperors, eighty-three saints, and over a thousand grandmasters who have left to join the Tongyuan Super Base by now!”

The Tongyuan Super Base, established by external forces, was led by an eight-star emperor level powerhouse named the Tongyuan Emperor, who was also backed by a nine-star emperor level powerhouse.

The Tongyuan Super Base, located within the Huaxia region, had attracted many warriors from other super bases in Huaxia after announcing its recruitment, and some from Zhonghai Super Base were no exception.

“Battle Axe Emperor, won’t you join them?” asked Ye Tian.

The Battle Axe Emperor smiled and said, “I’ve only just reached the two-star emperor level. An emperor like me won’t be valued much. Even if I join the Tongyuan Super Base, what then? I would still have to rely on myself. My status in Zhonghai Super Base is high, second only to the Heavenly Emperor of Ten Thousand Laws and Empress Yue. Moreover, I manage many aspects of Zhonghai Super Base. Why would I demean myself under the external forces as a minor figure without much authority?”

‘Better to be a chicken’s head than a phoenix’s tail!’

This was the thought of the Battle Axe Emperor!

“Battle Axe Emperor, your thinking is quite good. It’s a pity that some emperors are just confused. The external forces are indeed very powerful and are indeed interested in befriending the local emperors of Earth. However, they are unlikely to spend much to nurture these local emperors, as they have other motives. Those emperors who joined their super bases are merely serving them. How many can actually be valued and put to important use?” Ye Tian said solemnly.

“You are right, Heavenly Emperor of Ten Thousand Laws!” agreed the Battle Axe Emperor.

Time passed, and the super bases established by the external forces announced in the virtual world a notice about opening a trade channel, allowing any Martial Warrior to purchase their items or trade treasures.

This news excited countless Martial Warriors.

They had long heard that the external forces possessed valuable items, and their resources could be exchanged for more finished treasure items.

One such treasure, coveted by many emperors, was the Boundary Breaking Pill!

The Boundary Breaking Pill could break the physical limits of an emperor, enabling an emperor to quickly undergo a major transformation and become a formidable existence in the eyes of countless emperors.

Not long after, the trade channel was opened.

Countless treasures appeared before all Martial Warriors, and many of them placed orders.

The Battle Axe Emperor also scanned the platform for treasures, quickly locking onto the Boundary Breaking Pill.

Originally there were 200 Boundary Breaking Pills in stock, but in a blink of an eye, only 100 were left, and the number was rapidly decreasing.

To buy, or not to buy?

The Battle Axe Emperor didn't hesitate and made the purchase!

Clicking to buy!

A single Boundary Breaking Pill consumed one-tenth of his fortune, but he felt it was worth it.

Although using the Boundary Breaking Pill would damage one's foundation, making it difficult for even those with Dawn level cultivation talent to reach the God level, he was only of Moonlight level cultivation talent and had no hope of reaching the God level in his lifetime.

So, he didn't care about the damage to his foundation.

Strength was everything. Only by enhancing his strength could he have a chance to compete for more opportunities.

Inside the Tian Pavilion.

Ye Tian was also selecting treasures.

Although he was wary of the external forces, he had to admit that they had many good items.

For something like the Boundary Breaking Pill, he had no interest, but he was interested in some other items.

For example—

The Threefold Weak Water!

The Threefold Weak Water was one of the water-element treasures, similar to exotic fire, but in the water category. Sitting on the Threefold Weak Water allowed Emperors with Mystic level water-element talent to utilize their water-element talent to draw the power of water and temper their bodies, enabling them to break their physical limits faster.

In other words, the Threefold Weak Water is a great item to assist Mystic level water-element talent holders in their cultivation!

However, the price of the Threefold Weak Water was not cheap, costing a total of 30 million yuan qi stones.

“I don’t have 30 million yuan qi stones; I’ll have to exchange for them!” Ye Tian thought.

Ye Tian was quite wealthy, possessing many valuable items. By trading some of them, he could gather the required 30 million yuan qi stones.

Thus, in the next few hours, he took out some valuable items and traded them with some emperors of Zhonghai Super Base and other super bases, eventually gathering over 30 million yuan qi stones.

Then, he immediately traded for the Threefold Weak Water.

An hour later.

An emperor arrived before Ye Tian, completing the trade with him.

The Threefold Weak Water was his!

Chapter 284: Spatial Disturbance, Entering the Nine-star Emperor Level!

The Cultivation Room.

Ye Tian's gaze was fixed on the Threefold Weak Water. The Threefold Weak Water, resembling a cluster of water, was very light, yet it posed a strong resistance. It was difficult to penetrate with hands, and it also possessed powerful corrosive properties.

For an average Martial Warrior, encountering the Threefold Weak Water would certainly result in corrosion and death.

However, for an Emperor-level warrior like Ye Tian, the Threefold Weak Water was a treasure.

"Such a portion of Threefold Weak Water should be enough to break through my body's limits once," Ye Tian estimated.

But with his current pace of cultivation, it would take at least more than half a year to achieve this.

Several months passed.

One day, the yuan qi of Earth doubled overnight, and due to the concentration of yuan qi, many warriors easily broke through their bottlenecks, leading to an increasing number of new warriors.

The Tian Pavilion.

Sensing the enriched yuan qi around him, Ye Tian murmured, "In just one night, the yuan qi has doubled. In another half year, wondrous objects of the new era will begin to emerge. It seems this is a sign of the prelude!"

Undoubtedly, such changes were beneficial for Earth and humanity, but they also posed a challenge.

With the increased concentration of yuan qi, the strength of ferocious beasts would also grow stronger.

Overall, this was advantageous for humanity.

Ye Tian evaluated his cultivation progress. After half a year, he should be able to break through the eleventh body limit and would almost be able to comprehend more than 35% of the Claw Dao and master that God-level claw technique.

Thus, after half a year, his strength would significantly increase, possibly even stepping into the Nine-Star Emperor level.

Time passed, and Ye Tian was constantly engaged in cultivation and comprehension.

On this day.

Ye Tian hadn't made a breakthrough in cultivation, nor had he reached 35% comprehension in Claw Dao, but he made progress in the mystic arts of space.

His spatial mystic art was at the Pseudo-Mystic level, requiring him to unearth new abilities step by step.

Now, he had just entered the 20% realm of spatial mystic art. Initially, he had only developed the ability of spatial compression, but now he had acquired another ability.

Spatial Disturbance!

Spatial disturbances are common, such as the ones caused by two Emperor-level warriors in full combat, capable of causing continuous spatial disturbances.

However, the spatial disturbance ability developed by Ye Tian was vastly different and many times stronger than those caused by battle, incomparable in level.

“Lucky me. I only intended to improve the spatial compression ability but unexpectedly comprehended the spatial disturbance ability!” Ye Tian was in high spirits.

However, the spatial disturbance was just comprehended and had not been put to real test yet.

The War God Ring, Virtual World.

Although this virtual world wasn't as vast as the Glory Virtual World, it allowed individual use for cultivation, serving as a personal virtual testing ground, a privilege he didn't have in the Glory Virtual World.

Therefore, for testing techniques, he would still go to the War God Ring's virtual world.

With a thought, Ye Tian entered the virtual world and arrived at a mountain range stretching for thousands of miles.

Above the mountain range, Ye Tian hovered in the air.

Immediately.

He activated his spatial talent and employed the spatial disturbance ability.

Hummmmmmm!!!

The force of the disturbance spread, causing the entire mountain range to crumble, turning into countless fragments, and the surrounding land within hundreds of thousands of miles shattered.

Such terrifying destructive power made Ye Tian frown. He had only intended to shake the mountain range, not attack other directions, but the spatial disturbance had dispersed its force.

This kind of attack would be a world-ending disaster for warriors below the Emperor level, but for the Emperor level, especially the strong ones, it was not too terrifying.

Since the force was dispersed, an Emperor-level could find ways to evade it.

Such a technique was considered a failed one!

However, Ye Tian was not too disappointed, as it was just a newly comprehended ability. With continuous improvement, this technique could become extremely terrifying.

In the following days, Ye Tian spent one to two hours each day refining his Spatial Disturbance ability.

Half a month passed.

This time, Ye Tian returned to the virtual world to test his Spatial Disturbance ability.

On the same mountain range.

Ye Tian activated his Spatial Disturbance ability.

Hum!!!

The mountain range spanning ten thousand miles was engulfed by the spatial disturbance.

In the next instant, the entire mountain range was shattered into dust, turning to ashes and vanishing without a trace.

The surrounding area, however, remained unscathed, as if the mountain range had never existed.

“What terrifying power. Now, the Spatial Disturbance has truly matured!” Ye Tian murmured to himself.

Having mastered Spatial Disturbance, Ye Tian was in high spirits, his strength having increased further.

As the year was nearing its end, various powers began to closely monitor every region of Earth, with Emperor-level beings frequently seen in various areas.

Meanwhile, disciples of the Tian Pavilion, dispatched by Ye Tian, had infiltrated various super bases. If any discoveries were made, they would report back to Ye Tian immediately.

With the investigations of the Tian Pavilion disciples, Ye Tian could focus on his cultivation.

With only one month left until the end of the year, Ye Tian's Claw Dao realm finally broke through.

“Phew – after such a long period of contemplation, and constantly using my time talent, I've finally comprehended the Claw Dao to 35% mastery. With the remaining month, I should be able to master that God-level claw technique, and my eleventh body limit break is likely to happen soon!” Ye Tian declared.

Thus.

In the following days, Ye Tian spent half his time cultivating the God-level claw technique and the other half absorbing the power of the Threefold Weak Water to temper his body.

On the seventh day.

Ye Tian finally touched the shackles of his eleventh body limit and easily used the Threefold Weak Water to break through, successfully overcoming the eleventh body limit.

With the eleventh body limit broken, Ye Tian's physical strength reached 20,000 Dragon Power, instantly doubling his strength.

Inwardly, Ye Tian felt an epiphany—

He seemed to have stepped into the Nine-Star Emperor level!

Without the need for testing or verification, it was a pure intuition.

“Intuition is not wrong. This must be one of the abilities of the Nine-Star Emperor level. Originally, I was close to the peak of the Eight-Star level. Now, having broken through the eleventh body limit, not only has my physical strength doubled, but other talents have also greatly improved, such as my spatial and temporal abilities. Thus, I’ve successfully stepped into the Nine-Star Emperor level of combat prowess!” Ye Tian reasoned.

Entering the Nine-Star Emperor level, Ye Tian was now among the pinnacle of strong practitioners. Although he was still somewhat behind the likes of Long Tianlin, a peak Nine-Star, he was not much weaker than other Nine-Star Emperors.

The key was, if he chose to flee, even Long Tianlin might not be able to stop him.

Ten days later, Ye Tian finally comprehended the God-level claw technique to a beginner level.

And this God-level claw technique was named the Great Tearing Divine Claw!

With both God-level claw and sword techniques, Ye Tian, whether in close or ranged combat, had no weaknesses.

His strength was not considered weak among the Nine-Star Emperors!

In a blink of an eye, the year ended, and all the Emperor-level beings on Earth emerged from seclusion, all in search of rare items.

On the side of the dragons and ferocious beasts, Emperor-level beings also appeared.

Over the seas.

In the skies.

Countless Emperor-level ferocious beasts appeared, all deep-sea creatures now tamed by the Dragon Race, forming their troops.

In terms of numbers, Emperor-level ferocious beasts far outnumbered human Emperors.

And at this moment, a piece of news emerged, drawing the attention of countless Emperors!

Chapter 285: The First Wondrous Object – Qinglong Wood!

In Huaxia, within the vast Dragon Frame Forest, a shocking beam of light was discovered, piercing through the sky.

For a time, numerous Emperors rushed towards the Dragon Frame Forest.

Tian Pavilion.

A disciple of the Tian Pavilion relayed the news, and Ye Tian received it immediately.

“Dragon Frame Forest!”

Ye Tian knew of this place; it was originally Shenlongjia (not sure if it’s meant to be Shennongjia, a forestry district) in his previous life. After the great changes on Earth, the Dragon Frame became the Dragon Frame Forest, expanding many times in size, ranking among the top few large forests in Huaxia.

Within the Dragon Frame Forest, there were many ferocious beasts, including numerous Emperor-level ferocious beasts, making it a forbidden zone for many Martial Warriors.

In the past, no Martial Warrior would dare to enter the Dragon Frame Forest, but now was the time when wondrous objects were born, and such an anomaly in the Dragon Frame Forest easily led to the thought of a wondrous object.

The first wondrous object piqued the curiosity of all Emperors, and naturally, Ye Tian was curious too.

“Let’s go!”

Ye Tian made his decision.

But he didn't bring Empress Yue with him; instead, he went alone.

Empress Yue's strength was still too low. If he went alone, he could ensure his own safety, but bringing Empress Yue would make it difficult to guarantee, so for his wife's safety, he naturally wouldn't take the risk.

The closest super-base to the Dragon Frame Forest was the Chuannan Super-Base.

Ye Tian first traveled to the Chuannan Super-Base using the teleportation array, then flew towards the Dragon Frame Forest.

...

At the Dragon Frame Forest, near the center, on a mountain peak.

One by one, Emperors arrived here, and soon, hundreds of Emperors gathered.

The strength of these Emperors varied, with some not even being one-star Emperors and others being six or seven-star Emperors.

Suddenly.

The void trembled, and a temporary teleportation array appeared in the sky.

Then, one by one, Emperor-level ferocious beasts appeared, led by an Emperor-level dragon.

"The Dragon Race has come too!"

Many Emperors were wary.

This was a very powerful race, feared even by foreign powers.

However, it was strange that the dragon who arrived was not a nine-star Emperor like Long Tianlin, but a seemingly ordinary Emperor-level dragon, not appearing very powerful.

At this moment.

Ye Tian also arrived!

He used his copy talent to cover the entire field, checking the talents of these Emperors, and quickly assessed their strength.

“Not a single nine-star Emperor, not even an eight-star Emperor!”

Ye Tian frowned.

He soon understood.

The first wondrous object to appear must be of a low level, which the foreign powers understood, and the Dragon Race probably also learned many secrets during the year, so they did not send a powerful dragon.

However, a low level of a wondrous object didn't mean it was of low use.

Some low-level wondrous objects were even more effective than high-level ones.

The absence of eight or nine-star Emperors was a good thing for Ye Tian, as it meant he could easily snatch the wondrous object without revealing his full strength.

Of course!

The wondrous object had not truly emerged yet, and an eight-star Emperor could still arrive.

Boom!

The mountain split open, and a huge piece of wood emerged from the ground, exuding an ancient aura.

At that moment.

The Emperor-level dragon exclaimed in shock, “This is a three-star wondrous object – Qinglong Wood!”

“Three-star wondrous object Qinglong Wood?”

Many Emperors were puzzled about what kind of wondrous object it was.

Seeing that many Emperors were unaware, the Emperor-level dragon, holding its head high, explained, “Although Qinglong Wood is only a three-star wondrous object, it is incredibly valuable to some Emperors because it aids in cultivation. Any Emperor with a Mystic-level wood talent cultivating near the Qinglong Wood can absorb its essence to temper their body and quickly break physical limits. However, it is of little use to Emperors who have broken through their body limits more than fifteen times. Additionally, Qinglong Wood also assists in comprehending wood mysteries.”

Many Emperors were immediately disappointed, as they lacked Mystic-level wood talents.

But Ye Tian was very excited, as he possessed God-level wood talent.

In fact, he had all five-elemental talents, all of God-level, collectively known as the Five Elements Transformation Talent. It allowed him to use any of the five-elemental God-level talents, meaning the Qinglong Wood was highly valuable to him.

Among the Emperors present, there were also many that had wood talents, making them very eager for the Qinglong Wood.

But at this moment, Qinglong Wood had not truly emerged.

The Qinglong Wood was still shielded by rings of light, making it impossible to take it away at that time.

This protective layer was a blessing from the world's force, and before the wondrous object was born, no one could take it away unless they could break Earth's world force.

As the light rings dimmed, many Emperors became restless, and an air of murderous intent pervaded the atmosphere.

Before, they could chat and laugh, but once the Qinglong Wood emerged, they would start fighting each other.

However, some Emperors chose to retreat, considering the three-star Emperor-level Qinglong Wood not worth risking their lives over.

Others decided to watch and wait, making no move.

Suddenly.

The light rings disappeared, and the Qinglong Wood emerged.

"The Qinglong Wood is mine. No one else can compete with me!"

An Emperor who was relatively close rushed forward immediately.

At that moment.

A claw extended outwards, turning the Emperor into a cloud of blood mist! The Emperor-level dragon had made its move.

"Hmph, although the value of Qinglong Wood is limited, as the first wondrous object, our Dragon Race shall have it!"

The Emperor-level dragon's aura enveloped the entire area, and other Emperor-level beasts responded in kind.

Soon, a fierce battle ensued!

“Stop fighting over the Qinglong Wood. I, the Golden War Emperor, claim it!”

The Golden War Emperor, clad in gold, made a dazzling entrance.

The eight-star Emperor-level Golden War Emperor, hailed as the strongest native powerhouse on Earth.

His arrival immediately caused many Emperors to retreat, not daring to compete with the Golden War Emperor for the Qinglong Wood.

However, the beasts, ignorant of the Golden War Emperor’s reputation, attacked relentlessly.

“Courting death!”

The Golden War Emperor roared.

Holding a long spear, he swept through the void.

Boom!

Emperor-level beasts were blasted apart by the Golden War Emperor, dying on the spot.

In an instant, more than thirty Emperor-level beasts were annihilated.

“You...”

The Emperor-level dragon became fearful.

It was only a seven-star Emperor, while the Golden War Emperor was an eight-star.

A single star's difference meant an enormous disparity in combat power.

The Golden War Emperor had strong backing and was not afraid of the Dragon Race.

“Scram!”

He thrust his spear, as if about to pierce through the Emperor-level dragon the next moment.

At that time.

A huge dragon tail swept across.

Boom!

The Golden War Emperor stepped back several paces, his gaze intensifying as he looked at a massive dragon that had just arrived – an eight-star Emperor-level dragon.

“Eight-star Emperor!”

The Golden War Emperor became vigilant.

Suddenly, two eight-star Emperors appeared on the battlefield, and the other Emperors didn't even dare to come close.

Suddenly.

A figure surprisingly appeared beside Qinglong Wood. It was Ye Tian who had teleported there.

Ye Tian grabbed the Qinglong Wood and quickly left.

Seeing someone take away Qinglong Wood, the Golden War Emperor and the eight-star Emperor-level dragon quickly pursued.

Qinglong Wood, being a wondrous object, couldn't be stored in a storage bag, so it had to be carried away.

Therefore, truly claiming a wondrous object was not an easy task.

Seeing the Golden War Emperor and the eight-star Emperor-level dragon pursuing,

Ye Tian's eyes turned cold, and with a wave of his hand, space froze.

"Scram, or die!"

Chapter 286: Wondrous Objects Emerge One After Another!

The Golden War Emperor did not recognize Ye Tian, and even if he did, he was unaware of Ye Tian's true strength. Thus, he paid no heed to Ye Tian's threat, a sentiment shared by the eight-star Emperor-level dragon clan powerhouse.

The spatial confinement clearly did not intimidate the two eight-star Emperor-level beings, who continued their pursuit.

At that moment, Ye Tian stopped, activated his Mystic-level power talent, and then executed a Legendary-level sword technique – Starfall Slash!

Boom!!!!

The Starfall Slash was unleashed upon both human and dragon.

Such an attack was not quite on par with a nine-star Emperor level, but it was still considered extremely powerful among the eight-star Emperor level.

Under the effect of spatial confinement, both the Golden War Emperor and the Emperor-level dragon were slowed down, unable to dodge Ye Tian's attack and forced to withstand it head-on.

Boom! Boom!

Two figures were sent flying, drenched in blood that scattered across the sky, clearly indicating their severe injuries.

Having wounded both the Golden War Emperor and the eight-star Emperor-level dragon, Ye Tian grabbed the Qinglong Wood and flew towards Zhonghai Super Base.

The Qinglong Wood was too large for Ye Tian to transport using a teleportation array, so he had to fly back.

“Who is he?”

The Golden War Emperor, clutching his chest in shock, wondered.

His Moonlight-level armor was now slashed open, revealing a sword mark that nearly pierced through his body.

That single strike had seriously injured him. Although not life-threatening, a few more attacks like that, and he might not survive.

“A peak eight star Emperor!” concluded the Golden War Emperor.

Had his opponent been just an ordinary eight-star Emperor, he might have contested for the first wondrous object, but facing someone evidently stronger, why should he bother?

A three-star wondrous object was not of high value and not worth risking his life over, especially when dignity was less important than survival.

The Golden War Emperor left, and the injured Emperor-level dragon had no choice but to do the same, not daring to pursue Ye Tian any further.

Whether it was external forces, the dragon clan, or other Emperor-level beings, there was an unwritten rule: whoever genuinely seized a wondrous object should not be covertly pursued afterward.

Of course, this only applied to ordinary wondrous objects.

For truly precious ones, who would adhere to such a rule?

Though, Ye Tian could easily protect three star wondrous objects..

Having demonstrated his eight-star Emperor-level strength, neither external forces nor the dragon clan dared to underestimate him, and they wouldn't bother over a mere three-star wondrous object.

If they were truly tempted by a three-star wondrous object, more than just two eight-star Emperors would have shown up. Those two were acting on their own.

Ye Tian quickly returned to Zhonghai Super Base.

...

At the Tian Pavilion.

After returning, Ye Tian used the Qinglong Wood as a pillar to support the underground space of the Tian Pavilion.

Moreover, he created several cultivation chambers around the Qinglong Wood, allowing warriors with wooden talents to come here for cultivation and insight.

“Three-star wondrous object, the Qinglong Wood. I wonder what the effect of refining the body with the energy of the Qinglong Wood will be?”

With some anticipation, Ye Tian began to cultivate near the Qinglong Wood.

His God-level wood talent, transformed from his Five Elements Transformation Talent, was activated, drawing the energy of the Qinglong Wood into his body, rapidly refining it.

Boom!!!!

Countless cells were tempered under the energy of the Qinglong Wood, rapidly enhancing his whole body.

“The effect is strong, even better than Threefold Weak Water!” Ye Tian was overjoyed.

The Qinglong Wood, being about three hundred meters tall and ten meters thick, would not deplete much of its energy even if Ye Tian absorbed it daily, allowing him long-term cultivation.

Time passed by.

In the blink of an eye, Ye Tian spent ten days in closed-door cultivation, making slight progress in his cultivation. Though, there was no significant advancement in other aspects.

One day, the disciples of the Tian Pavilion brought news again – another wondrous object had appeared on Earth. However, due to its remote location in America, by the time the news reached them, the wondrous object had already been seized by an Emperor-level being.

That wondrous object was a four-star wondrous object – the Wind Monument Stone!

The Wind Monument Stone enabled one to comprehend the mystery of wind. It cannot be used to understand other mysteries. In terms of versatility, it naturally falls short compared to wondrous objects like the War God Monument or the Enlightenment Stele. However, in specific use cases, the effects of the Wind Monument Stone were far superior.

For instance, comprehending the mysteries of wind near the Wind Monument Stone, as opposed to near the War God Monument, would yield far better results.

Therefore, for those with wind-related talents, the Wind Monument Stone was undoubtedly a treasure.

Almost every ten days, a wondrous object would emerge, most being four or five-star wondrous objects.

Due to Earth's vast size, despite the availability of teleportation arrays, news often arrived too late for Ye Tian. By the time he could respond, the wondrous objects had usually been snatched up by other Emperor-level beings.

In the blink of an eye, three months passed.

Apart from the first Qinglong Wood, Ye Tian hadn't managed to seize any other wondrous objects.

One day, a wondrous object appeared in the Island Nation.

The Island Nation had recently aligned itself with an external force. Thus, it was also aware of the existence of wondrous objects and had established top-tier teleportation arrays, facilitating travel to and from the major bases in Huaxia (China).

The treasure offered by the Island Nation was the Sakura God Tree. Although it was in a semi-dead state, it still attracted the attention of the external force. Otherwise, the Island Nation wouldn't have had the qualification to participate in the competition for wondrous objects.

When news of the wondrous object arrived, Ye Tian immediately attempted to use a teleportation array to reach the Sakura Super Base.

But the teleportation failed!

"Lord Heavenly Emperor of Ten Thousand Laws, the top-tier teleportation array at Sakura Super Base has been shut down!" said a Saint-level powerhouse responsible for maintaining the teleportation array.

"Go to the other super bases in the Island Nation!" Ye Tian commanded.

After inputting two teleportation coordinates, both were found to be inoperable.

“Lord Heavenly Emperor of Ten Thousand Laws, the other two super bases have also been shut down. The other side has closed their teleportation arrays, making it impossible to teleport there!” said the Saint-level being helplessly.

“They dare to shut down the teleportation arrays!” Ye Tian was furious.

Clearly, the Island Nation intended to monopolize this wondrous object, as all three super bases had conspired to shut down their arrays simultaneously.

Whoosh!

Ye Tian teleported away.

Zhonghai Super Base wasn’t very far from the Island Nation, and with his speed, he could quickly reach there.

Teleport!

Teleport!

Teleport!

Ye Tian’s speed was incredibly fast, covering millions of miles in an instant, pushing the limits of teleportation.

Before long, he had crossed the vast ocean and saw the shores of the Island Nation.

Invisibility, advance!

Soon, he spotted an Island Nation Emperor.

Without a second thought, Ye Tian appeared and hypnotized the individual.

“Speak, where is the wondrous object?”

Ye Tian interrogated.

“In a valley 200,000 miles east of Sakura Super Base,” the Emperor replied.

“What evil deeds have you done?” Ye Tian asked further.

Immediately, the Emperor confessed all his misdeeds, some of which were particularly cruel.

After listening, Ye Tian was filled with rage.

“Soul Spike!”

His soul talent struck, piercing the soul of the Island Nation’s Emperor-level being, who fell dead on the spot.

Had the individual been a good person, Ye Tian might have spared him. But now, being an evildoer and a member of the Island Nation, he showed no mercy.

After killing the Emperor-level being, Ye Tian teleported away, quickly arriving at the valley.

Fortunately, the wondrous object had not fully emerged yet.

But at that moment, the area was already crowded with numerous Emperor-level beings!

...

The author is definitely controlling the narrative to be pro-China. But, it’s reflective of history, which is important to understand.

I forgot to mention, but Qinglong Wood means Green Dragon Wood, but the green dragon part had no significance in the story, so I didn’t translate it.

Chapter 287: The Golden Paper, A Mysterious Wondrous Object!

“That is...”

Ye Tian saw a sheet of golden paper, seemingly the most perfect thing between heaven and earth, floating mid-air, protected by layers of light rings.

“What a strange wondrous object. It’s actually a piece of paper?”

Ye Tian thought to himself.

But wondrous objects are not specific things; they come in all forms, so upon reflection, this wasn’t so strange.

Undeniably, this wondrous object must be extremely precious, because not just one eight-star Emperor-level had come this time, but even two nine-star Emperors.

Ye Tian had seen both of these nine-star Emperors before.

They were Long Chichi and the Shadowless Emperor!

The strengths of these two nine-star Emperors were similar. When they had fought each other in the past, both ended up injured and equal.

And the Shadowless Emperor belonged to the power that currently supported the island nation – the Shadow Sect!

The Shadowless Emperor was an elder of the Shadow Sect.

Ye Tian, using his talent for invisibility, approached and then enveloped the whole area with his copy talent to check their talents.

At that moment.

Ye Tian was surprised to discover an additional talent panel.

“Invisibility!”

Ye Tian thought of this.

“The Eye of Insight!”

With a flash of light in his 16-talent eyes, he quickly spotted an Emperor-level hiding not far from the golden paper, his gaze fixed tightly on the wondrous object.

And his strength was quite formidable.

Human: Li Yun

Cultivation Talent: Moonlight

Strength Talent: Pseudo-Mystic (70%)

Defense Talent: Pseudo-Mystic (60%)

Speed Talent: Pseudo-Mystic (50%)

Dagger Talent: Morning Star

Deadly Poison Talent: Top

Invisibility Talent: Top

And Li Yun’s cultivation had astonishingly broken through the thirteenth physical limit. With his talent situation combined with his talents, he was comparable to a five-star Emperor-level powerhouse.

Moreover, the opponent also had top-level deadly poison and invisibility talents, definitely a difficult Emperor-level to deal with, much more terrifying than a regular seven-star Emperor-level.

“This person must be an Emperor-level of the Shadow Sect, probably planning to secretly steal the wondrous object!” Ye Tian guessed.

Of course.

A wondrous object was no ordinary thing, and their auras were hard to conceal. Even if one used invisibility talent to hide the wondrous object, its aura couldn't be hidden; otherwise, the invisibility talent would be too heaven-defying.

Thus, invisibility talents were only used for surprise attacks. Once the wondrous object was seized, they would still rely on the eight-star Emperor-level Shadowless Emperor. Only if the Shadowless Emperor could hold off Long Chichi of the dragon race, would Li Yun be able to leave with the wondrous object.

“It seems the Shadow Sect highly values this wondrous object. They probably blocked the teleportation array to prevent other foreign powers from snatching it. The Shadow Sect acting like this indicates it must be an extraordinary wondrous object!”

Ye Tian also became very interested in this wondrous object.

He slowly moved into the valley, remaining invisible.

He also prepared to snatch the wondrous object as soon as the light rings disappeared.

“The light rings will disappear, and the Shadowless Emperor will definitely try to stop Long Chichi first, creating an opportunity for Li Yun. But they can't imagine that I, too, am lurking invisibly nearby. How can Li Yun's speed compare to mine? I have a 90% chance of snatching this wondrous object!”

Ye Tian calculated.

Time passed slowly, and the light rings around the golden paper wondrous object gradually faded.

Finally, the last light ring disappeared.

The wondrous object, revealed!

“The wondrous object is mine!”

Long Chichi roared, his enormous dragon claw seemingly enveloping the valley, reaching down to grab it.

“Long Chichi, you won’t get the wondrous object!”

The Shadowless Emperor thundered a palm strike, blocking Long Chichi.

The two nine-star Emperors clashed!

And in that instant, Ye Tian and Li Yun both made their moves to snatch the wondrous object.

However, Ye Tian was faster, grabbing the golden paper, stunning many human Emperors and Emperor-level ferocious beasts. Li Yun was dumbfounded.

How could a seemingly foolproof plan suddenly fail?

Where did Ye Tian come from?

“Invisibility talent! He also has invisibility talent!”

Li Yun realized too late.

The wondrous object was already in Ye Tian’s hands.

“Baka, kill him!” (lol)

One after another, the island nation’s Emperors formed a battle formation and charged towards him.

Meanwhile, many Emperor-level ferocious beasts under the dragon clan also rushed over, swarming around Ye Tian as if to devour him.

“Spatial Distortion!”

Buzzzzzz!!

A terrifying spatial distortion spread out, covering the entire valley.

In an instant, the bodies of the island nation’s Emperors disintegrated into fragments, and even kilometer-long Emperor-level ferocious beasts turned into dust, all annihilated by the spatial distortion.

In a breath’s time, most of the Emperors were dead, leaving only a few seven-star Emperors and those at a farther distance alive.

“You’re courting death!”

The Shadowless Emperor was enraged.

Among the dead were not only the island nation’s emperors but also those from the Shadow Sect. Especially the Emperor with the invisibility talent – a treasure of the Shadow Sect – who was now dead by Ye Tian’s hand.

However, the Shadowless Emperor did not recognize Ye Tian, for Ye Tian had already disguised himself as a humanoid dragon.

Of course, as he fought, his identity would eventually be exposed, as his talents would be revealed. Even if his appearance was different, he would still be recognized.

But to deceive for even a moment was enough.

This time.

Ye Tian did not use his sword skills, as that would have immediately revealed his identity.

He used claw techniques instead!

Using claw techniques combined with the appearance of a humanoid dragon, he closely resembled a real dragon, except he lacked the pure aura of a dragon clan. Upon closer inspection, one could see the flaws.

But in the midst of battle, Long Chichi, bewildered, might not attack him.

Thus, Ye Tian only needed to withstand the attack of the Shadowless Emperor alone.

“Great Tearing Divine Claw!”

Ye Tian lunged with a claw.

Boom!!!!

Five cyan claw lights tore through, clashing with the Shadowless Emperor’s palm strike.

In an instant, the valley turned to ashes, and a hundred thousand kilometers of land shattered.

After the strike, Ye Tian teleported away, pushing his teleportation speed to the extreme.

The Shadowless Emperor chased after him, but every time he was about to catch up, a spatial confinement would descend, slowing him down. Accelerating again took time, and he was delayed.

In a blink, Ye Tian was gone.

Elsewhere.

Long Chichi muttered, “A humanoid dragon, who is that? There’s no such person among the dragons who came this time! And he doesn’t have the aura of a dragon clansmen. Could he be fake? No, the technique he just used was our clan’s Great Tearing Divine Claw, a renowned god-level claw technique of the dragon clan. It’s unlikely that humans on Earth could have our god-level claw technique.”

After much thought, he still couldn’t figure it out.

But even if he did, it was too late to chase after the wondrous object, as the other party had long disappeared.

“The mission failed, I must report back!”

Long Chichi left.

The few surviving island nation Emperors were helpless. They had thought to assist the Shadow Sect in obtaining the wondrous object and share in the spoils. They hadn’t gained anything, yet so many Emperors died, not even leaving behind corpses.

“Let’s go back, back, I won’t fight for the wondrous object anymore!”

One Emperor-level roared.

Ye Tian’s spatial distortion had thoroughly frightened him. He felt like an ant under such an attack; if he hadn’t been a bit farther away and not involved in the battle, he would have died too.

He was lucky this time, but what about next time?

The other Emperors were also scared and quickly returned to their Super Bases.

It was obvious that next time the Shadow Sect asked for their obedience, they might not be so willing.

Whoosh!

The Shadowless Emperor returned, his face gloomy.

Suddenly.

A voice came: “Shadowless Emperor, your Shadow Sect is too unscrupulous, shutting down the island nation’s teleportation array. Humph, you must have gotten your hands on that wondrous object, right? I’m very curious, what is that wondrous object?”

As soon as these words were spoken, an Emperor-level powerhouse appeared.

The Shadowless Emperor looked over and saw it was an old acquaintance – the Myriad Fire Emperor!

“Myriad Fire Emperor, I didn’t get that wondrous object!”

The Shadowless Emperor did not want to take the blame and spoke the truth.

Chapter 288: Portable Xumi Storage Realm!

“You didn’t get the wondrous object? Could it be from the Dragon Clan?”

The Myriad Fire Emperor was puzzled.

He didn’t doubt the Shadowless Emperor’s words because he knew the Shadowless Emperor had no reason to lie. Compared to their ultimate plan, these wondrous objects were just trivial.

Even the most precious wondrous objects didn’t need to be hidden. If they were obtained, they were obtained. There would be no infighting over them, as it would jeopardize their final plan, which no one could afford.

So, if the Shadowless Emperor said he didn't get it, then he didn't get it.

"It's unclear. It looked like a humanoid from the Dragon Clan, but there was no dragon aura on him. Moreover, that guy is also a Nine-Star Emperor, with space and invisibility talents. I couldn't catch up!" The Shadowless Emperor said.

"What exactly is the wondrous object that your Shadow Sect is going to such lengths for?"

The Myriad Fire Emperor asked again.

"It's the Mira Sutra!"

The Shadowless Emperor gritted his teeth and said.

"What, that wondrous object? That's a Nine-Star wondrous object that once caused huge ripples in the galaxy. How could the Mira Sutra be on Earth??" The Myriad Fire Emperor was shocked and even began to breathe rapidly.

"It's not the complete Mira Sutra, but a single page!" The Shadowless Emperor explained, "One of our God-level members in the Shadow Sect once brought back a small fragment of the Mira Sutra from deep space. It wasn't very useful, so we included it in this plan, using the world force of Earth to nurture this small piece of the Mira Sutra. Unexpectedly, it was a success. Just one page of the Mira Sutra is equivalent to a Six-Star wondrous object, but its value is comparable to a typical Seven-Star wondrous object!"

"A page of the Mira Sutra is also extremely precious. Humph, if your Shadow Sect had informed us or sent a demigod, it wouldn't have been stolen by others!" the Myriad Fire Emperor complained.

"Send a demigod??? Hehe, if our Shadow Sect deployed a demigod at this time, wouldn't the Dragon Clan also send one? What then?" The Shadowless Emperor retorted.

Originally, the Shadow Sect's plan was perfect. He was to block the Nine-Star Emperor level of the Dragon Clan, while Li Yun, using his invisibility, snatched the Mira Sutra. Who could

have predicted someone else was also invisible nearby, leading to the failure of their foolproof plan.

“Alright, since the wondrous object has been taken by someone else, I’ll leave now!”

The Myriad Fire Emperor turned and left, quickly disappearing from sight.

The Shadowless Emperor secretly gritted his teeth. This time, not only did they lose the Mira Sutra, but the Shadow Sect also lost face. He would surely be punished upon his return.

“Damn Dragon Clan, next time I see you, I must kill you!”

The Shadowless Emperor swore secretly.

But it was just a thought; as a fellow Nine-Star Emperor level, he couldn’t really kill Ye Tian.

...

After Ye Tian shook off the Shadowless Emperor, he teleported away repeatedly.

Soon, he returned to the Tian Pavilion in Zhonghai Super Base.

Activating the array, Ye Tian entered the cultivation chamber and took out the golden page from his chest.

The golden page unfolded, revealing mysterious characters.

Ye Tian gazed at the golden page and quickly entered a world of characters. Countless mysterious characters appeared before him. Each one was profound.

“The Mira Sutra!”

This was the consciousness conveyed by the golden page.

High-level wondrous objects contained a certain consciousness, through which one could understand the use of the wondrous object.

Ye Tian's consciousness contacted that of the Mira Sutra, and he quickly learned the origin of this wondrous object.

"It's actually a page of the Nine-Star wondrous object, the Mira Sutra, just one page reaching the level of a Six-Star wondrous object! Strange, is the Mira Sutra on Earth?" Ye Tian wondered.

But, the script wasn't from Earth. It was just a fragment and didn't seem like it was newly nurtured. Instead, it seemed like someone had left a fragment of the Mira Sutra on Earth to nurture, which eventually succeeded.

The Dragon Clan loved to nurture wondrous objects.

For example, the Enlightenment Stele was nurtured by the Dragon Clan using the world force of the Ape Dragon Beast World.

"If I'm guessing correctly, were these wondrous objects intentionally nurtured by those external forces???"

Ye Tian suddenly thought.

That's right!

How could Earth suddenly produce so many wondrous objects? If they were intentionally nurtured by external forces, then it's not surprising. This page of the Mira Sutra is likely related to the Shadow Sect.

"How could Earth suddenly give birth to so many wondrous objects? If they were intentionally cultivated by those external forces, then it's not surprising. And this page of the Mira Sutra is likely related to the Shadow Sect."

“Looks like I must execute my plan now. I’m already a Nine-Star Emperor. If I capture an Eight-Star Emperor from an external force, I should be able to hypnotize them and extract some secrets.” Ye Tian thought.

After pondering for a while, he secretly formulated a plan.

“But, the Mira Sutra is truly a great item!”

Ye Tian looked at the page of the Mira Sutra, his face full of smiles.

Because this page of the sutra recorded a secret technique, a complete secret technique – the Xumi Storage Realm Technique!

The Xumi Storage Realm Technique was a type of spatial secret technique. Any martial artist with top-level spatial talent could cultivate this technique. Once mastered, it allowed the creation of a special Xumi Storage Realm.

This Xumi Storage Realm was different from ordinary storage spaces. It can store living beings and even wondrous objects, whereas ordinary storage spaces cannot.

The space of the War God’s Stele in the War God Tower is a type of space similar to the Xumi Storage Realm.

“Hahaha, I was just worrying about how to store wondrous objects, and now the Xumi Storage Realm Technique has been delivered to me. With my spatial prowess, it shouldn’t take long for me to master the Xumi Storage Realm Technique!” Ye Tian was very confident in himself.

In the following days, Ye Tian began studying the Xumi Storage Realm Technique.

Soon, he discovered that the Xumi Storage Realm Technique had a certain connection with spatial compression. Without knowledge of spatial compression, it would probably be difficult to master the Xumi Storage Realm Technique. It involved segmenting a piece of space and using a spatial secret technique to compress it into a Xumi Storage Realm.

This Xumi Storage Realm can merge with objects containing spatial power or with one’s own personal space, forming a portable Xumi Storage Realm.

“I can compress space, so I should be able to quickly master the Xumi Storage Realm Technique, probably in no more than ten days!”

Ye Tian guessed.

In the blink of an eye, ten days passed.

On this day.

Ye Tian went to the wilderness, looking for a secluded place.

He had already mastered the Xumi Storage Realm Technique. This time, he was going to segment space to refine a Xumi Storage Realm. The process was likely to be quite loud, so naturally, he couldn't do it inside the base.

Ye Tian invoked his spatial power and deployed the Xumi Storage Realm Technique, abruptly tearing a small, tiny rift in space.

Boom!!!!!!

A segment of space began to separate sharply under the Xumi Storage Realm Technique. The technique, like a scalpel, was cutting deep into space, separating a piece of space from the whole.

In a short while, an immense space was segmented, temporarily separated from the rest.

But this was just the beginning!

If the space was not compressed in time to form a Xumi Storage Realm, the segmented space would heal back into the whole.

“Compress!”

Ye Tian exerted his control over the spatial power and the Xumi Storage Realm Technique, furiously compressing the space.

Crack crack crack!!!!!!

The space kept compressing, and a black dot appeared in front of him. The dot slowly grew larger. It seemed to be expanding, but it was actually shrinking, as the piece of space was separating from the whole.

Half an hour later.

A black hole appeared in the space in front of him. Soon, this black hole began to heal, much like a piece of flesh being removed from a body and then healing.

This piece of flesh was akin to the space Ye Tian had now segmented.

Boom!!!!!!

The segmented space was finally compressed into a Xumi Storage Realm, appearing in front of him as a small light orb.

But this light orb was very unstable.

“Merge!”

Ye Tian controlled the Xumi Storage Realm to slowly merge with his personal space.

Under his consciousness, he clearly sensed that after merging the Xumi Storage Realm with his personal space, it was undergoing a crazy transformation.

By this time, everything in his personal space had been taken out, otherwise, everything inside would have been crushed into nothingness by the spatial power.

A few hours later, the personal space finally completed its transformation and became a complete portable Xumi Storage Realm.

...

Xumi means something like “(adj) unreality in reality”, I think.

Chapter 289: Target: Blood Blade Demon Emperor!

“I’ve finally created a portable Xumi Storage Realm!”

Ye Tian revealed a satisfied smile.

Then, he began to experiment.

He took out the Mira Sutra, which he carried with him, and said, “Store!”

The Mira Sutra vanished in a flash and was perfectly stored within the portable Xumi Storage Realm.

“Indeed, wondrous objects can be stored in the Xumi Storage Realm, making things much more convenient in the future!”

Ye Tian smiled.

Immediately after, he stored all the items he had previously moved into the portable Xumi Storage Realm.

However, he didn’t leave just yet; he planned to refine another Xumi Storage Realm for his wife, Empress Yue.

Thus, he took out a grey stone, a Space Stone containing spatial attributes.

He intended to use this Space Stone, along with the Xumi Storage Realm technique, to create a Xumi Ring. This would make storing items much more convenient. Some items that couldn't be stored in a storage bag could now be kept in the Xumi Ring.

For instance, if Empress Yue encountered a wondrous object in the future, she could naturally store it in the Xumi Ring, keeping it hidden from others.

Otherwise, carrying around larger wondrous objects would be too conspicuous.

Half a day later.

A Xumi Ring appeared in Ye Tian's hand, and a tired smile crossed his face.

Refining the Xumi Storage Ring was no easy task. It greatly drained his spirit and yuan force. Fortunately, he had broken through his body's limit eleven times, and his yuan force far exceeded that of a regular Emperor-level practitioner. Otherwise, he couldn't have endured refining two Xumi Storage Realms.

Whoosh!

Ye Tian returned to Zhonghai Super Base, rested for a while in the Tian Pavilion, and then went to the Moon God Sect to see Empress Yue.

"Lord Husband!" (yk in ancient China the man is the lord of the house)

Empress Yue, busy with the affairs of the Moon God Sect, dropped everything and ran over.

"Yue'er, I've brought you a gift!"

Ye Tian joyfully took out the Xumi Ring.

"Is this a space ring?"

Empress Yue asked with some confusion.

“This is a Xumi Ring!” Ye Tian explained, “The Xumi Ring is made by cutting off a piece of space and fusing it with a Space Stone. It’s just like the space we live in, hence it can store anything, even wondrous objects and other special items!”

“A Xumi Ring... so there’s actually such a treasure!”

Empress Yue joyfully accepted the gift.

Why would she be polite about a gift from her own husband!

“Come, let me put it on for you!”

Ye Tian personally put the Xumi Ring on Empress Yue, reminiscent of the time he put a wedding ring on her.

At that moment, Empress Yue’s heart was filled with happiness.

Soon after, Ye Tian stayed at the Moon God Sect for a few hours before leaving.

Empress Yue was very busy during this time, as she needed to handle many affairs of the Moon God Sect; otherwise, the vast Moon God Sect would inevitably fall into chaos.

Several days passed.

Ye Tian was ready to execute his plan — to secretly attack an eight-star Emperor from an external power, then hypnotize him to obtain what he wanted.

But this plan had to be extremely cautious. Any mistake, and he would be in trouble.

Among the external forces, there must be demigods stronger than nine-star Emperor-level practitioners. These demigods, transformed from eight or nine-star Emperors, had strength many times more terrifying than some God-level beings.

Thus, once he was exposed, he might attract the pursuit of demigods.

Ye Tian had already decided on his target: he planned to strike at the Shadow Sect, and had chosen a particular eight-star Emperor-level practitioner from them — the Blood Blade Demon Emperor.

From the title alone, the Blood Blade Demon Emperor seemed formidable, and indeed he was.

The Blood Blade Demon Emperor had a great reputation, earned through slaughter. In several previous battles for wondrous objects, he had killed many Emperor-level beasts, even claiming the lives of three members of the Dragon race.

For this reason, the Dragons harbored deep hatred towards the Blood Blade Demon Emperor. Ye Tian still planned to disguise himself as a Dragon to attack the Demon Emperor, making it a reasonable frame-up against the Dragons.

Of course.

His choice of the Blood Blade Demon Emperor was also because the latter wasn't currently in the Earth Immortal Realm, nor in Earth's native world, but in a ferocious beast world.

The ferocious beast world and Earth were on two different planetary worlds, making information transmission and calling for reinforcements inconvenient.

Ye Tian knew of the Blood Blade Demon Emperor's whereabouts because many warriors from the Tian Pavilion were scattered across various super bases, secretly tracking the movements of all Emperor-level beings. The Blood Blade Demon Emperor's fame was so great that his entrance into a ferocious beast world was widely reported.

"Blood Blade Demon Emperor, it's you!"

Ye Tian first disguised himself as an unfamiliar Emperor-level practitioner, then traveled through teleportation arrays, finally arriving at Oye Super Base in the Northern Bear Country region.

Nowadays, the super bases of various countries, under the influence of external forces, had interconnected their teleportation arrays. Since the technology of top-level teleportation arrays was provided by external forces, and many countries' super bases were established with support from these forces, they naturally wouldn't refuse their proposals. Moreover, interconnecting teleportation arrays was beneficial for all super bases, so why refuse?

Whoosh!

Stepping out of Oye Super Base, Ye Tian saw many blond-haired, blue-eyed humans.

His arrival didn't attract much attention, as super bases housed all sorts of people. Even in Oye Super Base, there was no shortage of people from the East.

Moreover, as an Emperor-level practitioner, Ye Tian was not someone ordinary people would dare to gossip about.

Oye Super Base was also responsible for guarding a five-star spatial rift. This rift led to the Ice and Snow Ferocious Beast World, named so because it was always covered in ice and snow, and the ferocious beasts within were mainly of the ice, water, and snow types.

Ye Tian didn't rush into the Ice and Snow Ferocious Beast World. As he wasn't an Emperor of the external forces, entering other super bases' ferocious beast worlds would be overstepping boundaries.

The Blood Blade Demon Emperor, being an Emperor-level practitioner of the Shadow Sect, had privileges and couldn't be stopped by warriors of Oye Super Base.

But as an Emperor-level practitioner from Zhonghai Super Base in Huxia, entering the Ice and Snow Ferocious Beast World was out of the question. Unless Oye Super Base couldn't withstand a ferocious beast onslaught and called for help.

However, Ye Tian had his ways.

He easily hypnotized an Emperor who was evil, disguised himself as an Emperor-level ferocious beast, and followed him, smoothly entering the Ice and Snow Ferocious Beast World.

Not long after.

Deep in the Ice and Snow Ferocious Beast World, Ye Tian reverted from his disguised state to his original form, killing the Emperor-level practitioner from Oye Super Base to prevent his own information from leaking.

Next, he began to search for the Blood Blade Demon Emperor!

The Blood Blade Demon Emperor would be easy to recognize, dressed in a blood robe and wielding a blood blade weapon.

However, given the vast size of the ferocious beast world, searching alone would probably be slow.

So.

Ye Tian used his Contract Talent to make contracts with a bunch of Emperor-level ferocious beasts, having them disperse to help him find the Blood Blade Demon Emperor.

Time passed, and the next day, one of the Emperor-level ferocious beasts returned.

“Master, we found the Blood Blade Demon Emperor!”

The Emperor-level ferocious beast reported.

Ye Tian stood up, a smile on his face: “Found him, huh? That’s great!”

Chapter 290: Yuan Realm! Chaos Yuan Qi!

“Lead the way!”

Ye Tian commanded the Emperor-level ferocious beast.

“Yes, Master!”

The Emperor-level ferocious beast flew towards a direction, with Ye Tian following behind.

After a long time.

The Emperor-level ferocious beast finally arrived at an ice lake, which was completely dried up, devoid of both water and ice. The surrounding earth was also shattered into countless pieces.

Clearly, a great battle had just taken place here.

“Master, that person was just fighting with many Emperor-level ferocious beasts right here. I saw it and immediately came to report!”

The Emperor-level ferocious beast explained in fear.

“I understand!”

Ye Tian nodded.

The Blood Blade Demon Emperor had just slaughtered a group of Emperor-level ferocious beasts here. However, the killing was too swift, causing this Emperor-level ferocious beast to bring him here a step too late.

However—

“I still caught your scent. Blood Blade Demon Emperor, you can’t escape!”

Ye Tian activated his tracking talent and began tracking with a wisp of the Blood Blade Demon Emperor’s scent.

As for those controlled Emperor-level ferocious beasts, he let them all go, without killing them.

This ferocious beast world was not in Zhonghai Super Base; it was the warriors from Oye Super Base who were in charge of guarding it, and he had no obligation to kill ferocious beasts for the warriors of Oye Super Base.

His only purpose in coming here was to capture the Blood Blade Demon Emperor.

Swoosh!

Ye Tian did not conceal his speed and pursued the Blood Blade Demon Emperor.

At the moment, he had disguised himself as a humanoid Dragon Race powerhouse.

Soon.

Ye Tian sensed the aura of the Blood Blade Demon Emperor. Similarly, the Blood Blade Demon Emperor also sensed Ye Tian's arrival.

In the distance.

The Blood Blade Demon Emperor stopped slaughtering the group of Emperor-level ferocious beasts and looked towards Ye Tian.

“An Emperor is approaching!”

The Blood Blade Demon Emperor muttered.

He did not leave; as an eight-star Emperor-level powerhouse, he only feared nine-star Emperor-level beings. There were only a few nine-star Emperors on Earth, and those who could enter the Ice and Snow Ferocious Beast World were only nine-star Emperors from external forces.

During the cooperation period, other sect forces would not dare to attack him, so he had no fear.

In the blink of an eye, Ye Tian arrived!

“A humanoid dragon? Strange, why would the Dragon Race come here, and how did they evade the warriors and arrays of Oye Super Base?” The Blood Blade Demon Emperor wondered, but then his face showed murderous and even excited intent.

“The Dragon Race is even better. If I can absorb enough Dragon Race blood, my demonic technique might be able to reach the major completion realm. I can use this opportunity to break through the fifteenth physical limit!” The Blood Blade Demon Emperor laughed crazily.

He came to the ferocious beast world to hunt ferocious beasts, collect their blood, and use countless ferocious beast blood to cultivate his demonic technique. However, the blood of the Dragon Race was many times better than that of the average Emperor-level ferocious beast.

Previously, although he had killed a few Emperor-level Dragon Race, it was in public. He dared not collect the blood of those dragons, fearing that he would completely enrage the Dragon Race.

But now it was different, this humanoid Dragon Race had come to him, and killing him would go unnoticed.

The only strange thing was that there was no dragon might or dragon aura on this humanoid Dragon Race.

“Perhaps he used a special technique to hide his aura!”

The Blood Blade Demon Emperor guessed.

“Die!”

The Blood Blade Demon Emperor made his move.

A blood blade cut through the void, aiming at Ye Tian.

His eight-star Emperor-level strength was unleashed. It was even far beyond the ordinary eight-star Emperor-level strength.

His speed was very fast, so fast that a seven-star Emperor-level powerhouse would not be able to react in time and would be killed instantly.

However.

His expression suddenly changed as the space around him was abruptly frozen.

Bzzzz!!!

The void vibrated, and layers of shock waves affected his body.

“Pseudo-Mystic level space talent!!!”

The Blood Blade Demon Emperor’s face slightly changed, the opponent’s space talent was very powerful, even capable of hurting him.

And under the spatial confinement, his prided speed was greatly restrained.

At this moment.

Ye Tian unleashed a Legendary-level sword technique, slicing off one of the Blood Blade Demon Emperor’s arms with a swift strike.

Nine-star Emperor-level against an eight-star Emperor-level –even without using God-level sword techniques and claw skills, Ye Tian could still easily overpower the Blood Blade Demon Emperor.

“Blood Explosion Technique!”

The Blood Blade Demon Emperor's body exploded into a cloud of blood mist, scattering in all directions.

This was an escape technique. Clearly, the Blood Blade Demon Emperor knew he was no match for Ye Tian and was attempting to flee.

“Escape? You cannot escape!”

“Time Slowdown!”

A wave of worldly fluctuations affected the small area where the Blood Blade Demon Emperor was, slowing down time tenfold. Under the influence of the time talent, the Blood Blade Demon Emperor's speed seemed extremely slow to Ye Tian.

“Spatial Compression!”

Boom!

The space continuously compressed, and the clouds of blood mist were pushed back.

Pfft!

The Blood Blade Demon Emperor reverted to his original form, spitting out a mouthful of fresh blood.

He looked at Ye Tian in terror, filled with immense fear.

“Who exactly are you?”

The Blood Blade Demon Emperor asked.

“You don't need to know!”

Ye Tian said indifferently.

Then, Ye Tian activated his Soul Spike and Soul Spear talents.

Pfft, pfft, pfft!

The Blood Blade Demon Emperor's soul was struck hard repeatedly, quickly becoming extremely weak, reducing his combat strength to less than one percent of before.

“Hypnosis!”

Ye Tian used his hypnosis talent to begin hypnotizing the Blood Blade Demon Emperor. With his soul heavily damaged, the Blood Blade Demon Emperor was unable to resist Ye Tian's hypnosis talent and was easily hypnotized.

“Blood Blade Demon Emperor, I ask you, have you sworn an oath not to reveal secrets, else face complete annihilation? If so, only speak of what you can!”

Ye Tian inquired.

He didn't want to cause the Blood Blade Demon Emperor to die on the spot by asking something he shouldn't, which would be troublesome.

“I indeed swore an oath. Once certain secrets are revealed, I can never ascend to God level in the future!”

The Blood Blade Demon Emperor said.

“Oh, if it's that kind of oath, then there's nothing to worry about!” Ye Tian didn't care about the Blood Blade Demon Emperor's future path, as long as he didn't die now.

So, Ye Tian asked what he most wanted to know: “Blood Blade Demon Emperor, what is the real purpose of the Shadow Sect, Glory Pavilion, and other external forces coming to Earth?”

The Blood Blade Demon Emperor didn't hesitate to answer: "The real purpose is the Yuan Realm!"

"Yuan Realm? What is that?"

Ye Tian's heart stirred, realizing this was a big secret, and was thus full of anticipation.

"The Yuan Realm is a special space, or you can say a world. The Yuan Realm is extremely rare, even in the universe, and belongs to an incredibly rare spatial world. It's said that the Yuan Realm is related to very mysterious legends. Even I'm not clear on them. Many years ago, a Yuan Realm appeared on Earth. When a Yuan Realm is newly born, it nourishes the planetary world, reviving the world's yuan qi. But once that period passes, the Yuan Realm will absorb the scattered yuan qi, causing the planetary world to fall into a state of yuan qi deficiency or even a yuan qi-less era. Once the cycle repeats nine times, the Yuan Realm would be fully matured, becoming a real Yuan Realm; before that, it can only be called a nascent Yuan Realm!" The Blood Blade Demon Emperor explained.

"What does the Yuan Realm have to do with your plans?"

Ye Tian continued to ask.

The Blood Blade Demon Emperor replied, "The Yuan Realm is very useful, and its greatest use is to temper the body, helping Emperors break their physical limits. Normally, even treasures or wondrous objects struggle to help Emperor-level martial artists break the sixteenth physical limit, let alone the twentieth physical limit and receive the universe's gift. But the core yuan qi in the Yuan Realm, known as Chaos Yuan Qi, can help Emperors break the sixteenth, seventeenth, and even the eighteenth physical limit. Once a Yuan Realm is born, it always causes countless forces to battle, causing many sects to fall."

"What? The Yuan Realm has such effects!!!"

Ye Tian was truly astonished, finally understanding why the major external forces valued Earth so much, even plotting for so long. The reason turned out to be the Yuan Realm, and the so-called wondrous objects were merely incidental!
