

## Talent 291

### Chapter 291: The Secret and the Death of the Blood Blade Demon Emperor!

After numerous inquiries, Ye Tian finally gained a deeper understanding of the various external forces and the Yuan Realm.

Originally, during the ancient civilization era, various powers fought a prolonged war on Earth and their respective planets for control over the Yuan Realm.

In that war, many sects were annihilated, such as the Azure Sword Sect, which declined during that battle and gradually faded into obscurity over the years.

Initially, the major sects intended to stay on Earth and find ways to accelerate the growth of the Yuan Realm, but they were unsuccessful. However, they discovered a secret: when the Yuan Realm spewed Yuan Qi to nourish the Earth, the power of the world would also surge from the depths of the planet. If treasures were thrown into these surging points, there was a chance to create wondrous objects.

Thus, the major sects placed many treasures, leading to the current era of numerous wondrous objects emerging.

For the major sects, this was indeed an additional harvest.

When the Yuan Realm reabsorbed Yuan Qi, Earth entered a period devoid of Yuan Qi. The sects naturally couldn't stay on Earth to face extinction and, lacking a method to accelerate the Yuan Realm's growth, they reluctantly returned to their planets.

Fortunately, these sects were all located within the same galaxy and swore not to reveal this secret.

After returning, the major sects continued to study the Yuan Realm.

Over a hundred years ago, the powers devised a method to prematurely cause the Yuan Realm to spew Yuan Qi, reviving Earth not just ordinarily but thoroughly.

It was this thorough revival that caused Earth to expand to the level of a high-tier planetary world.

When Earth fully revived, the Yuan Realm's growth also accelerated. As the Earth absorbed materials from the starry skies, hastening its development, the Yuan Realm benefited as well.

However, this growth was abnormal, and the Yuan Realm would soon enter a state of depletion after its completion.

Normally, the top powers in the universe would protect the Yuan Realm if they discovered it, as it was a blessing for future generations.

Once the Yuan Realm developed naturally, if used wisely, it could sustain a power for many long years.

But the actions of these major powers was like forcibly stimulating the potential of the Yuan Realm, only allowing it to sustain their consumption for a very short time, possibly ten or a hundred years.

This approach wasn't necessarily bad, as they wanted to benefit from the Yuan Realm in their lifetime, unconcerned about countless generations to come!

After all, it was uncertain whether these sects would even exist in the distant future.

The most important thing was that this was their only chance to push their physical limits higher!

To break through the sixteenth, seventeenth, or even twentieth physical limit, becoming a Child of the Universe and receiving the universe's gift was a great opportunity that anyone would desire!

Emperors like the Myriad Fire Emperor and the Shadow Emperor, who were at the nine-star Emperor level, could have attempted to reach the God level. But why hadn't they tried to break into the God realm yet?

It was because they were waiting for the growth of the Yuan Realm, waiting for this opportunity!

All Emperors with Dawn-level or higher cultivation talents were waiting for their chance, with only those with Moonlight-level cultivation talents resigning themselves to become demi-gods, becoming the protectors of this plan.

The demi-gods of the major powers were forcibly elevated to eight or nine-star Emperor level using various treasures and then transformed into demi-gods.

Becoming a demi-god was their ultimate achievement, achieved by turning their bodies into divine bodies at a great cost.

Normally, those with Moonlight-level cultivation talents couldn't become demi-gods, but special methods made it possible, something ordinary powers couldn't achieve. These external powers paid a heavy price to stimulate the emergence of a few demi-gods!

After all, who with Dawn-level cultivation talents would willingly become a demi-god at this time? They had no choice but to proceed this way.

Once the Yuan Realm truly grew, the major powers' eight or nine-star Emperors would enter the Yuan Realm. Although it was unlikely to produce a Child of the Universe, the birth of several Sovereign Emperors or Supreme Emperors would mark the complete rise of their respective powers. It would even allow them to enter the bustling human star fields, becoming a major power renowned across the starry skies and leading their sects to become immensely powerful forces.

This was the ultimate hope of the external forces!

Furthermore, Ye Tian learned that 13 powers, belonging to 5 planetary worlds, had descended to Earth this time.

Originally, 25 powers from 10 planetary worlds were involved in the plan.

But over the years, some powers were annihilated, leaving only these 13.

These 13 forces were all extremely powerful, each having at least 15 God-level powerhouses. For this plan, the major powers frantically enhanced the potential and talents of their Emperors, depleting centuries of accumulation, thus giving birth to so many eight or nine-star Emperors.

However, there were not many Dawn-level talents in each force, about 10 or so.

Of course, even Moonlight-level Emperor strongmen had the opportunity to enter the Yuan Realm, and though they couldn't become God-level in the future, they could become stronger Emperors.

The Shadow Sect in this generation only had 11 Dawn-level talents, and the Blood Blade Demon Emperor was one of them...

"Unfortunately, after today, with the death of the Blood Blade Demon Emperor, the Shadow Sect will only have 10 Dawn-level talents left!" Ye Tian said indifferently.

"Die!" With one slash, Ye Tian obliterated the head of the Blood Blade Demon Emperor.

Immediately, the Blood Blade Demon Emperor fell and died.

After killing the Blood Blade Demon Emperor, Ye Tian returned.

This time, he transformed into the Blood Blade Demon Emperor and easily left the Ice and Snow Beast Realm.

...

Zhonghai Super Base.

Ye Tian returned without attracting anyone's attention.

He knew the death of the Blood Blade Demon Emperor couldn't be hidden for long and would soon be discovered, but the Shadow Sect would never find out it was his doing.

In the Earth Immortal Realm, at the headquarters of the Shadow Sect.

The soul tablet of the Blood Blade Demon Emperor shattered, and this was quickly discovered.

Upon learning this, the Shadowless Emperor of the Shadow Sect was extremely angry: “Who dares to kill an eight-star Emperor of our Shadow Sect!”

A meeting was convened!

At the meeting, an eight-star Emperor suggested, “I think this has to do with other sects. Although we all signed an agreement, there could be loopholes. Other sects might try to circumvent the treaty to act. The Blood Blade Demon Emperor was an eight-star Emperor; only a nine-star Emperor could prevent him from escaping. Earth’s native world has no nine-star Emperors, the strongest being only eight-star. Although the Dragon Clan has nine-star Emperors, the Blood Blade Demon Emperor died in the Ice and Snow Beast Realm, which the Dragon Clan likely can’t infiltrate. Only people from other sects can easily enter the Ice and Snow Beast Realm, so they are the most likely suspects!”

“Correct!” Another Emperor added, “According to our observations, the Yuan Realm is growing rapidly, and the day of its full maturation isn’t far. But this Yuan Realm was forcibly stimulated, and its potential is far less than a naturally evolved Yuan Realm. Once too many Emperors enter, we’ll benefit less, and other sects might want to eliminate some powerful Emperors.”

The Emperors expressed their opinions and argued.

At this moment, the Shadowless Emperor spoke, “Before the matter is confirmed, we must not jump to conclusions. The Blood Blade Demon Emperor died in the Ice and Snow Beast Realm. Check which Emperors entered the Ice and Snow Beast Realm today, and if anyone from other sects entered.”

The Shadowless Emperor, the only nine-star Emperor of the Shadow Sect, spoke with authority, and the other Emperors nodded and agreed, not daring to contradict his words.

After the meeting ended, the Shadow Sect began their investigation.

But they were destined not to uncover the truth!

## Chapter 292: Preparing to Leave, Eliminating Threats!

Tian Pavilion.

Ye Tian was pondering a question. Having learned about the existence of the Yuan Realm, he naturally wanted to enter it. Otherwise, he knew he couldn't break through the twentieth physical limit solely through his own efforts and resources.

In the universe, there were definitely many geniuses with supreme level cultivation talents. Many of them have better cultivation environments than him, but still couldn't break the twentieth physical limit.

If breaking the twelfth physical limit were that easy, then the title of "Son of the Universe" would be too easy to obtain.

Therefore, the Yuan Realm was Ye Tian's hope for breaking through the twentieth physical limit.

However, the Yuan Realm still needed some time to fully develop. According to the estimates of the thirteen sect powers, it would be another five years before the Yuan Realm fully matures.

But once the Yuan Realm matured, it wouldn't be easy for him to enter. He would have to confront external forces, and then he might face not just Nine-Star Emperors, but Demi-God level powerhouses!

The Demi-Gods sent by the thirteen external forces this time were all transformed from Eight or Nine-Star Emperors. Their strength was comparable to Sovereign Emperors, and he definitely was not their match.

Moreover, not only did he want to enter the Yuan Realm himself but also wanted his wife and sister to join him. For that, he must possess strength.

If he stayed on Earth, it would be difficult to copy stronger talents, and his growth rate would be too slow.

That was right!

He wanted to leave Earth and go to more powerful places to replicate more incredible talents, increasing his growth rate. Only then could he have the strength to contend with the Dragon Race and the thirteen sect powers before the emergence of the Yuan Realm.

He learned from the Blood Blade Demon Emperor that the Shadow Sect was merely a Five-Star level force. In the human territories, Five-Star forces were just small powers that had just stepped out of their planetary worlds and into the starry sky.

To be considered a Five-Star force, one must have a God-level powerhouse. A True God-level powerhouse was needed to be considered as a Six-Star force. Above that were Seven-Star, Eight-Star, and the legendary Nine-Star forces.

Forces like the Glory Pavilion and Shadow Sect were simply too weak compared to the real top human powers!

The resources on Earth, although temporarily sufficient for his cultivation, was not what he needed.

His growth thus far hadn't depended on resources, but on talents!

It had been a long time since he replicated a good talent. While he had collected some resources, his talent copying was being wasted.

Copying talents was his foundation; other opportunities were just extra.

That's why he wants to enter a broader sky to replicate better talents.

"From what I learned from the Blood Blade Demon Emperor, when Earth was still an ordinary planet, many forces built numerous teleportation arrays. On the Moon, they constructed an interstellar teleportation array that can travel to other planetary systems!" Ye Tian thought.

Earth was in the Solar System, a tiny planetary system in the Orion Arm, a small part of the Milky Way. The Milky Way was one of the many galaxies in human territory, which together form a star field.

This shows how small Earth is.

The Glory Pavilion, Shadow Sect, and the Solar System were only separated by the Centauri Planetary System. The distance was not very far, but there were cosmic storms between planetary systems that made it very difficult to cross. Without God-level strength, one would be torn to pieces by these storms.

However, the interstellar teleportation array could cross planetary systems, from one to another.

For example, the one on the Moon could transport someone to a planet in the Centauri Planetary System. From there they could go to the Pula Planetary System, where the Glory Pavilion, Shadow Sect, and other forces were located.

“The interstellar teleportation arrays in the Earthly Immortal Realm are controlled by the external forces. The one on the Moon was left as a contingency plan and is unguarded. I could use it to leave quietly!”

Leaving was easy, but Ye Tian couldn’t just leave like that. His wife and the Tian Pavilion he established were here.

Therefore, he must eliminate some threats, like the Golden War Emperor.

The Golden War Emperor was a Eight-Star Emperor, but there were no Eight-Star Emperors in Huaxia yet. Furthermore, he once competed with the Golden War Emperor for the Qinglong Wood and injured him. If the Golden War Emperor came for revenge later, no one in Zhonghai Super Base would be able to stop him.

Thus, one day.

Ye Tian disguised himself and went to the West of Earth.

The Golden War Emperor usually trained hard in the War God Temple and only left when a wondrous object appeared. During this period, with the continuous emergence of such objects, the Golden War Emperor often departed.

His departure point from the Earthly Immortal Realm to Earth was the Western Oushan Super Base.

Ye Tian stealthily hid near Oushan Super Base, waiting for the Golden War Emperor to emerge, planning to secretly track and ambush him. Since Ye Tian had already become enemies with the Golden War Emperor, having killed his son, he reasoned it would be better to eliminate the Golden War Emperor now than to face him later in a life-or-death battle.

A day passed.

Then two days.

On the third day, a figure flew out of Oushan Super Base, turning into a golden light heading south.

“Golden War Emperor, you’ve finally come out!” Ye Tian followed stealthily.

Arriving at a deserted mountain range, Ye Tian revealed himself, using a spatial confinement to stop the Golden War Emperor. This time, Ye Tian didn’t reveal his true face but disguised himself as a humanoid dragon race warrior.

“Dragon race!” The Golden War Emperor, seeing the dragon race, became alert.

“What do you want, dragon race warrior?” The Golden War Emperor readied his Moonlight-level spear, prepared for battle.

“Your life– I want it!” Ye Tian declared domineeringly.

Without further words, the battle began.

“Soul Spike!” A soul attack descended, annihilating a small part of the Golden War Emperor’s soul.

“Ah!!!” The Golden War Emperor screamed in pain, his movements slowing.

Seizing the moment, Ye Tian activated his time talent — Time Stasis!

Buzz!!! Time momentarily froze, and the Golden War Emperor’s body seemed to be fixed in the void.

“Great Tearing Divine Claw!” A God-level claw technique descended, grabbing the head of the Golden War Emperor and crushing it with a fierce squeeze.

With a bang, the Golden War Emperor, utterly defenseless, was crushed by Ye Tian’s move and died on the spot.

What seemed like a long time actually happened in an instant.

Killing a Eight-Star as a Nine-Star was too easy!

After killing the Golden War Emperor, Ye Tian teleported away, erasing all traces of his presence.

Soon after, he sneaked into a super base, disguising himself as an ordinary Emperor and, after several teleportations, finally returned to Zhonghai Super Base.

The assassination plan was perfectly executed!

Shortly after Ye Tian left, a Nine-Star Emperor arrived.

He was from the War God Temple’s backing sect power — the Crazy Sect, also known as the Battle Crazy Emperor, one of the Nine-Star Emperors.

The Battle Crazy Emperor arrived at the scene, his expression solemn upon seeing the Golden War Emperor's corpse.

"He was killed by a claw technique that crushed his head. Strange, with the Golden War Emperor's Eight-Star strength, how could he be so easily caught? Could the opponent's strength have reached the pinnacle of Nine-Star level?"

"No, it must have been some kind of constriction talent that immobilized the Golden War Emperor, allowing for a one-hit kill!"

The Battle Crazy Emperor, not saddened but rather angered by the Golden War Emperor's death, saw the killing as a direct affront to the Crazy Sect.

"Search!" he commanded.

Whoosh whoosh whoosh!!!

Several black-clothed Emperor-level figures appeared, bowing in response: "Yes!"

Chapter 293: One of the Nine Main Planets of the Milky Way - Silver Universe Star!

Ye Tian's assassination was flawless, leaving the Battle Crazy Emperor clueless about who killed the Golden War Emperor.

With the death of the Golden War Emperor, Ye Tian finally felt at ease.

Thus, he announced that he would be entering a long period of seclusion.

Many emperors were seeking wondrous objects and had no interest in Ye Tian's seclusion.

Tian Pavilion.

Ye Tian and Empress Yue had a long heart-to-heart talk.

“Yue’er, I plan to leave Earth for a while!” Ye Tian began.

“To cultivate in the Beast World?” Empress Yue asked casually.

“No!” Ye Tian shook his head and candidly said, “I’m not just entering Earth’s realms, but I intend to travel to other planetary systems for a period of time using the interstellar teleportation array.”

Empress Yue was stunned!

She hadn’t expected Ye Tian to embark on a journey through the stars. Caught off guard and panicked, she didn’t know what to say to dissuade Ye Tian.

Sensing Empress Yue’s emotions, Ye Tian embraced her and softly said, “Don’t worry, I’ll be back in at most five years. Our lifespans are so long, five years is nothing. The reason I’m leaving is that progress on Earth is too slow. Earth will soon encounter an incredible opportunity, and I want to take you and Little Yu with me. Therefore, I must gain even greater strength!”

He then explained the situation in the Yuan Realm.

After hearing Ye Tian’s story, Empress Yue, unable to let go, said, “I shouldn’t stop you, but I really can’t bear your absence for five whole years; it’s too long!”

Empress Yue hugged Ye Tian tightly, her face full of reluctance.

“Yue’er, be good. Only by becoming stronger can we always be together. During my absence, don’t seek wondrous objects or inquire about the Yuan Realm. Just focus on cultivation here. When I return, I hope you will have broken through your eighth or even ninth physical limit,” Ye Tian said, touching Empress Yue’s upturned nose and pinching it.

“I understand!”

Empress Yue gave Ye Tian a glance and then snuggled into his arms again, savoring the moment of warmth.

Before leaving,

Ye Tian left most of the resources he had collected with Empress Yue, even part of the Divine Talent Elixir, keeping only some as a reserve for himself.

After all preparations were complete, Ye Tian prepared to break through the thin membrane above Earth's sky, the protective layer of Earth, which only those with God-level could penetrate to enter the cosmos.

However, Ye Tian's attack power far exceeded that of an average God-level expert, enabling him to break through this layer.

There were many emperors on Earth capable of breaking this membrane, but none did, unable to endure the loneliness of space. Without proper coordinates and directions, one could fly in space forever without encountering a life-sustaining planet.

Why then leave Earth?

Ye Tian wouldn't have left if he hadn't known about the interstellar teleportation array on the Moon.

“Great Tearing Divine Claw!”

Ye Tian unleashed his God-level strength talent and God-level claw technique, tearing at the membrane.

With a rip,

he tore open a few meters long slit in the membrane.

Ye Tian moved swiftly, passing through the slit, leaving Earth and entering the cosmos.

In space,

Ye Tian initially struggled to adapt, as he was used to breathing air and suddenly found himself in a place without any. However, he quickly adjusted.

At his level, oxygen was unnecessary, and even food wasn't needed. He could survive indefinitely on his own energy.

Swoosh!

Ye Tian oriented himself and flew towards the Moon.

Soon, he arrived at the Moon!

Compared to Earth, the Moon now seemed so small and fragile.

Standing on the Moon, Ye Tian felt he could easily shatter the entire satellite.

His divine consciousness swept over the Moon, quickly locating the interstellar teleportation array hidden in an underground space.

Ye Tian used his Earth Escape talent to enter this underground space and reached the teleportation array.

After inspecting it, he confirmed that the array was intact and connected to numerous coordinates.

However, many coordinates were dim, indicating that the corresponding teleportation arrays were damaged and unusable.

Ye Tian selected a coordinate for the Centauri system, entered it, and then embedded a large number of Yuan Qi stones into the array, approximately ten thousand.

With a thought, he activated the interstellar teleportation array.

Boom!

A powerful spatial force pierced through the cosmos, enveloping Ye Tian and transporting him to another planetary system.

Ten minutes later, the teleportation ended.

Ye Tian found himself in a new place, dazzled by the sudden change.

He was in a vast teleportation hall with more than one interstellar teleportation array.

Stepping out of the teleportation hall, Ye Tian saw an incredibly bustling city.

In the sky, various flying vehicles moved in an orderly manner. Dense interstellar tracks connected this planet, and in space, numerous cosmic ports harbored many spaceships.

“This planet’s technology is really advanced!” Ye Tian thought to himself.

This planet seemed like a highly advanced civilization from a sci-fi movie, possessing high-tech advancements not found on Earth. The planet was also home to many martial practitioners.

There were emperors, saints, and even god-level experts.

Ye Tian, having used his Copy talent to cover a radius of a hundred thousand li, sensed a Dawn-level cultivation talent.

How could a planet with god-level experts not have a Dawn-level cultivation talent?

However, this planet was merely a transit point for him, not a place for a long stay.

Ye Tian spent a few days on this planet, learning that it was planet G26 in the Centauri system, one of the seven civilized planets in the system, with a few god-level experts, but not many.

Resource-wise, the Centauri system was quite barren, but it had trade relations with some powerful planetary systems and even had a rough space map.

Ye Tian purchased a map, studied it, and finally chose his ultimate destination –

One of the nine main planets of the Milky Way, Silver Universe Star.

The center of the Milky Way housed a massive black hole, around which revolved the nine main planets. These planets were many times larger than regular planets and teemed with powerful beings. Even god-level powerhouses dared not act recklessly there.

Silver Universe Star, as one of the nine main planets of the Milky Way, was a coveted training ground for countless martial practitioners. But, not just any martial practitioner could enter Silver Universe Star.

Unfortunately, G26 was too insignificant to even know how to access Silver Universe Star.

Thus,

Ye Tian stayed only a few days on G26 before using the interstellar teleportation array to continue towards Silver Universe Star.

After half a month and passing through seven or eight planetary systems, Ye Tian finally arrived at the Zihuan planetary system.

Zihuan was a relatively powerful planetary system within the Milky Way, and Ye Tian arrived at its main planet, a high-level world – Zihuan Star.

Zihuan Star was bustling, where god-level experts could occasionally be encountered and were not shunned.

It was said that the rules of Zihuan Star had been altered by its master, allowing external god-level beings to enter easily.

Here, Ye Tian finally learned about Silver Universe Star and how to access it.

## Chapter 294: Arrival at Silver Universe Star!

There were many ways to enter Silver Universe Star, but two were the most direct.

To be a genius or a powerhouse!

Silver Universe Star warmly welcomed both geniuses and powerhouses. They could obtain the Silver Universe Star identity proof and officially become a part of Silver Universe Star.

The so-called geniuses were those with high potential who have not yet fully developed, while powerhouses referred to those above the God level. Both qualified to enter Silver Universe Star.

However, many God-level powerhouses are reluctant to become part of Silver Universe Star, as their status there wouldn't be high, unlike the comfort they enjoy on other planets.

Those who truly wanted to squeeze into Silver Universe Star were geniuses seeking higher achievements.

At Zihuan Star, there was a Silver Universe Star recruitment office for geniuses from various worlds in the Milky Way.

On this day,

Ye Tian arrived at the Silver Universe Star genius recruitment office.

The Silver Universe Star genius recruitment office was an incredibly grand palace. Ye Tian paid a certain fee and registered for the genius assessment.

The fee is charged to filter out those who participate in the assessment out of boredom. Otherwise, everyone would join, overburdening the staff.

“Come back in three days with this badge for the assessment!”

An Emperor-level staff member handed a badge to Ye Tian.

Ye Tian took the badge and left.

Three days later, Ye Tian returned to the Silver Universe Star genius recruitment office, badge in hand, and entered.

Inside a splendid hall,

Many warriors gathered, including Saints and Emperors, but no Gods.

Only those below the God level could be referred to as the ‘younger generation’, eligible for the title of genius.

Ye Tian stood in the hall, activating his talent copying ability to survey everyone’s talents.

However, a mysterious rule power suppressed his talent copying, shrinking its range to a very small area.

“A hundred meters!”

Ye Tian frowned.

Such severe suppression of his talent copying indicated that the array at the Silver Universe Star genius recruitment office was powerful and contained terrifying rule power, far beyond the reach of forces like the Glory Pavilion.

“A hundred meters is still usable!”

Ye Tian thought to himself.

Whoosh!

As soon as his talent copying covered the area, he thoroughly probed the talents of the warriors within a hundred meters.

Moonlight-level talent!

Dawn-level talent!

Dawn-level talent!

Most warriors here possessed Dawn-level cultivation talents, with a few having Moonlight-level. However, those few with Moonlight-level talents also had other special talents, like array master or alchemy talents. Those without significant talents wouldn't embarrass themselves by coming here.

Ye Tian walked around the hall, examining everyone's talents, but didn't find any exceptional ones, not even a Supreme-level cultivation talent.

Clearly, Supreme-level cultivation talents were rare in the Milky Way and not easily encountered.

After about half an hour, a God-level powerhouse arrived.

"Follow me."

The God-level powerhouse spoke briefly and then left.

The other Emperor-levels followed, quickly arriving at various teleportation gates.

"This is where you'll undergo different assessments. You've registered for the genius assessment, which requires you to meet Silver Universe Star's standards in at least one area, such as alchemy, array, or combat. Of course, if anyone among you possesses a Supreme-level cultivation talent, you can bypass the assessment and directly enter Silver Universe Star!"

The God-level powerhouse explained.

“Supreme-level cultivation talent!”

Ye Tian hesitated, unsure whether to reveal his Supreme-level cultivation talent.

But after careful thought, he decided against it.

Supreme-level cultivation talent was not considered top-notch in Silver Universe Star. Revealing it wouldn't attract the attention of powerful beings. Moreover, cultivation talents were difficult to improve. If it was discovered that he had a higher talent than a Supreme-level cultivation talent in the future, it could attract the attention of some powerful beings.

So, he definitely couldn't reveal his cultivation talent level.

“With my combat strength, I should be good enough for a successful assessment!”

Ye Tian thought to himself.

Whoosh, whoosh, whoosh!!!

One by one, the warriors entered the teleportation gates. Some chose the alchemy assessment, others the array assessment, but most opted for the combat assessment.

Ye Tian also headed for the combat assessment.

Boom!!!

The teleportation gate led to a space-like area.

Suddenly, a figure appeared in front of him.

It was a humanoid puppet!

“I am Puppet Y2364. Defeat me, and you will pass the assessment!”

A mechanical voice emanated from the puppet.

“Puppet!”

Ye Tian was familiar with puppets, but this was his first encounter with one that could compete with an Emperor-level fighter.

“The assessment begins!”

As soon as the words were spoken, Puppet Y2364 moved.

Its speed was incredibly fast, comparable to an eight-star Emperor. It quickly approached Ye Tian, throwing a punch.

Ye Tian didn’t dare to underestimate the attack and instantly teleported away.

“God-level strength talent!”

“Innate Sword Body!”

“Legendary Sword Technique – Sky Piercer!”

Ye Tian’s sword thrust through space, striking the puppet.

Boom!

The puppet was sent flying backward, a one-inch deep sword mark on its body, but it was not significantly damaged.

“Comparable to an eight-star Emperor-level combat power!”

Ye Tian was quite surprised.

He hadn't expected to encounter a puppet matching the strength of an eight-star Emperor-level here. If Earth had many such eight-star Emperor-level puppets, they could easily dominate the globe!

Suddenly,

The puppet went berserk, emitting countless threads that even sliced through space, almost covering the entire area.

“Mystic-level defense talent!”

“God-level Iron Armor talent!”

With dual-layer defense, Ye Tian barely blocked the attack, then unleashed a God-level Sword Technique – Starry Sky Annihilation!

With one strike, the space shattered!

The puppet's body completely disintegrated under Starry Sky Annihilation, turning into countless fragments.

However, the fragments quickly reformed into a whole puppet.

Just as Ye Tian was about to continue his attack, the puppet spoke: “Congratulations, you have passed the assessment!”

With those words, Ye Tian was teleported back.

“Wow, you actually passed the combat challenge!”

The God-level powerhouse approached Ye Tian, looking at him with surprise.

Ye Tian also glanced over, using his talent copying ability to check the other's talents.

Human: Yang Peng

Cultivation Talent: Dawn

Strength Talent: Pseudo-Mystic (60%)

Defense Talent: Pseudo-Mystic (70%)

Speed Talent: Pseudo-Mystic (60%)

Array Talent: Moonlight

From Yang Peng's talents, it was clear that his other talents were quite ordinary. As a warrior with Dawn-level cultivation talent, he didn't even possess a single Mystic-level talent.

'This person probably missed his growth period due to lack of good cultivation resources in the past. However, because of his Moonlight-level array talent, his status is not ordinary, which is why he can be a person in charge at the Silver Universe Star genius recruitment office,' Ye Tian guessed.

Responding to Yang Peng, Ye Tian said, "Just luck!"

"Luck? This is not just luck. Previously, the combat assessment only required facing a seven-star Emperor-level puppet, but now it's been upgraded to eight-star because Silver Universe Star no longer needs eight-star combat geniuses. You defeated an eight-star Emperor-level puppet so quickly; you must be at the nine-star Emperor-level. A nine-star Emperor-level is barely considered a genius in Silver Universe Star!" Yang Peng praised.

Ye Tian chatted briefly with Yang Peng and then ended the conversation.

Soon, the assessments of the other warriors were also concluded.

In the end, only seven warriors obtained the qualification to enter Silver Universe Star and received the Silver Universe Star identity proof, becoming a member of Silver Universe Star.

Five days later,

A special spaceship bound for Silver Universe Star set sail!

“Silver Universe Star, here I come!”

Ye Tian sat inside the spaceship, looking in the direction of Silver Universe Star and murmured.

## Chapter 295: Qingfeng Giant City!

Ye Tian boarded a highly advanced cosmic spaceship, built by a technologically advanced civilization. Capable of space jumps, it could instantly travel from one galaxy to another, not slower than the usual interstellar teleportation arrays.

Because of this, many experts in the universe preferred traveling on cosmic spaceships rather than using teleportation arrays.

However, such spaceships were extremely expensive, and not every God-level being could afford one.

After several jumps, a few hours later, Ye Tian and his companions finally arrived at a space port outside Silver Universe Star.

After disembarking the spaceship, Yang Peng said to Ye Tian and the others, “Silver Universe Star is purely a world of martial artists and lacks technological products. Therefore, spaceships and similar aircraft are not allowed to enter Silver Universe Star. Shortly, you will queue to use the space port’s teleportation array to enter the interior of Silver Universe Star. You must handle your identity verification after entering Silver Universe Star. This is your proof of identity, which you can use to complete the process.”

Each person received a proof of identity with their basic information.

Many people were entering Silver Universe Star, mostly natives who could come and go freely, regardless of their lower cultivation or talent.

Being born on Silver Universe Star naturally gave them an advantage, whereas outsiders had to pay a significant price to become a part of Silver Universe Star.

Soon, it was the turn of Ye Tian and a few others to queue for one of the teleportation arrays.

“According to the instructions, you can only be teleported to a giant city. Choose your city quickly, as time is limited!” said an emperor-level official managing the teleportation array.

A map appeared before everyone, displaying various giant cities.

“I choose Zhongyang Giant City!”

“I choose Pengyu Giant City!”

...

One after another, geniuses chose their respective cities, seemingly well-informed and without hesitation.

Each giant city had its advantages; some were domains for alchemists, others for array masters. If an alchemist went to a city dominated by array masters, they wouldn't receive good treatment.

Transferring to other main cities was out of the question!

To use the teleportation arrays within the main cities, one had to be a resident of Silver Universe Star, and once you became a resident of a certain giant city, moving to another would not result in favorable treatment.

For example, buying property or conducting business would be restricted.

Therefore, choosing a giant city for the first time required careful consideration!

Ye Tian, however, had no concerns. As a combat genius, any giant city would suit him.

“I choose Qinfeng Giant City!”

Ye Tian glanced at the map and casually said.

He stood on the teleportation array and was instantly transported to Qinfeng Giant City.

...

Qinfeng Giant City.

This was an immensely vast city, its grandeur far surpassing that of Earth's super bases.

With a population of 300 million, most of whom were martial artists, the number of ordinary people was very small.

“This is Qinfeng Giant City, huh!” Ye Tian exclaimed silently as he stepped out of the teleportation hall onto the street, admiring the majestic buildings around him.

At the same time, he was also somewhat shocked.

The suppression on Silver Universe Star was formidable, and it wasn't due to gravity.

In fact, the gravity of Silver Universe Star was only several times that of Earth's, which was surprisingly low for such a massive planet.

However, this suppression could limit the destructive power of the strong. For instance, those who could destroy a planet with one strike on other planets might not even be able to shatter a mountain on Silver Universe Star.

This was the planet's suppression!

Clearly, the suppression on Silver Universe Star had reached such a level.

This was a good thing, as without any suppression, Emperor-level powerhouses could destroy millions of miles of land with a single strike. If countless Emperor-level, God-level, and even True God-level powerhouses lived here, wouldn't Silver Universe Star easily burst apart?

Considering the battles of the strong, main stars like Silver Universe Star had formed such suppressions as a means of self-protection.

Despite the strong suppression, the concentration of yuan qi on Silver Universe Star was very high, more than ten times that of Earth.

In such an environment, cultivating would naturally be much faster.

"Let's go handle the identity verification first!"

When Ye Tian had just come out from the teleportation hall, he had inquired about the location of the identity verification office from the guards.

Soon after, Ye Tian arrived at the residents' ID office, where he quickly processed his identity verification and obtained an identity card using his proof of identity.

With this, Ye Tian officially settled on Silver Universe Star, becoming one of its members.

In the following days, Ye Tian mainly familiarized himself with the general situation of Silver Universe Star and the basic information about Qinfeng City.

Silver Universe Star was vast beyond imagination, roughly divided into nine super-continent, countless smaller continents, and innumerable islands. The size of these islands could even compare to some planetary worlds in the Milky Way.

Qinfeng Giant City was located on Tianzhan Continent, one of the nine super-continent. Tianzhan Continent had eighteen main cities, seventy-two giant cities, and countless ordinary large cities.

...

Qinfeng Giant City was one of the seventy-two giant cities and held a decent status on Tianzhan Continent. But, in the grand scheme of Silver Universe Star, it was not very significant.

Even so, Ye Tian did not dare to underestimate Qinfeng Giant City and even maintained a sense of awe.

From the information he had gathered, God-level beings dared not act arrogantly in Qinfeng Giant City. Only True God-level beings could be considered strong in Qinfeng Giant City, and there were even existences beyond True God-level.

For example, the lord of Qinfeng Giant City was a powerhouse beyond the True God-level!

Emperor-level beings were not much in Qinfeng Giant City; even nine-star Emperors were only worshiped by ordinary martial artists and not considered important by the true powerhouses.

However, Sovereign Emperor-level powerhouses were different, each being revered as a prodigy. Whether Qinfeng City had any Sovereign Emperor-level prodigies was unknown to Ye Tian, as he had only been there for a few days and couldn't gather much information.

...

“There are many True God-level powerhouses in Qinfeng Giant City, and each one must have Supreme cultivation talent. Now that I have Supreme cultivation talent, if I copy two more Supreme cultivation talents, my own talent should be elevated to a higher level!”

Thinking of cultivation talents beyond the Supreme level excited Ye Tian.

On Earth, he would never have had the chance to enhance his Supreme cultivation talent. But in a place like Silver Universe Star and possessing the talent to copy others' talents, he was like a fish in water.

This place was like a dreamland for him!

However, copying talents was not so easy. On Earth, his copying ability could cover a radius of one hundred thousand meters, but on Silver Universe Star, a strong force of rules suppressed his copying ability.

Now, his talent copying range was limited to a hundred-meter radius, and he had to slowly observe the talents of others.

But he believed he would soon copy two more Supreme cultivation talents, transforming his own cultivation talent.

“Let's check out the Trade Tower first!”

There were many Trade Towers in Qinfeng Giant City, and there was one in the area where Ye Tian lived.

The Trade Tower was a place for people to trade and post or accept tasks. Even God-level powerhouses would visit the Trade Tower to trade items and post or accept tasks.

Ye Tian's purpose in coming to Silver Universe Star was not only to copy talents but also to cultivate.

He had to break more of his physical limits within five years, so he still needed some external items to assist his cultivation.

And the Trade Tower was sure to have what he needed!

Chapter 296: Combat Power Tower, The First Opponent!

The Trade Tower.

Ye Tian arrived here and saw a large number of Martial Warriors shuttling through.

It must be said, this place was bustling and lively.

Inside the Trade Tower were many shops and individual vendors, selling all kinds of treasures.

For example, various exotic fires and attribute treasures were all available for trade here.

However, Ye Tian soon found, to his dismay, that he could not afford anything.

That's right, he couldn't afford anything!

Previously, in his efforts to break through the tenth and eleventh physical limits, he had almost depleted his yuan qi stones and many other resources. Upon leaving Earth, he had left his treasures with Empress Yue and only took a few items with him.

Thus, he was now quite poor.

The universal currency of the Milky Way was Star Points, with one Star Point roughly equivalent to a yuan qi stone. Of course, there were smaller denominations, but these were mostly circulated within planets.

As Silver Universe Star was one of the nine main stars in the Milky Way, the currency circulating there was naturally Star Points.

After calculating, Ye Tian realized that the unnecessary treasures he had could be sold for at most a few hundred thousand Star Points.

The word "poor" perfectly described his current situation.

"It seems I must earn money, otherwise it'll be hard to quickly improve my cultivation level!" Ye Tian thought deeply.

Unable to buy anything, he started to scout others' talents, hoping to find one or two with great potential.

However, Supreme level talent was not something ordinary, and despite searching, he found none. He did, however, find quite a few Dawn level talents.

Although Qinfeng Giant City lacked technological products, it did have a yuan force network, which did not count as a technological product.

The hotel where Ye Tian was staying also had a yuan force network, so he went online after returning to look up something.

“How to earn Star Points in the shortest time?”

Instantly, numerous suggestions popped up.

Ye Tian read them carefully.

One suggestion was to hunt ferocious beasts, as Silver Universe Star was home to native ferocious beasts, though completely no match for humans. If humans had not intentionally left these beasts for Martial Warriors to practice, they would have been eradicated long ago.

Ordinary ferocious beasts were not valuable, but God-level ones were. Every part of a God-level ferocious beast was a treasure; their fur could be made into high-defense clothing, their bones into weapons of Morning Star level, Moonlight level, and even Dawn level. The blood of God-level ferocious beasts could temper an Emperor-level body, making it a superb auxiliary treasure for cultivation.

On Earth, Ye Tian had used ferocious beast blood to temper his body when his cultivation was low. However, after reaching Emperor level, he abandoned this method as the effectiveness of Emperor-level beast blood was minimal, and God-level beast blood was unavailable.

But clearly, there was plenty of God-level ferocious beast blood on Silver Universe Star.

However, this method was not suitable for Ye Tian, as it was too slow.

Another suggestion was to take on missions. Completing a difficult mission would yield rich rewards.

But Ye Tian also discarded this idea, mainly because some missions took too long. He had less than five years left and needed to increase his cultivation by several minor levels within this time.

Going through various proposals, one caught Ye Tian's attention—

“Combat Power Tower!”

The Combat Power Tower was a place for challenges and a good way to earn Star Points, but one could also lose everything if not careful.

The tower randomly assigned an opponent. Defeating the opponent meant earning a certain number of Star Points, paid by the opponent. The more consecutive wins, the more Star Points earned. If one kept winning, the earned Star Points could be astronomical.

But in reality, it was impossible, as if someone became truly invincible in combat, others could choose not to fight, thereby stopping the continuation of earning Star Points.

“Combat Power Tower suits me well. As a newcomer, I should be able to win many consecutive battles in the early stages and earn some Star Points!” Ye Tian thought.

Immediately.

He researched many details about the Combat Power Tower and, after gaining enough understanding, went to a nearby Combat Power Tower and bought a virtual world helmet.

The challenges in the Combat Power Tower took place in a virtual world, and the virtual world of Silver Universe Star was even more advanced than that of Earth, almost indistinguishable from the real world.

The Hotel.

Ye Tian put on the virtual world helmet, and his consciousness entered the virtual world.

Next, he registered an account.

Still using his title from Earth, “Heavenly Emperor of Ten Thousand Laws,” he filled in some basic information and chose to apply for Emperor-level combat challenges.

[Character: Heavenly Emperor of Ten Thousand Laws, Record: 0 wins, 0 losses]

“The first challenge is about to begin, randomly selecting opponent... Ding, Mischievous Little Demoness selected. Waiting for the opponent’s agreement!”

The record of Mischievous Little Demoness was also transmitted to Ye Tian—

[Character: Mischievous Little Demoness, Record: 10 wins, 0 losses]

“Huh, a newcomer as well, makes sense. As a newcomer, my first match wouldn’t be against a high-record opponent,” Ye Tian thought.

However, what he didn’t know was that a newcomer who could achieve 10 consecutive victories was no ordinary newcomer; otherwise, they wouldn’t have managed a 10-win streak.

Qinfeng Giant City, somewhere.

A sweet-looking woman felt the call of the virtual world and logged on.

If one did not log on within ten minutes, the challenge would be automatically forfeited, which was a common situation for many busy Martial Warriors who often couldn’t enter the virtual world.

Ding!

The woman logged on and found a random challenge message.

“Heavenly Emperor of Ten Thousand Laws? That’s quite a bold name, daring to use ‘Heavenly Emperor’ in the title. 0 wins, 0 losses, so it’s a newcomer. No wonder so arrogant. Humph, with such a title, sooner or later you’ll be targeted, lose all your Star Points, and have to delete your account.”

With the intention of teaching the newcomer a lesson, she accepted the challenge.

In fact, this account was her secondary one, used to bully newcomers occasionally, which she found quite enjoyable.

“Mischievous Little Demoness has accepted your random challenge. The challenge is about to begin!”

A voice echoed in Ye Tian’s ear.

Ten seconds later.

Whoosh! Ye Tian was teleported to a desert, and not far away, a figure appeared, a beautiful woman with an impressive figure.

“Challenge begins!”

As the words fell.

The Mischievous Little Demoness charged over, her speed incredibly fast. Her sword seemed to pierce through space.

She was a swordsman!

“Spatial Confinement!”

Boom!

The surrounding space was confined by Ye Tian, exerting a strong pressure on Mischievous Little Demoness.

Then, Ye Tian also went all out.

“God-level Strength Talent!”

“Innate Sword Body!”

“Extreme Speed Talent!”

“Mystic-level Defense Talent!”

“God-level Iron Armor Talent!”

“God-level Claw Technique – Great Tearing Divine Claw!”

Numerous talents were displayed one after another.

Whoosh!

The Great Tearing Divine Claw reached out, seemingly grasping the space in front of him.

“Damn, Nine-Star Emperor level!”

Mischievous Little Demoness was shocked

This wasn’t just a newcomer, but a Nine-Star Emperor!

In Qinfeng Giant City, although a Nine-Star Emperor wasn’t anything extraordinary, it was still rare. Within the Emperor level, Nine-Star Emperors definitely belonged to the top tier, hence Sovereign Emperors were elusive and such prodigies rare.

She had intended to bully a newcomer, to teach them a lesson, but unexpectedly encountered a Nine-Star Emperor level.

She was only an Eight-Star Emperor level, how could she win against him?

“Oh no, my 10-win streak!”

Mischievous Little Demoness screamed in despair inside.

Chapter 297: Huge Profits! Approaching 20 Consecutive Wins!

As Ye Tian was about to instantaneously defeat the Mischievous Little Demoness, he was less than 100 meters away from her.

Instinctively, he checked her talent status.

Human: Qin Zixuan

Cultivation Talent: Supreme

Strength Talent: Mystic

Speed Talent: Mystic

Defense Talent: Mystic

Swordsmanship Talent: Moonlight

...

A series of talents appeared before Ye Tian's eyes.

“Supreme Cultivation Talent!”

Ye Tian was overjoyed.

He knew that the virtual world of Qinfeng Giant City allowed the checking of talent status as soon as he entered, but he didn’t expect his first opponent to be a possessor of Supreme Cultivation Talent.

Such luck was too good!

Judging from Qin Zixuan’s talents, she had the potential to become a Nine-Star Emperor. However, her cultivation wasn’t very high, having only broken through the thirteenth physical limit, and without cultivating a God-level sword technique. Her combat ability was still at the level of an Eight-Star Emperor, and not a particularly strong one at that.

That was why she was so much weaker than Ye Tian.

Regarding Qin Zixuan’s other talents, Ye Tian had no interest, but he was very interested in the Supreme Cultivation Talent!

“Copy Supreme Cultivation Talent!”

With a thought, the copy was successful, and Ye Tian revealed a smile.

However,

This slight smile had a different meaning in Qin Zixuan’s eyes.

“He’s laughing!”

Qin Zixuan was stunned.

Then, her body was obliterated by Ye Tian’s Great Tearing Divine Claw.

Boom!!!

Her virtual body annihilated, Qin Zixuan's soul consciousness left the virtual world and returned to her original body.

As soon as she returned, she was furious!

“Damn it, he killed me and even laughed??? Is he mocking my weak strength?”

Qin Zixuan was very annoyed.

She was an Eight-Star Emperor in combat strength, only 35 years old this year. Reaching the Eight-Star Emperor level at such an age was definitely a genius among geniuses, and she could certainly become a Nine-Star Emperor in a few years.

But now, some unknown old guy dared to belittle her.

“Hmph, don't let me find you, or else...”

Qin Zixuan cursed Ye Tian inwardly for a long time, but Ye Tian was unaware of all this.

.....

“Congratulations on your first victory, you have earned 100 star points!”

100 star points were nothing to Ye Tian, but he was still very excited, as he had copied a Supreme Cultivation Talent.

As his consciousness returned,

Ye Tian couldn't wait to integrate this Supreme Cultivation Talent.

Boom!!!

The integration began, and after some pain, Ye Tian successfully integrated this Supreme Cultivation Talent. However, the talent did not undergo any transformation and remained a Supreme Cultivation Talent.

But Ye Tian already felt his Supreme Cultivation Talent was close to reaching the pinnacle. Integrating another Supreme Cultivation Talent would definitely transform it to the next level of talent.

“The Battle Tower is really great, not only can I earn star points, but I can also copy talents, continue the challenge!”

Ye Tian put on the virtual helmet and continued the challenge.

His second opponent was a relatively weaker Emperor, not even reaching the level of a One-Star Emperor, and was instantly killed by Ye Tian.

Soon, Ye Tian’s record skyrocketed.

3 consecutive wins!

4 consecutive wins!

5 consecutive wins!

6 consecutive wins!

7 consecutive wins!

...

Finally, Ye Tian achieved 9 consecutive wins, with the ninth win earning him 25,600 star points. Earning 25,600 star points so easily, the speed of making money was incredibly fast.

But such a way of making money was full of risks.

Ye Tian had been winning continuously. If he lost once, all the star points he had earned would be lost, as the bet for the tenth challenge was 51,200 star points.

In this view, winning streaks seemed quite unfair. If one kept winning and then suddenly lost, all the star points accumulated would be lost at once. What then is the point of a winning streak?

However, in reality, the stakes could be adjusted. The 51,200 star points for the tenth challenge was the maximum bet amount. If Ye Tian wanted to, he could've set it to 10,000 star points.

If not modified, the default would be 51,200 star points.

Ye Tian, aiming for quick earnings, naturally wouldn't adjust the betting amount, being only at nine consecutive wins.

Moreover, once the tenth consecutive win was achieved, things would change!

Once the tenth consecutive win is secured, not only can one get a reward of 51,200 points, but also a share of the ticket sales.

Because once ten consecutive wins was achieved, others can spectate the battles, which requires a fee. Half of this fee goes to the winner. If the winner loses, then the reward goes to the virtual world.

Of course, this required some fame; if one wasn't famous, who would come to watch?

For instance, Qin Zixuan, whom Ye Tian first encountered, probably used a secondary account, as there were no spectators.

If a very famous Emperor-level powerhouse undertook a winning streak challenge, there would definitely be a large audience, and the ticket revenue could even surpass the stakes.

In the later stages, ticket revenue was a real income source for a strong fighter.

However, Ye Tian was a newcomer in Qinfeng Giant City and had no reputation. Therefore he couldn't expect too much and should be happy with earning some betting stakes.

The Tenth Challenge.

The virtual world chose for Ye Tian an Emperor-level fighter with decent records —

[Character: Emperor Fengwang, Record: 8,621 wins, 62 losses]

From the record, it's clear that Emperor Fengwang is quite strong, but his exact level of Emperor-grade is unknown.

The virtual world of Qinfeng Giant City doesn't reveal the opponent's combat power; one can only know their true strength through battle.

Soon, the tenth challenge began!

Whoosh!

Above a forest.

Ye Tian and Emperor Fengwang appeared at the same time. Emperor Fengwang was a rugged-looking man with well-developed muscles, dressed in battle armor, wielding a blade.

“Kill!”

Emperor Fengwang made his move, displaying the strength of an Eight-Star Emperor.

“Just barely an Eight-Star Emperor, and I thought he would be strong!”

Ye Tian was somewhat disappointed and immediately used spatial confinement, followed by a claw strike that obliterated his opponent. The process was too easy.

10 consecutive wins completed!

In the following days, Ye Tian challenged frenziedly every day, but as some opponents didn't accept the challenge, he couldn't fight many battles in a day, and it took a long time to find a real opponent.

Even so, on the third day, he achieved 19 consecutive wins and was about to reach the 20th.

By this time, Ye Tian had earned tens of millions of star points!

To a real tycoon, tens of millions of star points might be nothing, but for Ye Tian, it was a huge sum.

For the twentieth challenge, Ye Tian still set the highest bet, reaching over 50 million star points.

He was randomly matched with an Emperor-level powerhouse, nicknamed Barbie Doll, who agreed to the challenge. But Ye Tian hesitated.

The opponent agreed to a 10 million star point challenge. If Ye Tian disagreed, he could change the opponent, but if he agreed, the bet would be 10 million star points.

“Forget it, let's agree. If we keep doubling like this, the stakes will reach the sky!”

Ye Tian thought.

So, he agreed!

The twentieth challenge began!

But at this moment, a notification from the virtual world arrived.

“Heavenly Emperor of Ten Thousand Laws, as you are about to undertake your 20th consecutive win challenge, the virtual world can offer you a free promotion. There will be many spectators coming to watch. Do you accept the virtual world’s promotion? If you accept the promotion, the challenge will be delayed by one day!”

Seeing this notification, Ye Tian thought for a moment and agreed!

If he wanted to quickly increase his strength, staying low-profile wouldn’t work. If he gained fame, opportunities might come to him automatically. If he remained unknown, even if great opportunities emerged, he wouldn’t hear of them.

Moreover, if the virtual world promoted it, there would definitely be many martial warriors watching, and the ticket revenue could be substantial.

Earning both money and fame, why not?

After Ye Tian agreed, a notice appeared on the virtual world’s public platform.

“The Heavenly Emperor of Ten Thousand Laws’s 20th consecutive win challenge will take place tomorrow morning at 8 o’clock. Challenger: Barbie Doll!”

## Chapter 298: Qin Zixuan's Gamble, Ye Tian Places a Bet!

The announcement of a 20-win streak challenge attracted much attention, but not for Ye Tian, as most people didn’t recognize him. Despite his strength, he had few fans, so who would pay attention to him?

However, Barbie Doll caught many people’s eye because she was famous. As the granddaughter of a true god and having just reached the nine-star Emperor level, she naturally had many admirers and fans in Qinfeng Giant City.

Barbie Doll seldom took on challenges in the virtual world. Even if she participated, with her track record, she rarely matched up with weaker Emperors. In sparring with stronger Emperors, she had both wins and losses. If she didn’t achieve ten consecutive wins, others couldn’t even spectate her battles.

But this time, although it wasn't Barbie Doll's winning streak challenge, people could still see her fight in Ye Tian's 20-win streak challenge.

Suddenly, many people bought tickets.

And the price of a ticket was not cheap, costing a whopping 100 star points, with better seats even more expensive.

In Qinfeng Giant City, within a tower.

A woman in green emerged from the virtual world, muttering to herself, "Heavenly Emperor of Ten Thousand Laws, on his 20th-win streak. Why has the opponent only fought 19 battles? Could it be someone's alternate account?"

"No matter, I've recently had a falling out with Grandpa. And without a source of income, and with the high cost of cultivation, it's a good opportunity to challenge the other party. If I win, I could earn 10 million star points, which is enough for a while!"

The woman in green chuckled.

She was Barbie Doll, whose real name was Liu Qingyi, also known as the Empress in Green! (qingyi means green clothes)

Suddenly.

A voice rang out, "Qingyi, I'm here!"

As the words fell, a woman appeared at her door.

Click!

The door opened, and a woman came into Liu Qingyi's view.

"Zixuan, why are you here?"

It was her good friend, Qin Zixuan.

Qin Zixuan's background was not simple, being the granddaughter of the lord of Qinfeng Giant City, holding a higher status than her.

Qin Zixuan entered and said, "Qingyi, did you challenge someone named Heavenly Emperor of Ten Thousand Laws?"

"Yes!"

Liu Qingyi wasn't surprised that Qin Zixuan knew about the challenge, as the virtual world had just announced it, and Qin Zixuan might have just seen it.

"Qingyi, that guy is not simple. He's a nine-star Emperor, but he should be no match for you. You must teach him a lesson and make him suffer a heavy loss. Otherwise, if you lose, not only will he win your money, but he will also earn from ticket sales, making it too easy for him!" Qin Zixuan said indignantly.

Liu Qingyi was puzzled, "Zixuan, do you know the Heavenly Emperor of Ten Thousand Laws? Did he offend you?"

"Of course, he offended me!" Qin Zixuan recalled the past incident, anger resurfacing, "His first battle was against my alternate account. I intended to guide him, but he killed me in one move, using his claws to explode me, and even mocked me mercilessly. Ugh, I've never been so embarrassed. Qingyi, you must avenge me!"

Liu Qingyi said gravely, "Zixuan, as you said, that person is a nine-star Emperor level, and I am also at the same level. It won't be easy to defeat him."

Qin Zixuan quickly said, "Qingyi, that guy only reached nine-star Emperor level due to his spatial talent. Your Ultimate Green Hand can ignore spatial attacks and suppress him. His spatial talent won't work on you, and you can definitely kill him. Also, you're short on money recently, right? I can set up a betting pool, and if you win, I'll share half with you!"

"Alright, I'll give it my all," Liu Qingyi said, biting her lip.

“Remember, his claw technique is a god-level skill. You must not let him get close. At the start of the challenge, use the Ultimate Green Hand to kill him immediately!” Qin Zixuan reminded again.

At this time.

Ye Tian was unaware that he was being targeted by two women, as he was researching Barbie Doll’s information.

Although the Yuan Force Network didn’t have more secretive information, just common knowledge, it still had some basic information about Barbie Doll.

“Liu Qingyi, known as the Empress in Green, a nine-star Emperor!”

Ye Tian became somewhat solemn.

A nine-star Emperor was not weak, and being at the same level as him, it wouldn’t be easy to win against a nine-star Emperor.

However, from the little information leaked online, it was evident that Liu Qingyi was not a peak nine-star Emperor, but merely an ordinary nine-star Emperor. Therefore, Ye Tian had a high chance of winning.

Afterward, Ye Tian entered the virtual world again, wanting to check the public comment section for any information about his 20-win streak challenge.

As soon as he entered the comment section, he was stunned!

There were many comments about this battle, but upon delving into them, he was somewhat confused.

It seemed that the discussions were mostly about Barbie Doll, Liu Qingyi, with only a few mentions of his name. Even those were only in comparison to Barbie Doll.

In short, his fame was minuscule compared to Barbie Doll's resounding reputation.

"This is good, Barbie Doll's fame is loud, and many martial warriors will surely watch the battle. Once I win, I can earn a lot of money from ticket sales!" Ye Tian chuckled.

Suddenly.

He saw a post about a betting pool for his battle with Liu Qingyi.

Gambling in the virtual world was permitted, but not everyone had the authority to open a betting pool. It required certain permissions, which Ye Tian's account did not have.

Without a doubt, the person who opened the betting pool was not ordinary.

"Qin Zixuan!"

Ye Tian was shocked when he saw the name of the person who opened the betting pool.

Wasn't she the first person he challenged when he entered the virtual world?

He browsed through the betting pool post and quickly learned about Qin Zixuan's background.

"She's the granddaughter of the lord of Qinfeng Giant City!"

The lord of Qinfeng Giant City was an extraordinary figure, a powerhouse beyond the level of a true god and the undisputed ruler of Qinfeng Giant City. Even in the Silver Universe Star, he was considered a strong character.

What Ye Tian found particularly coincidental was that Qin Zixuan and Liu Qingyi seemed to be best friends, with a very close relationship.

What a coincidence!

Coincidence!

“Regardless, I’ve offended her, so be it. Once I win this battle, I’ll make a huge profit!”

Ye Tian made his decision.

After this battle, he planned to copy another Supreme level cultivation talent and then merge it into a higher-level cultivation talent. He would then purchase some precious resources, go into closed-door cultivation, and strive to break through the twelfth physical limit.

“Right, I can also bet on myself winning. Currently, my odds are 1 to 3, while the opponent’s are 1 to 0.5. That means if I bet 40 million star points on myself and win, I can earn 120 million star points.”

Ye Tian calculated.

120 million might not be much for the wealthy, but for Ye Tian, it was a huge sum. Moreover, in the Silver Universe Star, the purchasing power of star points was much stronger than that of yuan qi stones on Earth.

For example, something worth 10 star points in the Silver Universe Star might sell for 100 star points on Earth.

Because things rare on Earth were common and less valuable in the Silver Universe Star.

Therefore.

120 million star points in the Silver Universe Star could buy many valuable items; it was not a small amount.

“Then I’ll bet 40 million star points!”

Ye Tian decided to bet on himself.

Regardless of how the odds might change later, when he placed his bet, the odds were 1:3. Even if the odds changed later, it would not affect his betting odds. Such was the nature of betting in the virtual world.

Such betting pools were easy to make huge profits from but also easy to incur losses.

For this reason, few people opened betting pools.

After placing his bet, Ye Tian left the virtual world to rest for the night.

In the blink of an eye, a night passed.

The next day, the highly anticipated 20-win streak challenge was about to begin!

Chapter 299: Left Claw Technique, Right Sword Technique, Dominating Liu Qingyi!

At 7:50 a.m.

Ye Tian arrived in the virtual world, waiting for the teleportation of the virtual world.

At this time, the virtual world had already opened its battle arena. Countless seats appeared around it, with audience members arriving in the stands.

In no time, tens of thousands of spectators had gathered!

For many in the audience, a mere 100 star points was not much to watch Liu Qingyi's battle, which was absolutely worth it.

Eight o'clock sharp!

Ye Tian and Liu Qingyi were both teleported to the competition arena, which was a large fighting platform. It was covered by powerful defensive arrays around it to prevent the battle from affecting the audience in the stands.

Although no one would die in the virtual world, if the audience was affected, it could impact the viewing experience.

On the fighting platform.

Ye Tian's gaze was fixed on Liu Qingyi, who had an excellent figure and a very delicate face, truly like a Barbie doll from an anime.

If it weren't for Ye Tian's relationship with Empress Yue, he would indeed be moved by such a beauty.

Now, he simply appreciated her, without any other feelings.

In the audience stands.

Qin Zixuan shouted loudly, "Qingyi, kill this guy!"

Qin Zixuan's words drew a lot of attention, and many turned to look.

"Wow, it's Miss Zixuan!"

"It's really Miss Zixuan, she's also here to watch the battle!"

"Miss Zixuan and Empress Qingyi are good friends. Miss Zixuan even opened a betting pool, it's only normal for her to watch the battle!"

"To see both Miss Zixuan and Empress Qingyi at the same time, this ticket was absolutely worth it!"

"Let's cheer for Empress Qingyi!"

"Yes, Empress Qingyi will win!"

“Empress Qingyi will win!”

“Empress Qingyi will win!”

.....

The shouting in the audience stands covered the earth and sky. Luckily, Ye Tian couldn't hear the noise from the stands, or he would really been a bit depressed.

“Challenge begins!”

The voice of the virtual world descended.

“Spatial Confinement!”

Ye Tian immediately unfolded his spatial talent.

At this moment, Liu Qingyi extended a hand, emitting a green light, and fiercely struck a palm through the air.

Boom!!!

The space was penetrated, the spatial confinement unable to restrain this move. The opponent's technique seemed to ignore space itself, directly descending upon Ye Tian.

“Teleportation!”

“Mystic level defensive talent!”

“God level Iron Armor talent!”

“Mystic level Diamond Bone talent!”

One after another, talents were used, boosting Ye Tian's defensive capabilities by many times.

Even so, a nine-star attack landed on Ye Tian, still sending him flying.

Instantly, Ye Tian's layers of defense were broken. Though he ultimately defended himself, his internal organs were shaken and cracked. The injury was not light.

"Life Talent!"

"Healing Talent!"

Two recovery-type talents activated, and the injury healed in the blink of an eye.

"I was careless. The opponent is a nine-star Emperor, and that palm technique seemed to counter spatial confinement. If it wasn't for my strong defense and timely teleportation to dodge part of the attack, I would have been seriously injured!" Ye Tian thought to himself.

Liu Qingyi failed to seriously injure Ye Tian in one hit, and was momentarily stunned.

She thought a hit would seriously injure Ye Tian and quickly end the battle.

But now, she lost the initiative.

Facing a spatial talent wielder, if she couldn't defeat him by surprise, it would be difficult later on!

Swish!

Ye Tian instantly shifted over, attacking with the God-level claw technique Great Tearing Divine Claw, combined with the God level Strength Talent.

"Green Cloud Cover!"

Liu Qingyi raised her palm to the sky, using a defensive palm technique, and met Ye Tian's attack with a Mystic level defensive talent.

With a loud boom!

Liu Qingyi was sent flying, but was not injured.

Though the blow failed to hurt Liu Qingyi, not only was Ye Tian not disappointed, but he couldn't help but get excited. Although he didn't have a smile on his face, he couldn't hide the smile that was in his eyes.

“Haha, I have actually copied a second Supreme cultivation talent!”

Ye Tian laughed wildly in his heart.

Just now, he used the copy talent to check Liu Qingyi's talents.

Human: Liu Qingyi

Cultivation Talent: Supreme

Strength Talent: Mystic

Speed Talent: Mystic

Defense Talent: Mystic

Palm Technique Talent: Moonlight

.....

When he discovered that Liu Qingyi also possessed a Supreme cultivation talent, he didn't hesitate to copy her Supreme cultivation talent with a single thought.

“What is he so happy about?”

Liu Qingyi was very puzzled.

She could see that Ye Tian was now very excited, as if he had won, even though Ye Tian’s attack just now clearly didn’t affect her at all?

“Weird person!”

That’s how Liu Qingyi evaluated him.

The battle continued!

Boom boom boom!!!!

On the competition stage, the fierce battle between the two was intense, but after a long fight, there was still no winner.

Ye Tian possessed a space talent, allowing him to teleport, and had both Mystic-level life talent and Pseudo-Mystic-level healing talent, so even if he was injured, he could easily recover.

As for Liu Qingyi, her combat strength also was not weak. With her defensive palm techniques and her own Mystic-level defense talent, she could withstand Ye Tian’s attacks without getting hurt.

Thus, neither of them had an advantage over the other.

“If I use my time talent, I should be able to defeat her quickly!”

Ye Tian thought.

But he didn't dare to use his time talent here. Once the time talent was exposed, it would be troublesome.

Space talents were still commonly seen, but he had not heard of anyone having time talents to date.

So, unless it was absolutely necessary, he wouldn't reveal his time talent.

“Soul attack talent probably won't be useful, as with Liu Qingyi's status, she should be able to purchase soul treasures. Soul treasures can enter the virtual world, so they can block soul attacks. Revealing soul talent would also be unlikely to secure victory!”

After some thought, Ye Tian decided to reveal his God-level sword technique—Starry Sky Annihilation!

Starry Sky Annihilation was more difficult to defend against than the Great Tearing Divine Claw, and it could be used together with it — the Great Tearing Divine Claw in the left hand, and Starry Sky Annihilation in the right hand.

If he caught her off guard, he could even cause Liu Qingyi serious injuries.

After planning, Ye Tian unleashed the Great Tearing Divine Claw with his left hand, attacking Liu Qingyi.

Liu Qingyi protected herself with the palm technique Green Cloud Cover, blocking the strike.

Immediately after.

Ye Tian's right hand manifested a sword—

“Starry Sky Annihilation!”

With a slash, the starry sky shattered.

Boom!!!

Space fractured inch by inch, and the terrifying power permeated the entire arena.

“Not good!”

The Green Cloud Cover disappeared and unable to deploy it again, Liu Qingyi’s expression changed.

Of course, she had more than just the Green Cloud Cover and defense talent for protection.

“Green Scales!”

Layers of yuan qi turned into green scales covering her whole body. This was a special yuan qi body protection technique, unknown on Earth and even rare in the Silver Universe Star.

This defensive technique, sacrificing a large amount of yuan qi, temporarily formed a strong defense, many times more powerful than a simple yuan qi body shield.

But this method of defense was still not as strong as Green Cloud Cover.

Boom!!!!

Liu Qingyi’s body was hit by layers of spatial fragments, and many green scales shattered, turning into nothingness. Her body was penetrated several times but ultimately defended successfully.

She also had top-level healing talent and was using it to quickly recover from her injuries.

But Ye Tian didn’t give her time to recover, attacking again with a teleport.

Bang bang bang!!!

Liu Qingyi was knocked back time and time again, with drops of blood scattering in the air, looking very tragic.

And Ye Tian showed no mercy, attacking Liu Qingyi relentlessly.

Watching Liu Qingyi being so brutally treated, many of her fans went crazy, cursing at Ye Tian.

“Are you even a man, daring to treat our Empress Qingyi like this!!!!”

“Heavenly Emperor of Ten Thousand Laws, let’s have a one-on-one duel. Spare our Empress Qingyi!”

“Heavenly Emperor of Ten Thousand Laws, stop, you are provoking public anger!”

“My God, our Empress Qingyi is being beaten like this, who can stop him?”

Even some rash martial warriors tried to rush onto the stage, but were stopped by the protective barrier and then moved out of the virtual world, losing their audience privilege.

In the spectator seats.

Qin Zixuan’s eyes widened: “This guy is so powerful! Not only does he have Moonlight-level claw talent, but also Moonlight-level sword talent, practicing both simultaneously and mastering both God-level claw and sword techniques??? How did he cultivate?”

Chapter 300: Desolate-Level Cultivation Talent, Breaking Through the Twelfth Physical Limit!

Qin Zixuan herself possessed Moonlight-level swordsmanship talent, yet she has not mastered a god-level sword technique to date. This was due to her relatively low Sword Dao realm, far from sufficient to cultivate a god-level technique.

Her limited progress in the Sword Dao realm was attributed to her young age and short amount of cultivation.

However, Qin Zixuan had access to resources beyond the imagination of ordinary martial warriors, including an abundance of treasures that enhanced comprehension. She never had to worry about improving her understanding.

Still, she had yet to master a god-level sword technique.

Hence, cultivating a god-level technique, whether it be a claw or sword technique, was incredibly challenging. Yet, Ye Tian has managed to do so.

“Worrying about him is useless now. Qingyi was careless earlier and suffered severe injuries, now completely at a disadvantage. What should we do?”

Qin Zixuan grew anxious.

If Ye Tian wins, not only would Qingyi lose face, but she would also lose 10 million star points. Given the odds, there were quite a few bets on Ye Tian. If Qingyi wins, she could make a small profit; but if Ye Tian wins, her loss would be substantial!

Moreover, Ye Tian stood to win Qingyi’s 10 million and a substantial amount from ticket sales.

“Qingyi, fight back, turn the tables in this dire situation!”

Qin Zixuan shouted in support.

But no miracle occurred. In less than a minute, Liu Qingyi was slain by Ye Tian and vanished from the virtual world.

Liu Qingyi was defeated!

“I’m ruined, I’m going to lose at least 1 billion!”

Qin Zixuan was on the verge of tears. She had hoped to make a small profit by raising the odds for Ye Tian, attracting more bets on him, but it backfired.

Had she known, she might have lowered Ye Tian's odds and possibly made a profit.

Regret!

Elsewhere.

Liu Qingyi was also frustrated, having lost her last 10 million star points.

Without star points, she couldn't even qualify for random challenges.

Previously, 10 million star points were mere pocket change to her, and she wouldn't have cared about losing them. But now, with her relationship with her grandfather strained and her accounts frozen, leaving her with only 10 million star points. Losing them hit hard!

"I wonder if Zixuan lost the bets?"

Liu Qingyi pondered. If Zixuan had profited, she could borrow some money from her and repay it later.

Entering the virtual world, Liu Qingyi contacted Qin Zixuan and quickly connected.

"Zixuan, did you win the bets?"

Liu Qingyi asked.

Qin Zixuan replied tearfully, "Qingyi, would you believe I lost 1 billion?"

"..."

Liu Qingyi was stunned.

1 billion??

Even if her account hadn't been frozen, losing 1 billion would have pained her for a long time!

Borrow money?

Forget it, borrowing from Qin Zixuan, who just lost 1 billion, would be asking for trouble.

“Ah, I'll have to figure something out on my own,” Qin Zixuan thought.

...

“I won!”

Ye Tian was ecstatic.

After achieving 20 consecutive victories, the 10 million star points Qin Zixuan lost were immediately transferred to his account, followed by the ticket sales.

This time, the total ticket sales reached 200 million, of which he received 100 million as his share.

Additionally, having bet 40 million star coins, he now just had to wait for the 120 million to be transferred to him.

“Judging by the odds, Qin Zixuan must have suffered a huge loss. Hahaha, serves her right for setting my odds so high!” Ye Tian gloated.

Now, he had an even more important task —

To merge with the Supreme-level Cultivation Talent!

“If I merge with Liu Qingyi's Supreme-level Cultivation Talent, my talent will surely surpass that of the Supreme level!”

Ye Tian was confident.

Thus, he began the merging process.

Boom!!!!

An unimaginable agony struck, drenching his entire body in sweat. His body began to roll his eyes back, his skin feeling as if it was being roasted in the sun at billions of degrees, turning red all over!

After a grueling half-hour, Ye Tian's body temperature finally dropped back to normal, slowly recovering.

“So tired, yet so satisfying!”

Ye Tian murmured softly.

Unknowingly, he drifted off to sleep.

A night passed, and Ye Tian woke up.

First thing, he checked his talent status.

Immediately, he noticed a change in his cultivation talent.

[Cultivation Talent: Desolate Level]

Previously, his talent was at the Supreme level, but now it had advanced to Desolate level.

Clearly, Desolate level was a grade above the Supreme level.

“Let's test the cultivation effect!”

Ye Tian began absorbing yuan qi to temper his body, comparing the results with his previous efforts.

Hours passed!

“Six times the effect!”

Ye Tian was overjoyed.

Merely using yuan qi to temper his body, the effect was sixfold compared to before. With the aid of various auxiliary treasures, the effect could perhaps exceed six times.

“Leaving Earth was indeed the right decision. If I hadn’t, who knows how long it would have taken me to elevate my cultivation talent to Desolate level. Going to Silver Universe Star was certainly my wisest choice!” Ye Tian exclaimed gratefully.

A day passed, and the winnings from the bet hadn’t arrived!

Two days went by, still no bet winnings.

It wasn’t until the third day that the bet finally reached Ye Tian’s account.

Obviously, it took the other party three days to gather the funds to cover their losses.

With nearly 300 million star points in his possession, Ye Tian was now quite wealthy.

Immediately.

He purchased a property, spending about 30 million star coins on a small villa located by a river in Qinfeng Giant City. The scenery was nice, although a bit far from the city center.

However, Ye Tian had no plans to reside permanently in Qinfeng Giant City, so there was no need to buy a villa in a prime location, which would have been a waste of money.

After buying the villa, Ye Tian went to the Trade Tower and acquired several treasures.

One was an Earth-element treasure — Breath Soil, valuable for assisting Mystic-level Earth-element talents in body tempering, priced at 5.2 million star points.

He also bought a Fivefold Weak Water worth 90 million star points, far superior to the previously owned Threefold Weak Water.

Lastly.

Ye Tian purchased a Dawn-level sword, valued at 100 million star points.

This weapon was sure to significantly enhance his strength. Despite its high price, he decided to buy it.

.....

In total, he spent 252 million star points, leaving him with only a few tens of millions.

In the following days, Ye Tian began his secluded cultivation.

With his Desolate-level cultivation talent, along with Breath Soil and Fivefold Weak Water, plus a tenfold time acceleration, his cultivation speed was unimaginably faster than before.

He calculated that he only needed a month to break through the twelfth physical limit.

“Focus on cultivation — break through the twelfth physical limit in a month!”

Ye Tian resolved firmly.

Days passed, and in the blink of an eye, a month went by.

On this day.

Ye Tian was using the yuan qi from the Breath Soil to temper his body. The Breath Soil was much depleted, now only the size of a thumb.

“I’ve reached the limit; now it’s time to break through the twelfth physical limit!”

Ye Tian murmured.

He immediately swallowed the remaining Breath Soil and frantically absorbed its energy, aiming to break through the twelfth physical limit.

Boom!!!!

There was a loud explosion inside his body, and Ye Tian easily broke through the twelfth physical limit.

Then, the remaining energy of the Breath Soil acted as the needed power for his body’s transformation.

Soon, the Breath Soil was completely consumed.

Whoosh whoosh whoosh!!!

Countless yuan qi stones emerged. These were the yuan qi stones he had recently purchased, totaling 5 million.

Ye Tian rapidly absorbed all 5 million yuan qi stones. Combined with the Morning Star-level cultivation room in the villa, which contained abundant yuan qi, he barely managed to meet the needs of his body’s transformation.

After a long time, Ye Tian’s body transformation was complete.

He had successfully broken through the twelfth physical limit, significantly increasing his strength.
