

Talent 401

Chapter 401: Talent Acquired, Legacy Appears

Ye Tian was extremely excited at this moment.

He had originally thought that this time he might only have a chance to find the Misty Fish, but unexpectedly, not only did he find the Misty Fish, he could also complete a transaction with Heavenly Pride Mo Wen.

The value of one divine crystal was already very high! Star points were a relatively low-end currency among humans, basically used by powerhouses below the God level, while those above the God level rarely traded online, mostly conducting transactions offline with divine crystals. Divine crystals were a type of energy stone worth many times more than yuan qi stones, capable of helping God-level powerhouses enhance their divine power and replenish it.

Ye Tian did not have any divine crystals at the moment, which spoke volumes about the rarity of divine crystals.

Even in the entire galaxy, there were not many divine crystal veins.

But what excited Ye Tian the most was the legacy site of the Water Cleansing True Lord; he had no idea where it was, and yet Heavenly Pride Mo Wen actually knew.

This eight-star peerless Heavenly Pride had no reason to lie, which meant that if Ye Tian helped Heavenly Pride Mo Wen capture the Misty Fish, then he could make a huge profit.

As for the Misty Fish, he didnt need it in the first place.

He only needed to copy the Misty Fishs time talent.

Once he copied the Misty Fishs time talent, this Misty Fish would become dispensable to him, and he wouldnt mind giving it to Heavenly Pride Mo Wen.

At this moment.

The Misty Fish activated its time talent, unleashing the Blade of Time.

Pfft!!! The Blade of Time slashed towards Heavenly Pride Mo Wen, who couldnt defend against it at all, as defenses were ineffective against time talent.

Consequently, Heavenly Pride Mo Wen was pierced by the Blade of Time, and his lifespan was immediately reduced by 100 years.

Heavenly Pride of Ten Thousand Laws, make your move!

Heavenly Pride Mo Wen shouted.

Ye Tian immediately stepped out of the space, activating the Dimensional Cube artifact.

Boom!!!!!!! The space was frozen, completely restraining the Misty Fishs God-level water escape talent.

At the same time, Ye Tian teleported over.

He unleashed a Super God-level palm techniqueXumi Palm! Although the Misty Fish was a Demigod, its combat power was merely equivalent to a top-tier seven-star peerless Heavenly Pride at best. It was just that it possessed a God-level water escape talent, making its escaping ability top-notch. And with a high-level time talent, it could accelerate or slow down time and unleash the Blade of Time, making it somewhat troublesome.

But for Ye Tian, the Misty Fishs time talent had no effect on him.

Thus, the Misty Fish was doomed! It activated its time slow talent, hoping to slow down Ye Tians attack speed and dodge his attack, but Ye Tians attack speed remained unchanged.

The Xumi Palm struck down, capturing the Misty Fish into the Xumi Realm.

Swoosh! Heavenly Pride Mo Wen and another Heavenly Pride arrived.

Ye Tian also recognized the identity of the other Heavenly Pride it was also one of the eight-star peerless Heavenly Prides from the Moma River System Heavenly Pride Yu Ke! Heavenly Pride of Ten Thousand Laws, you actually captured this Misty Fish so easily!

Heavenly Pride Mo Wen was quite surprised.

The two of them were quite helpless against the Misty Fish, not only because of its time talent and God-level water escape talent but also because they dared not go all out.

After all, they intended to capture the Misty Fish alive. If they used powerful moves to envelop the area, they might accidentally kill the Misty Fish, rendering all their efforts futile.

A live Misty Fish was a treasure, but a dead one, the two were incomparably different in value.

This is the Misty Fish, Heavenly Pride Mo Wen. Is the deal still on?

Ye Tian opened his palm, projecting the situation inside the Xumi Realm, and asked.

Of course, its still on!

Heavenly Pride Mo Wen quickly said.

Then, he took out 150 divine crystals and handed them to Ye Tian: Heavenly Pride of Ten Thousand Laws, these are 150 divine crystals for you!

Why give me 150 divine crystals?

Ye Tian was surprised.

Heavenly Pride Mo Wen explained, This time, it was almost entirely your effort that captured the Misty Fish. If I only gave you 100 divine crystals, I would feel uneasy. If I had more divine crystals, I would definitely give you more!

In terms of value, a Misty Fish with a high-level time talent was worth far more than 150 divine crystals.

If Ye Tian were greedy, he could simply flee with the Misty Fish, and the two of them probably wouldn't be able to stop him.

But Ye Tian didn't take the Misty Fish and run. If he still only gave Ye Tian 100 divine crystals, that would be too unfair.

Heavenly Pride Mo Wen, you said earlier that you know the legacy site of the Water Cleansing True Lord, is that true?

Ye Tian quickly asked.

It's true, that's also part of the deal!

Heavenly Pride Mo Wen took out a crystal ball and input the information about the legacy site of the Water Cleansing True Lord into it.

He handed it to Ye Tian: This is the location and basic information of the legacy site!

Heavenly Pride Mo Wen, have you been to the legacy site? Ye Tian asked again.

I can't get in!

Heavenly Pride Mo Wen shook his head, The only requirement to enter the legacy site of the Water Cleansing True Lord is to possess a God-level water talent, but I don't have a God-level water talent, so I can't get in.

If you have a God-level water talent, then you can enter.

If you don't have it either, you can use this information to trade with others.

Rest assured, after I trade this piece of information with you, I won't trade it away anymore!

With Heavenly Pride Mo Wen saying so, Ye Tian immediately took out the Misty Fish.

And Heavenly Pride Mo Wen also immediately took out an artifact capable of sealing the Misty Fish, and with Ye Tians cooperation, instantly sealed the Misty Fish.

From then on, it was very difficult for the Misty Fish to escape.

However, what Heavenly Pride Mo Wen didnt know was that Ye Tian had already copied the Misty Fishs high-level time talent and the God-level water escape talent.

Ye Tians previous water escape talent was only top-tier. Although he possessed a God-level water screen talent and was highly proficient in the mysteries of water, the mysteries of each water talent were different. Ye Tian hadnt spent much effort on the water escape talent, so it was somewhat of a flaw. But now, with the God-level water escape talent copied, he essentially possessed a God-level water escape talent directly.

The transaction was completed! Heavenly Pride Mo Wen and Heavenly Pride Yu Ke immediately left, apparently planning to leave the Water Cleansing Realm.

Ye Tian also left the place and went to a relatively secluded underwater mountain peak, where he opened up an underwater cave dwelling.

Immediately, he began to close up and integrate the two talents he had just copied.

It took ten minutes for Ye Tian to successfully integrate the God-level water escape talent.

Immediately after, Ye Tian integrated the high-level time talent, but it clearly didnt evolve the time talent; it remained a high-level time talent.

However, Ye Tian only needed to find one more high-level time talent, and he would be able to evolve his time talent to a top-tier time talent.

Lets see the legacy site of the Water Cleansing True Lord; maybe I can really obtain the Water Sinking Realm divine ability!

Ye Tian took out the information crystal ball and read the information inside.

Soon, Ye Tian knew the location of the legacy site of the Water Cleansing True Lord.

Its actually not in the water, but in the sky!

Ye Tian was very surprised.

He had always thought the legacy site of the Water Cleansing True Lord would be in some body of water.

This indeed was beyond his expectations, no wonder so many people had been searching for so long without finding the legacy site of the Water Cleansing True Lord.

However, even if one flew into the sky, without a specific location, it would be difficult to find the legacy site of the Water Cleansing True Lord.

Because this legacy site was enveloped by a hidden formation, only by reaching the exact location could one find this legacy site.

Its time to go to the legacy site of the Water Cleansing True Lord! Hopefully, I can obtain the Water Sinking Realm divine ability!

Ye Tian rested for a while then got up and teleported away.

Not long after.

Ye Tian arrived at a region in the sky.

The sky of a small world was different from the sky of the outer planetary worlds; the sky of a planetary world connected to space, while the sky of a small world connected to spatial turbulence. If the sky of a small world was broken, one would enter into the spatial turbulence.

I've arrived!

Ye Tian's gaze was fixed on a void in front of him.

Xumi Eye!

Using the mysterious technique from the Mira Sutra, the Xumi Eye, Ye Tian immediately saw a legacy site in front of him.

It was a crystal palace, with a statue standing in front of the palace.

A statue of a woman, presumably the legendary Water Cleansing True Lord.

The entire legacy site was enveloped by a large formation, invisible to the naked eye, but penetrable by the Xumi Eye.

Swoosh! Ye Tian flew over, trying to enter the legacy site.

At that moment.

A beam of light scanned Ye Tian's body, detecting the God-level water talent on him. A light gate appeared, allowing Ye Tian to enter.

Chapter 402: Obtaining the Water Sinking Realm Divine Ability

Upon entering the inheritance site of the Water Cleansing True Lord, Ye Tian arrived in front of the Crystal Palace.

The water yuan qi here is so rich!

Taking a deep breath, Ye Tian felt as if he was enveloped in warm water, which was very comfortable.

The water yuan qi here was much richer than that at the bottom of the Water Cleansing Realm. If a person with a water-type talent were to cultivate here, their cultivation speed would definitely be much faster than in other places.

Ye Tian did not forget the purpose of his trip and continued on.

The Crystal Palace was the site of inheritance. One could only receive the inheritance by entering the Crystal Palace.

However, Ye Tian was very clear that those so-called powerful beings would definitely not easily give their inheritance to others. There must be a test.

Entering the Crystal Palace.

A spirit appeared! This spirit took the form of a ten-year-old girl, looking very cute.

Despite her youthful appearance, the spirit was not actually a little girl. She had existed for countless years. Even if her mental maturity could hardly grow, she was definitely comparable to an adult human.

Contestant, your arrival at the masters palace indicates that you are fated with the masters inheritance.

The master has left behind various inheritances here. Which inheritance do you desire?

As the spirit spoke, she waved her hand, and a light screen appeared.

The screen displayed many types of inheritances.

For example

Divine Power Cultivation Technique Inheritance!

Divine Power Defense Secret Technique Inheritance!

Physical Body Cultivation Secret Technique Inheritance!

Water Attribute Divine Ability Inheritance!

I choose the Water Attribute Divine Ability Inheritance! Ye Tian said without hesitation.

Although he was also interested in other inheritances, the Water Sinking Realm divine ability was a top-notch divine ability and one of the Five Elements Divine Abilities. If he missed this opportunity, he didn't know when he would be able to obtain it again.

If the water attribute divine ability inheritance really included the Water Sinking Realm divine ability, then it would be a huge gain for him. Therefore, he would only choose the water attribute divine ability inheritance!

Contestant, you have chosen the water attribute divine ability inheritance. To obtain the inheritance, you must undergo a test.

Don't worry, the master is very kind. The test will not endanger your life!

The little spirit spoke.

Then let's start the test! Ye Tian said.

Boom!

A gate of light appeared in Ye Tian's sight, and the little spirit pointed at the gate of light: Enter. If you pass the test, you can obtain the master's water attribute divine ability inheritance!

Ye Tian hesitated for only a second before stepping into the gate of light.

This gate of light was just a small teleportation gate.

Through this teleportation gate, Ye Tian arrived at a great hall.

In this great hall stood a stele, engraved with the laws and patterns representing the water attribute.

Huh, its similar to the law patterns of the Phantom Gold Thread divine ability, but this stele seems to have some additional law patterns that dont quite fit. They must have been modified by the Water Cleansing True Lord to adapt the Water Sinking Realms law patterns for this test, Ye Tian guessed.

At that moment.

The spirit reappeared and said, The test set by the master is to comprehend the law patterns on this stele. You have three months. If you can use these law patterns to create a water attribute secret technique, then you are considered to have passed the test.

However, I will determine the quality of the water attribute divine ability inheritance you receive based on the effectiveness of the secret technique you create.

If you only create a mediocre water attribute secret technique, then you can only obtain a lesser water attribute divine ability. Conversely, you can obtain a very good water attribute divine ability!

Upon hearing this, Ye Tian was intrigued and quickly asked, Spirit, does the water attribute divine ability reward include the Water Sinking Realm divine ability?

Of course, it Why are you asking this? You better hurry up with the test. If you fail, you wont receive any reward!

The spirit disappeared instantly.

Its definitely there!

Ye Tian smiled inwardly.

Although the spirit didn't explicitly reveal it, she had let it slip, and it was too late to correct herself.

Since the Water Sinking Realm divine ability was part of the inheritance, he hoped to obtain it.

Lets start comprehending!

Ye Tian sat cross-legged and began to comprehend the water attribute law patterns on the stele.

To create the best water attribute secret technique, Ye Tian not only activated his top-tier talent for comprehension and brought out wondrous objects to aid in comprehension but also activated his ability to accelerate time by tenfold.

In any case.

Ye Tian had to put in his full effort to comprehend, without the slightest relaxation. After all, he did not know the standards of the Water Cleansing True Lords test. If the standards were extremely demanding and he did not take it seriously, leading to missing out on the Water Sinking Realm divine ability, he would surely regret it dearly!

Time passed day by day! In fact, Ye Tian had almost comprehended the water attribute law patterns on the stele within a few days, but merely doing so was not enough. He had to fully comprehend these water attribute law patterns and then use them to deduce a water attribute secret technique.

If it were just about deducing a simple secret technique, Ye Tian could have done it in a day.

However, he needed to deduce a very powerful secret technique to have a chance at obtaining the Water Sinking Realm divine ability.

In the blink of an eye, a month had passed in the outside world.

Ye Tian had already successfully created a secret technique but was not very satisfied with it, so he continued to deduce and refine this secret technique.

This secret technique was a defensive and offensive water attribute secret technique! There were many types of secret techniques, but those which were very peculiar and difficult to categorize are collectively referred to as secret techniques.

But the execution of secret techniques also relied on yuan force, and yuan force defense secret techniques were also a type of secret technique.

If all secret techniques at the Emperor level were to be classified from one star to nine stars, similar to the classification of yuan force defense secret techniques, then the water attribute secret technique Ye Tian initially created was only a four-star water attribute secret technique.

He was now refining it towards a five-star secret technique.

In the blink of an eye, another month passed. After numerous refinements by Ye Tian, he finally succeeded in refining this secret technique to the six-star level, surpassing his initial expectations!

But Ye Tian was still not satisfied! He planned to refine this secret technique to the seven-star level, which was considered high-level.

Finally, on the day when the three-month deadline was about to end, Ye Tian finally refined this water attribute secret technique to the seven-star level.

Phew, finally refined it to the seven-star level. In a tenfold accelerated environment, I've used a total of thirty months! Ye Tian took a deep breath and sighed.

If it were a regular Emperor-level cultivator, they wouldn't be able to create a seven-star water attribute secret technique in their entire lifetime! A few days later, the little spirit appeared.

The assessment time is up. Please, contestant, display the water attribute secret technique! The little spirit said.

Ye Tian stood up and executed the secret technique.

Water Dragon Realm Technique!

Boom! Rows of water dragons surrounded Ye Tian, forming a water dragon barrier, and due to the frantic rotation of the water dragons, a powerful strangulation force was formed.

If an enemy were to attack him, they would not only be blocked by the Water Dragon Realm Technique but also attacked by the water dragons.

This secret technique was a defensive and offensive water attribute secret technique! However, secret techniques were just secret techniques, only usable at the Emperor level, and consumed a significant amount of yuan force.

Divine abilities, on the other hand, were different. Once mastered, even at the God, True God, and Great God levels, they still had a terrifying amplification effect.

This was one of the reasons why secret techniques were far inferior to divine abilities and talents!

Evaluating! The little spirit was judging.

The shock in her eyes revealed her surprise. How could Ye Tian create such an advanced water attribute secret technique?

However,

She had to test it before determining the result; otherwise, if Ye Tian were to use a water attribute secret technique he learned from the outside world to cheat, she would definitely not pass him.

The means left by the Water Cleansing True Lord included the ability to test this. They just needed to match the laws contained in this water attribute secret technique with the water attribute law patterns on the stele to determine whether Ye Tians secret technique was created based on the stele.

Time passed little by little, about ten minutes later.

The little spirit spoke: Evaluation successful, the contestant has successfully completed the assessment and received the highest rating. The contestant may choose one top-tier water attribute divine ability inheritance!

Whoosh! Three top-tier water attribute divine abilities appeared in front of Ye Tian.

Top-tier Water Attribute Divine Ability Water God Colossus!

Top-tier Water Attribute Divine Ability Spear of the Water God!

Top-tier Water Attribute Divine Ability Water Sinking Realm!

There were three top-tier water attribute divine abilities in total, and Ye Tian, after reviewing the introductions of these three divine abilities, truly wanted all of them.

The Water God Colossus and the Spear of the Water God, these two top-tier water attribute divine abilities, were inheritances from the same lineage. If he were to learn these two water attribute divine abilities at once, it would be powerful enough to exert a stronger effect than an ordinary top-tier water attribute divine ability.

Unfortunately, Ye Tian could only choose one water attribute divine ability!

Forget it, I am not primarily focused on water attribute divine abilities. I am just collecting the Five Elements Great Divine Abilities, and the Water Sinking Realm must be obtained!

Ye Tian decisively said.

I choose the Water Sinking Realm! Ye Tian told the little spirit.

Granted! The little spirit took out the inheritance gold book of the Water Sinking Realm divine ability and handed it to Ye Tian.

Holding the gold book of the water attribute divine ability, Ye Tian quickly confirmed that it was the Water Sinking Realm divine ability, one of the Five Elements Great Divine Abilities.

You should leave now! The little spirit activated the Crystal Palace, moving Ye Tian out!

Chapter 403: A Wondrous Object of Time

In the outskirts of the inheritance site of the Water Cleansing True Lord.

Ye Tian was teleported here and took a glance at the divine tome of Water Sinking Realms divine ability inheritance he held, before tucking it away.

This Water Cleansing True Lord was indeed as benevolent as the artifact spirit had mentioned, far more so than the Dark Star Demon God.

From the assessment of the Water Cleansing True Lord, anyone who entered the inheritance site would be safe, regardless of who they were.

In contrast, the inheritance left by the Dark Star Demon God was fraught with difficulties, where one could easily lose their life in pursuit of benefits.

Of course.

In the universe, benevolent beings like the Water Cleansing True Lord were extremely rare. Many ancient beings didn't want others to benefit from their relics, setting numerous lethal arrays and traps. Yet, fearing that future generations of great beings might forcefully break in, they allowed only Emperors to enter.

This way, if Emperors could enter, the great beings would let the younger generations benefit without destroying the relics.

Otherwise, if no benefits were given for future generations, the existing great beings would likely just destroy these relics! Thus, ancient great beings usually left behind treasures for future generations to inherit, becoming a rule.

However, many great beings were reluctant to give away their treasures or inheritances, setting extremely harsh assessments, with some even more brutal than those set by the Dark Star Demon God.

Having obtained the inheritance of the Water Sinking Realms divine ability, Ye Tian had no intention of leaving the Water Cleansing Realm.

Because he wanted to replicate a high-level time talent.

There must be more than one Misty Fish with a high-level time talent in the Water Cleansing Realm. With patience, he was sure to find one.

Thus, Ye Tian began his patient search for Misty Fish in the Water Cleansing Realm, occasionally pondering over the Water Sinking Realms divine ability.

Although he had acquired the Water Sinking Realms divine ability, Ye Tian could only ponder over it for now, unable to practice it. It also required auxiliary materials, essential for every divine ability.

The Water Sinking Realms divine ability needed six materials, but Ye Tian didnt have a single one at the moment.

However, with the divine ability inheritance in hand, he could practice it once all materials were collected in the future, so he was not in a rush.

Time passed day by day, and a month flew by in the blink of an eye.

During this month, Ye Tian found two Misty Fish, but one had a basic level time talent and the other an intermediate level time talent.

Although Ye Tian could use the Divine Talent Elixir to forcibly upgrade the Misty Fishs time talent to a high-level talent, he was reluctant to do so.

His remaining Divine Talent Elixir was scarce, and the Sakura God Tree had long perished. After leaving the Milky Way, he realized the preciousness of the Divine Talent Elixir. The big shots in the Milky Way were unaware of the Divine Talent Elixir on Earth; otherwise, they would have long since come to plunder it.

Therefore, Ye Tian didnt want to deplete his remaining Divine Talent Elixir.

Of course, since Misty Fish with time talents were precious, so Ye Tian captured these two fish to sell later, which would earn him a fortune.

One day,

As Ye Tian passed through a body of water, his expression suddenly changed.

The power of time!

Ye Tian clearly felt a change in time in this area. Although it was faint and imperceptible to most, Ye Tian, with his high-level time talent, noticed it.

Normally, the time in an area doesn't change unless a creature with a time talent alters the flow of time. But it's impossible to continuously change the flow of time, as maintaining a time talent requires energy.

However, Ye Tian stood there for a long time, and the change in time persisted.

There's something nearby that affects time! Ye Tian speculated.

If that was the case, then this time-affecting treasure must be extraordinary, possibly even of great use to him.

Ye Tian activated his high-level time talent, carefully sensing the changes in time, and moved around the area, searching for where the time fluctuations were more intense.

It's underwater! Ye Tian dove into the water, and as he approached a certain spot on the seabed, the time anomalies intensified.

When he reached the bottom, he discovered an underground river extending downwards.

Thus, Ye Tian followed the underground river deeper.

Soon, he realized that the passage of the underground river was getting narrower, but his human body could still pass through without problems.

Before long, Ye Tian arrived in a vast underwater space, filled with water, where he made an astonishing discovery.

Misty Fish!

Ye Tian was greatly surprised.

After sensing the presence of Misty Fish, he immediately phased into the spatial dimension.

The invisibility talent was not very effective underwater, as invisibility only prevents one from being seen by the naked eye and makes it difficult for spiritual sense to detect, but it cannot make one's body disappear. Moving would still cause changes in the water flow, making complete invisibility impossible.

Only by phasing into the spatial dimension could he avoid being detected by the Misty Fish.

One, two, three

Ye Tian carefully counted the Misty Fish and found that there were nine in total.

He then used his replication talent to check the talents of these nine Misty Fish and was immediately shocked.

All nine possess high-level time talents; this is unbelievable!

Ye Tian was immensely surprised.

He then carefully observed this underwater space and discovered an object.

It was a multicolored prism-like crystal, extending directly from a rock, and all nine Misty Fish were staying near this crystal.

A wondrous object of time!

Ye Tians breathing became rapid.

This crystal was a wondrous object, which Ye Tian recognized at a glance. The time fluctuations were emanating from this multicolored crystal, and the changes in time around it were all influenced by this time wondrous object.

These Misty Fishs time talents must have been influenced by this time wondrous object! It must be capable of enhancing the level of time talents; otherwise, its impossible for all the Misty Fish here to possess high-level time talents!

Ye Tian thought.

As for why there were Misty Fish with basic and intermediate time talents in the Water Cleansing Realm, Ye Tian guessed that those were the offspring of Misty Fish, unaware of this time wondrous objects existence; otherwise, they would have come here long ago. Im going to make a fortune!

Ye Tian was very excited.

This time, not only could he elevate his time talent to the top level, but he also acquired so many high-level time talent Misty Fish and a priceless time wondrous object.

This was undoubtedly a heaven-defying opportunity!

High-level time talent, replicate!

High-level time talent, replicate!

High-level time talent, replicate!

Ye Tian replicated five high-level time talents at once. He wanted to replicate all nine high-level time talents at once, but he could only replicate five talents per day, so he had to wait until the next day to replicate the remaining ones.

To avoid any unforeseen complications, Ill capture these Misty Fish first!

Capturing these Misty Fish, Ye Tian dared not be careless, as there were nine Misty Fish in total, and missing even one would cause him great distress.

Fortunately, the strength levels of these Misty Fish varied. There was only one Demigod level Misty Fish, while the other eight were Emperor-level Misty Fish. Apart from the time talent, their other talents were relatively ordinary, at most equivalent to five or six-star Heavenly Prides. Except for the Demigod level Misty Fish, which was more powerful, possessing the strength of a seven-star peerless Heavenly Pride.

But Ye Tian was an eight-star peerless Heavenly Pride. With a bit of caution, capturing these nine Misty Fish was not a problem.

Of course, Ye Tian also had to be wary of the Blades of Time from the nine Misty Fish. If all nine could unleash Blades of Time simultaneously, being hit by nine Blades of Time would mean losing 900 years of lifespan instantly.

Although Ye Tians lifespan had reached 13,000 years due to the first realm of the Art of Immortality, he was not willing to lose 900 years of lifespan! Ye Tian approached the nine Misty Fish, extending a hand from the spatial dimension.

Xumi Palm!

A giant hand reached out and enveloped all nine Misty Fish.

Due to Ye Tians swift speed, combined with the Super God-level Xumi Palm technique, ordinary Misty Fish couldnt resist and were directly captured into the Xumi Realm.

However, the Demigod level Misty Fish was not weak and possessed a time talent and God-level water evasion talent. Plus, Ye Tian was covering all nine Misty Fish at once, spreading his power thin, which allowed the Demigod level Misty Fish to break free from Xumi Palm in time.

Blade of Time!

The Demigod level Misty Fish spat out an invisible Blade of Time.

The Blade of Time could ignore space, so even if Ye Tian hid in the spatial dimension, he would still be hit as if he did nothing.

Thus, Ye Tian also unleashed his Blade of Time.

Bang! The two Blades of Time collided, dissipating simultaneously.

Chapter 404: Top-Tier Time Talent, Acquisition of a Time Wondrous Object

The only thing that could withstand a Blade of Time was another Blade of Time. At this moment, because only the Demigod Misty Fish wielded the Blade of Time against him, Ye Tian was able to easily block the Misty Fish's attacks. Had he been facing nine Misty Fish simultaneously, it would have been difficult to defend, and he would certainly have lost some of his lifespan.

The appearance of the Dimensional Cube artifact amplified Ye Tian's spatial talents, freezing the space around him. The Demigod level Misty Fish, originally planning to escape, found itself unable to flee. Even with its various talents, it couldn't contend with Ye Tian.

Xumi Palm!

Ye Tian executed this Super God-level palm technique once again. The Demigod level Misty Fish could only watch in despair as it was captured by Ye Tian into the Xumi Realm, becoming his prisoner.

With all the Misty Fish captured, and their strength insufficient to break the Xumi Realm, Ye Tian turned his attention to the multicolored crystal. As he approached this time wondrous object, he sensed intense fluctuations of time.

I wonder if I can take it.

Ye Tian attempted to grasp the time wondrous object, trying to separate it from the rock. But the moment he exerted force, the time fluctuations erupted. Instantly, time around him slowed down by many folds, far more than just twenty times, and Ye Tians soul was also trapped in a state of stagnation by the power of time.

After a long while,

Ten days have passed! His expression changed.

Possessing time talent, he could easily determine how much time had passed. The severe slowdown of time had kept him in this highly decelerated time environment.

By the time the fluctuations from the time wondrous object had calmed down, ten days had passed in the outside world. Ten days might seem insignificant, but who knows how many years might pass if the time wondrous object were disturbed again.

My high-level time talent simply cannot contend with the time wondrous object; even my thoughts can be frozen!

Ye Tian was troubled. He really wanted to take this time wondrous object with him. Even if he couldnt take it, leaving it here exposed was not an option.

Right! Ive copied so many high-level time talents. If I fuse them to upgrade my talent to top-tier, I may be able to face the time wondrous object.

Thus, Ye Tian began to fuse the high-level time talents.

Boom! The fusion of the first high-level time talent began, and a transformation ensued. Ye Tian felt not only pain as if his soul was being sucked into a vortex of time.

After a long time, Ye Tian felt a pleasant sensation in his soul, and his body felt refreshed. The fusion of the time talent was complete! Immediately, Ye Tian checked his time talent.

[Time Talent: Top]

Seeing his time talent upgraded to top-tier, Ye Tian was very excited. He quickly learned the abilities of the top-tier time talent. It could accelerate or decelerate time by 20 times. Furthermore, the Blade of Time was now able to reduce 200 years of lifespan at once.

And he had more time talents to spare!

Continue fusing!

Ye Tian knew that continuing to fuse could potentially upgrade his time talent to the pseudo-mystic level, as he had experimented before. At least, it could make his top-tier time talent slightly stronger.

If it were any other top-tier talent, he might not be interested, but for the time talent, he was willing to put the effort just to make it even a bit stronger.

After all, with so many high-level time talents available, why not fuse them?

So, Ye Tian began to fuse one high-level time talent after another, gradually strengthening his top-tier time talent.

In a short while, the remaining four high-level time talents were fused by Ye Tian into his top-tier time talent.

Continue copying!

Ye Tian copied the high-level time talents from the remaining four Misty Fish and continued to fuse them. After back and forth copying and fusing, it took Ye Tian almost half a day.

Its still a Top-Tier Time Talent!

Ye Tian was not surprised by this outcome. Even after copying several top-tier time talents, it was impossible for him to evolve to the pseudo-mystic level. It seems like for him to upgrade to the pseudo-mystic level, he would either need to copy the pseudo-mystic level time talent from another creature or comprehend the mysteries of time on his own.

There was no other way!

Although I can't evolve it further, my top-tier time talent has definitely reached the pinnacle of this level!

Ye Tian confidently stated.

Next, he prepared to attempt to acquire the time wondrous object again.

Ye Tian activated his top-tier time talent, remaining vigilant at all times, ready to counter the impending time fluctuations.

Boom! Ye Tian grasped the time wondrous object and yanked it forcefully.

Immediately, the time wondrous object unleashed terrifying time fluctuations. These fluctuations made the surrounding time seem to stagnate, while time in the outside world was passing by, causing a significant lapse.

At this moment, Ye Tian's soul was protected by the top-tier time talent, and retained its ability to think.

Crack! The time wondrous object was slowly pulled out by Ye Tian, but the process was slow. From the outside world's perspective, it seemed like Ye Tian wasn't moving at all, affected by the slowed time.

It was unclear how much time had passed.

Ye Tian successfully extracted the entire time wondrous object, and afterward, the time fluctuations emitted by it gradually returned to calm.

Once the time fluctuations normalized, Ye Tian calculated and found that a month had passed in the outside world.

Time talents are terrifying. Fortunately, I possess the copy talent. It would be impossible for others to take this time wondrous object!

Ye Tian sighed.

Immediately afterward, he became excited again.

This time wondrous object was of great use to him. Although it was unlikely to elevate the level of his time talent, he could potentially comprehend the mysteries of time with the aid of this object.

This time wondrous object was clearly a treasure for aiding in the comprehension of time mysteries!

Put it away!

After storing the time wondrous object in his personal Xumi Realm, Ye Tian prepared to leave this place.

But before leaving, he had one more task to complete: erasing part of the Misty Fishs memories.

The intelligence of these nine Misty Fish was not low, and they had always lived in this underwater space, aware of the existence of the time wondrous object.

If Ye Tian killed them, there would be no need to worry about the exposure of the time wondrous object. However, if he wanted to sell them for a vast amount of resources and treasures, he had to erase their memories related to the time wondrous object. Otherwise, if the time wondrous object was exposed, Ye Tian would be in big trouble.

Thus, Ye Tian began to erase the memories of the Misty Fish one by one. Erasing memories was troublesome because the Misty Fish would resist, but Ye Tian possessed a hypnosis talent, allowing him to erase the Misty Fishs memories related to the time wondrous object while they were unable to resist.

Of course, erasing memories was a massive undertaking, requiring careful attention to ensure the Misty Fishs souls were not too severely damaged.

As a result, erasing the memory of the first Misty Fish took Ye Tian a long time, a full five days, before he successfully erased its memory related to the time wondrous object completely, almost irrecoverably.

Because Ye Tian directly obliterated the part of the soul that held the memory of the time wondrous object, restoring this memory would require many precious soul treasures, which the buyers of the Misty Fish probably wouldnt undertake.

After all, they didnt know about the time wondrous object beforehand, so why would they care about the Misty Fishs memories? Erasing the memory of the second Misty Fish was much easier, taking only three days, and the third took only two days.

In this manner, it didnt take long for Ye Tian to erase all memories related to the time wondrous object from the nine Misty Fish.

At this point, they only knew they had been captured by Ye Tian while playing.

All done, now I can leave!

Ye Tian employed his God-level water escape talent to leave the area and then flew out of the water surface, heading towards the exit of the Water Cleansing Realm.

At the exit of the Water Cleansing Realm.

Ye Tian emerged and came into the outside world.

At that moment, the divine consciousness of a group of God-level powerhouses swept over him.

Chapter 405: Making a Name in the Moma Galaxy

The group of God-level powerhouses noticed Ye Tian emerging but didnt pay much attention, merely glancing over him.

Ye Tian left the planet and chose not to trade at the spaceport.

Although he wanted to trade the Misty Fish, he possessed nine Misty Fish with high-level time talents, one with a medium-level time talent, and one with a basic-level time talent.

There wasn't much of value at this spaceport. Even if he offered the Misty Fish with high-level time talents, he could at best trade for a large amount of star points and not the valuable items he needed.

Moreover, he wouldn't trade all the Misty Fish at once, so he decided not to make the trade here.

Regarding Ye Tian's departure, almost no one noticed.

In their eyes, Ye Tian was at best an emperor-level figure without significant achievements, not worth their attention.

In the following days,

Ye Tian inquired about the current value of the Misty Fish in the Moma Galaxy.

Any Misty Fish was extremely valuable.

A Misty Fish with a basic-level time talent was valued at 10 billion each, while those with medium-level time talents were worth up to 1 trillion each.

As for the Misty Fish with high-level time talents, they were priceless! No one was selling Misty Fish with high-level time talents; there wasn't even any news about how many had been captured. For instance, Heavenly Pride Mo Wen obtained a Misty Fish with a high-level time talent, but no information leaked, clearly indicating a cover-up.

It seems the Misty Fish with high-level time talents are very valuable. I wonder if Heavenly Pride Mo Wen and others would still want them.

Ye Tian considered trading with Heavenly Pride Mo Wen. Given his background, he should be able to afford a few Misty Fish.

However, Ye Tian was not well-known in the Moma Galaxy, lacking channels for trading.

Thus, he decided to make a name for himself in the Moma Galaxy before trading the Misty Fish.

Consequently,

Over the next several days, Ye Tian continuously challenged some Heavenly Prides in the Moma Galaxy for friendly duels.

Of course,

He targeted the seven-star peerless Heavenly Prides, defeating them easily and gaining a lot of destiny. However, such actions couldn't be taken too frequently, or it would provoke public anger.

The Moma Galaxy, unlike the Andromeda or Milky Way galaxies, wasn't far from the Hengpan Galaxy and had contact with many other galaxies, leading to more established rules here, limiting certain actions.

For example, during the period of Heavenly Pride battles, eight-star peerless Heavenly Prides could challenge seven-star ones for destiny. If they only challenged other eight-star peers, the weaker ones would be doomed. Thus, challenging seven-star peers was allowed. However, if an eight-star peer challenged too many seven-star peers within a galaxy, it would break the rules and invite suppression from all other eight-star peers.

Therefore, after challenging seven or eight seven-star peerless Heavenly Prides, Ye Tian shifted his focus to the eight-star peerless Heavenly Prides.

The Moma Galaxy had only four eight-star peerless Heavenly Prides, but due to the emergence of the Water Cleansing Realm, more had come to the Moma Galaxy.

Ye Tian learned of an eight-star peerless Heavenly Pride from outside the galaxy named Heavenly Pride Qingming, who had just emerged from the Water Cleansing Realm not long ago, apparently gaining many valuable items and was currently challenging Heavenly Prides on Tamu Star in the Moma Galaxy.

Tamu Star was a main planet in the Moma Galaxy, home to many powerful Heavenly Prides.

Little Ai, set the coordinates for Tamu Star and initiate a spatial jump. Were heading to Tamu Star!

Ye Tian entered his five-star cosmic ship and gave the order.

Yes, Master. Inputting coordinates for Tamu Star Input successful. Initiating spatial jump in 3 2 1!

Boom! The cosmic ship began its spatial jump.

On Tamu Star,

Heavenly Pride Qingming was effortlessly challenging two top-tier seven-star peerless Heavenly Prides.

These two top-tier seven-star peerless Heavenly Prides didnt want to face Heavenly Pride Qingming, but had no choice when he approached them. Unless they hid or left secretly, they couldnt refuse Heavenly Pride Qingmings challenge.

Losing would only mean a loss of some destiny, but fleeing would mean losing face.

Other seven-star Heavenly Prides dared to accept the challenge, so why couldnt they? Thus, they had no choice but to bravely face the challenge. Despite being two against one, the gap between seven-star and eight-star peerless Heavenly Prides was vast, leaving them unable to win.

Boom! Heavenly Pride Qingming defeated the two seven-star peerless Heavenly Prides with his staff, severely injuring them, prompting their immediate surrender.

Heavenly Pride Qingming secured a victory in this challenge, slightly increasing his own destiny.

I should find an eight-star peerless Heavenly Pride for a sparring match next. But whom should I choose? Heavenly Pride Qingming pondered.

However, at that moment, the aura of another Heavenly Pride approached.

Heavenly Pride Qingming, do you dare battle with me? As soon as these words were spoken, a young man approached.

It was Ye Tian!

Heavenly Pride of Ten Thousand Laws, its you! Heavenly Pride Qingming recognized Ye Tian.

During this period, Ye Tian had challenged several seven-star peerless Heavenly Prides and easily won, solidifying his strength as that of an eight-star peerless Heavenly Pride.

Having investigated Heavenly Pride Qingming, Ye Tian was also known to Qingming.

Indeed, both of us are eight-star peerless Heavenly Prides. Why not have a friendly spar? Ye Tian proposed.

Agreed! Heavenly Pride Qingmings aura burst forth with intense battle intent.

The impending clash between two eight-star peerless Heavenly Prides caused spectators who were about to leave to stay, and many martial warriors from nearby also rushed over upon hearing the news.

A battle between eight-star peerless Heavenly Prides was a rare sight.

Even the two seven-star peerless Heavenly Prides who were defeated didnt rush to heal their injuries but chose to observe this battle from a distance instead.

Heavenly Pride Qingming, known for his staff technique talent, was facing Ye Tian, who had never encountered a Heavenly Pride with such talent before.

Soon, the two engaged in battle. At the moment they clashed, Ye Tian assessed Heavenly Pride Qingmings talents.

Human: Yang Ming

Cultivation Talent: Desolate-level

Strength Talent: God-level

Defense Talent: God-level

Extreme Speed Talent: God-level

Staff Technique Talent: Dawn-level

Qingwood Talent: God-level

Qing Pupil Talent: God-level

Indeed worthy of an eight-star peerless Heavenly Pride, impressive talents! Ye Tian silently appraised.

However, compared to Ye Tian, Heavenly Pride Qingming was still somewhat inferior.

Ye Tians strength was considered upper-middle among the eight-star peerless Heavenly Prides, whereas Qingming was more lower-middle.

Thus, Qingming was at a disadvantage from the start of their clash.

Ye Tians spatial talent greatly suppressed Qingming, and Ye Tians God-level martial skills, the Phantom God Blade Technique and the Vast Phantom Palm, caused significant damage to Qingming, sending him flying repeatedly.

The battle lasted less than a minute before Qingmings injuries became too severe to heal quickly.

Continuing at this pace, Qingming was bound to lose.

Spatial Collapse! Ye Tian suddenly used this ability, trapping Qingming within a collapsing space.

With a thunderous boom, Qingming broke free from the spatial collapse with a God-level staff technique.

But at that moment, Ye Tians Phantom God Blade Technique struck directly at Qingmings chest, piercing through his defensive artifact and inflicting severe injuries as the blade qi invaded Qingmings body.

Realizing the dire situation, Qingming immediately conceded, Heavenly Pride of Ten Thousand Laws, I admit defeat!

This wasnt his territory, and a severe injury could be fatal if Ye Tian didnt kill him but another eight-star peerless Heavenly Pride intercepted him.

Knowing he was outmatched, he chose to concede early.

Accepted. I accept your concession, Ye Tian ceased his attack.

With Qingmings concession, Ye Tian won the battle, capturing a portion of Qingmings destiny and significantly increasing his own.

At that moment, Ye Tian checked the Heavenly Pride leaderboard and noticed a considerable improvement in his ranking.

[Heavenly Pride Leaderboard: Ranked 3630th!]

Upon arriving in the Moma Galaxy, Ye Tian was ranked in the six thousands. After defeating several Heavenly Prides from the Moma Galaxy, his rank improved to the four to five thousands. Now, he had surged to the 3630th place on the Heavenly Pride Leaderboard.

If he could sweep through the Moma Galaxy, his rank might even break into the top thousand!

Chapter 406: Before the Apotheosis Pavilion, a Transaction

After admitting defeat, Heavenly Pride Qingming immediately felt embarrassed and left the area.

With that, the battle between the eight-star peerless Heavenly Prides came to an end.

As the fight concluded, Ye Tians fame grew even more resounding.

Soon, many powerful forces on Tamu Star learned of Ye Tians victory over Heavenly Pride Qingming, leading to increased attention towards him.

Ye Tian knew that the outcome of todays battle would spread throughout the entire Moma Galaxy in just a few days.

This was the result he desired. Once his reputation spread, it would be easier to conduct transactions with other powerful forces. Otherwise, if he were an unknown, why would any other force pay him any attention?

Moke Star.

Heavenly Pride Mo Wen, currently on Moke Star, also became aware of the outcome of Ye Tians battle with Heavenly Pride Qingming.

Moke Star was one of the six main planets of the Moma Galaxy.

These six main planets orbited around a supermassive black hole at the center. The Moma Galaxy seemed to have very few main planets.

For instance, the Milky Way had nine main planets, and the Andromeda Galaxy had ten main planets.

However, quantity often didn't matter as much as quality.

A single main planet in the Moma Galaxy could match all the main planets of the Milky Way and Andromeda Galaxy combined.

Among the six main planets of the Moma Galaxy, each harbored more than one or two planetary-level powerhouses.

In contrast, planetary-level powerhouses in the Milky Way and Andromeda Galaxy were extremely rare and hardly ever made a move.

This highlighted the strength of the Moma Galaxy.

At this moment, Heavenly Pride Mo Wen, looking at the virtual world and discussing the outcome of the eight-star Heavenly Prides battle, murmured:

The strength of the Heavenly Pride of Ten Thousand Laws is indeed formidable. Even if I were to face Heavenly Pride Qingming, my chances of winning wouldn't exceed fifty percent. I didn't expect the Heavenly Pride of Ten Thousand Laws to defeat Heavenly Pride Qingming so easily!

With the strength of the Heavenly Pride of Ten Thousand Laws, he will undoubtedly challenge other eight-star peerless Heavenly Prides in the Moma Galaxy.

Besides the external eight-star peerless Heavenly Prides, there are only four such Heavenly Prides in the entire Moma Galaxy, and he is one of them.

If Ye Tian challenges the other eight-star peerless Heavenly Prides, he will eventually challenge him as well.

During the Heavenly Pride battle, destiny was extremely important. As an eight-star peerless Heavenly Pride, he also aimed to become a Child of the Universe.

Therefore, he did not want to lose to other eight-star peerless Heavenly Prides, as losing would significantly diminish his destiny.

With the help of my elders, I have made the Misty Fish recognize me as its master. This Misty Fish can initiate a tenfold time acceleration. Under this acceleration, my cultivation speed will increase tenfold. With a few more years of cultivation, I will surely reach the higher echelons of eight-star peerless Heavenly Prides, or even become a top-tier eight-star peerless Heavenly Pride.

Then, I will have the strength to vie for those great opportunities and even hope to challenge the nine-star peerless Heavenly Prides!

Being a nine-star peerless Heavenly Pride was also one of Heavenly Pride Mo Wens goals, as only those who have broken through the twentieth physical limit as a nine-star Heavenly Pride can become a Child of the Universe.

In the entire Pan Star Field, nine-star peerless Heavenly Prides were extremely rare. Those few nine-star peerless Heavenly Prides, with their incredible talents, barely made it into the ranks but were unable to break through the twentieth physical limit.

He even knew that the reason the top-tier dominant forces in the Pan Star Field initiated the Heavenly Pride battle was mainly for those nine-star peerless Heavenly Prides. The main goal was to gather immense destiny for these nine-star peerless Heavenly Prides to attempt breaking through the twentieth physical limit and give birth to a Child of the Universe.

Currently, he did not qualify to compete with nine-star peerless Heavenly Prides for destiny, but that didnt mean he wouldnt in the future.

I must focus on cultivating. I hope the Heavenly Pride of Ten Thousand Laws doesnt challenge me anytime soon!

Heavenly Pride Mo Wen thought to himself.

Then, he allowed the Misty Fish to continue maintaining the time acceleration and resumed his cultivation.

A few days later, an emperor-level servant arrived outside Heavenly Pride Mo Wens cultivation room.

Heavenly Pride Mo Wen, the Heavenly Pride of Ten Thousand Laws has arrived at our Apotheosis Pavilion and wishes to see you! the emperor-level servant announced outside the cultivation room.

What? The Heavenly Pride of Ten Thousand Laws is here?

Heavenly Pride Mo Wen panicked internally.

The situation he least wanted to face had occurred. He had hoped to cultivate peacefully for a few years and then advance to the higher ranks of eight-star peerless Heavenly Prides. However, he hadnt expected Ye Tian to show up.

Never mind, at worst Ill just lose some destiny.

Heavenly Pride Mo Wen stood up, exited his cultivation room, and adjusted his mindset. The Apotheosis Pavilion was the force Heavenly Pride Mo Wen belonged to. At this moment, outside the Apotheosis Pavilion, Heavenly Pride Mo Wen met Ye Tian.

The Heavenly Pride of Ten Thousand Laws, if youve come to challenge me, then bring it on! Heavenly Pride Mo Wen said with a heavy voice.

Ye Tian gestured with his hands, indicating there was no need for concern, and said, Heavenly Pride Mo Wen, I think youve misunderstood. I didnt come here to challenge you, but to propose a trade!

Not a challenge? Heavenly Pride Mo Wen was taken aback.

He then inquired, Heavenly Pride of Ten Thousand Laws, youve come to trade with me? What do you wish to trade? Dont tell me you want to trade for my Misty Fish. If thats the case, Im sorry, but I cannot sell the Misty Fish.

Heavenly Pride Mo Wen, I indeed came here to trade Misty Fish, but not to get yours. Instead, I want to offer my Misty Fish to you. Im just not sure if you can afford this trade, Ye Tian responded, sparking interest in Heavenly Pride Mo Wen.

Youve caught another Misty Fish? Heavenly Pride Mo Wen asked, widening his eyes in surprise.

Indeed, Ive caught not just one Misty Fish but several. I was fortunate enough to find a nest of Misty Fish, containing several of them, including ones with high-level time talents. Capturing these Misty Fish cost me 200 years of my lifespan! Ye Tian said with a heavy sigh.

Of course, this was a fabrication. He couldnt very well admit to easily capturing the Misty Fish. Exaggerating his losses would help raise the price.

The Heavenly Pride of Ten Thousand Laws, I may not need a Misty Fish, but our Apotheosis Pavilion does. No matter how many Misty Fish you have, our pavilion can afford them. How many Misty Fish do you have? Heavenly Pride Mo Wen confidently stated, as the Apotheosis Pavilion was indeed very powerful.

In the Moma Galaxy, the Apotheosis Pavilion was a dominant force with three to four planetary-level powerhouses.

Such a powerful force could easily afford to trade for a few Misty Fish.

I have five Misty Fish, three with high-level time talents, one with a medium-level talent, and another with a basic-level time talent, Ye Tian revealed, concealing the existence of the other six Misty Fish. He didnt want to trade all of them with the Apotheosis Pavilion, as they might not have everything he desired.

In case the Apotheosis Pavilion couldnt meet his demands, he could trade the remaining Misty Fish with other forces.

This was Ye Tians plan. What, you have five Misty Fish, and three of them possess high-level time talents! Heavenly Pride Mo Wen was truly shocked.

Heavenly Pride of Ten Thousand Laws, wait here. Ill contact my master immediately and have him trade with you, okay? Heavenly Pride Mo Wen hurriedly said.

He feared Ye Tian might change his mind, and he currently lacked the resources to trade, hence the urgency to contact his master.

His master was a planetary-level powerhouse with vast resources, who could easily provide what Ye Tian needed.

Sure, Ye Tian agreed.

His intention wasnt to trade with Heavenly Pride Mo Wen directly. After all, Heavenly Pride Mo Wen was merely an eight-star peerless Heavenly Pride and unlikely to possess what he needed. His real intention was to trade with the Apotheosis Pavilion.

Soon, Heavenly Pride Mo Wen contacted his master and briefed him on the situation.

A minute later, an elderly figure appeared before Ye Tian.

This person appeared suddenly, moving so fast that even Ye Tian couldnt react.

Ye Tian immediately realized that this must be Heavenly Pride Mo Wens master.

Since this person was within the range of his Copy Talent, Ye Tian used it to check the newcomers talents.

Human: Chen Changgeng

Cultivation Talent: Hong level

Strength Talent: God level

Defense Talent: God level

Speed Talent: God level

Swordsmanship Talent: Dawn level

With Hong level cultivation talent and considering his age, he must be a planetary-level powerhouse!

This was the second planetary-level powerhouse Ye Tian had encountered.

Chapter 407: Bargaining with a Planetary Level Powerhouse

Heavenly Pride of Ten Thousand Laws, this is my master, the Unparalleled True Monarch!

Heavenly Pride Mo Wen introduced to Ye Tian.

Greetings, Unparalleled True Monarch!

Ye Tian greeted with a fist salute.

So, you are the Heavenly Pride of Ten Thousand Laws. Do you really have five Misty Fish in your possession?

The Unparalleled True Monarch was somewhat skeptical, hence his doubtful demeanor.

At that moment, Ye Tian spread out his palm, projecting the scene within his storage realm. Within it, five Misty Fish could be seen swimming about.

As for the other six Misty Fish, they weren't shown.

The Unparalleled True Monarch recognized at a glance that these were indeed five Misty Fish.

Very well, we, the Apotheosis Pavilion, will take these five Misty Fish. What do you desire in return?

The Unparalleled True Monarch spoke generously, his tone suggesting that Apotheosis Pavilion was not short of funds and was ready for Ye Tian to make his demands.

Unparalleled True Monarch, I wish for a portion of Purple River Water, a portion of Ninefold Weak Water, a portion of Ninefold Heavy Water, an Ice Crystal Heart, half a pound of Frost Dew, and a Dream Water Pearl!

Ye Tian listed the items he needed one by one.

These six items were essential for the cultivation of the Water Sinking Realm divine ability and were indispensable.

Only by gathering these six treasures could Ye Tian begin to cultivate the Water Sinking Realm divine ability.

If he were to purchase them himself, there would be nowhere to buy such treasures, as no one would sell such items.

Therefore, Ye Tian could only trade with a top powerhouse like the Apotheosis Pavilion in the Moma Galaxy to quickly gather these six treasures.

These six items are essential for cultivating the Water Sinking Realm divine ability. You must want to cultivate it, right?

The Unparalleled True Monarch said, slightly surprised.

Yes, I wish to cultivate the Water Sinking Realm divine ability!

Ye Tian nodded in acknowledgment.

Heavenly Pride Mo Wen, standing beside him, was incredibly surprised.

He knew better than anyone where Ye Tians Water Sinking Realm divine ability came from.

After all, the legacy site of the Water Cleansing True Lord was something he had told Ye Tian about.

He hadn't expected Ye Tian to actually enter the Water Cleansing True Lord's legacy site and even obtain the Water Sinking Realm divine ability.

The value of a top-tier water divine ability was immensely higher than that of a Misty Fish.

Thinking this way, he realized that Ye Tian had made a huge profit from their initial trade.

However, he didn't feel jealous of Ye Tian, as the Water Sinking Realm divine ability was of no use to him.

Heavenly Pride of Ten Thousand Laws, would you be willing to trade the Water Sinking Realm divine ability?

The Unparalleled True Monarch suddenly asked.

Unparalleled True Monarch, I'm sorry, but I won't trade the Water Sinking Realm divine ability!

Ye Tian flatly refused.

Although Ye Tian declined, the Unparalleled True Monarch wasn't angry but just slightly regretful.

The Apotheosis Pavilion was a top power in the Moma Galaxy and wasn't lacking in divine abilities.

For example, they possessed several water divine abilities, so not being able to trade for the Water Sinking Realm divine ability wasn't a big deal.

Heavenly Pride of Ten Thousand Laws, the six items you mentioned are extremely precious. It's impossible to trade for all six, and even the Apotheosis Pavilion cannot gather them.

The Unparalleled True Monarch stated frankly.

Ye Tian frowned slightly, having guessed that the five Misty Fish might not be enough to trade for these six treasures, but he had tried anyway.

May I ask, Unparalleled True Monarch, how many of the treasures can the Apotheosis Pavilion offer?

Ye Tian inquired.

The Unparalleled True Monarch replied, The Apotheosis Pavilion can provide a portion of Ninefold Weak Water, a portion of Ninefold Heavy Water, and half a pound of Frost Dew. As for the other three items, we indeed do not possess them.

Additionally, I can authorize an extra 100 divine crystals.

Ye Tian pondered for a moment, then said, In addition to the three treasures, I would like an extra 200 divine crystals. If you agree, we can trade now.

If the Apotheosis Pavilion is unwilling, I will seek a trade with other powers.

You

The Unparalleled True Monarch was somewhat annoyed, feeling that Ye Tian was being overbearing.

While 100 or even 200 divine crystals were mere trifles to him, he didnt appreciate being extorted by a junior at the Emperor level.

Had it been any other Emperor acting so presumptuously, he would have crushed them already.

However, Ye Tian was no ordinary Emperor but a Heavenly Pride, and even if he were a weaker one-star Heavenly Pride, the Unparalleled True Monarch wouldnt dare act against him.

Heavenly Prides must not be insulted! Divine beings above the God level must not act against Heavenly Prides; this was a rule set by the human upper echelons. Even as a Planetary Level powerhouse, he dared not violate this rule.

Alright, I agree to your terms!

The Unparalleled True Monarch said after some thought.

He really had no choice but to agree, as the five Misty Fish were indeed very important to the Apotheosis Pavilion.

The Apotheosis Pavilion could maximize the value of the five Misty Fish, and even if they paid a higher price, they wouldn't be at a loss.

Moreover, if the Apotheosis Pavilion didn't trade with Ye Tian, he would trade the Misty Fish with other forces, which was something the Apotheosis Pavilion didn't want to see.

The Apotheosis Pavilion had a competitive relationship with other forces in the Moma Galaxy and naturally didn't want other forces to obtain so many Misty Fish.

Unparalleled True Monarch, since the Apotheosis Pavilion agrees to the trade, as soon as you bring the items I need, I will immediately trade the Misty Fish with the Apotheosis Pavilion.

Ye Tian spoke very seriously.

Wait here for a moment.

The Unparalleled True Monarch vanished instantly.

Heavenly Pride of Ten Thousand Laws, you actually dared to bargain with my master, you're quite bold!

Heavenly Pride Mo Wen said to Ye Tian with a look of surprise.

I am a Heavenly Pride. No matter how strong your master is, he wouldn't dare to harm me, so what is there to fear?

Ye Tian replied very calmly.

You don't understand my master. In the Moma Galaxy, he is known by another title the God of Slaughter. Even Heavenly Prides wouldn't dare to disrespect my master.

Heavenly Pride Mo Wen whispered.

Ye Tian shrugged, not caring about any God of Slaughter title. After all, he wasn't from the Moma Galaxy and wouldn't stay there in the future.

So, he wasn't intimidated.

In less than half an hour, the Unparalleled True Monarch returned.

Upon appearing before Ye Tian, he tossed a spatial ring to him.

Here are the items you requested. Check them.

Ye Tian sent his divine sense into the spatial ring and saw 200 divine crystals and three bottles.

He then took out the three bottles and inspected them one by one.

He confirmed that the bottles indeed contained Ninefold Weak Water, Ninefold Heavy Water, and Frost Dew, and the quantities were accurate.

After confirming everything was correct, Ye Tian took out the five Misty Fish.

Be careful, Unparalleled True Monarch. These five Misty Fish are in their prime and can unleash the Blade of Time! Ye Tian warned.

No worries!

With a wave of his hand, the Unparalleled True Monarch froze the five Misty Fish in place, preventing even the Blade of Time from being unleashed, which showed that their souls were also frozen.

So powerful! Ye Tian silently appraised.

With his current strength, he stood no chance against a Planetary Level powerhouse.

Planetary Level powerhouses were truly terrifying beings beyond his imagination.

Unparalleled True Monarch, could you keep the trade of the Misty Fish with the Apotheosis Pavilion a secret? Ye Tian asked.

Rest assured, the Apotheosis Pavilion will definitely not disclose this!

The Unparalleled True Monarch agreed readily.

After all, he had no intention of revealing this, not even wanting the outside world to know that the Apotheosis Pavilion had acquired so many Misty Fish.

So even if Ye Tian hadn't mentioned it, the Apotheosis Pavilion would have kept it secret.

The Unparalleled True Monarch took the five Misty Fish and left immediately.

Heavenly Pride of Ten Thousand Laws, the trade is complete. I need to return to my seclusion!

Heavenly Pride Mo Wen hastily said.

He was afraid Ye Tian would suddenly propose a sparring match, so he hurried off.

Alright, I should also be leaving!

Ye Tian bid farewell.

Whoosh! Heavenly Pride Mo Wen vanished in an instant.

Ye Tian couldn't help but smile at this, then teleported away.

He was very satisfied with the trade, having acquired three treasures at once.

As for the three missing treasures, he didn't believe other forces in the Moma Galaxy didn't have them.

I'll wait a few more days, then look for other forces to trade the Misty Fish!

Ye Tian secretly planned.

Soon after, Ye Tian left the Moke Star.

Time flew, and six days passed.

One day, Ye Tian arrived at one of the six main planets of the Moma Galaxy, the Gala Star.

Chapter 408: Mastering the Water Sinking Realm, An Upper Eight-Star Peerless Heavenly Pride

Ye Tian came to Gala Star, simply because Gala Star was the closest to Moke Star.

He could have found another major power on Moke Star to trade the Misty Fish with, but after giving it some thought, he decided against it.

The Apotheosis Pavilion was on Moke Star, and if the people from the Apotheosis Pavilion knew he was trading Misty Fish again, it wouldn't be too good.

Although the possibility of being discovered wasn't very high, Ye Tian was a cautious person and thought it best to leave Moke Star and head to Gala Star.

On his way to Gala Star, he had already thought of a plan.

This time, he planned to conduct a trade with the Shaman Temple on Gala Star.

The Shaman Temple was a top-notch major power, second only to the Apotheosis Pavilion. This power had a good reputation, not too overbearing, and more importantly, this power was very wealthy, owning many technology companies and businesses that spread across many galaxies.

It was for these reasons that Ye Tian chose this power.

Such a force wouldn't lack money and wouldn't fear being cheated.

If he had chosen a power with a bad reputation, he would definitely have been cheated, and there was no telling whether they might secretly leak his trading activities. That was also a possibility.

But with a power like the Shaman Temple, which had a good reputation, there was no need to worry about them making any excessive moves.

Soon.

Ye Tian arrived at Gala Star and then, as the Heavenly Pride of Ten Thousand Laws, got in touch with a God-level deacon of the Shaman Temple.

Even for a God-level deacon of the Shaman Temple, a visit from an eight-star peerless Heavenly Pride was treated with great courtesy, something that wouldn't happen for ordinary emperors or common Heavenly Prides.

The God-level deacon Ye Tian met was named Sun Miao. Because he was a deacon of the Shaman Temple, people called him Deacon Sun, and his title was not mentioned.

Deacon Sun, I have a deal for you, and I wonder if the Shaman Temple might be interested, Ye Tian said directly.

Oh, what kind of deal?

Deacon Sun showed a hint of interest.

Misty Fish! And its a Misty Fish with a high-level time talent. Is the Shaman Temple interested? Ye Tian asked.

Misty Fish, really?

Deacon Sun's pupils shrank, and he asked in utter shock.

Indeed!

Ye Tian nodded and projected a Misty Fish from his hand-held Xumi Storage Realm. It was the one he intended to trade this time.

Misty Fish! Wait here, I'll inform the higher-ups of our Shaman Temple! Deacon Sun said.

He was just a minor deacon, not as wealthy as some Heavenly Princes, so he couldn't afford a Misty Fish by himself and had to inform the higher-ups of the Shaman Temple.

Of course, if he facilitated this trade, his commission wouldn't be small.

Thus, if the Shaman Temple traded with Ye Tian, he could benefit greatly, making him very proactive.

At the Shaman Temple.

Deacon Sun came before a Great God-level powerhouse.

This Great God-level individual was one of the high-ranking officials of the Shaman Temple, responsible for trading. Although his strength wasn't very formidable among the Great Gods, his status was quite high.

Great God Carmen, I have urgent news! Deacon Sun hurriedly said.

Deacon Sun, what's the matter? The God spoke very calmly.

Deacon Sun quickly explained the situation with the Heavenly Pride of Ten Thousand Laws and the Misty Fish.

Misty Fish, and it's a Misty Fish with a high-level time talent. This deal is indeed significant, worthy of my personal involvement in the trade. Let's go, lead the way!

Great God Carmen stood up and said.

Yes!

Deacon Sun led Great God Carmen swiftly to where Ye Tian was and introduced him.

Heavenly Pride of Ten Thousand Laws, this is Great God Carmen from our Shaman Temple!

Deacon Sun introduced.

Great God Carmen, hello. I'm here to trade Misty Fish with the Shaman Temple. I wonder if the Shaman Temple is interested, Ye Tian directly said.

Of course we're interested!

Great God Carmen smiled, What do you want? Star points, divine crystals, or other treasures? Our Shaman Temple has everything. As long as the price you ask for matches the value of the Misty Fish, we are very open to trading.

A piece of Purple River Water, an Ice Crystal Heart, or a Dream Water Pearl; any of these three treasures can be traded for my Misty Fish. What do you think? Ye Tian proposed.

In reality, the value of these three treasures was slightly higher than that of a Misty Fish with a high-level time talent, but not by much. He believed that if the Shaman Temple was interested, they would likely agree to the trade.

Your asking price is a bit high, let me think about it!

Great God Carmen pondered for a moment.

Within three minutes, Great God Carmen nodded in agreement: Alright, our Shaman Temple is willing to trade an Ice Crystal Heart for your Misty Fish. How does that sound?

Thats acceptable! But you must ensure that this transaction remains confidential and is not known by outsiders! Ye Tian demanded.

Agreed!

Great God Carmen nodded in agreement.

Immediately, Great God Carmen went to fetch the Ice Crystal Heart.

Soon after, Ye Tian and Great God Carmen completed the transaction, and both parties were very satisfied.

Ye Tian speculated that the Shaman Temple might also possess Purple River Water and Dream Water Pearls, but he didnt pursue the matter further. He planned to continue trading with other major powers, confident that he could obtain Purple River Water and Dream Water Pearls elsewhere without needing to trade with the Shaman Temple again.

Over the next half month, Ye Tian approached four powers and traded four Misty Fish, keeping only one.

He intended to bring this last Misty Fish back to Silver Universe Star to give to his wife as a pet, allowing her to benefit from its time talent in her cultivation.

The four Misty Fish not only enabled Ye Tian to successfully obtain a piece of Purple River Water and a Dream Water Pearl, but also garnered him 30,000 divine crystals and an opportunity to modify his cosmic spaceship.

The chance to modify the cosmic spaceship came from a trade with a vast technological power, which agreed to help Ye Tian upgrade his five-star cosmic spaceship to a six-star personal model.

This meant that Ye Tian could traverse a galaxy in just one day aboard his cosmic spaceship, making it much easier to return to the Milky Way without needing to take specific flights.

Of course,

The modification of the five-star cosmic spaceship would take three months, so Ye Tian couldn't leave the Moma Galaxy during this time.

Having gathered all six materials required for the Water Sinking Realm, Ye Tian now met the qualifications to cultivate it.

Thus, he planned to use this time to diligently cultivate the Water Sinking Realm.

Days passed.

Ye Tian refined a piece of Purple River Water, nine layers of Weak Water, nine layers of Heavy Water, a Dream Water Pearl, an Ice Crystal Heart, and half a pound of Frost Dew into his body in a specific order. This process formed the divine ability patterns of the Water Sinking Realm on his skin, gradually solidifying into divine ability marks.

After two months, Ye Tian finally condensed the divine ability mark of the Water Sinking Realm.

In a space filled with meteorites, Ye Tian prepared to test the power of the Water Sinking Realm divine ability.

Although the Water Sinking Realm was a water-based divine ability, it didn't require physical water. It only needed the water element laws, which were one of the omnipresent fundamental laws of the universe, allowing the Water Sinking Realm divine ability to be used anywhere.

Water Sinking Realm!

A barrier world enveloped by a curtain of water appeared, covering the area.

With a single thought, terrifying power manifested within the Water Sinking Realm.

Boom! Numerous meteorites were pulverized, a force akin to water pressure, but far more terrifying, capable of instantly crushing weaker Heavenly Prides within Ye Tian's Water Sinking Realm divine ability to dust.

What a powerful divine ability. This ability isn't about the strength of its attack, but about suppressing the opponent. If combined with the space talents spatial confinement, it can become even more terrifying! Ye Tian exclaimed excitedly.

Moreover, after mastering the Water Sinking Realm divine ability, Ye Tian felt a significant improvement in his strength, reaching the level of an upper eight-star peerless Heavenly Pride. With a bit more progress, he could reach the combat power of a top-tier eight-star peerless Heavenly Pride.

Now, if I were to face a weaker eight-star peerless Heavenly Pride, I could severely injure them with a single strike! Ye Tian thought confidently.

With one month left before he could retrieve his six-star cosmic spaceship, Ye Tian used this time to deeply comprehend the Sword Dao.

Now, with the ability to activate a 20-fold time acceleration and the assistance of the Ancient Sword Stele, his speed of comprehending the Sword Dao realm was incredibly fast.

A month passed.

My Sword Dao realm is 63% complete. As soon as my Sword Dao realm reaches 65%, Ill be able to fully master the Void God Sword Technique, and my strength should be sufficient to step into the combat power of a top-tier eight-star peerless Heavenly Pride! Ye Tian envisioned.

Its time to retrieve the six-star cosmic spaceship!

Ye Tian set off towards the Moang Technology Group, which was assisting him with the spaceship modification.

Chapter 409: Six-Star Cosmic Spaceship, Return to Earth

Moang Technology Group was the largest tech conglomerate in the Moma Galaxy, capable of producing both six-star and five-star cosmic spaceships. Many galaxies purchased their spaceships from Moma Technology Group.

For instance, the Andromeda Galaxy could only produce five-star cosmic spaceships and lacked the capability to produce six-star ones. Most of their six-star spaceships were also purchased from the Moma Galaxy.

On Moang Star, Ye Tian arrived and met with a manager from Moang Technology Group.

This manager, named Lin Chen, was the same one Ye Tian had dealt with in their previous transaction.

Manager Lin, is my spaceship modification complete? Ye Tian inquired.

Its all set. Heavenly Pride of Ten Thousand Laws, Ill show you around! Manager Lin responded.

Great! Ye Tian followed Manager Lin to a cosmic spaceship construction base of Moang Technology Group.

There, he saw his spaceship. Its system remained largely unchanged, with modifications only to the material, certain functionalities, and the energy unit.

Unlike other spaceships, a six-star cosmic spaceship utilizes stellar energy, incorporating a miniature stellar core as its energy unit.

Such a device could last for tens of thousands of years without issues. However, after that period, it would require a new energy unit. This limitation arises from the current technological constraints; even a stellar core was not eternal. By extracting and converting a stellar core into an energy device, its perpetual endurance could not be guaranteed.

This was akin to a battery, where a battery's lifespan diminished with use and eventually required replacement.

Ye Tian boarded his spaceship and found its interior completely revamped.

He checked the spaceship's functionalities, which were significantly more advanced than before.

Excellent, Manager Lin. I'm very satisfied. It's been a pleasure doing business with you, Ye Tian expressed with a smile.

The pleasure is all mine, Manager Lin replied politely.

Subsequently, Ye Tian left Moang Star and departed the Moma Galaxy aboard his six-star cosmic spaceship.

He planned to make a trip back to the Milky Way. With the speed of a six-star cosmic spaceship, the journey back to the Milky Way would only take about a dozen days, so it wouldn't cause much delay.

A dozen days later, Ye Tian returned to the Milky Way, Silver Universe Star.

Husband, you're back! Empress Yue exclaimed with excitement upon seeing Ye Tian.

The two embraced each other tightly for a long time.

Yueer, has anything happened recently? Ye Tian asked with concern.

Nothing much, but let me share some good news with you: Ive become a Heavenly Pride! Empress Yue immediately shared her achievement with Ye Tian.

My Yueer is truly remarkable! Ye Tian praised.

Then, he took out a Misty Fish, which he had hypnotized so it wouldnt attack him or Empress Yue.

Yueer, this is a Misty Fish with a high-level time talent. Im giving it to you as a pet. With it, you can utilize a tenfold time acceleration for your cultivation! Ye Tian pointed out.

This fish has a high-level time talent?! Empress Yue was astonished.

Time talents were exceedingly rare, especially high-level ones.

Although the Saintess of the Moon God Sect also had a beast with a time talent, its talent was inferior compared to this Misty Fish.

Thank you, husband! Empress Yue gratefully accepted the Misty Fish.

In his heart, Ye Tian had considered seizing the time talent from the Misty Fish and bestowing it upon Empress Yue. However, he decided against it.

Since the Misty Fish was a Demigod level creature, far stronger than Empress Yue, it could serve as a formidable protector for her. Moreover, without the restrictions of the Water Cleansing Realm, it had the potential to advance to a God-level being.

Thus, once it fully accepted Empress Yue as its master, she would essentially possess a God-level Misty Fish with a high-level time talent, akin to having a powerful bodyguard.

Therefore, Ye Tian chose not to seize the Misty Fishs time talent.

Even if he wanted to, it would be challenging due to the fishs strong soul.

Once this Misty Fishs potential is fully realized, cultivating to the peak of God-level, Ill consider seizing its time talent and giving it to Yueer then.

Ye Tian made such a plan.

Husband, what are your plans next? Empress Yue suddenly asked.

Ye Tian pondered for a moment and said, Ill make a trip to the Solar System to check on the development of the Tian Pavilion and then go into seclusion to cultivate for a period.

Ye Tian wanted to perfect his Void God Sword Technique and comprehend the mysteries of time.

These were his next objectives.

Thats good! Empress Yue sighed in relief, genuinely worried that Ye Tian might leave immediately, unsure of when they would meet again.

Lets go to the Solar System together! Ye Tian took Empress Yues hand, left Silver Universe Star, and then summoned his six-star cosmic spaceship in the starry sky.

Husband, did you change your spaceship? Empress Yue, noticing the difference in Ye Tians spaceship, curiously asked.

It hasnt been replaced, just modified. Its now a six-star cosmic spaceship. It can traverse a galaxy in just a day, which is very fast! Ye Tian explained.

A six-star cosmic spaceship! Empress Yue was quite astonished. In the Milky Way, even five-star cosmic spaceships were extremely valuable. Six-star cosmic spaceships were beyond the reach of even the spaceship transportation companies and tech groups. Probably only the powerful Great God-level beings had the chance to possess six-star cosmic spaceships.

Whoosh! The six-star cosmic spaceship activated and reached the Solar System in less than a minute.

The Solar System, Earth.

Ye Tian returned hand in hand with Empress Yue.

At this time, Earth was thriving. Humanity had gained full control over Earth, and ferocious beasts were domesticated.

Additionally, many Emperor-level beings had ventured beyond Earth, and a few had even reached the God level.

Yes! Earth now had God-level beings. Those Emperor-level beings without ambition or potential to reach the Heavenly Pride level couldn't resist the urge to break through to the God level, especially a few Emperor-level beings with Morning Star-level cultivation talents.

One of them was Ling Fei from the Hall of Glory, who had now become God Ling Fei.

When Ye Tian arrived at the Zhonghai Super Base, the Emperor-level beings of the Tian Pavilion came to meet him, and many Emperors from China also came to pay their respects.

Outside the Tian Pavilion, hundreds of Emperor-level beings bowed and said, Greetings to the Pavilion Master!

Although Ye Tian was not present in the Tian Pavilion, he remained its master, with his sister Ye Yu serving as the deputy master.

Brother, you're back! Ye Yu came out of her seclusion, visibly excited.

By now, Ye Yu had made significant progress, especially since Ye Tian had returned to Earth specifically to give her body cultivation techniques, yuan force defense techniques, and various resources, which accelerated her cultivation.

Currently, Ye Yu possessed the strength of an eight-star Emperor.

Little Yu, you've made good progress. Let's go inside and talk! Ye Tian said with a smile.

Just then, a powerful presence approached.

Boom! A surge of divine power filled the void, signaling the arrival of a God-level being.

Greetings to God Ling Fei! Many Emperors respectfully said.

God Ling Fei ignored these Emperors and approached Ye Tian, bowing, Greetings to the Heavenly Pride of Ten Thousand Laws!

God Ling Fei, youre at the God level, no need for formalities. I have other matters to attend to, well talk another time! Ye Tian spoke indifferently.

Yes! God Ling Fei bowed his head in silence.

Then, Ye Tian, Ye Yu, and the others entered the Tian Pavilion, followed by the Pavilions Emperor-level beings.

However, many Emperors from other forces remained outside, puzzled.

One Emperor stepped forward and asked, Lord God Ling Fei, you are one of the few God-level beings on Earth, yet you show such respect to the Heavenly Pride of Ten Thousand Laws, who is still at the Emperor level. Why is that?

Boom! God Ling Fei glared, unleashing divine power that severely injured the questioning Emperor.

Hmph, what do you know? The Heavenly Pride of Ten Thousand Laws is not someone I can compare with. You probably havent been to the bustling areas of the Milky Way. If you had, youd understand the terror of the Heavenly Pride of Ten Thousand Laws. Not just me, but even if all the God-level beings on Earth joined forces, they wouldnt match up to him! God Ling Fei said, then left.

How is that possible?! The injured Emperors pupils contracted.

He had thought that God Ling Fei and the other God-level beings had surpassed Ye Tian in status and strength after ascending to the God level.

Yet God Ling Fei claimed that Ye Tian far exceeded them, even at the God level!

Chapter 410: Target: The Mira Sutra!

God Ling Fei had left, but the other emperors did not depart.

At this time, a seven-star Emperor spoke in a low voice, Emperor Chen Hai, do you know why God Ling Fei said he was far inferior to the Heavenly Pride of Ten Thousand Laws?

Emperor Chen Hai, the one who had questioned God Ling Fei earlier, was still puzzled.

Why, could it be that a Heavenly Pride is even stronger than a God?

The seven-star Emperor explained, Your strength is still weak, having never left Earth, and you are completely unaware of the strength divisions beyond our world.

The power of a Heavenly Pride not only far surpasses that of an Emperor Level but also holds a special status. It is said that even those terrifying existences above the God Level dare not offend a Heavenly Pride. If a being above God Level dares to kill a Heavenly Pride, even if they belong to a massive force with a vast number of God Level powerhouses, they would be erased.

Moreover, Heavenly Prides are divided into different tiers, such as one-star Heavenly Prides, two-star Heavenly Prides, three-star Heavenly Prides, and so on

One-star to five-star Heavenly Prides are considered to have Sovereign Emperor Level combat strength. Six-star and above are Supreme Emperors. A six-star peerless Heavenly Pride could even be comparable to a God Level powerhouse who has ascended from the nine star Emperor Level.

Lord God Ling Fei was previously at the nine star Emperor Level, and he has only recently broken through to the God Level. His strength was equivalent to that of a six-star peerless Heavenly Pride, and even far inferior to a seven-star peerless Heavenly Pride.

And Lord Heavenly Pride of Ten Thousand Laws is an eight-star peerless Heavenly Pride, the number one Heavenly Pride of the Milky Way Galaxy. It is said that many Heavenly Prides have fallen at his hands, and he has even slain a seven-star peerless Heavenly Pride!

An eight-star peerless Heavenly Pride!!!

Emperor Chen Hai truly realized the strength and terror of Ye Tian.

In other words, in a confrontation between the Heavenly Pride of Ten Thousand Laws and God Ling Fei, the former could instantly annihilate God Ling Fei. The two were nearly not on the same level of combat strength! Instantly, his reverence for the Heavenly Pride of Ten Thousand Laws deepened! Ye Tian did not pay attention to the discussions about him. At this moment, he briefly inquired about the development of the Heavenly Pavilion and then handed over some cultivation resources to Ye Yu.

This time, Ye Tian stayed on Earth for just a few days before returning to Silver Universe Star.

Upon his return, Ye Tian and Empress Yue began their secluded cultivation.

This time.

Ye Tian devoted himself to comprehending the Sword Dao and the mysteries of time.

Although he possessed a time wondrous object, the mysteries of time were even more difficult to comprehend than those of space, and it would take some time to grasp them.

With a twenty-fold acceleration of time, Ye Tian spent a month in the real world. With the help of top-tier innate talent and the Ancient Sword Stele, he advanced his comprehension of the Sword Dao to 64%.

After another month and a half, he finally elevated his comprehension of the Sword Dao to 65%.

Reaching 65% in the Sword Dao meant he could elevate ordinary Super God Level sword techniques to the major realm and could perfect the Phantom God Sword Technique, a Super God Level sword technique involving space, to the perfected realm.

As for the mysteries of time, he spent some time on it and seemed to be on the verge of a breakthrough.

Thus, in the following days, Ye Tian alternated between comprehending the mysteries of time and cultivating the Phantom God Sword Technique.

Three months passed in this manner.

The Phantom God Sword Technique had already reached the perfected realm, elevating Ye Tians strength to the top-tier eight-star peerless Heavenly Pride level, and he was close to comprehending the mysteries of time.

One day.

As usual, Ye Tian sat beside the time wondrous object, delving into the mysteries of time.

Suddenly.

Buzz! A peculiar fluctuation emanated from him, and he grasped the essence of time.

He had successfully comprehended a trace of the mysteries of time! This trace opened the door to time for Ye Tian, allowing him to grasp a sliver of its rules.

With the aid of the time wondrous object, Ye Tians comprehension of time accelerated.

One trace!

Two traces!

Three traces!

He quickly reached 10% in the realm of the mysteries of time.

[Time Mysteries: Pseudo-Mystic 10%]

Ye Tian, looking at his now fully transformed and upgraded time talent to the Pseudo-Mystic level, couldn't help but burst into laughter with excitement.

With the transformation of the time talent, its power surged.

His abilities to accelerate and decelerate time could be amplified to thirtyfold, and the Blade of Time could strip away 300 years of a person's lifespan.

With the transformation of my time talent and the perfection of the Phantom God Sword Technique, my current strength is enough to rank among the very top of the eight-star peerless Heavenly Prides, second only to the nine star peerless Heavenly Prides!

Ye Tian declared confidently.

He had never encountered a nine star peerless Heavenly Pride, nor did he know how powerful a nine star peerless Heavenly Pride truly was.

However, he felt that even if he were to face a slightly weaker nine star peerless Heavenly Pride, he would still have the capability to save his own life.

Ye Tian had emerged from seclusion! It would be difficult for him to make further progress in a short period of time.

Even if he were to comprehend the Sword Dao to a higher level, he wouldn't be able to enhance his strength because the strongest sword technique he possessed was only at the Super God Level. As for techniques above the Super God Level, he didn't have any, and neither did the Heavenly Pride Pavilion.

He even doubted that the Milky Way Galaxy possessed any sword techniques surpassing the Super God Level.

Therefore, staying in the Milky Way Galaxy, or even in the Moma Galaxy, wouldnt significantly boost his strength.

Should I go to the Hengpan Galaxy System?

Ye Tian hesitated.

The Hengpan Galaxy System was the center of the Pan Star Field, the most prosperous area in the entire Pan Star Field in terms of martial arts development. It was also the galaxy system with the densest yuan qi, the richest resources, and the most powerhouses.

It could even be said that the most powerful hegemonic forces of the Pan Star Field were located in the Hengpan Galaxy System.

The Heavenly Pride Battle was organized by several hegemonic forces from the Hengpan Galaxy System, and the ultimate destination for Heavenly Prides aspiring to become Children of the Universe was also the Hengpan Galaxy System.

Although Ye Tian was very confident in his talent, he wasnt entirely sure he could become a Child of the Universe if he just continued to cultivate in seclusion.

Therefore, he must make a trip to the Hengpan Galaxy System.

If he entered the Hengpan Galaxy System, he might be able to replicate more exceptional talents.

But entering the Hengpan Galaxy System now was not the best timing.

His foundation was still insufficient! The Hengpan Galaxy System surely had many eight-star peerless Heavenly Prides, and even more than one or two nine star peerless Heavenly Prides.

How could he compete with nine star peerless Heavenly Prides for opportunities? Perhaps those nine star peerless Heavenly Prides, in order to eliminate threats, would massacre those eight-star peerless Heavenly Prides without backing, and he would definitely be one of their targets.

Thus, he wanted to accumulate some foundation before heading to the Hengpan Galaxy System.

After much contemplation, Ye Tian finally made a decision.

Go to the Andromeda Galaxy!

Ye Tian asserted.

There were no eight-star peerless Heavenly Prides in the Andromeda Galaxy, and he had been there before, even sweeping through the Andromeda Galaxy.

It was difficult for the Andromeda Galaxy to enhance his strength, but there was another opportunity in the Andromeda Galaxy.

The Mira Sutra!

The Mira Sutra had previously emerged in the Andromeda Galaxy, followed by a great battle in the Andromeda Galaxy involving many God Level and True God beings.

However, beings at the Great God level and above did not care about a nine star wondrous object and thus did not participate in the battle.

In the end, the Mira Sutra was divided into many parts, and a portion was brought into the Milky Way Galaxy.

Ye Tian always felt that the Mira Sutra contained a secret, and he had already collected three pages of the Mira Sutra.

According to his understanding, the Mira Sutra had a total of eighteen pages.

Most of the Mira Sutra was in the Andromeda Galaxy. If he could collect the entire Mira Sutra, he might uncover its secrets, which could greatly aid his strength.

The core of the Mira Sutra should be the Xumi Storage Realm. Now that I have the Xumi Storage Realm in my hands, others who have obtained other pages of the Mira Sutra won't find much use for them, and many probably don't have much expectation for the Mira Sutra anymore.

If I wanted to collect the Mira Sutra, many would probably be willing to trade with me! Ye Tian speculated.

Having made his decision, Ye Tian resolved to go to the Andromeda Galaxy.

However, before heading to the Andromeda Galaxy, Ye Tian saw that the cooldown period for his talent-copying ability, Seizure and Bestowal, had ended. He then stripped the God Level strength talent from the Bloodhand Heavenly Pride and bestowed it upon Empress Yue, granting her the God Level strength talent.

Afterward, he left Silver Universe Star and, aboard a six-star level cosmic spaceship, arrived at the Andromeda Galaxy the next day.

Upon arrival, he met again with the Heavenly Pride Hong Yang and the Heavenly Pride Lie Jun at Xianqiong Star.

The return visit of Ye Tian surprised both Heavenly Pride Hong Yang and Heavenly Pride Lie Jun.

Heavenly Pride of Ten Thousand Laws, I didn't expect that we would meet again just a year later!

Heavenly Pride Lie Jun was quite astonished.

Logically, an eight-star peerless Heavenly Pride like Ye Tian shouldn't be visiting a minor galaxy like the Andromeda Galaxy. Instead, he should be in the Moma Galaxy or even stronger galaxy systems, competing with other eight-star peerless Heavenly Prides to make a name for himself in the Pan Star Field.
