

## Talent 421

Chapter 421: The Land of Inheritance, The Origin Artifact

Grand Elder Yun Zhen, are Yun Chen and Yun Ke really gone? Yun Xingling still wore an incredulous expression. How did the situation reverse so suddenly?

It's true that they have fallen! Although I am physically on Panyun Star, my attention has always been here. I saw with my own eyes that Yun Chen and Yun Ke died at the hands of the Heavenly Pride of Ten Thousand Laws, Grand Elder Yun Zhen said angrily.

Were they armed with the Blood Devouring Sword? How could they Yun Xingling was full of doubts.

The Blood Devouring Sword is useless against the Heavenly Pride of Ten Thousand Laws! Grand Elder Yun Zhen also frowned deeply and said, I witnessed them both activating the Blood Devouring Sword, and they even struck the Heavenly Pride of Ten Thousand Laws. I thought that the Heavenly Pride would suffer a great loss in strength and a significant reduction in lifespan, becoming extremely weak. However, to my surprise, there was no change in him after being struck by the Blood Devouring Sword, which is something I don't understand.

The Blood Devouring Sword is useless, which is why I stopped you from fighting with the Heavenly Pride of Ten Thousand Laws. The Heavenly Pride possesses several talents that can heal injuries, making it very difficult to kill him. In the end, you would be the one to fall! Grand Elder Yun Zhen's words shocked Yun Xingling.

The Blood Devouring Sword is a forbidden weapon in the Hengpan Galaxy, and even he was extremely wary and fearful of such a weapon. Yet, Ye Tian endured two attacks from the Blood Devouring Sword without any issue. This was too exaggerated! For a moment, Yun Xingling felt fear towards Ye Tian.

In the distance.

The Yun family's Heavenly Prides from Flying Emperor Star were indeed watching a shocking drama unfold. The three eight-star peerless Heavenly Prides of the Yun family from Panyun Star, who were attacking an eight-star peerless Heavenly Pride, ended up losing two of their own. Now, the Yun family from Panyun Star was left with only one eight-star peerless Heavenly Pride.

It's worth noting that the Yun family from Panyun Star had already lost four seven-star peerless Heavenly Prides, which was almost a destruction of the lineage at the seven-star peerless Heavenly Pride level. Although the Yun family from Panyun Star was still the strongest branch among all the Yun family branches, they were subtly inferior to the other branches at the Heavenly Pride level.

For the Yun family from Flying Emperor Star, this situation was a pleasure to see. However, they didn't dare to show excitement, but their hearts were blooming with joy.

Over the next day.

Heavenly Prides from other branches of the Yun family arrived one after another. Some branches brought over a dozen Heavenly Prides, while some only had one or two. But the total number of Heavenly Prides gathered reached a hundred! These Heavenly Prides were almost all from the Yun family.

Just the Yun family alone had produced so many Heavenly Prides, yet when all branches of the Yun family were united, they were merely an ordinary nine-star level force in the Hengpan Galaxy. This gives an idea of how many Heavenly Prides the four dominant forces must have cultivated a truly terrifying number.

Due to Ye Tian's presence, the Heavenly Prides from the Yun family on Panyun Star didn't dare to deal with Yun Xi, fearing that Ye Tian would go all out and annihilate them all. Of course, Ye Tian wouldn't be so reckless! If he were to kill all the Heavenly Prides of the Yun family from Panyun Star in this generation, the Yun family from Panyun Star would definitely go mad, and they might even hire nine-star peerless Heavenly Prides to hunt him down.

Therefore, thoroughly provoking the Yun family from Panyun Star was of no benefit to him. He had already killed two eight-star peerless Heavenly Prides and four seven-star peerless Heavenly Prides from the Yun family from Panyun Star, and such achievements were enough to deter all the Heavenly Prides of the Yun family from Panyun Star.

Beside him, Yun Xi looked at Ye Tian with eyes full of admiration. He deterred an entire family single-handedly. She felt fortunate that her ancestor had arranged for Ye Tian to protect her; otherwise, if she had come here alone, even ten lives wouldn't have been enough to survive.

That day.

Boom! Yun Jue Star began to shake violently.

The land of our ancestors inheritance is about to open! a Heavenly Pride exclaimed excitedly.

The land of ancestral inheritance contained the Origin Artifact, which was an incredible opportunity for every Yun family Heavenly Pride. If they were lucky, they might experience a meteoric rise in power.

At this moment, Yun Xi was also very excited. Since her lineage arrived in the Milky Way, almost no one had been able to enter the land of ancestral inheritance. And now, she had achieved this goal.

Yun Jue Star shook intensely, as if the entire planet was about to shatter. Suddenly, a cloud of mist appeared above Yun Jue Star. This mist prevented the poisonous gas of Yun Jue Star from invading, even dispersing the poison gas.

Within the mist, a grand door faintly appeared.

Clearly, behind that door lay the Yun familys ancestral land of inheritance.

Swiftly, the Heavenly Prides from various branches of the Yun family flew into Yun Jue Star, entering the land of ancestral inheritance.

Before Yun Xingling and the other Heavenly Prides entered, Grand Elder Yun Zhen reminded them, After you enter, do not conflict with the Heavenly Pride of Ten Thousand Laws. If you see him, leave immediately, understand?

Yes! Yun Xingling and the others quickly responded.

They were indeed afraid of Ye Tian. Yun Xingling was slightly better off since his strength was on par with Ye Tians. Although a prolonged battle would likely result in Ye Tian wearing him down, Yun Xingling could escape if he chose to, as Ye Tian wouldnt be able to kill him. After all, he had many treasures to protect his life.

The ones truly afraid were the other Heavenly Prides, who were relatively weaker. Against Ye Tian, they wouldn't be able to withstand even a single blow and would be instantly killed.

The Heavenly Prides of the Yun family from Panyun Star each flew into Yun Jue Star and soon passed through the misty gate into the ancestral land of inheritance.

Yun Xi, let's go in too! Ye Tian was also quite looking forward to the Yun family's ancestral land of inheritance.

He had never encountered an Origin Artifact before. If he could find the Origin Artifact related to the Sword Dao this time, and significantly enhance his Sword Dao, his strength would also improve substantially.

Ye Tian and Yun Xi entered Yun Jue Star and soon stepped through the misty gate into a mountain peak within the Yun family's ancestral land of inheritance, where a spatial gate was located. Ye Tian and Yun Xi emerged from it.

Looking around, they found themselves in a mountain range.

There's no trace of an Origin Artifact nearby; let's go elsewhere! Ye Tian suggested.

Okay! Yun Xi nodded.

She had a certain understanding of the ancestral land of inheritance. Although it contained Origin Artifacts, they were extremely rare and difficult to find. It was said that Origin Artifacts were sentient and mobile, not fixed in one location.

Moreover, the Yun family's ancestors had set rules for these Origin Artifacts; others couldn't take them away, considering the long-term development of the Yun family. The origin energy within the Origin Artifacts was limited, and once depleted, the objects would disappear.

The Yun family's ancestral land of inheritance could slowly recover the Origin Artifacts, allowing the Yun family to utilize them to cultivate their Heavenly Prides over the long term, as long as the ancestral land was opened periodically.

While these rules seemed beneficial, they also indicated that the Yun family wasn't very powerful. For the four dominant forces, using Origin Artifacts to cultivate their Heavenly Prides would be an easy task, and obtaining Origin Artifacts wouldn't be difficult with their strength.

However, for Ye Tian, he had no access to Origin Artifacts, so encountering such a great opportunity this time was a stroke of luck.

Swiftly, Ye Tian and Yun Xi flew through the ancestral land, searching for traces of Origin Artifacts. Meanwhile, Ye Tian activated his treasure-finding talent, attempting to sense the traces of treasures.

Suddenly, a vibrant five-colored light appeared within the range of his treasure-finding talent, far surpassing any five-colored light Ye Tian had seen before.

Could it be an Origin Artifact? Ye Tian wondered.

Yun Xi, let's head in that direction! Ye Tian pointed towards the source of the five-colored light.

Okay! Yun Xi nodded.

Soon, they arrived at the location of the five-colored light, which was a mountain stream. Scanning with their divine consciousness, they immediately spotted a large hammer floating above a massive rock, constantly vibrating.

An Origin Artifact! Ye Tian sensed the power of the origin, reminiscent of the primal force present at the birth of planets. Supreme and unparalleled!

Just the aura alone far surpasses the nine-star wondrous object, the Mira Sutra! Ye Tian exclaimed.

Unfortunately, this was a hammer-type Origin Artifact, which was of little use to both Ye Tian and Yun Xi. Disappointed, they left to continue searching for other Origin Artifacts.

Chapter 422: Gold Origin Artifact, Completion of the Phantom Gold Thread Divine Ability

Not long after, Ye Tian and Yun Xi arrived at a stone mountain.

By then, about seven or eight Heavenly Prides had already gathered there.

Ye Tians treasure-hunting talent sensed an extremely dense aura of multicolored light, coupled with the convergence of so many Heavenly Prides here.

It was clear that there must be an Origin Artifact here! As Ye Tian and Yun Xi stepped into the stone mountain, they felt a supremely strong sword aura pressing down on them.

The scene before their eyes changed.

Atop the stone mountain, an ancient and massive stone sword was embedded in the earth.

Countless sword lights and shadows emerged around, presenting a spectacle of billions of sword lights.

An Origin Artifact of the Sword Dao!

Yun Xi was overjoyed.

Her purpose here was to use the Sword Dao Origin Artifact to enhance her Sword Dao realm and to see if there was a chance for her swordsmanship talent to evolve to another level.

An Origin Artifact contains a type of origin essence, and by contemplating the corresponding Dao near the Origin Artifact, one can speed up their comprehension.

For example, being near this Sword Dao Origin Artifact and contemplating the Sword Dao could potentially increase the speed of comprehension by many times.

However, the fastest method is to absorb a strand of Sword Dao origin essence, which could directly enhance ones Sword Dao from fifty percent to seventy percent, and it might even be possible to evolve the swordsmanship talent by one or twenty-one levels.

But there are not many strands of Sword Dao origin essence in the entire Sword Dao Origin Artifact, so its quite difficult to absorb one.

The Heavenly Pride of Ten Thousand Laws, Im going to approach the Sword Dao Origin Artifact now! Yun Xi said to Ye Tian.

Go ahead, Ye Tian nodded.

He also possessed a talent for swordsmanship, but his main focus was not on the Sword Dao, so he did not want to waste his strength on contemplating the Sword Dao.

After all, the time he could spend in the Yun familys ancestral land was limited, typically only a month before he must leave. If one refuses to leave forcibly, they will be transported away.

Therefore, Ye Tian naturally wanted to find a Dao Origin Artifact related to sabers.

If there was no Dao Origin Artifact for sabers, then an Origin Artifact related to the gold element, fire element, or water element would also suffice.

As for space and time Origin Artifacts, he did not believe that the Yun family, being relatively minor, would possess them, so he did not hold any expectations.

Ye Tian did not leave immediately but watched as Yun Xi step by step approached the Sword Dao Origin Artifact.

The Sword Dao Origin Artifact has a peculiar property: if one does not possess a talent for swordsmanship, rashly approaching it would result in oppression and attacks from the Origin Artifact.

Only martial warriors with a talent for swordsmanship can approach the Sword Dao Origin Artifact and be favored by it.

The same is true for other Origin Artifacts! At this moment, several Heavenly Prides were approaching the Sword Dao Origin Artifact, all wanting to get closer to it because the closer they were, the better the effect of contemplation and the higher the chance of absorbing a

strand of Sword Dao origin essence. From a distance, there would be no chance at all to absorb any Sword Dao origin essence.

Without a doubt.

The Heavenly Prides with higher swordsmanship talents and stronger abilities could naturally get closer to the Sword Dao Origin Artifact.

Among these Heavenly Prides, Yun Xi didnt have much advantage.

After walking a distance, Yun Xi was sweating profusely, obviously finding it difficult to get any closer to the Sword Dao Origin Artifact; she had nearly reached her limit.

At that moment.

She took out a sword tip, seemingly the broken tip of some sword.

But with this mysterious broken tip, Yun Xi was able to get closer to the Sword Dao Origin Artifact and did so more easily.

Before long.

She had completely approached the Sword Dao Origin Artifact, sat down, and began to contemplate and comprehend.

The other Heavenly Prides, witnessing this scene, were stunned and showed envious, jealous, and even greedy expressions.

That broken tip what kind of sword is it a fragment of that allowed her to approach the Sword Dao Origin Artifact completely!

If I also had that broken tip, wouldnt I be able to enter in front of the Sword Dao Origin Artifact too?

An invaluable treasure, that broken tip is definitely an invaluable treasure!

Ye Tian was also very interested in that mysterious broken tip; he guessed that it must have been given to Yun Xi by Elder Yun, perhaps a treasure left by the ancestors of the Yun family.

No wonder the Yun family spared no expense to allow Yun Xi to enter the ancestral land of the Yun family in the Hengpan Galaxy. Although this place is a land of inheritance, the real benefits one can obtain still depend on individual destiny.

If Yun Xi did not have that broken tip, her gains would not surpass those of other Heavenly Prides of the Yun family.

Merely relying on this opportunity would not allow Yun Xi to surpass the Heavenly Prides of the Yun family on the Panyun Star in the Hengpan Galaxy.

This broken tip is the key to Yun Xi's complete rise; it might even help her absorb a strand of Sword Dao origin essence!

Ye Tian speculated as such.

Sure enough.

Not much later, the Sword Dao Origin Artifact began to tremble.

A strand of Sword Dao origin essence suddenly flew out from within the Origin Artifact and entered Yun Xi's body.

Yun Xi was seen absorbing this strand of Sword Dao origin essence, and the aura of her Sword Dao increased at an incredible rate.

According to this speed, it will take Yun Xi about half a month to fully absorb this strand of Sword Dao origin essence!

Ye Tian could not possibly wait here for half a month; that would be a waste of his opportunity to enter the Yun family's ancestral land! Without disturbing Yun Xi, Ye Tian left the place.

Afterward, Ye Tian began to search for other Origin Artifacts.

Another day passed.

On this day, Ye Tian finally found a satisfactory Origin Artifact it was a gold element Origin Artifact, shaped like a golden stone.

As for the Dao Origin Artifact for sabers, he did not find one.

By Ye Tians estimation, there probably wasnt a Dao Origin Artifact for sabers in the Yun familys ancestral land.

I should have thought of it earlier. Elder Yun is so familiar with the Yun familys ancestral land. If there were a Dao Origin Artifact for sabers, he would definitely have mentioned it to attract me, but he didnt mention the Dao Origin Artifact for sabers, just vaguely talked about the benefits of Origin Artifacts.

It seems that there really isnt a Dao Origin Artifact for sabers here!

Ye Tian thought to himself.

Although there wasnt a Dao Origin Artifact for sabers, having this gold element Origin Artifact still made Ye Tian quite satisfied.

This Origin Artifact was located in the center of a stone forest, amidst countless piled-up rocks.

The golden glow seemed to form a world of gold, with strands of gold element laws manifesting.

At this time, there were no other Heavenly Prides around.

Perhaps no one had found this place, or perhaps someone had found it but did not possess gold element divine abilities or talents, making the gold element Origin Artifact of little use to them, so they left.

The gold element Origin Artifact can enhance the realm of gold element divine abilities. Some Heavenly Prides in the Hengpan Galaxy have raised their divine abilities to the minor completion and major completion stages by relying on Origin Artifacts. My Phantom Gold Thread divine ability is still at the beginner level. If I use the gold element Origin Artifact to advance my Phantom Gold Thread divine ability to the major completion or even the perfected realm, I might be able to step into the level of the peerless Heavenly Pride of the nine stars!

Ye Tian excitedly thought to himself.

He approached the gold element Origin Artifact step by step, gradually feeling the oppressive force brought by the essence of the gold element laws. However, having a God-level talent in the gold element and having cultivated the top-tier gold element divine ability, Phantom Gold Thread, Ye Tian could still withstand such oppression.

But as Ye Tian got close to the gold element Origin Artifact, he felt as if there was an insurmountable barrier preventing him from getting completely close to it.

Cant get close?

Ye Tian frowned slightly.

However, he was not too disappointed.

He possessed a time talent, and currently, it was at the pseudo-mystic level, capable of amplifying time by 30 times.

This meant he had 30 times more time than other Heavenly Prides, plus the 20 times intellect amplification from his top-tier comprehension talent.

Even if he were just to contemplate here, his progress would be hundreds of times faster than others!

With my advantages, I can definitely comprehend more of the gold element laws and advance the Phantom Gold Thread divine ability to a higher realm. Maybe if I have a deeper understanding of the gold element laws, I can directly absorb a strand of gold element origin!

With this thought, Ye Tian was no longer fixated on getting close to the gold element Origin Artifact but sat down cross-legged and began to contemplate.

Activate time talent!

Activate top-tier comprehension talent!

Ye Tian felt as if he was immersed in the ocean of gold element laws, comparing them to the divine ability imprints of the Phantom Gold Thread divine ability, and began to comprehend continuously.

As time passed, Ye Tian gradually felt the broad and smooth path of advancement and enhancement of the Phantom Gold Thread divine ability.

In the blink of an eye.

Five days had passed, and under the effect of his time talent, Ye Tian had contemplated for a full 150 days.

By then, Ye Tians beginner-level Phantom Gold Thread divine ability had advanced to the major completion level.

Chapter 423: Nine-Star Peerless Heavenly Pride!

Still a bit short!

Ye Tian thought that after his Phantom Gold Thread divine ability reached the major realm, he would be able to step into the tier of a nine star peerless Heavenly Pride.

However, to his surprise, even after the Phantom Gold Thread divine ability had reached the major realm, he remained at the level of an eight-star peerless Heavenly Pride! Nevertheless, Ye Tian was already at the pinnacle of the eight-star peerless Heavenly Pride level.

With just a bit more progress, he would be able to break through the shackles and successfully ascend to the level of a nine star peerless Heavenly Pride.

According to Ye Tians estimation, as long as the Phantom Gold Thread divine ability reached the perfected realm, he would surely become a nine star peerless Heavenly Pride.

Moreover, Ye Tian had already successfully sensed the origin of this gold-based Origin Artifact.

Although he was not yet able to draw a trace of the gold origin, given a bit more time, he would.

By then, Ye Tians Phantom Gold Thread divine ability would definitely reach the perfected realm, and he might even retain a bit of the gold origin.

Continue cultivating!

Ye Tian once again immersed himself in cultivation.

Three days passed quickly.

On this day, Ye Tian felt a special connection with the origin of the gold-based Origin Artifact.

He felt that he could now draw out a trace of the gold origin.

Immediately, he began to activate the Phantom Gold Thread divine abilitys imprint, connecting to the gold origin in the unknown.

Boom! The gold-based Origin Artifact began to tremble.

Suddenly, a trace of the gold origin flew out from the Origin Artifact into Ye Tians body, slowly being absorbed and refined by him.

Ye Tians Iron Armor Talent had already reached the level of a God, and could no longer be enhanced, making the gold origin useless for his Iron Armor Talent. However, it could enhance Ye Tians Phantom Gold Thread divine ability.

As the Phantom Gold Thread divine abilitys imprint absorbed this trace of gold origin, a revolutionary transformation occurred.

With a thirty-fold acceleration of time, it took Ye Tian less than half a day in the outside world to successfully elevate the Phantom Gold Thread divine ability to the perfected realm.

Once the Phantom Gold Thread divine ability was perfected, Ye Tians strength surged, instantly breaking through the invisible shackles, reaching the level of a nine star peerless Heavenly Pride.

Upon reaching the level of a nine star peerless Heavenly Pride, Ye Tian felt the suppression from heaven and earth on him weaken significantly.

Finally reached the level of a nine star peerless Heavenly Pride. Now, to become a Child of the Universe, only the last condition remains!

Ye Tian was in a very good mood.

Next, as long as he broke through the twentieth physical limit, he could become a Child of the Universe.

Ye Tian checked and found that the trace of gold origin was not completely consumed by him, with about one-third remaining.

This remaining third of the gold origin was swirling around the Phantom Gold Thread divine abilitys imprint.

Ye Tian did not refine this bit of gold origin further. Refining it would be a waste; it was better to keep it for now, as it might be of great use in the future.

Ye Tian had intended to absorb more gold origin from this Origin Artifact, but after a trial, he found that he had failed.

Clearly, this gold-based Origin Artifact only allowed Ye Tian to absorb a trace of gold origin.

Ye Tian stopped cultivating there, as his Phantom Gold Thread divine ability had already reached the perfected realm and could no longer be enhanced. Thus, staying there would be a waste of time.

So, Ye Tian left the place and continued to search for other Origin Artifacts.

After a day of searching, Ye Tian did not find any Origin Artifacts suitable for him.

In the entire ancestral land of the Yun family, there were only eight or nine Origin Artifacts.

Among them, what made Ye Tian somewhat helpless was that there were four Origin Artifacts related to the earth element and two related to the wind element.

But Ye Tian had not cultivated any wind or earth divine abilities.

Yun Xingling had cultivated a wind divine ability, but Ye Tian could not obtain the method of cultivating wind divine abilities from Yun Xingling.

Therefore, Ye Tian reluctantly gave up on those Origin Artifacts and returned to the Sword Dao Origin Artifact.

At this time, Yun Xi was still absorbing a trace of Sword Dao origin.

To Ye Tians surprise, Yun Xis sword talent had undergone a change, evolving from a Dawn-level sword talent to a Supreme-level sword talent.

Ye Tians sword talent was also of the Supreme level. He had intended to copy Yun Xis Supreme sword talent but found that he had failed.

He quickly understood that the ultimate limit of sword talent was the Supreme level, beyond which it could not be enhanced any further.

Just like many attribute talents, the God level is the limit, and for some special talents, the top level is the limit.

If a talent could be endlessly enhanced without any restrictions, that would mean the possibility of limitless augmentation of combat power, essentially breaking the rules of the universe, which is impossible.

Ye Tian was not the least bit disheartened. He too approached the Sword Dao Origin Artifact, ready to cultivate the Sword Dao.

Adhering to the principle of not wasting time, since other Origin Artifacts were of no use to him, it was better to comprehend the Sword Dao here.

Ye Tian had never comprehended the Sword Dao before and now needed to start cultivating from scratch.

However, starting from scratch was not a difficult task for him.

After all, Ye Tian possessed top-tier talent for comprehension, coupled with a Pseudo-Mystic level time talent.

Moreover, with the Sword Dao Origin Artifact here as an aid, comprehending the Sword Dao was extremely easy for Ye Tian.

Sword momentum, sword intent, Sword Dao! 10% Sword Dao! 20% Sword Dao! 30% Sword Dao!

Ye Tians comprehension speed was hundreds of times faster than other Heavenly Prides, even Yun Xi couldnt match Ye Tians speed in Sword Dao.

In the blink of an eye, ten days passed.

By this time, Ye Tians realm in Sword Dao had reached seventy percent.

However, after reaching seventy percent in the Sword Dao realm, the assisting effect of the Sword Dao Origin Artifact weakened to a very low level.

Originally, Ye Tian thought he could rely on the Sword Dao Origin Artifact to comprehend the Sword Dao to eighty to ninety percent.

Now it seems, he was being overly optimistic! Every treasure has its limits, or rather, limitations.

For example, some wondrous objects can significantly increase the comprehension of an Emperor level talent, but for a God level, True God level, those wondrous objects are of little use.

For instance, Ye Tians current realm in Sword Dao has reached as high as seventy percent, further comprehension of the Sword Dao Origin Artifact would have little effect, and he must seek other higher-level treasures to aid in comprehending the Sword Dao and quickly enhance his Sword Dao realm.

My Sword Dao realm has already reached seventy percent, which is completely sufficient to cultivate any Super God level sword technique to the perfected level!

Ye Tian was very satisfied with this.

In fact, Ye Tian also wanted to draw out a trace of Sword Dao origin, but unfortunately, he found that he was unable to do so.

Perhaps this Sword Dao Origin Artifact has already granted a trace of Sword Dao origin, and now it can no longer grant another trace of Sword Dao origin to someone else, otherwise, it would harm the fundamental essence of the Sword Dao Origin Artifact! Ye Tian thought to himself.

Now, not much time was left before the closure of the Yun familys ancestral heritage site, and Yun Xi had also finished her comprehension.

She was very excited now. Not only had she elevated her sword talent to the Supreme level this time, but she had also raised her Sword Dao realm to sixty percent in one fell swoop.

Her only regret was that she had used that trace of Sword Dao origin entirely to enhance her sword talent. Otherwise, that trace of Sword Dao origin, if used to enhance her Sword Dao realm, could definitely have raised her Sword Dao realm to over seventy percent! However, she had no regrets, for only by raising her sword talent to the Supreme level could she ultimately have the chance to reach the perfected realm of Sword Dao, or 100%.

For a swordsman, talent in swordsmanship was most important.

Yun Xi naturally wouldnt just look at the immediate benefits.

Yun Xi, youve made great gains this time! Ye Tian said with a smile.

Yes, this time I not only elevated my sword talent to the Supreme level but also raised my Sword Dao realm to sixty percent. Just give me a bit more time, and I can step into the level of a seven star peerless Heavenly Pride, and even hope to enter the eight-star peerless Heavenly Pride level soon! Yun Xi shared excitedly with Ye Tian.

Not bad, once you step into the eight-star peerless Heavenly Pride level, perhaps you can bring the Yun family of the Milky Way back to the Hengpan Galaxy! Ye Tian said.

Hopefully! Yun Xi looked forward with hope.

After another day of comprehension, the Yun familys ancestral heritage site was about to close.

So, Ye Tian and Yun Xi left the place, flying towards the exit of the heritage site.

Before long, the two flew out of the heritage site and returned to the outside world!

#### Chapter 424: Spatial Talent, Copied

After Ye Tian and Yun Xi left the Yun familys ancestral heritage site, they departed from the Panyun Planetary System.

The Heavenly Prides of the Yun family in the Panyun Planetary System didnt dare to stop Ye Tian and Yun Xi, allowing them to leave freely.

Before long, Ye Tian and Yun Xi returned to Yaber Star.

Yun Xi, what are your plans next? Are you going to return or stay in the Hengpan Galaxy? Ye Tian asked.

I plan to go back to the Milky Way first, to inform my ancestor of the news, and then Ill go into seclusion within the Yun family of the Milky Way for a while! Yun Xi shared her plans.

Ye Tian nodded in agreement.

Given Yun Xis current strength, being in the Hengpan Galaxy wasnt conducive to her growth. Moreover, he wouldnt always be there to protect Yun Xi. After all, his deal with Elder Yun was concluded after they left the Yun familys ancestral heritage site.

Thus, he had no obligation to protect Yun Xi anymore, nor did he have the time.

For Ye Tian, his most important task was to accumulate destiny and then take advantage of the great opportunity provided by the four dominant forces in the Hengpan Galaxy after the Heavenly Pride battles, to make a breakthrough to the Child of the Universe level.

A few days later, Yun Xi left the Hengpan Galaxy.

She left the Hengpan Galaxy by flight, needing to transfer several times before reaching the Milky Way.

With Yun Xis strength and identity as a Heavenly Pride, there was no issue in safely reaching the Milky Way.

After Yun Xis departure, Ye Tian also needed to prepare for his own plans.

Ye Tian intended to elevate his spatial talent to the Mystic level.

He only needed to copy one or two Pseudo-Mystic level spatial talents to achieve this, without needing to spend a long time in contemplation.

There were not a few martial warriors with spatial talents in the Hengpan Galaxy, as Ye Tian had previously investigated.

There was a Heavenly Pride in the Hengpan Galaxy who possessed a Pseudo-Mystic level spatial talent. Plus the mystery level of this talent was not low since he could phase into space.

This Heavenly Pride was Kong Chen, a seven-star peerless Heavenly Pride from the Purple Zhen Sect, a nine-star force that occupied dozens of planetary systems and had many branches in other galaxies, making it incredibly powerful.

Kong Chen was actually just a more ordinary peerless Heavenly Pride in the Purple Zhen Sect! For Ye Tian, a nine-star peerless Heavenly Pride, challenging a seven-star Heavenly Pride would arguably be breaking the rules.

However, Ye Tian didn't need to challenge him; he just needed to find Kong Chen to copy his spatial talent.

After asking around repeatedly, Ye Tian finally learned of Kong Chen's current whereabouts.

According to what Ye Tian learned, Kong Chen was about to spar with another seven-star peerless Heavenly Pride in the Fenghe Planetary System.

There were many Heavenly Prides in the Hengpan Galaxy, and thus, many spars between them.

The spar between Kong Chen and the other seven-star peerless Heavenly Pride was just one among many.

A spar between two seven-star peerless Heavenly Prides wouldn't attract too many strong individuals, let alone the attention of eight or nine-star Heavenly Prides.

But Ye Tian, in order to copy Kong Chen's spatial talent, rushed to the Fenghe Planetary System.

The spar between Kong Chen and the other seven-star peerless Heavenly Pride was scheduled for three days later.

Ye Tian arrived at the Fenghe Planetary System three days in advance and waited.

On the day, Kong Chen and the other seven-star peerless Heavenly Pride arrived.

Along with them came some Gods, True Gods, and many ordinary Heavenly Prides under a starry sky.

Kong Chen and the other seven-star peerless Heavenly Pride looked at each other from afar, with the battle about to begin.

From the discussions of others, Ye Tian learned the title of this seven-star peerless Heavenly Pride.

Baron Heavenly Pride! Since the two Heavenly Prides were about to clash, the spectators kept a very long distance.

It wasnt easy for Ye Tian to get closer to them, being millions of kilometers away.

The range of his talent copying wasnt that wide, so he could only wait for the two Heavenly Prides to finish their battle before he approached Kong Chen to copy his spatial talent.

Soon, the battle began.

Right away, Kong Chen used his spatial talent to confine the surrounding void.

In an instant, Kong Chen teleported next to Baron Heavenly Pride.

Holding a long spear artifact, he executed a Super God level spear technique.

Boom! Baron Heavenly Pride was directly sent flying by Kong Chens spear, breaking through all his defenses and even piercing a blood hole through his body.

This attack injured Baron Heavenly Pride. How could this be?

Baron Heavenly Prides expression drastically changed.

His battle record was similar to Kong Chens, and even their rankings in destiny werent much different.

Both were top-tier seven-star peerless Heavenly Prides. In theory, their battle should be evenly matched, making it difficult to determine a winner.

But now, he was wounded by Kong Chens spear. If this continued, he would be severely injured.

Have you already reached the eight-star peerless Heavenly Pride level?

Baron Heavenly Pride displayed an incredulous expression.

At that moment, Kong Chen Heavenly Pride nodded and said, Indeed, not long ago I became an eight-star peerless Heavenly Pride, and this is my first battle after reaching this level!

Since you have become an eight-star peerless Heavenly Pride, I am no match for you! Baron Heavenly Pride conceded.

Although he still had some cards up his sleeve, this was not a life-or-death struggle with a mortal enemy, so there was no need to fight to the death.

Even if it really came to a life-or-death situation, his chances of dying were over ninety-five percent.

Thus, he directly admitted defeat! With Baron Heavenly Prides admission of defeat, some of his destiny was stripped away, while Kong Chen Heavenly Prides destiny increased somewhat.

At this moment, Kong Chen Heavenly Pride was extremely excited, his demeanor somewhat inflated.

He shouted to the surroundings, Who else dares to battle with me?

His arrogance was naturally backed by confidence.

The surrounding Heavenly Prides were mostly ordinary ones, and the top-tier eight-star peerless Heavenly Prides and nine-star peerless Heavenly Prides were not present here.

If there was one present, he wouldnt dare to speak like this.

Unfortunately for him, Ye Tian was there, and he didnt recognize Ye Tian.

Kong Chen Heavenly Pride, lets have a battle! A young man stepped forward.

This young man was Ye Tian!

Who are you? May I know your name? Kong Chen Heavenly Pride asked indifferently.

Milky Way, Heavenly Pride of Ten Thousand Laws! Ye Tian said.

Heavenly Pride of Ten Thousand Laws? Kong Chen Heavenly Pride had not heard of Ye Tian, even though Ye Tian had killed several Heavenly Prides of the Yun family in the Panyun Star.

However, the events that occurred in Panyun Star had not spread widely, as the only ones present besides Ye Tian were members of the Yun family.

Why would the Yun family publicize their internal affairs? As for Ye Tian killing four seven-star peerless Heavenly Prides near Yaber Star, this news had not spread throughout the entire Hengpan Galaxy either.

With so many seven and eight-star peerless Heavenly Prides in the Hengpan Galaxy, the occasional death of a few was not unusual.

In other words the incident was too low-profile.

If a top-tier eight-star peerless Heavenly Pride died or two nine-star peerless Heavenly Prides battled, then the entire Hengpan Galaxy would know.

Therefore, Kong Chen Heavenly Pride, not having heard of Ye Tian, naturally did not know him, but he did not underestimate Ye Tian either.

After all, Ye Tian dared to challenge him, so his strength couldnt be too weak.

Make your move! Kong Chen Heavenly Pride said.

No! Ye Tian shook his head and smiled, You go first, otherwise, Im afraid you wont have the chance to!

Arrogant! Ye Tians words were filled with extreme arrogance and disdain.

At this moment, Kong Chen Heavenly Pride was furious! He considered himself to be arrogant enough, but Ye Tian was even more so, even daring to disdain him, an eight-star peerless Heavenly Pride.

Unbearable! Immediately, Kong Chen Heavenly Pride deployed his spatial talent, confining the surrounding void.

Then he teleported over, stabbing at Ye Tian with a spear, the attack identical to the one he used on Baron Heavenly Pride.

Just then, an even more powerful spatial force burst out, instantly dissolving Kong Chen Heavenly Prides spatial confinement.

Not good! Kong Chen Heavenly Pride was shocked, realizing that Ye Tians spatial talent was far superior to his, completely suppressing his spatial talent.

In the next instant, a blade suddenly appeared in front of him, shattering his spear technique and then piercing through his chest, severely wounding him.

Kong Chen Heavenly Pride quickly teleported away, appearing far off, looking at Ye Tian with a face full of horror.

He knew that Ye Tian had no intention of killing him, otherwise, he wouldn't have been able to teleport away just now.

Heavenly Pride of Ten Thousand Laws, I admit defeat! Kong Chen Heavenly Pride said, clutching his chest.

Just an eight-star Heavenly Pride! No need to be so arrogant! Ye Tian said and then turned and left.

After Ye Tian left, many began to discuss his strength, some saying he was a top-tier eight-star peerless Heavenly Pride, while others said he was just a high-level eight-star peerless Heavenly Pride who happened to counter Kong Chen Heavenly Pride.

But no one believed that Ye Tian's strength reached the nine-star peerless Heavenly Pride level, given how rare they were in the entire Hengpan Galaxy.

How could someone just emerge as a nine-star peerless Heavenly Pride?

Elsewhere.

Ye Tian sat in his six-star level cosmic spaceship, his face full of smiles, I didn't expect Kong Chen Heavenly Prides spatial talent to reach seventy percent Pseudo-Mystic level!

With the fusion of Kong Chen Heavenly Prides spatial talent, Ye Tian's spatial talent would surely become a Mystic level spatial talent.

Chapter 425: Hengpan Continent, Search God Pavilion

Ye Tian instructed the six-star cosmic spaceship to fly slowly through the starry sky, while he began to integrate his spatial talent inside the spaceship.

Instantly, Ye Tian felt intense pain, as his spatial talent underwent a groundbreaking transformation.

Ye Tian silently endured the pain, filled with endless excitement in his heart, because he would soon elevate his spatial talent to the Mystic level.

After a long while, the pain vanished.

Ye Tian felt incredibly relaxed throughout his body.

He checked his spatial talent and indeed, it had transformed.

[Spatial Talent: Mystic Level]

Even in the Hengpan Galaxy, Ye Tian had never heard of any Heavenly Pride possessing a Mystic level spatial talent.

It could be said that he was the first Heavenly Pride in the entire Hengpan Galaxy to possess a spatial talent of the Mystic level.

Now that my spatial talent has been elevated to the Mystic level, I can cultivate the Spatial Divine Form Divine Ability!

Ye Tian had long been looking forward to the Spatial Divine Form Divine Ability.

Once mastered, it would bring a revolutionary transformation to his strength.

By then, even among the nine-star peerless Heavenly Prides, he would be considered an extremely powerful being.

However, like other divine abilities, the Spatial Divine Form Divine Ability also required a specific item to be cultivated.

Spatial Amethyst!

This was the only spatial treasure required to cultivate the Spatial Divine Form Divine Ability.

Ye Tian did not possess a Spatial Amethyst at the moment, but he could cultivate the Spatial Absorption Technique.

The Spatial Absorption Technique would allow Ye Tian to absorb the power of space and condense it into a Spatial Divine Body.

The Spatial Divine Body was not a divine body of the God level but a type of physique, similar to the innate Fire Spirit Body.

Once the Spatial Divine Body was cultivated, Ye Tian would be one step away from mastering the Spatial Divine Form Divine Ability! By then, as soon as Ye Tian collected the Spatial Amethyst, he could master the Spatial Divine Form Divine Ability in a short time.

Lets cultivate the Spatial Divine Body first!

Ye Tian sat cross-legged and operated the Spatial Absorption Technique.

He had thoroughly researched the Spatial Absorption Technique and easily used it to absorb the power of space.

Boom!!! The space trembled, and the cosmic spaceship was forced to stop.

Thus, Ye Tian piloted the cosmic spaceship to an uninhabited ordinary planet.

He retracted the spaceship and took out a palace from his portable Xumi Storage Realm, placing it on the ordinary planet before entering the palace to continue his secluded cultivation.

He continued to cultivate the Spatial Absorption Technique.

Around Ye Tian, numerous holes appeared in the fabric of space, each only the size of a marble, creating a somewhat terrifying sight.

Countless spatial power spread out from these spatial holes and were absorbed into Ye Tians body by the Spatial Absorption Technique.

Under the effect of the Spatial Absorption Technique, Ye Tians body underwent subtle changes.

Traces of spatial laws appeared on the surface of Ye Tians body, and his body gained the characteristics of a Spatial Divine Body, gradually transforming into one.

The condensation of the Spatial Divine Body was not so simple; it required a long time of absorbing and refining the power of space to achieve.

Ye Tian possessed a Pseudo-Mystic level time talent, which allowed him to accelerate time by thirty times.

Thus, Ye Tians cultivation speed increased by thirty times, and he could definitely condense the Spatial Divine Body in a short time.

Time passed by, and half a year had gone by in reality.

However, under the thirty times time acceleration, Ye Tian had cultivated for fifteen years.

During these fifteen years, he constantly absorbed the power of space and finally succeeded in condensing the Spatial Divine Body on this day.

After successfully condensing the Spatial Divine Body, Ye Tian felt more in tune with himself, as if he was a natural-born child of space.

He tried using a spatial phasing technique and could easily move continuously through space! Moreover, the power of his other spatial abilities also increased significantly. The successful condensation of the Spatial Divine Body enhanced Ye Tians overall strength.

Still, I need to collect Spatial Amethysts. Once I collect them, I can cultivate the Spatial Divine Form Divine Ability. I must master this spatial divine ability!

Ye Tian was incredibly eager.

But he also knew that the Spatial Amethyst was definitely not an ordinary treasure, and even if the Hengpan Galaxy possessed such treasures, they were not something ordinary people could obtain.

One day.

Ye Tian arrived at the Hengpan Continent of the Hengpan Galaxy.

The Hengpan Continent was the headquarters of the four dominant forces and the center of the Hengpan Galaxy, boasting the richest resources.

Of course, besides the four dominant forces, there were many other forces on the Hengpan Continent, but these forces were almost all affiliated with the four dominant forces; otherwise, it would be difficult for them to survive on the Hengpan Continent.

After all, the resources on the Hengpan Continent were immensely abundant, containing many opportunities. Therefore, countless forces wanted to settle on the Hengpan Continent.

However, the four dominant forces were not easy to deal with. If one did not submit to them, they naturally would not be able to survive in Hengpan Continent.

Ye Tians main purpose for entering the Hengpan Continent was to collect Spatial Amethysts, since there was a massive force on the Hengpan Continent that specializes in business.

The Search God Pavilion!

This was an eight-star level force. It wasnt considered very powerful in the Hengpan Galaxy, but it had backing.

This backing was the Divine Desolation Hall.

Divine Desolation Hall was one of the four dominant forces in the Pan Star Field, and since the Search God Pavilion had sought refuge with Divine Desolation Hall, other forces dared not offend the Search God Pavilion.

The Search God Pavilions treasure business spanned all the major galaxies in the entire Pan Star Field.

It was unimaginable how many treasure resources the Search God Pavilion had collected.

It could even be said that as long as one had money, one could even buy Origin Artifacts from the Search God Pavilion! Ye Tian believed that he should be able to buy Spatial Amethysts from the Search God Pavilion, or at least obtain information about them.

The Hengpan Continent had thirty-six major domains.

Ye Tian arrived at Qingzang Domains Qingzang City.

In Qingzang City, there was a decently large branch of the Search God Pavilion.

Upon entering Qingzang City, Ye Tian was very surprised.

There were too many God-level powerhouses here, even some stall owners were God-level powerhouses, and occasionally, one could see a couple of lovers strolling, but they were True God-level powerhouses.

In short, God-level powerhouses were everywhere here, and True Gods were not rare, with Great God-level beings also visible at any time.

The only relatively rare were planetary-level powerhouses, even on the Hengpan Continent, planetary-level powerhouses held a high status and were not seen casually.

Along the way.

Ye Tian even saw quite a few Desolate-level cultivators and one Hong-level cultivator, unfortunately, he did not see any Cosmic-level cultivators, otherwise, Ye Tian would have copied it.

Search God Pavilion!

Ye Tian stood before a massive pavilion, which was like a pillar reaching the skies, piercing the clouds.

Its majestic aura was incomparable to ordinary buildings! Ye Tian could tell that this Search God Pavilion was made as a whole, not built bit by bit. Being refined as a whole meant it was a divine artifact.

Upper-grade divine artifact!

Ye Tian judged.

Divine artifacts were divided into lower, middle, and upper grades, his Dimensional Cube was only a lower-grade divine artifact, and upper-grade divine artifacts far surpassed the value of lower-grade divine artifacts, even in the Milky Way, Ye Tian had not heard of upper-grade divine artifacts.

Many Great God-level powerhouses use divine artifacts that are only top-tier middle-grade divine artifacts, but now that he had come to a city on the Hengpan Continent, the branch of the Search God Pavilion he saw was an upper-grade divine artifact.

The extravagance of the Search God Pavilion is too great, using an upper-grade divine artifact as a branch, too luxurious!

Ye Tian exclaimed.

Then, he entered the Search God Pavilion, but there was no one to greet him.

However, this was normal, as too many warriors entered the Search God Pavilion. Without Great God-level cultivation, one could not expect the staff of the Search God Pavilion to entertain them.

And Ye Tian was only at the Emperor level, quite ordinary here.

Unless he revealed his identity as a nine-star peerless Heavenly Pride, then there would definitely be someone to entertain him.

Ye Tian was not particular about this and approached an unoccupied counter.

What do you need to purchase?

A pretty good-looking woman at the counter asked.

I want Spatial Amethysts, does your Search God Pavilion have this treasure?

Ye Tian asked.

Please wait a moment, Ill check!

The female staff member began to contact the Search God Pavilions artifact spirit to search for the Spatial Amethyst.

Before long, the Search God Pavilions female staff member apologized, Im sorry, our branch here does not have Spatial Amethysts.

Dont you have it? Then do you have any information about Spatial Amethysts, like which force possesses this treasure, or where this treasure has emerged?

Ye Tian asked again.

Please wait a moment!

The female staff member went to check again.

Soon.

The female staff member smiled and said, I just checked, and the Search God Pavilion does indeed have records of Spatial Amethysts, but this piece of information is quite valuable!

#### Chapter 426: Spatial Amethyst, Broken Void Planetary System

Regarding the information on Spatial Amethyst, how much would it cost? Ye Tian inquired. He wasn't concerned about the cost of the information; as long as he could obtain accurate information that would lead him to the Spatial Amethyst, he was willing to pay any amount.

300 divine crystals! said the beautiful staff member of the Search God Pavilion.

300 divine crystals!!! Ye Tian was genuinely surprised. For just a piece of information, it required 300 divine crystals. It's worth noting that many precious treasures didn't even cost 300 divine crystals.

Why is it so expensive? Ye Tian curiously asked.

The staff member of the Search God Pavilion explained, Spatial Amethyst is not an ordinary treasure. Even for planetary-level powerhouses, Spatial Amethyst is a precious resource! Therefore, the information on Spatial Amethyst is naturally very valuable. Moreover, we at the Search God Pavilion can guarantee that this piece of information is absolutely reliable and trustworthy!

Ye Tian pondered for a moment. 300 divine crystals wasn't much for him. If he could truly obtain information on Spatial Amethyst, it would be worth it! Otherwise, his aimless search could go on indefinitely without any guarantee of finding information on Spatial Amethyst.

Alright, 300 divine crystals, I'm willing to pay! Ye Tian immediately took out 300 divine crystals from his personal void storage.

Are you really going to buy this information? The staff member of the Search God Pavilion was completely astonished.

For an Emperor-level individual, 300 divine crystals was a significant amount. Many ordinary Heavenly Prides couldn't produce 300 divine crystals; it was indeed a huge sum! To spend 300 divine crystals just for a piece of information seemed excessively extravagant.

Some financially struggling True God-level powerhouses probably wouldn't spend divine crystals so wastefully!

I really want to buy it! Ye Tian affirmed without a doubt.

The staff member quickly processed the transaction for Ye Tian. Soon, the transaction was completed. Ye Tian paid 300 divine crystals and obtained the detailed information on Spatial Amethyst.

Afterward, Ye Tian left the Search God Pavilion and found a hotel in the city to stay temporarily.

Inside the hotel, Ye Tian held the information orb containing details about Spatial Amethyst, and his divine consciousness entered it to read the detailed information.

This information not only provided a detailed introduction to Spatial Amethyst but also recorded several locations where Spatial Amethyst could be found. Previously, Ye Tian only knew of the existence of Spatial Amethyst but was completely unaware of its specific value and uses. Now, he had a thorough understanding of Spatial Amethyst.

Spatial Amethyst is actually one of the materials used for creating worlds!!! Ye Tian was extremely surprised.

Many worlds in the universe were nurtured by heaven and earth, such as the Earth Immortal Realm of Earth, which was a small world.

However, powerful beings could artificially create worlds. Generally, as long as one's cultivation reached the planetary level, they had the capability to create small worlds.

But creating small worlds required numerous auxiliary materials, one of which was Spatial Amethyst. The worlds created were often many times more precious than those nurtured by heaven and earth because they can be formed according to one's wishes into a special kind of world.

For example, if a top-tier power wanted to create a trial world, they could do so according to their own set rules. But finding a suitable trial world naturally is very difficult.

Additionally, the rules of worlds nurtured by heaven and earth were generally very weak and easily shattered, while the rules of worlds created by powerful beings were very strong.

In the Hengpan Galaxy, many top-tier powers and even the four dominant forces often created special worlds. Some forces have even moved their headquarters into a newly created world.

However, very few forces could actually create worlds due to the lack of auxiliary materials. For example, Spatial Amethyst, a precious spatial treasure, was only found in a few special locations in the Pan Star Field. Only after countless years of evolution was there possibility for the emergence of a piece of Spatial Amethyst.

For this reason, the value of Spatial Amethyst was extremely high.

In the Search God Pavilion, one cannot purchase Spatial Amethyst. Even if the Search God Pavilion possessed Spatial Amethyst, they would not sell it.

However, the information Ye Tian purchased recorded several places that possessed Spatial Amethyst! The first location was the Undead Legion. 300 years ago, a piece of Spatial Amethyst the size of a person emerged. A contingent of the Undead Legion descended, killed many God-level powerhouses, and seized this piece of Spatial Amethyst.

Only 300 years have passed, and it's unlikely that the Undead Legion has exhausted such a large piece of Spatial Amethyst.

And Ye Tian only needed a piece of Spatial Amethyst the size of a thumb.

If he knew the higher-ups of the Undead Legion, then he could possibly trade for a small piece of Spatial Amethyst from them.

Unfortunately, Ye Tian didn't know any high-ranking members of the Undead Legion, not even a single soldier.

Therefore, Ye Tian had no choice but to give up on the Spatial Amethyst of the Undead Legion.

The second location was the Divine Desolation Palace.

The Divine Desolation Palace, being one of the four dominant forces and a backer of the Search God Pavilion, possessed abundant resources, including Spatial Amethyst within its halls.

However, the Divine Desolation Palace did not trade with the outside world, and only the higher-ups of the Divine Desolation Palace could possibly access such treasures as Spatial Amethyst.

Although Ye Tian was a nine-star peerless Heavenly Pride, the higher-ups of the Divine Desolation Palace would not meet with him.

After all, in the eyes of the higher-ups of the Divine Desolation Palace, a nine-star peerless Heavenly Pride was not significant enough to warrant attention.

As for whether the other two dominant forces possessed Spatial Amethyst, the Search God Pavilion was unclear, but it was speculated they might. However, Ye Tian had no way to trade for Spatial Amethyst from those two dominant forces.

Among the information purchased from the Search God Pavilion, only one method was suitable for Ye Tian.

This method was to go to the Broken Void Planetary System! The Broken Void Planetary System is a rather unique planetary system within the Hengpan Galaxy, filled with spatial rifts everywhere. The entire planetary systems space was shattered, and even the laws of the universe were unable to restore this planetary system.

Moreover, the flow of time in the Broken Void Planetary System was extremely chaotic. It was said that two immensely powerful beings fought here, causing time and space to become disordered.

For this reason, the Broken Void Planetary System became a forbidden zone, with almost no God-level powerhouses daring to enter.

Over time, the Broken Void Planetary System was left unattended, becoming a forbidden planetary system and even erased from maps! However, what many people did not know was that the Broken Void Planetary System was also a treasure trove.

It had given birth to some spatial treasures and wondrous objects that were quite rare in the outside world, including Spatial Amethyst.

Of course, the Spatial Amethyst nurtured by the Broken Void Planetary System was very scarce, and occasionally, some Emperor-level individuals who were in the know ventured into the Broken Void Planetary System to search for Spatial Amethyst, making it even rarer.

Not long ago, the space-time forces of the Broken Void Planetary System erupted, making the entire planetary system even more chaotic, but someone discovered a large piece of Spatial Amethyst.

Therefore, some Heavenly Prides, upon hearing the news, rushed to the Broken Void Planetary System, but currently, very few Heavenly Prides are aware of this news.

The Search God Pavilion only recently learned of this news. If it weren't for Ye Tians timely request to purchase information on Spatial Amethyst, the Search God Pavilion would not have sold this news.

The information on Spatial Amethyst was so expensive partly because of the Broken Void Planetary System.

After all, the Broken Void Planetary System has undergone changes, and the quantity of Spatial Amethyst has increased significantly, making this information so valuable.

Of course, the Broken Void Planetary System was also very dangerous. God-level powerhouses dared not enter for fear of triggering changes in time and space, thus falling into time vortexes.

Even Emperor-level individuals entering the Broken Void Planetary System might accidentally be erased by the forces of time and space.

It could be said that the Broken Void Planetary System was a planetary system where crisis and opportunity coexisted.

If one was lucky, bringing back a small piece of Spatial Amethyst from the Broken Void Planetary System could be a huge windfall.

If one was unlucky, theyd perish in the Broken Void Planetary System.

Now is a good opportunity. At least the Heavenly Prides who are aware of the Broken Void Planetary System are still very rare. If I wait any longer, a large number of Heavenly Prides might enter the Broken Void Planetary System and possibly sweep up all the Spatial Amethyst, leaving none for me! Ye Tian thought.

Thus, Ye Tian made a decision to head to the Broken Void Planetary System now to search for Spatial Amethyst.

#### Chapter 427: The Spatial Bead

Thus, Ye Tian left the Hengpan Continent and took a six-star level cosmic spaceship to rush towards the Broken Void Planetary System.

In a short while, Ye Tian arrived outside the Broken Void Planetary System.

Ye Tians six-star level cosmic spaceship was docked amidst the spatial turbulence outside the Broken Void Planetary System.

Although spatial turbulence was dangerous, it was relatively safe for top-tier Heavenly Prides. Top-tier Heavenly Prides only needed to withstand the impact of the spatial turbulence to avoid danger.

However, the Broken Void Planetary System was different. The entire planetary systems spacetime was chaotic, and its spatial rifts were even more terrifying than spatial turbulence.

Even eight or nine-star Heavenly Prides, if they entered the Broken Void Planetary System, could die by accident.

The cosmic spaceship cannot enter the Broken Void Planetary System. Even a six-star level cosmic spaceship would be damaged!

Damaging the cosmic spaceship would only mean losing a six-star level cosmic spaceship, but Ye Tian did not want to put himself in danger because of the spaceship.

Therefore, Ye Tian stored the six-star level cosmic spaceship in his portable Xumi Realm and positioned himself amidst the spatial turbulence.

Spatial Barrier!

With a whoosh, the continuously flowing spatial turbulence was blocked by the spatial barrier formed by Ye Tians spatial talent, creating a vacuum in space.

Then, Ye Tian stepped towards the Broken Void Planetary System.

At the same time, Ye Tian secretly activated his time talent, sensing the changes in time around him.

Boom! Ye Tian walked out of the spatial turbulence and officially entered the Broken Void Planetary Systems area.

He then saw the spatial rifts that filled the entire planetary system, densely packed and endless.

The rules here were completely shattered, as if abandoned by the universe.

Seeing this scene, Ye Tian was greatly shocked.

What level of powerhouse battle caused this?

Ye Tian had seen Great God-level powerhouses in action before, but when Great God-level powerhouses tore through space and shattered it, that space would soon recover.

However, the space here was fractured, and even the universes rules could not restore this area, indicating that the power left here suppressed even the universes rules.

It must be a power beyond the galaxy level!

Ye Tian guessed.

He didnt think too much about it Regardless of what level of powerhouse caused this scene, it had nothing to do with him.

His only purpose here was to find the Spatial Amethyst.

In the Broken Void Planetary System, Ye Tian dared not fly recklessly and couldnt fly too fast; otherwise, he might easily enter some dangerous areas.

As a nine-star peerless Heavenly Pride, Ye Tian was indeed very powerful compared to Emperors, but to powerhouses above True Gods, he was nothing.

If he entered an extremely dangerous area in the Broken Void Planetary System, a nine-star peerless Heavenly Pride would be just an ant, instantly annihilated.

Ye Tian flew at a very slow speed, constantly sensing the spatial and time fluctuations around him.

If he sensed that an area had intense spatial and time fluctuations, he would bypass it.

In this way, Ye Tian was less likely to enter dangerous areas.

At the same time, Ye Tian also activated his treasure-seeking talent, searching for treasures.

Time passed day by day.

The Broken Void Planetary System was vast, and Ye Tians flying speed was very slow, so the area he inspected was just a tiny part compared to the entire Broken Void Planetary System, negligible.

At Ye Tians current speed, it would take at least a year or two to sweep through the entire Broken Void Planetary System.

One day, Ye Tian saw the corpse of a Heavenly Pride.

Many divine artifact fragments floated around this Heavenly Prides corpse, and only half of the corpse remained.

Judging from the situation of this Heavenly Prides corpse, he died not from combat but under the power of spacetime.

Ye Tian approached the Heavenly Prides corpse and sensed the spacetime power.

Clearly, this Heavenly Pride had not sensed the danger and stepped into this area, directly annihilated without a chance to escape.

Ye Tian took a detour and continued forward.

Before long, Ye Tians treasure-seeking talent sensed a glow in the distance.

However, it was not a multicolored glow, just a golden one.

But that golden glow was very intense, as if illuminating the entire sky.

Obviously, there was not just one treasure, but many treasures together creating such a spectacle with their golden glow.

Its probably not the Spatial Amethyst!

Ye Tian murmured.

If it were a Spatial Amethyst, it wouldn't emit a golden glow but a rich, multicolored one.

However, even though it was a golden glow, Ye Tian was very interested.

Thus, Ye Tian flew towards it at a steady pace, and soon, he arrived at the destination.

Upon arrival, Ye Tian saw about a dozen Heavenly Prides.

These Heavenly Prides could be roughly divided into three camps, as they wore three types of clothing, each representing a different force.

At the moment, these Heavenly Prides were breaking small stones, seemingly searching for something.

This is

Ye Tian glanced around and saw that the area was filled with stones of various sizes, some as large as massive meteorites and others as small as fists.

These densely packed stones covered the area, and some emitted golden glows from within, clearly containing treasures.

Suddenly.

One of the Heavenly Prides broke a stone, revealing the treasure inside.

It was a sphere containing spatial attributes!

The spatial bead!

Ye Tian was slightly surprised.

He recognized the origin of this pearl, which was also a kind of spatial treasure.

The spatial bead was a relatively practical spatial treasure. Although it was far inferior to the Spatial Amethyst, it's still a coveted item.

The spatial bead can be used to refine spatial rings, seal spatial blades, spatial restraints, and other spatial techniques, essentially serving as a disposable spatial weapon.

As a possessor of spatial talent, Ye Tian knew more about spatial treasures, including the spatial bead.

However, the conditions for the birth of a spatial bead were very strict, and Ye Tian couldn't find any in the Milky Way.

Unexpectedly, the Broken Void Planetary System had produced so many spatial beads.

So many spatial beads, their value is immense!

Ye Tian was very tempted.

But clearly, this area was also very dangerous, filled with places where time and space were chaotic. Even some meteorites hid the power of time and space that could explode at any moment, causing a spacetime force explosion upon breaking the meteorite.

In such cases, there would be no time to escape.

Suddenly.

Ye Tian's attention was drawn to one of the Heavenly Prides.

Ye Tian noticed him not because of his talent but because the stone he was about to strike was located at a point where the spacetime force was particularly strong. Breaking this meteorite would inevitably trigger a spacetime force explosion.

Ye Tian didnt warn him, as explaining how he could sense the spacetime force would not only expose his secret but also make others jealous, which wasnt good for him.

Ye Tian didnt know this Heavenly Pride, and they werent acquainted, so there was no need to help.

Crack! The stone was broken by the Heavenly Pride.

Boom! The explosion of time and space force caused a ripple in the spacetime of that area.

A wave spread to the Heavenly Pride, and silently, half of his body disappeared, with his divine artifacts turning into fragments.

Third Senior Brother!

Another Heavenly Pride screamed in horror.

Unfortunately, his Third Senior Brother had already fallen.

This wasnt the first Heavenly Pride to die here; perhaps several had already perished in this area.

Lets go! If we keep breaking them, something will really happen!

One of the Heavenly Prides became fearful.

Swoosh! Three Heavenly Prides left together, no longer intending to search for spatial beads.

Although the value of spatial beads was good, a thumb-sized spatial bead was only worth about a hundred divine crystals, and it wasnt worth risking their lives for a few spatial beads.

But still, seven or eight Heavenly Prides continued to search for spatial beads, fearless of death.

Just some six or seven-star peerless Heavenly Prides!

Ye Tian assessed their talents and decided.

Immediately, Ye Tian also entered the area, using his treasure-seeking talent to search for spatial beads.

Crack! The first stone Ye Tian broke revealed a spatial bead.

This spatial bead was about the size of two thumbs, worth two hundred divine crystals.

At that moment.

A Heavenly Pride not far from Ye Tian cast an envious look: To obtain a spatial bead on the first try, such luck is too good!

However, soon, these Heavenly Prides were not just envious but jealous of Ye Tian!

#### Chapter 428: Spatial Fragmentation, The Mysterious World

Ye Tian shattered one stone or meteorite after another, harvesting spatial beads of various sizes. The larger ones were as big as basketballs, while the smaller ones were no bigger than a thumb. It was clear that this was not a matter of luck, as every stone Ye Tian shattered contained a spatial bead.

A treasure-hunting talent, perhaps? speculated one of the Heavenly Prides.

Though treasure-hunting talents were rare, there were still a significant number of martial warriors and ferocious beasts within the Hengpan Galaxy who possessed such talents. However, these Heavenly Prides lacked such a talent and were unwilling to share the opportunities here with others, leaving them no choice but to slowly search for spatial beads themselves.

Hmph, what good is a treasure-hunting talent if it triggers the power of time and space? He would still die!

Exactly, shattering stones so frequently is bound to touch upon the forces of time and space!

Hes as good as dead. Once he dies, well take the treasures from his body, the other Heavenly Prides thought to themselves.

Yet, despite shattering many stones, Ye Tian did not trigger the power of time and space. In no time, he had amassed a large number of spatial beads, worth approximately 1 million divine crystals.

Sensing with his treasure-hunting talent, Ye Tian realized that the number of spatial beads in the area had dwindled, leaving only the smaller, less valuable ones.

Forget it, Ill leave the rest to you, Ye Tian decided to leave.

However, as he was about to leave, five Heavenly Prides chased after him.

What do you want with me? Ye Tian asked coldly.

One of them threatened, Hand over the spatial beads!

The others also clamored for Ye Tian to surrender the spatial beads. They had witnessed Ye Tian obtaining a large quantity of spatial beads, valued at 1 million divine crystalsa fortune they could not ignore.

If you dare to fight here, the power of time and space might annihilate you! Ye Tian warned.

So, if youre scared, just hand over some of the spatial beads. Were not greedy; we can share, one of the Heavenly Prides suggested.

Sighing deeply, Ye Tian seemed to be conceding, but instead, he said, You could have lived. Why seek death?

With that, Ye Tian drew his sword. Before the five Heavenly Prides could react, they were slain, their bodies shattered.

In an instant, Ye Tian killed five Heavenly Prides. Observing from a distance, three other Heavenly Prides, clearly from the same faction, were startled but did not attack Ye Tian. After giving them a glance, Ye Tian turned and left.

This haul is tremendous spatial beads worth 1 million divine crystals. The total value far exceeds that of Spatial Amethysts! Ye Tian was exhilarated.

He then checked the rings of the five fallen Heavenly Prides. Though they were Heavenly Prides, their possessions were not particularly useful to Ye Tian, save for one significant find a purple crystal emanating faint spatial fluctuations.

Space purple crystal! Ye Tian exclaimed, having finally found the sought-after Spatial Amethyst so effortlessly.

However, the crystal was too small, requiring at least three times its amount for Ye Tian's intended use.

Nonetheless, this first purple crystal was a good omen and a start for Ye Tian, who continued his search for more.

To others, the dangerous void of space posed a threat, but to Ye Tian, it was relatively safe. Still, he remained cautious, wary of unseen dangers.

Half a month passed in the blink of an eye, and one day, Ye Tian's treasure-hunting talent finally sensed a vibrant, multicolored light.

It's very likely a Spatial Amethyst! Ye Tian speculated.

With a swift motion, he flew towards it and soon spotted a spatial vortex with the treasure nestled inside. Unable to see the interior of the spatial vortex with the naked eye, Ye Tian activated his Xumi Eyes.

Under the gaze of the Xumi Eyes, the interior of the spatial vortex was laid bare, revealing a floating purple crystal indeed a Spatial Amethyst.

Found it! Ye Tian was thrilled.

This Spatial Amethyst was not small; it was five times the size of the previous one Ye Tian had found.

With these two Spatial Amethysts, Ye Tian had enough to cultivate his spatial divine abilities. However, retrieving the crystal was no easy task. Although there was no time power here, the spatial power was formidable, and Ye Tian could not withstand it if it were to explode.

Instantly, Ye Tian activated his Spatial Divine Body, achieving perfect harmony with the space around him. Then, using his Mystic-level spatial talent, he enveloped his right hand and reached into the spatial vortex, swiftly grabbing the Spatial Amethyst and teleporting away.

From a distance, Ye Tian reappeared, unharmed except for his right hand, which was almost obliterated by the spatial forces, leaving only a skeletal structure that firmly grasped the Spatial Amethyst.

Healing Talent, activate!

Life Talent, activate!

Immortality Talent, activate!

Under the combined effect of these three talents, the flesh on Ye Tians hand regenerated at an incredible pace. In less than a moment, his right hand was fully restored, without a trace of injury.

Its time to leave, Ye Tian murmured.

Having achieved his goal, there was no need to stay in the Broken Void Planetary System any longer. But just then, Ye Tians expression changed.

From afar, the fluctuations of a battle between two Heavenly Prides reached him. A violent battle caused a vast area of the Broken Void Planetary System to collapse, and the spatial fluctuations even spread to where Ye Tian was.

This is bad! Ye Tians expression darkened.

The spatial fluctuations were too fast, and in a place like the Broken Void Planetary System, he couldnt fly or teleport away quickly.

Immediately, Ye Tian deployed all his defensive measures.

God-level Defense Talent!

Mystic-level Diamond Bone Talent!

God-level Iron Armor Talent!

God-level Wood Shield Talent!

Dark Qilin Demon Body Technique!

Furthermore, Ye Tian utilized his spatial talent to fend off the spatial forces.

Crack! The space around Ye Tian collapsed, and the terrifying spatial forces bombarded him. Layer after layer of defense was shattered, subjecting Ye Tian to immense pressure.

Suddenly, a shard of spatial debris penetrated Ye Tians defenses and pierced his body. Fortunately, Ye Tians Immortality Talent and various healing talents ensured his survival.

Otherwise, any ordinary Heavenly Pride would have been dead.

Dimensional Cube!

Ye Tian summoned this spatial divine artifact to defend against the spatial forces. However, the Dimensional Cube started to crack after a while.

Crack! The lower-grade divine artifact, the Dimensional Cube, shattered completely. At that moment, a suction force emerged.

This is the fluctuation of a world, Ye Tian thought with a hint of joy.

He didn't care about the origin of this world's fluctuation; it was certainly better than waiting to die.

Ye Tian let himself be drawn in by the world's fluctuation, abandoning resistance and getting sucked into the mysterious world.

On a grassy plain, Ye Tian lay there, breathing in the fresh air, feeling a sense of relief.

He was severely injured and focused on healing his wounds.

After a while, he stood up and looked around.

What world is this?

#### Chapter 429: Spatial Divine Form, Achieved

Inside the Broken Void Planetary System, there actually exists a mysterious world! Ye Tian was quite astonished at this moment.

It was known that the Broken Void Planetary System was almost shattered under the battles of supreme beings, to the extent that even the universal laws were unable to restore the Broken Void Planetary System.

Moreover, the stars and planets of the Broken Void Planetary System were all broken, and any worlds that had existed were either destroyed in the battles or left in a state of utter disrepair.

Yet, this world was brimming with vitality, and even the yuan qi was incredibly dense.

Clearly, this world was far from ordinary!

It was clearly a battle between two Heavenly Prides that caused a massive spatial disturbance. It must have been a fight between two nine-star peerless Heavenly Prides. Those two were too reckless to fight with all their might. They must have been too bold. They must be dead by now, Ye Tian muttered to himself.

Then, he stopped pondering over this issue, focusing instead on how to leave.

If it were a normal small world, he could completely shatter the world barrier to leave.

But now, he discovered that the world barriers of this world were too robust.

Slash! Ye Tian swung his sword at the void, only to find that it created a crack but did not break through the space.

I cant get out! Ye Tian frowned.

Although this world was very mysterious, he didnt want to stay here.

Never mind, Ill think of a way out after I have achieved the Spatial Divine Form Divine Ability! Ye Tian created a small space underground as a temporary place for seclusion.

Next, he began his seclusion to cultivate the Spatial Divine Form Divine Ability.

Ye Tian had already achieved the Spatial Divine Body, and other secret techniques recorded in the Mira Sutra had also been mastered one by one.

Now, every part of Ye Tians body had integrated numerous Xumi Realms, which formed a pattern of law runes.

Previously, Ye Tian only needed to integrate the Xumi Realms for those secret techniques, so he realized that all these were preparations for the Spatial Divine Form Divine Ability.

The creator of the Spatial Divine Form Divine Ability was definitely a genius, having deconstructed a divine ability into various secret techniques, which could then be combined into a single divine ability.

I have mastered all the secret techniques; now, I just need to use the Spatial Amethyst to connect all the Xumi Realms, forming a pattern of laws, and nurture the mark of the Spatial Divine Form Divine Ability!

Ye Tian took out the Spatial Amethyst and activated the Spatial Absorption Technique.

The Spatial Absorption Technique could absorb not only spatial power but also the energy from the Spatial Amethyst.

Boom! The energy from the Spatial Amethyst flowed into Ye Tians body under the extraction of the Spatial Absorption Technique and was absorbed by the various Xumi Storage Realms.

Instantly, each Xumi Storage Realm turned into a point of light.

Ye Tians body was covered in these points of light, forming a perfect pattern of the Spatial Divine Form Divine Ability.

At this moment, Ye Tians body seemed to disappear, leaving only those points of light.

These points of light connected, forming a cycle.

In the midst of numerous points of light, the mark of the Spatial Divine Form Divine Ability was slowly condensing.

As time passed, the first piece of Spatial Amethyst was gradually depleted.

Then, Ye Tian took out a second piece of Spatial Amethyst and continued to cultivate.

In an environment accelerated by thirty times, it took Ye Tian a full ten days to finally condense the mark of the Spatial Divine Form Divine Ability, with only a little bit of the Spatial Amethyst left.

Success! Ye Tian was extremely excited.

This was a spatial divine ability, undoubtedly his most powerful divine ability and attack method. Even the attack power combined with sword techniques and strength talents was not as powerful as this spatial divine ability.

Lets test it! Ye Tian flew into the high sky and executed the Spatial Divine Form Divine Ability.

Boom! Countless spatial powers converged into a huge divine form, entirely formed by the power of the Spatial Divine Form Divine Ability.

At this moment, Ye Tian stood in the power of the spatial divine form, his body seemingly fused with the spatial divine form, perfectly controlling it.

Ye Tian activated the arms of the spatial divine form and made a casual swipe forward.

Rip! The originally indestructible space was easily torn apart by the spatial divine form, just like a knife slicing through tofu, making the surrounding space appear extremely fragile in his eyes.

Whoosh! Ye Tian moved, his speed incredibly fast, almost as if he was teleporting at every moment.

So powerful! Ye Tian was amazed. After executing the Spatial Divine Form Divine Ability, his combat power skyrocketed. Among the nine-star peerless Heavenly Prides, he was definitely among the top, and ordinary nine-star peerless Heavenly Prides were no match for him.

He possessed the combat power to slay ordinary nine-star peerless Heavenly Prides! After testing the power of the Spatial Divine Form, Ye Tian withdrew the Spatial Divine Form Divine Ability.

This world is quite mysterious; it seems I must explore it to find a way out! Ye Tian pondered.

Immediately, he flew swiftly, hoping to discover some clues or leads.

Half an hour later, Ye Tian sensed fluctuations from a battle.

Boom! The battles vibrations were extremely intense, unmistakably a fight between two nine-star peerless Heavenly Prides.

Those two guys arent dead, Ye Tian was surprised and also quite annoyed.

If it werent for those two, he would have already left the Broken Void Planetary System.

In an instant, Ye Tian teleported to the battlefield of the two nine-star peerless Heavenly Prides.

At this moment, Ye Tian saw the two nine-star peerless Heavenly Prides.

They were fiercely battling, each sustaining serious injuries.

Ye Tian could even see many wounds on their bodies pierced by spatial fragments. Because there was no time to heal, these wounds were still affecting their condition.

Stop! Ye Tian yelled.

Who are you, get lost! one of the nine-star peerless Heavenly Prides shouted back in anger, but his gaze didnt even focus on Ye Tian. After all, they were in the midst of battle, and there was no room to divert their attention, which would be akin to dividing their focus.

Just then, Ye Tian deployed the Spatial Divine Form. The enormous Spatial Divine Form, like an ancient demon god, spread a terrifying spatial aura, shocking the two combatants.

The Spatial Divine Forms hands pierced through the void and struck fiercely at the two nine-star peerless Heavenly Prides.

Boom! Both nine-star peerless Heavenly Prides, already heavily injured, were struck by the Spatial Divine Form and were sent flying backward with severe injuries.

As Ye Tian repelled the two nine-star peerless Heavenly Prides, he checked their talents.

Hong-level cultivation talent!

Hong-level cultivation talent!

From the perspective of cultivation talent, the talents of these two nine-star peerless Heavenly Prides were quite good. They would surely become planetary-level powerhouses in the future, even invincible planetary-level powerhouses, capable of crushing some galaxy-level powerhouses.

Unfortunately, Ye Tians cultivation talent was already at the Cosmic level, making copying their Hong-level cultivation talent almost useless.

The other talents of the two nine-star peerless Heavenly Prides were also exceptionally high, almost reaching their limits.

Moreover, they had also broken through their nineteenth physical limit, just like Ye Tian, only one step away from becoming a Child of the Universe.

Can you two calm down? Ye Tian looked at them intently.

Okay!

Okay!

The two nine-star peerless Heavenly Prides nodded.

They had no choice. Ye Tian was very powerful. Even if they were not injured, they were no match for him.

Was it you two who fought earlier, causing the Broken Void Planetary System to shatter, inadvertently entering this world? Ye Tian questioned.

Yes! The two admitted.

Ye Tian angrily said, I was just looking for treasures in the Broken Void Planetary System, ready to leave, and you involved me. What should I do?

A surge of killing intent rose, enveloping the two nine-star peerless Heavenly Prides.

Now, the two nine-star peerless Heavenly Prides were terrified! As nine-star peerless Heavenly Prides, they were just one step away from becoming Children of the Universe. They just needed to break through the twentieth physical limit to achieve that status, and naturally, they were not willing to perish so easily.

Thus, they were also afraid of death.

Dont kill us. Actually, entering this world is also a great opportunity! one of the nine-star peerless Heavenly Prides quickly said.

A great opportunity, how so? Do you know where this is? Ye Tian withdrew his killing intent, curiously asking.

We know! The two nodded eagerly.

Then, they briefly explained the situation of this world.

After hearing the descriptions from the two nine-star peerless Heavenly Prides, Ye Tian finally gained some understanding of this world.

Immediately, he became excited!

Chapter 430: The World of Sword and Saber Fragments, the Authorization Token  
Changed planetary level -> planetary system level.

Changed sword -> saber.

Fragment of the Saber Realm!

According to what the two nine-star peerless Heavenly Prides said, this world was a fragment of the Saber Realm from ancient times.

The Saber Realm was a world opened up by the Saber God, a dominant power in the ancient times.

Back then, the strength of the Saber God Sect was even greater than the current four dominant powers.

The Saber Realm contained the inheritance of the Saber God Sect and was a hidden world of the sect.

This so-called hidden world was a backup.

Should the Saber God Sect face a catastrophe, a portion of its geniuses and powerhouses would be transferred into the Saber Realm, waiting for a future resurgence.

However, in the ancient times, during a battle, the Saber God Sect was annihilated.

The enemies directly attacked the Saber Realm of the Saber God Sect and launched an extremely terrifying battle in the Broken Void Planetary System.

In the end, the enemies of the Saber God Sect used a fearsome weapon that obliterated the entire Broken Void Planetary System, and the Saber Realm was utterly shattered.

People from the outside world thought the Saber Realm had completely disappeared, but unexpectedly, the Saber Realm did not vanish entirely; some fragments were preserved.

So, this is why the Broken Void Planetary System turned out this way!

Previously, Ye Tian thought that two extremely powerful beings had clashed in the Broken Void Planetary System, causing the current state of the system.

But unexpectedly, it was due to a conflict between two forces, one of which was a dominant power that was annihilated.

This world is the hidden world of the Saber God Sect. Even if its just a fragmentary world, there might be the inheritance of the Saber God Sect here!

Ye Tian was very interested in the inheritance of the Saber God Sect. After all, it was an ancient dominant power even more powerful than the four current major dominant forces of the Pan Star Field.

Why did you two fight each other, even to the point of risking your lives? Ye Tian asked again.

Soon, the two nine-star peerless Heavenly Prides revealed the reason.

The two nine-star peerless Heavenly Prides were both cultivated by one of the four major dominant forces.

One of them was called Crescent Moon Heavenly Pride, belonging to the Divine Desolation Hall, one of the four dominant forces.

The other was called Raging Sun Heavenly Pride, a Heavenly Pride of the Eternal Sect, another one of the four dominant forces.

Crescent Moon Heavenly Pride and Raging Sun Heavenly Prides fierce battle wasnt due to hatred but over an artifact.

Recently, the Broken Void Planetary System experienced severe spatial disturbances, for example, the probability of Spatial Amethysts appearing increased significantly.

Eternal Sect and Divine Desolation Hall deduced that a change had occurred in the Broken Void Planetary System, leading Crescent Moon Heavenly Pride and Raging Sun Heavenly Pride to investigate.

After some investigation, they discovered that the change in the Broken Void Planetary System was related to the deep spatial regions of the system.

The spatial disturbances in the depths of the Broken Void Planetary System increased the probability of Spatial Amethysts and other artifacts appearing.

Then, Crescent Moon Heavenly Pride and Raging Sun Heavenly Pride discovered an artifact that erupted from the depths of space.

The artifact was a token, inscribed with the oldest script of the Pan Star Field, bearing the three words Saber God Sect.

And just the material of this token alone was comparable to top-tier mid-grade divine artifacts.

Both quickly connected it to the ancient dominant force, the Saber God Sect, and even suspected that this token was related to the inheritance of the Saber God Sect. Thus, they began to fight and kill for this token.

Unexpectedly, this caused spatial disturbances, leading to the collapse of the surrounding regions.

But at the crucial moment, the token emitted a faint light, allowing both to only suffer a small portion of the spatial attack and safely arrive in this world.

Compared to Crescent Moon Heavenly Pride and Raging Sun Heavenly Pride, the latter was rather unlucky, but fortunately, his strong strength and possession of a Mystic-grade spatial talent allowed him to successfully arrive in the world of the Saber Realm shard.

Where is that token? Ye Tian inquired.

Raging Sun Heavenly Pride snatched it just now.

Thats why I attacked him, to take back the token!

Crescent Moon Heavenly Pride hastily explained.

Raging Sun Heavenly Pride, hand over your token to me! Ye Tian demanded coldly, his voice filled with threat, suggesting that if Raging Sun Heavenly Pride didn't hand over the token, he would kill him.

I'll give it!

Swallowing his pride, Raging Sun Heavenly Pride took out the token and handed it to Ye Tian.

And this time, Ye Tian's gains were not just limited to this token but also a significant boost in destiny.

The destinies of Crescent Moon Heavenly Pride and Raging Sun Heavenly Pride ranked among the top tens on the Heavenly Pride Leaderboard.

This time, Ye Tian instantly defeated Crescent Moon Heavenly Pride and Raging Sun Heavenly Pride. Although it was when they were in a weakened state, he still gained a lot of destiny, which drastically improved his ranking.

Ye Tian checked his ranking on the Heavenly Pride Leaderboard.

[Heavenly Pride Leaderboard 56th Place: Heavenly Pride of Ten Thousand Laws!] Ye Tian was extremely satisfied with this ranking.

It could be said that as long as he did not fall, with his current ranking, he was qualified enough to obtain the great opportunity in the final battle of the Heavenly Prides.

At the same time, the rise in Ye Tian's ranking also attracted the attention of many major forces.

The Heavenly Prides ranked lower on the Heavenly Pride Leaderboard had varying strengths. Some were lucky, sweeping through a large number of Heavenly Prides in weaker galaxies, and their ranking could surge to the hundreds. However, their strength might not even compare to some Heavenly Prides ranked in the thousands or even tens of thousands.

Therefore, the rankings beyond a few hundred places on the Heavenly Pride Leaderboard cannot be considered a standard for strength.

But the top 100 of the Heavenly Pride Leaderboard was absolutely gold-plated, and anyone who could enter the top 100 was definitely not weaker than the top-tier eight-star peerless Heavenly Prides.

Ye Tians surge to the 56th place on the Heavenly Pride Leaderboard was a heaven-defying progress.

Soon, the upper echelons of the four dominant forces noticed Ye Tians existence and began to collect information about him.

In the Milky Way.

Empress Yue often paid attention to the rankings on the Heavenly Pride Leaderboard, especially Ye Tians ranking.

When Ye Tians ranking surged to the 56th place on the Heavenly Pride Leaderboard, Empress Yue also noticed.

My husband surged to the 56th place on the Heavenly Pride Leaderboard!

Empress Yue was very excited.

Other Heavenly Prides in the Milky Way were stunned to learn that Ye Tian had surged to the 56th place on the Heavenly Pride Leaderboard.

The 56th place on the Heavenly Pride Leaderboard represented Ye Tians destiny ranking among countless Heavenly Prides in the entire Pan Star Field, and the number of Heavenly Prides in the entire Pan Star Field was incredibly vast. It was said that some powerful galaxies had more than one or two eight-star peerless Heavenly Prides, and the Hengpan Galaxy had even more, including nine-star peerless Heavenly Prides.

Ye Tians ability to rank 56th was too terrifying, and they could no longer imagine what level Ye Tian had reached.

In the Milky Way, Yun Family.

Yun Xi also knew about Ye Tians surge to the 56th place on the Heavenly Pride Leaderboard, her pupils dilated, showing an incredulous expression.

Having both entered the Hengpan Galaxy, she naturally knew the strength of the Heavenly Prides there.

Although she knew Ye Tians strength had reached the level of top-tier eight-star peerless Heavenly Prides, the number of top-tier eight-star peerless Heavenly Prides in the Hengpan Galaxy was not small, and there were even nine-star peerless Heavenly Prides.

An eight-star peerless Heavenly Pride, if too arrogant, would inevitably face challenges from nine-star peerless Heavenly Prides.

Therefore, in the Hengpan Galaxy, it was relatively difficult for an eight-star peerless Heavenly Pride to quickly improve their destiny.

Ye Tian has suddenly improved his ranking so much; he couldnt have reached the nine-star peerless Heavenly Pride level, or even defeated a nine-star peerless Heavenly Pride, could he?

Yun Xi thought so.

At that moment, she also remembered what her ancestor had said. Her ancestor had mentioned that Ye Tian had a chance to reach the level of a Child of the Universe. She had been skeptical about this before, but now she believed his words.

With Ye Tians current rate of progress, he definitely had the hope of reaching the level of a Child of the Universe.

I should also work hard, hoping to improve my strength to the level of top-tier eight-star peerless Heavenly Prides before the end of the Heavenly Pride battle, so that the Yun Family of the Milky Way can re-enter the Hengpan Galaxy!

Yun Xis eyes were incredibly determined.

In the world of the Saber Realm fragments.

At this moment, Ye Tian was refining the token of the Saber God Sect, while Raging Sun Heavenly Pride and Crescent Moon Heavenly Pride ceased their battles. After all, the token had already been snatched by Ye Tian, and it was meaningless for them to continue fighting.

So, they began to heal their injuries not far away, hoping to recover from their wounds as soon as possible.

One day, Ye Tian finally finished refining the token of the Saber God Sect.

At that moment, he finally understood the use of this token.

This token turned out to be an authorization token for the Saber Realm, allowing free entry and exit to the Saber Realm and even access to certain areas of the Saber Realm.

Otherwise, it would be impossible to obtain the inheritance and treasures of the Saber God Sect.

Knowing the use of this token, Ye Tian was overjoyed.

It meant that he could leave the fragment world of the Saber Realm at any time and even had the chance to obtain the inheritance of the Saber God Sect.
