

## Talent 801

### Chapter 801: Three Basic Peak Talents

The core area of the Misty Region, also known as the Chaos Divine Realm, was immense. Previously, Ye Tian's Life Heavenly Eye had been suppressed here, limiting its sensing range and preventing him from detecting the true core of the Chaos Divine Realm.

At this moment, under the guidance of Niu Long, Ye Tian arrived at the core of the Chaos Divine Realm.

Here, he saw a magnificent holy tower. Infinite holy light enveloped this area, and beneath the tower, several powerful beings with ox heads and human bodies sat cross-legged. Their auras far surpassed that of a first-tier Supreme, and some were even stronger than Niu Long, reaching the level of Divine Generals.

"These should be the strong members of the Ox Race!"

The Ox Race was a semi-chaotic race containing chaotic life bloodlines. They were common in the Chaos, but extremely powerful within the universe.

The Ox Race had entered the universe for a long time and had even survived many cosmic catastrophes.

"Niu Long, you're back!" An elder-looking strong member of the Ox Race spoke.

"Third Elder, this person dodged my full-strength attack and is very close to the level of a one-star Divine General. He has recently broken through to the Earthly Venerable Realm. His potential is immense, even surpassing the geniuses of our clan!" Niu Long reported truthfully.

The Third Elder of the Ox Race fixed his gaze on Ye Tian, causing immense pressure on him.

"This Third Elder should be a two-star Divine General," Ye Tian speculated.

“Indeed, he is quite remarkable. Even within the Chaos, he would be considered a genius. The universe lacks powerful legacies, so reaching this level is impressive. However, even so, we cannot guarantee that you will pass the assessment.” The Third Elder stated.

Ye Tian glanced around, a thought suddenly crossing his mind. He decided to use his long-unused Copy Talent.

In the universe, his Copy Talent had limited use, as he no longer lacked talents and rarely gained anything new.

But just now, he realized that the Ox Race came from the Chaos, potentially having unique talents.

One after another, the talents of the Ox Race members appeared before Ye Tian’s eyes.

Ox Race: Niu Long

Cultivation Talent: Mixed level

Strength Talent: Peak God level

Defense Talent: Peak God level

Speed Talent: Peak God level

Staff Technique Talent: Supreme level

Earth Spear Talent: God level

Diamond Talent: God level

...

Ox Race: Niutong

Cultivation Talent: Mixed level

Strength Talent: God level

Defense Talent: God level

Speed Talent: Peak God level

Staff Technique Talent: Supreme level

Fire Talent: God level

Water Screen Talent: God level

...

Ye Tian was astounded by the talents of the Ox Race.

“Peak Talents!”

Although not all members of the Ox Race possessed them, many did have Peak Talents. In the Origin Realm, many Origin Beasts had Ultimate Strength Talents, but these were granted by the realm itself and not acquired through cultivation.

Most of the Ox Race did not possess Peak Talents, but a few did. Among these, the types of Peak Talents varied, such as Peak Strength or Peak Speed Talents.

This was unusual.

“They cultivated their Peak Talents!” Ye Tian speculated.

From Harmon's memories, he knew that even in the Chaos, Peak Talents were not commonplace but very rare. They were typically found in special races or the descendants of powerful beings.

As for cultivating Peak Talents, even the Hidden God Organization couldn't achieve this. Any method capable of enhancing talents to the Peak God level would be exceedingly rare, enough to drive Destiny Realm experts to madness and slaughter.

"The Ox Race has mastered a method to cultivate Peak Talents!" Ye Tian realized.

However, such a method must have been extremely difficult to cultivate. Otherwise, there wouldn't be so few Ox Race members with Peak Talents.

Ye Tian also desired this method, but it had to be exceptionally precious. Even the Hidden God Organization didn't possess such a method. How could the Ox Race give it to him easily? Furthermore, asking about Peak Talents was tricky since they were hard to detect. Even in combat, it was challenging to identify them unless there was a treasure capable of testing for Peak Talents.

If Ye Tian brought it up, the Ox Race would undoubtedly wonder how he knew they had Peak Talents. Exposing his Copy Talent would be detrimental.

"Peak God-level Defense Talent, copy!"

"Peak God-level Speed Talent, copy!"

Ye Tian instantly copied these two Peak Talents. Once he integrated them, his strength, speed, and defense—his three fundamental talents—would all reach the level of God-level Peak Talents, significantly boosting his power. This method was far easier than painstaking cultivation. If he followed the normal cultivation process, it might take hundreds of thousands or even millions of years to achieve such an improvement.

Moreover, once he integrated these two Peak Talents, his strength might break through the barrier, directly advancing him to the level of a one-star Divine General! The only regret was that among the Ox Race, there were no Supreme-level cultivation talents, only Mixed-level ones. He had long understood that Mixed-level cultivation talents could advance to the Destiny Realm, but surpassing it to reach the True Spirit Realm likely required a supreme-level talent.

Although he had copied the Peak Talents, Ye Tian still wanted to obtain a similar method. After all, even if he didn't need it, his family and the human race did.

"Let's undergo the assessment first. Maybe if I succeed, I can obtain such a method," Ye Tian thought to himself.

Soon, Niu Long led Ye Tian into the holy tower.

The assessment would take place inside the holy tower! As for the content of the assessment, Niu Long didn't reveal anything.

When Ye Tian truly entered the holy tower, a force enveloped him, transporting him to an unknown location.

Boom! A terrifying monster appeared, its aura still at the Earthly Venerable Realm but just as powerful as Ye Tian.

"Peak first-tier Supreme!" Ye Tian realized.

"Primordial Domain!"

"Heavenly Killing Saber!"

Ye Tian attacked instantly, clashing with the terrifying monster. However, his first strike only inflicted a minor injury on the monster.

"This monster's strength isn't formidable. I'm almost at the level of a one-star Divine General, while it's several tiers lower. However, I can't kill it immediately. If a one-star Divine General monster appears next, I won't be able to handle it!" Ye Tian thought.

Thus, he focused on defense, fending off the monster while starting to integrate the Peak God-level Defense Talent and the Peak God-level Speed Talent. Once he merged these Peak Talents, his power would surge, giving him a better chance of achieving a higher score.

"Merge!"

Ye Tian endured the pain, continuously integrating the Peak Talents. Simultaneously, he allocated a small portion of his mind to control his body and fight the monster.

During the integration process, the pain was so intense that Ye Tian struggled to perform at his best, continuously taking a beating. However, his defense was impressive. As a half-step chaotic life form, he was naturally hard to kill.

After half an hour, Ye Tian successfully integrated the Peak God-level Defense Talent, significantly enhancing his defense capability.

“Continue merging!”

Ye Tian began to integrate the Peak God-level Speed Talent.

Once successful, not only would his base speed increase, but even his Eternal Radiance divine ability would be enhanced.

Chapter 802: One-Star Divine General

Boom! Boom! Boom!

The frenzied attacks from the monster at the pinnacle of the peak first-tier Supreme battered against Ye Tian, but his defenses were too formidable, making it impossible to kill him.

Another half hour passed in the blink of an eye.

Suddenly, Ye Tian’s aura shifted. His eyes locked onto the monster, and he declared, “Now it’s my turn to attack you!”

With a swift motion, a single slash severely injured the peak first-tier Supreme monster. The second slash completely annihilated it.

“If it were a peak first-tier Supreme with strong life-preserving abilities, I wouldn’t be able to kill it. But this monster only had immense strength, mediocre defenses, and poor survival abilities, so it couldn’t withstand even two of my strikes,” Ye Tian murmured.

Now, he was certain he had broken through the barrier between the peak first-tier Supreme and the one-star Divine General, as he had felt himself piercing through a thin membrane of limitation just moments ago.

However, despite being a one-star Divine General, he was the weakest type of one-star Divine General.

“Killing a peak ten-star Earthly Venerable level blood beast, one point awarded!” An anonymous voice echoed.

“One point?” Ye Tian didn’t know what this score meant, but it was surely related to the assessment results.

“In half an hour, ten peak ten-star Earthly Venerable level blood beasts will appear. Candidates, prepare yourselves!” The voice echoed once more.

“Ten peak ten-star Earthly Venerable blood beasts are equivalent to ten peak first-tier Supreme blood beasts. Together, their combined strength far exceeds that of a single peak first-tier Supreme blood beast,” Ye Tian murmured.

However, with his current one-star Divine General strength, he shouldn’t be afraid. It would only take some effort to kill them one by one.

The half-hour passed quickly.

Boom! Blood beasts descended one after another. As soon as they appeared, Ye Tian’s expression shifted.

“Each of these blood beasts’ auras is stronger than the previous one. Although they’re still at the peak first-tier Supreme, these ten blood beasts are clearly closer to one-star Divine Generals. Together, their power could rival a weaker one-star Divine General! This battle won’t be easy!” Ye Tian thought to himself.

If he could stabilize his one-star Divine General strength and use some elixirs to refine his body and soul, his power would increase significantly. Killing these ten blood beasts would then be much easier.

But now, having just broken through and being at the weakest level of a one-star Divine General, this battle would not be easy.

He had one advantage, though: speed! The Eternal Light Divine Ability would allow him to evade the attacks of the ten blood beasts. Combined with his strong defense, given some time, he could kill the blood beasts one by one.

“I’ll wear them down slowly,” Ye Tian decided.

Thus, the battle began! Ye Tian used the Eternal Light Divine Ability to dodge their attacks, striking the ten blood beasts one by one. Individually, the blood beasts were no match for him, but together, their attacks could counter his saber aura.

Time passed slowly.

Several hours later, one of the blood beasts, which Ye Tian had focused on, was heavily injured, with its power and speed greatly diminished.

“Primeval Slash!”

Ye Tian unleashed this strike. Though it didn’t greatly enhance his current power, it was still one of his strongest ultimate moves.

With a slash, the blood beast was directly killed.

With one of the ten blood beasts dead, dealing with the rest became much simpler for Ye Tian.

Next, the second blood beast fell! Then the third! The fourth! Half an hour later, Ye Tian stood in the void, surrounded by the corpses of the ten blood beasts.

“Killing ten peak ten-star Earthly Venerable blood beasts, three points awarded!”

“In half an hour, a one-star Divine General peak blood beast will descend. Candidates, prepare yourselves!”

The voice sounded again.

“What? A one-star Divine General peak blood beast!!!” Ye Tian’s expression changed.

The gap between a newly advanced one-star Divine General and a peak one-star Divine General was enormous. He couldn’t deal with a blood beast at the peak of the one-star Divine General level.

“Failing the assessment won’t result in death. Otherwise, Heavenly Monarch Yun Tan would have surely died back then!” Ye Tian speculated.

Although he wasn’t clear about Heavenly Monarch Yun Tan’s strength, he guessed it was at most a one-star Divine General. Without powerful inheritance, it was very difficult to advance to the two-star Divine General level.

Moreover, if the assessment could casually lead to death, it would lose its purpose.

“I’ll give it my all in this battle!” Ye Tian murmured.

Half an hour later, a blood beast as colossal as a mountain appeared, its aura terrifyingly immense.

“Fight!” Ye Tian charged forward with his long saber in hand.

He did not seek victory, only to fight with all his might.

Boom! The peak one-star Divine General blood beast slapped Ye Tian away with one swipe. His Primordial Domain and Time-Space Domain shattered, and even the Chaos Origin Ancient Well cracked.

The Chaos Origin Ancient Well was a manifestation of the Chaos Dao Phenomenon. Even if it was shattered, it could condense again, but it was one of Ye Tian’s strongest defensive measures and barely managed to withstand a single strike from the peak one-star Divine General blood beast.

If this blood beast attacked again, Ye Tian would be unable to resist.

“Eternal Light Divine Ability!” Ye Tian tried to use his speed to avoid being hit.

However, at that moment, the blood beast released boundless blood light, transforming into a domain that enveloped the area, instantly suppressing Ye Tian.

“If I were outside, I could run, but here in the assessment area, the range is small, and I can’t escape!” Ye Tian frowned.

Unable to escape, he had no choice but to fight head-on.

Within just a few moves, Ye Tian was severely injured.

He didn’t use his damage transfer talent to shift the damage to the Sea of Death Flowers because it was useless. The potential of the Sea of Death Flowers was still too low, and even if it was elevated to the Heavenly Venerable level, it wouldn’t withstand a casual strike from a Divine General.

One breath! Two breaths! Three breaths! Ye Tian kept persevering, but the difference in strength was too great. He couldn’t hold on! Just when Ye Tian was severely injured and near death, the blood beast disappeared.

A beam of light shone down, healing all his wounds.

“Failed to defeat the peak one-star Divine General blood beast. The first round of assessment is over, commencing the second round!” The voice announced.

“What a pity!” Ye Tian said helplessly.

If he had defeated the peak one-star Divine General blood beast, he would have earned many points, and his assessment score would have been higher.

Whoosh! The void shifted, and Ye Tian arrived in a grand hall of a divine temple.

Here, a mirror floated in mid-air.

“Stand before the Myriad Void Mirror to test your potential!” the voice commanded.

Ye Tian stepped forward and stood before the Myriad Void Mirror.

A beam of light scanned Ye Tian, and soon a set of data appeared.

Candidate: Ye Tian

Physical Potential: 9 points

Soul Potential: 7 points

Talent Potential: 10 points

Total: 26 points

“This data, could it be that the full score is 10 points? My talent potential is perfect, but my physical potential isn’t a full score, only 9 points, and my soul potential is merely 7 points!” Ye Tian was surprised.

At this moment, the voice echoed again, “The second round of assessment is over, scoring 26 points!”

Chapter 803: The Void Sky

“Half an hour until the third round of the assessment begins. All candidates, please prepare!” The mysterious voice reappeared.

Ye Tian had no idea what the third round would entail. It could be incredibly difficult or similar to the second round. Regardless, he needed to be in his best condition to face it.

Suddenly, a scroll appeared in the void, and a diagram emerged on the scroll. This diagram was inscribed with rules, filled with infinite mysteries.

“Comprehend the Void Sky Diagram composed of 100 rule lines. Scores will be calculated based on completion. Candidates, begin the assessment now. You have ten thousand years,” the mysterious voice stated.

“Ten thousand years,” Ye Tian immediately frowned. He then asked, “Senior, the Misty Region closes every ten years. If I stay here in seclusion for ten thousand years, will it have any effect?”

He asked casually, not expecting the owner of the mysterious voice to respond. The voice could belong to a tool spirit, a powerful being from the Ox Race, or something else entirely. But it didn’t necessarily have to answer him.

However, the voice did reply. “Rest assured, candidate. The Misty Region closes every ten years, causing beings within to leave the main space of the universe and enter a special dimension of the Chaos Divine Realm. This dimension cannot be exited by even Supremes and does not annihilate rules. Additionally, being in the Chaos Divine Realm, you will not be affected. You can comprehend at will here without any issues.”

Having received this answer, Ye Tian felt completely at ease. He then focused his attention on the diagram on the scroll.

The third round required ten thousand years for the assessment, indicating its extreme difficulty. “Void Sky Diagram, I wonder how much I can comprehend. If I can fully comprehend it, I should be able to get a high score!” Ye Tian speculated.

He tried to accelerate time to experiment but found it was impossible. To comprehend the Void Sky Diagram under accelerated time, he had to envelop it with time rules. However, as soon as his time rules touched the Void Sky Diagram, they shattered.

“Sigh, no shortcuts. I’ll have to comprehend it honestly!” Ye Tian murmured. He immediately activated his comprehension talent, putting all his effort into understanding the Void Sky Diagram.

Unfortunately, his comprehension talent, which could increase his comprehension twentyfold at lower cultivation levels, had diminished greatly at his current level. Now, at the level of a Universal God, he realized that this increase reduced gradually. At his current stage, it could only enhance his comprehension by two or three times.

In truth, all talents worked this way—the stronger one’s power, the lower the enhancement effect. In the future, if he entered chaos, the enhancement would decrease even more, nearly becoming negligible, as talents birthed by the universe were significantly weakened in chaos.

Ye Tian continuously comprehended the rules on the Void Sky Diagram but soon frowned deeply. “Such profound rules. The rules of the universe are too weak compared to these. These belong to the supreme rules of chaos. It’s so difficult to comprehend!”

Originally, he believed he had a chance to fully understand the Void Sky Diagram within ten thousand years, but now he realized it was almost impossible.

...

Outside the temple, Niu Long and other powerful members of the Ox Race watched the temple, determining through time that Ye Tian was undergoing the third round of the assessment. Otherwise, he would have come out by now.

“Niu Long, this human boy’s talent is indeed remarkable. If he lacked strength and potential, he wouldn’t have reached the third round of the assessment. Back then, that boy named Heavenly Monarch Yun Tan, didn’t make it to the third round either. He only earned the status of an ordinary nominal disciple and later, despite his power increasing somewhat, only managed to obtain a single treasure from the temple and luckily transcended.

This human boy’s future achievements will likely far surpass Heavenly Monarch Yun Tan. However, it’s unclear how many stars he will ultimately achieve as a Divine General.”

Elder Niu Tong spoke, “At the very least, he should become a six-star Divine General. By becoming a nominal disciple of that great being and receiving some inheritance, he could at least become a three-star Divine General. Heavenly Monarch Yun Tan, is a three-star Divine General, and this human boy has even more potential than Yun Tan and has entered the third round. He has the potential to become a six-star Divine General.

As for higher levels, that’s incredibly difficult! In the chaos, Divine Generals above seven stars are exceedingly rare. Numerous disciples of powerful beings reach the level of seven-star Divine Generals, but it is exceptionally rare. Moreover, this place is merely a hall of inheritance. That great being has countless nominal disciples, many official disciples, and several personal disciples. To reach the level of a seven-star Divine General, one must be among the best of the official disciples.”

Niu Long spoke with envy. His potential was limited, and being unable to leave the Chaos Divine Realm, he could only maintain his current strength.

“Does he have a chance to become an official disciple?” Niu Tong asked, both hopeful and doubtful. Becoming an official disciple of that great being was incredibly difficult.

“If he can become an official disciple, our race could leave this universe, return to chaos, and even be allowed into that place. We could continue to increase our strength and reach the Destiny Realm!” Niu Long thought excitedly. However, they could only imagine it, not believing Ye Tian could become an official disciple.

Time passed, and in the blink of an eye, three hundred years had gone by.

Ye Tian was still comprehending the Void Sky Diagram. Although his progress was slow, he had comprehended 6% of the diagram. The progress was slow, but Ye Tian had no other option and had to continue his comprehension.

Within the Human Race’s Supreme Hall, a group of Supremes discussed a pressing issue with worried expressions.

“The Supreme of Ten Thousand Laws is missing!” Kunwu Supreme announced.

“What? The Supreme of Ten Thousand Laws’ strength should be at the level of a first-tier Supreme. Even if the Master of the Primordial Era made a move, it wouldn’t necessarily affect the Supreme of Ten Thousand Laws. How could he go missing?” Divine Blade Supreme questioned, then added, “Could he be in seclusion?”

“No, the Supreme of Ten Thousand Laws isn’t in seclusion. He informed me before going to the Misty Region, saying he was going to explore the core region. But now the Misty Region has closed, and the Supreme of Ten Thousand Laws hasn’t come out. You should know that once the Misty Region closes, no one has ever emerged from it,” Kunwu Supreme said with great sadness.

“Could the Supreme of Ten Thousand Laws have fallen?” The Human Race Supremes were filled with fear. The Supreme of Ten Thousand Laws was the pillar of the Human Race. If he had fallen, their status would be affected.

“Not necessarily fallen. Ask the family of the Supreme of Ten Thousand Laws. They should have some treasures or avatars of his to confirm his life or death,” Primordial Supreme suggested.

“Alright, I’ll ask!” Kunwu Supreme immediately sent his avatar to Tian Pavilion to inquire from Xiao Yue.

Soon, Kunwu Supreme received the news. “The Supreme of Ten Thousand Laws hasn’t fallen, but his avatar has dissipated due to a lack of power. However, his wife, Heavenly Venerable Yue, revealed that the Supreme of Ten Thousand Laws has a hidden avatar somewhere. That avatar mentioned that he is receiving an inheritance and, once he emerges, his strength will greatly increase, possibly sweeping through all the Supremes of the universe!” Kunwu Supreme said excitedly.

“Really?” The Human Race Supremes were all thrilled. Sweeping through all the Supremes of the universe—what did that mean? Could he be a first-tier Supreme?

Chapter 804: Prospective Official Disciple

The rank above the first-tier Supreme had been unknown to the many Supremes of the human race, but Ye Tian had informed them during past exchanges.

Divine General! Above the first-tier Supreme was the Divine General. This was a classification of combat power within the chaos. The Divine General was still within the realm of Earthly Venerable, or Heavenly Venerable, but their combat strength was exceedingly powerful.

In this era of the universe, there had not yet been a single Divine General. If Ye Tian reached the combat strength of a Divine General, he could easily sweep through all the Supremes. Unless other forces also produced combat power of a Divine General, they would be utterly unable to oppose Ye Tian.

“Divine General combat power is not some bullshit Divine General of the Immortal Race. It’s the combat power of a Divine General within the chaos, able to effortlessly kill a first-tier Supreme. If the Supreme of Ten Thousand Laws attained the combat strength of a Divine General, our human race would utterly dominate all other races!” Primordial Supreme said excitedly.

“Let’s wait. In a few thousand years, the Supreme of Ten Thousand Laws should emerge!” Supreme Kunwu added.

Then, the human race's Supremes dispersed.

Originally, they had believed Ye Tian had perished in the Misty Region and had been discussing it. Now that it was confirmed Ye Tian had not died, there was no need to continue the discussion.

In a flash, another 700 years passed.

Ye Tian had been comprehending within the Temple of the Chaotic God Realm for a full 100 years, which was also the time stipulated by the assessment.

Ye Tian let out a deep sigh.

He had comprehended 6% of the Void Sky Diagram in 300 years. He had thought that in the remaining 700 years, he could at least comprehend more than 10% of the Void Sky Diagram.

But in reality, over the next 700 years, he only comprehended an additional 4%.

“At this rate of comprehension, how long will it take to fully comprehend the entire Void Sky Diagram? A million years, or tens of millions of years?”

Ye Tian did not know, but he knew that it would take an incredibly long time to fully comprehend the Void Sky Diagram, if it was even possible.

Because without enough understanding, some things simply could not be comprehended.

Additionally, he did not know the purpose of the Void Sky Diagram yet, but it must be extremely important; otherwise, the third round of the assessment would not have involved comprehending the Void Sky Diagram.

“The time for the third round of assessment is up. The assessor has comprehended 10% of the Void Sky Diagram, scoring 10 points!”

“All assessments are complete. The assessor has scored 40 points!”

“Assessor, congratulations on obtaining the status of prospective official disciple!”

A series of voices echoed in Ye Tian’s mind.

At this moment, Ye Tian breathed a sigh of relief.

He knew his assessment results were excellent because even Heavenly Monarch Yun Tan had only obtained the status of a nominal disciple, while he had obtained the status of a prospective official disciple, which was much stronger. A prospective official disciple represented possessing the qualifications of an Official Disciple, but currently, the qualifications had not completely reached the level of an Official Disciple, thus he was considered a prospective official disciple.

Outside the temple, the Ox Race, who guarded the area, quickly learned of Ye Tian’s assessment results.

“The human Ye Tian from this universe has obtained the status of prospective official disciple!” a formidable member of the Ox Race announced.

Despite his powerful aura, he was filled with an air of age, suggesting his life was near its end. Even beings above Universal God level had limited lifespans, unable to transcend the great cosmic destruction, thus they would fall when their lifespan reached its limit.

This elder had lived for an exceedingly long time, having survived multiple cosmic eras in this universe, and his lifespan limit had now arrived.

Yet, his strength was immense, slowly cultivated over eons, possessing the combat power of a three-star Divine General, making him the only three-star Divine General of the Ox Race.

“Patriarch!” The many powerful members of the Ox Race called out in unison.

“Ye Tian is a prospective official disciple with the potential to become an Official Disciple. Although you cannot leave, do your best to assist Ye Tian in the Chaotic God Realm. Understand? He is our hope for leaving!” The patriarch of the Ox Race instructed.

“Yes!” The many powerful members of the Ox Race responded.

After the patriarch departed, Niu Long was astonished, “That human kid actually obtained the status of prospective official disciple. His strength isn’t great, so his potential and comprehension must be terrifying!”

“Niu Long, since you brought him in, you will be responsible for guiding him when he comes out. Provide him with some assistance and help him improve his strength,” Elder Niu Tong instructed.

“I understand, Third Elder,” Niu Long replied.

Inside the temple, as Ye Tian’s assessment concluded, a figure materialized.

The figure appeared very ethereal, with a body entirely composed of rules. Each wisp of his aura could suppress Ye Tian.

“Senior!” Ye Tian greeted.

He knew this senior must be the owner of the previous voice, but he did not know their identity.

“Assessor, congratulations on becoming a prospective official disciple. I am a being enlightened by that great existence, named Shang. You can consider me the spirit of this temple. I am here to give you your reward, but you need to choose it. Remember, choose wisely, or it will affect your future progress!” Shang explained.

“Senior Shang, I understand!” Ye Tian nodded.

With a wave of Shang’s hand, a book appeared.

“This is the Profound Void Technique, a chaotic body refining secret technique created by the great existence. You have practiced a simplified version of a body refining secret technique before. That technique is quite good, but it cannot compare to the Profound Void Technique. Even the original version of that technique cannot match the Profound Void Technique.

It allows you to continue pushing the physical limits of your body within the Earthly Venerable realm and refine it to an extremely powerful degree. This is also one of the main methods to

enhance strength after becoming a Divine General. Without it, it would be very difficult to continue improving your strength!” Shang introduced.

“The Profound Void Technique!” Ye Tian was very excited.

He knew the simplified chaotic body refining technique Shang mentioned was likely the Chaos Golden Desolation Technique. It turned out that it was just a simplified version, probably created by Elder Golden Desolation to select disciples. The true original must only be taught after becoming Elder Golden Desolation’s disciple.

Immediately, Ye Tian accepted the Profound Void Technique. Next, Shang took out three treasures.

“The Space-Time Heart Seal can stabilize the space-time river, connect with true spirit marks, and forcibly transcend. It is suitable for ordinary universes and requires the strength of a three-star Divine General to use.”

“The Nine Treasures Fiend Pearl can be used to temper willpower and state of mind.”

“The Revival Pool is a special chaotic treasure that allows nine resurrections. After nine uses, the Revival Pool will shatter.”

Ye Tian’s eyes lit up as he looked at these three treasures.

If possible, he naturally wanted all of them, but he could only choose one.

“The Space-Time Heart Seal allows for forcible transcendence in an ordinary universe. It must be a treasure crafted by that great existence. When Heavenly Monarch Yun Tan transcended against the heavens, his own power wasn’t enough. He must have used the Space-Time Heart Seal.

Unfortunately, I don’t want to become a simple transcender.

Moreover, it requires the strength of a three-star Divine General to use. My wife and sister would likely find it hard to become three-star Divine Generals.

Therefore, it’s of no use to me!”

“The Revival Pool can give me nine lives. This treasure seems amazing, but having a means to save my life, especially nine times, might affect my state of mind.

Besides, with my strength, it’s unlikely I’ll encounter danger in the universe. This treasure isn’t very useful!”

“The Nine Treasures Fiend Pearl can be used to temper willpower and state of mind. This is an incredibly rare treasure. At my level, it is extremely difficult to enhance willpower and state of mind. This treasure is very useful to me!”

Ye Tian immediately made his decision.

“I choose the Nine Treasures Fiend Pearl!” Ye Tian declared.

Chapter 805: Choosing a Chaos Divine Ability

“Not a bad choice!”

Shang nodded and said, “Although the Space-Time Heart Seal allows you to transcend, it only grants you the potential of an ordinary transcender, which is quite limited. Choosing it would not be a wise decision.

As for the Revival Pool, it seems appealing, but each revival would consume your potential. After nine rebirths, your potential would significantly decrease.

Choosing the Revival Pool would be the most foolish decision.

Now, selecting the Nine Treasures Fiend Pearl is indeed the best choice! However, the Nine Treasures Fiend Pearl is only effective below the Destiny Realm. Once you transcend into the Destiny Realm, it becomes largely useless!”

Hearing Shang’s explanation, Ye Tian felt fortunate to have made the right choice.

With a swish, Shang directly took out the Nine Treasures Fiend Pearl and handed it to Ye Tian.

Ye Tian didn't inspect it immediately but directly stored it away.

Suddenly, Shang continued, "You are a prospective official disciple. The previous reward was meant for nominal disciples, but you have another reward, which is even more precious.

This reward includes a Chaos Divine Ability inheritance and two Great Divine Ability inheritances.

In the chaos, Chaos Divine Abilities and the top hundred of the Three Thousand Great Divine Abilities are extremely precious. This reward allows you to choose any divine ability freely from here, and you will also receive an origin object corresponding to one of the divine abilities you select."

"A Chaos Divine Ability, two top-tier Great Divine Abilities! An origin object!"

Ye Tian's breathing became rapid. Although he already possessed a top-tier Great Divine Ability, the Eternal Light Divine Ability, ranked 172nd among the Three Thousand Great Divine Abilities, it was still far inferior to those in the top hundred!

"Senior Shang, what Great Divine Abilities are available here?" Ye Tian asked excitedly.

"See for yourself!"

Shang waved his hand, and countless names of divine abilities appeared in the void.

One by one, the names of top-tier Great Divine Abilities appeared before Ye Tian, dazzling him.

[Great Teleportation Technique, ranked 42nd among the Great Divine Abilities]

[Great Immortality Technique, ranked 26th among the Great Divine Abilities]

[Great Insight Technique, ranked 12th among the Great Divine Abilities]

[Great Destruction Technique, ranked 72nd among the Great Divine Abilities]

The top hundred divine abilities of the Three Thousand Great Divine Abilities all had the character “Great” in their names, possibly a habit of chaos powerhouses to signify the might of these top-tier Great Divine Abilities.

The Eternal Light Divine Ability’s name paled in comparison!

Then, Senior Shang also presented the names of Chaos Divine Abilities before Ye Tian.

However, the number of Chaos Divine Abilities was limited, only a few dozen, and their rankings were not high.

[Supreme Teleportation Technique, ranked 75th among Chaos Divine Abilities]

[Tiangang Dong Origin Divine Ability, ranked 721st among Chaos Divine Abilities]

[Ancient Origin Defense Divine Ability, ranked 271st among Chaos Divine Abilities]...

“Senior Shang, shouldn’t that great being have collected many Chaos Divine Abilities? Why are there so few here?” Ye Tian asked, puzzled.

Shang smiled and said, “In the universe, very few can cultivate Chaos Divine Abilities successfully. These are left here because they are possibly achievable. Other Chaos Divine Abilities don’t have the corresponding origin objects born within the universe, do you understand? In reality, Chaos Divine Abilities shouldn’t be left behind because it is nearly impossible to cultivate them within the universe. The reason is simple: insufficient talent. In chaos, some treasures that break limits can barely provide the hope of cultivating Chaos Divine Abilities, but there is no such hope in the universe! Yet, you can still choose a Chaos Divine Ability, and though you can’t cultivate it now, you may be able to in the future!”

Ye Tian nodded, understanding that the requirements to cultivate Chaos Divine Abilities were extremely stringent. Even he, without his copying talent and ability to merge talents, wouldn’t have been able to master the Eternal Light Divine Ability, and that was merely a Great Divine Ability. He currently didn’t qualify to cultivate Chaos Divine Abilities!

Ye Tian carefully examined the Chaos Divine Abilities, each with a detailed description, not just a name.

When he saw the Ancient Origin Defense Divine Ability, his expression changed.

“The origin object required for this Chaos Divine Ability is the Origin Well. In that case, I meet one of the basic conditions to cultivate the Ancient Origin Defense Divine Ability.” Ye Tian made his decision.

Perhaps the Ancient Origin Defense Divine Ability was quite ordinary and far inferior to other Chaos Divine Abilities, but even the strongest Chaos Divine Ability here was merely the Supreme Teleportation Technique. The origin object for it was extremely rare, and Ye Tian didn’t know when he would obtain it.

However, he had a chance to master the Ancient Origin Defense Divine Ability. Compared to the far-off hope of mastering other powerful Chaos Divine Abilities, the Ancient Origin Defense Divine Ability was more important.

“Although the Supreme Teleportation Technique is incredibly precious, if I truly become an official disciple of that great being, I might receive even more valuable Chaos Divine Abilities. For now, the Ancient Origin Defense Divine Ability suits me best!”

With this thought, Ye Tian made his decision.

“For the Chaos Divine Ability, I choose the Ancient Origin Defense Divine Ability!” Ye Tian declared.

“You choose the Ancient Origin Defense Divine Ability? It’s ranked only 271st among the Chaos Divine Abilities.” Shang was quite surprised.

In his opinion, Ye Tian should have chosen the Supreme Teleportation Technique.

“Why?” Shang asked curiously.

Ye Tian didn’t answer directly but instead displayed his Chaos Origin Well phenomenon.

Seeing this, Shang understood completely. “I didn’t expect you to be so fortunate as to obtain the Origin Well!”

With the Origin Well, Ye Tian met one of the basic conditions for cultivating the Ancient Origin Defense Divine Ability, giving him a hope of success.

“Ye Tian, although you possess the Origin Well, which aligns with the Ancient Origin Defense Divine Ability, you must also have the corresponding Super God-level talent. The required talent is a fusion of Earth-type and physical body talents, known as Earth Origin Talent. Only with a Super God-level Earth Origin Talent can you cultivate the Ancient Origin Defense Divine Ability.

In the universe, the limit for Earth-type talents is only God-level. To have a Super God-level Earth-type talent and a Super God-level physical body talent that merge into a Super God-level Earth Origin Talent is necessary to cultivate the Ancient Origin Defense Divine Ability! Now, you understand the difficulty of cultivating Chaos Divine Abilities! In the chaos, geniuses who can cultivate the rudiments of a Chaos Divine Ability at the Earthly Venerable Realm are typically personal disciples of ancient Harmony experts or some exceptional geniuses.” Shang explained.

“Super God-level Earth-type talent, Super God-level physical body talent!” Ye Tian memorized these requirements.

For others, merging Earth-type and physical body talents would be exceedingly difficult, but he could easily achieve this with his copying talent. However, obtaining a Super God-level Earth-type talent was incredibly challenging.

He possessed Earth-type talents, but they were all God-level. He didn’t know how to elevate them to Super God-level.

“Senior Shang, is it really impossible to have Super God-level Earth-type and Super God-level physical body talents in the universe?” Ye Tian asked, unwilling to give up.

Shang remained silent for a moment before replying, “It’s nearly impossible to elevate to Super God-level talents in the universe. At least, I don’t know how. Only some special races naturally possess Super God-level talents!”

“Special races...” Ye Tian’s mind raced.

If he could find such races, he could copy their Super God-level talents! However, in the universe, only time and space talents could reach Super God-level; other talents maxed out at God-level.

Shang didn't elaborate further and handed Ye Tian a book.

"This contains information about some special races in the universes. You can take a look. As for whether your universe has beings with Super God-level Earth-type and physical body talents, I cannot guarantee," Shang said.

Chapter 806: Emergence

Ye Tian received the ancient text from Shang. This text wasn't part of the rewards; it was something Shang had given additionally, and it wasn't particularly valuable.

Ye Tian put it away and continued to choose his divine abilities.

He had already selected the Chaos Divine Ability, but he still needed to choose two Great Divine Abilities and one Origin Artifact.

As he contemplated these Great Divine Abilities, Ye Tian thought quietly.

"I have an Origin Artifact—Immortal Divine Gold. At the innate Origin Artifact level, it's considered extremely high-grade. I must choose a top-tier Great Divine Ability that corresponds to the Immortal Divine Gold. This way, I'll be confident in mastering yet another top-tier Great Divine Ability, significantly boosting my power!"

With this in mind, Ye Tian immediately made his choice.

"I choose the Great Immortality Technique!" he announced.

"The Great Immortality Technique, an excellent choice. This top-tier Great Divine Ability ranks 26th among the Three Thousand Great Divine Abilities. It's incredibly powerful. Once mastered, it can dominate others of the same level," Shang nodded in approval.

“For the second top-tier Great Divine Ability, I choose the 21st Great Destruction Technique. For the innate Origin Artifact, I choose the Destructive Dark Gold,” Ye Tian declared.

Currently, he possessed the Eternal Light Divine Ability, a technique for escape and speed. The Great Immortality Technique was for survival, so he lacked a formidable top-tier Great Divine Ability for offense.

Thus, he opted for the Great Destruction Technique.

After all, among the top hundred Great Divine Abilities, the most formidable offensive one was the Great Destruction Technique.

With his selections made, including one Chaos Divine Ability, two Great Divine Abilities, and one Origin Artifact, Shang handed over the divine ability inheritances and the Destructive Dark Gold to Ye Tian.

Thus, the rewards were complete.

“Ye Tian, you are now a prospective official disciple. Your treatment won’t be much better than that of a nominal disciple. The Sacred Hall won’t offer you many benefits anymore. You’ll need to rely on yourself from now on. Remember, you must elevate your strength to the three-star Divine General level before reaching the Destiny Realm. Only then can you become an official disciple of that great being. And you must not sacrifice your potential to boost your combat power, or your official disciple status will be revoked,” Shang reminded him.

“Thank you for the reminder, Senior Shang!” Ye Tian bowed in gratitude.

Suddenly, Shang produced a scroll, which was the scroll for the third round of assessment.

“This is the Void Sky Diagram. Keep it with you. If you can comprehend it and do so before reaching the Destiny Realm, you will directly become a personal disciple of that great being,” Shang explained.

“What!” Ye Tian was shocked.

He knew the difficulty of becoming an official disciple. Although he was already a prospective official disciple, he still had to elevate his strength to the three-star Divine General level to become an official disciple.

But if he comprehended the Void Sky Diagram, there would be no conditions. He would directly become a personal disciple! A personal disciple stood above official disciples.

“I must comprehend the Void Sky Diagram!” Ye Tian silently resolved.

Yet, he also knew it would be extremely difficult.

“Go now!” Shang waved his hand, sending Ye Tian away.

Outside the Sacred Hall, Ye Tian appeared and immediately saw Niu Long smiling warmly.

“Your Highness, you have emerged!” Niu Long greeted respectfully.

“Your Highness”

Ye Tian felt a bit strange about Niu Long’s address.

“‘Your Highness’ is how we refer to prospective official disciples. It’s actually a title for official disciples, but with your talent, you’ll undoubtedly become an official disciple sooner or later, so I addressed you as such!” Niu Long explained ingratiatingly.

“I see!” Ye Tian replied.

“Senior Niu Long, I’ve passed the assessment and am now ready to leave,” Ye Tian said.

“No, don’t!” Niu Long quickly interjected. “Your Highness, there’s no need to rush. The Sacred Hall’s inheritance is excellent, but it won’t provide you with resources. Everything must come from your own efforts. But the Chaos Divine Realm is different. It’s not an ordinary world. Some of its treasured lands are perfect for Your Highness to cultivate in, and some treasures here can even enhance your strength!”

“What do I need to pay?” Ye Tian asked.

“Your Highness, you need not pay anything. If you were merely a nominal disciple, we wouldn’t offer you any benefits. But now that you’re a prospective official disciple, once you become an official disciple, the Chaos Divine Realm will detach from the universe and return to the outer world, allowing us to leave as well!” Niu Long explained honestly.

“Understood!” Ye Tian suddenly realized why Niu Long’s attitude had changed so drastically.

“What are the good places in the Chaos Divine Realm? Take me there!” Ye Tian requested.

In the depths of the Chaos Divine Realm lay the Chaos Wave Sea, where a series of palaces stood. Some ancient beings from the Ox Race cultivated there.

Before long, Ye Tian and Niu Long arrived.

“Your Highness, this is the Chaos Wave Sea, one of the cultivation treasure lands in the Chaos Divine Realm. The water here can temper the body, though its effects are most potent initially and diminish over time until it can only be used as ordinary energy for refining,” Niu Long explained.

“Understood,” Ye Tian nodded.

Subsequently, under Niu Long’s arrangement, Ye Tian entered one of the palaces.

This palace was half above the water and half below. The cultivation room within contained water from the Chaos Wave Sea, allowing one to soak in it to temper the body.

In the cultivation chamber of the palace, Ye Tian did not immediately begin cultivating. Instead, he took out his recent gains.

“The Profound Void Technique!”

Ye Tian began to practice the Profound Void Technique, with countless profound mysteries manifesting, helping him to continuously comprehend its esoteric principles.

After a long time, Ye Tian's eyes revealed a look of excitement. "As expected of a true Chaos Body Refining Technique. The Chaos Body Refining Technique ignores limits. As long as one's talent and potential are sufficient, one can continue to cultivate indefinitely, continuously tempering the body and strengthening oneself. Compared to the Profound Void Technique, the Chaos Golden Desolation Technique, which is a simplified version of the Chaos Body Refining Technique, falls far short.

The Profound Void Technique is divided into three chapters: the Earthly Venerable Chapter, the Destiny Chapter, and the True Spirit Chapter. The one I have is the Earthly Venerable Chapter. It consists of six levels, and mastering the second level is comparable to the perfected eighth level of the Chaos Golden Desolation Technique."

Originally, his body had reached a point where further tempering was difficult. With the Profound Void Technique, he could continue to enhance himself.

Of course, the Profound Void Technique wasn't easy to cultivate. Without resources, even getting started would be challenging.

"The water of the Chaos Wave Sea is enough to assist in cultivating the Profound Void Technique. I hope it can help me reach the third level. Once I achieve that, my strength will surge!" Ye Tian thought.

Immediately, Ye Tian soaked in the water of the Chaos Wave Sea and began to comprehend the Profound Void Technique.

Time slowly passed this way.

Chapter 807: Ye Tian Returns, Late Stage One-Star Divine General

Various forces were preparing for the fusion of the two universes, which was both an opportunity and a crisis.

One careless move, and even a first-tier Supreme like the Master of the Primordial Era could fall. However, with enough opportunities, there was a chance for a Universal God or a Dominator to rise to a higher level.

The Human Race was also preparing. Even though Ye Tian had not yet returned, the Human Race's Supremes were still rallying together, making preparations for the new era following the fusion of the two universes.

During this period, these Human Race Supremes did everything possible to enhance their own strength while also nurturing the Human Race's talents. Resources were almost limitless and generously provided.

Resources were only valuable if used. If the Human Race were to perish, those resources would become meaningless.

Therefore, they had to transform resources into the strength of the Human Race. The stronger the Human Race, the greater their destiny, giving them some leverage in the upcoming competition.

Of course, they were all well aware that the true reliance of the Human Race was Ye Tian.

If Ye Tian was present, the Human Race would prosper. If Ye Tian fell, the Human Race would decline.

This was not a joke but a reality.

Even the Immortal and Demon Races were very anxious at this time, fearing the unknown that was to come.

The First Divine Lord of the Immortal Race was only a second-tier Supreme, while the other universe undoubtedly had first-tier Supremes. The Master of the Primordial Era dared to kill Supremes of the same universe, and naturally, the Supremes of the other universe would dare to kill the Supremes of this universe.

Thus, the First Divine Lord and the First Demon Lord were very afraid of being killed by first-tier Supremes.

Although the First Divine Lord had an agreement with Ye Tian, where Ye Tian would help the Immortal Race once, the First Divine Lord could not rely entirely on Ye Tian. Therefore, the First Divine Lord secretly allied with the Demon Race.

They even exchanged their secret techniques, Dao, and opportunities, hoping to use this grand event to ascend to the first-tier Supreme realm. Even if they could not step into the first-tier Supreme rank, they could at least join forces to resist external enemies.

Given their foundation, it was hopeful that they could resist a weaker first-tier Supreme.

If it came to the worst, the First Divine Lord could hide in the Divine Realm. With the Divine Race's countless years of array formations and their destiny, even a first-tier Supreme would find it difficult to invade the Divine Realm.

All races were preparing, while Ye Tian continued his cultivation in the Chaos Divine Realm.

In a flash, three hundred thousand years had passed.

"The second layer of the Profound Void Technique has been perfected. My physical body has strengthened a bit, but my power has not skyrocketed. Yet, it is very, very difficult to cross into the third layer of the Profound Void Technique." Ye Tian murmured to himself.

During these three hundred thousand years, he had not only been cultivating the Profound Void Technique but also focused on other aspects of his cultivation.

For instance, he possessed the inheritance of the Great Immortality Technique and the Immortal Divine Gold. The only thing missing was the fusion of a God-level defense talent and a God-level destruction talent into the Immortal Talent. For others, defensive and destruction talents were unrelated and impossible to fuse, but Ye Tian's Copy Talent could forcibly merge these two talents.

Thus, Ye Tian used his Copy Talent to forcibly merge the God-level defense talent and the God-level destruction talent, giving birth to the God-level Immortal Talent.

With the God-level Immortal Talent, the inheritance of the Great Immortality Technique, and the Immortal Divine Gold, Ye Tian fully met the conditions to cultivate the Great Immortality Technique. Hence, he began cultivating it over the past three hundred thousand years.

The Great Immortality Technique ranked 26th among top divine abilities in the chaos. This divine ability was extraordinarily formidable and exceedingly difficult to cultivate.

However, the real difficulty in cultivating the Great Immortality Technique lay in its requirements.

Those who met the conditions to cultivate it were exceedingly rare, and even great beings might not be able to nurture someone who could cultivate this technique.

Once the conditions were met, although cultivation was still required, just getting started was not overly difficult.

Given Ye Tian's talent, he had long since mastered the Great Immortality Technique.

A hum resonated, and the light of immortality emanated from Ye Tian's body. His body appeared as if it was an immortal body, making it difficult even for a two-star Divine General's attack to kill him.

"Unfortunately, this is only the entry-level Great Immortality Technique. If I perfected it, even if my combat power was at the one-star Divine General level, seven or eight-star Divine Generals probably wouldn't be able to kill me in one blow!" Ye Tian thought.

However, he was well aware that it was exceedingly difficult to perfect a top divine ability ranked 26th in the chaos, almost hopeless.

"The Supreme Destruction Technique has not yet been cultivated. I have already obtained the Supreme Destruction Technique and the Destructive Dark Gold, only lacking a God-level annihilation talent."

The annihilation talent was essential for divine abilities such as the Supreme Destruction Technique and the Great Annihilation Technique.

The annihilation talent was a fusion of strength and destruction talents. Ye Tian had used his destruction talent to merge with his defense talent, creating the Immortal Talent. Normally, it would be impossible to cultivate the Great Destruction Technique afterwards, but Ye Tian could copy another God-level destruction talent, something exceedingly difficult for others to obtain.

Ye Tian noted this to himself.

Among the Ox Race, there were quite a few with God-level destruction talents. Therefore, it was easy for Ye Tian to copy a God-level destruction talent and then begin merging it with his Peak God-level strength talent.

In the environment with accelerated time, the fusion of talents was completed, and the God-level annihilation talent was born. Following this, Ye Tian began to comprehend and cultivate the Great Destruction Technique.

The Great Destruction Technique was a supreme attacking divine ability. Once mastered, his strength would undoubtedly skyrocket.

Ye Tian continued his cultivation without rushing to leave since the environment here was highly conducive to his cultivation.

Besides the chaotic sea water that could temper his body, Niu Long occasionally brought top-tier spiritual medicines that could refine divine force, body, and soul, causing his strength to increase rapidly.

In the outside world, he wouldn't have been able to enhance his strength so effectively! If the combat power of a one-star Divine General was specifically divided into early, middle, late, and peak stages, he had been at the early stage when he first emerged from the sanctuary.

In just a few tens of thousands of years, he had already stepped into the middle stage of a one-star Divine General, with hopes of reaching the late stage soon. His combat power had increased significantly compared to before! In the blink of an eye, tens of thousands of years passed again.

By this time, Ye Tian had already cultivated the Great Destruction Technique to the entry level and had fully mastered the eighth form of the Tiangang Battle Technique.

As for the Void Diagram, he had not yet begun to comprehend it.

He needed to enhance his strength now, not comprehend the Void Diagram. When he reached a bottleneck in his strength, he would then take the time to understand the Void Diagram.

One day.

Ye Tian emerged from his seclusion.

“The Profound Void Technique is too difficult to cultivate, still no breakthrough.”

The Chaos Divine Realm had many good things, but they had not ventured out for a long time. There were not many resources left, and truly beneficial items for Divine Generals were scarce. Otherwise, the Ox Race wouldn't have had only three-star Divine Generals at their peak!

Ye Tian thought to himself, “The second layer of the Profound Void Technique is perfected, the eighth form of the Tiangang Battle Technique is mastered, the Great Destruction Technique is at the entry level, the Great Immortality Technique is at the entry level, and the Eternal Light Divine Ability is at the peak entry level...”

“As for my current combat power — late-stage one-star Divine General, just one step away from the peak. It's time to leave the Chaos Divine Realm. The two universes are likely close to fully merging, and powerful beings from the other universe are about to arrive. The Human Race needs me!”

Ye Tian took a step out of the chaotic sea.

Niu Long sensed Ye Tian's emergence and hurried over.

Seeing Ye Tian's newly enhanced aura, which he hadn't fully concealed yet, Niu Long was utterly shocked.

“About to step into the peak of a one-star Divine General? How is this possible?”

Niu Long found it inconceivable.

After reaching the rank of a one-star Divine General, every advancement typically took millions of years. Heavenly Monarch Yun Tan had taken at least ten million years to progress from the early to the peak stage of a one-star Divine General, yet Ye Tian had cultivated for such a short time.

“This is too heaven-defying! I'm no longer his match. In just a few tens of thousands of years, this kid, who could barely avoid my strikes, has surpassed me!”

Niu Long was deeply affected.

“Niu Long, I’m leaving,” Ye Tian said calmly.

“Be careful, Your Highness. The outside world is about to become turbulent. We cannot leave, so if you encounter danger, try to hide. When the Misty Region opens, you can return to the Chaos Divine Realm,” Niu Long reminded him.

“Thanks for the reminder,” Ye Tian replied.

However, he wouldn’t truly do that. If that day came, it would mean the Human Race was on the brink of extinction.

With a swoosh, Ye Tian used his Eternal Light Divine Ability and instantly left the Chaos Divine Realm.

It was the time when the Misty Region was open, allowing him to leave easily. Otherwise, he wouldn’t have chosen this moment to depart.

Moments later.

The Supreme of Ten Thousand Laws returned, bringing great joy to the Human Race!

Chapter 808: Information on Special Creatures

The first thing Ye Tian did upon returning was to bestow some spiritual medicines. First, he gave some to the members of the Tian Pavilion, ensuring everyone received a portion. Then, the other Human Supremes obtained some top-grade spiritual medicines from Ye Tian at a minimal cost.

This act undoubtedly showed Ye Tian’s care for the Human Supremes. Otherwise, these Human Supremes wouldn’t have been able to obtain these spiritual medicines, nor could they afford them.

Ye Tian's generosity wasn't intentional. It was just that his current strength rendered those spiritual medicines unnecessary for him. As the Human Race was his foundation, he naturally needed to enhance their strength to prepare for the coming Dual Universe Era.

At the Tian Pavilion, Ye Tian took out a set of records given to him by Shang. This information pertained to special creatures possessing Super God-level earth attributes and Super God-level physical body attributes.

"Deep Dimensions!" Ye Tian frowned.

The universe was divided into multiple dimensions, with the main space being the most crucial dimension where countless races and beings existed. This dimension had a complete Universal Dao, while the other dimensions were more specialized, each possessing singular Dao rules that restricted other beings from entering.

Even the Origin Realm, though powerful and unique, had very singular Dao rules that greatly restricted other beings. Moreover, only the universe's main space allowed for transcendence; other dimensional worlds couldn't transcend, and some dimensions even lacked any beings at all.

However, some dimensional worlds birthed powerful creatures, including those with Super God-level earth attributes and Super God-level physical body attributes. Such creatures were extremely rare and seldom left their dimensional worlds. It was incredibly challenging to traverse dimensional worlds to find them. If trapped in a particular dimension, one might not be able to escape, which was a common risk.

For instance, if a Supreme entered the Origin Realm and the node of the Origin Realm shifted, finding a new node to exit would be impossible.

Thus, even the Supremes didn't dare to traverse dimensional worlds casually. Upon discovering valuable dimensions, they would only send weaker individuals to explore while refraining from entering themselves.

The records provided by Shang contained information about special creatures from deep dimensions, detailing their appearances and abilities. These creatures could exist in most universes.

For example, one documented creature was called the Indolent Beast. It had an enormous body comparable to a galaxy but was extremely lazy, often remaining motionless and sleeping for billions of years.

This creature possessed a Super God-level earth attribute talent. Its attack power was low, but its defense was formidable. Even a one-star Divine General couldn't harm an Indolent Beast, making it one of the universe's strongest defensive creatures, though exceedingly rare.

Throughout the universe's existence, few might ever encounter an Indolent Beast. Even if it awoke, it would likely just open its eyes before continuing its slumber, staying in one place until the universe's end.

Another creature was the Desolate Dragon, also of immense size, with a Super God-level physical body talent and strong combat abilities. However, it was even rarer than the Indolent Beast. Some universes didn't have any Desolate Dragons at all. These dragons didn't exist in the main space and wouldn't enter due to cosmic restrictions. If they did, given their combative nature, the main space would face disaster.

Ye Tian sighed. "Although the records detail dozens of special creatures, it's uncertain how many exist in our universe. Finding them is almost impossible and relies on luck. This is a critical period, and I don't have time to search for these special creatures. I must temporarily give up cultivating the Ancient Origin Defense Divine Ability."

After all, without cultivating the Ancient Origin Defense Divine Ability, his current three Great Divine Abilities were enough to dominate the universe.

"Other enhancements are difficult. Next, I'll use the Nine Treasures Fiend Pearl to temper my will and mind. This is one of the rewards from that great existence's assessment."

Ye Tian excitedly took out this treasure and immersed his mind into it.

Boom!!!! Countless special fiendish energies surged, seemingly intent on destroying Ye Tian's consciousness.

In an instant, Ye Tian's consciousness shattered.

But immediately afterward, Ye Tian found his consciousness reformed, only to shatter again. This process was excruciating, yet he grew increasingly excited.

He realized his willpower was improving, becoming more concentrated, and the negative factors in his mind were being eradicated by the endless fiendish energy.

All beings had negative factors that affected their mindset. Even though Ye Tian had reached the seventh level of mental state, close to the eighth, he still couldn't completely ignore these negative influences.

However, there was no way in the universe to completely eliminate negative factors. The most powerful methods for calming the mind could only suppress them, not obliterate them entirely. Yet, the fiendish energy of the Nine Treasures Fiend Pearl could destroy these negative factors.

With the dispersal of these negative influences, it became much easier to elevate his mental state.

“Indeed, this is a supreme treasure. If I continuously use the Nine Treasures Fiend Pearl to temper my will and mind, my willpower will reach new heights, and my mental state might even step into the eighth level.”

In the universe, the seventh level of mental state was the limit. If he could step into the eighth level, his mental state would completely surpass that of other Supremes!

Ye Tian thought excitedly.

From then on, he used the Nine Treasures Fiend Pearl day and night to temper his will and mind, seemingly abandoning other directions of cultivation.

One day, one year, ten years, one hundred years, one thousand years, ten thousand years... Before he knew it, twenty thousand years had passed!

On this day, the universe roared, the Dao manifested, and the rules of the entire universe began to undergo a different transformation.

All the Supremes looked into the void; some were joyful, some frowned, and others remained indifferent.

At this moment, Ye Tian also ended his seclusion, focusing his attention on the Dao rules in the void.

“The rules of the universe have changed, adding some other rules, unfamiliar ones. Could they be the rules of another universe?” Ye Tian pondered.

The addition of other rules indicated that the rules of the Dual Universes were merging, starting the true fusion process. During this process, more and more alien universe rules would appear in the universe, and the fusion of the Dual Universes would accelerate until complete integration.

Whether they would ultimately merge successfully was another matter entirely.

“Could the black hole passage at the collision point of the universes be accessible now?” Ye Tian wondered.

He didn’t go himself but sent his third incarnation instead.

The strength of his true form couldn’t be exposed, or he would be put at a disadvantage.

Although the power of his third incarnation wasn’t strong, it possessed the top-tier combat power of a third-tier Supreme. Among the Supremes in the universe, it wasn’t considered weak. Checking the situation wouldn’t be an issue.

As long as his true identity remained hidden, there was nothing to worry about.

Swish, swish, swish!!! All over the universe, one Supreme after another traversed the void, heading towards the collision points of the Dual Universes.

Before long, Ye Tian’s third incarnation arrived!

Chapter 809: Initial Communication Between Two Universes

Many hidden Supremes existed in the universe, so the arrival of Ye Tian’s third clone didn’t attract much attention from the other Supremes, merely piquing their curiosity.

Soon, a large number of Supremes gathered, including those from the Twelve Cosmic Eras. Supreme beings such as the Master of the Primordial Era, Golden Light Supreme, and Stone

Dragon Supreme arrived. They all fixed their gaze on the black hole passageway, where strands of laws from the other universe extended and merged with this universe.

“Who is willing to go in?” the Master of the Primordial Era asked.

The Supremes looked around, hesitant to step forward. None of them knew what awaited on the other side, and it was possible that the powerful beings from the other universe were also watching.

“Let’s use clones. With the two universes now colliding and some laws already merging, our clones won’t collapse immediately. They are suitable for exploration,” one Supreme suggested.

Thus, each Supreme condensed a powerful clone and entered the black hole passageway, including the Master of the Primordial Era and the others. Ye Tian, curious about the universe on the other side, also condensed a clone and ventured in.

On the pitch-black ground, the clones of several Supremes descended, each looking around in confusion.

“Is this the other universe?” many Supremes wondered aloud.

At that moment, figures appeared in the void ahead—some humanoid, some beast-like, and others in various monstrous forms. These were also Supreme-level clones.

“They are Supreme clones from the other universe!” The Master of the Primordial Era and his companions’ expressions changed slightly.

In truth, the stronger Supremes like the Master of the Primordial Era realized upon entering that this was not the other universe but a space formed from the collision and fusion of the two universes. This space belonged to both universes. For some reason, this space was incredibly stable and contained the laws of both universes, with even stronger laws gradually being born.

This was a treasure trove! Cultivating here could potentially allow them to reach higher levels. Unfortunately, this space had just formed, lacked sufficient yuan qi, and was unsuitable for those with lower cultivation levels. Additionally, it wasn’t large enough to accommodate many strong beings.

“Are you Supremes from the other universe?” the Master of the Primordial Era asked as a representative.

A Supreme stepped forward from the opposite side. Despite being just a clone, his aura was immensely powerful, comparable to an Ordinary Heavenly Venerable. He said solemnly, “Supreme—do you use this term to refer to Earthly Venerables in your universe? Our universe uses classifications from the chaos. We are Earthly Venerable powerhouses from the Cangyu Universe.”

“Cangyu Universe! Earthly Venerable!” The Master of the Primordial Era’s expression changed slightly.

He had never heard of the Cangyu Universe before, but the fact that their universe had a name and used classifications from the chaos indicated that this Cangyu Universe was highly knowledgeable about chaos and possibly very powerful. Otherwise, why would they adopt such a name and be universally accepted? In contrast, their own universe had limited chaos inheritance, and their understanding of Earthly Venerable cultivation was minimal. Changing their classification to Earthly Venerable would be challenging and would face much resistance.

“The Cangyu Universe is not simple!” the Master of the Primordial Era realized.

“What is your attitude towards us?” the Master of the Primordial Era asked.

“Naturally, it’s for friendly exchange!” The Supreme from the Cangyu Universe smiled and said, “We are all Earthly Venerable powerhouses, close to transcendence. Our goal is to communicate, combine the laws of both universes, break through the shackles, and transcend.”

“Of course!” The Master of the Primordial Era smiled as well.

After chatting for a while, the Supreme clones from both universes could no longer be sustained and each left.

Upon their return, the expressions of the Master of the Primordial Era and his companions were grim. From their brief exchange, it became evident that the opposing universe was likely stronger than theirs, which was not a favorable situation.

“Master of the Primordial Era, do you think the Cangyu Universe has Divine General-level powerhouses?” Golden Light Supreme asked with a frown.

“I don’t know,” the Master of the Primordial Era sighed. “They were very cautious and didn’t reveal much, but it’s highly likely they possess Divine General-level powerhouses. If that’s true and they launch a large-scale invasion, we might not be able to withstand it.”

“For now, there shouldn’t be any issues,” Golden Light Supreme said. “The laws of the two universes have only just begun to merge. If they enter our universe, they won’t be able to exert their full power. So, in the short term, they won’t dare to enter our universe, at most sending weaker beings.”

“What should we do then? Should we also send people over?” Stone Dragon Supreme asked.

“Yes, we should!” the Master of the Primordial Era declared. “If they send people over, we must send people too. Otherwise, we won’t be able to understand their situation. If they dare to kill our people, we will kill theirs. We must gather intelligence; otherwise, we will be in a very dangerous position. Besides, at this stage, the Cangyu Universe won’t be united. Even we aren’t entirely united, are we?”

Golden Light Supreme’s mouth twitched but he did not refute. They were originally just a temporary alliance from twelve different cosmic eras, with no real ties or camaraderie. With the era of dual universes upon them, the great entity they once relied on might no longer contact them.

In essence, they were now disbanded and only observing the other universe’s powerhouses. If the other side was overwhelmingly powerful, many Supremes might defect. Whether the other universe would accept them was another matter.

“The Cangyu Universe likely has Divine General-level powerhouses!” Ye Tian speculated.

He had discussed this with Niu Long, gaining some understanding of the universes within chaos. Universes like theirs were considered quite ordinary. Some powerful ordinary universes not only had Divine General-level powerhouses but also had several three or four-star Divine Generals.

For instance, Niu Long knew of a normal universe with several three-star Divine Generals who were also Heaven-defying cultivators. It was much easier for Heaven-defiers to transcend than non-Heaven-defiers. However, without being Heaven-defying, it was extremely difficult to advance to even a one-star Divine General. Heavenly Monarch Yun Tan was an exception, having inherited not only the legacy of the great entity in the Chaos Divine Realm but also several other lesser legacies.

After nearly a universe era's time, he finally reached the level of a three-star Divine General and transcended using the Space-Time Heart Seal.

Most Divine General-level powerhouses were Heaven-defiers, taking the Heaven-defying path. Three-star Divine General-level Heaven-defiers had a high chance of transcending, even if they were ordinary transcendents. Once they entered the universe, their potential was enormous, and they could become formidable powerhouses in the future.

However, the powerhouses of that universe chose not to transcend and instead continued to enhance their strength and accumulate their foundation. There were many such universes.

Chaos was vast, and while small individuals might think transcendents were rare, the great entity of the Chaos Divine Realm knew otherwise. Transcendents were not scarce.

For example, a universe might produce one transcendent every few eras. Given the vast number of universes within chaos, the organization of hidden transcendents might be unknown, but Niu Long's insights were substantial, knowing that there were many, many universes in chaos.

The Cangyu Universe clearly adopted some cultivation systems from chaos, making their cultivation system stronger than theirs. It was likely that they had teachings from chaos powerhouses, so having Divine General-level powerhouses was not surprising.

"The next phase will be initial probing between the two universes. This period is not dangerous. We can send some Galaxy-level members from the Tian Pavilion and some geniuses from the human race into that universe. They might gain some opportunities. Once the probing phase ends, the real battle will begin!" Ye Tian sighed.

Time slowly passed, and both universes' powerhouses were preparing.

Ten years later, some Galaxy-level and Universe God-level cultivators from the Cangyu Universe crossed over for study and exchange.

Thus, the initial communication between the two universes began.

Chapter 810: Cooperating with the Master of the Primordial Era Again

The ruins of the Angel Race's former site.

A group of cultivators from the Cangyu Universe arrived there. At this moment, they were all very tense, with none acting arrogantly. After all, this was a different universe, and no one knew the situation. They were even worried that the Supremes of this universe might take action against them.

If a Supreme did strike, no matter how many trump cards they had, it would be of no use.

“Go!”

One by one, the cultivators tore through the void and left. Some even used spatial treasures to escape from the area.

In the shadows, some Supremes hesitated but ultimately did not take action.

“Forget it, let's send people over too,” said the Master of the Primordial Era and others.

Following this, various forces dispatched numerous Universal Gods and Galaxy-level beings to the Cangyu Universe.

A group of Galaxy-level beings and Universal Gods from the Tian Pavilion also entered. Although many would die, if they obtained some opportunities, they might even reach the Supreme realm.

In reality, it was impossible for all Supremes to leave the cultivators from the Cangyu Universe alone. Some weaker cultivators with insufficient destiny naturally became targets for certain Supremes. For instance, Ye Tian captured a Galaxy-level cultivator from the Cangyu Universe.

As long as it was done quickly and without exposure, it would be fine. If it became known to everyone, it would be troublesome.

In a certain starry sky, Ye Tian hypnotized the captured Galaxy-level cultivator from the Cangyu Universe and began to inquire about the situation in the Cangyu Universe. The Earthly Venerables of the Cangyu Universe knew it was impossible to hide their universe's situation, so they hadn't tampered with this cultivator's soul. After some questioning, Ye Tian quickly understood the Cangyu Universe's circumstances.

After roughly understanding the situation, Ye Tian killed the cultivator.

Based on what Ye Tian learned, the Cangyu Universe was also in the thirteenth era. It had Supremes from the previous twelve cosmic eras who controlled many forces.

As for the strength of these Supremes, the small Galaxy-level cultivator knew little, mostly rumors.

However, the Cangyu Universe did not divide its forces by race but by sects, similar to the twelve cosmic eras of this universe.

In the Cangyu Universe, forces with Earthly Venerable strength were called top-tier sects, and those with ten-star Earthly Venerables were called super sects.

The most powerful force in the Cangyu Universe was not a super sect but a holy land.

Previously, the Cangyu Universe had only one holy land. But with the arrival of the Supremes from the twelve cosmic eras, it now had eighteen holy lands.

Each holy land had numerous Earthly Venerables. As for how many Supremes there were, this person did not know.

“Holy lands must have Divine Generals; otherwise, they wouldn’t qualify to surpass super sects.

Eighteen holy lands, which means the Cangyu Universe has at least eighteen Divine Generals, but in reality, it must have more than eighteen Divine Generals! To think that the Cangyu Universe, another ordinary universe, is this powerful!” Ye Tian frowned.

If eighteen Divine Generals united, even if they were all lowest-level initial one-star Divine Generals, he would not be their match. And how could all eighteen Divine Generals be at the lowest level?

“There might even be two-star Divine Generals!” Ye Tian thought.

As for three-star Divine Generals, he didn’t believe the Cangyu Universe had any.

Three-star Divine Generals were usually world-defying beings capable of transcending. If not transcended, they must possess inheritances comparable to that of a great being, also enabling them to leave.

So, the possibility of the Cangyu Universe having three-star Divine Generals was very low.

But Ye Tian couldn't even contend with a two-star Divine General now, so he had to be more low-key.

"It seems I must consult with the Master of the Primordial Era and others. Those old fellows have experienced a cosmic era and know many secrets, even some chaotic inheritances. Currently, my strength is that of a late one-star Divine General, far surpassing the Master of the Primordial Era."

If the Master of the Primordial Era informed him of those inheritance sites, Ye Tian could obtain more benefits. By sharing some of these benefits with the Master of the Primordial Era and others, perhaps they could break through their shackles and advance to the level of a one-star Divine General.

Ye Tian thought this method was excellent. Once the Master of the Primordial Era and others advanced to one-star Divine Generals, his pressure would significantly reduce, and he could even have them take the lead.

"Let's go find the Master of the Primordial Era," Ye Tian murmured.

In the Primordial Hall, the Master of the Primordial Era sat on the throne, pondering his next steps.

Suddenly, a terrifying aura approached, causing him to tremble all over.

"Who is it? Could it be a Supreme from the Cangyu Universe breaking in?" the Master of the Primordial Era instinctively guessed.

However, he quickly realized something was off. In such a short time, even if a one-star Divine General from the Cangyu Universe had arrived, they could at most exhibit the power of a first-tier Supreme. Were they not afraid of being besieged by a group of weaker beings?

“Master of the Primordial Era, let’s meet!” Ye Tian’s voice resonated.

Boom!!!

In the void outside the Primordial Hall, Ye Tian and the Master of the Primordial Era met face to face.

Both were present

in their true forms. The Master of the Primordial Era knew that if Ye Tian intended harm, hiding in the Primordial Hall would be of no use.

“It’s you, Supreme of Ten Thousand Laws!” The Master of the Primordial Era was astonished.

“Yes, it’s me,” Ye Tian replied with a smile.

“You’ve become a one-star Divine General?” The Master of the Primordial Era was extremely surprised, finding it hard to believe. How could Ye Tian have surpassed him in strength in such a short time?

“Indeed,” Ye Tian admitted openly. “I’ve become a one-star Divine General, but so what? The Cangyu Universe has more than one Divine General. You must know that too, right?”

“Yes, I just learned about it, which is why I’m troubled,” the Master of the Primordial Era nodded.

“Let’s cooperate,” Ye Tian proposed.

“Cooperate?” The Master of the Primordial Era smiled bitterly. “I’m only a first-tier Supreme, and you, Supreme of Ten Thousand Laws, want to cooperate with me?”

Ye Tian continued, “Master of the Primordial Era, your current strength may indeed be insufficient... but that doesn’t mean you can’t advance to a one-star Divine General. If you can’t even cross that threshold, then you’re not qualified to transcend.

You've lived through a cosmic era, and the first cosmic era is the most special one. With the birth of a new universe, chaos follows. During that time, many powerful beings must have left numerous inheritances.

I can't find these inheritance sites, but you, Master of the Primordial Era, might know some."

The Master of the Primordial Era immediately understood Ye Tian's intentions and responded coldly, "Supreme of Ten Thousand Laws, you want to seize those inheritances. Why should I tell you? Are you planning to threaten me with your strength?"

"No," Ye Tian shook his head. "I'm a late one-star Divine General, far stronger than you. If I enter those inheritances, I'll surely gain a lot. If I casually give you some of those benefits, you might be able to break through your shackles.

Besides, there are many Supremes from the twelve universes. You're not the only one I can cooperate with. If you disagree, I'll find another Supreme."

After Ye Tian finished speaking, he waited for the Master of the Primordial Era's response.

He believed the Master of the Primordial Era would give him a satisfactory answer!
