

## Talent 811

### Chapter 811: Qilin Hall, Entering

“Alright, I agree to the cooperation!”

The Master of the Primordial Era nodded in agreement.

He indeed knew of some places with inheritances, but his strength had already plateaued, making it impossible for him to gain anything from them. Thus, those places were essentially useless to him.

However, it was different for Ye Tian. With the strength of a one-star Divine General, he could obtain better inheritances and treasures. Even if he gave a small portion of the treasures to the Master of the Primordial Era, it would significantly enhance his strength.

Therefore, cooperation benefited him.

“Supreme of Ten Thousand Laws, I wish to understand the strength of a one-star Divine General. May I ask for a demonstration?” The Master of the Primordial Era asked expectantly.

“Of course!” Ye Tian nodded.

“Please!”

The Master of the Primordial Era took the initiative. He knew he wasn’t a match for Ye Tian. If he allowed Ye Tian to strike first, he might not even have the chance to make a move.

“Heavenly Origin Divine Palm!”

The Master of the Primordial Era unleashed a palm strike. This palm strike was his most powerful move, created over countless years, nearly reaching the peak attack power of a first-tier Supreme.

At this moment, Ye Tian also made his move.

With just a single saber qi, he instantly shattered the Heavenly Origin Divine Palm of the Master of the Primordial Era. The saber qi continued towards the Master of the Primordial Era without dissipating.

Puff! The Master of the Primordial Era was sent flying, spitting blood.

“The gap is enormous!”

The Master of the Primordial Era was shocked.

He was certain this wasn’t Ye Tian’s most powerful move. If Ye Tian had attacked with full strength, he would have been killed in an instant.

“So this is the strength of a one-star Divine General.”

The Master of the Primordial Era was both shocked and filled with anticipation.

Ye Tian said, “Master of the Primordial Era, my strength is infinitely close to the peak of a one-star Divine General, far surpassing that of someone who has just entered this level.”

Ye Tian said this to avoid discouraging the Master of the Primordial Era.

“No need to console me, Supreme of Ten Thousand Laws. I can accept the truth!” The Master of the Primordial Era smiled.

“That’s good!” Ye Tian smiled.

“Supreme of Ten Thousand Laws, let’s discuss the cooperation details first. I have obtained many inheritances, but some of them don’t bestow treasures, only inheritance knowledge. No matter how many inheritances I get, they can’t enhance my strength. Only a few inheritances are truly valuable.

In my opinion, the places where one can obtain numerous treasures are the Desolate Pill Tower Inheritance, the Qilin Hall Inheritance, and the Origin Land Inheritance. The Desolate Pill Tower

Inheritance is not suitable for the Supreme of Ten Thousand Laws as it tests alchemy skills and has nothing to do with strength.

The Qilin Hall Inheritance and the Origin Land Inheritance are the true places of great opportunities, emphasizing strength. With the strength of the Supreme of Ten Thousand Laws, you should be able to gain significant rewards.” The Master of the Primordial Era said.

He then explained the Qilin Hall and Origin Land inheritances in detail to Ye Tian.

The Qilin Hall Inheritance was a place that tested combat strength. It consisted of multiple levels, each a world in itself. Entering each world meant facing many fierce beasts with Qilin bloodlines. These beasts were cultivated by the Qilin Hall and had immense combat strength. The weakest were only at the Dominator level, but the strongest were comparable to first-tier Supremes. The Master of the Primordial Era had only passed the third world and failed at the fourth, where there were multiple beasts with first-tier Supreme combat strength.

Furthermore, the fourth world was not the final one. Going further up might mean facing beasts with the strength of a Divine General.

Each world contained numerous resources that the Qilin Hall had placed there. If one managed to reach the fifth world, the resources obtained would be abundant. Furthermore, upon completing the trials, one would receive a batch of treasures and inheritances.

Thus, the Qilin Hall inheritance was definitely a valuable place.

The Origin Land was even more extraordinary. It was a special realm, similar to a small world, where one could only enter with their consciousness, not their physical body.

What’s more peculiar was that the Origin Land completely shielded the universe’s rules, creating its own unique rules. Upon entering the Origin Land, any talent, divine ability, or ultimate technique would become unusable. One could only learn the rules of the Origin Land and martial techniques that adapted to those rules.

In the Origin Land, beings known as “source beings” would appear. Defeating these beings and learning their martial techniques would gradually enhance one’s strength. The more source beings defeated, the greater the eventual benefits.

“Let’s head to the Qilin Hall first,” Ye Tian decided.

Afterward, Ye Tian and the Master of the Primordial Era signed a contract, and the Master of the Primordial Era led Ye Tian to the Qilin Hall inheritance.

“Supreme of Ten Thousand Laws, the master of the Qilin Hall is the Qilin True Lord. His exact realm is unknown, but the spirit of the Qilin Hall mentioned that anyone who passes the fifth level can become a nominal disciple of the Qilin True Lord. Passing the sixth level would make one an official disciple, and passing the seventh level would make one a personal disciple.

Unfortunately, I couldn’t pass the fifth level. If I had the Qilin True Lord’s help, perhaps I could hope for transcendence!” The Master of the Primordial Era lamented.

“Accepting disciples solely based on strength?” Ye Tian mused.

Clearly, the so-called Qilin True Lord wasn’t very powerful within the chaos. Otherwise, he wouldn’t rely solely on strength for accepting disciples. Perhaps he just wanted a disciple capable of transcendence.

Those who could pass beyond the fifth level would have the strength to transcend, indicating significant potential. The Qilin True Lord probably didn’t care about the exact potential as long as it was high enough.

On the other hand, the great being of the Chaos Divine Realm valued potential more. Without sufficient potential, even those with Four or five-star Divine General combat strength couldn’t become official disciples.

Before long, Ye Tian and the Master of the Primordial Era arrived in a void. There was nothing here, but it was their destination.

“This is the place!” The Master of the Primordial Era said. “The inheritance site is here. I passed it once before. If I enter again, I will directly enter the fourth world. My strength is insufficient. I won’t go in!”

“Please, Master of the Primordial Era, tear open the space and pinpoint the location. Otherwise, I won’t be able to find the inheritance site!” Ye Tian requested.

“Alright!” The Master of the Primordial Era nodded.

Without his guidance, Ye Tian indeed wouldn’t be able to find it.

In truth, this inheritance site only appeared once in a very long time, and the entry requirements were high—only powerful Supremes could enter.

Without a guide, one would have to wait for the Qilin Hall inheritance site to appear on its own.

But knowing the location, the Master of the Primordial Era could easily pinpoint it.

“Break!” The Master of the Primordial Era tore open the void, directly reaching a certain spatial dimension.

Boom! A powerful aura spread out, and through the layers of space, Ye Tian saw a magnificent divine hall.

“The Qilin Hall!”

Ye Tian didn’t dare waste any time. He phased into the space and instantly entered the Qilin Hall.

After Ye Tian entered, the Master of the Primordial Era murmured, “I hope the Supreme of Ten Thousand Laws obtains many treasures. Only then do I have the hope of reaching Divine General combat strength. Otherwise, with insufficient strength... Forget about transcendence, even survival would be difficult!”

Chapter 812: The Fourth World

Back then, the Master of the Primordial Era and others agreed to cooperate with that Supreme Lord out of sheer desperation. If they hadn’t agreed, they would have undoubtedly perished in the great cosmic cataclysm.

Agreeing, however, gave them a glimmer of hope for transcendence.

If that Supreme Lord continued to help them, their chances would have increased. But now they realized that the Supreme Lord never genuinely intended to help them transcend. Otherwise, he wouldn't have sent Earthly Venerable level experts from the Hidden God Organization to be reincarnated here.

However, they dared not turn back, as at this point, it was too late to regret.

They could sense that the half piece of the Chaos Supreme Treasure was gradually merging with the other half in the Cangyu Universe. The cosmic origin could no longer break free from the suppression of the Chaos Supreme Treasure.

In other words, they could no longer sabotage the plan.

Not long ago, when they learned of this, they also realized that they had completely lost the qualification to cooperate with that Supreme Lord. Even attempts to contact him yielded no response.

They had been abandoned! "We can only rely on ourselves now!" the Master of the Primordial Era thought to himself.

...

Qilin Hall.

As soon as Ye Tian entered, the spirit of the Qilin Hall appeared.

"Assessor, I am the spirit of the Qilin Hall. The Qilin Hall is a place of inheritance left by a ruler-level expert from the chaos. You need to enter various worlds and slay the fierce beasts within them..."

The spirit said many things, but Ye Tian had already obtained information from the Master of the Primordial Era, and both accounts were similar.

Soon, the spirit finished speaking.

“I want to enter the first world!” Ye Tian said.

“In the first world, you need to slay ten fierce beasts of the Human Venerable realm within one day!” the spirit announced.

Human Venerable was a realm within the chaos, equivalent to the Dominator realm in this universe. The first world wasn’t difficult, and it could even be considered very simple, as some powerful Dominators could complete it.

With a swish, Ye Tian was transported into the first world.

The first world was a mountain range.

Ye Tian appeared here and sensed the situation of this world.

“The chaotic yuan qi is very dense, and the area is vast. The Life Heavenly Eye can almost cover the entire world, which is about the size of a galaxy outside.

There are many fierce beasts, but each one generally occupies its own territory, and there are no beast races!” Ye Tian muttered to himself.

It didn’t take a day to kill ten fierce beasts, but he wanted to collect some resources, and one day wasn’t a long time.

With a swish, Ye Tian used his Eternal Light Divine Ability to fly toward the nearest Human Venerable level fierce beast.

Soon, he reached his destination.

Activating his Copy Talent, the talents of this Human Venerable level fierce beast appeared in his vision.

Fierce Beast: Blood Qilin Wolf

Bloodline Talent: Desolate level

Defense Talent: God level

Speed Talent: God level

Strength Talent: God level

Mystic Blood Explosion Talent: God level

Blood Eye Talent: God level

“Die!”

Ye Tian used spatial power and gently pressed, instantly annihilating the Blood Qilin Wolf, turning it into a cloud of blood mist.

Though this Blood Qilin Wolf fierce beast was weak, it was still a small lord, and there were many spiritual herbs, spiritual roots, and rare mineral resources here.

Thus, Ye Tian spent some time collecting these resources.

Next, Ye Tian continued to collect resources.

Unlike others, he didn’t need to search for fierce beasts, and combined with his speed, he collected resources in the first world at a rate countless times faster than others.

In just one day, even if the Master of the Primordial Era came here, he would find it difficult to locate many treasures. After all, this world suppressed the divine sense of cosmic experts, making it hard to explore too many areas.

This was quite normal because, in the chaos, the divine sense exploration range of Earthly Venerable experts wasn’t large; it couldn’t sweep through an entire star field like in the universe.

Quickly, the day was about to end.

At this time, within Ye Tian's miniature universe, there was a star piled high with spiritual herbs and various rare resources. Though the quality wasn't high, the cumulative value of these resources was enough to make a first-tier Supreme heart move.

"It was a small gain," Ye Tian thought.

Although he had collected many resources, he had not actually killed all ten fierce beasts, only nine. The other fierce beasts had merely been suppressed by him, not slain. This was because once he killed ten fierce beasts, he would be transported to the second world, preventing him from continuing to collect resources.

This was a loophole in the Qilin Hall that anyone could exploit to gather resources, and it was a loophole that the Qilin Hall allowed.

As the day was about to end, Ye Tian killed a Human Venerable fierce beast, completing the first world's assessment.

With a swish, Ye Tian was transported to the second world.

In the second world, he needed to kill ten five-star Earthly Venerable fierce beasts. This challenge wasn't easy for some of the weaker Supremes, as the second world's highest level wasn't just the five-star Earthly Venerable beasts but also six and seven-star Earthly Venerable beasts.

Once his presence was exposed, he might face attacks from other fierce beasts because this world was highly hostile to outsiders. Upon discovery, they would swarm and attack. In the first world, the Human Venerable beasts were too weak and slow, and the territory was too vast for them to easily besiege the assessors.

Of course, the second world wasn't difficult for Ye Tian either.

Following his strategy from the first world, Ye Tian collected a large number of resources.

The only regret was that the time limit was still just one day.

In terms of harvest, the second world far exceeded the first because its resources were more precious, with many able to enhance a Supreme's strength.

Subsequently, Ye Tian arrived in the third world.

In the third world, Ye Tian needed to kill ten eight-star Earthly Venerable fierce beasts, equivalent to slaying ten third-tier Supremes. The third world also contained a few ten-star Earthly Venerable beasts. If he wasn't quick enough, he might be besieged by ten-star Earthly Venerable beasts before finishing off the ten eight-star ones.

Hence, the Master of the Primordial Era had to complete the third world quickly without collecting resources, or else he would surely fail.

But Ye Tian's strength was formidable, so he wasn't afraid of these Earthly Venerable level beasts. He continued to gather resources extensively.

A day passed.

"A total of 30 top-tier spiritual herbs, with 25 capable of enhancing cultivation talent from Desolate level to Mixed level. If used well, they could help humanity produce more Supremes!" Ye Tian said excitedly.

Aside from spiritual herbs, there were also many minerals capable of forging the strongest Supreme Treasures.

The harvest from the third world was equivalent to over a hundred Supreme Treasures.

"Enter the fourth world!" Ye Tian declared.

Boom! As soon as he entered the fourth world, Ye Tian's brows furrowed slightly after surveying it.

"The fourth world requires slaying ten nine-star Earthly Venerable fierce beasts, but most of the beasts here are ten-star Earthly Venerable beasts. There are even two beasts with the strength of one-star Divine Generals. No wonder the Master of the Primordial Era failed!" Ye Tian thought.

The Master of the Primordial Era hadn't said much about the fourth world, only mentioning that it had many beasts with first-tier Supreme strength, i.e., ten-star Earthly Venerable beasts.

But now, Ye Tian understood.

In a world full of ten-star Earthly Venerable beasts, finding a nine-star Earthly Venerable beast was difficult. One would inevitably encounter ten-star Earthly Venerable beasts.

With the Master of the Primordial Era's strength, it would have been impossible to kill a ten-star Earthly Venerable beast in a short time.

Once a battle began, other ten-star Earthly Venerable beasts would rush over, ensuring his failure.

"The fourth world isn't very large, and there aren't many fierce beasts. It seems even the Qilin Hall can't cultivate too many powerful beasts here.

Regardless, the resources in this world must be even more precious. Perhaps I can find some that will enhance my strength!" Ye Tian mused.

He then targeted the first ten-star Earthly Venerable beast.

As for the assessment task, he wasn't in a hurry to complete it!

## Chapter 813: Breaking Through the Fifth World

The ten-star Earthly Venerable Fierce Beast, despite its strength, was far from being a match for Ye Tian.

Ye Tian effortlessly annihilated the first ten-star Earthly Venerable Fierce Beast and then seized the resources it possessed. He continued to hunt down and suppress other ten-star Earthly Venerable Fierce Beasts.

He refrained from killing ten ten-star Earthly Venerable Fierce Beasts because that would complete the mission. He wasn't foolish enough to prematurely fulfill the task by reaching the kill count.

The resources from various territories were plundered by Ye Tian, which enraged many ten-star Earthly Venerable Fierce Beasts. Some even banded together to surround and kill Ye Tian, but he easily evaded them.

It wasn't that he feared these beasts; he simply didn't want to waste time.

As the day neared its end, Ye Tian targeted the two beasts with one-star Divine General strength. These two beasts remained dormant, waking only if provoked or if someone intruded upon their territory. Ye Tian's goal in coming here was singular: to collect resources. He believed that these two one-star Divine General-level beasts must possess many rare resources, which could greatly benefit him.

"Jiao Qilin!"

Upon arriving at the territory of one of the one-star Divine General-level beasts, Ye Tian used his Copy Talent to scan and immediately learned the beast's name and its abilities.

From the name, it seemed that this Jiao Qilin had a significant Qilin bloodline.

The Qilin bloodline here was not the same as that in the universe. The Qilin bloodline in the universe was relatively weak; after all, the Qilin clan in the universe didn't even have strong Supremes, making it a lesser bloodline.

However, the Qilin bloodline in the Qilin Hall World originated from chaos, making it extremely powerful. Otherwise, it wouldn't have given rise to a beast with one-star Divine General strength.

Boom! The Jiao Qilin sensed someone intruding into its territory, woke up, and roared angrily at Ye Tian.

Then, it attacked Ye Tian.

"Great Destruction Technique!"

For the first time, Ye Tian used this top-tier divine ability on another creature.

Crash! The light of destruction pierced through the Jiao Qilin's body, causing it to start disintegrating. But it did not die immediately.

Then, a second beam of destructive light descended.

This time, the Jiao Qilin couldn't withstand it. Its body turned to dust, and even its soul was completely annihilated.

"Dead!"

Ye Tian muttered.

This Jiao Qilin was actually not weak, possessing at least early peak one-star Divine General strength. Unfortunately, it lacked any life-saving treasures, making it difficult to resist the Great Destruction Technique, and was thus killed by two beams of destructive light.

As a one-star Divine General-level beast, the Jiao Qilin had a vast collection of treasures, among which one particularly delighted Ye Tian.

"Supreme Blood Spirit Grass!"

Upon seeing this herb, Ye Tian was genuinely excited.

This was no ordinary herb but a Supreme Blood Spirit Grass, born from being nourished by powerful bloodline forces for over a billion years. It was many times stronger than regular Blood Spirit Grass.

While it couldn't directly enhance one's strength or save lives, it could temporarily boost one's comprehension. For a one-star Divine General-level expert, it could enhance comprehension by a hundredfold for a short period.

This wasn't just a mere hundredfold increase in comprehension speed but a thousandfold, even ten thousandfold improvement! For example, if one was stuck at a bottleneck in their Dao, using the Supreme Blood Spirit Grass could break that barrier.

Thus, the Supreme Blood Spirit Grass was highly prized by Divine General-level experts. A single Supreme Blood Spirit Grass in chaos was worth as much as a hundred ordinary chaotic spiritual treasures and was often priceless.

If a Supreme Blood Spirit Grass appeared in chaos, it would likely incite battles among Three and four-star Divine Generals.

“I’ve hit the jackpot!” Ye Tian felt exhilarated.

If he used this Supreme Blood Spirit Grass wisely, it could greatly enhance his strength. After all, it could sustain his cultivation for a thousand years.

“I’ll save it for later, and use it once I’m out!” Ye Tian thought to himself.

Afterward, he went to hunt another one-star Divine General-level fierce beast. He quickly killed it, but didn’t obtain any particularly precious treasures, showing that acquiring the Supreme Blood Spirit Grass had been a stroke of luck.

## The Fifth World

Ye Tian entered the fifth world.

Upon entry, he found this world to be quite small, with very few fierce beasts, vastly fewer than in the other worlds.

“Examinee, staying in the fifth world for a full day counts as passing the assessment!” the voice of the artifact spirit announced.

“Staying for a full day!” Ye Tian understood what this meant.

The fifth world only had about a hundred fierce beasts, but over eighty of them were ten-star Ultimate Earthly Venerable-level, close to one-star Divine General strength. The remaining beasts were all at one-star Divine General strength, with a few reaching the late stage of this level.

As soon as Ye Tian entered, they noticed him. Originally, they were sealed within individual barriers, but those barriers shattered, and they all charged at Ye Tian.

Under such circumstances, surviving a day would be very difficult.

The key issue was that there were no benefits in this world! It was a desolate land, unlikely to have any resources.

Clearly, the previous worlds were benefit worlds, while the later ones were the true tests of strength without offering any more resources.

“Indeed, according to the world’s tier division, if the later worlds continued to provide resources, they’d have to be even more precious. The Qilin True Lord probably doesn’t want to waste too many resources. Wasting so many resources without gaining a disciple with great potential would be a loss.”

Ye Tian thought this way.

Facing so many fierce beasts, even a peak one-star Divine General-level expert wouldn’t withstand it and would be overwhelmed and killed. But Ye Tian wasn’t afraid at all.

“Just perfect for testing the might of the Great Immortality Technique!” Ye Tian said with a smile.

Boom! Several one-star Divine General-level fierce beasts charged at him. Ye Tian didn’t dodge but activated the Great Immortality Technique to confront these Divine General-level beasts head-on.

Bang! Ye Tian was sent flying, but the Divine General-level fierce beasts weren’t faring well either; they were all injured by Ye Tian’s Great Destruction Technique.

“No problem!” Ye Tian checked his body and found no serious injuries. The Great Immortality Technique had blocked all the attacks.

“Great!” Ye Tian charged at the fierce beasts, using the Great Immortality Technique to engage in a frenzied battle.

At first, Ye Tian was at a disadvantage, but gradually, relying on the Great Destruction Technique, the Heavenly Kill Saber, the Primordial Domain, and other means, he managed to kill one fierce beast after another.

As the day was nearly over, Ye Tian was the only one left in this world. He had killed all the other fierce beasts.

However, Ye Tian had also expended a lot of energy and was injured, though not severely.

“I won. The Great Immortality Technique is terrifying. Combined with the Great Destruction Technique, it allows me to ignore being surrounded!”

Ye Tian sighed in admiration.

After a while, the voice of the artifact spirit came.

“Examinee, congratulations on passing the fifth world. You have earned the qualification to be a nominal disciple of the Qilin True Lord!”

Chapter 814: Personal Disciple

“I want to continue to challenge the sixth world!” Ye Tian declared.

He didn’t care about the title of being a nominal disciple of the True Lord Qilin. He had come here solely to obtain resources.

Of course, he knew the possibility of successfully passing through the sixth world was low at his current level.

According to his estimation, to pass through the sixth world, one needed at least the combat power of a two-star Divine General. To get through the seventh world, it might require the strength of a three-star Divine General.

But no matter what, he had to give it a try.

What if the sixth world also had resources? Even if he couldn't get through, it would still be worth it.

"Alright," the spirit replied and immediately let Ye Tian enter the sixth world.

Ye Tian entered the sixth world but did not see too many fierce beasts. He only saw ten fierce beasts.

Judging by their aura, these ten beasts were all at the peak of one-star Divine General level. Combined, they would be a formidable challenge even for an average two-star Divine General. After all, the combat power difference between each minor level from one-star to three-star Divine Generals wasn't too significant. Only the gap between three-star and four-star Divine Generals was truly immense.

Moreover, these ten fierce beasts had a special talent.

"Qilin Aspect!"

Ye Tian didn't know what this talent was, but he soon found out.

Boom! Boom! Boom! The ten fierce beasts activated the Qilin Aspect simultaneously, causing a massive Qilin phantom to appear in the void. Its overwhelming presence resembled that of a terrifying overlord.

The Qilin Aspects then merged, turning from phantasmal to solid, becoming even more terrifying.

Ye Tian, standing in the distance, still felt the oppressive force.

"This is too difficult!" Ye Tian frowned. Originally, these ten Qilin beasts were already comparable to two-star Divine Generals. Now, after merging their Qilin Aspects, they could likely even contend with late-stage two-star Divine Generals.

Boom! A Qilin foot crushed the void as it stepped towards Ye Tian. He quickly activated the Primordial Domain, Chaos Origin Well, and many defensive techniques, including the Great Destruction Technique and Great Immortality Technique.

But it still wasn't enough! Blood spurted from Ye Tian's mouth as his body cracked, indicating severe injuries.

Had it been another late-stage one-star Divine General, they would have been killed instantly.

The gap between a peak one-star Divine General and an early-stage two-star Divine General wasn't large, but the difference between a late-stage one-star and a late-stage two-star Divine General was vast. Ye Tian's maximum combat strength was at the late-stage one-star level, making it difficult to withstand the ten Qilin beasts.

"Great Immortality Technique!" Ye Tian fully activated this top-tier divine ability to quickly recover his injuries. But the attacks from the ten Qilin beasts were too swift, and Ye Tian couldn't keep up.

Boom! Boom! Boom! After repeated severe injuries, Ye Tian finally couldn't hold on.

"Eternal Light Divine Ability!" Ye Tian's speed soared, allowing him to dodge.

Strictly speaking, these ten beasts were still at the peak one-star Divine General level and weren't fast. Their combined attack couldn't enhance their speed either. Ye Tian, with the Eternal Light Divine Ability, was unmatched in speed at the same level. No one could rival him unless they had also cultivated one of the top-tier speed divine abilities from the three thousand Great Divine Abilities.

"This should be considered cheating!" Ye Tian thought to himself.

The True Lord Qilin hadn't anticipated that anyone in the universe would have mastered the Eternal Light Divine Ability. It was a miracle! Without one of the three thousand great speed divine abilities, one would need at least late-stage two-star Divine General strength to pass the sixth world.

After dodging, Ye Tian took the opportunity to recover. Under the restoration of the Great Immortality Technique, he quickly healed his injuries.

"I'll exhaust you to death!"

Ye Tian planned his strategy.

“Great Destruction Technique!”

“Heavenly Kill Saber!”

“Primeval Slash!”

Under repeated attacks, even these ten Qilin fierce beasts couldn’t withstand it.

After a long half-day of relentless assault, the first Qilin beast fell, followed by the second, the third... and finally, the last Qilin beast.

After these ten Qilin beasts fell, ten clusters of golden blood floated out.

The ten clusters of golden blood then merged into one, transforming into a drop of golden-red true blood, exuding a powerful aura.

“Qilin True Blood,” Ye Tian murmured.

This was undoubtedly the true essence blood of a powerful Qilin, containing terrifying power that could help cultivators refine their bodies and even transform their bloodlines. However, it wasn’t suitable for Ye Tian.

Simply put, he didn’t need it.

“A good item, but useless for me. I can give it to the Master of the Primordial Era. He’ll definitely need it, and I can save other treasures for myself!” Ye Tian said with a smile.

After collecting this drop of Qilin True Blood, Ye Tian requested to enter the seventh world, which was the final world.

Swish! Under the spirit’s control, Ye Tian entered the seventh world.

This world had only one Qilin beast, but its aura far surpassed that of the previous Qilin beasts.

“A peak two-star Divine General-level Qilin beast!” Ye Tian felt an immense pressure.

In the sixth world, he could still use tricks to win, but this was a genuine peak two-star Divine General-level Qilin beast. Its speed was definitely not slow.

Moreover, when the strength gap reached a certain level, speed wouldn't be of much use. The opponent's attacks could affect his speed, causing it to be suppressed, or even freezing time and space, impacting his speed.

As expected, the Qilin beast struck with a claw. Ye Tian couldn't completely dodge, and his body was directly torn apart. After another hit, Ye Tian was blown apart.

But he didn't die; he turned into light particles.

In the next moment, Ye Tian returned to the main hall of the Qilin Palace, where he saw the spirit of the Qilin Palace.

“Examiner, congratulations on passing the sixth world. Do you wish to become the personal disciple of the True Lord Qilin?” the spirit asked excitedly.

“What, personal disciple?” Ye Tian was confused. “Don't you have to pass the seventh world to become a personal disciple?”

The spirit was taken aback, then laughed, “That must be what the previous examiners told you. Indeed, others need to pass the seventh world to become a personal disciple, but you don't! Your performance was exceptional, and you have mastered three top-tier divine abilities, making you a top-tier genius even in chaos! If you choose to become the personal disciple of the True Lord Qilin, you will receive countless resources, and the True Lord Qilin will fully nurture you!”

“Why are you so excited?” Ye Tian asked.

“Because if you become a personal disciple, I can leave this universe!” the spirit replied.

Although it was a spirit, it had wisdom and felt extremely bored staying in the universe without the ability to leave. It couldn't even step out of the Qilin Palace; otherwise, the universe's origin would annihilate it.

## Chapter 815: The Fear of a Grand Dao Expert

“Personal disciple?”

Ye Tian pondered over this.

Originally, he didn't care much about the status of an unofficial disciple or even an official disciple. However, if he became the personal disciple of the Qilin True Lord, he would receive numerous precious inheritances and resources.

The Qilin True Lord could not enter the universe, but just the Qilin Hall alone possessed countless resources. If it fully supported his cultivation, his strength would rapidly increase.

“Perhaps I should first become the personal disciple of the Qilin True Lord,” Ye Tian thought.

He then spoke, “Alright, I agree!”

“Good, I will inform my master, the Qilin True Lord! In the universe, notifying the master in the chaos and having him project his presence here comes at a great cost. But you are worth it for my master to pay this price! When the master's projection descends, you must show respect! The master is a Supreme being at the Grand Dao Realm, a dominant figure in the chaos!” the spirit of the Qilin Hall said.

“Grand Dao Realm!”

Ye Tian felt even more dismissive in his heart.

The master of the Chaos Divine Realm's inheritance was at the Harmony Realm, and even among the Harmony Realm, he was a strong one. A mere Grand Dao Realm expert was nothing but an ant in comparison.

However, at the moment, he did not qualify to be disrespectful to a Grand Dao expert.

“Understood,” Ye Tian nodded slightly in acknowledgment.

The spirit then began to use a treasure to communicate with the Qilin True Lord in the chaos. After about three days, a wisp of a shadow appeared in the void.

At the same time, the entire Qilin Hall trembled.

“Universal Origin!”

Ye Tian sensed the aura of the Universal Origin, which was evidently trying to break into the Qilin Hall. Unfortunately, the current Universal Origin was suppressed, and the limited power it could mobilize couldn’t affect the Qilin Hall, let alone stop the projection of the Qilin True Lord from descending.

“Master!” the spirit respectfully greeted the shadow upon seeing it.

The Qilin True Lord’s shadow ignored the spirit and directed its gaze at Ye Tian.

“You are quite good. You have the qualifications to become my personal disciple!” the Qilin True Lord said in a commanding tone.

The next moment, he took out a jade talisman and said, “This is my jade talisman. Holding it signifies that you are my disciple. In the future, other powerful beings will recognize your status and will not disrespect you! However, if you wish to officially become my disciple, you must first transcend and enter the chaos, then come to my Qilin Palace. Only then will I truly accept you as my disciple!”

Just as the jade talisman was about to touch Ye Tian, a wave of energy spread out.

“No!”

The Qilin True Lord was terrified.

In the next instant, his projection shattered, and the jade talisman disintegrated.

Ye Tian was stunned, and so was the spirit.

Chaos.

In the Qilin Palace, the Qilin True Lord's face was filled with terror. He sensed that his projection had been annihilated. Projections generally held no power, otherwise, they couldn't enter the universe, but his projection wasn't something anyone could destroy. In the universe, no one could annihilate his projection unless it was a transcendent force beyond the universe.

Just now, a supreme rule force had instantly obliterated his projection.

“Harmony Realm expert!!!”

The Qilin True Lord was utterly shocked and terrified.

Although he was a Grand Dao Realm expert, he had only just entered this realm, placing him among the weaker ones even within the Grand Dao Realm. A Harmony Realm expert could obliterate him with just a breath.

A hum resonated as the supreme rule of chaos descended, and a wisp of shadow appeared before him.

“Qilin True Lord, the young man you met in the universe is my prospective official disciple. Are you trying to steal a disciple from me?” The mysterious shadow gazed at him as if looking down on an ant.

“My lord, I dare not!” The Qilin True Lord bowed his head in fear.

“Hmph!”

With a cold snort, the mysterious shadow dissipated.

The Qilin True Lord trembled uncontrollably and collapsed to the ground.

“I actually tried to steal a disciple from that existence. It was too perilous. Fortunately, that existence did not take it seriously, or I would be dead!”

He didn’t even dare to mention that existence’s name, as that entity was a pinnacle existence even within the Harmony Realm!

Back in the Qilin Hall.

Ye Tian, seeing that the Qilin True Lord had not appeared for a long time, knew that becoming his disciple was hopeless.

“Could it be that something happened to the Qilin True Lord in the chaos? Or perhaps...”

Ye Tian had another guess. Just now, he seemed to have sensed a terrifying power.

“Could it be...”

He thought of the great being of the Chaos Divine Realm. Perhaps that entity had known. After all, he had already become the prospective official disciple of that great being. If he became the disciple of another powerful being, it might have enraged that great being.

“If that’s the case, I shouldn’t become anyone else’s disciple in the future. If my guess is correct, I could anger my future master.”

Ye Tian made up his mind. Unless an entity beyond the Harmony Realm wanted to take him as a disciple, he wouldn’t take on any other masters. It was too dangerous otherwise.

The spirit of the Qilin Hall was also waiting for the Qilin True Lord, but he never arrived. It seemed the Qilin True Lord had completely abandoned this hall and couldn’t be contacted at all.

“Ahem, challenger, you have passed the sixth world. Originally, you were supposed to take a master, but now there are issues, so we can only give you some benefits. However, the master had clearly expressed his intention to take you as a disciple. Perhaps something has delayed him on his end. So, I will grant you the highest reward.” The spirit said.

“Thank you, Spirit Lord!” Ye Tian expressed his gratitude.

Clatter! Clatter! A multitude of treasures were taken out by the spirit and presented before Ye Tian.

Numerous top-grade elixirs, a top-grade offensive chaos treasure, a top-grade defensive chaos treasure, and a top-grade speed-type defensive treasure, along with some talismans, an origin artifact, a Great Divine Ability, and three top-grade inheritances.

“All these treasures are yours!” the spirit said.

Ye Tian gladly accepted and stored them away without closely examining them, intending to inspect them after leaving the Qilin Hall.

After receiving the treasures, Ye Tian, with the help of the spirit, left the hall.

After Ye Tian left, the spirit worried, “The master cannot be contacted. Could he be in danger?”

Little did the spirit know, the Qilin True Lord was now incredibly fearful and didn’t dare enter the universe again, fearing he might anger that great being once more. Hence, he completely stopped responding to any transmissions from the Qilin Hall and even voluntarily abandoned it.

Chapter 816: Great Harvest and Distribution

Outside the Qilin Hall’s inheritance site.

The Master of the Primordial Era was anxiously waiting. Although Ye Tian had not been inside for long, it was far longer than he had anticipated.

According to his calculations, Ye Tian should have come out much earlier. Why hadn’t he emerged yet? Suddenly, the void rippled, and a figure appeared—it was Ye Tian.

“Supreme of Ten Thousand Laws, you finally came out!” The Master of the Primordial Era sighed in relief.

Ye Tian said, “I gained quite a lot this time. I need to sort through my gains first, then distribute them.”

“Alright!” The Master of the Primordial Era responded excitedly.

The more Ye Tian harvested, the more he would receive. However, the distribution method he had agreed upon with Ye Tian was quite complex. Simply put, if the gains were not substantial, they would split them evenly. If the harvest was significant, he would only be allocated enough resources to break through to the Divine General level.

The Master of the Primordial Era waited eagerly as Ye Tian sorted through his harvest.

Top-grade spiritual herbs, chaotic spiritual treasures, talismans, and other treasures—Ye Tian could estimate their value with just a glance.

“Great Divine Ability—Qilin’s Fury!”

“Origin Object—Qilin Flame!”

These two treasures were also extremely precious, but after understanding them, Ye Tian dismissed them. Although Qilin’s Fury was more powerful than many Great Divine Abilities in the universe, it did not qualify as one of the three thousand Great Divine Abilities of chaos.

“Trash divine ability!”

Ye Tian scorned. He had expected much better from the Qilin True Lord. Even the small Hidden God Organization had produced a Great Divine Ability like Eternal Light Divine Ability, yet the Qilin True Lord had failed to provide something on par.

However, Ye Tian roughly guessed the reason.

Top-tier divine abilities of the True Lords were incredibly difficult to cultivate. To be among the three thousand Great Divine Abilities, the required conditions were extremely stringent, and the matching origin objects were exceedingly rare.

The Qilin True Lord must have spread out Qilin Halls across various chaotic regions. If every Qilin Hall contained valuable origin objects, the cost would be too high, and he wouldn't be able to gather so many precious origin objects.

The Qilin Flame, based on its name, was likely related to the Qilin True Lord and could even be cultivated. Hence, the Qilin True Lord could deploy a large amount of Qilin Flame.

Therefore, providing Qilin's Fury as a Great Divine Ability was already decent.

Moreover, the Qilin Hall was merely a channel for the Qilin True Lord to recruit disciples. If he found a promising talent, he would naturally take them back for thorough training. In that case, the resources given would be different, and even a top hundred-ranked Great Divine Ability and its corresponding origin object could be provided.

In contrast, the Hidden God Organization only offered the Eternal Light Divine Ability inheritance, which could be endlessly replicated at minimal cost, so they didn't mind sharing it.

"This Great Divine Ability was probably created by the Qilin, so there might be some catch. I'll give it to the Master of the Primordial Era!" Ye Tian decided.

The Qilin Hall also offered three other inheritances: one was a chaotic body refining technique for tempering the flesh—Qilin True Body; another was a secret technique for altering bloodlines—Qilin Blood Technique; and the last was a method for enhancing strength—Ninefold Overlapping Palace.

"The Qilin True Body and Qilin Blood Technique are useless to me. I already possess techniques far superior to the Qilin True Body, and I have no intention of altering my bloodline with the Qilin Blood Technique.

As for the Ninefold Overlapping Palace, this inheritance is quite useful. I need a technique to compress my divine force." Ye Tian thought to himself.

After spending considerable time, Ye Tian finally finished sorting his harvest.

"Master of the Primordial Era, the gains this time are plentiful, more than enough for you to reach Divine General level combat strength.

Additionally, I obtained three top-tier inheritances and one Great Divine Ability along with its corresponding origin object.

I offer you two distribution options: one, I give you two top-tier inheritances and the Great Divine Ability along with the origin object, but you get fewer other resources. If you want more of the other resources, I can only give you one top-tier inheritance, and you won't get the Great Divine Ability or the origin object." “I choose the two top-tier inheritances and the Great Divine Ability. As for other resources, I can take fewer.” The Master of the Primordial Era decided.

“Alright!”

Ye Tian immediately handed over the two top-tier inheritances, the Great Divine Ability Qilin’s Fury, the Qilin Flame, and the Qilin True Blood to the Master of the Primordial Era. He also gave him a few talismans, a chaotic spiritual treasure, and a small amount of spiritual herbs.

Compared to Ye Tian’s harvest, what the Master of the Primordial Era received was minimal. However, obtaining these inheritances made it worthwhile, especially since he hadn’t had to give up much.

“Thank you, Supreme of Ten Thousand Laws!”

The Master of the Primordial Era expressed his sincere gratitude. After all, he hadn’t contributed anything substantial, just acted as a guide, yet he had gained so much. It was the greatest opportunity of his life.

“Since we are both Supremes of the same universe, your increased strength benefits our universe. Besides, you still need to take me to the Origin Land!” Ye Tian said.

“Alright!” The Master of the Primordial Era agreed.

The Origin Land was another mysterious and powerful inheritance site. Though the quantity of resources was limited, each resource was extremely precious. If Ye Tian visited, he should gain even more and possibly obtain greater treasures.

“Supreme of Ten Thousand Laws, you don’t need to give me anything from the Origin Land. These treasures are sufficient for me to reach the Divine General level. Also, once you enter the Origin Land, it might take a while.” The Master of the Primordial Era reminded him.

“I understand! If I enter the Origin Land, I ask you to look after the human race slightly, to prevent attacks from the powerful beings of the Cangyu Universe.” Ye Tian requested.

“Of course!” The Master of the Primordial Era promised.

## Chapter 817: Talent in the Origin Land

Not long after, the Master of the Primordial Era brought Ye Tian to the Origin Land inheritance.

Ye Tian was somewhat surprised by the location of this inheritance.

“One of the forbidden zones of the universe, the Land of Fallen Gods!”

Ye Tian stared at the area shrouded in blood mist ahead and exclaimed in shock.

He didn’t know much about the Land of Fallen Gods, but he knew a bit of information at least. Initially, this place was a treasure land that astonished the universe.

A long time ago, the Land of Fallen Gods birthed many top-tier spiritual herbs and even chaotic supreme treasures. The Land of Fallen Gods was a world of its own, greatly suppressing cultivators. However, it was indeed extraordinarily peculiar.

During the time when innate deities still ruled the universe, many innate and acquired deities fought here. The prolonged slaughter led to the fall of countless deities whose bodies merged with the Land of Fallen Gods, even altering its rules.

Gradually, the Land of Fallen Gods became more dangerous. Chaotic wills pervaded the entire place. If a supreme being without a strong will and soul entered, they would fall into madness and possibly perish in the Land of Fallen Gods.

Moreover, due to the rule changes, it became difficult for the Land of Fallen Gods to produce top-tier spiritual herbs and the strongest supreme treasures. Thus, it was no longer a treasure land but a forbidden zone.

“Master of the Primordial Era, since the Origin Land is in the Land of Fallen Gods, wouldn’t it have been discovered long ago? Why haven’t I heard of it?” Ye Tian asked curiously.

The Master of the Primordial Era explained, “Supreme of Ten Thousand Laws, the Origin Land is indeed in the Land of Fallen Gods. The formation of the Land of Fallen Gods was probably due to the leakage of power from the Origin Land.

Back in the First Universe Era, a similar treasure land formed. Although the universe went through multiple great destructions, its location didn’t change.

I remembered the cosmic coordinates accurately.

As for why no one discovered it, it’s because they weren’t strong enough...

Without the power of a first-tier Supreme, one wouldn’t attract the attention of the Origin Land.

To enter the Origin Land, it must move you in proactively; otherwise, it’s impossible to find it!”

“What is the origin of the Origin Land?” Ye Tian asked curiously.

“Not clear!” The Master of the Primordial Era shook his head. “I always felt the Origin Land wasn’t truly an inheritance because there’s no inheritance there, only benefits.

I never found any owner of the Origin Land, at least I haven’t seen one.

For instance, the Qilin Hall has the Qilin True Lord, which is known. But the Origin Land is strange, more like a trial ground, a place for cultivation.

In any case, you’ll understand once you enter!”

“Okay!” Ye Tian nodded.

No matter how much the Master of the Primordial Era explained, it couldn’t compare to experiencing it personally.

Boom! Ye Tian stepped into the Land of Fallen Gods. Endless chaotic wills assaulted him, and the blood fiend energy transformed into countless divine weapons attacking him. RANOBES

“Scram!” Ye Tian snorted coldly, his aura scattering the blood fiend energy. The chaotic wills couldn’t affect Ye Tian at all.

Suddenly, an attraction force pulled him in. Ye Tian didn’t resist and was directly sucked into the Origin Land.

Origin Land.

On an ancient and desolate land.

Ye Tian appeared here, ready to use his Life Heavenly Eye to observe the surroundings. But in the next moment, he was dumbfounded.

“Where’s my Life Heavenly Eye?”

Ye Tian found he had lost this ability. He then noticed his soul was weak and his body incredibly frail, far less than usual.

Furthermore, his immense divine force had vanished. His talents couldn’t be utilized, and he couldn’t sense the rules.

At this moment, he felt like an ordinary person, extremely weak!

“Indeed, the Master of the Primordial Era mentioned that upon entering the Origin Land, almost everything would be unusable. All divine abilities, martial arts moves, and various secret techniques are completely useless!” Ye Tian muttered to himself.

Moreover, he discovered that he couldn’t open his Xumi Storage Realm or his small universe.

Without a weapon, Ye Tian quickly chopped down a nearby tree and fashioned a wooden saber.

This wooden saber was quite sturdy and could serve as a weapon.

“The Origin Land has its own rules and martial techniques. I must adapt to these rules; otherwise, I won’t survive.

According to the Master of the Primordial Era, the Origin Land will spawn Origin Men. The more Origin Men I kill, the greater my rewards.

I can also actively seek out and hunt Origin Men.

Hiding is useless, and if I get killed by an Origin Man, it means I fail the trial.

The Master of the Primordial Era failed after just a hundred years in the Origin Land.” Ye Tian thought to himself.

The Origin Men near him at the beginning couldn’t be too strong, or he would surely fail.

“I can’t use my divine sense, soul power, or Life Heavenly Eye to sense the surroundings, but my Copy Talent should still work,” Ye Tian speculated.

Immediately, he tried to activate his Copy Talent.

Buzz! The power of the Copy Talent enveloped the area. Although its range was not large, it still covered dozens of miles.

“The Copy Talent is indeed powerful. Even the Origin Land can’t completely block it!” Ye Tian exclaimed in excitement.

With the probing ability of his Copy Talent, his survival chances greatly increased! Within a range of dozens of miles, Ye Tian found a total of three Origin Men, each located in different directions.

“I’ll try one of the Origin Men first!”

Ye Tian swiftly charged towards one of the Origin Men, quickly arriving in front of it.

Through his Copy Talent, Ye Tian had already seen this Origin Man's talents, but they were peculiar.

It had no cultivation talent, no speed talent, and no defense talent.

The three Origin Men each had one talent, and these three talents were: [Origin Saber Talent: Basic], [Origin Speed Talent: Basic], and [Origin Fire Talent: Basic]. From the names, these talents seemed related to saber, speed, and fire, but they were somewhat different.

"Let's copy them first!"

Ye Tian copied all three talents.

At this moment, the Origin Man he had targeted possessed the Origin Speed Talent.

Ye Tian saw this Origin Man, who looked similar to a human but had white eyes emitting an eerie aura.

The Origin Man held a bronze spear, far superior to Ye Tian's wooden saber.

Whoosh!!

The opponent rushed forward with incredible speed, silently thrusting the spear at Ye Tian. There were no complex moves, just sheer speed! The Origin Man's physical attributes were similar to Ye Tian's current state. Although Ye Tian couldn't use his talents, divine abilities, laws, or ultimate techniques, it didn't mean he had no means at all.

He could still use basic moves; otherwise, he wouldn't even be able to defeat an Origin Man.

If he truly couldn't do anything, the Master of the Primordial Era wouldn't have been able to kill even one Origin Man and would have failed immediately.

Ye Tian reacted quickly, using his wooden saber to deflect the spear and dodging to engage in close combat.

Although the Origin Man was much faster, its combat experience was lacking. Ye Tian easily defeated it.

After all, it was just a weak Origin Man, and Ye Tian was a Divine General-level powerhouse. No matter how weakened he was, he shouldn't struggle against a mere ant.

"The initial Origin Men are probably meant to help testers get accustomed to their body's changes and gradually adjust their combat power. However, for someone like me, this benefit is useless.

I'd better fuse the three talents. Though my original talents are sealed, these talents in the Origin Land can be used directly.

Haha, in that case, the Origin Land poses no real challenge for me!" Ye Tian said excitedly.

Immediately, he began to fuse the three talents.

Chapter 818: Issues with Talent

Two hours later.

Ye Tian not only completely integrated the three talents but also fully recovered.

After merging these three talents, Ye Tian discovered something astonishing.

The Origin Speed Talent was similar to the Speed Talent, the Origin Saber Talent seemed equivalent to the Saber Technique Talent, and the Origin Fire Talent embodied the characteristics of the Fire Talent, containing numerous fire-related attributes.

Logically, these three talents should be similar to the Speed Talent, Saber Technique Talent, and Fire Talent. Why then were they called Origin Speed Talent, Origin Saber Talent, and Origin Fire Talent? The talent replication surely wasn't named arbitrarily; it had to be because these were different talents.

"What exactly is the reason?" Ye Tian murmured.

He repeatedly employed the three talents, trying to discern their uniqueness, but due to his divine sense and soul abilities being suppressed, it was difficult to explore the soul, making it hard to distinguish.

“Forget it, I’ll investigate slowly after I get out. Right now, being suppressed here, it’s hard to understand the reason!” Ye Tian thought.

At that moment, he sensed one of the Origin Men approaching him, obviously coming for him. In the Origin Land, hiding was useless; no matter how well you hid, the nearby Origin Men would find you.

This time, the approaching one was a Origin Man with the Origin Saber Talent.

Soon, the Origin Man with the Origin Saber Talent arrived.

Ye Tian engaged in combat with him and discovered that this Origin Man had traces of saber techniques, but these techniques were peculiar, unlike any series of saber techniques Ye Tian had ever seen.

This was a series of saber techniques that conformed to the rules of the Origin Land.

Ye Tian did not immediately kill this Origin Man but continued to fight, extracting the characteristics of the saber techniques to understand the rules of the Origin Land.

After a long battle, Ye Tian realized he couldn’t learn anything more from this Origin Man and then killed him with a single stroke.

Next, Ye Tian killed the Origin Man with the Origin Fire Talent.

Day by day, Ye Tian initially waited for the Origin Men to come, but later he began to actively seek them out and kill them. He didn’t know how many Origin Men he had slain.

Ten years later.

Ye Tian's combat experience had increased significantly. Although ten years of combat might not seem like much, the combat experience from the outside world was not suitable here. Ye Tian had to develop a new combat experience that suited the Origin Land.

Additionally, Ye Tian's talents had completely transformed. He had integrated many talents and upgraded each one, including the Origin Saber Talent and Origin Speed Talent.

Host: Ye Tian

Origin Strength Talent: Advanced

Origin Speed Talent: Advanced

Origin Body Talent: Advanced

Origin Saber Talent: Advanced

Origin Sword Talent: Advanced

Origin Fire Talent: Advanced

Origin Earth Talent: Advanced

Origin Gold Talent: Advanced

...

Except for the Time and Space Talents, Ye Tian had collected all other attribute talents.

Additionally, he gathered various martial arts from the Origin Men and created several techniques suited to this world.

These included two saber techniques, a body technique, and a Five Elements Secret Technique.

The two saber techniques were Instant Slash and Sky-Splitting Strike. Though not highly advanced, they significantly boosted his power.

The body technique was called Phantom Movement, and the Five Elements Secret Technique was the Five-Star Origin Realm. This secret technique combined the Origin Fire Talent, Origin Earth Talent, Origin Gold Talent, Origin Water Talent, and Origin Wood Talent, making it incredibly powerful.

Moreover, as the levels of these five talents increased, the power of the secret technique would also surge.

One day.

Ye Tian ventured deep into the Origin Land and spotted a Origin Man with an advanced talent—Origin Strength Talent!

“I finally entered the area with Origin Men who possess advanced talents!” Ye Tian murmured.

Previously, he had been wandering in the intermediate talent area, where he elevated his talents to advanced levels using intermediate talents.

Now, he had reached the advanced talent area, where he could naturally elevate all his talents to the top level.

“Searching for and killing Origin Men like this is incredibly fast. The Master of the Primordial Era wouldn’t have dared to do this. I guess he didn’t encounter a single Origin Man with advanced talent even after a hundred years in the Origin Land!” Ye Tian speculated.

If he had encountered one, the Master of the Primordial Era would have been killed long ago. Ye Tian couldn’t afford to hide and wait for the Origin Men to find him—that would be too time-consuming.

His time was limited and couldn’t be wasted. He couldn’t stay in the Origin Land for tens of thousands of years.

In the following years, Ye Tian continuously fought in the advanced area, copying and integrating talents, elevating all his talents to the top level. He also learned various martial arts from the Origin Men, whether saber techniques or other martial arts.

The Origin Land also had many resources and treasures, most of which were resources to enhance comprehension talents. These resources were invaluable in the Origin Land, although they might not be considered much outside. They could significantly shorten his comprehension time.

Thus, ten years passed.

Over a century in the Origin Land, Ye Tian's physical condition remained almost unchanged, as it was nearly fixed. However, his strength increased manifold, as all his talents reached the top level, and he created numerous saber techniques, secret techniques, and even various ultimate moves.

At this moment, Ye Tian gradually understood the martial arts and rules of the Origin Land.

Especially since his talents had reached the top level, the next step would be the Mystic level, where he would begin to grasp the profound rules, giving him a deeper understanding of the Origin Land than the Master of the Primordial Era.

"The Origin Land holds a great secret!" Ye Tian realized.

And it was a true great secret, surpassing all previous ones. He even felt that his previous talents had issues! Indeed, his previous talents had issues!

Chapter 819: Perfect Talent

"The talents within the universe had issues. No, strictly speaking, they were not issues, but rather defects," Ye Tian pondered.

Of course, these defects were insignificant to ordinary people. Even the members of the Hidden God Organization were unaware of these defects. Perhaps the flaws in talents within the chaos were a secret.

However, Ye Tian now vaguely felt that the talents in the Origin Land were more perfect and seemed entirely his own. The talents in the universe, on the other hand, felt like gifts from the Grand Dao.

It was akin to using something given by someone else. No matter how well you used it, it was still someone else's, not truly yours. When one's cultivation was low, it didn't seem problematic. But when one's strength increased, the flaws became apparent.

"I might be able to elevate all my talents to God level in the Origin Land. After leaving, they should be enough to replace my previous talents. For now, I should enhance my talents to Mystic level and comprehend the rules of the Origin Land," Ye Tian muttered.

Ten years later, Ye Tian stepped into the Mystic level talent area of the Origin Land and began a new round of slaughter. Through constant battles, he continuously copied the Mystic level talents of the Origin Men, elevating all his talents to the Mystic level.

Thus, Ye Tian's talents gradually improved from 10% Mystic to 100%, becoming true Mystic level talents.

As Ye Tian delved deeper into the rules of the Origin Land, he started creating powerful techniques and secret arts. True powerful techniques always involved the rules; otherwise, they could only be considered ordinary moves.

"The rules of the Origin Land differed from those of the universe. The rules here formed a system of their own, seemingly a stronger set of rules that completely overwhelmed the rules of the universe.

If the rules of the universe were like soil, the rules here were like stone. The rules I previously comprehended were akin to soil, and in a world full of stone, how could soil shake stone? Because of this, I couldn't utilize the rules here. But if I comprehended the rules of the Origin Land, it would be like holding a stone spear, easily piercing through the soil," Ye Tian thought.

For ordinary people, even the most powerful Divine General entering the Origin Land couldn't comprehend its rules unless they stayed here permanently. However, Ye Tian could copy talents, which was like having an external cheat.

To others, this place was merely a treasure land, but for him, it was a heaven-defying opportunity.

“If I leave here, my strength wouldn’t skyrocket, but I could easily crush Divine Generals stronger than me because my Grand Dao rules would overwhelm theirs, even achieving victory with inferior strength!” Ye Tian felt excited.

The Origin Land was vast, with countless Origin Men. Ye Tian didn’t know exactly how many Origin Men there were in the Origin Land.

As time passed, he gradually encountered some Origin Men with Time Talent and Space Talent, known as Origin Time Talent and Origin Space Talent.

Ye Tian successfully copied and fused the Origin Time Talent and Origin Space Talent, thus gathering all the basic attribute talents again. He could now comprehend his own Chaos Grand Dao in the Origin Land, and this time, it was a more perfect Chaos Grand Dao.

Previously, Ye Tian’s Chaos Grand Dao had already reached the Origin realm and was at the mid-Origin stage. Now, it was equivalent to starting over. Even though the Chaos Grand Dao in the two places differed, Ye Tian could use one to perfect the other. With a complete path to follow, his comprehension of the Chaos Grand Dao progressed quickly. Coupled with the unique nature of the Origin Land, his advancement was swift.

From initially understanding the rules, stepping into the threshold of the Chaos Origin Grand Dao, to the Dao form, and the Dao aspect, Ye Tian’s progress was rapid. His strength increased quickly as well.

In the blink of an eye, thirty years passed. Ye Tian finally stepped into the Origin realm of the Grand Dao once more. The newly formed Chaos Grand Dao Origin was more perfect and powerful than his previous one. It constantly tempered Ye Tian’s body, a feedback from the Origin to himself, a phenomenon that hadn’t occurred before.

Initially, Ye Tian’s body had been weakened and suppressed by the Origin Land, making it impossible to improve. But now, under the tempering of the Origin, his physical foundation became more formidable, and his physical strength incrementally increased.

Battle! Slaughter! Comprehension! Creation!

Ye Tian continuously improved with each passing moment. His progress in these few thousand years was comparable to hundreds of thousands of years before, and he truly comprehended the essence of the Grand Dao.

As time went by, the Origin Men he faced showed incredible advancements in battle experience and rule application. With every fight, Ye Tian learned a great deal.

Deep Within the Origin Land

Ye Tian battled numerous Origin Men, with rules fluctuating and the Grand Dao manifesting.

Each Origin Man wielded the power of the Grand Dao with ease. Every move seemed ordinary but contained terrifying Dao power, treating the Grand Dao rules as common force.

In the past, Ye Tian couldn't achieve such a level, but now, by learning the Origin Men's combat methods, he succeeded.

Moreover, Ye Tian suppressed his strength while fighting these Origin Men to temper his battle power.

Soon, after learning sufficiently, Ye Tian unleashed his true strength, crushing them.

Host: Ye Tian

Origin Strength Talent: God level

Origin Speed Talent: God level

Origin Body Talent: God level

Origin Saber Talent: Supreme level

Origin Sword Talent: Supreme level

Origin Space Talent: God level

Origin Time Talent: God level

Origin Fire Talent: God level

Origin Earth Talent: God level

Origin Metal Talent: God level

“Most of my talents have been elevated to God or Supreme level. Moreover, the limits of these talents aren’t at God level. In the universe, those talents capped at God level, making further improvement extremely difficult. But here, it’s not the limit.

Unfortunately, these talents cannot be merged to advance to God level. It seems that unless I copy super God-level talents or use some treasures to advance, there’s no other way!” Ye Tian thought.

As for whether there were super God-level talents in the Origin Land, he couldn’t be sure.

But he had a premonition that he was nearing the core area of the Origin Land. Perhaps the true secret of the Origin Land was about to be revealed.

On This Day

Ye Tian ventured deeper into the Origin Land and saw a giant mountain.

Atop the giant mountain stood numerous Origin Men, each holding various weapons, with the power of the Grand Dao enveloping the entire mountain.

Ye Tian used his copying talent to inspect and found that these Origin Men had God-level and Supreme-level talents, and their auras were vastly different from those he encountered before.

“Is this giant mountain the core of the Origin Land?” Ye Tian murmured.

He even saw a giant tree atop the mountain, which might be the true secret of the Origin Land.

As Ye Tian approached the giant mountain, numerous Origin Men charged down towards him.

There were about hundreds of Origin Men here, each terrifyingly powerful with formidable battle experience and an incredible understanding of the Grand Dao.

For a moment, Ye Tian felt immense pressure.

Chapter 820: The Origin Seed

Boom!!! Ye Tian wielded his saber, relentlessly battling against these Origin Men. Fortunately, he had merged numerous talents, while these Origin Men typically possessed only one or two talents, each with their own flaws. Otherwise, he wouldn't have stood a chance.

One by one, the Origin Men fell, but Ye Tian's injuries grew increasingly severe.

In the Origin Land, he couldn't use the Great Immortality Technique, and his semi-chaotic life form had vanished, making it extremely difficult to heal his wounds.

If it weren't for this, he could have easily exhausted these Origin Men.

Fighting! Frenzy! Every move and strike of Ye Tian's were natural and in perfect harmony with the Grand Dao, as if he were a child of the Grand Dao itself. While fighting this group of Origin Men, he also learned their combat techniques.

Ye Tian forgot about time, forgot about everything, focusing only on continuously killing the Origin Men.

Finally, there were no more Origin Men in front of him. He half-knelt at the foot of the mountain, with half of his body almost obliterated, but in the end, he won.

After a long while, Ye Tian barely managed to recover some of his injuries.

"I won!" Ye Tian said with a smile.

Immediately, he flew towards the mountain top, aiming for the giant tree.

As he reached the summit, he instinctively knew the name of the giant tree—Origin Tree! The Origin Tree was filled with the power of the Grand Dao's origin, bearing many fruits.

Through the fruits, Ye Tian saw numerous small Origin Men being nurtured within.

“So, the Origin Men are nurtured from these fruits!” Ye Tian realized.

Perhaps because he had passed the ultimate test, or perhaps these Origin Men needed time to be nurtured, they did not immediately emerge.

This spared Ye Tian from having to fight again. Sitting cross-legged beneath the Origin Tree, Ye Tian both healed his wounds and examined the tree.

As the Master of the Primordial Era had speculated, this Origin Land might not be a place of inheritance after all. At least, having reached its core, Ye Tian had yet to see any inheritance.

However, if one fell in the Origin Land, they would appear in a special space and receive some treasures before being teleported out.

Ye Tian had not fallen, but he had no idea what to do next.

Should he commit suicide? Just then, a wave of energy rippled out.

Ye Tian's expression changed, and his figure instantly disappeared.

In the next moment, he appeared in a space within the Origin Tree.

This was the Origin Space of the Origin Tree! Within this space, it was filled with endless origin rules and an ocean of origin power.

Standing here, Ye Tian immediately felt the vastness of the origin. Faced with this power, he felt as insignificant as an ant.

“What is that....”

Ye Tian’s gaze fixed on the center of the Origin Space, where there was a seed. The boundless origin power emanated from this seed; in fact, this entire space seemed to be created by it.

Ye Tian wanted to approach the seed, but he couldn’t get close. The immense pressure prevented him from approaching, no matter how hard he tried.

Suddenly, an illusory seed rushed towards Ye Tian, along with a surge of consciousness entering his mind.

“Origin Seed.... take it.... leave!”

Hearing this consciousness, Ye Tian was utterly shocked.

This indicated that the seed was sentient and had given him this illusory seed, the Origin Seed.

“Giving me benefits and asking me to leave?” Ye Tian murmured.

The Origin Seed should be very precious, but Ye Tian wanted the seed itself. However, he wasn’t strong enough. Forcibly taking it might be dangerous.

Better take what you can get! Ye Tian accepted the Origin Seed, and the next moment, a force teleported him away.

Boom!!!! In a new space, Ye Tian appeared, facing various rewards.

Top-tier spiritual herbs, precious ores, a few chaotic spiritual treasures, and several chaotic spiritual plants.

Although these rewards couldn’t compare to the harvest from the Qilin Hall, Ye Tian felt satisfied, as his gains in the Origin Land far exceeded these rewards.

Moreover, the value of the Origin Seed was likely extraordinary. That was the true reward.

After Ye Tian collected his rewards, he was expelled from the Origin Land.

Outside the Land of Fallen Gods.

Ye Tian reappeared, but the Master of the Primordial Era was no longer there.

Given the length of time he had spent in the Origin Land, it would have been strange if the Master of the Primordial Era had still been waiting.

“Let’s return to the Human Race first!”

Ye Tian instantly disappeared, heading back to the Human Race.

Soon, Ye Tian returned.

At the Tian Pavilion.

Ye Tian first inquired about the situation at the Tian Pavilion, then proceeded to the Supreme Hall.

One by one, the avatars of the Supremes descended. These Supremes were summoned by Ye Tian.

Once most of the Supremes had arrived, Ye Tian asked, “Everyone, what is the current situation in the universe?”

Although he had a third and fourth true self, these selves rarely emerged because their strength was insufficient to participate in major cosmic events. However, Primordial Supreme and Kunwu Supreme had the ability to contact the Master of the Primordial Era and were qualified to participate in Supreme meetings, thus possessing more information.

Kunwu Supreme spoke, “Supreme of Ten Thousand Laws, the situation in the universe is not good. Many cultivators from the Cangyu Universe have invaded our universe, including some Earthly Venerables.

Three thousand years ago, a powerful Earthly Venerable fought with Stone Dragon Supreme, severely injuring him. The opponent's strength was likely close to that of a one-star Divine General.

Fortunately, the universe's suppression affected them; otherwise, Stone Dragon Supreme might have fallen in that battle.

Similar incidents have occurred many times, and the two universes have already begun preliminary skirmishes.

Moreover, some major races in our universe have probably defected to the Cangyu Universe, and it's rumored that some cultivators have entered the Cangyu Universe, directly joining their holy lands!"

Kunwu Supreme elaborated extensively, concluding that the situation in the universe was extremely dire.

The Supremes had also named their universe—Eternal Universe!

"Have we gathered information about the strength of the Cangyu Universe?" Ye Tian asked.

"We have," Kunwu Supreme replied. "According to intelligence from the Master of the Primordial Era and others, the Cangyu Universe has 23 Divine General-level experts on the surface, the strongest being at the peak of two-star Divine General, though currently in seclusion.

The Cangyu Universe likely has no three-star Divine General-level experts!"

"The Master of the Primordial Era has already reached one-star Divine General-level strength. Including you, Supreme of Ten Thousand Laws, we currently have only two Divine General-level experts in the Eternal Universe," Kunwu Supreme added.

"And what about the reincarnators?" Ye Tian asked again.

"There's not much information. Only a few reincarnators have appeared, and based on their current strength, they should all be first-tier Supremes. They often appear in resource-rich worlds, secret realms, and forbidden areas, frequently seizing resources from major clans in the universe. They seem to be gathering vast amounts of resources to enhance their strength," Kunwu Supreme replied.

“Alright, I understand! For now, the Human Race should not act. Notify me immediately if anything major happens. I need to enter seclusion for a while!” Ye Tian said.

“Understood!” the Supremes responded.

Then, Ye Tian returned to the Tian Pavilion and began his seclusion, organizing the gains from the Origin Land, particularly his talents and the Chaotic Grand Dao.

At this moment, the talents acquired from the Origin Land and his innate talents were merging, as was the Chaotic Grand Dao. If Ye Tian hadn’t been suppressing them, he would have lost control long ago.

Now, with the meeting concluded, he naturally needed to enter seclusion immediately; otherwise, he wouldn’t be able to control it.
