Chapter 831: Peak Two-Star Divine General

Boom! A group of ancient demons appeared on the first level, surrounding Ye Tian.

These ancient demons were nurtured by the Ancient Demon Tower. Each had a powerful physical body and excelled in ancient demon combat techniques. Although they did not understand the laws of the Great Dao, divine abilities, or secret techniques, the Ancient Demon Tower restricted the use of laws, divine abilities, and secret techniques, only allowing physical combat techniques. Therefore, the ancient demons here were incredibly formidable.

The ancient demons on the first level were relatively weak, but even ordinary Earthly Venerables found it difficult to contend with them. Moreover, ten ancient demons appeared at once.

These ten ancient demons specialized in different combat techniques. When combined, they had almost no weaknesses. Even a six- or seven-star Earthly Venerable, if physically weak, would find it challenging to pass the first level.

Ye Tian did not immediately defeat these ancient demons. Instead, he hid his strength and fought with them for a while. He discovered that their combat technique standards were far inferior to those of the powerful source beings from the Origin Land, which left him disappointed. He then swiftly killed them one by one.

“It seems that learning more advanced combat techniques in the Ancient Demon Tower is impossible. I can only break through the levels, absorb some purer ancient demon yuan qi, and enhance my strength,” Ye Tian thought.

Of course, he also had another idea: to break through the thirteenth level of the Ancient Demon Tower and completely refine it, making it his own. However, this was no simple task. Given his current level, it seemed far beyond his reach.

Nevertheless, he would do his best.

Boom! Ye Tian killed the last ancient demon and passed the first level of the Ancient Demon Tower.

At this moment, a black hole appeared above Ye Tian, and incredibly pure ancient demon yuan qi poured down, flooding into his body and tempering his physique.

Ye Tian did not dare to waste time and immediately activated the Profound Void Technique to refine his body.

Before long, a terrifying aura erupted from Ye Tian.

He had broken through! Strictly speaking, his Profound Void Technique had made a minor breakthrough, advancing from the third level to the major realm, and his body underwent another transformation.

“What pure ancient demon yuan qi! It’s a hundred times purer than the yuan qi outside. It’s definitely the top resource for physical cultivation! Calling it ancient demon yuan qi doesn’t do it justice; it should be called ancient demon essence!” Ye Tian murmured.

At this moment, his strength had already approached the level of a peak two-star Divine General. If he could cultivate the Profound Void Technique to the perfected realm of the third level, his strength would undoubtedly reach the level of a two-star ultimate Divine General.

However, this would take a long time.

But if he continued to break through the levels, he might be able to achieve this breakthrough in a short time.

“The Ancient Demon Tower is truly my blessed land!” Ye Tian was quite excited.

With a flash, Ye Tian’s figure disappeared from the first level and entered the second level.

The ancient demons on the second level were even more formidable. Each had a physical strength far surpassing that of the first level’s ancient demons, and their combat techniques were more refined and powerful. Combined, they could easily overpower an ordinary ten-star Earthly Venerable.

According to Ye Tian's information, only an extreme ten-star Earthly Venerable or a one-star Divine General had any hope of passing the second level. As for passing the third level, only a few two-star Divine Generals could manage it.

On the second level, Ye Tian fought continuously against ten ancient demons. It didn't take long for him to kill the ten ancient demons. Then, the pure ancient demon essence descended again, flooding into Ye Tian's body and tempering his physique.

Before long, Ye Tian's Profound Void Technique made further progress, but he still hadn't broken through the bottleneck.

"Continue!"

Ye Tian entered the third level and began fighting the ancient demons there.

The ancient demons on this level had combat technique attainments that made Ye Tian take them somewhat seriously. At least they weren't trash. They had reached the level of some not-so-weak source beings from the Origin Land. However, they still only had surface-level combat techniques and had not reached the level of using techniques to enter the Great Dao.

Of course, for other Earthly Venerables and Divine Generals, the combat techniques of these ancient demons were profoundly mysterious and worth studying for many years.

However, Ye Tian was exceptionally gifted. Having entered the Origin Land, he had learned higher-level Origin Great Dao and laws, completely transcending ordinary rules. In terms of realm, Ye Tian was far superior, making it easy for him to learn these combat techniques.

Others did not have the same opportunities or talents as Ye Tian, so they naturally could not compare to him.

Although the combat techniques of the third-level ancient demons were impressive, they were not worth Ye Tian's time. He quickly eliminated them and passed the third level.

Utilizing the ancient demon essence rewarded on the third level, Ye Tian's Profound Void Technique advanced further, just one step away from reaching the perfected realm of the third level. He needed to pass the fourth level to completely break through his bottleneck.

Ye Tian arrived at the fourth level, where the ancient demons were even more terrifying. In terms of pure physical strength, each was not weaker than Ye Tian. When combined, their power was even more formidable.

Even some weaker three-star Divine Generals might not be able to pass this level. Only the stronger three-star Divine Generals could succeed.

However, the Ancient Demon Tower tested not just strength but physical prowess and combat techniques. If one's combat techniques were refined, having slightly weaker physical strength was not a problem.

Ye Tian's combat technique standards far surpassed those of the ancient demons, so he did not hesitate at all.

“Kill!”

Ye Tian fought fiercely with the ancient demons on the fourth level. He, who appeared weaker, faced ten powerful ancient demons. The entire fourth level became their battlefield, and the sheer strength of their physical combat techniques shook the rules of the Ancient Demon Tower.

Initially, Ye Tian was at a slight disadvantage, but he soon gained the upper hand. He continuously disrupted the coordination among the ten ancient demons and killed them one by one, eventually passing the fourth level.

After passing the fourth level, an ancient demon essence far surpassing the previous levels poured into Ye Tian's body.

A great transformation began! A real transformation!

Ye Tian's Profound Void Technique quickly reached the perfected realm of the third level, and his physical strength increased significantly, boosting his power to the peak two-star Divine General level.

“Such a tremendous transformation in strength! Coming to the Ancient Demon Tower was the right decision! The Cangyu Universe truly is extraordinary, having such treasured lands for cultivation. If

the Eternal Universe had similar places, some Divine General-level experts would have been born long ago!” Ye Tian thought to himself.

At this moment, he truly understood the real gap between the two universes. It was not a matter of inheritance or talent but a gap in resources.

The Origin of the Cangyu Universe should be much stronger than that of the Eternal Universe. This allowed for the birth of extremely powerful supreme treasures and cultivation lands. Because of this, the Cangyu Universe could produce numerous Divine General-level experts.

Now, with the era of the dual universes upon them, both universes had sensed the crisis and reopened some secret realms and cultivation lands.

The Ancient Demon Tower was one of these.

The Eternal Universe was a bit behind, still having not opened similar cultivation lands.

But it wouldn’t be long before a series of cultivation lands would explode in both universes, ushering in a golden age of cultivation.

The accumulated foundation of thirteen cosmic eras would burst forth at once. It was a do-or-die situation.

“The dual universe era is indeed extraordinary, with chances of transcendence likely to be dozens or even hundreds of times higher than usual. Even if the fusion of the two universes fails, before they shatter, they might still give birth to more than ten transcendents.” Ye Tian pondered.

However, whether this was worth it was uncertain. If the two universes did not merge and continued to exist for many more cosmic eras, countless transcendents would surely be born. Now, using up the foundation of both universes at once and gambling their futures was, in the long run, not worth it.

But for the beings of this era, it was definitely worth it.

Future cosmic eras had nothing to do with the beings of this time. They only grasped the present, and if there were higher chances of transcendence, they were willing to give everything.

If Ye Tian had to choose, he would prefer the two universes not to merge, as he had little time left. He had not yet figured out how to ensure the transcendence of his wife and sister.

If they did not transcend and the universe fusion failed, they would truly perish.

“Next target: become a three-star Divine General and become my master’s official disciple!” Ye Tian decided.

Chapter 832: The Collapse and Fusion of the Dimensional World

Ye Tian’s physical body transformed once again, his strength reaching the peak of two-star Divine General. Even though he was suppressed in the Ancient Demon Tower, the increase in his physical strength was undeniable. As a result, his abilities within the tower naturally improved significantly.

Thus, Ye Tian continued to advance through the Ancient Demon Tower, reaching the fifth level.

The Ancient Demons on the fifth level had physical strength comparable to three-star Divine Generals, even surpassing typical three-star Divine Generals in power. The cooperation of ten Ancient Demons together would make any three-star Divine General despair. Only those with extraordinary physical strength among the three-star Divine Generals had a chance to pass.

However, upon entering the fifth level, Ye Tian relied on his superb combat skills and unparalleled combat experience to battle the Ancient Demons for a long time.

One day! Two days! Three days! Ye Tian fought relentlessly, like the most precise machine, without a single mistake. He continually learned from the Ancient Demons’ combat techniques, gradually identifying flaws in their coordination.

After five days, Ye Tian exploited these flaws, finally killing one of the Ancient Demons. He then proceeded to eliminate the others one by one.

When all the Ancient Demons were dead, Ye Tian’s stamina was nearly exhausted.

“Finally passed the fifth level!” Ye Tian sighed in relief.

Having cleared the fifth level, more Ancient Demon essence descended. Ye Tian seized the time to absorb it, cultivating the Profound Void Technique.

Unfortunately, the Profound Void Technique had reached the perfected third layer. Breaking through to the fourth layer was challenging and couldn't be achieved merely with the essence of these Ancient Demons.

Therefore, although absorbing this essence only slightly improved Ye Tian's physical strength, it didn't lead to a significant transformation.

"I have to give up on the sixth level!" Ye Tian decided.

He had barely managed to pass the fifth level, so the sixth level would undoubtedly be even more difficult. Unless he could advance to a three-star Divine General and undergo a physical transformation, he stood no chance.

Otherwise, attempting the sixth level would be futile.

Consequently, Ye Tian gave up on challenging the sixth level.

Just as Ye Tian informed the artifact spirit of his decision to forgo the sixth level, the artifact spirit asked, "Challenger, do you wish to make your record public?"

"No!" Ye Tian responded quickly.

He dared not make his record public. Other Divine Generals had only managed to pass the third level at most. If it became known that he had passed the fifth level, it would be shocking! Moreover, he didn't want to become a target.

If other Divine Generals decided to hunt him down, even if he could escape, it would bring many troubles. Additionally, the human race would become a prime target in the Cangyu Universe.

Thus, he decided to stay hidden.

The dual-universe era was fraught with deep waters; who knew what other schemes might be in play? Ye Tian had another concern as well.

That was whether there were other forces involved. The Hidden God Organization was just a small force within the chaos. They might have already discovered the dual-universe plan. At the very least, those powerful beings who left legacies in the dual universes surely knew about it. Some might not care, but that didn't mean others wouldn't.

The Hidden God Organization might be able to block some weaker chaotic powerhouses, but they couldn't stop those at the Grand Dao Realm.

The dual-universe plan was a taboo within the chaos. Even if other major forces were aware, they might not openly participate. However, secretly sending in powerful talents was certainly possible.

Therefore, he needed to avoid exposing his strength and trump cards prematurely.

Ye Tian knew well that his strength was merely at the peak of two-star Divine General, which made him an insignificant ant in the chaos, not even qualified to become an official disciple of any powerful being. How could he dare to be arrogant?

In an instant, Ye Tian was teleported out by the artifact spirit, and his true progress through the Ancient Demon Tower remained hidden. No one knew he had cleared the fifth level; otherwise, it would have undoubtedly shocked countless powerhouses across the universe.

After exiting the Ancient Demon Cave, Ye Tian silently returned to the Eternal Universe, making his way back to the human territories.

But shortly after his return, a cosmic upheaval occurred!

The Eternal Universe and the Cangyu Universe simultaneously underwent astonishing changes. The void expanded, and the entire universe began to swell at an alarming rate, with numerous creatures appearing across the universe.

Moreover, space fragmented in various places, rules collapsed, and even entire worlds emerged, merging into the cosmic starry sky.

Ordinary people thought it was the end of the world, but the experts above the Earthly Venerable level knew what was happening.

In the Human Race's Tian Pavilion, Ye Tian observed the changes in the universe and murmured, "The dimensional worlds are merging with the main world!"

The universe consisted of numerous dimensional worlds, with the regions where all races lived equivalent to the main world. The other worlds were dimensional worlds, each with its unique rules. Many of these dimensional worlds were devoid of life, containing only endless spatial storms.

It was said that only one percent of these worlds contained living beings.

Additionally, the dimensional worlds closest to the main world were lifeless, filled only with spatial power. This was why the strong ones from the main world, tearing through the void, had never encountered any creatures from the dimensional worlds.

Now, the fusion of the two universes triggered their transformation. Some dimensional worlds began to merge with the main world. As this fusion continued, the main world's area expanded, effectively enlarging the universe.

Furthermore, the rules of the main world began to change.

Originally, the main world suppressed the path of physical strength and the soul, only favoring the path of divine force. But now, the restrictions on the paths of physical strength and the soul were loosening. The more dimensional worlds that merged, the fewer restrictions there would be.

In the Tian Pavilion, disciples above the God level laughed with joy.

"Hahaha, I can now cultivate that body-refining secret technique, and my physical body has transformed!"

"Wasn't the physical body fixed for those above the God level? My body is actually improving slowly. Heavens!"

"Haha, I can enhance my physical body now. Am I on the rise?"

Not only in the Tian Pavilion, but throughout the entire Human Race and the universe, countless experts above the God level were ecstatic. Even the Earthly Venerables were extremely excited.

Although Earthly Venerables could slowly improve their physical strength, the speed had been too slow. Now, their rate of improvement increased significantly.

Originally, some Earthly Venerables at the three or four-star level who had been unable to progress for millions of years could now easily break through their shackles.

It was foreseeable that seven or eight-star Earthly Venerables would no longer be rare in the universe, and even ten-star Earthly Venerables would appear in large numbers.

Of course, it would still be challenging for Divine Generals to emerge, as only true talents could achieve Divine General-level combat power.

During the first hundred years of the dimensional world's integration into the main world, only the superficial dimensional worlds merged. However, over time, the deeper dimensional worlds also began to collapse and merge into the main world.

Consequently, powerful beings began to appear, including some Earthly Venerable-level creatures and some unique dimensional world races.

The situation in the entire universe suddenly became more complex.

Chapter 833: Conversation Between Two True Monarchs

Everywhere was filled with slaughter! The Eternal Universe and the Cangyu Universe had completely descended into chaos, a situation not even the powerful figures of the two universes had anticipated, including Ye Tian.

The fusion of two universes within the chaos was forbidden. Even the Ox Race didn't understand the specifics of the dual universe fusion, only having a rough idea.

Thus, Ye Tian only knew that the probability of a dual universe fusion was very low, but he didn't know that the dimensional world would merge with the main world, causing the universe to continuously expand.

If he had known this, he certainly would have made more preparations.

In the territory of the Human Race, numerous powerful beings appeared, and the Earthly Venerables of the Human Race took action, battling these Earthly Venerables. Ye Tian also personally intervened to suppress them.

With Ye Tian's speed, his rescue efforts were extremely swift. No powerful Earthly Venerable-level beings could withstand him; they were all easily killed by him.

And, Divine General-level beings were not that common. At least, none had appeared yet.

Therefore, this turmoil was just a minor issue for the Human Race, though several Human Race planets couldn't be rescued in time and were destroyed.

But comparatively, the losses of the Human Race were negligible. The losses of the Myriad Races Alliance were significant. The territory of the Myriad Races Alliance was too vast, and although there were many Earthly Venerables, they couldn't rescue everyone in time.

Countless star fields were destroyed, and numerous weaker Earthly Venerables were killed. Adding to this, the members of the Hidden God Organization were causing trouble in secret, leading to great losses for the Myriad Races Alliance.

However, the Myriad Races Alliance still had some foundation and barely managed to survive.

But the weaker intermediate and high-level races in the universe suffered. Without a five-star Earthly Venerable to guard them, they couldn't resist some powerful beings from the dimensional world.

In one day, over a hundred thousand races were annihilated.

In just a few days, the population of the entire universe decreased by more than half.

This was a disaster! It was a catastrophe caused by the fusion of the universe's main world with the dimensional world, but it was also an opportunity. Any strong individual who survived would see their strength increase rapidly.

And the dual universes would usher in a whole new era!

Outside the Universe

Several figures appeared, looking at the expanding universe, and they began discussing.

“True Monarch Luanghai, the Eternal Universe and the Cangyu Universe have entered the second stage of fusion. The two universes are about to usher in a golden age!” A young man in gray armor said with a smile.

He was one of the ten True Monarchs of the Hidden God Organization.

In the chaos, Destiny Realm experts were called Heavenly Monarchs, and True Spirit Realm experts were called True Monarchs. The Hidden God Organization was just a small force with only about a hundred True Monarchs. The ten most elite were known as the ten great True Monarchs, the real high-level members of the Hidden God Organization.

True Monarch Luanghai was the true person in charge of the dual universe transcendence plan, also known as the Supreme Lord by those people.

“True Monarch Huijia, our Hidden God Organization has invested too much in this plan, even involving our genius juniors. If we don't produce a few transcendents, we won't be able to advance to the Grand Dao Realm. We can only rely on our juniors.”

“If a few transcendents are born, plus our cultivation, we might hope to become Grand Dao Realm experts. Then our Hidden God Organization will be truly one of the major forces.” True Monarch Luanghai said seriously.

“It's difficult. Although those juniors' strength increases rapidly in such a cosmic golden age, they still need to comprehend the cosmic rules anew. With their foundation in the outside world, they can at most advance to one-star Divine General. After that, they must rely on themselves.”

“To transcend, one needs to be a three-star Divine General with a defying fate. But the final transcendence thunder tribulation is too terrifying. Unless one has a heaven-defying life-saving treasure, at least a four-star Divine General’s strength is required to be safe!” True Monarch Huijia frowned as he spoke.

There were two kinds of Transcendents. The first kind included those like Heavenly Monarch Yun Tan, who forcibly transcended using certain treasures, suitable for non-defiers of fate. However, the Hidden God Organization didn’t possess such treasures.

The second kind followed the orthodox path of defying fate, advancing step by step against the heavens. However, each major breakthrough required enduring a thunder tribulation, with the Transcendent thunder tribulation being the most terrifying. A three-star Divine General would almost certainly die.

The Hidden God Organization never disclosed this point to the Earthly Venerables of the dual universes. These Earthly Venerables might have thought that reaching the level of a three-star Divine General would be enough to transcend.

Of course.

A non-defier of fate could also transcend without the aid of transcendent treasures, but they would need at least the strength of a six-star Divine General, which was even more difficult.

For non-defiers of fate, their foundation was inherently unstable, and their potential was limited. Reaching the level of a six-star Divine General was an almost insurmountable challenge. This was why all the reincarnators in the Hidden God Organization were defiers of fate; they only needed to reach the level of a four-star Divine General to transcend and leave.

But now, time was running short. They had to transcend within ten million years, which posed a significant challenge.

Out of so many reincarnators, it was estimated that only a few could transcend, while the rest would merely serve as stepping stones. In fact, these reincarnators likely didn’t even know the difficulty of transcending, thinking that entering the dual universes this time would produce a large number of Transcendents.

If the actual proportions were revealed, few Divine Generals would dare to reincarnate into the universe.

After all, in the chaos, they could still become Destiny Realm experts. Even if they couldn't advance to the True Spirit Realm in the future, the longevity of the Destiny Realm was already very long, at least spanning several dozen cosmic eras.

Such a long lifespan satisfied many Destiny Realm experts, who had no need to tread a path of certain death.

Furthermore, there were countless opportunities in the chaos, and there was no need to become a Transcendent.

But for the sake of this plan, the Hidden God Organization had concealed some truths.

"Let's not talk about this anymore. If they can transcend and return, they won't care about our concealment of the truth. If they can't transcend, then they will die in the universe." True Monarch Luanghai said.

True Monarch Huijia nodded and stopped pondering these minor issues.

Suddenly, he spoke again, "True Monarch Luanghai, it seems that some major forces in nearby territories have already learned about the dual universes. They also seem to want to intervene. If a Grand Dao Realm expert intervenes, even the weakest among them, we won't be able to resist."

"No matter. The dual universes have already started merging. They can't send anyone to reincarnate anymore, unless those Grand Dao experts are willing to pay a huge price, which wouldn't be worth it.

I reckon that even if these Grand Dao experts want to participate, at most they will try to find some disciples or recruit some Divine Generals within the dual universes. But they aren't as prepared as we are, so the greatest benefits will still be ours." True Monarch Luanghai said.

"What if the dual universes merge into a Grand Universe? Can we protect a Grand Universe?" True Monarch Huijia asked.

"A Grand Universe!" True Monarch Luanghai laughed heartily and said, "The probability of that is so low that we haven't even prepared to cultivate a Grand Universe.

But if we are truly lucky and cultivate a Grand Universe, we definitely won't be able to protect it alone. However, we can collaborate with those major forces to gain more benefits.

Besides, we do have some backing. Those major forces wouldn't dare to destroy us."

"Hmm!" True Monarch Huijia also agreed with True Monarch Luanghai. Although the Hidden God Organization didn't have a Grand Dao Realm expert, their leader, True Monarch Hidden God, who had been in seclusion all this time, was a nominal disciple of a Harmony Realm expert. Even if the relationship wasn't deep, just having some connection with a Harmony Realm expert would deter other forces from destroying the Hidden God Organization, as no one knew if that Harmony Realm expert might get angry.

Chapter 834: The Appearance of the Sloth Beast

The conversation between the two True Spirit Realm experts from the Hidden God organization was unknown to the beings of the universe, and even if they knew, they wouldn't have had much reaction.

A prosperous era had already arrived, and they naturally needed to seize every opportunity to transcend. Even those who weren't transmitters desperately yearned for transcendence.

Transcendence was their only hope for survival. If they couldn't transcend, they would perish once the dual universes shattered after a few million years.

Under such circumstances, many Earthly Venerables had gone somewhat mad.

Chaos! There was chaos everywhere! Perhaps initially, with the constraint of powerful individuals and racial restrictions, the Eternal Universe and Cangyu Universe had been relatively stable. However, now that the two universes had expanded several times over and a large number of Earthly Venerables and dimensional racial forces had emerged, the situation had changed.

In such a situation, even a two-star Divine General couldn't stabilize the situation.

A powerhouse like Ye Tian could only ensure that the human race remained orderly. As for guaranteeing the stability of the Eternal Universe, he was far from capable.

In the Tian Pavilion.

Numerous powerful individuals were in seclusion, cultivating. Ye Tian distributed countless resources, naturally benefiting the Earthly Venerable-level powerhouses. They received massive amounts of resources, continuously enhancing their physical strength and improving their power.

Among them, Ye Tian's wife, Xiao Yue, and his sister, Ye Yu, received the highest cultivation and their power continuously grew.

In just a short hundred years, they had both advanced to the level of nine-star Earthly Venerables. In the past, such a level would have been comparable to the First Divine Lord of the Immortal Race, but in the current era, nine-star Earthly Venerables were far from being considered strong.

In the following years, Ye Tian had Xiao Yue, Ye Yu, and others enter the Qilin Hall, Origin Land, and various other places of inheritance to further increase their strength and obtain more resources.

Of course, many powerful individuals from the human race and the major sacred lands of the Eternal Universe were also aware of the Origin Land and Qilin Hall. Most of the strong from the Primordial Holy Land had entered them.

However, those with too low a strength couldn't gain many benefits. Even so, the strength of the Eternal Universe was rapidly increasing.

On this particular day.

Another dimensional world shattered and merged into the main world. A terrifying creature, enormous enough to be comparable to several star fields, appeared. As soon as it appeared, it devoured countless stars, and several unlucky Earthly Venerables were also swallowed in one gulp.

This gigantic beast attracted the attention of many powerful individuals, even drawing some Divine Generals from the Cangyu Universe to the Eternal Universe.

Ye Tian received the news and rushed over immediately.

In the Lanchen Domain.

After causing a commotion, the giant beast lay down in the starry sky and slowly fell asleep, resembling an endless continent. However, a world was also being nurtured above it, comparable in size to several star fields.

Previously, while the beast was awake, it continuously devoured matter, and no one dared to enter this world.

But now that the beast was asleep, some people became tempted, wanting to enter this world, hoping for a great opportunity.

However, many soon despaired.

The world's barriers were too solid, and ordinary Earthly Venerables couldn't break through them or enter.

One by one, powerful Earthly Venerables arrived, including Divine General Primordial Era and Ye Tian, the Divine General of Ten Thousand Laws.

After arriving, Ye Tian first greeted Divine General Primordial Era, then used his Copy Talent to probe the giant beast. What he discovered shocked him.

“A Sloth Beast!”

Among the special creatures with Super God-level talents, this was one of them, and it was the special creature he had been searching for.

Unfortunately, the Sloth Beast was exceedingly rare, and it remained in a state of constant slumber after its birth.

This time, the dimensional world shattered and merged into the main world, causing the Sloth Beast to awaken briefly, create a disturbance, and then fall back asleep.

At this moment, the Sloth Beast's talents were clear.

Innate Being: Sloth Beast

Strength Talent: God-level

Defense Talent: God-level

Speed Talent: Top-tier

Sloth Armor Talent: Super God-level

Devour Talent: God-level

From its talents, it was evident that the Sloth Beast's speed talent was quite poor, but its Sloth Armor talent was incredibly formidable, reaching the Super God level.

The Sloth Armor talent was one of the earth attribute talents and could be considered the Sloth Beast's innate talent, fully integrated with its body. The countless scales on the Sloth Beast's body were fused with the Sloth Armor talent, so even while it slept, the Sloth Armor talent remained fully activated.

Moreover, the Sloth Beast's physical body was terrifying, having reached the pinnacle of a two-star Divine General. Coupled with the Sloth Armor talent, it would be difficult for even a three-star Divine General to harm it.

"Previously, when I learned about the Sloth Beast, I thought a two-star Divine General could injure it. Now, seeing its physical body, I know a two-star Divine General can't hurt it at all. However, others don't know that the Sloth Beast possesses the Sloth Armor talent and still think it's just an ordinary two-star Divine General-level creature," Ye Tian thought.

Although a two-star Divine General-level creature was powerful, being in a deep sleep and unguarded, it might tempt some one-star Divine Generals to try to subdue or slay the Sloth Beast.

Ye Tian first copied the Super God-level Sloth Armor talent and then stood by to watch the show.

Soon, another group of Earthly Venerables and Divine Generals arrived, among them one of the newly promoted Divine Generals of the Eternal Universe—Divine General Stone Dragon! Previously, when Divine General Stone Dragon was still a ten-star Earthly Venerable, he was nearly killed by an assault from the Hidden God organization. However, he broke through in the midst of life and death, stepping into the combat power of a one-star Divine General.

Besides Divine General Stone Dragon, five Divine Generals from the Cangyu Universe also appeared.

These five Divine Generals were Divine General Iron Universe, Divine General Spirit Emperor, Divine General Dragon Master, Divine General Sea Suppressor, and Divine General Sun.

At this moment, Ye Tian, Divine General Stone Dragon, and Divine General Primordial Era moved closer together, while the five Divine Generals from the Cangyu Universe grouped together, forming two factions.

“What kind of monster is this?” Divine General Spirit Emperor asked curiously.

“No idea!” The other Divine Generals shook their heads, unable to recognize the Sloth Beast since it was too rare for their knowledge.

“This is a powerful creature at the level of a two-star Divine General. I need the bloodline of some powerful creatures for my cultivation. If I can kill it, I might break through my bottleneck and advance to a two-star Divine General,” Divine General Dragon Master said as he launched an attack, aiming straight for the Sloth Beast’s head.

In his view, the unguarded Sloth Beast, despite being a two-star Divine General, could be easily killed. Just like other two-star Divine Generals in the universe, if they stood still without any defensive measures, they could be instantly killed by him.

Boom!!!! Divine General Dragon Master’s Dragon Spear struck the Sloth Beast’s head, producing a metallic clang that reverberated through the void.

However, such a terrifying attack only caused the Sloth Beast to shake its body slightly. It continued to sleep, completely unperturbed, and its head remained unscathed.

“What!” Divine General Dragon Master was shocked, and the other Divine Generals were equally astonished, except for Ye Tian, who watched calmly, not finding it strange at all.

Not to mention Divine General Dragon Master, even if the combined attack of the few two-star Divine Generals from the Cangyu Universe couldn’t kill the Sloth Beast. At most, they might wake it up, but killing it was out of the question.

Chapter 835: Innate Dao Stele

“Everyone, attack together!” shouted the Divine General Dragon Master.

The other four Divine Generals of the Cangyu Universe, along with Divine General Primordial Era and Divine General Stone Dragon, all launched their attacks.

Boom! Boom! Boom! Waves of attacks bombarded the Sloth Beast, but they could never inflict any harm on it. However, the Sloth Beast began to show signs of awakening.

“Divine General of Ten Thousand Laws, why aren’t you attacking?” Divine General Primordial Era asked through divine sense transmission.

“Don’t waste your energy. With your strength, you can’t harm this Sloth Beast,” Ye Tian replied in a deep voice.

“Sloth Beast?” Divine General Primordial Era halted his attacks and looked towards Ye Tian, awaiting his explanation.

The other Divine Generals also stopped, realizing they were incapable of killing the Sloth Beast.

Ye Tian continued, “This giant beast is called the Sloth Beast. Since its birth, it has almost always been in slumber. If the dimensional world hadn’t collapsed this time, it would probably still be sleeping. Thus, it poses no threat to us, and there’s no need to kill it. To truly kill it, one would need the strength of a top-tier three-star Divine General.”

“I see!” Divine General Primordial Era nodded in realization.

The other Divine Generals completely gave up as well, acknowledging that their one-star Divine General strength was insufficient to kill the Sloth Beast.

At that moment, several beams of light shot through, instantly tearing the world barrier on the Sloth Beast's back and entering that world.

"It's those Divine Generals from the Hidden God Organization!" Divine General Stone Dragon roared.

He had a significant grudge against the Hidden God Organization. If not for a secret treasure, he would have died at the hands of the Hidden God Organization's Divine General Zhang Ling last time.

One of the Divine Generals who had just rushed into the Sloth Beast's world was indeed Divine General Zhang Ling. He could never forget Divine General Zhang Ling's aura.

"Could there be a great opportunity in the Sloth Beast's world?" Divine General Primordial Era asked Ye Tian.

"I don't know!" Ye Tian shook his head. "I only know about the Sloth Beast. I don't know much about the Sloth Beast's world. Shall we go in as well?"

Swish! Swish! Swish! Several Divine Generals tore through the world barrier of the Sloth Beast's world and rushed in.

The Sloth Beast's world was vast, but its internal structure was similar, with nothing particularly special.

For Divine Generals, the Sloth Beast's world didn't pose any real threat. After all, it was merely a large world nurtured by the Sloth Beast.

"The resources here are abundant," Ye Tian murmured to himself after surveying the Sloth Beast's world.

Although he didn't find any high-level resources, it was undoubtedly a place of opportunity for them.

“That is...”

Ye Tian sensed a Dao aura at the center of the Sloth Beast World, radiating throughout the entire world.

The Divine Generals who had entered the Sloth Beast World all flew towards its center. Soon, all the Divine Generals gathered there, but each was in a state of confrontation.

Especially Divine General Stone Dragon and Divine General Zhang Ling from the Hidden God Organization—their auras clashed fiercely. If it weren’t for the ancient stone stele in the Sloth Beast World, they might have already started fighting.

“The Innate Dao Stele! I didn’t expect the Sloth Beast World to actually produce it!” exclaimed one of the Divine Generals from the Hidden God Organization, his eyes gleaming as he stared at the stele.

“Innate Dao Stele?” The other Divine Generals were filled with curiosity.

Throughout the universe, there were many similar steles, even on some small stars. These steles could assist people in comprehending laws and martial techniques, but they were generally low-level and of little use to the strong.

“Hmph, a bunch of natives who don’t even know about the Innate Dao Stele!” Divine General Zhang Ling sneered.

“The Innate Dao Stele is extremely rare. The Sloth Beast World constantly absorbs external forces and rules. Under specific conditions, there’s a minuscule chance of an Innate Dao Stele forming.

The Innate Dao Stele is a very high-level treasure even in the chaos. However, since it’s fused with the Sloth Beast World, it cannot be taken away. If we destroy the Sloth Beast World, the Innate Dao Stele will also disappear.

I advise you not to fight here, or this Sloth Beast World might not withstand our battle,” Divine General Zhang Ling’s words were mainly directed at Divine General Stone Dragon. He implied that they should not let their grudges destroy a great opportunity.

“You haven’t mentioned the use of the Innate Dao Stele,” Divine General Primordial Era interjected.

Divine General Zhang Ling explained, “The Innate Dao Stele can enhance one’s comprehension. If you use it to comprehend Great Divine Abilities or secret techniques, the speed will be much faster than usual. Even for us Divine Generals, it is highly beneficial. But its real value lies in helping us consolidate the Innate Dao.

Even if I don’t explain, once you start comprehending the Innate Dao Stele, you’ll realize your Dao is incomplete. Our Daos are all Universe Daos, and it is nearly impossible to perfect them within the universe. But the Innate Dao Stele can help us fill in the gaps, consolidating an Innate Dao.

In essence, the Innate Dao is not inherently powerful, but its growth potential far surpasses that of the Universe Dao. Your Daos are likely stuck at the mid or late Origin stage for countless ages without progress due to these deficiencies. If you consolidate an Innate Dao, there might be a slim chance to transcend the Origin stage. Now, let’s each choose an area to begin our comprehension without disturbing one another. How about that?”

“Agreed!” Divine General Primordial Era nodded.

The other Divine Generals agreed as well, and Divine General Stone Dragon hesitated briefly but ultimately nodded in agreement. He wasn’t confident in defeating Divine General Zhang Ling and didn’t want to miss out on this opportunity.

Ye Tian stood aside, reflecting on Divine General Zhang Ling’s words. Others’ Daos were flawed, but his own Dao was already perfected—it was a true Innate Dao, and not just any Innate Dao but a truly perfect one.

Technically, he didn’t need the Innate Dao Stele to fill in any gaps, but it could still help advance his Dao stage. His Dao had already reached the peak of the late Origin stage, not far from the perfected Origin stage. Perhaps, with the help of the Innate Dao Stele, he could break through the bottleneck and achieve the perfected Origin stage of the Chaos Dao.

Each Divine General set up a simple formation to prevent interruptions and then began their closed-door comprehension around the Innate Dao Stele.

Meanwhile, news of the Innate Dao Stele leaked out, attracting more and more Divine Generals. Normally, Divine Generals were rarely seen, but now there were far too many here. Even almost all the Divine Generals of the Cangyu Universe arrived, except for a few in long-term seclusion who couldn't be contacted.

Chapter 836: Perfected Origin, Three-Star Divine General

The Sloth Beast World possessed an Innate Dao Stele, which intrigued not only the Divine Generals but also greatly excited the Earthly Venerables.

As a result, a large number of Earthly Venerables flocked to the Sloth Beast World. Initially, they feared the Sloth Beasts, but upon learning that the beasts would not interfere with them, they felt reassured and began attempting to enter the Sloth Beast World.

Some Earthly Venerables entered the Sloth Beast World with the help of the Divine Generals, while others, relying on their formidable strength, forcibly tore through the barriers of the Sloth Beast World and entered it.

Any Earthly Venerable capable of tearing through the barriers was a powerhouse among Earthly Venerables, each at the ten-star Earthly Venerable level and considered extremely powerful even within that tier.

As time passed, more and more Earthly Venerables arrived in the Sloth Beast World. The resources of the world were gradually depleted, but most Earthly Venerables were still focused on comprehending the Innate Dao Stele.

The Divine Generals were few in number and naturally did not prohibit the Earthly Venerables from their insights.

In the blink of an eye, a thousand years passed.

Ye Tian and the other Divine Generals remained immersed in their comprehension. None left, for encountering such a treasure as the Innate Dao Stele made them unwilling to waste any time. They aimed to perfect their understanding of the Innate Dao before leaving.

Ye Tian, utilizing the Innate Dao Stele, continually comprehended the Chaos Dao, his origin growing ever stronger, and his realm slowly advancing.

“It’s almost time. Once the Chaos Dao reaches the perfected Origin stage, a transformation will occur!”

Ye Tian had learned a secret from the Ox Race: once the Dao reached the perfected Origin stage, the origin would temper the entire body, breaking through a physical limit. The origin would then condense into a bead, transforming from an origin well into an origin bead.

Thus, this was an opportunity for Ye Tian to significantly increase his power.

If he truly broke through, given the strength of his Chaos Dao, he could instantly reach the level of a three-star Divine General.

After all, his Chaos Dao was the strongest Dao and the most perfect Chaos Dao. Even if others reached the perfected Origin stage, they would still be far inferior to his Dao.

To break through as quickly as possible, Ye Tian consumed numerous spirit medicines that enhanced comprehension. Coupled with the Innate Dao Stele, his comprehension speed increased even more.

Year after year passed! Ye Tian did not know exactly when he would break through; it could be the next second or it might take tens of thousands of years.

In short, he was just a hair’s breadth away from the perfected Origin stage.

A hundred years! A thousand years! Three thousand years! One day, Ye Tian suddenly heard a cracking sound in his mind, and a realization dawned on him.

Suddenly.

His Chaos Dao transformed into an origin well phenomenon, and the origin well continued to shrink while the origin rapidly condensed. The power contained within the Chaos Dao became increasingly terrifying.

This scene attracted the attention of the other Divine Generals and numerous Earthly Venerables.

“Divine General of Ten Thousand Laws is about to break through!” Divine General Primordial Era murmured.

With the breakthrough of his origin realm, Ye Tian’s previously hidden and suppressed aura could no longer be contained and instantly leaked out.

That extremely terrifying aura made the one-star Divine Generals feel fear and even suffocation. Even the few two-star Divine Generals trembled.

“What, a peak two-star Divine General!” They were shocked and could hardly believe it.

There were no peak two-star Divine Generals in the Cangyu Universe; the strongest Divine General there was only at the late two-star level. How could the small and weak Eternal Universe produce a peak two-star Divine General?

Moreover, Ye Tian was in the process of breaking through, potentially to the level of a three-star Divine General.

“The Divine General of Ten Thousand Laws is a defier of the heavens. If he crosses into a three-star Divine General, he could transcend!”

A one-star Divine General exclaimed.

The other Divine Generals’ expressions changed. Yes, a three-star Divine General who defied the heavens could attempt to transcend.

If successful, he would become a transcendent! This made many Divine Generals envious of Ye Tian, but none dared to show it.

After all, once Ye Tian became a three-star Divine General, he would be powerful enough to sweep them all away. They would not dare offend him!

Divine General Primordial Era and Divine General Stone Dragon were very pleased. The stronger Ye Tian became, the more beneficial it was for them. The other Divine Generals of the Cangyu Universe would be extremely wary and would not dare to attack the Eternal Universe.

After a while, the origin well had gradually transformed, compressing into a chaotic-colored bead that hovered above Ye Tian's head.

This was his Origin Bead, the embodiment of his Dao.

Suddenly.

With a thunderous roar, an infinite amount of Chaos Dao's origin power gushed out from the Origin Bead, pouring into Ye Tian's body and tempering it at an incredible speed.

Seizing this opportunity, Ye Tian quickly refined his Profound Void Technique.

Originally at the perfected third layer, the Profound Void Technique now showed signs of breaking through. Not long after, the shackles of the technique shattered, and it formally advanced to the introductory stage of the fourth layer.

Simultaneously, Ye Tian's physical body underwent a transformation.

His physical strength surged continuously, and his aura grew wildly.

Crack! A shattering sound echoed in the void, signifying the breaking of a power barrier.

At this moment, Ye Tian finally broke through the barrier between a two-star and a three-star Divine General, officially becoming a three-star Divine General powerhouse.

Opening his eyes, Ye Tian's gaze seemed to penetrate the river of time, seeing the depths of his soul imprint submerged within the endless flow of time. The force of time's power pulled at it, preventing it from leaving the river of time.

At this point, Ye Tian could attempt to pull his soul imprint, allowing it to transcend. Once the soul imprint left the river of time and returned to his body, it would signify transcendence.

However, doing so would mean facing the final tribulation of a defier of the heavens—the Tribulation of Transcendence! Ye Tian had a feeling that he might not be able to overcome this

tribulation at his current level! Of course, even if he could overcome it, he would not attempt it now. Achieving transcendence only as an ordinary transcendent was not his goal.

“Congratulations, Divine General of Ten Thousand Laws!”

“Congratulations, Divine General of Ten Thousand Laws!”

“Congratulations, Divine General of Ten Thousand Laws!”

One by one, the Divine Generals stood up to congratulate Ye Tian, but most of their congratulations were just superficial. Their true feelings remained unknown.

Ye Tian responded briefly before continuing his comprehension, and the other Divine Generals, not wanting to waste time, also resumed their own insights.

Perhaps stimulated by Ye Tian, these Divine Generals began taking out some treasures to consume, accelerating their comprehension speed.

Unfortunately, they could not even necessarily make up for the flaws in their Dao, so reaching Ye Tian’s level was almost impossible for them.

“Now, my origin has perfected and transformed into an Origin Bead. The next step is to condense a true Dao of my own.”

Previously, it had been about comprehending the Dao, which was chaotic and not his own.

Only by condensing his own Dao would it truly belong to him.

In the chaos, those in the perfected True Spirit Realm that could completely carve out their own Dao and condense a true Dao, could step into the Grand Dao Realm. Once the Dao was perfected and fully integrated with themselves, it would be the Harmony Realm!

From a realm perspective, it seemed that perfection of the origin and condensing the Dao were just a step apart, but in reality, there were many steps involved.

First, carving out one's own Dao—this step alone hindered countless powerhouses, even some weaker True Spirit Realm experts had not achieved this.

Second, after carving out one's own Dao, it must be condensed into a nascent Dao and then slowly nurtured, which also required a long period.

The third step was to start the Dao World. Without this, how could a complete Dao exist within oneself? Once the Dao World was established, it meant the origin transformed into the Dao World.

Ye Tian had just reached the perfected Origin stage. As for how to proceed to the next step, he had no clue.

After spending a few years stabilizing his realm, Ye Tian attempted to use the Innate Dao Stele to comprehend some divine abilities, aiming to advance a few of his Great Divine Abilities to the minor accomplishment realm, but he found it too difficult.

Perhaps with a long period, he could achieve this, but Ye Tian could not afford to waste so much time.

In short, the Innate Dao Stele was no longer of great use to him.

Chapter 837: The Fragmentation of the Void Realm, Merging into the Main World

Seeing that others were still comprehending the Innate Dao Stele, Ye Tian got up and left without drawing anyone's attention.

Soon, Ye Tian departed from the Sloth Beast World.

After leaving, he casually found a place and fused the Super God-level Sloth Armor talent he had previously copied.

The Super God-level Sloth Armor talent belonged to the earth attribute, so it merged into Ye Tian's Origin Earth talent, elevating it directly to the Super God level.

“Now, all that remains is a Super God-level physical body talent. Once I acquire one more Super God-level physical body talent, I can fuse it with the Super God-level Origin Earth talent to form the Earth Element talent. Then I can cultivate the Chaos Divine Ability: Ancient Origin Defense Divine Ability!” Ye Tian thought to himself.

Even in the chaos, a Heavenly Venerable with the Chaos Divine Ability was considered a top-tier genius, capable of sweeping through countless Divine Generals, standing at the pinnacle of Chaos Divine General-level combat power.

However, this matter couldn’t be rushed; it depended on luck! If he couldn’t find a Super God-level physical body talent, he could only use long years to slowly copy some God-level physical body talents, accumulating them over countless fusions to transform the physical body talent.

Currently, Ye Tian had an even more important task: entering the Chaos Divine Realm, entering the Sacred Hall, and becoming an official disciple of that great existence.

This was the most important thing! The Misty Region wouldn’t open for another six thousand years, so Ye Tian wasn’t in a hurry to enter. Instead, he focused on nurturing the members of the Human Race and the Tian Pavilion.

Thus, he led batches of strong human cultivators into the Sloth Beast World, allowing them to comprehend the Innate Dao Stele. However, he couldn’t take too many people, only the geniuses and Heavenly Venerables of the Human Race were qualified to go.

Without rules and limitations, the entire universe would flood into the Sloth Beast World, causing chaos. Ye Tian didn’t want to break this rule and cause trouble for himself.

In the blink of an eye, several hundred years passed.

One day, another dimensional world shattered, drawing the attention of all forces.

In the outskirts of the Human Race’s territory.

A fragment of the dimensional world descended. A divine tree piercing through the void enveloped an area, surrounded by countless humanoid creatures.

These humanoid creatures were pitch black, covered in scales, and exuded a bizarre aura.

“Void Demons!”

Ye Tian noticed this fragment of the dimensional world and the creatures within, immediately exclaiming in surprise.

He recognized these creatures. Back when he was still weak, he had entered the Void Realm with a Void Kun, infiltrating the Void Demon Clan. He had entered the inner space of the Heavenly Dao Tree of the Void Demon Clan, seizing a large amount of Heavenly Dao Golden Liquid and a core of the Heavenly Dao Tree.

The Void Realm was a relatively deep realm, but it was somewhat special. Other beings found it difficult to stay in the Void Realm; only those wearing the Heavenly Dao Leaves could reside there for long periods.

Previously, he had left many Heavenly Dao Leaves for the Human Race, and they had established a foothold in the Void Realm. Unfortunately, the Void Realm was too difficult to navigate, and apart from the Heavenly Dao Characters, it was hard to gain other benefits.

Thus, the Human Race eventually ceased their development of the Void Realm.

Now, the Void Realm had also shattered.

The Heavenly Dao Tree was extremely precious. Although it was useless to Ye Tian, it was highly valuable, enough to nurture a large number of human geniuses.

Therefore, the Heavenly Dao Tree was a must-fight-for!

“Hahaha, this treasure tree is mine!”

A six-star Earthly Venerable happened to be near the Heavenly Dao Tree, ready to seize it. The Void Demon Clan wasn't powerful, and without the protection of the Void Realm, they lost their immortality.

In an instant, the six-star Earthly Venerable wiped out a large number of Void Demons with a single move.

Just as the six-star Earthly Venerable was about to uproot the Heavenly Dao Tree with both hands, Ye Tian's attack arrived.

Poof! A saber light tore through the void, instantly reducing the six-star Earthly Venerable to dust.

The next moment, a beam of light enveloped the Heavenly Dao Tree and whisked it away.

Soon after, a Heavenly Dao Tree appeared in the Human Race's Sacred City.

There were many Heavenly Dao Trees in the Void Realm, but due to the nature of the Void Realm, they were rarely found before. Now, with the Void Realm shattered, the Heavenly Dao Trees were much easier to locate.

However, the universe was vast. No matter how strong and fast Ye Tian was, he couldn't possibly seize all the Heavenly Dao Trees.

Despite his efforts, Ye Tian managed to capture only six Heavenly Dao Trees and a significant amount of Heavenly Dao Characters.

Even so, some Heavenly Dao Characters and a few Heavenly Dao Trees remained scattered across the universe, waiting to be discovered by others.

Heavenly Dao Characters were precious to any cultivator below the level of a Universal God. Consequently, the universe once again fell into turmoil, with many people fighting over the Heavenly Dao Characters.

The Void Demon Clan, which had relied on the immortality granted by the Void Realm, was now on the brink of extinction without it.

However, one clan became exceptionally powerful: the Void Kun Clan.

The Void Kun excelled in spatial abilities and had formidable survival skills. The elites among them even possessed Super God-level spatial talents, making them one of the most outstanding special races in terms of spatial talents.

Moreover, the Void Kun Clan had their own heritage and numerous Earthly Venerables. Their strongest Earthly Venerable could rival a one-star Divine General.

The Void Kun Clan was also highly united and could communicate with each other, quickly forming a stronghold and establishing a powerful force in the Eternal Universe.

Ye Tian frowned deeply. The threats from the dimensional worlds were significant, with the greatest threat naturally coming from the Origin Realm.

The Origin Realm harbored countless Origin Beasts, whose overall strength was comparable to the Main World.

Moreover, the peak Origin Beasts of the Origin Realm could rival ten-star Earthly Venerables solely with their physical strength. If the Origin Realm merged into the Main World and the rules and restrictions were lifted, these Origin Beasts could potentially reach the Divine General level with a bit of divine force and soul cultivation, along with mastering some combat techniques.

Of course, while their potential would be limited by having to re-cultivate the Grand Dao, becoming two-star or three-star Divine Generals would not be difficult for them.

In such a scenario, numerous Divine General-level Origin Beasts would emerge in the Eternal Universe, posing a tremendous challenge to all major forces in the universe.

Additionally, the influx of countless Origin Beasts into the Main World would result in the deaths of countless human beings. No matter how powerful Ye Tian was, he couldn't stop all the Origin Beasts at once.

The Human Race was too scattered, with great distances between each star field. Protecting each star field was nearly impossible. After much contemplation, Ye Tian realized there was only one way to protect the Human Race in the impending calamity.

“Concentrate the Human Race!” Ye Tian declared.

Chapter 838: Dao Ancestor Void Sky

To concentrate the human race meant to gather them together so that the population density increased, naturally making it easier to protect them. Otherwise, given the vast territory of the human race, even the Earthly Venerables would find it impossible to provide adequate protection. A slight disturbance would be enough to annihilate humans on a planet.

“Build a Starry Sky Continent!” Ye Tian thought of this solution.

In the chaos, there were countless Chaos Continents where innumerable beings lived. The Cangyu Universe also had many Starry Sky Continents that replaced planets.

A Starry Sky Continent’s area far surpassed that of a planet. If humans concentrated on a Starry Sky Continent, it would be easier to manage and develop them.

“Transform a star field into a Starry Sky Continent and gather all humans from that star field onto the continent. Then, station a group of Earthly Venerables on the continent to protect the humans there!” Ye Tian said.

He immediately convened a meeting of the human Earthly Venerables to present his suggestion.

The Earthly Venerables naturally had no objections and fully followed Ye Tian’s plan to implement the Starry Sky Continent project.

This plan was then communicated down to the human forces in various star fields and further disseminated to every planetary system and planet.

Pan Star Field.

Ye Tian arrived here, his home star field, to personally create the Starry Sky Continent.

The center of the Starry Sky Continent was designated as Earth.

Ye Tian instantly traveled to Earth, and his vast power acted upon the planet.

The next moment, planets from the Milky Way traversed the starry sky and integrated with Earth.

Boom! On Earth, people witnessed a tremendous transformation as the continents expanded, and countless humans descended onto the new land.

One planet, two planets, three planets... billions of planets merged with Earth, gradually forming a Starry Sky Continent.

Simultaneously, multiple suns layered in space, radiating over the entire continent, ensuring that a sun was visible from any part of the continent, rotating as well.

This method, difficult for other cultivators, was easily accomplished by someone of Ye Tian's caliber.

Soon, all the Milky Way planets integrated into the Starry Sky Continent.

Next, Ye Tian forcibly brought and merged planets from other galaxies into the continent.

In the blink of an eye, a month passed, and all planets from the Pan Star Field integrated into the Starry Sky Continent. Countless humans from Pan Star Field now lived on the continent.

Viewed from above, the Starry Sky Continent appeared as countless continents adorned like stars on a vast ocean.

Countless humans and planets created this magnificent continent.

Trillions of humans lived on it. Due to the aggregation of planets, yuan qi concentrated, and with numerous formations set by Ye Tian, the yuan qi on the continent was incredibly dense, especially around Earth.

In the future, the Earth area would develop into the central region of this continent.

"I am the Divine General of Ten Thousand Laws. From now on, this Starry Sky Continent shall be named the Huaxia Continent!" Ye Tian's voice echoed throughout the continent.

At that moment, the Starry Sky Continent received its name—Huaxia Continent.

Immediately, Ye Tian built an Immortal Palace in the sky above the Huaxia Continent. This palace was where Earthly Venerables resided. If anyone broke through to become an Earthly Venerable, they could move into the palace, facilitating the management of the entire continent.

Additionally, the Earthly Venerables residing in the Immortal Palace would protect the Huaxia Continent.

The Pan Star Field did not have Earthly Venerables, but under Ye Tian's command, several Earthly Venerables, including six or seven-star Earthly Venerables, came to reside in the Pan Star Field Immortal Palace.

Ye Tian's speed in creating the Starry Sky Continent was the fastest, but it didn't take long for other star fields to complete their continents as well.

A few years later.

The human territories were entirely transformed into Starry Sky Continents, each equipped with numerous defensive formations. These formations didn't restrict human advancement but prevented other races from entering. Once activated, their defensive strength could withstand a strike from a Divine General.

Most of these formations bore the marks of Ye Tian's efforts. Without his prowess, other Earthly Venerables would find it challenging to set up such powerful formations.

Thousands of years passed.

One day.

The Misty Region reopened. Ye Tian entered the Misty Region and arrived at the Chaos Divine Realm.

Chaos Divine Realm.

As soon as Ye Tian arrived, the Divine Generals of the Ox Race came to greet him.

“Your Highness!” Niu Long respectfully said.

“I want to enter the Sacred Hall!” Ye Tian revealed his aura, showcasing the power of a three-star Divine General.

“Congratulations, Your Highness!” Niu Long and the other Ox Race members congratulated in unison.

Ye Tian, having reached the level of a three-star Divine General, was promoted from a prospective disciple to an official disciple.

The status of an official disciple far surpassed that of a nominal disciple. Ye Tian was also the only official disciple in this universe, representing the hope for their future departure from the Eternal Universe!

“Your Highness, please!” Niu Long said joyfully.

Under the protection of the Ox Race, Ye Tian entered the Sacred Hall.

As soon as he stepped inside, the spirit of the Sacred Hall, Shang, appeared.

“Senior Shang!” Ye Tian greeted.

“You’ve arrived,” Shang replied indifferently.

“Senior Shang, I have become a three-star Divine General. Can I now become an official disciple of that great existence?” Ye Tian asked.

“You can, but you need to be tested first,” Shang replied.

“Understood!” Ye Tian nodded.

Immediately, Shang set up a small test, arranging for Ye Tian to challenge the weakest three-star Divine General.

Ye Tian easily defeated the opponent with his three-star Divine General strength, passing the test.

“Congratulations on becoming an official disciple of Dao Ancestor Void Sky!” Shang congratulated.

“My master is called Dao Ancestor Void Sky,” Ye Tian remarked.

“Indeed,” Shang nodded. “The name of Dao Ancestor Void Sky cannot be casually spoken. In the chaos, if anyone utters this name, Dao Ancestor Void Sky will know.

For instance, just now, you and I mentioned the name, and Dao Ancestor Void Sky is already aware. Common people who speak this name carelessly will bring misfortune upon themselves. If the Dao Ancestor becomes angry, they can be erased across countless dimensions. Thus, very few dare to directly address the Dao Ancestor by name in the chaos.”

Through his conversation with Shang, Ye Tian learned about the naming conventions for the powerful beings in the chaos.

Destiny Realm beings were called Heavenly Monarchs, True Spirit Realm beings were called True Monarchs, Grand Dao Realm experts were called True Ancestors, and Harmony Realm experts were called Dao Ancestors. Dao Ancestors were the most powerful beings in the chaos.

“Ye Tian, as an official disciple of Dao Ancestor Void Sky, you have one opportunity to meet the Dao Ancestor. Use this chance wisely,” Shang advised.

“Yes!” Ye Tian responded with great excitement.

Chapter 839: Meeting the Dao Ancestor, Passing on Teachings

Boom!!! Ye Tian only felt a blur before his eyes as an extremely terrifying force pulled him, breaking through the universe and traversing the boundless chaos, bringing him into an incredibly magnificent hall.

“This...”

Ye Tian was shocked. Had he left the universe? No, he shouldn't have. He hadn't transcended yet. If he dared to leave the universe now, he would be doomed to die.

Soon, he realized that his true self hadn't left. At the very least, he couldn't sense his Copy Talent, nor could he see any of his talents. This body should be just a wisp of his consciousness.

“To silently pull a wisp of my consciousness here without me noticing, such a method is too powerful!” Ye Tian thought.

He even felt that Dao Ancestor Void Sky could easily kill him while he was in the universe. The universe was a place that protected the beings within it; chaos powerhouses couldn't kill beings within the universe, but Harmony Realm powerhouses could.

However, a Dao Ancestor of the Harmony Realm was such an exalted existence that naturally, they wouldn't bother to kill a small fry in the universe.

Boom!!! An immensely imposing figure appeared before Ye Tian. This person was Dao Ancestor Void Sky, but it shouldn't have been his true form—perhaps it was just a clone.

“Disciple greets Master!” Ye Tian said respectfully.

“Ye Tian, you have become my official disciple, but since you are a being of the universe, many resources you cannot obtain, and many treasured places you cannot enjoy.

However, in other aspects, I can make up for this.

You have done well in terms of divine abilities and physical body, but your soul remains a flaw. Compared to ordinary geniuses, your soul is not weak, but as my disciple, your soul is far too weak.

I will pass on to you the Burning Fire Soul Refining Technique, a supreme soul secret technique that you must not transmit to others.

Additionally, I will give you the Three Thousand Dao Sutras to strengthen your foundation.”

After speaking, Dao Ancestor Void Sky pointed at Ye Tian's forehead, and countless profound mysteries condensed into two seeds: the Burning Fire Soul Refining Technique and the Three Thousand Dao Sutras.

"I will also preach to you for a year!"

Before Ye Tian could ask, Dao Ancestor Void Sky began to preach.

As soon as Dao Ancestor Void Sky began speaking, Ye Tian's soul trembled, and he fell into countless epiphanies, continuously absorbing the essence of the Dao Ancestor's teachings.

mainly spoke about the Dao of the Earthly Venerable, the Dao of Laws, and the Dao of the Soul, expounding countless rules from various aspects, greatly benefiting Ye Tian.

Of course, there was much content that Ye Tian couldn't understand.

However, he forced himself to memorize it, intending to comprehend it slowly in the future.

In the blink of an eye, a year passed.

"Thank you, Master, for preaching to this disciple!" Ye Tian expressed his sincere gratitude.

Although only a year had passed, his understanding of the Dao had improved by several levels. A year ago, he had no understanding of the embryonic form of the Dao, but now he had some clues.

Of course, it was still extremely difficult for him to condense the embryonic form of the Dao and walk his own path, but at least he had a direction now, which was far better than having no clue at all.

Additionally,

his entire state of mind had improved significantly. Now, he was at the perfected stage of the seventh level, only a step away from the eighth level.

Moreover, his entire will seemed to have been reshaped, becoming much stronger.

In summary, listening to Dao Ancestor Void Sky's teachings for a year yielded tremendous gains, equivalent to millions of years of arduous comprehension and cultivation.

"Do you have any other questions? You may ask me now.

Miss this chance, and the next time we meet as master and disciple will be either the day you transcend or the day you become a personal disciple." said solemnly.

Ye Tian gritted his teeth and said, "Master, I want to know how to ensure the successful fusion of two universes into a Grand Universe, not by chance, but with a 100% success rate."

"You want this for your universe, don't you?" chuckled. "Do you know the enormous price that needs to be paid to ensure a 100% success rate for the fusion of two universes? It can be said that the cost is even higher than the value of a Grand Universe."

"Please, Master, enlighten me," Ye Tian requested.

"There are two methods!" explained, "The first method is to find a Creation Origin Stone and integrate it into the two universes. This will guarantee a 100% fusion into a Grand Universe. However, the Creation Origin Stone is extremely rare in the chaos, and its value is exceedingly high. A True Spirit Realm powerhouse who obtains a Creation Origin Stone can even condense a true Dao, stepping into the Grand Dao Realm. One could say a single Creation Origin Stone can create a Grand Dao Realm powerhouse. Even a Grand Universe is not as valuable as a Grand Dao powerhouse.

The second method involves integrating an Origin Universe Heart into the two universes. This method is somewhat easier but involves dealing with the Transcenders' organization. The Origin Universe Heart is formed when a Grand Dao Realm Transcender falls and infuses all their power into their internal universe. For Transcenders, the Origin Universe Heart is immensely valuable, and it's nearly impossible for outsiders to obtain it."

"This..."

Ye Tian didn't know what to say. These two methods were too difficult; at least, they were beyond his current capabilities. After all, he was still in the universe and couldn't leave it.

Of course, he also knew his master could easily obtain these two treasures, but what right did he have to ask his master for help? Given Dao Ancestor Void Sky's status and power, there were countless official disciples, and he certainly wouldn't prioritize one official disciple's desires. It was impossible for him to grant every wish of his disciples.

Unless Ye Tian could be promoted to a personal disciple, he might then persuade Dao Ancestor Void Sky to assist him.

Before Ye Tian could say anything else, Dao Ancestor Void Sky waved his hand, sending Ye Tian's consciousness back to the Chaos Divine Realm.

"I'm back!" Ye Tian sighed. Despite becoming an official disciple, he still couldn't solve the problem of the dual universes.

"It's still about strength. If I can become Master's personal disciple, there might be a way.

My next goal: becoming a personal disciple!"

Ye Tian clenched his fists, making a silent vow.

Soon, Ye Tian emerged from the sacred hall. He didn't linger in the Chaos Divine Realm for long and quickly left.

At this point, the Chaos Divine Realm had no more to offer him; everything depended on his efforts now.

Returning to the Human Race,

Ye Tian quickly entered a state of seclusion.

He needed to carefully organize the two major inheritances, the Three Thousand Dao Sutras and the Burning Fire Soul Refining Technique.

Strictly speaking, the Three Thousand Dao Sutras were not cultivation techniques but a compilation of foundational knowledge, encompassing the fundamental knowledge of chaos.

Previously, Ye Tian had not received complete inheritance or guidance. His foundation appeared solid but was actually quite weak. The Three Thousand Dao Sutras could elevate his knowledge to match the top-tier geniuses of chaos, allowing him to identify and address his shortcomings.

In essence, while the Three Thousand Dao Sutras wouldn't directly enhance his power, they would solidify his foundation multiple times over, giving him greater potential for future advancement.

The Burning Fire Soul Refining Technique was even more extraordinary. It allowed Ye Tian's soul to be continuously tempered in a void soul fire, repeatedly refining and transforming his soul.

The Burning Fire Soul Refining Technique had nine levels, each representing a transformation. Completing all nine transformations would make the soul incredibly powerful. Each transformation would greatly enhance both his comprehension and soul power.

Previously, Ye Tian's comprehension was average. But if he could cultivate the Burning Fire Soul Refining Technique to the ninth level, he might even fully comprehend the Void Sky Diagram.

However, after reading through the entire Burning Fire Soul Refining Technique, Ye Tian realized it was extremely difficult and terrifying. Even the top-tier geniuses of chaos might not reach the ninth level. Furthermore, the human soul had limits; some could only cultivate to the third or fourth level before their souls risked collapsing.

Any genius who could cultivate the Burning Fire Soul Refining Technique to the seventh level would be considered truly top-tier. Even some personal disciples of Harmony Realm Dao Ancestors might not achieve that.

Chapter 840: Two Soul Transformations

“What an incredible technique! It could repeatedly transform the soul, which essentially means altering a person's aptitude against the natural order!”

Ye Tian was extremely shocked.

It was evident that once he cultivated the Burning Fire Soul Refining Technique and achieved some success, his comprehension would significantly improve. This improvement would be permanent, and when combined with his talent for comprehension, the effect would be extraordinarily powerful.

“Begin comprehension!”

Ye Tian immediately started comprehending the Burning Fire Soul Refining Technique, but he soon frowned.

The cultivation of this technique was incredibly painful, involving deep, soul-penetrating agony. If he hadn’t copied and integrated countless talents, developing an unimaginable immunity to soul pain, he wouldn’t have been able to endure such suffering.

“If someone else tried to cultivate this, they likely couldn’t withstand the pain, let alone concentrate on cultivating the Burning Fire Soul Refining Technique. However, for me, it’s the most suitable soul refining method!” Ye Tian said.

He then devoted himself entirely to cultivating the Burning Fire Soul Refining Technique.

In the sea of his soul, it had already turned into a sea of fire. Ye Tian’s soul was constantly being burned, with impurities within it being completely incinerated. Amidst the burning, his soul’s power gradually revived, being repeatedly tempered like refined steel.

Time passed slowly in this manner.

Cultivating the Burning Fire Soul Refining Technique did not require comprehending any laws, so even in an accelerated time environment, it did not affect cultivation. Hence, Ye Tian maintained a 200-fold time acceleration. He didn’t care about the energy consumption needed for time acceleration.

After all, resources were meant to be consumed. If it could quickly enhance his strength, it was worth it! In a blink, ten thousand years passed, which meant Ye Tian had cultivated for two million years in the accelerated time environment.

Maintaining such a long period of time acceleration cost Ye Tian a lot of resources.

Previously, Ye Tian only occasionally used time acceleration for cultivation, or didn't activate the 200-fold time acceleration. This time, it was undoubtedly the longest he had maintained time acceleration, but the gains were substantial.

“Burning Fire Soul Refining Technique, second layer!”

Ye Tian had completed two soul transformations. Both the quality and quantity of his soul had far surpassed what they were before.

In terms of soul power, his soul could easily crush the souls of others like the Master of the Primordial Era.

Regarding comprehension, Ye Tian's comprehension ability had increased six or seven times, and this was only after two transformations. If it reached six or seven transformations or more, the enhancement effect on comprehension would be even more astonishing.

“Unfortunately, the Burning Fire Soul Refining Technique cannot be taught to others. Otherwise, if I taught it to Yue'er and my sister, it could turn their talents into true soul geniuses, greatly increasing their comprehension. Their hope for transcending in the future would also significantly increase!” Ye Tian thought.

But upon careful consideration, his wife and sister might not be able to master the Burning Fire Soul Refining Technique. Even if they could, it would take a very long time. Now that the dual universe fusion was imminent, there wasn't much time left for them.

After cultivating the Burning Fire Soul Refining Technique to the second layer and undergoing two soul transformations, Ye Tian paused his cultivation, at least to stabilize his soul.

In the following days, he began comprehending divine abilities, creating techniques for the Primordial system and the Heaven Saber system, and also understanding the Grand Dao, among other things.

Time was never enough for Ye Tian. He had to make the most of every moment, striving to enhance his strength to the fullest.

Two years later, Ye Tian successfully created the fifth form of the Primordial Forms system—Primordial Golden Body. The Primordial Golden Body was an enhanced version created based on the Primordial True Body, but it consumed a lot of energy. Even with Ye Tian's strength, he couldn't sustain it for long.

Six years later, Ye Tian successfully created the fifth form of the Heaven Saber system—Heavenly Will Saber. This form could integrate soul power and the power of the Grand Dao into one, releasing a strike that could annihilate both the body and the soul, with terrifying power.

However, due to the consumption of soul energy, Ye Tian could only execute a few dozen moves before he was unable to continue.

After creating the fifth form of the Primordial system and the Heaven Saber system, Ye Tian's strength increased significantly. Now, he could be considered to have mid-stage three-star Divine General strength.

Additionally, Ye Tian spent considerable time comprehending the Void Sky Diagram. This diagram was his only way to become a personal disciple. Only by fully comprehending the Void Sky Diagram could he become the personal disciple of Dao Ancestor Void Sky.

Unfortunately, although he had made progress, he was still stuck at a fifteen percent comprehension rate and had hit a bottleneck.

The further he progressed in comprehending the Void Sky Diagram, the more difficult it became, consuming increasing amounts of time. Even with his soul having undergone two transformations, he still felt an immense difficulty, seeing no hope at all.

The cultivation of the Profound Void Technique was also extremely difficult, requiring many high-level resources, which were hard to come by. Previously, he had obtained the Ancient Demon Essence in the Ancient Demon Tower, allowing the Profound Void Technique to reach the perfected third layer. That had been a significant opportunity, but such opportunities were hard to come by again. As a result, his Profound Void Technique was still at the perfected third layer.

“If I could cultivate the Profound Void Technique to the fourth layer, my physical body would undergo another transformation, significantly boosting my strength!” Ye Tian thought.

One day, while Ye Tian was cultivating, he suddenly felt a sense of unease. Although it was subtle, it caught his attention.

Swish! Ye Tian appeared above the Human Race's starry sky, his divine sense covering the surroundings as he carefully sensed.

"The universe is trembling; another dimensional world has collapsed!"

The collapse of dimensional worlds was not unusual to Ye Tian, as it happened every few days. However, this time felt different, indicating that the collapsing dimensional world was quite special and might pose significant dangers.

Boom! The void shattered, and large fragments of continents fell from the void, crashing into various parts of the universe. These fragments were enormous, some even comparable to a galaxy in size, indicating their immense scale.

In an instant, many stars in the universe were directly shattered by the continental fragments, causing countless beings to perish.

Above the Human Race's sky.

Numerous Earthly Venerables transformed into towering giants, wielding immense power to stop these continental fragments. Ye Tian also intervened, relocating many of the continental fragments to prevent them from crashing into the Human Race's starry continents.

In short, as long as the continental fragments did not crash into the Human Race's starry continents, the Earthly Venerables of the Human Race would not interfere. After all, these fragments were also opportunities and could be integrated into the Human Race's starry continents later.

However, soon, numerous Origin Beasts emerged from the continental fragments, some even matching the strength of Earthly Venerables.

"This is a fragment from the Origin Realm!" Ye Tian's expression changed.

He was well aware of the strength of the Origin Beasts from the Origin Realm, which housed a vast number of Earthly Venerable-level Origin Beasts. Moreover, the Origin Realm's Origin Beasts far

surpassed those of the main world. After all, the Origin Realm was heavily favored by the universe's origin, and although those Origin Beasts could not transcend, their current combat power exceeded that of the main world.

“This is troublesome; the power structure of the universe might be reshuffled!” Ye Tian sighed.

However, with him around, the Human Race, despite potential losses, would not face extinction. But the same could not be said for other forces and races.

Ye Tian couldn't manage other forces; he could only protect the Human Race.
