

Talent 861

Chapter 861: Six-Star Divine General!

Ye Tian constantly traversed through the area and, after thoroughly distancing himself, descended, using the Great Divine Concealment Technique to hide his life aura, and concealed himself deep underground.

This way, even if someone pursued him, they wouldn't be able to find him.

“That was close. The seven-star Divine General was too powerful. If it weren't for the Great Immortality Technique, I wouldn't have been able to withstand that strike!” Ye Tian thought with lingering fear.

That strike indeed caused him significant injuries, which hadn't yet fully healed.

Ye Tian took some time to recover from his injuries. Once he felt better, he directed his consciousness into his microcosm to inspect the fragments of the Blood-Devouring Vines.

He found a total of 84 fragments, along with a core fragment.

These fragments contained a considerable amount of liquid. Ye Tian extracted this liquid and placed it in a bottle. He then extracted the liquid from the core fragment as well.

The liquid from the core fragment had already solidified into blood-red crystals. There were more than seventy crystals, each containing the essence of the Blood-Devouring Vines.

Staring at these liquids and crystals, Ye Tian's body seemed eager to devour them.

Without hesitation, Ye Tian swallowed some of the liquid from the Blood-Devouring Vines and began to refine it using the Profound Void Technique.

Boom! Ye Tian seemed to transform into a furnace, refining the blood within his body.

As time passed, the concentration of his true blood increased, and his aura grew stronger.

He swallowed more and more of the Blood-Devouring Vine liquid, continuously refining it.

Unknowingly, half a month passed.

By then, Ye Tian had completely refined the liquid from the Blood-Devouring Vines, increasing his true blood concentration by half a percent—a significant improvement.

Next, Ye Tian began refining the Blood-Devouring Vine crystals.

Each crystal contained immense energy, further increasing the concentration of his true blood.

5%... 8%... 10%... 12%... By the time he exhausted the more than seventy Blood-Devouring Vine crystals, Ye Tian's true blood concentration had risen to 18%.

Though it was still far from the desired 39%, it was a notable improvement given the limited number of crystals he had. If he had more core fragments of the Blood-Devouring Vines, he could have increased his true blood concentration to 30%.

Nevertheless, Ye Tian was quite satisfied with a 18% concentration.

As his true blood concentration increased, his blood became immensely powerful, continuously refining his body and subtly breaking through his limits.

Moreover, there were signs of the Profound Void Technique advancing to the sixth level.

Immediately, Ye Tian began a closed-door cultivation to break through to the sixth level of the Profound Void Technique.

Years passed.

With the aid of some resources and his 18% true blood concentration, Ye Tian finally broke through the barrier of the Profound Void Technique and advanced to the initial stage of the sixth level.

Simultaneously, Ye Tian's power surged, becoming a six-star Divine General at the early stage.

In just a few hundred years, he had advanced from mid five-star to six-star combat strength—an astonishing improvement.

Moreover, Ye Tian had yet to cultivate the Ancient Origin Defense Divine Ability. If he succeeded in that, his strength might rise to mid six-star Divine General.

“Time to head back!”

Ye Tian decided not to stay in the Secret Realm World any longer and immediately headed for the exit.

Soon after, Ye Tian returned to the human realm and then entered the Void Sky Hall.

Upon his arrival, he encountered Heavenly Monarch Peng Yu.

Heavenly Monarch Peng Yu was astonished to see Ye Tian.

“Junior Brother Ye Tian, have you reached the level of a six-star Divine General?”

“By sheer luck!” Ye Tian nodded.

“Junior Brother, your talent is indeed formidable. To step into the realm of a six-star Divine General in such a short time!” Heavenly Monarch Peng Yu remarked with a smile.

The two didn't converse for long before Heavenly Monarch Peng Yu departed. Individuals of Heavenly Monarch Peng Yu's stature were usually preoccupied, striving to become True Ancestors, and naturally couldn't afford to engage in prolonged conversations with Ye Tian.

Ye Tian then traded many of the treasures he acquired during his journey with some Divine Generals and Heavenly Monarchs in the Void Sky Hall, exchanging them for the resources he desired.

Once he acquired the necessary resources, Ye Tian began a closed-door cultivation session in the Void Sky Hall. In the entire vast universe, this place was undoubtedly one of the safest locations.

Within the Void Sky Hall, in a secluded cultivation chamber, Ye Tian adjusted his state and began to practice the Ancient Origin Defense Divine Ability. He possessed all the prerequisites for this Chaos Divine Ability, so as long as he followed the steps, he could successfully cultivate it. The duration for achieving mastery, however, depended on his comprehension.

Ye Tian, with his extreme God-level comprehension talent, didn't take long to begin mastering this Chaos Divine Ability.

Years passed by, and in the blink of an eye, three hundred years had gone by.

Chaos divine abilities were indeed extremely difficult to master. Among the Divine Generals, those who managed to cultivate a Chaos Divine Ability were almost legendary, usually being personal disciples of Dao Ancestors who often provided treasures to aid in the cultivation of such abilities.

Cultivating a Chaos Divine Ability on one's own was an extraordinary feat.

One day, Ye Tian succeeded in mastering the Ancient Origin Defense Divine Ability, although it could currently only be considered a preliminary form of the Chaos Divine Ability.

Previously, Ye Tian didn't understand why a Divine General who mastered a Chaos Divine Ability could only refer to it as a preliminary form, but now he understood.

Once a Chaos Divine Ability was mastered, it would form a divine ability imprint, which could only exist within a fate wheel. Only Destiny Realm Heavenly Monarchs possessed a fate wheel, symbolizing transcendence beyond destiny, with one's destiny transforming into a fate wheel, free from the constraints of rules.

Since Divine Generals didn't have a fate wheel, they couldn't house the divine ability imprint, so the mastered Chaos Divine Ability could only be executed like a great divine ability, significantly reducing its power, thus being referred to as a preliminary form of the Chaos Divine Ability.

After mastering the Ancient Origin Defense Divine Ability, Ye Tian felt a tremendous transformation within himself. His strength rose to the mid six-star level, which was secondary. The most crucial change was that his Grand Dao realm underwent a substantial metamorphosis.

“My Grand Dao realm has already reached the perfection of origin. The next step is condensing the embryonic form of the Grand Dao. Could it be that I can now condense the embryonic form of the Grand Dao?” Ye Tian exclaimed in surprise.

Closing his eyes, he carefully sensed it.

Soon, he comprehended it.

“The Dao of Defense, the Dao of the Flesh!”

He sensed the essence of these two Daos and seemed capable of condensing them into embryonic forms.

There were countless Daos, not limited to the twelve attribute Daos of the Chaos Dao Ye Tian primarily cultivated. For instance, everyone’s Dao of Fire was different—be it the Great Dao of Blazing Fire, the Great Dao of Explosive Fire, or the Great Dao of the Fire Phoenix. Ye Tian hadn’t delved deeply into the Dao of Defense or the Dao of the Flesh, as his main focus had always been the twelve attribute Daos of the Chaos Dao, the fundamental Daos.

“Could it be that mastering a Chaos Divine Ability allows one to condense the corresponding embryonic form of a Grand Dao?” Ye Tian speculated.

If this were true, he could collect corresponding chaos divine abilities, master them one by one, and then condense the corresponding embryonic forms of the Grand Dao.

The embryonic form of the Chaos Dao was the most powerful, being a fusion of twelve types of Daos.

Condensing the embryonic form of the Chaos Dao all at once was something Ye Tian couldn’t achieve, but he could condense them one by one, ultimately forming the embryonic form of the Chaos Dao.

“The Dao of Defense and the Dao of the Flesh cannot be condensed for now. Otherwise, I would be prioritizing the Dao of Defense and the Dao of the Flesh, but the foundation is extremely important. My foundation is built upon the Chaos Dao, so I can’t switch Daos now, or half of my established foundation would be wasted!”

Thinking this, Ye Tian abandoned the idea of condensing the embryonic forms of the Dao of Defense and the Dao of the Flesh.

“The Dao of Time and Space is the strongest Dao. Using the Dao of Time and the Dao of Space to establish the foundation of the Grand Dao is naturally the best. Then, I can gradually add other embryonic forms of Daos to the embryonic form of the Dao of Time and Space. However, the Chaos Divine Ability related to time and space is exceedingly rare, and the auxiliary materials required are probably also incredibly rare. I can’t obtain them right now, unless...”

Ye Tian thought of Dao Ancestor Void Sky.

If he could become the personal disciple of Dao Ancestor Void Sky, there might be a chance to obtain the Chaos Divine Ability related to time and space and the corresponding innate origin objects.

Chapter 862: Void Sky Diagram at 97%!

“I must fully comprehend the Void Sky Diagram!” Ye Tian murmured to himself.

In recent days, he had rarely studied the Void Sky Diagram, yet he had managed to comprehend up to thirty percent of it. This achievement was entirely due to his God-level Limit Super Enlightenment Talent.

Without this talent, it would have taken him ages to comprehend thirty percent of the Void Sky Diagram, and he might have even faced bottlenecks, unable to reach this level of understanding.

While Ye Tian delved into the Void Sky Diagram, the outside world buzzed with news of him.

Ye Tian had once again entered the Divine General Rankings, currently holding the 662nd position.

Though this rank wasn't high, Ye Tian was a native of the Grand Universe. He was the only native Divine General to enter the rankings, showcasing his immense potential. This event shocked many Divine Generals of the Void Sky Hall. Initially, most didn't respect this young master, but now, this young master had become a mid-six-star Divine General, ranked first among them.

Indeed, all the Divine Generals ranked above Ye Tian were late-six-star generals, while he was the highest among the mid-six-star generals.

At this rate of advancement, Ye Tian seemed destined to become a seven-star Divine General soon. However, the rankings did not truly reflect one's combat power. The Divine General Rankings merely considered attack power, defense, and various secret techniques to determine one's rank.

A high rank did not necessarily mean great strength. Strong individuals could counter each other, and some possessed secret techniques not accounted for in the rankings.

For instance, some mid-six-star Divine Generals could, upon unleashing their full power, defeat late-six-star Divine Generals.

Other Divine Generals believed that Ye Tian's rapid progress had led to unstable foundations, thinking his combat power would not last and might not even defeat powerful early-six-star generals.

Ye Tian paid no heed to external opinions, focusing solely on comprehending the Void Sky Diagram. He even ignored several opportunities that arose.

His God-level Limit Super Enlightenment Talent was incredibly advantageous. Combined with his innate comprehension and some spirit medicines that enhanced his understanding, Ye Tian's progress with the Void Sky Diagram was swift.

The only drawback was that he couldn't use time acceleration to comprehend the Void Sky Diagram. If he could, the process would have been much easier.

With Ye Tian's talent and comprehension speed, he initially needed ten years to progress by one percent. However, after reaching forty percent comprehension, it took a hundred years to progress by one percent.

In the blink of an eye, sixty thousand years had passed.

During this time, the entire Grand Universe developed rapidly, giving rise to many new Heavenly Monarchs, though the number of Divine Generals hadn't increased much, and had even slightly decreased.

This was because becoming a Divine General was inherently difficult. A good cultivation environment in the Grand Universe did not make achieving Divine General combat power any easier.

Many factions saw the birth of several Divine Generals, but their rate of dying was high. The Grand Universe held numerous opportunities, each attracting many Divine Generals. Some one-star Divine Generals could not compete with six or seven-star generals and thus perished.

Even some six and seven-star generals fell, suffering significant losses.

Amidst these changes, several Divine Generals shone brightly across the Grand Universe.

One such figure was Goddess Yun Zi, whose strength had reached the level of a seven-star Divine General, nearly achieving mid-seven-star status, and was ranked 52nd on the Divine General Rankings.

With her cultivation speed, she had a promising future and might reach the top of the rankings.

Meanwhile, Ye Tian had faded into obscurity. His rank had dropped a few places, despite many Divine Generals falling. If those ahead of him hadn't perished, his rank might have dropped even more.

Many Divine Generals of the Void Sky Hall believed Ye Tian had reached his potential, questioning why his strength hadn't grown in sixty thousand years. In the Grand Universe, where cultivation had become easier, true geniuses improved rapidly. If Ye Tian's strength hadn't increased, it indicated a lack of potential.

Even Heavenly Monarch Peng Yu sighed repeatedly when mentioning Ye Tian.

However, no one knew that Ye Tian had forsaken all cultivation time, dedicating every moment to comprehending the Void Sky Diagram. Otherwise, how could he have made no progress in his strength? Ye Tian understood his goal deeply. Even if he became a late-six-star or seven-star Divine

General, what would it matter if he couldn't become a personal disciple of Dao Ancestor Void Sky? There were many seven-star generals in the chaos, and even eight-star generals existed.

However, the personal disciples of Dao Ancestor Void Sky were very few. Since ancient times, there had only been seventy-one personal disciples, with some having fallen, leaving only fifty-three remaining.

Each of these disciples had gained fame throughout the chaos.

This clearly demonstrated how extraordinarily high the requirements were to be chosen as a personal disciple of Dao Ancestor Void Sky.

If one could become a personal disciple of Dao Ancestor Void Sky, then being a mere six-star or seven-star Divine General would be trivial.

"I have comprehended 97% of the Void Sky Diagram!" Ye Tian exclaimed excitedly.

Originally, the difficulty should have increased as he neared the final stages of comprehension. However, three thousand years ago, he suddenly discovered that his soul had become incredibly solid, and his comprehension ability had skyrocketed.

This increase in basic comprehension, combined with the boost from his Super Enlightenment Talent, elevated his understanding to an extraordinary level.

Because of this, he was able to comprehend ninety-seven percent of the Void Sky Diagram in such a short time.

Towards the later stages of comprehending the Void Sky Diagram, it could temper the soul, triggering a soul transformation. This was something he had not understood at first.

Perhaps many in the Void Sky Hall were unaware of this; the only ones who truly knew were the personal disciples, and they certainly wouldn't reveal this secret.

After all, to others in the Void Sky Hall, the Void Sky Diagram seemed useless, and spending ages comprehending it was seen as a waste of time.

Moreover, once one reached the Destiny Realm, it became impossible to comprehend the Void Sky Diagram, which led to its secrets remaining undisclosed.

Additionally, Ye Tian believed that the soul-tempering effect of the Void Sky Diagram was merely a secondary benefit. Its true purpose likely lay in enhancing the entire physical body.

As for its exact utility, Ye Tian thought he would only understand once he comprehended one hundred percent of the Void Sky Diagram.

“The last three percent is the hardest to comprehend, but within five hundred years, I can fully understand it!” Ye Tian declared with confidence.

To fully focus on comprehending the Void Sky Diagram, Ye Tian even withdrew his third and fourth clones to avoid any issues with his soul that might prevent him from reaching complete comprehension.

At that moment, the Ancestral Stele transmitted a message.

“In ten thousand years, the Ancestral Stele Space will open!”

Ye Tian didn’t understand what the Ancestral Stele Space was, but he quickly learned about its mysteries from other Void Sky Hall disciples.

It turned out that the Ancestral Stele Space was a place filled with opportunities. Once inside, one would be surrounded by endless yuan qi, endless power of rules, and endless insights. In short, cultivating within the Ancestral Stele Space would lead to rapid strength improvement.

Some peak seven-star Divine Generals were waiting for the Ancestral Stele Space to open, hoping to break through to eight-star Divine Generals.

However, not all Divine Generals on the rankings could enter the Ancestral Stele Space. Only the top hundred ranked Divine Generals had the qualification.

Strictly speaking, a Divine General like Ye Tian had no chance of entering the Ancestral Stele Space.

But if Ye Tian, or any Divine General of his level, managed to defeat a Divine General in the top hundred, even through special means, they would still be counted among the top hundred and gain entry.

Thus, in the next ten thousand years, those Divine Generals close to the top hundred would undoubtedly become very competitive.

The other Divine Generals would just have to wait for the next opportunity.

Chapter 863: The Dao Ancestor's Direct Disciple!

“Perhaps this time, I might have a chance to enter the Ancestral Stele Space!” Ye Tian thought to himself.

However, he had to thoroughly comprehend the Void Sky Diagram and become a personal disciple of Dao Ancestor Void Sky. Only then would he have the opportunity to acquire the time-space type of Chaos Divine Ability. Once he mastered this divine ability and formed the embryonic form of the Great Dao of Time and Space, his strength would inevitably surge, giving him a chance to break into the top hundred of the Divine General Rankings.

Of course, it was only a chance, as the difficulty was akin to ascending to the heavens. Collecting his thoughts, Ye Tian began to fully comprehend the Void Sky Diagram.

Four years later.

Ye Tian finally fully comprehended the Void Sky Diagram.

At the moment he comprehended the Void Sky Diagram, a phantom of the Void Sky Diagram appeared above his head.

In the Void Sky Realm, a realm created by Dao Ancestor Void Sky and the headquarters of the Void Sky lineage.

In the Void Sky Hall within the Void Sky Realm.

Dao Ancestor Void Sky was imparting teachings to some personal disciples when his gaze suddenly pierced through countless spaces, looking at Ye Tian in the Grand Universe.

Sensing something, he smiled slightly and said, “You all have a new junior brother now!”

“Congratulations, Master!”

“Congratulations, Master!”

“Congratulations, Master!”

The personal disciples congratulated in unison.

They knew that Dao Ancestor Void Sky was not referring to an ordinary disciple but a personal disciple. Ordinary disciples did not have the qualifications to become their junior brother; only personal disciples did.

It was apparent that Dao Ancestor Void Sky, who had not accepted a personal disciple for countless ages, was about to take on another one.

A wisp of Dao Ancestor Void Sky’s consciousness traversed the boundless void, quickly reaching the outer edge of the Grand Universe and instantly entering its interior.

As long as this wisp of consciousness did not exert any power or affect any living beings within the Grand Universe, there would be no issues.

In the Grand Universe, in the Void Sky Hall.

Heavenly Monarch Peng Yu and several other Heavenly Monarchs were cultivating when they suddenly sensed an immensely powerful presence, waking them up in shock.

“Greetings, Master!”

The Heavenly Monarchs looked at the supreme void figure in the sky and bowed in unison.

It was evident that Dao Ancestor Void Sky's wisp of consciousness intentionally let the other disciples know. Otherwise, he could have silently entered Ye Tian's secluded chamber, and no one would have known.

However, accepting a personal disciple was a significant event for Dao Ancestor Void Sky, and each time it was celebrated with a grand ceremony in the Void Sky Realm.

Since Ye Tian was now in the Grand Universe and a native being of the universe, if he had not transcended, the Dao Ancestor wouldn't dare move him out of the universe, as it would endanger Ye Tian's life.

Although a grand ceremony for accepting a personal disciple couldn't be held, at the very least, an announcement was necessary, along with a formal apprenticeship ceremony within the Void Sky Hall.

"Summon all the disciples back!" commanded Dao Ancestor Void Sky.

"Yes!" responded Heavenly Monarch Peng Yu.

Soon, all the disciples of the Void Sky Hall emerged from their secluded chambers and gathered. The disciples outside the palace rushed back, except for those in special secret realms who couldn't return. Almost all the disciples were present.

Ye Tian naturally came out as well. Seeing Dao Ancestor Void Sky, he understood the reason.

When all the disciples had gathered, Dao Ancestor Void Sky announced, "Today, I intend to accept another personal disciple!"

"What? A personal disciple?"

The disciples of the Void Sky Hall were all shocked.

Others might not have understood, but Heavenly Monarch Peng Yu knew well how high the standards were for his master's acceptance of a personal disciple. In his view, no disciple had the fortune to become a personal disciple of Dao Ancestor Void Sky. Heavenly Monarch Dark Light was strong and talented, and although his cultivation level was lower, his strength was nearly on par with Peng Yu's. However, Heavenly Monarch Dark Light's master was a disciple of Dao Ancestor Void Sky, which meant by hierarchy, Dao Ancestor Void Sky couldn't accept Heavenly Monarch Dark Light as a personal disciple, as it would break the rules.

Thus, Dao Ancestor Void Sky's new personal disciple had to be chosen from among the nominal disciples or official disciples, with the highest possibility being among the official disciples. There were not too many official disciples, but there were quite a few.

"Who could it be?"

Heavenly Monarch Peng Yu and the other official disciples speculated among themselves.

Suddenly, Peng Yu thought of Ye Tian but quickly shook his head. Ye Tian had not made any progress for tens of thousands of years. With such talent, how could he have the qualifications to become a personal disciple of Dao Ancestor Void Sky? He even lagged behind some of the weaker juniors.

"Ye Tian, step forward!" Dao Ancestor Void Sky spoke again.

Ye Tian stepped forward, bowed, and said, "Master!"

"Ye Tian, today I accept you as my personal disciple. Because you are in the Grand Universe and cannot hold a grand ceremony, we will keep the apprenticeship simple here," said Dao Ancestor Void Sky.

"Thank you, Master!"

Ye Tian couldn't help but feel overjoyed. Although he speculated that Dao Ancestor Void Sky came to accept him as a personal disciple because he had comprehended the Void Sky Diagram, it was just a guess. Confirming it now filled him with immense excitement.

Following the apprenticeship rituals of the Void Sky lineage, Ye Tian performed the necessary rites. This included pledging to rules such as not betraying or dishonoring the master, though these rules

were mostly symbolic and couldn't truly bind a personal disciple. However, anyone who dared to break these rules would not be tolerated by Dao Ancestor Void Sky.

After the ceremony, the numerous disciples of the Void Sky Hall all addressed Ye Tian: "Greetings, Dao Child!"

"Dao Child" was the title given to Dao Ancestor Void Sky's personal disciples. Even Heavenly Monarch Peng Yu had to call Ye Tian "Dao Child" and could no longer address him as "Junior Brother." Only other personal disciples were qualified to call Ye Tian "Junior Brother."

To celebrate Dao Ancestor Void Sky accepting a new personal disciple, the Dao Ancestor gave a lecture for a day. This was a rare opportunity for the other disciples.

After the day ended, Dao Ancestor Void Sky led Ye Tian into a side hall.

"How can this be? Ye Tian actually became Master's personal disciple?"

Many in the Void Sky Hall couldn't accept it, especially Divine General Yutian. In terms of strength, he was a mid-stage seven-star Divine General, nearly stepping into the late stage, whereas Ye Tian was only a mid-stage six-star Divine General. Although Yutian was not a disciple of Dao Ancestor Void Sky, he still received attention and training from the Void Sky lineage. Jealousy! Indeed, Divine General Yutian was jealous! But he dared not oppose Dao Ancestor Void Sky's decision.

Peng Yu and the other official disciples were also puzzled, not understanding why Ye Tian had become a personal disciple. There were many ways to become a personal disciple of Dao Ancestor Void Sky, and comprehending the Void Sky Diagram was just one. Hence, the official disciples did not immediately think of the Void Sky Diagram because becoming a personal disciple through it was extremely rare. Most Dao Children achieved it through other means. Therefore, no one thought of the Void Sky Diagram.

Soon, the news that the Void Sky Hall had a new Dao Child spread, causing a stir throughout the Grand Universe.

In the side hall, Ye Tian and Dao Ancestor Void Sky were alone.

Dao Ancestor Void Sky looked at Ye Tian and smiled, “Disciple, are you curious about the Void Sky Diagram, its purpose, and why comprehending it allows you to become a personal disciple?”

“Yes, Master, I am very curious!” Ye Tian admitted.

...

Dao Child means someone who has comprehended the Dao (the Way) to a high degree and is like a senior disciple. Basically, similar to a core disciple.

Chapter 864: Void Sky Dao Body!

Dao Ancestor Void Sky gazed at Ye Tian and began to explain the origin of the Void Sky Diagram.

“The Void Sky Diagram was created by me after countless years of being a Dao Ancestor. It took a long time to create this supreme method. However, the Void Sky Diagram you have comprehended is just the foundation, but it is also extremely important. Only by fully understanding the Void Sky Diagram can you cultivate the true supreme method, which is the Void Sky Dao Body!”

“The Void Sky Dao Body?” Ye Tian questioned, puzzled.

Dao Ancestor Void Sky immediately elaborated on the Void Sky Dao Body.

The Void Sky Dao Body was a type of Dao Body he had created. In the universe, there were various physiques such as divine bodies, saint bodies, and even innate Dao bodies. However, these physiques were only somewhat notable in the universe and were quite ordinary in the chaos.

Yet, the Void Sky Dao Body was an incredibly powerful physique even within the chaos. Once one possessed the Void Sky Dao Body, their cultivation speed would multiply, and their combat power would soar.

For instance, a peak six-star Divine General could temporarily boost their strength and kill a weaker seven-star Divine General by activating the Void Sky Dao Body.

This highlighted the terrifying nature of the Void Sky Dao Body! Initially, increasing cultivation speed and combat power were just external manifestations of the Void Sky Dao Body. If it were only for these benefits, Dao Ancestor Void Sky wouldn't have considered it as a criterion for selecting his personal disciples.

Dao Ancestor Void Sky valued the Void Sky Dao Body because once it was formed, one could condense Dao patterns at the Earthly Venerable level. The more Dao patterns condensed, the stronger the potential, making it easier to achieve Harmony in the future.

Achieving Harmony was challenging because there was no fundamental point of convergence with the Dao. Thus, one needed to use the Ancestral Stele to forcibly open such a point to achieve Harmony.

However, if one could condense an innate Dao body and a large number of Dao patterns, they could directly form that point without the need for an Ancestral Stele, making it possible to achieve Harmony successfully.

Of course, this step was extremely difficult. The exact number of Dao patterns required was unclear even to Dao Ancestor Void Sky, as he had never cultivated the Void Sky Dao Body himself.

However, several of his personal disciples had successfully cultivated the Void Sky Dao Body. Although they couldn't create that point on their own, they easily found it with the help of the Ancestral Stele and achieved Harmony.

In other words, once the Void Sky Dao Body was cultivated, as long as one found an Ancestral Stele in the future, they could easily achieve Harmony. This was a secret known only to him and those disciples who had cultivated the Void Sky Dao Body.

This also explained why the Void Sky lineage had produced several Dao Ancestors, though other factions merely thought the Void Sky lineage had good fortune.

"I can become a Dao Ancestor."

Ye Tian previously hadn't been certain if he could become a Dao Ancestor. Despite his powerful copy talent, it merely provided many auxiliary abilities. Becoming a Dao Ancestor was not heavily dependent on talent.

Now that he knew the Void Sky Dao Body could help him become a Dao Ancestor, he couldn't help but feel excited.

“Disciple, the Void Sky Dao Body only greatly increases your chances of becoming a Dao Ancestor. Without personal effort, becoming a Dao Ancestor is still just an empty talk!” Dao Ancestor Void Sky said.

“Disciple understands!” Ye Tian agreed.

With a gesture, Dao Ancestor Void Sky sent a massive amount of information into Ye Tian's mind.

What appeared in his mind was the method to cultivate the Void Sky Dao Body. The core of this method was the rules and pathways of the Void Sky Diagram. Only those who fully comprehended the Void Sky Diagram could cultivate the Void Sky Dao Body. Otherwise, forcibly cultivating it would cause the body to be shattered by the rules.

“Remember, the Void Sky Dao Body should not be lightly passed on. The Void Sky Diagram, however, is fine.

If someone comprehends the Void Sky Diagram, you may take them as a disciple and teach them the Void Sky Dao Body!” Dao Ancestor Void Sky reminded.

“Understood!” Ye Tian replied gratefully.

Dao Ancestor Void Sky placed no restrictions on such a supreme method. This showed his magnanimous heart. If it were Ye Tian, he doubted he could be so generous.

However, Dao Ancestor Void Sky was an incredibly powerful existence among the Dao Ancestors and perhaps didn't care about the Void Sky Dao Body at all.

“Disciple, now that you are my personal disciple, in addition to inheriting the Void Sky Dao Body, you can also enjoy the privileges of a Dao Child. However, this is not the Void Sky Realm, so your status as a Dao Child won't grant you many benefits here.

Let's do this: I will find a way to send you a batch of resources to support your cultivation. If you have any other requests, feel free to ask.” Dao Ancestor Void Sky said.

Ye Tian hurriedly responded, “Master, I would like a Chaos Divine Ability related to time and space, as well as an innate origin item corresponding to it. I have discovered that after mastering a Chaos Divine Ability, I can condense the embryonic form of a Grand Dao.

Therefore, I wish to master a Chaos Divine Ability related to time and space, condense the embryonic form of the Grand Dao of Time and Space, and then use this embryonic form as a foundation to condense the embryonic form of the Chaos Grand Dao.”

“Disciple, have you already mastered a Chaos Divine Ability?” Dao Ancestor Void Sky was somewhat surprised.

This wisp of his consciousness was not particularly powerful and did not carry much strength; otherwise, the cosmic origin would not have allowed him to enter. As such, he couldn’t discern Ye Tian’s situation. If his true form were present, he would have immediately seen how many divine abilities Ye Tian had mastered.

Ye Tian immediately displayed the Ancient Origin Defense Divine Ability. A protective light in the form of an ancient bell enveloped his entire body, a manifestation of the Ancient Origin Defense Divine Ability.

“The Ancient Origin Defense Divine Ability—so you have indeed mastered a Chaos Divine Ability. Your approach is correct. You cultivate the Chaos Grand Dao, and using the Ancient Origin Defense Divine Ability as a foundation indeed affects your supreme foundation.

But there is one point you misunderstood.

You cultivate the Chaos Grand Dao, but your fundamental Grand Dao does not necessarily have to follow the Chaos Grand Dao.

I am not sure what fortuitous encounters you have had, but I know that you should be able to condense many embryonic forms of Grand Daos. Therefore, I recommend you pursue the Infinite Grand Dao.”

Dao Ancestor Void Sky said.

“Infinite Grand Dao?” Ye Tian was puzzled.

“Yes, the Infinite Grand Dao. This is not a single Grand Dao but countless kinds of Grand Daos.

Your Chaos Grand Dao is merely an incomplete version, composed of twelve attribute-based Grand Daos. Although the Dao gives birth to one, and one gives birth to ten thousand things,

if you only condense twelve Grand Daos, it is not considered a particularly powerful Grand Dao.

Do you know that in the chaos, some powerful True Ancestors have condensed dozens of complete Grand Daos?” Dao Ancestor Void Sky explained.

“What?” Ye Tian was shocked.

Dao Ancestor Void Sky continued, “Disciple, if you master the Void Sky Dao Body, you can engrave Dao patterns on it. Each Grand Dao represents a Dao pattern. If you condense the embryonic form of the Grand Dao of Time and Space, you can condense the Time and Space Dao Patterns on the Void Sky Dao Body. If possible, before you become a Destiny Realm Heavenly Monarch, try to condense as many embryonic forms of Grand Daos as possible. Do not limit yourself to twelve Grand Daos; you should involve yourself in other Grand Daos as well. The more Dao patterns you condense, the better.

For others, cultivating more Grand Daos is not beneficial—focusing on refining a few is the key.

But you are different. Your goal is to become a Dao Ancestor, while others’ goals are merely to become True Ancestors. For them, cultivating many Grand Daos is a disadvantage....”

Dao Ancestor Void Sky explained a lot, and Ye Tian gradually understood.

At this moment, he had found the most suitable path for himself.

Indeed, he could fully leverage his copy talent to condense numerous embryonic forms of Grand Daos, pushing the Void Sky Dao Body to an extremely terrifying level. By then, he might not even need the Ancestral Stele to achieve the position of Dao Ancestor.

Chapter 865: Time-Space Shift Technique!

“My disciple, if you desire the time-space Chaos Divine Ability and the corresponding innate origin artifact, then other resource rewards will be significantly reduced. It’s not that I am unwilling to give you more resources.

In reality, those resources are just ordinary items to me. However, I never show favoritism when it comes to rewarding my disciples. What you should receive is exactly what you will get,” Dao Ancestor Void Sky stated.

“Master, this disciple understands!” Ye Tian responded.

“Good. One year from now, that Chaos Divine Ability and the corresponding innate origin artifact, along with other Dao Child reward resources, will be delivered to the Grand Universe,” Dao Ancestor Void Sky said.

“Thank you, Master!” Ye Tian exclaimed excitedly.

With a flash, Dao Ancestor Void Sky departed.

After Ye Tian left the side hall, he was immediately surrounded by numerous disciples of the Void Sky Hall and many Heavenly Monarchs.

“Greetings, Dao Child!”

One by one, Divine Generals and Heavenly Monarchs welcomed him respectfully.

Later, Heavenly Monarch Peng Yu and others tried to probe Ye Tian about why he could become the personal disciple of Dao Ancestor Void Sky. However, Ye Tian revealed nothing.

Although it was well-known among the Void Sky lineage that comprehending the Void Sky Diagram could lead to becoming a personal disciple, there were too few who had actually done so. Ye Tian naturally would not disclose this, as it was one of his aces and secrets.

Thus, Ye Tian only mentioned his great talent and said nothing more.

At the Immortal Demon Race's base.

The Immortal Demon Race had long since merged. Although they had found a backer and barely survived in this era of the Grand Universe, the First Divine Lord and the First Demon Lord had both been promoted to Divine Generals. However, due to limited opportunities, they were still only one-star Divine Generals, akin to ants in the vast Grand Universe.

The news of Ye Tian becoming a Dao Ancestor's personal disciple quickly spread across various major forces in the universe, even reaching the Immortal Demon Race.

"The Divine General of Ten Thousand Laws actually became a Dao Ancestor's personal disciple!" The First Divine Lord and the First Demon Lord exclaimed in amazement.

Their current understanding was no longer as shallow as before; they naturally knew the significance of a Dao Ancestor.

In their eyes, a Destiny Realm Heavenly Monarch was already an unimaginable powerhouse, and it took countless Heavenly Monarchs to give birth to a True Ancestor. Among numerous True Ancestors, few could emerge as a Dao Ancestor.

It was said that the master of the Divine General of Ten Thousand Laws was a particularly powerful existence among Dao Ancestors, even having several Dao Ancestor disciples.

Being a personal disciple of a Dao Ancestor was an extraordinary status, rivaling that of some True Ancestors! Once, they had viewed Ye Tian as an equal, but now the gap had widened significantly. Ye Tian saw them as ants.

The Immortal Race had also had some minor conflicts with the Human Race. They had tried to confront Ye Tian, but fortunately, the situation never escalated to enmity. Otherwise, the Immortal Race might have ceased to exist by now.

Not only was the Immortal Demon Race shocked, but everyone who knew Ye Tian, including other Divine Generals, was equally astounded.

Although Ye Tian was strong, previously, they had only been slightly weaker than him. The difference in other aspects was not significant.

But now, Ye Tian had become the Dao Ancestor's personal disciple. His status and position had suddenly risen to the pinnacle of the Grand Universe.

War God Tower.

Goddess Yun Zi had just learned of Ye Tian's news and immediately summoned a Heavenly Monarch. This Heavenly Monarch was listed on the Heavenly Monarch Rankings, known for his immense power, and his name was Heavenly Monarch Zishan.

However, this Heavenly Monarch Zishan, revered by outsiders for his overwhelming strength, was actually her bodyguard.

Having a Heavenly Monarch from the Heavenly Monarch Rankings as a bodyguard clearly indicated the high status of Goddess Yun Zi in the War God Tower.

In fact, every personal disciple of a Dao Ancestor had bodyguards. Some top-tier Dao Ancestor disciples even had weaker True Ancestors as bodyguards.

However, True Ancestors couldn't enter the Grand Universe. Otherwise, the War God Tower might have really assigned a True Ancestor to guard Goddess Yun Zi.

"Heavenly Monarch Zishan, do you know anything about the Divine General of Ten Thousand Laws? Why was he suddenly accepted as a personal disciple by that Dao Ancestor? The standards for becoming a personal disciple of that Dao Ancestor are extremely high; they wouldn't just accept anyone," Goddess Yun Zi asked curiously.

"Your Highness, I am not too sure. There were rumors that the Divine General of Ten Thousand Laws hadn't made any progress in strength for tens of thousands of years. It now seems he was completing some kind of assessment. Having completed it, he gained the attention of that Dao Ancestor and thus earned the status of a personal disciple.

As for the specifics, I fear even the Heavenly Monarchs of the Void Sky Hall might not know," Heavenly Monarch Zishan replied.

“Most personal disciples of the Dao Ancestors arrived in the second wave. I came in the first wave, thinking I could seize the opportunity. I didn’t expect the Grand Universe to produce another personal disciple of a Dao Ancestor. This Dao Ancestor’s new disciple might be my competitor!” Goddess Yun Zi murmured.

Heavenly Monarch Zishan then laughed and said, “Your Highness, you jest. How could an ordinary Dao Ancestor’s disciple compare to you? The Dao Ancestor once said you have a ninety percent chance of becoming a Dao Ancestor yourself! With your talent and the Dao Body you are about to perfect, you even qualify to participate in the Ancestral Stele of this Grand Universe!”

Goddess Yun Zi shook her head, “Never underestimate any Dao Ancestor’s disciple. I have great opportunities, and so do others. If I look down on others, I won’t even know when I am surpassed.

Heavenly Monarch Zishan, keep a close eye on this new Dao Ancestor’s disciple. If you uncover any secret information, notify me immediately.”

“Yes, Your Highness!” Heavenly Monarch Zishan replied.

After becoming the personal disciple of the Dao Ancestor, Ye Tian didn’t flaunt his status. Instead, he quickly entered seclusion again.

This time, he intended to perfect the Void Sky Dao Body.

In the blink of an eye, a year passed.

On this day.

A reward was delivered to Ye Tian, personally brought by Heavenly Monarch Peng Yu and others. They wouldn’t dare to embezzle a personal disciple’s reward, unless they had a death wish.

After receiving the reward, Ye Tian eagerly opened it.

It contained a Chaos Divine Ability inheritance, an innate origin artifact, and some cultivation resources.

These cultivation resources were primarily meant to assist in cultivating the Profound Void Technique and the Void Sky Dao Body. Although cultivating the Void Sky Dao Body required resources, it didn't require too many.

Currently, Ye Tian valued the time-space Chaos Divine Ability inheritance the most. Its name was — the Time-Space Shift Technique! The Time-Space Shift Technique ranked 21st among the chaos divine abilities. The value of this Chaos Divine Ability inheritance was immeasurable, and the Time-Space Heart that aided in cultivating the Time-Space Shift Technique was incredibly precious. For a Heavenly Monarch proficient in time and space, it was a priceless treasure.

If Ye Tian hadn't become a personal disciple of the Dao Ancestor, he wouldn't have been able to purchase a Time-Space Heart, even with countless ages of accumulation.

“First, I won't cultivate the Time-Space Shift Technique. I must perfect the Void Sky Dao Body first. Then, when I cultivate the Time-Space Shift Technique and form the embryo of the Time-Space Grand Dao, I can inscribe two Dao patterns, further advancing the Void Sky Dao Body.” Ye Tian thought to himself.

Thus, he began to fully focus on cultivating the Void Sky Dao Body.

Chapter 866: Completion of the Void Sky Dao Body and Mastery of the Time-Space Transference Technique!

The Void Sky Dao Body was both a type of physique and a cultivation technique.

Ye Tian cultivated the Void Sky Dao Body, which required tempering his entire body step by step.

He had to temper his skin, bones, flesh, blood, tendons, and refine his internal organs, followed by tempering his soul. These steps felt similar to initial cultivation, but they fundamentally transformed his body according to the Void Sky Diagram's rules, forging the Void Sky Dao Body.

Each step required specific resources. Fortunately, Dao Ancestor Void Sky provided these resources, otherwise, he wouldn't have been able to complete the Void Sky Dao Body.

Ye Tian had become familiar with the technique over the past year, mastering it proficiently. Thus, with the resources at hand, he began the cultivation process, starting with tempering his skin.

Time slowly passed, and Ye Tian's progress was rapid. His skin, bones, flesh, tendons, and internal organs constantly underwent transformation.

In a blink of an eye, 300 years had passed.

On this day, Ye Tian completed the tempering of every part of his body for the Void Sky Dao Body, even finishing the tempering of his soul.

In an instant, a fusion force emerged throughout his body, and Void Sky Dao energy circulated within him, heralding a significant physical transformation.

At that moment, Ye Tian truly forged the Void Sky Dao Body.

His strength increased, his soul transformed, and even the divine force within his body began to evolve.

The only regret Ye Tian felt was that his true blood, which had been refined to one-eighth, was replaced. This new, special blood wasn't true blood, nor ordinary blood, but exclusive to the Void Sky Dao Body.

Ye Tian named this blood "Void Sky True Blood."

In reality, this blood didn't possess the characteristics of true blood, but its potency was in no way inferior to true blood.

With the completion of the Void Sky Dao Body, Ye Tian's power surged dramatically.

On the Ancestral Stele.

Initially, Ye Tian had fallen to 668th place on the Divine General Rankings. Now, his ranking skyrocketed.

He ascended to 192nd place: the Divine General of Ten Thousand Laws, reaching the peak of a six-star Divine General in an instant. Ye Tian's strength had advanced from the mid-six-star Divine General to the peak, astonishing everyone.

Instantly, many speculated that Ye Tian had mastered a groundbreaking secret technique, explaining why his strength had previously stagnated due to the technique's demands.

Now, with the technique perfected, his power surged to the peak of six-star.

Some even speculated that this secret technique was related to Ye Tian becoming a personal disciple. In the Void Sky lineage, there were indeed rumors of secret techniques that, once mastered, could make one a personal disciple.

This theory gained widespread acceptance.

With Ye Tian's power surge, many Divine Generals began to view him as a competitor. Given Ye Tian's talent and combat ability, if he advanced to a seven-star Divine General, he could definitely break into the top 100 of the Divine General Rankings.

If that were to happen, Ye Tian would enter the Ancestral Stele Space.

Consequently, several Divine Generals ranked in the 90s felt threatened.

After completing the Void Sky Dao Body, Ye Tian didn't leave seclusion but instead began cultivating the Time-Space Transference Technique.

The Time-Space Transference Technique was an immensely powerful Chaos Divine Ability for escaping. Once mastered, no one at the Divine General level could kill him.

To be precise, even some powerful Heavenly Monarchs wouldn't be able to capture him.

This technique ranked 21st among chaos divine abilities, and being a time-space Chaos Divine Ability, it was exceptionally powerful. How could someone at the Destiny Realm, without certain means, hope to capture him? In fact, even some lesser True Ancestors with limited abilities might not be able to catch him.

Of course, all this hinged on Ye Tian mastering the Time-Space Transference Technique.

In the following days, Ye Tian simultaneously cultivated the Time-Space Transference Technique and the Profound Void Technique.

After completing the Void Sky Dao Body, Ye Tian's speed in cultivating the Profound Void Technique increased significantly. Additionally, his master provided him with abundant resources, further accelerating his cultivation.

The sixth level of the Profound Void Technique advanced from the entry stage to the peak of the entry stage, progressing towards minor accomplishment of the sixth level.

Meanwhile, Ye Tian's combat power as a peak six-star Divine General gradually stabilized and began advancing towards the seven-star Divine General level.

Another 200 years passed, and Ye Tian's Profound Void Technique broke through to the major accomplishment realm of the sixth level. His strength finally completed the breakthrough, stepping into the early stage of a seven-star Divine General.

At this point, his ranking on the Divine General Rankings surged to 109th place and continued to improve slowly, poised to enter the top 100 at any moment.

As the day for the opening of the Ancestral Stele Space drew closer, challenges among the top 100 Divine Generals in the vast universe became increasingly frequent. Some thick-skinned Divine Generals even hid to avoid being challenged and losing their rank.

On this particular day, Ye Tian finally mastered the Time-Space Transference Technique.

The moment he mastered the technique, his rank soared to 94th on the Divine General Rankings, successfully placing him within the top 100.

"Only a few decades left. There's no time to condense the embryo of the Time-Space Grand Dao or inscribe Dao patterns. However, I've managed to break into the top 100 of the Divine General Rankings and qualify for the Ancestral Stele Space."

"Perhaps I can directly condense the embryo of the Time-Space Grand Dao in the Ancestral Stele Space, or even inscribe two Dao patterns, further boosting my strength!" Ye Tian thought.

With this resolve, he left seclusion.

His emergence caused a stir immediately.

The first challenge arrived swiftly.

“From Canglang Sea, Divine General Heavy Bone comes to challenge the Dao Child of Ten Thousand Laws!”

The Dao Child of Ten Thousand Laws was Ye Tian’s new title, a sign of respect. It was also acceptable to call him the Divine General of Ten Thousand Laws.

“Divine General Heavy Bone, it’s him!”

Several Divine Generals and Heavenly Monarchs of the Void Sky Hall frowned.

Canglang Sea was an ordinary large force without even a Dao Ancestor, only possessing one True Ancestor. However, Divine General Heavy Bone was quite extraordinary, being an early seven-star Divine General specializing in defense. His defensive power was terrifying, making it difficult for even mid-level seven-star Divine Generals to break through.

Divine General Heavy Bone’s only weakness was his weaker offensive power, which placed him at 102nd on the Divine General Rankings, just shy of the top 100, making him quite anxious.

No one expected him to target Ye Tian.

Outside the Void Sky Hall.

Divine General Heavy Bone, clad in defensive armor, stood in the void, shouting loudly.

This challenge to Ye Tian was a spur-of-the-moment decision. Ye Tian had just broken into the top 100, making him an appealing target.

Of course, Chonggu wasn’t foolish; he challenged Ye Tian because he felt confident.

He admitted that Ye Tian's talent was far superior to his own and that Ye Tian's strength had advanced rapidly. However, Chonggu believed that Ye Tian might not be stronger than him at the moment.

In his view, Ye Tian relied on some secret technique to attain his current strength, and he likely had weaknesses in other areas. If Ye Tian's strength lay solely in his offensive power, and other aspects were weak, Chonggu felt confident in defeating him.

After all, his defense was invincible, unafraid of Divine Generals who specialized in offensive power.

Suddenly, a figure appeared before Divine General Heavy Bone, followed by a group of Divine Generals and Heavenly Monarchs.

This person was Ye Tian!

"You want to challenge me?" Ye Tian stared at Divine General Heavy Bone and asked.

Chapter 867: Divine General Heavy Bone Defeated!

"That's right!" Divine General Heavy Bone stared at Ye Tian, speaking in a deep voice.

"Sure, but not just anyone can challenge me. If you want to challenge me, you need to add some stakes.

If you win, I'll give you 100 Dao Coins. If I win, you give me 100 Dao Coins. How about it?" Ye Tian smiled as he spoke.

A Dao Coin was a considerable amount, causing the other Divine Generals to be shocked.

This was no small sum; most Divine Generals only had a few Dao Coins to their name, and those with less wealth sometimes had just one Dao Coin.

A bet of one Dao Coin would even make a Destiny Realm expert feel the pinch! Divine General Heavy Bone frowned. As a seven-star Divine General, he held a high position in Canglang Sea and had numerous opportunities, thus possessing considerable wealth. He could afford 100 Dao Coins.

However, for him, 100 Dao Coins were still a significant fortune. If he won, he would profit greatly; if he lost, it would be a heavy loss.

This was undoubtedly a high-stakes gamble! Should he bet? Divine General Heavy Bone hesitated. Although he was confident in defeating Ye Tian, he feared the slim chance of failure. The fact that Ye Tian proposed the bet indicated that he had considerable confidence. However, if he didn't bet, he wouldn't be able to challenge Ye Tian today and might even be ridiculed by others.

“Fine, I'll bet!”

Divine General Heavy Bone agreed.

In front of the Void Sky Hall.

The other Divine Generals and Heavenly Monarchs spread out, while Heavenly Monarch Peng Yu and others set up a barrier for Ye Tian and Divine General Heavy Bone to spar, preventing excessive destruction.

Otherwise, the area would be obliterated by their battle.

Inside the barrier.

Ye Tian and Divine General Heavy Bone locked eyes before engaging in combat.

Divine General Heavy Bone activated a great divine ability, his body becoming encased in black bones, drastically increasing his defensive power.

Immediately, a black bone mace appeared in his hand.

With a swift movement, Divine General Heavy Bone swung the mace at Ye Tian.

In an instant.

Boom!!!! The void shattered, and terrifying power surged forth.

At that moment, Ye Tian also swung his saber, displaying the might of a seven-star Divine General.

In their first exchange, Divine General Heavy Bone remained unmoved, his powerful physical defense nullifying the impact. Though Ye Tian hadn't used his Void Sky Dao Body, it naturally obliterated the force of the blow.

In the next moment, the two truly clashed. Their speeds were incredibly fast, colliding every moment.

Divine General Heavy Bone, despite appearing clumsy, wasn't slow at all. Although Ye Tian didn't use his Eternal Light Divine Ability, his speed wasn't lacking either. With his Void Sky Dao Body, he seemed innately swift, reaching the extreme.

“Great Immortality Technique!”

“Great Destruction Technique!”

Ye Tian unleashed his true strength.

These two great divine abilities didn't significantly increase his attack power, but his combat capabilities soared.

No matter how Divine General Heavy Bone's attacks landed, Ye Tian remained unaffected. The Great Immortality Technique allowed him to ignore such attacks, while the wounds inflicted by the Great Destruction Technique were not easily healed.

Gradually, Divine General Heavy Bone started to weaken.

“Great Immortality Technique, Great Destruction Technique!”

Divine General Heavy Bone's eyes were filled with shock and disbelief.

These were among the top 100 of the Three Thousand Great Divine Abilities. Any Divine General mastering just one would be the envy of countless Divine Generals and Heavenly Monarchs.

However, Ye Tian not only mastered these techniques but also achieved mastery in both, which marked one of his significant progressions over the years.

On the Void Sky Hall's side.

Heavenly Monarch Peng Yu's pupils constricted in disbelief.

"The Dao Child of Ten Thousand Laws actually mastered both the Great Immortality Technique and the Great Destruction Technique, and he just displayed the Eternal Light Divine Ability as well. All of these are incredibly powerful divine abilities. How did he do it?" Heavenly Monarch Peng Yu was exceedingly curious.

After all, Ye Tian was a native life form of the Grand Universe and had never entered the Chaos. Achieving mastery of so many top-tier great divine abilities within the Grand Universe alone was an extraordinary testament to his talent.

No, it should be said his opportunities were truly remarkable! Heavenly Monarch Peng Yu had also mastered some great divine abilities, even some from the Chaos, but none of them were as highly ranked or powerful as the Great Immortality Technique and the Great Destruction Technique.

"Heavy Bone Body!"

Divine General Heavy Bone also went all out, transforming his body into a skeleton in an instant. This was his Heavy Bone Body, channeling all his strength into his bones, greatly enhancing his combat power.

However, even with this form, he couldn't withstand Ye Tian's powerful divine abilities.

As time passed, Divine General Heavy Bone's skeletal body began to crack.

On the brink of defeat, Divine General Heavy Bone conceded.

“Dao Child of Ten Thousand Laws, I admit defeat!” Divine General Heavy Bone said despondently.

Admitting defeat meant not only losing face but also forfeiting 100 Dao Coins, a tremendous loss. However, if he didn’t concede, Ye Tian might very well beat him to death! He now had a clear understanding of Ye Tian’s strength.

Although Ye Tian ranked only 94th on the Divine General Rankings, even a Divine General ranked 89th, who might be slightly stronger in combat, could potentially be worn down to death by Ye Tian.

Divine General Heavy Bone deeply regretted challenging Ye Tian. Suffering such severe injuries would take a long time to fully recover from, and with the Ancestral Stele Space about to open, he wouldn’t have enough time to recuperate and challenge again.

This meant that he had no chance of entering the Ancestral Stele Space this time.

“Divine General Heavy Bone, 100 Dao Coins, hand them over!” Ye Tian demanded seriously.

Divine General Heavy Bone, unable to refuse, took out dozens of Dao Coins from his storage space, supplemented with some chaos spirits, treasures, resources, and ores, eventually amassing items worth 100 Dao Coins, which he handed over to Ye Tian.

Ye Tian examined the items, estimated their value, and, upon confirming they equaled 100 Dao Coins, accepted them.

“Divine General Heavy Bone, you’re welcome to challenge me anytime!” Ye Tian laughed heartily.

Divine General Heavy Bone hurriedly turned and left, not daring to linger any longer.

Soon, news of Divine General Heavy Bone’s defeat spread but didn’t cause much of a stir.

After all, Ye Tian’s ranking was higher than Divine General Heavy Bone’s, and not just by one position, so it was expected that he would win.

However, those Divine Generals and Heavenly Monarchs who understood the battle's details truly recognized Ye Tian's terrifying prowess.

In this battle, Ye Tian had revealed three great divine abilities, all belonging to the Three Thousand Great Divine Abilities.

Decades passed in a flash.

On this day, the Ancestral Stele Space opened.

Chapter 868: Entering the Ancestral Stele Space!

Boom!!! The Ancestral Stele trembled, and a portal appeared above it.

This portal served as the entrance to the Ancestral Stele Space. It existed between illusion and reality; only a True Ancestor of great ability could even touch it.

Some Earthly Venerables who were unaware of the nature of the Ancestral Stele Space attempted to enter the portal. However, they passed through it without actually entering the space, as if they were moving through air.

At that time, a Divine General had explained, "It's useless. Only those in the top hundred of the Divine General Rankings can pass through the portal and enter the Ancestral Stele Space. To others, the Ancestral Stele Space doesn't exist at all!"

Some Earthly Venerables, thinking it was an opportunity, felt immensely disappointed upon learning the truth.

Swoosh, swoosh, swoosh!!! The top hundred Divine Generals arrived one by one. Each received the admiration and envy of countless Divine Generals.

Before long, Goddess Yun Zi arrived, causing a commotion.

Compared to before, Yun Zi's strength had skyrocketed. She had already reached mid-level seven star power, ranking 32nd on the Divine General Rankings.

Most seven-star Divine Generals were in the early stages, and the gap between early and mid seven star was substantial. Someone like Ye Tian, who had just entered the early seven star stage, ranked 94th, not particularly high, but his combat strength exceeded his ranking.

Though Yun Zi ranked 32nd, she was a personal disciple of a Dao Ancestor and naturally had hidden cards. Even the top twenty Divine Generals dared not ignore her.

Those truly knowledgeable about Dao Ancestor's personal disciples dared not offend or challenge them lightly. A Divine General like Heavy Bone, with no significant backing, was foolish for challenging Ye Tian.

Heavy Bone's force, Canglang Sea, was merely an ordinary major power, with only one True Ancestor, and not a very powerful one at that. He had no concept of the terror of a disciple directly taught by a Dao Ancestor.

Shortly after Yun Zi arrived, Ye Tian appeared as well.

At this moment, Yun Zi's gaze turned towards Ye Tian, seemingly trying to see through him.

But she couldn't see through Ye Tian, and Ye Tian couldn't see through Yun Zi either. He only knew about Yun Zi's talent, which wasn't a big secret, but the divine abilities, hidden cards, and treasures she cultivated were the real secrets.

"I'm probably not her match at all!" Ye Tian admitted to himself.

After all, Yun Zi was also a personal disciple of a Dao Ancestor, a genuine one at that, taught personally by the Dao Ancestor. Her hidden cards were beyond his imagination.

Moreover, Yun Zi had been a personal disciple for a long time, making her anything but simple.

Ye Tian understood his own limitations. Although he was also a personal disciple, he couldn't enjoy many benefits in the vast universe, having too few hidden cards.

Furthermore, he only became a personal disciple thanks to Yun Zi's Super Enlightenment Talent.

Strictly speaking, Yun Zi had essentially created him.

“Dao Child of Ten Thousand Laws, hello!” Yun Zi greeted him proactively.

“Goddess Yun Zi, you’re too polite!” Ye Tian responded with a slight smile.

“Dao Child of Ten Thousand Laws, it’s said that you ascended from mid-level six star to peak six star in an instant, and then quickly to early seven star. How did you manage that?”

Yun Zi’s eyes flashed with a purple light as she spoke in an incredibly gentle tone.

In an instant, Ye Tian felt his soul tremble, almost compelling him to reveal his secrets.

But he quickly snapped out of it, hastily saying, “Nothing special, just high talent!”

However, inwardly, he was extremely shocked.

He suspected Yun Zi had just used some kind of charm divine ability. If he hadn’t cultivated the Void Sky Dao Body, which transformed his soul, he might not have been able to resist this charm divine ability. Even if he wasn’t completely charmed, he would have inadvertently revealed his secrets, which would have been disastrous.

Seeing her charm divine ability fail, Yun Zi wasn’t surprised. In her view, this was completely normal. If it had succeeded, it would have meant Ye Tian, this Dao Child, was too incompetent.

Their brief exchange wasn’t enough to create a deep enmity.

Although Ye Tian felt a bit annoyed, he quickly let it go. She had merely tested him, and it would have been a sign of a poor mindset to become truly angry.

If his strength far exceeded Yun Zi’s, he wouldn’t mind teaching her a lesson. But given that he was currently not as strong as Yun Zi, he decided not to seek trouble.

“Dao Child of Ten Thousand Laws, I’ll head in first. If we have the opportunity, we can exchange insights in the future!” Yun Zi said before flying into the Ancestral Stele Space.

Ye Tian smiled slightly and then followed her inside.

The Ancestral Stele Space seemed boundless, but in reality, it wasn’t very large.

However, the yuan qi here was incredibly dense, with endless yuan qi, endless rules, endless insights, all of which were not just legends but reality.

Upon entering, Ye Tian immediately felt his body rejoicing, highlighting what a treasure this place was.

The Ancestral Stele Space was divided into numerous smaller spaces, each allowing only one person to enter. Once someone entered a small space, no one else could intrude.

This design prevented interruptions during cultivation and comprehension, which could otherwise lead to wasted efforts.

According to legend, the Ancestral Stele Space opened once every thousand years. Time-based talents couldn’t be used here; one could only comprehend according to the space’s time.

After a thousand years, the Ancestral Stele Space would close, and everyone would be expelled. This rule of the space was inviolable.

Yun Zi chose a small space, entering it to begin her cultivation and comprehension.

Ye Tian also chose a small space, deliberately staying far from Yun Zi to prevent her from spying on his secrets.

Inside the small space, Ye Tian focused on three tasks simultaneously. One part of his mind comprehended the Profound Void Technique, another part cultivated the Void Sky Dao Body, and the third part worked on understanding the Grand Dao of Time and Space, attempting to condense its embryonic form.

Boom!!!! Endless insights enveloped Ye Tian, and endless yuan qi surged into his body, helping him refine his physical form and the Void Sky Dao Body.

In this environment, Ye Tian's progress was incredibly rapid.

Originally, Ye Tian estimated that condensing the embryonic form of the Grand Dao of Time and Space would take at least a hundred thousand years. But now, he felt he could achieve this within a few hundred years, laying the supreme foundation for his endless Grand Dao.

Moreover, he even hoped to inscribe two Dao patterns during his time in the Ancestral Stele Space.

Chapter 869: Ranked 19th on the Divine General Rankings!

As time passed, every Divine General in the Ancestral Stele Space diligently cultivated, not wanting to waste a single moment.

For them, the Ancestral Stele Space represented a significant opportunity, a true chance of a lifetime.

This was especially true for the peak seven-star Divine Generals, for whom the Ancestral Stele Space provided the opportunity to ascend to eight-star Divine Generals.

Attempting to break through to an eight-star Divine General in the outside world was exceedingly difficult. Even within the chaos, opportunities for a peak seven-star Divine General to advance to eight-star were extremely rare.

While seven-star Divine Generals were uncommon in the chaos, some major factions had a few. However, reaching the level of eight-star Divine General was exceptionally challenging.

Even in factions with Dao Ancestors, only personal disciples and the top-tier Divine Generals could hope to become eight-star Divine Generals, highlighting the immense difficulty of such an achievement.

Therefore, entering the Ancestral Stele Space this time was a stroke of luck for them, perhaps their only chance.

If they couldn't break through to the eight-star Divine General rank within the Ancestral Stele Space, they would have to aim to become Heavenly Monarchs of the Destiny Realm instead.

In the blink of an eye, sixty years had passed.

Ye Tian opened his eyes and glanced around, discovering that Goddess Yun Zi had already broken through, becoming a late-stage seven-star Divine General. Her power had increased rapidly.

In contrast, his own strength seemed to have not advanced as quickly. He hadn't even reached the peak of the early seven-star stage, but he was still much stronger than when he first entered.

For instance, his Profound Void Technique had reached the perfected state of the sixth layer, bringing him close to the seventh layer.

However, his true achievement lay in the embryonic form of the Grand Dao. He was on the verge of forming this embryonic Grand Dao. Once he condensed the embryonic form of the Time-Space Grand Dao, his strength would surge dramatically, though he wasn't sure exactly how much it would increase.

"Let's begin!"

With everything ready, Ye Tian prepared to condense the embryonic form of the Time-Space Grand Dao.

Within his inner cosmos.

The Chaos Grand Dao Origin Pearl emerged within Ye Tian, starting to evolve the Grand Dao. Endless origin power flowed out, gradually solidifying the Grand Dao.

This step could be performed in the outside world, but it would attract too much attention. Thus, Ye Tian chose to evolve it internally, with the barrier of a small space preventing other Divine Generals from knowing he was already condensing the embryonic Grand Dao.

"The embryonic Grand Dao must reach a length of one thousand meters to be considered fully condensed."

Typically, the embryonic Grand Dao was one hundred meters wide, but the Time-Space Grand Dao, being a fusion of two Grand Daos, meant its embryonic form would be two hundred meters wide.

Boom!!!! The broad Grand Dao began to condense under the power of the origin, though it remained very unstable initially, as its length was only a few dozen centimeters.

As Ye Tian continued to condense it, the length of the embryonic Grand Dao steadily increased.

One meter! Ten meters! One hundred meters! As time passed, the length of the embryonic Grand Dao grew, becoming increasingly stable.

After several decades, the embryonic Grand Dao finally reached one hundred meters.

Simultaneously, the embryonic Grand Dao became completely stable.

As the embryonic Grand Dao stabilized, Ye Tian's soul resonated with it, gradually enhancing in power and becoming stronger and stronger.

Moreover, his inner cosmos began to expand, seemingly to accommodate the embryonic form of the Grand Dao.

Additionally, Ye Tian's divine force also started to undergo a transformation.

Boom!!! The Profound Void Technique instantly broke through its bottleneck, advancing to the seventh layer. This breakthrough led to Ye Tian's strength surging once more, propelling him into the mid-stage of the seven-star Divine General realm. He didn't just reach the mid-stage but directly attained the peak of the mid-stage, just one step away from becoming a late-stage seven-star Divine General.

Such a significant leap in strength wasn't merely due to the breakthrough of the Profound Void Technique; it was largely due to the condensation of the embryonic Grand Dao.

The embryonic Grand Dao provided a tremendous boost to his strength, indicating that Ye Tian had surpassed other Divine Generals, stepping into a new realm akin to those Heavenly Monarchs on the path to becoming True Ancestors.

At the level of a Divine General, condensing an embryonic Grand Dao was nearly impossible. Only those who reached the Destiny Realm would attempt to condense it, a process that could take ages. Some peak Destiny Realm Heavenly Monarchs with insufficient talent couldn't even condense the embryonic Grand Dao.

Thus, Ye Tian had already taken a significant lead over others.

"There's also the Dao patterns. Once I engrave the Dao patterns of time and space, my Void Sky Dao Body will transform, and my strength will soar again. I might even reach the battle power of a late-stage seven-star Divine General!"

Ye Tian thought to himself.

Although this increase in strength was astonishing, he was now a personal disciple of a Dao Ancestor. No one dared to explore his secrets or question him, so Ye Tian didn't hesitate and began engraving the Dao patterns.

The Dao patterns engraved on his Void Sky Dao Body were a combination of the power of the Grand Dao and origin power. With the help of the embryonic Grand Dao, these marks, corresponding to the rules of the Void Sky Dao Body, allowed it to grow continuously.

Of course, at his current level, he couldn't fully comprehend the Void Sky Dao Body and the Dao patterns, so he could only cultivate step by step.

Ye Tian started by engraving the Space Dao Pattern. In the environment of the Ancestral Stele Space, the engraving process was swift. His comprehension had increased to an unimaginable level, otherwise, engraving the Space Dao Pattern alone would have taken an extremely long time.

Ten years! A hundred years! A thousand years! Due to his inexperience in engraving Dao patterns, Ye Tian took 2520 years to successfully engrave the Space Dao Pattern onto his Void Sky Dao Body.

As the Dao pattern formed, a trace of it appeared on Ye Tian's forehead, visible only when the Void Sky Dao Body was fully activated. Without fully activating the Void Sky Dao Body, no one could detect this mark.

With the formation of the Dao pattern, the Void Sky Dao Body began to frantically absorb the yuan qi in the space. Ye Tian also brought out some resources to aid in the cultivation of the Void Sky Dao Body, accelerating its transformation.

As the Void Sky Dao Body transformed, Ye Tian's strength and entire being improved. However, this improvement wasn't too exaggerated, as it was just one Dao pattern.

After a long time, the transformation concluded, and Ye Tian began to condense the second Dao pattern—the Time Dao Pattern.

This time, he engraved the mark on the back of his head, corresponding to the Space Dao Pattern.

Even though the second Dao pattern was different, Ye Tian was more experienced. It took him only 200 years to completely engrave the Time Dao Pattern, further enhancing the Void Sky Dao Body significantly.

At this moment, Ye Tian's strength naturally surged, reaching the battle power of a late-stage seven-star Divine General.

On the Divine General Rankings.

Ye Tian, who had originally been ranked 94th, had now risen to 19th! Outside.

Countless Divine Generals and Heavenly Monarchs were stunned to see Ye Tian rise to 19th on the Divine General Rankings in just a few thousand years, finding it hard to believe.

Even more astonishing was that Ye Tian had surpassed Goddess Yun Zi, who was now ranked 20th! Yun Zi was also a personal disciple of a Dao Ancestor and not an ordinary one. Her strength had previously far exceeded Ye Tian's, but now he had overtaken her in a short time.

This demonstrated the terrifying extent of Ye Tian's talent! Those who had previously doubted Ye Tian's qualification to become a personal disciple of a Dao Ancestor now had to accept it.

Chapter 870: Three Thousand Thunder Movements!

Whoosh, whoosh, whoosh! The top hundred Divine Generals on the Divine General Rankings were teleported out of the Ancestral Stele Space one by one.

Originally in the midst of their cultivation, these Divine Generals sighed and lamented the limited time they had. If possible, they would have liked to cultivate in the Ancestral Stele Space for millions of years, but that was clearly impossible.

After the top hundred Divine Generals emerged, they looked at the Divine General Rankings on the Ancestral Stele, noticing that the rankings had undergone significant changes.

Originally, Divine General Lifeless had held the first position, but now he had dropped to fourth. At this moment, Divine General Lifeless still remained at the peak of the seven-star Divine General stage. Clearly, during the ten thousand years in the Ancestral Stele Space, he had not broken through his bottleneck, indicating that he had reached his limit and could no longer improve.

Everyone could see the despondency on Divine General Lifeless's face.

Many Divine Generals knew him well. He was an ancient Divine General who had lived for an incredibly long time and didn't have much time left. This time, entering the Grand Universe, he had luckily advanced from the late seven-star stage to the peak of the seven-star stage, which was a significant improvement, but he couldn't advance any further.

Of course, compared to ten thousand years ago, Divine General Lifeless's strength had still improved greatly. After all, not all peak seven-star Divine Generals were equal. Even if an ordinary peak seven-star Divine General's strength doubled, they still couldn't compare to an eight-star Divine General.

The three Divine Generals ranking ahead of Divine General Lifeless were all eight-star Divine Generals. The one ranked first was the Divine General Chenjing, who had been among the top few before.

The Divine General ranked second was the Divine General Desolate Sword, who had consistently held the second position on the Divine General Rankings.

Ranked third was the Divine General Sun Shot, known for his archery skills. He was a relatively young Divine General whose strength had been rapidly improving. Among all the Divine Generals, his talent was second only to Goddess Yun Zi.

This time, he wasn't disappointed, advancing to the early eight-star stage and still having potential for further growth.

Goddess Yun Zi glanced at the Divine General Rankings and was startled and incredulous to see that Ye Tian ranked ahead of her, having surpassed her.

She knew how much she had improved in the Ancestral Stele Space, almost to the point of being reborn. Yet, even so, she had been surpassed by Ye Tian.

She remembered that before entering the Ancestral Stele Space, she was ranked 32nd on the Divine General Rankings, while Ye Tian was ranked 94th.

Now, she was ranked 20th, and Ye Tian was ranked 19th.

What an astonishing improvement! Becoming a seven-star Divine General meant one was no ordinary person; each was a genius. After reaching the seven-star stage, every step of advancement was extremely difficult, yet Ye Tian had advanced so much, which was simply unreasonable.

"The Dao Child of Ten Thousand Laws truly lives up to being the personal disciple of the Transcendent Dao Ancestor. Such talent!" Goddess Yun Zi praised.

"Goddess Yun Zi overpraises me. This is just a temporary success. With Goddess Yun Zi's talent, you might soon surpass me again!" Ye Tian replied with a smile.

"Is that so?" Goddess Yun Zi smiled. From her laughter, it was clear she was confident in herself and didn't really believe Ye Tian had truly surpassed her.

Afterward, the Divine Generals gradually left the area.

Ye Tian also returned to the Void Sky Hall.

Upon his return, many Divine General-level disciples looked at Ye Tian with eyes full of admiration. To them, Ye Tian's strength had increased at an astonishing pace. In such a short time, he had made it into the top twenty of the Divine General Rankings. Given more time, he could very well become the first on the list.

“Hahaha, congratulations to the Dao Child of Ten Thousand Laws for ranking 19th on the Divine General Rankings, greatly enhancing the prestige of our Void Sky Hall!” Heavenly Monarch Peng Yu appeared, offering his congratulations.

“Senior Brother Peng Yu, you're too kind!” Ye Tian still addressed Heavenly Monarch Peng Yu as Senior Brother. Heavenly Monarch Peng Yu hurriedly said he did not dare to accept the title, but Ye Tian did not change his manner of address. After all, he was just a Divine General, while Heavenly Monarch Peng Yu was a true Heavenly Monarch, and a very powerful one at that. Ye Tian dared not truly place his status above Heavenly Monarch Peng Yu.

In the hall of Void Sky Hall, Ye Tian conversed with Heavenly Monarch Peng Yu and several other Heavenly Monarchs.

Suddenly, Ye Tian asked, “Senior Brothers, do you know how to obtain the Chaos Divine Ability inheritance?”

“Chaos Divine Ability?” Heavenly Monarch Peng Yu was surprised. “Dao Child, our Void Sky faction has quite a few Chaos Divine Abilities, but this is not the Void Sky Realm. If you want to obtain the inheritance of a Chaos Divine Ability, it would be quite troublesome. Moreover, I do not recommend you study Chaos Divine Abilities. The cultivation of Chaos Divine Abilities is too difficult, and you should have already obtained one or two Chaos Divine Abilities from our master. There's no need to study other Chaos Divine Abilities and waste time.”

Heavenly Monarch Black Armor also spoke up, “Dao Child, with your talent, you could easily advance to an eight-star Divine General, or even a nine-star Divine General. If you go study Chaos Divine Abilities and seek out supreme treasures to enhance and merge your talents, you might not satisfy the conditions for cultivating Chaos Divine Abilities even after a long time, wasting precious years. In the era of our master, there was once a Dao Child who was obsessed with Chaos Divine Abilities, but his achievements were not even as good as the top official disciples. Dao Child, you must not waste time on Chaos Divine Abilities.”

Seeing the Heavenly Monarchs' advice, Ye Tian smiled and said, “Senior Brothers, everyone has their own path to walk. My path has already been determined, and Master also agreed to let me

study Chaos Divine Abilities. However, I cannot contact Master proactively, and I must rely on myself. Therefore, I have to seek out Chaos Divine Abilities on my own.”

Since Ye Tian had said this, the Heavenly Monarchs naturally stopped advising against it.

Heavenly Monarch Peng Yu said, “Dao Child, I do have a Chaos Divine Ability inheritance, but I do not have the corresponding innate origin item. However, this Chaos Divine Ability inheritance is very valuable, and if you want it, you must offer something of equal value.”

The other Heavenly Monarchs shook their heads, indicating that they did not have any Chaos Divine Abilities. They knew they couldn’t cultivate Chaos Divine Abilities, so they saw no need to collect them. Furthermore, the Chaos Divine Abilities of the Void Sky faction could not be taught, essentially rendering them unavailable.

“Senior Brother Peng Yu, what Chaos Divine Ability do you have?” Ye Tian asked.

“One of the Three Thousand Chaos Divine Abilities, ranked 102nd: the Three Thousand Thunder Movements. It is a body technique divine ability, suitable for combat but not for long-distance travel,” Heavenly Monarch Peng Yu replied.

Hearing this, Ye Tian was instantly delighted. This was indeed a Chaos Divine Ability he wanted! After discussing with Heavenly Monarch Peng Yu, he learned that this Three Thousand Thunder Movements contained the Great Dao of Thunder and the Great Dao of Speed. Thunder was one of the twelve attribute Great Daos.

Although Ye Tian aimed to condense the Infinite Great Dao, he would start with the twelve attribute Great Daos and gradually form the other Great Dao embryos. The embryo of the Great Dao of Thunder was fully qualified to be his third Great Dao embryo.

Now, the only challenge was how to trade for this Chaos Divine Ability from Heavenly Monarch Peng Yu.
