

Your Talent is Mine

#Chapter 891: Three Major Limit Divine Abilities, Late-Stage Nine-Star Divine General - Read Your Talent is Mine Chapter 891: Three Major Limit Divine Abilities, Late-Stage Nine-Star Divine General

Chapter 891: Three Major Limit Divine Abilities, Late-Stage Nine-Star Divine General

TL: Etude

In the days that followed, besides helping the Human Race develop, Ye Tian spent all his time in secluded cultivation.

Although the Human Race was weak, with Ye Tian as their ally, it was akin to having the Void Sky Hall as their backing. Thus, they thrived comfortably in the vast universe, producing countless Earthly Venerables, and one by one, Divine Generals began to emerge.

Furthermore, the Human Race gave birth to several Heavenly Monarchs, though they were the weakest of the Heavenly Monarchs.

Ye Tian's wife, Xiao Yue, and his sister, Ye Yu, having no hope of transcendence, used Ye Tian's vast resources to become four-star Divine Generals. Afterward, they started to break through to the Destiny Realm.

With Ye Tian's help, the two of them had almost a hundred percent success rate, achieving breakthroughs and becoming Destiny Realm Heavenly Monarchs.

In the blink of an eye, a hundred thousand years passed.

At this moment, Ye Tian had successfully mastered the ten Chaos Divine Abilities one by one, forming the embryonic form of the Grand Dao, making his foundation even stronger and more stable.

"Next, I'll start inscribing Dao patterns to make the Void Sky Dao Body even stronger!" Ye Tian murmured.

Originally, he had inscribed 22 Dao patterns. Then, he began to inscribe the 23rd Dao pattern.

Under the guidance of Dao Ancestor Void Sky, Ye Tian became more adept at inscribing Dao patterns. Previously, inscribing a Dao pattern took ten thousand years, but now it only took three thousand years to inscribe one successfully.

Through Ye Tian's relentless efforts, one Dao pattern after another was successfully inscribed.

The 23rd Dao pattern! The 24th Dao pattern! The 25th Dao pattern! The 26th Dao pattern!...

Each successful inscription of a Dao pattern increased Ye Tian's strength. With the addition of the ten embryonic forms of the Grand Dao, Ye Tian's boundless embryonic forms of the Grand Dao became stronger, thus his strength increased rapidly, nearing the mid-stage nine-star Divine General level.

When Ye Tian inscribed the 30th Dao pattern, the Void Sky Dao Body underwent a major transformation.

At that moment, Ye Tian suddenly had an epiphany.

His Void Sky Dao Body had reached the minor accomplishment realm! The Void Sky Dao Body originally had no entry-level or minor accomplishment realms; mastering the Void Sky Dao Body was considered entry-level. However, others couldn't inscribe as many Dao patterns as he could, so they remained at the entry level, unaware of the minor accomplishment realm.

But Ye Tian now knew that inscribing 30 Dao patterns marked the minor accomplishment of the Void Sky Dao Body.

With the minor accomplishment of the Void Sky Dao Body, Ye Tian's strength surged, instantly advancing to the mid-stage nine-star Divine General level.

In the War God Tower.

Goddess Yun Zi had just advanced to the late eight-star Divine General level and was very happy. Suddenly, she received news about Ye Tian.

"The Dao Child of Ten Thousand Laws has advanced to the mid-stage nine-star Divine General!!!!"

Goddess Yun Zi couldn't believe it.

A mid-stage nine-star Divine General was a rarity in the entire chaos. For instance, in the War God Tower lineage, few among the true disciples had reached the nine-star Divine General level, let alone the mid-stage nine-star Divine General level.

“How could it be so fast? Last time, the Dao Child of Ten Thousand Laws utilized the strength boost from the ninth stage of life to advance to the early nine-star Divine General level, which should have exhausted his potential. How has he now quickly advanced to the mid-stage nine-star Divine General level? At this rate, in a million years, he might enter the ranks of the peak nine-star Divine Generals!”

Goddess Yun Zi was shocked.

A peak nine-star Divine General was also her goal. According to her calculations, it might take her billions of years to reach that level, or even longer.

Compared to Ye Tian, her progress was too slow.

“No matter what, I must first enter the nine-star Divine General rank to have a hope of catching up with the Dao Child of Ten Thousand Laws!”

Goddess Yun Zi entered secluded cultivation once again.

Meanwhile, Ye Tian continued to diligently inscribe Dao patterns, knowing that thirty Dao patterns were far from his limit.

The 31st Dao pattern, successfully inscribed! The 32nd Dao pattern, successfully inscribed! ... Unbeknownst to him, his Void Sky Dao Body now possessed 42 Dao patterns.

Simultaneously, Ye Tian’s strength placed him among the top mid-stage nine-star Divine Generals, though he was still ranked second on the Divine General Rankings. This was because one person had advanced to the late nine-star Divine General rank.

Initially, that person had been a mid-stage nine-star, but by achieving the ninth stage of life in the Innate Origin Pool, their strength surged, propelling them to the late nine-star Divine General rank.

Ye Tian thought it would take a long time to surpass the first-ranked individual on the Divine General Rankings. However, not long after, this person broke through to the Destiny Realm, becoming a Heavenly Monarch.

Thus, Ye Tian officially became the top-ranked Divine General.

Regarding this ranking, Ye Tian didn’t pay much attention. He had ranked first on the Divine General Rankings several times before, and such fluctuations meant nothing compared to true strength.

“Thirty Dao patterns, yet the Void Sky Dao Body’s major accomplishment is still far away. I wonder how many Dao patterns it will take to achieve major accomplishment,” Ye Tian pondered.

Currently, he had mastered all the Chaos Divine Abilities he had, with no new ones to learn.

Although the Void Sky Hall system had more Chaos Divine Ability inheritances, they were expensive, and his current points were insufficient. Even if he exchanged for one or two, they wouldn't be much use.

Even Dao Ancestor Void Sky probably didn't expect his cultivation speed to be so fast.

"I should first refine a great divine ability to the limit level. Most nine-star Divine Generals have at least one limit-level great divine ability, but I have none despite being a mid-stage nine-star Divine General. It's too embarrassing!"

Immediately, Ye Tian began to focus entirely on comprehending the great divine abilities.

Great Immortality Technique! Great Destruction Technique! Eternal Light Divine Ability! These three great divine abilities were at the peak of the major accomplishment realm, just one step away from the perfected realm. Therefore, Ye Tian prioritized comprehending these three abilities.

With the help of his God-level supreme comprehension talent, combined with the soul transformation he underwent after achieving the ninth stage of life, his foundational comprehension had increased significantly. Additionally, with the minor accomplishment of the Void Sky Dao Body, his soul strength had greatly enhanced, further boosting his comprehension.

As a result, Ye Tian's comprehension was now undoubtedly above that of Goddess Yun Zi.

After tens of thousands of years, the Great Immortality Technique, Great Destruction Technique, and Eternal Light Divine Ability all advanced to the perfected realm.

Subsequently, Ye Tian focused on the Great Immortality Technique. Once he refined it to the limit level, his survival and defense capabilities would be extraordinarily exaggerated, making it almost impossible for him to die.

This comprehension process took Ye Tian a full 300,000 years, illustrating the immense difficulty of understanding a limit-level great divine ability.

Raising the Great Immortality Technique to the limit level, Ye Tian's strength increased significantly but still didn't reach the late nine-star level, though the gap was now minimal.

Therefore, Ye Tian began to comprehend the Eternal Light Divine Ability. This great divine ability was slightly easier to comprehend, and with his new understanding of limit-level abilities, the difficulty decreased.

After 20,000 years, Ye Tian elevated the Eternal Light Divine Ability to the limit level.

Another 210,000 years later, Ye Tian successfully raised the Great Destruction Technique to the limit level.

With three limit-level great divine abilities in hand, Ye Tian's strength surged once more, instantly advancing to the late nine-star Divine General level.

Chapter 892: Origin Stone Vein

TL: Etude

Several hundred thousand years had passed. Ye Tian had pushed the Great Divination Technique and several great divine abilities to their extreme limits. Consequently, he possessed several limit-level divine abilities, and his power had increased once more.

However, at this level, no matter how many limit-level divine abilities Ye Tian mastered, the increase in his strength would not be substantial. The differences between these abilities were not significant. Even mastering numerous limit-level divine abilities would not allow him to unleash them all at once, as each one needed to be executed individually. Therefore, his strength could not transform dramatically.

Even the highest-ranked divine ability among the Three Thousand Great Divine Abilities Ye Tian mastered only marginally improved his strength.

"I shouldn't focus on comprehending peak-level divine abilities for now. I should find a way to exchange them for Chaos Divine Abilities!" Ye Tian thought to himself.

However, exchanging for Chaos Divine Abilities required points, and he did not have many points left. He had used up many resources for exchanges, and even his stock of Black Obsidian Gold was running low.

With no other options, Ye Tian re-entered the Purple Light World.

He planned to collect more resources in the Purple Light World, but to his surprise, the resources there had dwindled.

Items like the Purple Scale Garment, which could resist the purple light, allowed many powerful individuals to enter and exit the Purple Light World freely. Many Divine Generals and Heavenly Monarchs had flooded into the Purple Light World, collecting resources on a large scale. This had nearly exhausted the resources of the Purple Light World, and any new resources would take a long time to regenerate.

Thus, the once abundantly resource-rich Purple Light World had turned into a resource-poor world.

“Without resources, there are no points, making it difficult to exchange for Chaos Divine Abilities!” Ye Tian frowned.

Of course, he could wait it out.

As a Dao Child of the Void Sky lineage, he would receive thousands of points every million years, which meant ten thousand points every ten million years, and a hundred thousand points every hundred million years.

For others, this was an immense amount of points! Dao Children of the Void Sky lineage were never short on points or resources; they could cultivate step-by-step with ease.

But Ye Tian could not afford to wait that long. He couldn’t spend a hundred million years to achieve the combat power of a peak nine-star Divine General—that speed was too slow.

Therefore, he had to collect enough resources to exchange for points, allowing himself to progress quickly.

Next, Ye Tian dispatched many elite members of the Human Race to various parts of the Grand Universe to help him gather information and locate resource-rich areas.

Many parts of the Grand Universe were treasure troves, though unexplored. Perhaps many places rivaled or even surpassed the Purple Light World.

In short, the newly promoted Grand Universe was filled with resources and opportunities.

One day, years later.

Ye Tian received a piece of information from a Human exploration team.

“They found a treasure trove.”

Ye Tian did not get excited. Over the past few thousand years, the Human Race had indeed found many treasure troves, but those were normal treasures.

For ordinary Divine Generals and Heavenly Monarchs, they were true treasure troves, but for him, they were quite average.

The total resources in those places were worth at most a thousand points.

This amount of points was of little use to him.

For Ye Tian, a treasure trove had to yield tens of thousands of points at once to be considered a real treasure trove.

This exploration team had sent information, so naturally, he wouldn't ignore it. He quickly made his way there.

After all, if it turned out to be a genuine treasure trove and he didn't go, he would regret it! "This is the place!"

Ye Tian descended upon a continent and met the Human exploration team.

This was a team of Earthly Venerable experts, led by a one-star Divine General.

"Greetings, Human Ancestor!" The human experts greeted him respectfully.

Ye Tian was now known among the Human Race as the "Human Ancestor," given that it was solely due to his efforts that the Human Race had surpassed other races to become the strongest. Additionally, Ye Tian had brought the most comprehensive heritage and cultivation path from the Void Sky Hall to the Human Race, earning him the reverence of future generations.

"You should leave this continent now. It's too dangerous for you to stay here," Ye Tian instructed.

"Yes!" The members of the exploration team nodded.

Although they had just arrived on this continent, they had already witnessed its dangers. There were too many Earthly Venerable-level creatures everywhere, and even some comparable to Heavenly Monarchs. If it weren't for some life-saving artifacts, they would have been dead by now.

Nevertheless, they had discovered many precious treasures, indicating that this continent was indeed extremely valuable.

After the Human team left, Ye Tian began to seriously explore the continent.

"The resources here are indeed abundant. Many spiritual herbs and plants are beneficial even to Heavenly Monarchs!" Ye Tian felt a surge of excitement.

This continent was not small, and with so many accumulated resources, it represented an unimaginable wealth.

Immediately, Ye Tian transformed into countless clones, beginning to collect the continent's resources continuously.

Earthly Venerable-level creatures blocked his way—he killed them. Destiny Realm creatures blocked his way—he killed them. With Ye Tian's strength, ordinary Destiny Realm creatures were no different from ants. Only exceptionally powerful Destiny Realm creatures could challenge him.

However, as the Grand Universe had just been born, many creatures with strong bloodlines could not grow quickly. Most were still in the early or middle stages of the Destiny Realm and posed no threat to Ye Tian.

As time passed, Ye Tian collected an enormous amount of resources, significantly increasing his wealth.

One day, Ye Tian arrived at a mountain range on this continent and made a shocking discovery.

“A Origin Stone Vein!!!”

Ye Tian sensed a strong Origin Stone aura emanating from beneath the mountains.

Origin Stones were highly precious resources and a form of currency for those above the Destiny Realm. Even Heavenly Monarchs had few Origin Stones, and the highest grade of Origin Stones was the Creation Origin Stone.

It was rumored that the Creation Origin Stone could create a Grand Dao Realm True Ancestor and could even merge two universes into a Grand Universe.

Creation Origin Stones were exceedingly rare, but regular Origin Stones, while not as rare, were still highly valuable. Origin Stones could assist in cultivation, help comprehend the Grand Dao, and even be used for healing.

In essence, Origin Stones were a versatile energy source.

A Origin Stone vein in the chaos would be enough to spark a conflict between two major forces.

“The Void Sky lineage has a record for Origin Stone exchanges: one Origin Stone is worth ten points. This is the price for ordinary Origin Stones, but it's unclear how many Origin Stones this vein contains.” Ye Tian immediately began mining.

He knew that if this Origin Stone vein were left to develop for a few more billion years, it might produce more Origin Stones. However, by then, it would likely be occupied by other forces.

Taking advantage of the fact that other forces were unaware of this vein, he started digging, ensuring the Origin Stones belonged to him.

Dig! Dig! Dig! Ye Tian became a miner, digging day and night, each Origin Stone falling into his hands.

The entire vein was not large, and within half a month, Ye Tian had emptied it.

The harvest was unimaginably vast!

TL: Etude

“To think I actually harvested so many Origin Stones!” Ye Tian felt quite excited.

This Origin Stone vein yielded a total of 629 Origin Stones, along with 62 middle-grade Origin Stones. Middle-grade Origin Stones were a higher tier of Origin Stones, relatively rare even in the chaos, as most Origin Stones were lower-grade. This rarity made middle-grade Origin Stones very valuable.

In the chaos, one middle-grade Origin Stone was equivalent to 100 lower-grade Origin Stones, but in actual transactions, it could fetch as much as 200 lower-grade Origin Stones.

“More than ten thousand lower-grade Origin Stones, which equates to over 600,000 points. Plus, with the other resources harvested from this continent, the total would be close to 700,000 points!” Ye Tian calculated.

What did 700,000 points represent? It was enough to exchange for numerous chaos divine abilities! Ordinary chaos divine abilities only cost two to three thousand points, while top-tier ones cost at most ten to twenty thousand points.

In other words, Ye Tian could exchange for over a hundred chaos divine abilities.

Of course, Ye Tian also needed to exchange for some high-grade innate origin items, and also required some points. No matter what, Ye Tian no longer lacked points.

A few years later, Ye Tian had basically collected all the high-grade resources on this continent and then left it. Subsequently, he provided the coordinates of this continent to the Void Sky Hall, allowing the hall to co-develop it with the Human Race. After all, there were still many resources on this continent, but Ye Tian was too lazy to collect them slowly.

Upon returning to the Void Sky Hall, Ye Tian began frantically exchanging points with others.

“What? Dao Child of Ten Thousand Laws obtained an Origin Stone vein?” Many disciples were shocked upon hearing this news.

Everyone needed Origin Stones, and trading them directly with the Void Sky System would greatly devalue them. Therefore, Ye Tian directly traded with the Heavenly Monarchs of the Void Sky Hall, exchanging one Origin Stone for one point.

Origin stones were scarce items, while points were not necessarily scarce. Hence, many people were willing to trade with Ye Tian.

In a short time, Ye Tian had traded for 600,000 points. He then began to exchange chaos divine abilities and corresponding high-grade innate origin items from the Void Sky System.

“chaos divine abilities!” Ye Tian almost completely exchanged all the chaos divine abilities available in the system. Some Daos even overlapped, yet he still did not manage to gather 100 chaos divine abilities.

The Void Sky lineage naturally had more divine abilities, but the Void Sky Hall’s system was just a sub-system, containing limited resources and Chaos Divine Ability inheritances. Therefore, Ye Tian could only exchange for so many chaos divine abilities.

These chaos divine abilities were generally quite ordinary, but two of them were extremely precious and powerful.

One was the Blood River Immortality Technique. Once this Chaos Divine Ability was performed, it could create an entire territory of blood river. As long as the blood river remained, the practitioner would be immortal. The blood river was difficult to extinguish because its roots were deeply embedded in the Dao, making it invulnerable to ordinary means.

Therefore, mastering the Blood River Immortality Technique meant that even when facing a much stronger opponent, one would not perish. If the Blood River Immortality Technique was cultivated to its extreme, then, as a Chaos Divine Ability, even a True Monarch at the peak of the True Spirit Realm could not be killed by an ordinary Grand Dao Realm True Ancestor.

Thus, the Blood River Immortality Technique ranked 32nd among chaos divine abilities. Although its ranking was lower than the Time-Space Shift Technique, its practical use was not inferior to it.

The other Chaos Divine Ability was the Golden Wing Soul Slashing Technique. This Chaos Divine Ability involved not only slashing the physical body but also the soul. It was rumored that once this Chaos Divine Ability was cultivated to a certain level, one could easily fight opponents of higher levels.

Ye Tian decided that in the future, he would focus on cultivating the Golden Wing Soul Slashing Technique and the Blood River Immortality Technique. As for the other chaos divine abilities, he would only grasp their basics and not delve deeper.

After all, a person's energy was limited, and it was impossible for Ye Tian to master dozens or even hundreds of chaos divine abilities to a profound level.

He had seven chaos divine abilities, some of which overlapped in their Daos. Therefore, Ye Tian couldn't imprint 152 Dao patterns. After his calculations, he found that he could only obtain 81 Dao patterns, which was already quite impressive.

The days that followed were relatively straightforward. Ye Tian focused solely on cultivation, cultivation, and more cultivation.

As years passed, the names on the Divine General Rankings changed rapidly. Some people, unwilling to remain at the Divine General level, chose to break through to the Destiny Realm, becoming Heavenly Monarchs. Others rose to prominence, replacing former Divine Generals.

In this Grand Universe Era, various geniuses emerged, and even the Human Race produced some peerless heavenly geniuses. Although they couldn't compare to Ye Tian, they were enough to rival the official disciples of some True Ancestors.

However, no matter how many geniuses emerged, Ye Tian consistently held the top spot on the Divine General Rankings.

The combat power of a late-stage nine-star Divine General was enough to make any other Divine General despair.

Over the course of more than 200,000 years, Ye Tian had engraved a dozen more Dao patterns on his Void Sky Dao Body, bringing the total number of Dao patterns on his body to 59. However, he still hadn't advanced his Void Sky Dao Body to the major accomplishment realm.

"I have a feeling that once I engrave the 60th Dao pattern, my Void Sky Dao Body should reach the major accomplishment realm. Moreover, I have mastered many chaos divine abilities, and the embryo of the Dao has become incredibly strong. My strength has improved significantly compared to before, and I am currently very close to the combat power of a peak nine-star Divine General. If my Void Sky Dao Body reaches the major realm, my strength might leap into the ranks of peak nine-star Divine Generals!" Ye Tian estimated.

Another ten thousand years passed, and one day, Ye Tian finally engraved the 60th Dao pattern.

Boom!!! The Void Sky Dao Body underwent a transformation. Ye Tian seemed to transform into a towering giant, with Dao patterns appearing on his skin, flesh, bones, and internal organs, filling his entire being with endless Dao charm.

Transformation! Transformation! Every part of his body became far stronger than before.

After a long time, Ye Tian completed his transformation. At the same time, his strength also completed its transformation. He was no longer a late-stage nine-star Divine General but had reached the ranks of peak nine-star Divine Generals.

On the Ancestral Stele, Ye Tian remained at the top of the Divine General Rankings, but his strength had changed to that of a peak nine-star Divine General.

At that moment, countless forces became aware of the changes on the Divine General Rankings. Everyone was stunned!

What did it mean to be a peak nine-star Divine General? To everyone, it represented the highest level of the Divine General class, the ultimate goal pursued by countless geniuses over innumerable ages, even the ultimate goal of the Dao Ancestors' personal disciples.

No one dared to claim they could definitely reach the level of a peak nine-star Divine General, not even Goddess Yun Zi.

But Ye Tian had achieved it, and at an incredibly fast pace.

Chapter 894

TL: Etude

"The Dao Child of Ten Thousand Laws has achieved the peak of nine-star Divine General!"

Heavenly Monarch Peng Yu and others in the Void Sky Hall were utterly shocked. Although the peak of a nine-star Divine General was just one tier higher than the late nine-star Divine General, the significance was entirely different. Each tier advancement within the nine-star Divine General rank was exceedingly difficult. The value of a peak nine-star Divine General far exceeded that of ten late-stage nine-star Divine Generals—a qualitative difference.

Countless peerless geniuses had attempted to break through from late nine-star Divine General to peak nine-star Divine General, but all had failed, squandering millions of years in the process. In the end, they were forced to advance to the Destiny Realm, abandoning the pursuit of the peak nine-star Divine General rank.

At this moment, Peng Yu and the others realized that Ye Tian's status had once again ascended a tier, far surpassing other direct and true disciples of the Dao Ancestors.

Moreover, even if Ye Tian could not become a Dao Ancestor in the future, he would undoubtedly be one of the strongest True Ancestors.

Upon learning that Ye Tian had become a peak nine-star Divine General, Goddess Yun Zi of the War God Tower sighed and completely gave up on catching up to him.

However, Yun Zi did not believe her future would be inferior to Ye Tian's. After all, the peak of the nine-star Divine General was the ultimate limit for Divine Generals. No matter how powerful Ye Tian became, he would still be just a peak nine-star Divine General. Although Ye Tian cultivated rapidly, she believed she could also reach the peak of the nine-star Divine General rank, albeit taking more time. Someday, she would stand on equal footing with Ye Tian.

While many discussed how Ye Tian had transcended, he continued to cultivate, aiming to break through to the ten-star Divine General realm.

Years passed, and Ye Tian never attempted to transcend, arousing much speculation.

Some believed he was solidifying his foundation, others thought he was trying to comprehend a secret technique that only Divine Generals could master. Some even speculated that Ye Tian had exhausted his potential to reach the peak nine-star Divine General stage and could no longer transcend.

Of course, those who deliberately slandered Ye Tian were a minority and were not taken seriously.

The only person who truly understood Ye Tian's situation was Dao Ancestor Void Sky.

In the secluded chamber.

Ye Tian cultivated various chaos divine abilities, condensed the embryonic form of the Grand Dao, and inscribed Dao patterns. Inscribing sixty Dao patterns signified the major accomplishment of the Void Sky Dao Body. If he achieved the perfected Void Sky Dao Body, Ye Tian believed his strength could break through the barrier to the ten-star Divine General level.

Thus, Ye Tian began inscribing one Dao pattern after another.

The 61st Dao pattern was successfully inscribed! The 62nd Dao pattern was successfully inscribed!

When the 72nd Dao pattern was successfully inscribed, Ye Tian's Void Sky Dao Body underwent another significant transformation, almost reaching the extreme limit of a nine-star Divine General, but still not attaining the ten-star Divine General realm.

Therefore, Ye Tian continued to cultivate and inscribe Dao patterns.

As millennia after millennia passed, Ye Tian did not attempt to transcend, gradually becoming a legend to many. Fewer people mentioned Ye Tian, focusing instead on new peerless geniuses born in the cosmos, or those attempting to break through to the Half-Step True Spirit Realm, and other such topics.

Whether due to resistance or other factors, the difficulty and time required to condense the embryonic form of the Grand Dao and inscribe Dao patterns increased significantly.

A hundred thousand years! Five hundred thousand years! One million years!

After one and a half million years in seclusion, Ye Tian inscribed a total of 99 Dao patterns, culminating in an unimaginable transformation.

At that moment, the consciousness of the Void Sky Dao Body descended, enveloping Ye Tian's secluded chamber.

"Calmly break through; don't worry about me," said Dao Ancestor Void Sky.

Ye Tian nodded, focusing entirely on his breakthrough.

After a long time, the transformation of the Void Sky Dao Body was complete, vastly more powerful than before.

Ye Tian also felt his strength break through the limits, officially entering the ranks of the ten-star Divine Generals.

"Master!" Ye Tian stood up and respectfully bowed to Dao Ancestor Void Sky.

"Ye Tian, you have done well. To reach the ten-star Divine General level in such a short time is impressive. I originally thought it would take you millions of years to have even a slight chance of reaching this tier." Dao Ancestor Void Sky spoke with a hint of surprise, "It's no small feat to achieve the level of a ten-star Divine General in such a short time."

Ye Tian modestly replied, "It was just a stroke of luck, Master."

"There's no need for modesty. Achieving the ten-star Divine General level is not a matter of luck. However, I have used special means to block the Ancestral Stele's sensing of you. For now, it doesn't know you've become a ten-star Divine General. You should also refrain from revealing your true strength, or you'll attract significant trouble," Dao Ancestor Void Sky warned.

"Why?" Ye Tian inquired.

Dao Ancestor Void Sky explained, "Because you are extraordinarily talented. While a peak nine-star Divine General is rare, each great era usually produces at least one, and in a particularly glorious era, several might emerge. However, the birth of a ten-star

Divine General is a miracle that might only happen once in countless eras. Throughout the history of chaos, the appearance of ten-star Divine Generals has been infrequent, and only a few have grown to their full potential. Most were killed before they could fully develop. If many factions knew you were a ten-star Divine General, countless forces would want to kill you to prevent your rise.”

Ye Tian was startled upon hearing this.

“Transcend as soon as possible and break through to the Destiny Realm. That way, no one will know you have become a ten-star Divine General,” Dao Ancestor Void Sky advised.

“Understood, Master!” Ye Tian nodded in agreement.

Afterward, Dao Ancestor Void Sky departed.

Despite reaching the ten-star Divine General level, Ye Tian did not immediately transcend. Instead, he continued his cultivation, striving to condense the embryonic form of the Grand Dao and inscribe more Dao patterns.

He felt that his Void Sky Dao Body had not yet reached true perfection. Even though his strength had broken through the limits, he believed it could still be improved.

As expected, after several more millennia, Ye Tian inscribed another Dao pattern, although his strength saw no significant improvement.

Reaching the ten-star Divine General level marked the true limit. No matter how much more he advanced, his actual combat power remained the same. However, the more Dao patterns he inscribed, the stronger his foundation and potential became, which was beneficial. Thus, Ye Tian continued inscribing Dao patterns.

The 101st Dao pattern! The 102nd Dao pattern! The 103rd Dao pattern! The 104th Dao pattern!

After spending a total of 500,000 years, Ye Tian finally inscribed the 108th Dao pattern.

At this moment, Ye Tian truly felt the essence of Grand Perfection. His Void Sky Dao Body had reached perfection, with the Dao patterns perfectly merging with his body. This final, perfect transformation left no trace visible.

Despite this, his combat strength remained that of a ten-star Divine General, unchanged.

Yet, Ye Tian knew that his defense had reached an incredible level. Even other ten-star Divine Generals would struggle to break through his defenses.

Moreover, he was nearly immortal.

With the combination of the Void Sky Dao Body and the Blood River Immortal Technique, it was unlikely that anyone among the Heavenly Monarchs could kill him. Even the top-ranked person on the Heavenly Monarch Rankings would find it impossible.

C 895

TL: Etude

“Finally, I can transcend. Although Master helped me obscure my realm, so much so that even the Ancestral Stele couldn’t discern my true power, it is impossible for him to continue aiding me in this indefinitely. Breaking through as soon as possible is the best course of action!” Ye Tian muttered to himself.

Without further delay, he announced his imminent transcendence.

On this day, outside the Void Sky Hall, Ye Tian began his transcendence. Transcendence, as it is called, meant extracting one’s soul imprint from the River of Time and Space, allowing it to break free from the control of the universe.

This was the true meaning of transcendence, achieving absolute freedom.

The origin of the Grand Universe was extremely powerful. To transcend the River of Time and Space of a Grand Universe posed a tremendous challenge. However, Ye Tian was a ten-star Divine General. Even a nine-star Divine General could transcend the Grand Universe.

Therefore, no one believed Ye Tian would fail in his transcendence.

Figures of Heavenly Monarchs appeared in the nearby void, observing Ye Tian's transcendence.

Meanwhile, the Heavenly Monarchs of the Void Sky Hall were responsible for maintaining security. If any Heavenly Monarchs approached too closely, they would be stopped by the Void Sky Hall.

They did not want anyone to disrupt Ye Tian during his transcendence.

After adjusting his state, Ye Tian began transcending.

He sensed his soul imprint within the River of Time and Space. As Ye Tian's power surged, the River of Time and Space appeared.

In an instant, a golden light flashed from the River of Time and Space. It was Ye Tian's soul imprint.

Then, Ye Tian's soul imprint transformed into a giant, ignoring the waves of the River of Time and Space, pushing everything aside, and stepping out.

The void rippled, and the Great Dao trembled.

The phenomenon of Ye Tian's transcendence spread across boundless territories, far surpassing the phenomena of others' transcendence.

Boom! His soul imprint emerged from the River of Time and Space, perfectly merging with Ye Tian's soul.

At this moment, Ye Tian's soul truly became complete.

Instantly, Ye Tian's aura grew increasingly powerful. Infinite yuan qi surged towards him, washing over his physical body.

Crack! A shattering sound echoed from the void, indicating that Ye Tian had broken the shackles of the Earthly Venerable Realm to the Destiny Realm.

The combat strength of a ten-star Divine General still belonged to the Earthly Venerable realm. Previously, Ye Tian was at the perfected Earthly Venerable realm, with his combat strength reaching the level of a ten-star Divine General. But now, his cultivation has reached the Half-Step Destiny Realm.

To truly reach the Destiny Realm, he needed to complete the transformation of his physical body into a chaos lifeform.

Previously, only fifty percent of Ye Tian's body had transformed into a chaos lifeform, making him a half-chaos lifeform. Now that the physical shackles were broken, as long as he had pure, powerful, and vast amounts of chaos yuan qi, he could fully transform into a chaos lifeform.

In the past, a Divine General's transcendence allowed them to leave the universe and enter chaos, using the infinite chaos yuan qi to transform into a chaos lifeform and advance to the Destiny Realm.

However, leaving the universe made it difficult to return.

If Ye Tian left the Grand Universe now, he could find a way to return, but the cost would be immense.

Moreover, the Void Sky Hall had specialized cultivation methods prepared for those impacting the Destiny Realm, so Ye Tian did not need to leave the Grand Universe.

However, before Ye Tian could truly advance to the Destiny Realm, he needed to overcome the tribulation of transcendence.

Boom!!! In the boundless void, tribulation clouds formed.

Bolts of tribulation lightning struck Ye Tian's body. Each bolt was incredibly powerful, and towards the end, each lightning bolt could easily kill an ordinary eight-star Divine General.

The final bolt of tribulation lightning could even kill a peak eight-star Divine General. Only an early stage nine-star Divine General could easily pass such a transcendence tribulation, or a peak eight-star Divine General with strong survival abilities could also survive this lightning tribulation.

After the lightning tribulation was over, Ye Tian had truly transcended.

"Everyone, I just broke through, so I need to go back and seclude myself to stabilize my realm and complete the true breakthrough to the Destiny Realm. I won't be able to accompany you any longer!"

After saying this, Ye Tian left.

Soon after, news of Ye Tian's transcendence spread, and countless forces across the universe were discussing Ye Tian.

Cultivation Chamber.

Ye Tian continuously transformed his body using the pure chaos yuan qi available here. His body, originally a fifty percent chaos lifeform, slowly transformed into a full chaos lifeform, combining the powerful Void Sky Dao Body and nine-star Life Form.

Simultaneously, Ye Tian's divine force also transformed into chaos divine force. His inner microcosm increasingly resembled an actual universe, where even life had begun to form and evolve continuously.

When life breaks through from Earthly Venerable to Destiny Realm, it undergoes a significant burst of cultivation, speeding up the cultivation rate significantly for a period.

For example, some seven or eight-star Divine Generals, upon breaking through to the Destiny Realm, can quickly advance to the mid-Destiny Realm without needing extensive time for accumulation. Otherwise, advancing from early to mid-Destiny Realm would take a very long time, possibly even billions of years without sufficient resources.

Ye Tian felt this rapid increase in cultivation speed as boundless chaos yuan qi poured into his body, which he easily refined into his chaos divine force.

His physical body and chaos divine force surged daily.

Additionally, Ye Tian's Dao embryo began to grow. Previously, his Dao embryo was 100 meters long and 108 meters wide, formed from the fusion of 108 Daos, making it incomparable to other Daos.

A thousand-meter Dao was considered entry-level, ten-thousand-meter Dao was considered minor accomplishment, fifty-thousand-meter Dao was considered major accomplishment, and a perfected Dao was a hundred thousand meters.

Once the Dao reached a hundred thousand meters in length, it would signify the culmination of the Dao, representing a successful Dao formation, and stepping into the True Ancestor realm.

As for how to advance after reaching the True Ancestor realm, Ye Tian didn't think much about it because he was still far from that level.

"The growth of my Dao embryo is not urgent. Currently, I need to comprehend those chaos divine abilities. The previous chaos divine abilities were just in their nascent stages. Now, I just need to re-comprehend them to gain entry-level chaos divine abilities, which will significantly enhance my strength!" Ye Tian thought to himself.

Immediately, he began comprehending chaos divine abilities. In just a few years, he mastered all the chaos divine abilities to the entry level.

Next, Ye Tian focused wholeheartedly on enhancing his cultivation.

In the blink of an eye, a thousand years passed.

On this day, Ye Tian emerged from seclusion, his cultivation having reached the late Destiny Realm. His strength had multiplied several times compared to before.

Though he was in the same Destiny Realm as others, Ye Tian's physical strength and chaos divine force far exceeded theirs, thanks to his incredibly strong foundation.

However, Ye Tian's strength was still insufficient to place him on the Heavenly Monarch Rankings because he was still weak in many aspects.

For instance, he had not yet started cultivating the eighth and ninth layers of the Profound Void Technique. His chaos divine abilities were only at the entry level, many of his secret techniques were outdated and couldn't keep up with his current strength, and his Dao embryo was still relatively weak.

But given time, Ye Tian could rapidly enhance his capabilities, and soon enough, he would be able to climb onto the Heavenly Monarch Rankings.

[Your Talent is Mine #Chapter 896: The Dark Shrine, the Grand Universe in Turmoil - Read Your Talent is Mine Chapter 896: The Dark Shrine, the Grand Universe in Turmoil](#)

Chapter 896: The Dark Shrine, the Grand Universe in Turmoil

TL: Etude

After his cultivation reached the late stage of the Destiny Realm, Ye Tian's cultivation progress slowed down, but he continued his seclusion to cultivate the Profound Void Technique.

Ye Tian's Profound Void Technique had already reached the perfected realm of the seventh layer. With his breakthrough in cultivation, it became much easier to practice the Profound Void Technique, encountering no significant obstacles.

Therefore, Ye Tian quickly advanced his Profound Void Technique to the introductory realm of the eighth layer, significantly increasing his strength once again.

The Grand Universe remained very peaceful. Although there were frictions among various forces, they were mostly minor conflicts. No force dared to engage in a full-scale battle due to mutual apprehensions.

If things continued this way, it wouldn't be too bad.

However, one day, a group of powerful beings dressed in black robes arrived from outside the Grand Universe.

They belonged to a notorious force within the chaos known as the Dark Shrine. The Dark Shrine specialized in assassination and robbery, committing all kinds of heinous deeds. They would even dare to attack a Dao Ancestor if the price was right.

Throughout its history, the Dark Shrine had indeed managed to kill a few relatively weaker Dao Ancestors. This fact alone demonstrated the Dark Shrine's formidable strength, boasting not just one Dao Ancestor but even more True Ancestors.

Now, the Dark Shrine had set its sights on this newly formed Grand Universe.

This time, the Dark Shrine dispatched ten True Ancestors, all of whom were top-tier True Ancestors. Together, they could even contend with a Dao Ancestor.

Their objective was simple: to stir up trouble, gain more benefits, and kill some geniuses—a favorite pastime of the Dark Shrine.

The ten True Ancestors of the Dark Shrine looked at the Grand Universe and started discussing.

"This Grand Universe is too peaceful. With the Dao Ancestor's constant surveillance, these forces don't dare to fight each other. We need to muddy the waters."

"Heh, if the Dao Ancestors can't keep an eye on this Grand Universe and can't divine anything, chaos will ensue. That's when our Dark Shrine will have a golden opportunity to profit greatly. We might even snatch a spot for the Ancestral Stele!"

"Let's get to work. Merge the Dark Dao Stone into this Grand Universe and send some elite members of the Dark Shrine inside. Once that's done, we'll leave. Otherwise, if a powerful Dao Ancestor targets us, it won't be easy to escape!"

"Let's do it!"

The ten True Ancestors joined forces to activate a massive black stone. With a booming sound, the True Ancestors' power integrated it into the Grand Universe.

In the next moment, a black light enveloped the Grand Universe, weakening its connection with the outside world. A force sealed off the power of the Chaos Dao.

Suddenly, many True Ancestors and even Dao Ancestors lost their connection to the Grand Universe.

Immediately, these True Ancestors and Dao Ancestors knew something had happened in the Grand Universe and projected their consciousness across space to investigate.

By this time, the True Ancestors of the Dark Shrine had already sent many elite members into the Grand Universe and then escaped.

Swish! Swish! Swish! Several Dao Ancestors' consciousness incarnations arrived, seeing the Grand Universe shrouded in black light, and frowned.

"Dark Shrine!" they murmured.

This black light could not truly block them.

If they wished to enter the Grand Universe, it wouldn't be difficult, but the connection between the Grand Universe and the outside world had become somewhat tenuous.

Furthermore, whatever happened inside the Grand Universe, they could no longer predict.

They understood the implications very clearly.

The Grand Universe was about to fall into chaos. Even if their disciples were killed, they wouldn't be able to determine who did it.

"It was careless of us. We should have anticipated that the Dark Shrine wouldn't overlook such a significant universe. We should have sealed it off from the beginning," one Dao Ancestor regretted.

"Sealing it wouldn't have made a difference," another Dao Ancestor responded. "The Dark Shrine's power isn't weak. They have several Dao Ancestors. If they truly wanted to enter the Grand Universe, we couldn't stop them. Fortunately, the Dark Shrine operates stealthily and can't mobilize too many forces here. As long as our disciples remain cautious, they should be fine."

"In fact, a bit of chaos might be beneficial. True strength only emerges through competition and conflict," a Dao Ancestor who relished battle remarked.

With that, the Dao Ancestors departed one by one, not overly concerned. However, the True Ancestors who followed were anxious. They had invested significant resources in the Grand Universe. Some had even risked nearly everything they had. If the universe fell into chaos and their subordinates were wiped out, they wouldn't know who to seek revenge against.

Within the Grand Universe, Ye Tian soon learned about the disruption and how difficult it would be to lift. Even the Dao Ancestors weren't willing to pay the price required.

“As expected, while the Great Divination Technique can predict certain outcomes, it can’t discern others. I can’t even determine good or bad fortunes,” Ye Tian frowned.

Given this situation, the Grand Universe was bound to descend into chaos. Previously, the various factions were wary of each other’s backgrounds and avoided assassination attempts. Now, they no longer had to worry.

“Someone will definitely try to assassinate me,” Ye Tian mused. It wasn’t a mere possibility but a certainty.

He wasn’t particularly afraid of assassination attempts on himself but worried about his family. He spent some points to hire several Heavenly Monarchs skilled in array formations, tasking them with setting up protective arrays at the headquarters of the Supreme Hall of Humanity. These arrays would safeguard key human elites and his family. As long as they stayed within the formations, even top-tier Heavenly Monarchs would find it challenging to carry out an assassination.

Though the cost was high, Ye Tian believed it was worth it.

Not long after, an organization called the Dark God Society emerged within the Grand Universe. It was affiliated with the Dark Shrine and consisted of Divine Generals and Heavenly Monarchs, even including some Half-Step True Spirit Realm experts.

The Dark God Society possessed a Chaos Supreme Treasure proficient in spatial manipulation. Its headquarters’ location remained unknown, but many forces received invitations from the Dark God Society. Anyone could hire them to carry out assassinations for the right price, and they dared to target even Half-Step True Spirit Realm experts.

Additionally, the Dark God Society robbed resources from smaller factions. In short, the Grand Universe was in turmoil.

In a certain territory of the Grand Universe, a major force resided.

This force was called the Skyfire Sect. Although not as strong as the Void Sky faction, it boasted a Dao Ancestor.

The Skyfire Sect held considerable power within the Grand Universe, with hundreds of Heavenly Monarchs and thousands of Divine Generals. Many races had pledged allegiance to them, and countless beings lived under their rule.

On this day, the Skyfire Sect was plotting something significant.

TL: Etude

In the Skyfire Sect, two Heavenly Monarchs were discussing a matter. They were Heavenly Monarch Blazing Sun and Heavenly Monarch White Eagle, both possessing formidable strength at the peak of the Destiny Realm. Though they ranked at the lower end of the Heavenly Monarch Rankings, their power was undeniable. Both were leaders within the Skyfire Sect in the vast universe.

“The universe is about to descend into chaos. For our Skyfire Sect, this is both a challenge and a great opportunity!” Heavenly Monarch White Eagle said with a smile. “In the past, we had to tread carefully, but now we can act more freely. Recently, a True Ancestor from our sect sent a message instructing us to deal with disciples of the Void Sky faction.”

“The rumor that our True Ancestor holds a grudge against the Void Sky faction seems to be true,” Heavenly Monarch Blazing Sun added with a laugh. “Previously, the True Ancestor didn’t dare to act against them for fear of being discovered and targeted by the Void Sky’s True Ancestors. But now, with the universe in turmoil, as long as we act covertly, there’s no fear of being traced.”

“Humph! The Void Sky faction has always oppressed us, relying on their numerous Dao Ancestors and True Ancestors. Last time, Heavenly Monarch Peng Yu even snatched an opportunity from us. I fully support acting against the Void Sky faction. Besides, the True Ancestor promised us benefits, so we must perform well. But which target should we choose? Killing an ordinary disciple won’t impact the Void Sky faction much.”

Heavenly Monarch Blazing Sun responded coldly, “Heavenly Monarch Peng Yu and a few other top-tier Heavenly Monarchs are too powerful for us to handle. We should target weaker Heavenly Monarchs, or we could directly go after the Dao Child of Ten Thousand Laws of the Void Sky faction.”

“What? Attacking the Dao Child of Ten Thousand Laws of the Void Sky faction? That’s a personal disciple of a Dao Ancestor!” Heavenly Monarch White Eagle exclaimed, shocked.

His initial plan was only to kill a talented Heavenly Monarch from the Void Sky faction, not Ye Tian, who held too high a status. Ye Tian’s fall would shake the entire universe and provoke the Dao Ancestors’ wrath.

“Killing a Dao Child is more impactful than killing a hundred Heavenly Monarchs. If that True Ancestor knew we eliminated the Dao Child of Ten Thousand Laws, he’d be ecstatic and might reward us generously. A top-tier True Ancestor’s reward would benefit us for countless years.”

Heavenly Monarch White Eagle hesitated for a long time before finally gritting his teeth and agreeing, “Alright, the Dao Child of Ten Thousand Laws is a Destiny Realm Heavenly Monarch, having ascended from a peak nine-star Divine General, and a transcender. His status far surpasses typical peak nine-star Divine Generals and geniuses. He’s destined to grow into the

strongest True Ancestor and might even surpass weaker Dao Ancestors. Thankfully, he's still new to being a Heavenly Monarch and not too strong yet. We must act quickly."

"No, we won't act directly," Heavenly Monarch Blazing Sun shook his head. "If we act, even if the Dao Ancestor cannot trace it, someone might follow the clues back to us. The Void Sky faction would retaliate, demanding our lives as compensation."

"Then how do we kill Dao Child of Ten Thousand Laws?" Heavenly Monarch White Eagle inquired.

"By employing the Dark God Society!" Heavenly Monarch Blazing Sun suggested coldly. "We'll have to pay a great price, but the True Ancestor will surely compensate us for our losses."

Additionally, the Dao Child of Ten Thousand Laws surely possessed extraordinary wealth, reportedly having a large amount of Black Obsidian Gold and Origin Stones. The Dark God Society would undoubtedly be eager to take on the mission of assassinating him."

"Alright, then we shall engage the Dark God Society. But won't they need to know our identities?" Heavenly Monarch White Eagle questioned.

Subsequently, Heavenly Monarch Blazing Sun and Heavenly Monarch White Eagle secretly hired the Dark God Society. The society accepted the mission, though the timing of the assassination would depend on the circumstances. For instance, if Ye Tian remained in the Void Sky Hall, no matter how bold the Dark God Society was, they couldn't possibly kill him there—it would be suicidal.

Time flew by, and thousands of years passed. Ye Tian continued his cultivation within the Void Sky Hall, never stepping out. Finally, one day, Ye Tian concluded his secluded training. The enhancement effect brought by his breakthrough had significantly weakened. Now, it was almost impossible for Ye Tian to rapidly increase his strength unless he relied on his own efforts or encountered a great opportunity.

"Eighth level of the Profound Void Technique, several chaos divine abilities reaching peak entry level, and I've reorganized the two major secret techniques of the Heavenly Saber System and the Primordial System. My strength has increased many times over!" Ye Tian assessed his own strength, but he still felt far from making it onto the Heavenly Monarch Rankings.

The Heavenly Monarchs on that list were no pushovers; each had reached the pinnacle of the Destiny Realm, possessed incredibly strong bodies, mastered at least one Chaos Divine Ability at the major accomplishment realm, and condensed a Dao embryo, having advanced at least ten thousand meters along their paths.

Compared to these Heavenly Monarchs, Ye Tian had many shortcomings. However, being a Heavenly Monarch who ascended from a ten-star Divine General and an Ascendant, his foundation far exceeded that of ordinary Heavenly Monarchs. Consequently, Ye Tian's strength wasn't too distant from the last place on the Heavenly Monarch Rankings. This time, Ye Tian left seclusion because he had almost exhausted his points and resources. He needed to gather more resources and look for any opportunities.

As a Heavenly Monarch who ascended from a ten-star Divine General, his foundation was extremely solid, and every minor advancement required a substantial amount of resources. Additionally, the eighth level of the Profound Void Technique consumed resources at an alarming rate. Even with abundant points, he felt they were insufficient.

Not only did Ye Tian feel short of points, but other Heavenly Monarchs, even Heavenly Monarch Peng Yu, also felt their resources and points were insufficient. For instance, Heavenly Monarch Peng Yu had cultivated for countless years, and the points spent over such a long period far exceeded one million, possibly even more than ten million. For these Heavenly Monarchs, points were continuously spent on useful things, and they always found themselves in need of more.

Naturally, Ye Tian couldn't just sit idle; he had to find ways to earn points. The Human Race had discovered many treasured lands in recent years and marked them. Ye Tian planned to visit these places and gather resources along the way.

As soon as Ye Tian left the Void Sky Hall, his movement was quickly noticed. In a mysterious location in the universe, the Heavenly Monarchs of the Dark God Society became aware of Ye Tian's movements.

"Immediately execute the assassination plan. Target: The Dao Child of Ten Thousand Laws!" A set of orders was dispatched.

TL: Etude

Beneath the starry sky.

Ye Tian traversed through space, heading toward a treasure trove, when suddenly a sense of imminent danger descended upon him.

"There's danger!"

Ye Tian's expression grew serious.

As a Heavenly Monarch who had mastered the Great Divination Technique, he could sense danger without even actively using it.

Immediately, Ye Tian activated the Great Divination Technique and quickly perceived that someone was laying an ambush for him.

However, he couldn't deduce who was targeting him since the vast universe had been shielded, making it impossible to divine others' affairs, including his own. Yet, sensing his own danger was still feasible.

"It seems someone wants to assassinate me!" Ye Tian speculated.

He didn't panic but continued to traverse calmly.

Additionally, he cast the Great Immortality Technique, stacking various defensive divine abilities together. Defensive divine abilities could be layered without restriction, unlike offensive ones.

Suddenly.

A streak of dark light appeared in the starry sky.

This dark light pierced through space and time, slashing toward Ye Tian at an unimaginable speed.

"Not good!"

Ye Tian sensed the attack but couldn't evade it. The opponent's speed surpassed everything.

To dodge such an attack, Ye Tian would need to cultivate the Time-Space Shift Technique, a Chaos Divine Ability, to at least a minor accomplishment realm, otherwise, evasion was impossible.

The assailant had to be a powerful Heavenly Monarch, possibly even one listed on the Heavenly Monarch Rankings.

"Blood River Immortality Technique!"

"Void Sky Dao Body!"

Ye Tian activated both techniques simultaneously.

In an instant, a blood river descended.

But the dark light pierced through the blood river in a split second, even penetrating Ye Tian's body. The Chaos Supreme Treasure defensive armor he wore was instantly obliterated, and his body nearly shattered and annihilated.

However, under the triple protection of the Blood River Immortality Technique, the Great Immortality Technique, and the Void Sky Dao Body, Ye Tian was almost unscathed, his body quickly reformed.

“Escape!”

Ye Tian used the Time-Space Shift Technique, swiftly phasing away.

At the same time, he began sending messages to Heavenly Monarch Peng Yu, informing him of the attack.

In the distance.

A Heavenly Monarch in black robes and a mask pursued him, but with Ye Tian prepared, the pursuer couldn’t catch up.

Before long, the Heavenly Monarch gave up and started to flee.

If he continued the chase, once Heavenly Monarch Peng Yu arrived, the attacker might not be able to escape.

Shortly after, Heavenly Monarch Peng Yu arrived. Seeing Ye Tian unharmed, he breathed a sigh of relief.

“Dao Child, it’s good you’re safe. Who exactly tried to assassinate you?” Heavenly Monarch Peng Yu asked.

“I don’t know!” Ye Tian shook his head, “I only know the person used some dark method, piercing through in an instant. If I didn’t have life-saving means, I would be dead for sure!”

In reality, Ye Tian already knew who the attacker was, as his Copy Talent had directly probed the situation.

But Ye Tian couldn’t disclose this to Heavenly Monarch Peng Yu, otherwise, he wouldn’t be able to explain.

The one who attacked Ye Tian was a Heavenly Monarch from the Heavenly Monarch Rankings—Heavenly Monarch Black Tower, ranked 974th on the list. Though at the bottom of the ranking, his strength was formidable, and Ye Tian couldn’t defeat him for now.

“Dao Child, where were you attacked?” Heavenly Monarch Peng Yu inquired.

Ye Tian led Heavenly Monarch Peng Yu to the site of the attack, where Peng Yu sensed the surrounding energy fluctuations to deduce the divine ability used by the assailant.

“It’s a Chaos Divine Ability—Ziji Dark Light, ranked 572nd on the Chaos Divine Ability List. The opponent’s Ziji Dark Light must have reached the major accomplishment realm. Any Heavenly Monarch capable of wielding such a powerful Chaos Divine Ability, even with a weaker foundation, could approach the level of a Heavenly Monarch on the ranking. Moreover, a Heavenly Monarch qualified to master a Chaos Divine Ability wouldn’t have a weak foundation, so the attacker must be a Heavenly Monarch on the ranking!” Peng Yu concluded, looking at Ye Tian with a surprised expression.

A Heavenly Monarch on the ranking had attacked Ye Tian, yet he was unharmed. This was astonishing! Usually, a ranked Heavenly Monarch could kill an unranked powerful Heavenly Monarch in a single strike. Ye Tian had only recently broken through to the Heavenly Monarch level and couldn’t possibly have such strong combat prowess. How could he survive an attack from a ranked Heavenly Monarch?

“Could it be that he used a life-saving artifact bestowed by a Dao Ancestor?” Peng Yu speculated.

“Dao Child, there are at least ten known Heavenly Monarchs in the vast universe who have mastered Ziji Dark Light, and we cannot rule out the possibility of a mysterious Heavenly Monarch hiding this ability. Therefore, we can’t confirm the identity!” Peng Yu stated.

“Understood!” Ye Tian nodded.

One divine ability alone couldn’t identify the attacker. For instance, he had mastered many chaos divine abilities unknown to others. Suspecting someone based on a single divine ability could easily bring trouble to the Void Sky Hall and provoke other factions.

“Thank you, Senior Brother Peng Yu!” Ye Tian expressed his gratitude.

“No need to be so polite, Dao Child. However, it’s too dangerous recently. You should be more cautious and ideally stay in seclusion within the Void Sky Hall,” Peng Yu advised.

“Got it!” Ye Tian nodded.

Afterward, Peng Yu left, while Ye Tian didn’t return to the Void Sky Hall. Instead, he used the Time-Space Shift Technique, constantly changing directions to avoid being tracked easily. His goal remained unchanged: to collect resources from those treasure troves.

Meanwhile,

Heavenly Monarch Black Tower arrived at a hideout of the Dark God Society, meeting with one of its leaders.

“Black Tower, did you complete the mission?” the leader of the Dark God Society inquired.

“Failed!” Heavenly Monarch Black Tower replied. “We underestimated that monstrous Dao Child of Ten Thousand Laws. His combat strength might not be strong, but his life-saving means are terrifying. He has mastered the Great Immortality Technique to the extreme limit, and also the Blood River Immortality Technique, nearly reaching the minor accomplishment realm. His physique is incredibly powerful, though its nature is unknown. Additionally, he seems to possess a time-space related Chaos Divine Ability, likely the Time-Space Shift Technique. I couldn’t catch up to him, nor could I kill him in one strike.”

“What? Great Immortality Technique, Blood River Immortality Technique, Time-Space Shift Technique—how afraid of death must this Dao Child of Ten Thousand Laws be, mastering all these life-saving divine abilities!?” The leader of the Dark God Society was astonished.

Typically, a person could only master one or two chaos divine abilities due to limited energy and the immense cost of meeting the conditions required for such abilities. Even the most talented geniuses wouldn’t dare to attempt mastering multiple chaos divine abilities, as the cost would be ruinous even for True Ancestors. Hence, they assumed Ye Tian only knew a few Chaos and great divine abilities. Yet, Ye Tian had chosen to master all life-saving ones, showing an extreme fear of death.

However, they had no idea that Ye Tian possessed the Copy Talent, allowing him to continuously copy and integrate others’ talents, enhancing his own. Many of Ye Tian’s talents had reached the Super God level, allowing him to master all chaos divine abilities freely. The price Ye Tian paid wasn’t something others could understand, as each fusion involved tormenting his soul and body, akin to enduring endless epochs of torture. Such a cost was unbearable for most.

“Temporarily abandon the plan to assassinate Dao Child of Ten Thousand Laws!” the leader of the Dark God Society decided reluctantly.

“Understood!” Heavenly Monarch Black Tower responded.

Chapter 899: The Void Life Technique

TL: Etude

“Have they stopped trying to assassinate me?”

After collecting resources and venturing out a few more times without encountering any assassination attempts, Ye Tian speculated. It was apparent that his life-preserving abilities had made the other party temporarily abandon their attempts to kill him.

However, just because the attempts on his life had ceased didn't mean he was ready to let it go.

"Heavenly Monarch Black Tower, huh?"

Ye Tian harbored intense killing intent towards him. He didn't know the Heavenly Monarch Black Tower personally, yet the latter had come to assassinate him.

In secret, Ye Tian had inquired about the Heavenly Monarch Black Tower's identity. Although the details were unclear, it was known that he had recently appeared on the Heavenly Monarch Rankings, and his ranking was immediately impressive.

Some speculated that he belonged to the Dark God Society and was involved in the great upheaval in the universe. This guess aligned with the recent emergence of the Dark God Society in the universe.

Of course, there was also the possibility that a Heavenly Monarch had gained some fortune, drastically improving their strength and thus instantly securing a spot on the Heavenly Monarch Rankings.

But Ye Tian was certain that the individual was a member of the Dark God Society, especially given the assassination attempt combined with the above speculations. This confirmed the assailant's identity beyond doubt.

"Was the attack by the Dark God Society an autonomous act, or did someone hire them to kill me?" Ye Tian pondered.

The members of the Dark God Society were notoriously elusive and difficult to track down. Even if someone had placed a bounty on his head, finding the actual perpetrator would be challenging.

"I should cultivate a Chaos Divine Ability capable of marking targets. That way, if someone makes another attempt on my life, I can track them down!" Ye Tian thought.

Among the dozens to hundreds of Chaos Divine Abilities he had cultivated, none had the marking capability. Thus, he turned to the Void Sky Hall system to search for a suitable Chaos Divine Ability. Before long, he found one.

The Void Life Technique was a powerful Chaos Divine Ability, ranking among the top hundred out of the three thousand Chaos Divine Abilities. It specialized in tracking. Once marked by the Void Life Technique, the target wouldn't sense anything unless they possessed a special soul-type Chaos Divine Ability or had strength a whole major

realm higher. Otherwise, they would have no chance of breaking the Void Life Technique.

Once Ye Tian cultivated this technique to its extreme level, he could even mark a Grand Dao Realm True Ancestor with his Destiny Realm cultivation, spanning two major realms.

This showcased the immense power of this Chaos Divine Ability.

However, the cultivation difficulty of this technique was exceptionally high. It required the Void Talent, a fusion of Space Talent and Scent Talent.

While a Super God-level Space Talent was manageable, a Super God-level Scent Talent was extremely rare. The true challenge lay in merging the two.

Fortunately, Ye Tian had the ability to fuse talents, making this process easier. The only obstacle was that his Scent Talent hadn't yet reached the Super God-level; it was still at the God-level.

Elevating a God-level talent to the Super God-level was challenging and required the fusion of countless God-level Scent Talents. However, there weren't many individuals with God-level Scent Talents in the vast universe.

Ye Tian's ability to fuse the three main and twelve elemental talents into Super God-level talents over the ages was supported by sufficient quantities.

Yet, raising his Scent Talent posed an unknown time challenge.

Therefore, Ye Tian opted to use treasures to enhance it.

The Void Sky Hall system possessed treasures capable of elevating talents to the Super God-level. These treasures, while precious, weren't exceedingly rare.

The truly rare items were those that could fuse talents. Without such treasures, even the most talented individuals with bodies full of Super God-level talents wouldn't be able to cultivate Chaos Divine Abilities.

Immediately, Ye Tian exchanged for a treasure that boosted his Scent Talent to the Super God-level.

Then, he fused his Space Talent with his Scent Talent, creating the Super God-level Void Talent.

Afterward, Ye Tian began cultivating the Void Life Technique.

For Ye Tian, who had already mastered numerous Chaos Divine Abilities, cultivating one more was not particularly difficult. Furthermore, the difficulty of cultivating Chaos Divine Abilities at the Destiny Realm was much lower than at the Divine General level.

In addition, Ye Tian possessed the Super God-level Hypercomprehension Talent, and his soul had transformed to an incredibly astonishing degree. Therefore, cultivating a Chaos Divine Ability did not take much time for him.

In just a thousand years, he mastered the Void Life Technique.

“The Void Life Technique is complete. The Dark God Society or any forces that want to assassinate me—let’s see if you dare make a move this time,” Ye Tian said with a cold smile.

Following this, Ye Tian ventured out a few more times to gather resources from some treasure lands, but the rewards were minimal, each trip yielding only a few thousand points at most.

However, one day, Ye Tian returned to the Void Sky Hall, laughing loudly and casually revealing that he had discovered a vein of a precious material called Clear Spirit Jade. This jade was extremely valuable, with even a thumb-sized piece worth 100 points.

Moreover, Ye Tian deliberately traded a few pieces of Clear Spirit Jade with some disciples, with the total transactions reaching over ten thousand points.

Gradually, the news of Ye Tian obtaining the Clear Spirit Jade vein leaked out.

However, the truth was that Ye Tian’s discovery of the Clear Spirit Jade vein was entirely fabricated. In reality, he had exchanged some Clear Spirit Jade from the Void Sky Hall system and then traded it with other disciples.

In doing so, he did indeed lose some points, but only a few thousand, which wasn’t a significant amount. He did this to attract the attention of hostile forces. If he ventured out like this, perhaps the Dark God Society or other factions would attempt to target him again.

Indeed, he used himself as bait to lure out those forces and the Dark God Society.

Instead of drawing out those with malicious intent, he attracted Heavenly Monarch Peng Yu.

“Dao Child of Ten Thousand Laws, I heard you obtained a Clear Spirit Jade vein. Could we trade some?” Heavenly Monarch Peng Yu asked with a flattering expression. Although the Void Sky Hall system also traded Clear Spirit Jade, the price was exorbitant. Trading with Ye Tian was far cheaper.

As a Heavenly Monarch, Peng Yu had a high demand for points and naturally did not want to waste them.

Seeing the hopeful expression on Heavenly Monarch Peng Yu's face, Ye Tian sighed and said, "Brother Peng Yu, I actually don't have a Clear Spirit Jade vein. The news is false. The truth is, I exchanged some Clear Spirit Jade from the system and then traded it with other disciples."

"What? Why?" Heavenly Monarch Peng Yu was dumbfounded.

Heavenly Monarch Peng Yu believed Ye Tian because, as a Dao Child, Ye Tian had no reason to lie to him.

"To lure out the forces behind the attacks on me!" Ye Tian replied coldly.

"That's too dangerous!" Heavenly Monarch Peng Yu frowned.

"Not at all!" Ye Tian said with a smile. "Brother Peng Yu, you should know my life-preserving methods. I'm not exaggerating when I say that no one at the Heavenly Monarch level can kill me. Besides, this time is different from the last. I have mastered the Void Life Technique!"

"What? Dao Child, you've mastered the Void Life Technique?!" Heavenly Monarch Peng Yu was utterly shocked.

Chapter 900: Drawing Out the Enemy

TL: Etude

The Void Life Technique ranked among the top hundred powerful divine abilities in Chaos, particularly noted for its eerie and unparalleled tracking capabilities.

There existed a saying within the Chaos realm: provoke anyone, but never provoke a master of the Void Life Technique.

After all, offending some True Monarchs or True Ancestors might still leave room for escape. However, if one offended a practitioner of the Void Life Technique, without substantial backing, it was practically a death sentence.

Once afflicted by the Void Life Technique, evading the enemy's pursuit became exceedingly difficult, often without even realizing one had been targeted.

This was why the Void Life Technique was considered the most sinister and terrifying tracking divine ability.

Heavenly Monarch Peng Yu stared deeply at Ye Tian, feeling deeply shocked and somewhat fearful.

Fortunately, Ye Tian belonged to the Void Sky lineage and had a good relationship with him. They were not enemies; otherwise, he wouldn't even know the day he might meet his demise.

"Dao Child, if you indeed mastered the Void Life Technique, you could easily locate the enemy once they are drawn out," said Heavenly Monarch Peng Yu.

"Brother Peng Yu, I hope you won't leak this information; otherwise, we won't be able to draw out the enemy," Ye Tian advised.

"Understood!" responded Heavenly Monarch Peng Yu.

Although his strength surpassed Ye Tian's, Ye Tian held a much higher status as a Dao Child at the Heavenly Monarch level, capable of commanding him. Naturally, he wouldn't oppose Ye Tian.

Moreover, Ye Tian sharing this truth with him was a sign of trust.

"Dao Child, if you encounter any trouble, please notify me promptly. Even if I can't handle the enemy, Brother Tun Yue from the Void Sky Hall will certainly intervene!" Heavenly Monarch Peng Yu said hastily.

"Mm," Ye Tian nodded.

Although Heavenly Monarch Peng Yu ranked within the top hundred of the Heavenly Monarch Rankings, his strength was formidable, and few Heavenly Monarchs could threaten him. Besides, Heavenly Monarch Tun Yue from Void Sky Hall ranked among the top on the list, incredibly powerful, and feared no other Heavenly Monarch.

With their assistance, Ye Tian feared no faction.

Yet, Ye Tian didn't plan to request their help. This matter was his responsibility, and he believed he wouldn't be killed by a Heavenly Monarch. Moreover, he aimed to track the enemy's whereabouts this time, not to annihilate them all.

With his skills, Ye Tian's tracking and concealment abilities far surpassed those of Heavenly Monarch Peng Yu. Involving Peng Yu and others might instead disrupt his plans.

Far across the universe, at the Skyfire Sect.

Heavenly Monarch Blazing Sun and Heavenly Monarch White Eagle gathered once more to discuss matters regarding Ye Tian.

“Heavenly Monarch Blazing Sun, the Dark God Society failed in their assassination attempt on the Dao Child of Ten Thousand Laws last time. They even informed us to temporarily cancel plans to assassinate the Dao Child of Ten Thousand Laws, citing his strong survival abilities. Hmph, ridiculous!”

“It seems we can’t rely on the Dark God Society!”

He frowned, “With their capabilities, the assassination shouldn’t have failed. I suspect they fear retaliation after a failed attempt.”

“We can’t rely on the Dark God Society. We have to handle this ourselves. Moreover, the Dark God Society is shameless. If the Void Sky Hall were to purchase information from them, they would likely betray us! Although the Dark God Society doesn’t know our identities, it’s not impossible to trace us if they’re offered a substantial price.”

Heavenly Monarch White Eagle acknowledged that the Dark God Society was unreliable, known as parasites within Chaos, capable of any despicable act without any sense of honor.

However, the Dark God Society was audacious, willing to undertake any task for the right price, whether assassinations or trading rare treasures.

Therefore, many forces and powerful individuals sought out the Dark God Society.

“Blazing Sun, we cannot rely on the Dark God Society. We must depend on ourselves. If things go wrong one day, the Void Sky lineage will not spare us.

Moreover, that True Ancestor has been pressuring us. He has paid a significant price, and we have yet to produce any results. This situation is untenable!” Heavenly Monarch White Eagle said.

“Indeed! If we further anger the True Ancestor backing us, we are finished! Therefore, we must take action against the Dao Child of Ten Thousand Laws. Besides, I heard that the Dao Child of Ten Thousand Laws acquired the Clear Spirit Jade vein. If that is true, we will hit the jackpot this time!” Heavenly Monarch Blazing Sun said with excitement.

After deliberating, they decided to take action against Ye Tian personally.

However, they needed to disguise their identities to avoid being discovered.

In the Chaos realm, many treasures could alter one’s aura, even their soul’s aura. Thus, even if they attacked, the enemy wouldn’t know their identities.

Yet, their attack techniques and styles could still reveal their identities, which was the only drawback.

But Heavenly Monarch Blazing Sun and Heavenly Monarch White Eagle believed their strength was so great that killing Ye Tian would be easy. They wouldn't need any secret techniques or ultimate moves; using regular divine abilities would suffice to annihilate Ye Tian, hardly exposing their identities. Consequently, they began secretly gathering and purchasing treasures that could conceal their soul auras.

Not long after, they paid a hefty price and finally acquired two soul-type Chaos Supreme Treasures capable of altering and concealing their soul auras.

Then, they secretly made their way to the area where the Void Sky Hall was located, waiting for Ye Tian to appear.

Years passed, and Heavenly Monarch Blazing Sun and Heavenly Monarch White Eagle grew increasingly anxious, fearing Ye Tian might remain in seclusion for millions of years, which would completely ruin their assassination plan.

Fortunately, one day, Ye Tian finally emerged from the Void Sky Hall.

In the vast expanse of the starry sky.

Ye Tian appeared, and suddenly the starry sky transformed as two Chaos Supreme Treasures for sealing void descended upon him.

Abruptly,

Feathers manifested in the void, each feather brimming with lethal intent.

Great Divine Ability—Three Thousand Feather Transformation! Next, numerous great suns soared into the sky, bombarding Ye Tian. Another Great Divine Ability—Great Sun Heavenly Sky! These two Great Divine Abilities were not particularly famous; rather, they were quite ordinary. However, the attackers were so powerful that the mere power of these abilities was second only to the full-force attack of the previous Heavenly Monarch Black Tower.

“Sure enough, they’ve made their move,” Ye Tian had anticipated this and remained unflustered.

The Great Immortality Technique, the Blood River Immortality Technique, and a series of other methods were unleashed. Despite the attacks from the two Heavenly Monarchs of the Skyfire Sect, nothing could obliterate him.

“Damn it, the Great Immortality Technique and the Blood River Immortality Technique! That damn Dark God Society didn’t inform us about these!” Heavenly Monarch Blazing Sun exclaimed in both panic and fury.

The Dark God Society had only mentioned Ye Tian's strong survival abilities. He had assumed Ye Tian relied on the life-saving artifacts of a Dao Ancestor, not his own strength.

Had they known Ye Tian possessed the Great Immortality Technique at its ultimate level and the peak entry-level Blood River Immortality Technique, they would never have attempted the assassination so rashly.

"We can't kill the Dao Child of Ten Thousand Laws. Retreat quickly!" Heavenly Monarch Blazing Sun and Heavenly Monarch White Eagle decided to flee immediately.

At this moment, Ye Tian made his move in secret, unleashing the Void Life Technique. It transformed into two invisible marks, landing on Heavenly Monarch Blazing Sun and Heavenly Monarch White Eagle.
