

Temptation 501

Chapter 501: Charming Beauty

When Su Fan saw Zhou Xueman at the hospital entrance, there was no trace left of her usual strong businesswoman image.

She ran up to Su Fan immediately, wiping tears as she begged, "Doctor Su, you must save them this time, I'm begging you."

"As long as you can save them, I will agree to any terms!"

The reason Chu Lei was so beside herself was not unfounded.

She had already consulted with doctors from the Zhou family's private hospital and other medical friends.

The mortality rate of aflatoxin is extremely high, and patients exhibiting symptoms like Zhou Xueman and the others have rarely been saved in past cases.

Although she initially intended to prepare a nutritious meal for Zhou Xueman and the others, she still felt immensely guilty after her good intentions had led to this disaster.

Su Fan pushed away Chu Lei, who was clinging to his arm, and said, "President Chu, calm down, I must go save people first."

When Chu Lei had clung to his arm, her extremely full and exaggerated bosom had pressed completely against his arm.

This caused Su Fan to feel quite surprised for a moment, thinking to himself that Chu Lei, a mature woman in her thirties, could be quite charming?

Chu Lei was no longer a young lady in her mid-twenties but a mature and appealing woman of thirty-three, almost thirty-four years old.

Her looks were extremely beautiful, exuding maturity, grace, and poise, and as a deadly female entrepreneur within the province, her presence was incredibly strong.

However, Su Fan's first impression of Chu Lei was not very good; at that time, she seemed to him like a shrewish woman.

Of course, concern can cause chaos, and at that time, Chu Lei was worried for Zhou Xueman's safety, which was somewhat understandable.

After removing Chu Lei's hand, Su Fan went to save the patients.

At that time, Zhou Xueman and her beautiful assistant, Chen Meijia, were both in the emergency room.

Su Fan took a look and realized that the condition of both women was extremely dangerous!

He thought for a moment and then said, "Place them both in the same emergency room."

After saying that, he added, "However, their conditions are both very serious this time, whom do you want me to save first?"

"I can only guarantee that the person whom I treat first will be able to survive."

"The other person's chances of survival are not great."

As soon as Su Fan spoke these words, the faces of Director Zhang and the other doctors became very unsightly.

Chu Lei's complexion turned pale as paper in an instant.

At this critical moment, Zhou Xueman and Chen Meijia's conditions were extremely perilous, and only Su Fan was capable of saving them.

If any of the other doctors had a solution, they would have acted to save them long ago, they wouldn't have waited until now.

On the hospital beds, severe agony didn't allow Zhou Xueman and Chen Meijia to lose consciousness entirely.

Both were extremely weak, but they still retained a sliver of awareness.

Zhou Xueman spoke feebly, "Save Meijia first, I can hold on."

Her voice was as soft as a mosquito's, hardly audible without careful listening.

But fortunately, everyone around heard it clearly.

Unexpectedly, Chen Meijia also spoke up, "Save Sister Zhou first, my condition is a bit better than hers, and she is in critical danger now."

After saying this, Chen Meijia was in too much pain to speak further.

But Su Fan knew that what Chen Meijia said was true.

Her condition was indeed slightly better than Zhou Xueman's.

However, it wasn't significantly better; his initial diagnosis was still valid.

For the two of them, saving one meant she would surely live, while the chances for the other were not great.

Chu Lei bit her lip, then wiped her tears and said, "Save Xueman first, if anything happens to Meijia... I'll take good care of her family."

Her statement was undeniably somewhat extreme.

Because Zhou Xueman and Chen Meijia were both living beings, full of life.

Her words were almost like sentencing Chen Meijia to death.

Chapter 502 - 502 Saving Two People at the Same Time

Chen Meijia was already so weak that she couldn't speak, but she still heard the manager's words.

She certainly wished for Su Fan to save Zhou Xueman first, but the manager's words also made her feel somewhat bitter.

Su Fan didn't know what Chen Meijia and Zhou Xueman were thinking.

After preparing the emergency supplies, he took Zhou Xueman and Chen Meijia into the same emergency room.

After locking the door of the emergency room, Su Fan also began to treat both of them.

Su Fan first went to Zhou Xueman's side and began to undress her.

Zhou Xueman, although weak, was still conscious.

Seeing Su Fan's action, she asked very weakly, "Doctor Su, what are you doing?"

Su Fan said seriously, "I am going to give you acupuncture to prevent the toxins in your body from spreading."

After hearing this, Zhou Xueman had no more questions.

Su Fan, of course, hurried to give her the acupuncture.

While giving Zhou Xueman acupuncture, he was also using his Inner Strength True Qi to neutralize the toxins in her body.

The neutralized toxins turned into trickles of black blood that flowed out along the silver needles.

Fortunately, there was no need to perform Qi transmission through blood on Zhou Xueman this time; otherwise, with her being conscious, the beautiful CEO might not have been able to accept it.

After initially asking Su Fan a question, Zhou Xueman dared not delay his treatment further.

Moreover, she urged in an extremely weak voice, "Doctor Su, please hurry up."

"Meijia is my best friend, my best sister, I can't be without her."

When Zhou Xueman said this, Chen Meijia's consciousness had already weakened to the extreme.

Upon hearing Zhou Xueman's words, she couldn't hold on any longer and completely fell asleep, her consciousness fading away.

Then the device monitoring vital signs immediately emitted a buzzing sound.

At that moment, Zhou Xueman burst into tears, her beautiful eyes continually shedding small pearls.

"Su... Doctor Su, Meijia is in critical condition, forget about me, go save her!"

Zhou Xueman was almost overwhelmed with grief, her heart extremely anxious, yet there was nothing she could do.

Su Fan frowned, "I can't stop now; if I do, you will surely die too."

"The toxins in your body are mostly being dissolved gradually and are flowing out along the silver needles."

"If I stop now, it would be like throwing all our efforts away."

"Although I might be able to save Chen Meijia, you would definitely die!"

Hearing Su Fan's words, Zhou Xueman said in utter sadness, "Doctor Su, I beg you to save Meijia first, I can't let her be harmed because of me!"

"Doctor Su, I beg you, hurry and save her!"

Zhou Xueman's voice, already weak, was now quavery and somewhat muffled with sobs.

Luckily, Su Fan still understood, but he couldn't throw away all his efforts.

To now stop treating Zhou Xueman meant trading her life for Chen Meijia's.

He didn't stop his effort, but Zhou Xueman began to resist.

While he was inserting the needles, Zhou Xueman suddenly moved, nearly causing a disaster.

Her beautiful eyes, filled with small pearls, looked at Su Fan.

"Doctor Su, please, save Meijia!"

Concerned that she might continue to be uncooperative, Su Fan, after a moment's thought, could only say, "Miss Zhou, do you know that among those who practice martial arts, there is a group of people who are masters of Inner Strength?"

Zhou Xueman naturally nodded, as her status allowed her easy access to masters of Inner Strength.

However, she didn't understand why Su Fan was suddenly talking about this.

Chapter 503: Racing Against Time

After Zhou Xueman nodded, Su Fan chose his words carefully and continued, "Among these masters of Inner Strength, a very few have some extremely special constitutions."

"These masters of Inner Strength have an exceedingly strong yang energy and vitality within their bodies."

"Their life essence can, while replenishing vitality in a woman, dissolve all toxins."

"If you agree and are willing to keep the secret of this special constitution, I could use my life essence to save Chen Meijia in a moment."

What Su Fan said was half true, half false.

The special constitution he spoke of did exist, but he wasn't a master of Inner Strength with that special constitution.

The reason he could use his life essence to save Chen Meijia was, of course, because of his precious blood.

After all, one drop of life essence was worth ten drops of blood!

The healing effect of his life essence was even better than the healing effect of all his precious blood.

He just didn't know if Zhou Xueman would agree.

At this moment, Zhou Xueman's pretty face blushed slightly; she clearly knew what a man's life essence was.

After thinking it over, she looked at Su Fan very seriously and asked, "Are you telling the truth, or is this a lie?"

Su Fan seriously replied, "It is indeed true."

After he answered, Zhou Xueman nodded decisively.

"If this can truly save Meijia, not only will I keep the secret of the special constitution for you, but I will also give you other benefits you desire."

"But if you are deceiving me, and this cannot really save anyone, then I will never forgive you!"

While administering acupuncture to Zhou Xueman, Su Fan said, "I am now using the Acupuncture Technique and Inner Strength True Qi to save Chen Meijia. I can use my life essence to save you as well afterward."

"If you don't believe me, I can go save her first, then use my life essence to rescue you afterward."

When Su Fan earnestly discussed this matter, Zhou Xueman's pretty face turned crimson, "You are shameless!"

Even though she was extremely weak at this moment, she was also extremely embarrassed.

She was still virginal, and in her past ambiguous moments with Chen Meijia, they had merely caressed and kissed.

Although Su Fan's words were meant to save her, weren't they, in also doing so, taking advantage of her?

With many thoughts in her mind, Zhou Xueman then stayed still.

Her not moving made it extremely convenient for Su Fan to continue saving her.

Soon, all one hundred and eight meridian points on Zhou Xueman's body were covered with silver needles.

When the silver needles could no longer draw out the faint traces of polluted black blood, Su Fan began to remove the needles.

After his treatment, Zhou Xueman was completely out of danger.

Su Fan did not delay and went straight to Chen Meijia's side.

In terms of beauty and physique, Chen Meijia was not inferior to Zhou Xueman, but the two had different backgrounds; Chen Meijia lacked the powerful aura and the air of opulence that Zhou Xueman and Chu Lei possessed.

Coming to Chen Meijia's side, Su Fan removed all her life support equipment.

This made the already very dangerous Chen Meijia instantly become even more perilous.

But fortunately, Su Fan, without any hesitation, directly kissed Chen Meijia's fiery red lips.

He then deftly unleashed the furious dragon, and after a muffled sound, he quickly established the Grand Circulation connection with her.

His Inner Strength True Qi was already circulating between the two of them, sustaining Chen Meijia's life.

However, this still wasn't enough; Chen Meijia also needed to absorb his life essence to resolve the toxins that had penetrated her bones and internal organs.

Although he had mounted her hastily and pierced directly to the core, assaulting the flower bud,

he still distinctly felt that wonderfully subtle barrier; he had evidently once again claimed the first experience of a beautiful woman.

Yet this time there was a just cause; without doing so, he simply couldn't have saved her.

Chapter 504: Roller Coaster

Not far from Su Fan, Zhou Xueman had already struggled to sit up on her hospital bed.

Seeing Su Fan launching a fierce attack on Chen Meijia made her feel shy, curious, skeptical, and heartbroken all at once.

She felt shy because she had never experienced such things before; at most, she had kissed Chen Meijia and caressed her, feeling some pleasure.

Her curiosity stemmed from her wanting to know what exactly men and women needed to do together, and what it would feel like.

Her skepticism was because, having grown up, she had never heard that this could cure diseases.

However, she had noticed that Chen Meijia's condition was indeed gradually improving.

The heartbreak, of course, had its reasons too.

That ferocious, massive dragon of Su Fan's was as thick as her own arm.

Chen Meijia's small mouth simply couldn't accommodate such a terrifyingly huge creature.

She even worried that Chen Meijia would be torn apart by Su Fan.

Yet, despite this, Su Fan showed no sign of tenderness or mercy, continuing his relentless, drum-like barrage of fierce attacks.

During this process, Chen Meijia's pretty face also turned red to the roots of her ears.

Though she was somewhat dazed, she could still vaguely hear the conversation between Su Fan and Zhou Xueman and was aware of what she was experiencing.

She felt as if her whole body was falling apart, with waves of tearing pain surging up to her heart.

At the same time, she also experienced an indescribably sublime pleasure, soaring to the skies.

Su Fan seemed to be carrying her, ascending one peak after another.

She and Su Fan appeared to be riding the most thrilling and joyous roller coaster in the world.

Su Fan was launching such a frenzied attack for a reason.

Chen Meijia was awaiting the life-saving essence, so he obviously couldn't drag his feet.

However, his past battles had endowed him with incredible stamina; the volcano's eruption couldn't just happen on command.

By now, he had already attacked fiercely hundreds of times, but still had not reached the point of release.

Out of necessity, he had to subject himself to even more stimulation.

Just at that moment, Zhou Xueman, extremely worried, came to Su Fan's side.

Seeing Su Fan's crude, drill-like charge, she couldn't help but frown slightly.

Little did she know, it wasn't over yet.

Chen Meijia's delicate peaks were soon completely exposed to the air.

Su Fan then, under Zhou Xueman's shocked gaze, pressed the soft mounds flat like thin pancakes, then twisted them into other shapes.

In her panic, Zhou Xueman quickly slapped Su Fan's hand, "What are you doing? What does this have to do with the life essence?"

Su Fan gave a wry smile, "I'm not a three-second warrior. Without intense stimulation, I can't release the life essence."

His words, of course, left Zhou Xueman speechless.

But Zhou Xueman still felt that Su Fan was going too far.

If Su Fan applied more force, he would burst Chen Meijia's tender, soft mounds outright.

For a moment, she even thought about telling Su Fan that if he really needed stimulation, to come at her!

Chen Meijia had already sacrificed so much to save her; she also wanted to give something back to Chen Meijia.

Unbeknownst to Su Fan, he had never experienced such a scene.

This time, Zhou Xueman was seriously watching him battle with another.

This impelled him to finally unleash after charging fiercely for the seven hundredth time.

A massive quantity of life essence was instantly obtained by Chen Meijia.

This life essence was even more useful than Su Fan's precious blood.

In no time, Chen Meijia's complexion became better and better.

As she gradually absorbed the life essence, her long eyelashes fluttered.

When she opened her eyes, Su Fan just happened to "pop" back, like a diving dragon returning to the abyss.

"Ah!" Chen Meijia immediately screamed in pain.

Chapter 505: The Sprouting of Business

Seeing that Chen Meijia had truly awakened, Zhou Xueman was overjoyed.

But, thinking about the special way Su Fan had saved Chen Meijia, Zhou Xueman didn't know how to start explaining it to her.

After hesitating for a while, she could only stutter, "Meijia, you might not believe this..."

"But the Divine Doctor, Su, was really trying to save you just now...you should blame me!"

Zhou Xueman was responsible, and it was also because of her that Su Fan had to save Chen Meijia in such a manner.

Although Chen Meijia's cheeks were still flushed, she shyly spoke up, "Sister Xueman, it's okay, it's something every woman experiences, everyone has a first time."

After saying that, she continued, "And I also know that the Divine Doctor Su did it to save me."

"Although I was groggy just now, I could still hear some of what you were saying."

With that said, Zhou Xueman of course had nothing to explain.

However, such a method of rescue made Chen Meijia and Zhou Xueman unsure how to face Su Fan for the time being.

Su Fan, pretending that nothing had happened, spoke sternly, "You two, don't wander around. Stay in our hospital and rest for a while."

"If it's quick, five to six days. If slow, about ten days, and you'll be fully recovered."

"In the future, pay attention to the source of your food and the storage conditions, so you don't fall victim again."

Hearing Su Fan say this, Zhou Xueman and Chen Meijia, the two patients, could only nod their heads.

After Su Fan changed the topic, the atmosphere among the three became much lighter.

Zhou Xueman thought for a moment and earnestly said to Su Fan, "Doctor Su, don't worry, I'll keep your secret!"

"Also, if you have any requests, feel free to make them!"

Su Fan shook his head, "Healing and saving lives is my job, why should there be so many requests?"

"You came to the hospital for treatment, not to privately hire me for a rescue, there's nothing so particular about it."

Zhou Xueman, however, shook her head, "No, you've already saved me twice, and this time you saved Meijia too, I must thank you!"

Su Fan continued to refuse, "Really, there's no need."

He truly didn't need Zhou Xueman's gratitude; in saving lives this time, he could say he had already received great benefits.

However, Zhou Xueman wouldn't listen, she thought for a while, and even prepared an extremely generous thank-you gift for Su Fan.

"I have an office building near the suburbs, initially reserved for my own use, but I never quite decided what to do with it."

"How about I give you this building?"

Su Fan was originally prepared to refuse, but upon hearing such a thank-you gift, he hesitated a bit.

After pondering for a while, Su Fan spoke, "I can buy it."

Zhou Xueman's eyes sparkled, her interest piqued, "What do you want to use the building for?"

Su Fan honestly replied, "Later on, I might start a medicinal company, selling some self-researched Chinese proprietary medicines, medicinal teas and the like. In the future, I might also delve into medicinal baths and medicinal diets."

If Zhou Xueman hadn't witnessed Su Fan's miraculous medical skills before, she wouldn't have been interested in such a startup project.

These kind of projects have too many competing companies; a small startup company can hardly break through.

But, having witnessed Su Fan's miraculous skills that revived the dead, Zhou Xueman grew anticipative.

Su Fan's company might bring surprises not only to her but also to the whole of Yang City!

With that thought, Zhou Xueman said, "This building, consider half of it a gift from me, for the other half at a discounted price, how about investing in your company?"

"If you really manage it well, I can always invest more."

When others start a business, the seed round, angel round, and each subsequent round of financing are all tremendously exhausting.

Su Fan was very lucky, having met Zhou Xueman who owed him two lifesaving debts!

As long as his company could survive and had prospects, it would be easy to secure investment from Zhou Xueman!

Chapter 506 - 506 Wang Fei's Plan

The treatment was extremely successful; Zhou Xueman and Chen Meijia both were once again snatched from the jaws of death by Su Fan.

When Su Fan emerged from the emergency room to relay the conditions of Zhou Xueman and Chen Meijia to the crowd waiting outside,

Zhang Haitao and the numerous doctors at the hospital were at first startled. After all, as professional medical practitioners, they were well aware of how critical the situation was for Zhou and Chen.

In the hearts of those present, there was even a lingering sentiment that the lives of Zhou Xueman and Chen Meijia might have been drawing to an ultimate close!

But at that moment, Su Fan informed everyone that both Zhou Xueman and Chen Meijia had been saved.

After recuperating quietly in the hospital for a while, they would be able to be discharged.

This news was truly astonishing!

Zhang Haitao and the other hospital staff, after the initial shock, didn't know who led the charge, but suddenly started applauding Su Fan.

Soon, a wave of applause resounded down the corridor.

The many doctors of the affiliate hospital looked at Su Fan with even greater reverence than before.

Everyone was clear that Su Fan's medical skills had always been exceptionally high.

Yet today, these numerous doctors discovered that they had actually underestimated Su Fan's medical expertise in the past!

If he could save such severe cases, then in the future, so long as patients arrived at the hospital with a breath left in them, perhaps they could all ask Su Fan to attempt a rescue?

The tale of how Su Fan saved the two patients, Zhou Xueman and Chen Meijia, quickly spread all through the hospital.

Su Fan, already renowned, gained even more fame within the hospital.

This brought his reputation in the affiliate hospital to an all-time high.

While things went smoothly for Su Fan, luck seemed to have turned in Wang Fei's favor as well.

Wang Fei was a talented and beautiful woman, but she lacked a bit of luck.

Her abilities were not inferior to those of women like Bai Man and Yin Qianyue, but she lacked their extremely dazzling backgrounds.

This gave birth to the idea in her heart to marry into a wealthy family and ascend to the heights in a single step.

Wang Fei's target was Qi Tian, the eldest son of the chairman of Baiwei Pharmaceutical Group.

Alas, all of Qi Tian's attention was focused on Yin Qianyue.

In order to remove the stumbling block that was Yin Qianyue, Wang Fei had Su Fan attempt to conquer Yin Qianyue, wanting Yin Qianyue to be utterly discredited.

However, on Su Fan's side, mishaps occurred time and again, each time causing her plan to utterly collapse.

Wang Fei originally thought that it would take a long time before there might be a turnaround.

After all, Su Fan's progress in conquering and disciplining Yin Qianyue was "too slow."

What she didn't know was that Su Fan's progress was not slow at all; he had already tried many new and thrilling experiences with Yin Qianyue.

It was only because she had first set a trap to let Qi Tian catch Su Fan and Yin Qian Yue in the act, which Su Fan noticed,

that since then, Su Fan's attitude towards her had changed, along with his own attitude towards life.

However, Heaven favors the diligent, and Qi Tian, such a playboy, was not satisfied with only savoring Yin Qian Yue.

After her repeated implicit and explicit hints to Qi Tian many times, she had successfully gotten into Qi Tian's bed.

This was also why she hadn't been incessantly urging Su Fan to deal with Yin Qian Yue recently.

Although she wasn't certain yet that she could marry into a wealthy family, she had undoubtedly taken an extremely important step.

Continuing in this resolute manner, marrying into the Qi family seemed to be only a matter of time.

But now, there were two pressing problems that needed to be dealt with appearing before Wang Fei.

One issue was that Qi Tian's heart was still lingering on Yin Qianyue, which made her determined to catch Yin Qianyue in the act once and for all!

There was another, more serious problem: Qi Tian, this libertine who had played with too many women in the past, was now actually impotent!

Chapter 507 - 507 Dining Together in the Evening

At Wang Fei's home, she read Qi Tian's DNA test report over and over again.

For a playboy like Qi Tian to be extremely cautious was the norm; he wouldn't casually allow any woman to get pregnant, as that would bring about endless troubles.

Yet, after persistent efforts, Wang Fei had finally obtained his essence last night and sent it for testing at the hospital.

Wang Fei intended to use medical procedures for artificial insemination to create a "surprise pregnancy" and completely capture Qi Tian's heart, thus marrying into a wealthy family.

Looking at the test report in her hand, Wang Fei fell into deep thought.

After pondering, she finally came up with a somewhat viable plan.

"It seems, I'll have to find someone to be a sperm donor!"

"But who?"

She had already successfully gotten into bed with Qi Tian; even if Qi Tian's protective measures were rigorous, there was still a chance for her to get pregnant.

And Qi Tian was not entirely disinterested in her.

Especially after Qi Tian continually faced setbacks with Yin Qianyue, he needed a woman like her to accompany him every night even more.

To marry into a wealthy family, Wang Fei had clearly become obsessed.

At this time, she felt that as long as everything could be handled smoothly, she wouldn't mind sleeping with any man, as long as it was just once.

However, after much deliberation, she still decided to lock in Su Fan as the sperm donor.

Su Fan and she had been intimate before, and she didn't dislike Su Fan either.

In the past, she either took pills after the deed, or had Su Fan take protective measures, or performed oral so Su Fan didn't have the opportunity to impregnate her.

But this time was different; her recent progress with Qi Tian was good.

Even if she couldn't immediately catch Qi Tian in the act with Yin Qianyue, she planned to get pregnant with Su Fan's help first!

So, very soon, Su Fan received a WeChat message from Wang Fei.

"Xiao Fan, come over to my house for dinner tonight, I have something to talk to you about."

Su Fan was somewhat surprised to suddenly receive a message from Wang Fei.

After reading the content, he was even more surprised.

He had thought that Wang Fei was definitely urging him to hurry up with Yin Qianyue.

Unexpectedly, Wang Fei was inviting him over for dinner at her house.

After thinking for a moment, Su Fan replied with a message: "Should I come with Man Sister?"

On the other end, Wang Fei rolled her eyes and quickly typed a reply to Su Fan: "Don't tell Bai Man, or do you really think you're just coming to my house for dinner?"

"Where can't you eat? Coming to my house is naturally to do something meaningful."

Wang Fei had made it very obvious, and of course, Su Fan understood.

It wasn't a simple dinner at Wang Fei's house, but to do some "meaningful" things with her; frankly, wasn't that just to sleep with her?

By now, Su Fan was a late-stage Burst Force expert, with a body like a fiery furnace, marrow like mercury, and blood like a rainbow, extremely vigorous.

Without one or two women each day to help him quell his fiery energy, letting him release, the fire within him was too intense to subside.

Su Fan thought to himself: "Although I don't know what this woman is up to, if she's getting hot and bothered, why not take advantage of it?"

With that thought, he quickly typed a reply to Wang Fei: "Okay, Fei Sister, I'll come over to eat tonight."

After responding to Wang Fei, Su Fan started to seriously consider what exactly she was planning.

It couldn't be that she was feeling feverish again and wanted him to help lower her temperature, could it?

After getting Su Fan's affirmative reply, Wang Fei also breathed a sigh of relief.

Since Su Fan had agreed, the matter was nearly settled. With Su Fan's vigor and ferocity, if she didn't get pregnant, that would be really odd.

However, just to be on the safe side, before actual conception, it would be best if Su Fan "watered" her a few more times, which would be a treat for Su Fan.

Chapter 508: Down-and-Out Youth

Thinking about how he could go crazy with Wang Fei tonight, Su Fan was of course extremely happy.

Between him and Wang Fei, although there was an almost insurmountable thorn, he still had to admit that Wang Fei was a very perfect woman.

Whether it was her appearance, figure, temperament, or skills, she could captivate any man's soul.

Every time he was with Wang Fei, it was clearly a huge gain.

After all, a woman's youth is so fleeting, not meant to be spent recklessly.

While Su Fan was in a very pleasant mood, he saw a somewhat disheveled young man, full of hesitation, standing in front of the hospital payment window.

The clothes on the young man were very cheap, indicating he came from a poor family.

But what impressed Su Fan the most was that the other party wore a very thick pair of glasses.

The lenses were nearly as thick as the bottom of a beer bottle.

If that person wasn't naturally vision impaired, then it must be due to long-term eye strain that caused his frighteningly high myopia.

Moreover, it was obvious that his glasses frame was broken, yet he had not replaced it. Instead, he wrapped it with white tape and continued using it.

The young man exchanged a few words with the doctor behind the payment window, then just stood there, despondently.

At that moment, Su Fan was in a good mood and approached him.

The passing doctor saw Su Fan and immediately greeted him with a smile, "Deputy Director Su, hello."

Su Fan nodded slightly, "Hello."

The voice of the passing doctor, who greeted Su Fan, seemed to catch the attention of the despondent young man, who then also looked up and towards Su Fan.

From afar, Su Fan thought his glasses were frighteningly thick.

Now that he was closer, he discovered that the man's myopia was indeed extremely severe.

And from his experience, he surmised that it wasn't natural vision impairment, but rather, long-term eye strain that had resulted in the severe myopia.

Seeing the other party looking over, Su Fan asked curiously, "What's the matter?"

Chen Hanqing had never thought that such a senior doctor like Su Fan would actually engage with him.

Immediately, he hesitated a bit before saying, "Hello doctor, both of my parents have coronary heart disease, and I..."

Chen Hanqing couldn't continue his words.

Of course, Su Fan understood without needing him to finish.

Patients with coronary heart disease, like most patients with cardiovascular and cerebrovascular diseases, require long-term medication.

It's possible to reduce the dosage, but stopping the medication entirely could lead to unimaginable consequences.

Chen Hanqing's parents might have already stopped their medication, but this young man probably couldn't afford to buy the medicine.

After thinking for a moment, Su Fan then said, "I'll prescribe two traditional Chinese medicine formulas for you. Take them home and brew them for your parents to drink."

"I'll give you a week's worth. After it's finished, come back next week, and I'll front the money for the medicine. Whenever you have the money, you can bring it to me."

Chen Hanqing was completely stunned by Su Fan's words.

He could hardly believe that such a thing could happen.

Although his request was a bit excessive, he couldn't help but make it.

"Doctor, I don't know much about medicine, but wouldn't it be bad to suddenly change their medication?"

"Could you prescribe some of the medication they were taking before?"

"I'm currently unemployed and don't have any qualifications, but I can clean or do other things I'm capable of in your hospital,"

"I will work diligently and earn the money for the medicine."

In Chen Hanqing's eyes, there was a plea as he looked earnestly at Su Fan.

Unaffordable care and medications are very common in hospitals.

But someone like Su Fan, who was willing to extend a helping hand, was extremely rare indeed.

Of course, Su Fan would not let Chen Hanqing work in the hospital as a janitor because the hospital already had its janitors.

Chapter 509: Hospital Suffers Cyber Attack

Su Fan thought for a moment, then said to Chen Hanqing, "Your degree of nearsightedness is so high, it must be due to frequent overuse of your eyes. What do you usually do for a living?"

Chen Hanqing wasn't embarrassed to say it; although he was poor, he also survived by his own labor.

He immediately said earnestly, "Doctor, I usually collect old books and other recyclables."

"The severity of my nearsightedness is because I have always loved reading and programming since I was young."

"You might laugh, but with two steamed buns and a book, I can comfortably get through a day."

"When I'm not reading, I'm self-teaching programming."

"Actually, my programming skills already meet the requirements of those big companies."

"But I don't have a diploma. My family was too poor, so I dropped out after junior high."

"When I go for job interviews, because I don't have a bachelor's degree, they won't even let me fill out the registration form."

"However, I really love to write programs. Reading and programming are probably the only two things in life I find interesting."

Clearly, Chen Hanqing wasn't content to spend his life as a scrap collector.

So when he spoke with Su Fan, he couldn't help but say a bit more.

But that's how society is; academic qualifications are the key to opening doors. Without a diploma or degree, even if one has the ability, they still don't get the opportunity to even fill out a registration form.

Moreover, both his parents have heart disease, and he needs to take care of them. He nearly had no choice when it came to work.

Being from different fields, Su Fan didn't have much concept of programming.

However, just like a boxer who has calluses on his fists is bound to be skilled, Chen Hanqing's glasses were so thick that if he wasn't exaggerating, his programming skills must be impressive.

Thinking that he might need IT talent for the company he would be starting soon, Su Fan looked earnestly at Chen Hanqing and asked, "Can you show me your computer skills now?"

Upon hearing Su Fan's words, Chen Hanqing hesitated for a moment before nodding his head.

Su Fan continued, "Okay then, use the computer in my office to demonstrate. Will it take a long time?"

This time, Chen Hanqing shook his head, "I think five minutes will be enough."

These words, of course, left Su Fan completely bewildered, as he had no idea what the other party was going to do.

Still, he led Chen Hanqing into his own office.

Seeing Su Fan's tidy chair, keyboard, and desk, Chen Hanqing couldn't help feeling inferior again, "My hands are a bit dirty."

Su Fan said indifferently, "It doesn't matter, you can wipe them off afterward."

Chen Hanqing nodded, then sat down at Su Fan's computer.

The next moment, Su Fan saw him create a document, and then with his fingers flying over the keyboard like playing a piano, he quickly began typing.

Although Su Fan didn't understand computers, he could tell that Chen Hanqing absolutely had genuine skill, just never the chance to show it before.

He had initially thought Chen Hanqing would need about five minutes to demonstrate something.

Unexpectedly, after only two and a half minutes, there was chaos in the affiliated hospital!

The many doctors sitting in front of their computers were suddenly dumbfounded.

The screens of everyone's computers went black, displaying only the pinyin of Chen Hanqing's name!

At that moment, Chen Hanqing also said to Su Fan, "Doctor Su, the network environment of your hospital is very unsafe. It took me just over two minutes to paralyze all the computers in the hospital."

When Su Fan heard this, he couldn't help but curse inwardly, 'Damn,' what kind of IT wizard was this who in just over two minutes had brought down the entire hospital's computer system!

But Su Fan didn't dare to waste time and could only ask hastily, "The wards haven't been affected, have they?"

Chapter 510: Brain Cancer

Chen Hanqing nodded, "I only hacked into the computers in your office area."

At the same time, Director Zhang was fuming.

He had been enjoying a one-on-one video chat with a female doctor who was about to join their hospital, when suddenly the computer screen went black!

Not only that, but soon a bunch of doctors rushed to the door of his office.

"Director, something has happened, something has happened!"

"Our hospital has been hacked!"

"The two network engineers in our hospital are at a loss, they can't handle it at all, what do we do now?"

Before long, more and more doctors gathered around Director Zhang.

Zhang Haitao was stunned, "How could our hospital suddenly be under a hacker attack?"

"Did Old Wang and the other one go check it? And they couldn't handle it?"

While Zhang Haitao was asking the doctors, the Old Wang he mentioned also arrived at that time.

This Engineer Wang, actually quite skilled, was a senior network engineer, otherwise he wouldn't be in this line of work.

Seeing Engineer Wang, Zhang Haitao immediately asked, "Old Wang, what's going on? How were the hospital's computers attacked?"

Wang Liwei hesitated, and it took him a while to say, "Director Zhang, you might not believe this, but I've only seen this type of attack at the World Hacker Competition."

"I'm not clear why a hacker of that level would attack our hospital's computers; we should quickly report this to the security bureau."

"Not to mention me, even if the group of expert professors from the university came, they would be in the dark and unable to solve this."

Initially, Zhang Haitao didn't care much, but he knew Wang Liwei well and knew he was an honest person, not one to spout nonsense.

He could only ask again to confirm, "Is it really a world-class hacker attacking our hospital's computers?"

Wang Liwei gave a wry smile, "Director Zhang, how could I dare to make this up? Although I'm not competent enough, I've seen this before even if I haven't eaten the pork myself!"

"I'm really not exaggerating the seriousness of the problem; it truly is that level of cyber attack."

While the hospital was in chaos, Su Fan had, of course, already asked Chen Hanqing to stop hacking immediately.

He originally thought he was simply hiring a programmer for his company that was soon to be registered.

Now he realized one should not judge by appearances, nor can the ocean's depth be measured!

He had inadvertently discovered a top hacker; it was just unfortunate that the man had come from a wild background, never having had a chance to show his full capabilities.

But no matter, if there had been no opportunity before, there would be one from now on!

Su Fan was now even considering if he could get Chen Hanqing to hack into Wang Fei's phone to see what Wang Fei was really up to.

Of course, there was no rush for this.

He still needed to make sure about Chen Hanqing's reliability.

Once he spoke up, Chen Hanqing had momentarily restored the hospital's computer system.

But right after the task, Chen Hanqing turned pale, his heart lurched, and then he blacked out and collapsed.

Both his parents had heart disease, and so did he, although not coronary artery disease. He also didn't have money to get checked.

Every now and then, he would just faint from chest tightness and shortness of breath, and it would be a long time before he could wake up.

Having discovered such a talented person as Chen Hanqing, Su Fan naturally wanted to invest properly in him.

If he could make this person his own, it was clearly possible to hack into any company's or individual's computer or phone in the future.

Right away, Su Fan also took Chen Hanqing's pulse.

After taking the pulse, his expression immediately changed: "Cancer!"

His True Qi felt something wrong when it traversed through Chen Hanqing's brain!
