

Temptation 901

Chapter 901

When Zhen Bingyu brought up the topic, Ning Miaoqi couldn't help but ask, "Is it really okay for Su Fan to be with me like that?"

"Those men who slept with you have all ended up dead in the end."

Zhen Bingyu kissed Ning Miaoqi on her pretty face and said, "Why are we being so indirect?"

"You could just say that all the men who have been with me died in the end, not just those who slept with me."

With a smile, Zhen Bingyu continued, "Indeed, none of those men could survive."

"I overheard a few doctors from the Life Science Institute talking before. They said people like us can only mate with other genetically optimized individuals."

"Otherwise, we will be extremely dangerous to ordinary people."

"You have no idea how horribly that top-level guy at Paleyaborg, who forced himself on me and took my first time, died in the end."

When Zhen Bingyu spoke about this, there was a hint of satisfaction in her eyes.

She wasn't born a seductress but succumbed to some moral depravity after being violated.

Yet, it wasn't completely self-indulgence, but also carried some unexpected revenge.

At other times, matters between men and women could also cause some incurable diseases.

But it wasn't as deadly as with Zhen Bingyu, where men who had been with her would die miserably within three to five days.

Ning Miaoqi appeared as a cold and beautiful young woman to others.

But in front of Zhen Bingyu, she was a curious little girl.

"Do you think Su Fan is also a genetically optimized individual from some power?"

Zhen Bingyu certainly couldn't answer Ning Miaoqi's question.

Moreover, in Zhen Bingyu's view, Ning Miaoqi's statement wasn't entirely unreasonable.

If Su Fan's genes hadn't been optimized, how could Su Fan be so special?

However, this time there was a difference; Su Fan was naturally gifted with a unique constitution.

He had followed his grandfather from a young age to learn martial arts and medicine in the mountains, clearly not captured by any lab for genetic experiments.

While Zhen Bingyu and Ning Miaoqi were discussing Su Fan, he was busy with his own affairs.

Yin Qianyu had been securely tied to a chair, her legs thoroughly restrained, unable to close.

A machine resembling an impact drill then slowly began to operate.

Unable to move, Yin Qianyu quickly tensed her instep.

Then, she was taken to soaring heights by the machine, experiencing one peak after another.

The machine, unlike a human, didn't tire and could adjust its speed and intensity.

Yin Qianyue had never tried this machine before; this time, she truly suffered.

This machine wasn't as intense as Su Fan, but it was continuous.

Moreover, Su Fan exaggeratedly set it for four hours, which was enough to almost shatter her mind!

Su Fan, of course, was only trying to scare Yin Qianyue; if she found it unbearable, he would eventually release her.

Throughout the night, Su Fan spent time dealing with Yin Qianyue.

He studied various tools, which could even be described as instruments of torture, in Yin Qianyue's secret room.

These things could later be used, one by one, to handle Yin Qianyue.

At dawn, Su Fan left Yin Qianyue's villa and returned to his accommodation at Eastern Medicine Company.

He had many places to stay now; he could stay at Bai Man's house, or in the villa no. 5 that Ning Zhengde gave him.

He could stay at the affiliated hospital, the CEO's lounge at Eastern Medicine Company, or even in the employee apartments.

However, the place he would mainly reside in the future would probably be villa no. 5 in Bai Yulan's villa district.

He even considered buying another villa nearby to let the executives from Eastern Medicine Company stay.

Now he had Zhao Chunqiu, Xia Zhaonan, and these helpers on his side.

And he had formed an alliance of mutual support with the Ning family in Hangcheng.

But at this stage, within China's borders, they were more than capable of self-defense.

Once they left China, it would become somewhat dangerous.

Chapter 902

England truly lives up to its reputation as a former world powerhouse, and the Palia family from England is still beyond Su Fan's ability to deal with for now.

This is normal, as Su Fan has only been cultivating and developing for a short time, whereas those established families have undergone several generations, or even over a dozen generations, of development and legacy.

After freshening up at Eastern Medicine, Su Fan headed to work at the Medical University Affiliated Hospital.

Lately, he's been feeling like he's been running non-stop, rushing between Yang City, Tianhai, and Qinggang.

Hopefully, in the coming days, he can enjoy some peaceful moments.

Now that he is a master in the Gang Qi Realm, even if someone doesn't want him to enjoy peaceful days, it won't be easy.

When Su Fan arrived at the hospital, he felt a familiar sense of relaxation.

Although he encounters some troubles in the hospital, it's clearly not like outside, where he's easily faced with flashing blades and bloody battles.

At the hospital, Su Fan saw Zhou Jie.

Zhou Jie's job is somewhat unique; she serves as a bridge between the hospital and Eastern Medicine.

The better Eastern Medicine develops in the future, the higher her position in the hospital will obviously be.

Zhang Haitao, despite his numerous issues, has quite a keen eye.

Even though Eastern Medicine is just starting out, he invested heavily in it.

In the following period, things went pretty much as Su Fan expected.

He focused on treating the patients he took over and studied his medical skills intensively, without any unexpected events occurring.

The matter of him reaching the Gang Qi Realm seems to be unknown to his enemies or they cannot be certain about it.

However, the number of Gang Qi Realm experts who have died by his hands is enough; neither the Palia Castle nor others will likely send Gang Qi Realm experts to their deaths again.

In the days without anyone causing trouble, Su Fan was basically enjoying life.

During the day, he fiercely engaged Bai Man, and at night he indulged with Zhang Haitao's young wife, as well as Liu Qing, Su Ya, Yin Qian Yue, Wang Xiaoxiao, Shen He. He hasn't neglected any of them.

Since no one is troubling him, he can take turns to favor his numerous beloved companions.

If he takes them all to his Villa No. 5 at Bai Yulan, attending to three or four in a day, everyone could be taken care of by the end of the week.

While tirelessly pleasing these beauties, Su Fan also considered creating a better, more secure life for them all.

This made him pay more attention to his business with Eastern Medicine Company.

Time passed quickly, and before less than he realized, the preliminary competition of the China Famous Doctor Tournament arrived as scheduled.

The preliminary competition in Yang City was held at Yang City's First Hospital, which is the City First Hospital.

The preliminary competition of the China Famous Doctor Tournament was conducted in a written test format, with a total of twenty questions and a perfect score of twenty.

On the day the preliminary competition started, Zhang Haitao escorted Su Fan and Zhou Jie to the entrance of the hospital.

During Su Fan's participation in the tournament, Zhang Haitao had Zhou Jie take care of Su Fan.

This is to pave the way for Zhou Jie's work and life in the future; Su Fan is a standout figure, destined for greatness, so maintaining a good relationship with him is definitely not a mistake.

Zhang Haitao, however, didn't realize that Zhou Jie is more than just in a good relationship with Su Fan, as she has been with Su Fan countless times.

The three of them arrived at the entrance of the hospital, and Zhang Haitao said, "Xiao Fan, with your medical skills, I think there wouldn't be any problem going all the way to the national competition."

"But during this period, it's still better to let your sister-in-law be with you. If anything happens, she can communicate it to me, and you can focus on the competition."

After Zhang Haitao finished speaking, Su Fan nodded: "Okay, Director."

He was glad that Zhang Haitao let Zhou Jie be with him, allowing him to hold and play with her anytime he wanted.

Zhou Jie had already been tamed by Su Fan, so she had no objection to Zhang Haitao's arrangement.

Chapter 903

Doctors from all over Yang City are heading to the City Hospital No. 1 today to participate in the preliminary competition.

Although Su Fan is undoubtedly the first place, others can still compete for second and third place.

When Su Fan drove Zhou Jie to the City Hospital No. 1, he was driving with one hand while the other hand was caressing Zhou Jie's soft peak.

Zhou Jie said somewhat helplessly, "Don't do that, it's not good if others see it, and it's also dangerous for you to drive with one hand."

Su Fan casually replied, "Other people have trouble driving mainly because they can't react quickly enough at critical moments."

"I'm different; my reaction is faster than most people's. I won't panic, even if something happens."

Even though he said so, Zhou Jie was still uneasy: "I'll let you touch it all night if you drive properly now and focus on the competition later."

Su Fan disagreed, not only wanting to touch all night but also to fondle his way to the competition.

There are still quite a few traditional Chinese medicine practitioners in Yang City.

But traditional Chinese medicine and Western medicine are different; Western medicine has systematic study and assessment.

Traditional Chinese medicine lacks these things, and some practitioners are no more than mere quacks.

And some are simply frauds.

This kind of thing has brought more doubt to traditional Chinese medicine, which is already under suspicion.

So much that genuine traditional Chinese medicine successors like Su Fan, true Divine Doctors with real skills, are easily mistaken for frauds when treating people.

After being fondled all the way, Zhou Jie said helplessly, "Might as well cut it off and give it to you, so you can touch it all you want."

Hearing this, Su Fan was a bit displeased and pinched Zhou Jie hard, saying, "Sister-in-law, if you keep talking nonsense, even if you cry and beg me later, I won't stop."

Zhou Jie was so scared by him this time that she didn't dare to talk nonsense anymore, as Su Fan was truly too fierce.

If Su Fan kept pounding away even when she begged for mercy, it would be too much to handle.

Parking the car in the spot, Su Fan joined the other traditional Chinese medicine practitioners to enter the competition venue at the City Hospital No. 1.

The so-called venue was actually a temporarily set up computer room.

It was a big rectangular conference room that could accommodate a hundred people at once.

There were quite a few doctors here this time, but in the end, only seventy-plus doctors were able to enter the room for the written test.

Many other doctors without medical licenses had signed up but failed to successfully register and were not granted the qualification to compete.

A few among these might have real skills, but the vast majority were quite average, or even outright frauds.

After Su Fan and the others entered the computer room, the staff of the China Famous Doctor Competition also entered.

There were two staff members, one male and one female.

After entering the room, the young man in a suit spoke:

"For the China Famous Doctor Competition, you need to answer a total of twenty questions in the preliminary round."

"These questions are randomly drawn from the question bank, and each person's questions are different but of equal difficulty."

"There are eight simple questions, six average questions, four medium questions, and two difficult questions."

"The competition time is one hundred minutes, with a maximum score of twenty points. Results are issued immediately upon submission."

"This preliminary round will officially start in three minutes, so everyone, please prepare."

After the male staff member finished speaking, the many doctors were on high alert.

Their medical skills were not as advanced as Su Fan's, but it was still necessary to measure up against other doctors as Su Fan had done in the past.

Three minutes quickly passed.

Su Fan also started answering the questions along with the other doctors.

"Huh?"

As he started answering, Su Fan discovered that the difficulty level of the China Famous Doctor Competition was quite high this time.

Because even the first eight simple questions posed no small challenge.

Of course, that's true for other doctors; for him, there was no difficulty at all.

Because he had read about the relevant content of these questions in medical books.

Chapter 904

Su Fan's judgment was completely correct.

Someone tried to bluff, but got stuck on the first question.

Even if these people were given fifty minutes instead of five, they wouldn't be able to answer it.

The many Chinese medicine practitioners who had entered the arena full of enthusiasm now looked as heavy as if they were attending a funeral, after answering just a few questions.

The questions in this competition seemed incredibly difficult, leaving everyone at a loss.

Compared to the misery of others, Su Fan skillfully reached the last two questions.

While others needed to think of the answers, he could just directly transcribe what was in his mind from medical books.

The qualifying round was actually assessing the knowledge reserve of the many doctors.

Scoring twelve points would allow one to continue to the city-level competition.

Su Fan quickly completed his answers, submitted the test paper, and unsurprisingly, passed with perfect marks!

At this examination venue of the National Chinese Medicine Doctor Competition, two staff members could see everyone's scores in the backend.

Out of the hundred minutes allocated for the exam, Su Fan took only thirty to finish and leave, with a perfect score.

This left the two staff staring in confusion at Su Fan's departing figure long after he left.

Even though it was just the qualifying round, the last two questions were extremely difficult.

Normally, a score over fifteen points would be considered outstanding.

The two quickly reported this matter to the provincial authorities.

The doctors who could pass with full marks were all considered Divine Doctors.

After a hundred minutes, scores from all over China were out.

In Yang City, only Su Fan scored full marks, and he was also the only high scorer.

Other Chinese medicine practitioners in the qualifying round scored around twelve points.

Tang Sanchun did slightly better, scoring sixteen points, proving his renowned title as a Divine Doctor was well-deserved.

However, in Qing Province, including Su Fan, there were still four full scorers.

This shows that even in Qing Province, there are hidden talents, with three other exceptionally skilled Chinese medicine practitioners.

After the results came out, Su Fan received a text message.

Seeing the low level of other Chinese medicine practitioners in Yang City, he was somewhat helpless.

Many don't seem to know what they're doing usually and haven't read much in the way of medical books.

After the qualifying round, Su Fan was preparing for the city-level competition of the National Chinese Medicine Doctor Competition.

The city-level competition is not just a contest with other doctors from Yang City but with Chinese medicine practitioners from several nearby cities.

After that, it proceeds to the provincial competition.

However, the cycle of the National Chinese Medicine Doctor Competition is very long, much like electing a president in America.

After the qualifying round, the city-level competition begins three months later, followed by the provincial competition another three months after, and then three more months later is the national championship.

A top ten finish in the national championship would be venerated as a National Medical Sage!

This is the highest honor in Chinese medicine, typically only ten Chinese medicine practitioners receive this honor every four years.

Seeing Su Fan pass with full marks, first in Yang City and tied for first in the entire province.

Zhou Jie and other doctors at the hospital who heard the news were all very happy.

The happiest of all was, of course, the hospital director Zhang Haitao.

This time, Su Fan had achieved a major victory.

If this momentum continues, achieving first in the province is still very hopeful.

Compared to others' excitement and joy, Su Fan remained very calm.

After all, this was just a qualifying round, his goal has always been to win in the final famous doctor competition and become the top Chinese doctor of this generation!

On the way back to the hospital, Su Fan naturally held Zhou Jie's tender peak all the way back.

Since he had recently gotten a perfect score, Zhou Jie considered it a reward for him and didn't mind.

However, Su Fan's good days seemed to be numbered.

Chapter 905

There are many small countries in Southeast Asia, one of which is the Kingdom of Siam.

The national strength of Siam, compared to Baiyue and Myanmar, is mostly on par.

However, in Siam, there are quite a few peculiar martial arts sects, and they have produced some genuine martial arts masters.

Initially, after learning that Su Fan killed Zheng Chaoxi, Lin Tianhua did not dare to trouble Su Fan.

So this extremely skilled international assassin temporarily stayed in Siam.

He enjoyed the company of the wife and daughter of a Siamese prince, living a very comfortable life.

Not only that, but he also found a remarkable opportunity in the villa of the Siamese prince.

This opportunity was the Yin Gathering Technique secret of Tantric Buddhism, which involves gathering the yin essence and True Qi of women, especially female martial artists, during intercourse.

And it's not just limited to women; even some effeminate men with abundant yin essence could be subjected to this Tantric secret technique.

In places like Siam and North Korea, they might lack many things, but when it comes to effeminate men, they have an abundance.

The Tantric secret techniques have plenty of application in these two places.

While Su Fan traveled around the world, Lin Tianhua was not idle either.

In his area, most of these effeminate men were exterminated.

His power advanced to the early Gang Qi Realm!

At that time, an agent from the Palaia Fort found him, offering five hundred million US dollars to kill Su Fan!

Su Fan was still immersed in a happy life, unaware that Palaia Fort wanted so badly to eliminate him, continuously hiring assassins everywhere.

However, he was not worried; now that he had reached the Gang Qi Realm, he feared no assassins within the same realm.

Moreover, the transaction between Palaia Fort and Lin Tianhua was not yet finalized.

After becoming a Gang Qi Realm martial artist, Lin Tianhua's appetite grew; he demanded one billion US dollars to take the job.

The parties were still negotiating on this issue.

In the affiliated hospital of the medical university, the whole institution was in a joyous mood.

Su Fan's results in the preliminary round ranked first in the province, and everyone felt proud.

While others were celebrating, Su Fan went into Bai Man's office, pushing her down.

"Sister Man, do you want to go out and play around here?"

Bai Man, pressed underneath Su Fan, said with a little discomfort, "To play around, I'll go. To play with me, I won't go."

Having been with Su Fan for so long, she obviously understood the little schemes in Su Fan's mind.

Moreover, Su Fan was becoming more and more unrestrained, always initiating on her wherever they were, as if she had become an outlet for him.

Su Fan thought for a moment and said, "Sister Man, you have to go; I'll pick you up this weekend."

"This weekend we can go watch a movie or try an escape room."

There are many places to have fun in Yang City, and Su Fan wanted to leave marks of them everywhere in the city.

He wanted Bai Man's body and soul to be thoroughly imprinted with his mark.

He always had a special possessiveness toward this beautiful and charming aunt by marriage.

Bai Man had been extremely exhausted at work lately.

She really wanted to sleep at home during the weekend, so she just said, "Go with Wang Fei."

Su Fan half-jokingly said, "That's not okay; I want to pleasure both of you together."

Bai Man, hearing this, snapped back, "Aren't you afraid of overstraining yourself at such a young age?"

Su Fan nonchalantly replied, "I'm not afraid, as long as I can make Sister Man cry and beg for mercy every day."

To his unrestrained words, Bai Man naturally didn't indulge him: "Get lost! Who wants to be done by you."

This time, Su Fan didn't argue with Bai Man but instead lifted Bai Man's clothes and skirt, forcefully having his way.

He intended to subdue Bai Man first before reasoning with her.

But just then, his phone rang.

It was Chen Hanqing calling him, and he needed to take Chen Hanqing's call.

While he answered the phone, Bai Man obviously wanted to escape.

But Bai Man couldn't get away, and not only that, she was swiftly pierced by a sharp spear.

Meanwhile, Su Fan moved slowly while taking the call: "Hanqing, is something wrong?"

Chapter 906

Chen Hanqing called Su Fan this time to report something.

He quickly said, "Mr. Su, the bounty on you from the Paleria Fort on the dark web has increased from two hundred million US dollars to five hundred million US dollars."

Five hundred million US dollars is a huge sum, not just for ordinary people, even for most wealthy individuals.

However, given the background and earning ability of Palaria Fort, they can quickly make back that five hundred million US dollars after spending it.

Enemies like Su Fan are ones Palaria Fort might encounter only once every twenty or thirty years.

Spread out, it's actually not that much money.

If they can't deal with Su Fan and let him grow, the price Palaria Fort pays will only be greater.

Just recently, Su Fan killed Hoffman and others and rescued Ning Tianhe.

He also kidnapped Ning Miaoqi and Zhen Bingyu from Palaria Fort along the way.

Just from this incident, the direct and indirect loss Su Fan caused to Palaria Fort exceeded five hundred million US dollars.

Palaria Fort's high-level even made two remarks, one was to spare no expense to raise the bounty and kill Su Fan.

The other was to send Gang Qi Realm experts without criminal records from Pateria Fort to China to assassinate Su Fan.

After hearing this news from Chen Hanqing, Su Fan was not surprised.

With so many people on the island at that time, and unknown places possibly hiding various high-tech cameras.

In such a situation, it's understandable for Pateria Fort to know he did it.

Su Fan quickly ended the call with Chen Hanqing.

England's Pateria family, like a whip, would strike Su Fan twice whenever he stopped to catch his breath.

On the sofa, Bai Man's delicate white face was now flushed with red.

She was already very alluring, and in this state, she was even more alluring to the extreme.

Seeing her, a man would want to send her to the heavens, bringing her to one peak after another.

After Su Fan hung up the phone, Bai Man curiously asked, "Did something happen?"

Su Fan casually replied while slowly advancing towards Bai Man, "It's nothing, Sister Man."

Bai Man knew that she couldn't really help Su Fan much anymore.

But she still said, "Your medical skills in China's medical circles should be among the best."

"As for your current fortune, it's long surpassed a billion, even more."

"Logically, no matter what happens, I can't be of much help."

"However, regardless of what happens, I'm still willing to face it with you."

Bai Man was extremely grateful to Su Fan.

During the lowest point of her life, it was because Su Fan never gave up on her that she emerged from the valley.

After saying those words, Bai Man couldn't help but ask again, "So, is there anything I can do for you?"

This time, Su Fan nodded and said, "Sister Man, just reward me like this every day."

After hearing this, Bai Man was somewhat speechless but couldn't help but say, "Okay, I'll just reward you like this every day, hoping to make you weak early."

Su Fan laughed at these words: "Sister Man, Martial Artists are different from ordinary people. Martial Artists have strong energy and blood; as long as it doesn't decline, their physical functions won't deteriorate. You'll have plenty to endure in the future!"

With that, Su Fan suddenly made a strong move.

This time, Bai Man's beautiful face showed a few surprised expressions.

Su Fan's movements halted as well.

Because his movements just now were quite forceful, penetrating through an obstacle, entering a whole new realm.

At this moment, he and Bai Man were deeply fused in a way never before experienced.

If previously Su Fan only entered Bai Man's 'house,' this time, he entered the core 'bedroom' of Bai Man's house.

Chapter 907

Su Fan and Bai Man both knew what had happened at this moment.

In Su Fan's mind, he quickly recalled the contents of the medical book.

Finding that this might cause Bai Man to feel dizzy and nauseous, he prepared to leave.

"No!" But at this moment, Bai Man wrapped her legs around his waist voluntarily.

The medical book also mentioned that Bai Man might feel unwell, but she might also feel very happy.

After all, most women cannot obtain such a novel experience.

This kind of thing can only be said to vary from person to person.

Su Fan asked uncertainly, "Sister Man, are you uncomfortable?"

Bai Man first nodded, then shook her head, "A little, but... it's very wonderful."

After speaking, she quickly said to Su Fan, "But don't move randomly, I'm a bit scared."

Su Fan nodded, and simply held Bai Man up, the two sitting face to face.

At this moment, he seemed to be trapped by Bai Man, his smaller self ventured into a territory he had never explored before.

This was the mysterious place beyond the flower core in the secret garden.

According to the medical book, under such circumstances, women might feel nauseous, want to vomit, and feel a bit unwell.

But Bai Man showed no unwell reactions now, her radiant face, lively eyes, and heart racing like a startled deer.

All showed that Bai Man was happy now, indeed very happy.

Su Fan looked at her beautiful face and couldn't help but kiss her again.

He couldn't recall how many times he had explored Bai Man, but regardless of how many times, he still wanted to explore Bai Man.

At the same time, the Oriental Medicine Company, a special production workshop.

This production workshop had nothing to do with the business of Oriental Medicine.

Because this place was being used by Zhao Chunqiu.

Zhao Chunqiu was using martial arts True Qi, combining ancient methods, to forge Yangxuan Iron.

With the advancement of modern science, various materials and alloy proportions are evidently available.

However, the same material, if smelted using modern techniques, cannot achieve such an alloy as Yangxuan Iron.

Because during the forging of Yangxuan Iron, Martial Artists need to continuously inject True Qi, causing some magical changes in the materials.

The modern technology's furnace clearly cannot produce the vital force, which even in the vital force cannot give birth to martial arts True Qi.

Thus, the same material can only become Yangxuan Iron in the hands of a Martial Artist.

And when to inject martial arts True Qi, how to inject martial arts True Qi, all have significant details.

Thus in this world, aside from Zhao Chunqiu and Su Fan, there is no third person who can forge Yangxuan Iron.

Under Su Fan's treatment, Zhao Chunqiu recovered well.

He prepared to forge some weapons, then after a period of recovery, he planned to go seek vengeance against the Liu Sheng family in the East for the blood feud!

The cold weapons previously forged by Zhao Chunqiu at Su Fan's request, Zhao Chunqiu had already forged some.

After some days, these cold weapons should be almost completely forged.

Su Fan did not know about Zhao Chunqiu's progress.

In fact, after breaking through the Gang Qi Realm, he had the thought to help Zhao Chunqiu avenge.

However, this is a blood feud that exterminated a family, for Zhao Chunqiu, he clearly wished to personally take revenge.

So he waited for Zhao Chunqiu to recover and strengthen further, preparing for Zhao Chunqiu's state to improve more, strength to increase more, before avenging.

This time to help Zhao Chunqiu avenge, he also wanted to invite Xia Zhaonan, Ning Zhengde, and Ning Tianhe along.

The five of them, two Gang Qi Realm, three Transforming Qi Realm.

Their numbers are not many, but the strength is very formidable.

Together, they should be able to easily help Zhao Chunqiu avenge the blood feud that exterminated his family.

Far in the East, the Liu Sheng family was not unaware of Zhao Chunqiu, the fish who slipped through their net.

Even in the Liu Sheng family's view, Zhao Chunqiu and his son were both fish who slipped through the net.

Chapter 908

The Liu Sheng family was unaware that Zhao Chunqiu's son had died many years ago.

They always regarded Zhao Chunqiu, their mortal enemy, with extreme caution.

Although the Liu Sheng family could not compare to Parleya Castle, they were the vanguard of the Kawabata family.

Despite the Kawabata family being in the small land of the East, they were not easy to provoke.

This is a family that would stop at nothing to develop.

Murder, arson, tyranny, and all kinds of heinous acts were common in the Kawabata family's history.

In the early stages of their rise, most of the women in the family were even prostitutes, providing funds for their development.

Such a diabolical family, with no regard for rules, morality, and having no limits, is certainly very frightening.

Their development was naturally very rapid.

For the Kawabata family, morality and law were mere jokes.

Thus, even in the small land of the East, the Kawabata family had gained a power comparable to the Parleya family.

Some of their ruthless and unscrupulous traits even became inherited by most people in the East.

This made these individuals seem polite on the surface, yet fiercer inside, with no moral limits at heart.

With the Kawabata family's protection, the Liu Sheng family was living quite well, and developing swiftly.

The Kawabata family's intelligence network had even uncovered a crucial piece of information.

Someone had procured all the raw materials needed to prepare Yang Xuan Iron.

This was certainly not a coincidence; apart from Zhao Chunqiu, there couldn't be anyone else purchasing these materials.

Now, this intelligence had already been delivered to the Liu Sheng family by the Kawabata family.

Liu Sheng family, council chamber.

All the senior members of the Liu Sheng family were kneeling behind the low table.

Clearly, they were taking this matter very seriously.

After all, they had killed Zhao Chunqiu's entire family; as long as Zhao Chunqiu was not dead, he might do the same to them.

How could they possibly not take it seriously?

Su Fan was still unaware of the happenings across the ocean.

He also didn't know that the Kawabata family's intelligence network was so powerful, even specially monitoring the sources of Yang Xuan Iron materials.

At this time, he had already returned to his office.

His conflict with Bai Man had already ended earlier.

Su Fan was leaning on his seat, pondering over the grand plan to advance Yang City as a whole.

Logically, this was something that Jiang Gao, the mayor, needed to do, and for a city to rapidly develop seemed impossible.

But that wasn't the case; Tianhai and Qinggang also started off as mere small fishing villages.

Now, Tianhai is an international trade metropolis, and Qinggang is an important port that had once even caught the attention of Germans.

Although Yang City didn't have maritime advantages, it could seek development in other areas.

For instance, turning Yangcheng Medical University into one of the top three medical universities in China.

Making the affiliated hospital of the medical university one of the top three hospitals globally, as well as in China.

Turning his Oriental Medicine into one of the top three pharmaceutical giants globally, as well as in China.

In this way, all aspects of Yang City would be rapidly driven to develop swiftly.

Thus, he also needed two more titles: president of the Yang City Business Association and president of the Yang City Pharmaceutical Association.

Obtaining these titles wouldn't be difficult for him.

He was already the president of the Yang City Martial Arts Association, and he intended to guide the martial arts, business, and pharmaceutical realms of Yang City in the future.

No one knew of Su Fan's ideas at the moment.

A phone call that surprised him greatly also came at this moment.

It was a call from overseas, from Japan to be exact.

Chapter 909

Su Fan hesitated for a moment, but still picked up the call.

An elderly voice came through the phone.

Just by the sound, the caller seemed to be a kind elder.

"Hello, Mr. Su Fan. I am the head of the Yagami family from Japan, Yagami Takuji."

Su Fan was truly surprised that the Yagami family would contact him.

Although he didn't understand what was happening, he knew for sure that Zhao Chunqiu's issue must have been made known to them.

He immediately started recording the call on his phone, then asked, "What do you want?"

Yagami Takuji said, "Mr. Su Fan, we deeply apologize for the matter concerning Mr. Zhao Chunqiu."

"The Yagami family deeply regrets and feels remorse for our past crimes."

"For the mistakes made in the past, the Yagami family has proposed two solutions."

Su Fan didn't actually want to hear Yagami Takuji's solutions.

To repay debts and settle scores is perfectly natural, why bother to say these things now?

However, Yagami Takuji still presented the two solutions from the Yagami family.

"The first solution from the Yagami family is economic compensation for Mr. Zhao Chunqiu."

"On one hand, compensate Mr. Zhao Chunqiu with five hundred million US dollars, and on the other hand, provide him with the recipe and process for Yin Xuanjin."

"But correspondingly, Mr. Zhao Chunqiu also needs to fully disclose the preparation method of Yang Xuantie to the Yagami family."

Su Fan didn't even have to ask Zhao Chunqiu; he knew Zhao Chunqiu would disagree.

Moreover, he had only one ideal solution in mind, and that was to have the Yagami family pay with their lives.

They slaughtered Zhao's family members young and old, men and women; they should face equal punishment.

Seeing Su Fan staying silent, Yagami Takuji continued immediately.

"The other solution from the Yagami family is to let bygones be bygones."

"Since we've already inflicted irreparable harm upon Mr. Zhao Chunqiu."

"Then, to prevent Mr. Zhao Chunqiu from doing the same to the Yagami family."

"The Yagami family will take all necessary measures to make Mr. Zhao Chunqiu disappear from this world."

"Of course, we hope Mr. Su Fan will not interfere, otherwise it will inevitably affect the friendship between the Yagami family and Mr. Su Fan."

"In certain circumstances, the Yagami family does not rule out taking certain measures against Mr. Su Fan and his family."

After Yagami Takuji finished these words, even threatening Su Fan further.

Su Fan made his final response to the matter.

"The actions of the Yagami family toward the Zhao family will receive equal treatment."

"This is Zhao Chunqiu's opinion, and it's also mine."

"As for the Yagami family taking measures against me, I advise you to stay rational. Goodbye."

Once he finished speaking, Su Fan hung up the phone and sent the recorded call to Zhao Chunqiu.

Su Fan wasn't very concerned about the affairs of the Yagami family.

If he dared to confront Paria Fort, what does the Yagami family amount to?

However, having provoked so many enemies, caution is needed, as well as ensuring protective measures.

For instance, experts like Ning Miaoqi and Zhen Bingyu could be arranged to protect others within the Eastern Medicine Company.

In addition, he needs to find ways to attract more martial arts experts and cultivate the Eastern Medicine Company's own martial artists.

He himself also needs to continue improving.

If he manages to resolve the remaining fire poisons in his body, he could single-handedly flatten Paria Fort.

After finishing the work for the day, Su Fan returned to the Eastern Medicine Company for a long talk with Zhao Chunqiu.

Zhao Chunqiu was grateful to him from the start, and knowing his stance, he was even more willing to pledge his full effort after avenging himself.

After comforting Zhao Chunqiu, Su Fan went to find Chen Hanqing.

Chapter 910

Chen Hanqing is already among the high-income individuals now; as a top computer expert, this is certainly what he deserves.

However, his life remains very simple.

He is not simple for the sake of simplicity, but because he has no interest in lavish meals, exotic delicacies, luxury cars, or mansions.

At this moment, Chen Hanqing is eating a meat bun while reading a book.

As long as Su Fan and the company have nothing for him to do, he spends most of his time reading and studying.

He has always had extraordinary talent in computers.

Combined with his diligent efforts, his skills have naturally improved rapidly.

With his talent and burning the midnight oil, consistently working day and night, Chen Hanqing's level is now world-class.

When Su Fan visited Chen Hanqing this time, he noticed some new gadgets in his office.

One was a mechanical arm, and another was a heavily modified robotic vacuum.

He has clearly expanded from being a pure computer expert to entering the field of mechanical manufacturing.

He was so engrossed in his reading that when Su Fan entered his office, he barely reacted.

Su Fan casually found a place to sit down, not wanting to disturb his prodigy.

There are the talents of Bo Le, and then there are thousand-mile horses. Thousand-mile horses are common, yet Bo Le is rare.

In fact, thousand-mile horses are not common either.

Since Su Fan founded his company, eager to find talent, he hasn't found many thousand-mile horses.

Chen Hanqing reads quickly, and soon finished all the remaining books.

Then he realized Su Fan was already sitting in his chair, browsing the dark web.

After glancing at Su Fan's browsing time, Chen Hanqing immediately understood that Su Fan had been there for a while, and hadn't disturbed him earlier.

Touched yet slightly embarrassed, he said, "Mr. Su, I'm sorry, I was too focused on reading and didn't notice you."

Su Fan said indifferently, "It's alright, I didn't come for anything urgent."

Then he continued, "I see you've been researching these intelligent devices recently?"

Chen Hanqing nodded, "Yes, Mr. Su."

"I've been interested in computers and all kinds of electronic products since childhood; previously, I didn't have the resources, now that I do, I'm researching them a bit."

Su Fan continued to ask, "How do you feel after researching?"

Chen Hanqing answered honestly, "I seem to have a talent in both computers and electronic devices."

"I read these types of books very quickly and can remember a lot of things after reading them just once."

"Currently, I can finish a professional book in about one or two days."

"After learning a lot of related knowledge, I built a mechanical arm myself and modified a robotic vacuum."

After hearing this, Su Fan patted Chen Hanqing on the shoulder, saying:

"Keep researching. If you need funding, let me know, but be safe while researching."

"Once you feel your research is almost ready, I'm planning to start a technology company."

Upon hearing this, Chen Hanqing became very excited.

He's capable of limited achievements at Eastern Medicine Company.

Eastern Medicine Company is ultimately a pharmaceutical company.

His strengths lie in computers and intelligent manufacturing; his talent cannot be fully utilized at Eastern Medicine.

However, if Su Fan were to start a technology company in the future, his talents would clearly be further utilized.

Su Fan not only wants to research common electronic devices but also intends to start companies in Southeast Asia to study modern weapons in the future.

Of course, that's a matter for later on.

After encouraging Chen Hanqing to continue researching technology, Su Fan assigned him two tasks.

"Hanqing, keep a close eye on intelligence related to Paleyaburg and the Paleya family behind them, as well as the Liu Sheng family in Japan."

"Every now and then, compile and organize a report for me."

"Also, prepare for talent acquisition for the upcoming Eastern Technology Company."

"We want computer talents as well as other related talents."
