

The Game 101

Chapter 101: Tourist Souvenir! You Have to Hug the Legs of Qinglin Villa!

Tourist areas usually sold tourist souvenirs. These tourist souvenirs represented the characteristics of the tourist area. They had a collection and gift value.

Tourists don't collect tourist memorabilia because it's antique and priceless. It's a souvenir of a tourist's experience as a vehicle, an expression of the meaning and value of life.

Qinglin Villa did not sell any tourist souvenirs now, and this triangular plum plant could become one of them in the future. It could also represent the characteristics of the villa.

After the triangular plums were transplanted, not only did their quality decrease, but many of their attributes were also gone, such as attractiveness, the easy survival rate of transplants, ecological harmony, and appearance.

Quality 3 degenerated to Quality 2, but it still retained its attributes. After all, there was still Quality 2. It would definitely look good if it degenerated again.

Quality 2 degenerated to Quality 1, but it still retained gorgeous +1, ornamental +1.

If he continued to transplant with these potted plants, the quality and attributes would probably decrease again.

However, regardless of whether it was Quality 1 or 2, there were still some gorgeous and ornamental attributes left. That was definitely more beautiful than ordinary triangular plum potted plants, not to mention that it was in full bloom.

As long as the tourists who bought it back raised it carefully, the blooming leaves and flowers would definitely not be comparable to ordinary potted triangular plums.

The triangular plum plants had to be pruned regularly. The triangular plum plants produced by the game were of Quality 2 and 3. After pruning, the branches grew very quickly and would invade the tourist area. A few landscapers trimmed a lot of branches, and each pruning could nurture a lot of potted plants. It was perfect for recycling.

The triangular plums had no cost. The cost of cultivating the triangular plums was only some artificial and fertilizer soil and flower pots.

And for a family bonsai like this, ordinary single-colored flowers were cheap at 10 to 20 yuan.

That kind of multi-colored would have to be 30-100 yuan.

.....

After cultivating 7 colors, he would still need to spend the entire year. Even if his attributes were greatly reduced, it shouldn't be a problem for him to sell Quality 1 for 100 yuan and Quality 2 for 200 yuan, right?

The exact price could be read later.

The most important thing was that no one else could cultivate it. Even if a triangular plum cultivation base bought his potted plant and wanted to cultivate it themselves, its attributes would still decrease. It was far inferior to his potted plant.

Qin Lin had always been a decisive person. After confirming the attributes of the two triangular plum potted plants, he decided to cultivate them.

The small potted plants did not look like they were taller than a person. They could be transplanted with a flower pot and cultivated by cutting the branches. Tourists could even carry them around if they bought them. If tourists wanted to bring them back, they could even bring the high-speed rail up.

Because the Quality 2 and 3 triangular plums had the attribute of being transplanted alive, it was especially easy for the branches to be transplanted. The branches that he tried to cultivate had already grown roots again in half a month. Even the flowers on the original branches did not wither.

This also meant that the cultivation time was short.

However, there was a limit to the number of branches that could be trimmed with just the Quality 2 and 3 of the triangular plums.

Therefore, after the Quality 2 watermelon on the Quality 3 land was ripe and harvested, he controlled his game character to go to the Ore Town Seed Shop and directly bought the seven-colored symbiotic triangular plum seedling (group).

He planned to create some more mature triangular plums. Then, he would transplant these triangular plums to a special place for planting. They were especially used for transplanting potted plants. Only then would Qinglin Triangular Plums be able to form a scale.

After that, Qin Lin found Yu Shui.

Yu Shui was the best among the landscapers. When they first transplanted the triangular plums, Qin Lin asked Master Lin to help supervise them. At that time, Master Lin had also recommended Yu Shui.

"Boss, what are your orders?" Yu Shui immediately ran to Qin Lin.

Qin Lin instructed directly, "Yu Shui, Master Lin recommended you previously. He said that you're diligent, capable, and have good skills. I plan to hire some landscapers to find a place in the wasteland of the villa to cultivate the triangular plum potted plants. I plan to leave this matter to you. Go and see which piece of land is suitable later."

"Boss, no problem." Yu Shui's face lit up.

This was a promotion.

After leaving the hall, Yu Shui immediately ran towards the villa's wasteland time, wanting to do what his boss had instructed him to do.

People always wanted to grab onto opportunities.

Big shots had their opportunities, and small people had their opportunities. Even a small promotion and a raise in wages were opportunities for some people.

After Yu Shui went to the wilderness to find a suitable place, Qin Lin also moved the dozen or so triangular plum potted plants he had cultivated from the backyard to the hall and placed them on a table by the window.

More than ten potted plants were placed together, and the seven-colored flowers intertwined. It was really a competition for beauty.

As soon as these potted plants were placed, tourists entering the hall were attracted.

"It's a triangular plum pot. It's actually seven-colored like the ones in the Sea of Flowers."

"Although it's not as stunning as the Sea of Flowers, it's still very beautiful. It's petite and delicate."

"A few pots on the balcony would definitely be nice."

When Qin Lin heard the conversation of these tourists, he felt more confident.

Many flower friends would raise flowers in their homes and balconies and then take good care of them. Triangle plum potted plants were also the choice of many flower friends.

When they arrived at the bar, Qin Lin took out his phone and called Fu Hai's plastic packaging, Zhang Shi.

Not only could it be used to make milk teacups, but it also had to be made into all kinds of products for a small company in a small county. There should be injection basins among them.

Since he was going to get a potted plant, he was sure that there would be flowerpots. There were many kinds of flower pots, such as sandstone, porcelain pots, porcelain pots, and so on. He would only use these pots if he was crazy.

Naturally, he would follow the flow and use the injection basin. He could also create various shapes and base maps.

In the office of Fuhai Plastics, Zhang Shi looked at his phone. When he saw that it was Qin Lin's number, he immediately picked it up.

Qinglin Villa had already signed a long-term contract with him. Moreover, Qinglin Villa's medicinal honey water, fruit tea, milk tea, medium, and small cups could consume more than 2,000 a day, which was nearly 70,000 a month.

This was already a big client of his small company.

Moreover, he knew very well that Qinglin Villa would definitely consume more resources in the future. Everyone could see the construction projects at the villa.

Zhang Shi hurriedly picked up the call. "President Qin, what are your instructions?"

Qin Lin asked directly, "Can you supply flower pots? We also need the Qinglin Villa logo with the triangular plum blossom map."

"Sure." Seeing that business had come knocking, Zhang Shi said anxiously, "I wonder what requirements President Qin has for the appearance? Why don't we take a few popular-looking finished products up the mountain for you to choose from?"

“Alright, I’ll wait for you at the villa.” Qin Lin didn’t refuse.

After hanging up, Zhang Shi hurriedly left the office and went downstairs to make arrangements.

He didn’t dare to be negligent at all. He knew very well that if President Qin spread the news, there would definitely be people snatching this business. For example, Xiao Chen Packaging had failed the previous time.

The first thing President Qin called him now was the credit he had fought for during this period of time. He definitely couldn’t waste this opportunity.

After Qin Lin hung up the phone, he returned to the backyard and squatted down in front of the artificial water field to observe.

There were already seeds planted inside, but none of them seemed to be sprouting. It looked like they were about to fail again.

Although there was a chance that the Xiangshui Tribute Rice seeds produced by this game could mutate and adapt to the attributes of the geographical environment, the probability did not seem to be high.

In the afternoon, Zhang Shi arrived with seven different shapes and flowers of different colors.

The picture was still of a triangular sea of plum blossoms with the words “Qinglin Villa”. There were cute ones, strange ones, and normal ones.

As soon as he saw the strange-looking one, he immediately eliminated it. Damn it, turning a flower pot into a poop-shaped pot? Which genius came up with this?

In the end, Qin Lin still chose a more normal type. The potted plant sold flowers, so he couldn’t steal the limelight. His attention was attracted by the strange flower pot.

In the end, Qin Lin gave Zhang Shi 10,000 orders.

Zhang Shi naturally left happily. When he returned, he would definitely keep an eye on this batch of flower pots. He believed that these flower pots were definitely only the first batch.

He had to cozy up to Qinglin Villa.

Chapter 102: You Can Sue Her Now! Fishing Rod Upgraded!

After Zhang Shi left, Qin Lin received another call.

The number surprised him. It was Cheng He, who had come looking for him last time and wanted to be the agent for Qinglin Ketchup.

The other party’s call must have resulted from the previous incident.

Qin Lin picked up the call and Cheng He’s voice came from the other end. “President Qin, remember to watch Douyin tonight.”

Cheng He did not tell Qin Lin directly about Qinglin Ketchup’s agent. Instead, he talked about the ketchup market and promotion. This was also a disguised way of saying that he had the ability to be a good agent.

Qin Lin knew Cheng He's motive, but he was looking forward to the battle tonight.

At night.

After Zhao Moqing finished the statistics of the villa, Qin Lin drove her and her mother home.

After taking a shower and coming out of the bathroom, he saw Zhao Moqing shouting excitedly from the bed, "Qin Lin, look at this popular video."

Qin Lin leaned over to watch the video before a smile appeared on his lips.

The popular headline read: "So the counterfeit exposor Chun Chun was paid to defame Qinglin Ketchup. It wasn't because the assistant got the two ketchup types wrong."

The video also showed the chat records of Chun Chun and the person behind her.

This was a direct stone hammer.

.....

Qinglin Villa was very popular now. As more and more tourists tasted Qinglin Ketchup, there were also many good reviews. Coupled with Chun Chun's incident, even the popularity of Douyin's long-legged Internet celebrity was overshadowed.

The only thing that could surpass the popularity of Qinglin Villa was the news that the first leading Internet celebrity had been fined 1.3 billion yuan for tax evasion.

As soon as this video of Chun Chun was released, it immediately became a trending topic. Last time, she glossed over it, but this time, she didn't even have the chance to do so. Netizens definitely hated this kind of hypocritical Internet celebrity who used fake flags to make black money everywhere. For a moment, everyone cursed her.

"This is someone who exposes counterfeits? That's a direct hit."

"Hahaha, she's a goner."

"It's all right. Anyway, the fans are very gullible. Even if the stone hammer is hammered, there are fans who believe her."

"..."

Zhao Moqing felt happy that he had gotten his revenge. "Qin Lin, someone posted a screenshot of the comparison. After this video of her became popular, her fans started to drop."

Indeed, as a counterfeit exposor who had been paid to do things, her credibility was gone. It could be said that this account was useless now.

However, Qin Lin knew that this was Cheng He's doing. He was curious how Cheng He had obtained this chat history. Outsiders shouldn't be able to obtain the pure transfer records of the person behind this, right?

That had to make one think.

However, Cheng He's contract with Tasty had expired, and he wanted to represent Qinglin Ketchup. That shouldn't be the case either. The other party didn't seem like an idiot.

However, he could not get an answer by dwelling on this now. For the time being, this ending was what he wanted. The current situation was that Qinglin Ketchup was going to be popular again. This fake person had been purely hammered by a rock. It had also helped him vent his anger.

With that in mind, he took out his phone and called Cheng He.

"Are you satisfied, President Qin?" Cheng He's questioning voice came from the phone.

"I suddenly want to have a drink to celebrate," Qin Lin said. He probed jokingly, "But I'm curious. How did Mr. Cheng get that chat record? This should be the other party's privacy."

Cheng He smiled and explained, "I found out that Chun Chun was in Ming City at that time. I know one of the managers who checked into that hotel. I secretly found the other party's payment account. Coincidentally, my wife works at the bank. Although there were some violations, I also followed the clues and found out who the person behind it was."

"The market is big, but there are only a few ketchup agents. They always know something. Coincidentally, I know the person behind this. He's an agent of the American brand, Delmon. He has a very messy private life. I got someone to take some indecent videos of him. He's afraid that his wife will find out."

"So, it's just some chat records and transfer records. The other party handed them to me personally. What does the life and death of Chun Chun have to do with the other party?"

"Mr. Cheng, come to Qinglin Villa when you're free!" Qin Lin was not someone who did not keep his promises. Cheng He's explanation was simple, but these actions were definitely not as simple as just a few words.

After hanging up, Qin Lin said to Zhao Moqing, who was still watching the video with a smile, "Now, you can send a lawyer's letter to Chun Chun and sue her. Do you want to vent your anger?"

"Yes!" Zhao Moqing immediately said, "We'll look for Senior Brother Chu tomorrow to write an indictment. He's a barrister at Power Law Firm. We'll make Chun Chun lose everything."

...

The next day, he got up.

Qin Lin contacted Senior Brother Chu again. He would definitely sue Chun Chun. This was no longer about compensation, but attitude.

After that, he went to the factory.

The factory's waffle production line had been removed. Deng Guang had contacted a factory in the county that also made cookies and bought them. Coupled with an area that had been sorted out, it was not a problem for the factory to squeeze in and lower three production lines without exceeding the limit.

However, this kind of flow line could only produce 1,000 bottles an hour. 10 hours a day could produce 10,000 bottles.

Currently, four production lines could only produce 40,000 bottles a day. Even if the three production lines were expanded a few days later, there would only be 70,000 bottles a day and 2.1 million bottles a month.

RT-Mart had ordered 300,000 bottles, which would take five days to produce. In addition, a portion of the villa would also be consumed. After that, when the online sales opened, another portion would definitely be consumed.

That wasn't enough.

No matter what the product was, offline sales were still the mainstream. If he wanted to give Cheng He, the agent, offline sales would definitely have to be enough. 2.1 million bottles would definitely not be enough.

The key was that the villa's turnover had to be continuously invested in the ranch and the manor villa. With the addition of three production lines, they would have to invest all their turnover these days. They did not have enough funds.

As soon as Qin Lin arrived at the factory, Deng Guang came to report, "President Qin, the online sales department has already prepared and especially found a warehouse to package the goods. They are now discussing with Shun Feng, Shen Tong, and Yun Da... The person-in-charge of these express delivery divisions will see which one offers the best price."

Qin Lin subconsciously said, "Just don't look for a postal service! I have to go out of the neighborhood to receive it every time."

The link to this online order would be posted on the official account of the villa.

Qin Lin continued, "Old Deng, I've found an agent here. This small production is already not enough, but we don't have enough funds now."

Deng Guang said, "Then we'll recruit more people. We'll mix the new and old employees and implement a two-shift system. This way, the output can be doubled. The night production employees will be subsidized according to the regulations."

"Yes, subsidies are not a problem." Qin Lin nodded. This was also the fastest way at the moment. After all, their funds were limited.

Qin Lin and Deng Guang discussed some other problems with the factory before returning to the villa at noon.

In the afternoon, after dealing with the villa, Qin Lin controlled the game character to pick up the fishing rod and go fishing by the river.

The fish that had respawned today had yet to be caught.

[You have caught a wild black carp (Quality 1)]

...

[You have caught a wild bass (Quality 1)!]

After fishing several wild fish in a row, just as Qin Lin controlled the game character to throw out the fishing rod again, he received another notification:

[The fishing rod has met the upgrade requirements. You can go to the blacksmith shop to upgrade it to a Level 2 copper fishing rod!]

After receiving this notification, Qin Lin's eyes lit up. He immediately controlled his game character to retract his fishing rod and head to the blacksmith shop in Ore Town.

In Ranches Story, not only could the fishing rod be upgraded to catch more types of fish, but it was also more likely to catch high-quality fish.

Chapter 103: I Can Catch Ornamental Fish! The Aquarium Seems Not Bad Too!

In the Ore Town Forging Shop, Qin Lin received a notification through his game character:

[The fishing rod has been upgraded to a copper fishing rod. I heard that the owner of the seed shop can make a special LV2 bait. With the copper fishing rod, it can increase the chances of catching high-quality fish.]

[Copper Fishing Rod]

[Powered-up LV2. It can be used to fish deeper areas. Coupled with LV2 bait, it can be used to fish more types of fish. It has an increased fishing chance of catching Quality 2 fish.]

After reading the fishing rod's information, Qin Lin immediately controlled his game character to head to the seed shop.

The seed store sold bait. He wondered what the brains of this new version of the game planner were thinking.

In the old version of Ranches Story, the probability of catching a higher-level fish increased as long as the fishing rod was upgraded.

This new version seemed to be different. In addition to the LV2 copper fishing rod, it had to be specially equipped with bait.

Upgrading the fishing rod could accumulate more power, fish deeper, and then lure more advanced fish. This seemed reasonable.

Because there were six boxes of land and ringing water for sale in the game, as well as gold, silver, and copper from the mines, there was no shortage of game gold coins now.

[Bait: Level 2]

[The seed shop owner is a fishing enthusiast. This is a special bait he made. It needs to be used with the LV2 copper fishing rod in the game!]

From the information on the bait, it was obvious that it could only be used with the game fishing rod.

.....

After buying bait, Qin Lin controlled the game character to return to the riverside and started fishing again.

A moment.

A notification of a fish taking the bait appeared in the game. The game character pulled up the hook and a fish was brought out of the water.

[You have caught a wild bass (Quality 2)!]

He caught a wild bass of Quality 2 on his first try.

He controlled the game character to take the bait again and threw out the fishing rod. A moment later, another fish was caught.

[You have caught a wild black carp (Quality 2)]

[You have caught a wild bass (Quality 2)!]

Three fish in a row were all Quality 2.

The effect of the copper fishing rod and the bait seemed to be astonishing.

Previously, his LV1 iron fishing rod could catch 35 fish a day, but it was only 3-4 Quality 2.

Qin Lin continued to control his game character to fish.

There were still many fish that had not been caught today.

[You have caught a wild grass carp (Quality 1)]

[You have caught a wild ornamental flowerhorn fish (Quality 1)]

After Qin Lin finally caught a Quality 1 wild fish, he actually caught another ornamental flowerhorn fish.

This should be a new type of fish, an ornamental fish.

He immediately controlled his game character to continue fishing. He would catch all 35 fish today first.

[You have caught a wild grass carp (Quality 2)]

[You have caught a wild bass (Quality 1)!]

[You have caught a wild ornamental cichlid (Quality 1)]

...

[You have obtained a wild ornamental redbtail catfish (Quality 1)]

[There don't seem to be any fish in the river. Please wait for the refresh to resume!]

After Qin Lin received the notification that he had finished fishing today, he controlled the game character to retract his fishing rod and head towards the fish pond.

With the upgrade of the fishing rod and the open bait, of the 35 fish caught today, 24 were of Quality 2, eight were of Quality 1, and there were three other wild ornamental fish.

The wild fish of Quality 2 could not be eaten even if others wanted to, but he could not finish it at all.

24 Quality 2 wild fish a day meant 240 fish in 10 days, and 720 fish a month.

What would happen if 720 wild big fish were taken into the fish pond?

It would definitely shock everyone.

He could imagine that scenario, but then he would be in trouble too. He could only imagine.

However, he was curious about the three ornamental fish, the cichlid, the redbtail catfish, and the flowerhorn fish. Previously, the dwarf Arnie's fishing competition had given him a wild albino tiger fish of Quality 2 for him to sell for 650,000 yuan.

Now that the fishing rod had been upgraded, it could even catch ornamental fish with LV2 bait.

Moreover, it was only Quality 1 now. If the fishing rod was upgraded to an LV3 Silver Fishing Rod, it should be able to catch a Quality 2 ornamental fish that was at the level of the wild albino tiger fish last time, right?

Qin Lin thought about it and found an empty place to enter the game to replace his game character.

He walked to the fishpond and saw its statistics.

He skipped the ordinary wild fish with Quality 1 and 2 and directly looked at the information of the three ornamental fish.

[Wild Flowerhorn Fish: Quality 1]

[This is a very beautiful fish. Looks +1, texture +1, delicious +1!]

[Wild Cichlid: Quality 1]

[This is a very beautiful fish. Looks +1, texture +1, delicious +1!]

[Wild Ornamental Redtail Catfish: Quality 1]

[This is a very beautiful fish. Looks +1, texture +1, delicious +1!]

These were clearly three delicious-tasting ornamental fish.

Qin Lin really didn't understand ornamental fish, so he simply took out his phone and took a set of photos of all three fish. Then, he exited the game and took out his phone to look for Lin Sheng's WeChat number.

Previously, the commission for selling wild albino tiger fish was transferred to the other party through WeChat. Now, he could ask the other party about the price of these three types of fish.

After sending the photo, Qin Lin sent another message. "Boss Lin, help me look at the price of these three fish."

Lin Sheng quickly replied, "Mr. Qin, are you selling fish again?"

Qin Lin thought for a moment and said, "Boss Lin, this fish was distributed by someone else. I want to buy it, but I don't know the price."

He had no intention of selling the ornamental fish.

Since he could catch ornamental fish in this game, even if he could only catch three fish a day, there would be 30 fish in 10 days. That would be 90 fish a month, which meant 1,080 fish a year.

Moreover, the fishing rod would definitely be able to catch higher quality and more types of ornamental fish.

Then he could totally set up a small aquarium and take out ornamental fish from the game all year round. He definitely wouldn't lack fish.

When the rafting project and the restaurant project were completed, the tourists would eat at the restaurant. The hall would also be moved to the main hall of the rafting project, which was much larger than this place.

When the time came, the hall here could be transformed into an aquarium. The main building would not be affected and the interior would be empty. The main thing was that it would be more troublesome to modify the organic tempered glass and water cycle.

These still needed to be done professionally. Sun Ming's Youcheng County Construction might not even work. Then, it would be another project that could be diverted.

At this moment, Lin Sheng replied, "Mr. Qin, the appearance of these three fish is very good. However, the redbellied catfish and the cichlid are common ornamental fish. Their prices are similar and not too high. According to the quality, your two fish are about 4,000-6,000 yuan."

"On the other hand, that flowerhorn fish will be more expensive. According to the quality, it should be about 10,000 to 20,000 yuan. Naturally, this is only a preliminary observation. I can only judge the details when I see the fish. After all, many situations can affect the price."

After obtaining this price, Qin Lin roughly understood. Although it was far inferior to the wild albino tiger fish, the price of this Quality 1 flowerhorn fish far exceeded that of the Quality 2 wild grass carp, bass, and black carp.

Wild grass carp, bass, and black carp still had a lot of nutrients, but they could not compare to the quality of the flowerhorn fish.

Therefore, people often said that one could not be superficial. However, in this era where looks mattered, even if one was full of talent, one might not necessarily be able to compare to someone who was superficial.

The company required good facial features to recruit employees. Didn't men choose their girlfriends because they were good-looking?

There were definitely men who did not pay attention to appearance. He was definitely not there for milk tea because the server was young and beautiful.

But most men who said they didn't care about a woman's appearance should be lying, right?

There had to be a bottom line, right?

Chapter 104: With Honor! Bring the Copper Fishing Rod to Fish!

Qin Lin thought about it and sent another message to Lin Sheng. "Sorry to trouble you, Boss Lin. I remember that Boss Lin sells aquariums. I want to order one."

Until the rafting project and the restaurant project were completed, the aquarium transformation could not be carried out.

On the other hand, after the sales center was opened, the place where the shelves were originally placed in the hall was withdrawn. It was much emptier, but it also looked too empty. Since he had caught some ornamental fish in the game, he decided to buy an aquarium to decorate it first.

When Lin Sheng saw that business was here, he immediately replied, "I wonder what kind of aquarium you need, Mr. Qin? Or you can tell me your request and I'll recommend it to you."

Qin Lin had never studied this before, so he told Lin Sheng his request.

A moment later, Lin Sheng replied, "Mr. Qin's request is to at least display a dual temperature-controlled aquarium. I happen to have one here. I originally wanted to use it myself, but I can transfer it to Mr. Qin first. However, it's a little expensive and costs 5,000 yuan."

"Alright, I'll order this," Qin Lin replied before transferring 5,000 yuan to Lin Sheng.

"Mr. Qin, you're straightforward. In that case, I'll give you a small spare container and some water tank decorations." Lin Sheng sent a smiley emoji and then sent another message. "Mr. Qin, send me the address. It might be too late today. I'll bring someone over to install it for you tomorrow."

Qin Lin also sent the location of Qinglin Villa to Lin Sheng.

In Huimai Ornamental Fish Shop, Lin Sheng was already working on his computer to fill in a shipping message. It was naturally impossible for him to send the exhibition aquarium alone.

He still remembered this Mr. Qin very well. After all, the 650,000-dollar wild albino tiger fish had made him a broker and earned him a commission of 13,000 yuan.

Seeing that he had received another message on WeChat, he immediately picked up his phone. It should be from Mr. Qin. He had sent a specific location.

"Qinglin Villa?" Lin Sheng was stunned.

.....

He naturally knew about Qinglin Villa. Right now, this villa was extremely popular in Youcheng County. It had a triangular plum blossom sea, medicinal honey water, Qinglin Ketchup, and was always popular. He could often see it in Douyin.

Qinglin Villa was about to become Youcheng County's business card now. After all, the trending videos about Douyin were searched online. When introducing the location of Qinglin Villa, the word Youcheng County naturally appeared.

As someone from Youcheng County, he would have a special strange feeling every time he watched a video of Qinglin Villa.

Now that he saw people talking about Qinglin Villa in some WeChat groups, he couldn't help but say, "That's from my hometown, Youcheng County."

When the scenic spots of his hometown were known, he actually felt honored.

"Qin Lin, Qinglin?" Lin Sheng subconsciously sent a WeChat message to Qin Lin. "Mr. Qin is the boss of Qinglin Villa?"

"Yes." Qin Lin had no need to hide it from Lin Sheng. "I'll send Mr. Lin a few tickets to the Sea of Flowers tomorrow. Mr. Lin, bring your family over to play when you're free."

Lin Sheng found it unbelievable that his wife and a few close friends were discussing who the boss of Qinglin Villa was. It turned out that the boss of Qinglin Villa, who had always been popular, was on his social media. He even knew him.

He immediately called his wife with a hint of smugness. "Wifey, didn't you say that you wanted to go to Qinglin Villa to play? It turns out that I know the owner of the villa. He said that he would give me a few tickets. I'll take you and our son to play in the next few weekends."

...

Early the next morning.

Not long after Qin Lin moved the items from the game to the villa, Lin Sheng arrived with his men. He drove the three-wheeled truck to the villa's main hall.

The moment Lin Sheng saw Qin Lin, he said very warmly, "Mr. Qin, we meet again. I didn't expect you to be the boss of Qinglin Villa. Where do you want this aquarium?"

"Boss Lin, put it over here." Qin Lin led Lin Sheng into the hall and pointed at a spot.

"Alright, I'll install it for Mr. Qin now." Lin Sheng instructed someone to carry the water tank and seriously assembled it on the original shelf.

After some time, Lin Sheng installed the aquarium and filled it with water. He also arranged stones, water plants, and other arrangements inside.

When it was done, even if there were no fish in the aquarium, it was already somewhat beautiful.

After there were no problems with the test, Lin Sheng chatted with Qin Lin again. He explained the matters and gave some suggestions for raising fish. In addition, he gave him fish fodder and said that if there was no fish fodder in the future, he would send it over immediately.

Qin Lin naturally returned the favor by giving the other party a few tickets to the Triangular Plum Blossom Sea.

After sending Lin Sheng off, Qin Lin entered the game with the small container Lin Sheng had given him.

There was no problem with this small container containing a few fish that were not too big. It could be used as a transportation tool.

Qin Lin brought the three ornamental fish out of the game and placed the wild cichlid, flowerhorn fish, and redbtail catfish into the aquarium.

In an instant, three fish started swimming in the aquarium, adding life to it.

Qin Lin put in some fish food and the three fish wandered over and wolfed down the fish food.

“Boss, you bought ornamental fish?” Gao Yaoyao entered the hall and went to the aquarium in surprise. “These three fish are so beautiful.”

“Yaoyao, take care of this aquarium in the future.” Qin Lin nodded and instructed Gao Yaoyao. He also told her about the things to take note of.

Then, Qin Lin thought of something and entered the game again.

When he came out of the game again, he was already holding a fishing rod and a small ball of fish food.

It was the LV2 copper fishing rod from the game and the matching LV2 bait.

There were many magical props in Ranches Story, such as statues, secret treasures, and flying stones...

Such things carried some ability that was difficult to understand in reality.

Food could still have game effects in reality, but he did not know about these props.

Now, he could take out the fishing rod to experiment. The best way to experiment was naturally to fish, not to go to the fish pond. The fish pond was small, and there were too many fish to verify.

He was going to fish at the reservoir.

This reservoir was more than 60 years old. It was large and the water was deep. There were many fish in it, especially at the intersection. There were also large wild fish there. It was a good time to test the effect of the copper fishing rod.

Qin Lin was about to go to the reservoir with his fishing rod and bucket when he was surprised to see Chen Shengfei walking into the villa with the two of them.

One of them had seen him before. It was Chen Shengfei’s driver. The other was a middle-aged man.

“Boss Qin, I’m here to disturb you again.” Chen Shengfei smiled when he saw Qin Lin.

“Mr. Chen, it’s my honor to have you here. How can you be disturbing me?” Qin Lin praised him before looking at the middle-aged man and asking, “Who is this gentleman?”

Chen Shengfei smiled and explained, “His name is Lu Jianxian, the boss of a company I’m cooperating with in Ming City. Today, while I was discussing something with him, I secretly came to your place to try some wild goods.”

Lu Jianxian looked at this scene in confusion. He knew about Qinglin Villa because Chen Shengfei had been defamed here before. However, he felt that Chen Shengfei's identity was a little too polite to the owner of the villa.

At this moment, Chen Shengfei also introduced to Lu Jianfei, "President Lu, this is Boss Qin from the villa. He's very popular here and Li Qing comes here often."

When Lu Jian heard Li Qing's name, he was shocked. He immediately smiled and shook hands with Qin Lin. "Boss Qin, Chairman Chen and I have suddenly arrived. Sorry for disturbing you."

Chapter 105: Are They Here to Restock?

Lu Jianxian might now know why someone like Chen Shengfei was so polite to the boss of such a villa.

Li Qing probably didn't just come here often, right?

If the other party was just here to play, why would Chen Shengfei have such an attitude?

Qin Lin naturally didn't know what Lu Jianxian was thinking. He just felt that Lu Jianxian didn't have the humility that Chen Shengfei and Marlewen gave him, even though he was smiling.

Chen Shengfei saw the fishing rod in Qin Lin's hand and asked curiously, "Boss Qin, are you going fishing? To the fish pond?"

Qin Lin smiled and said, "I'm going to the reservoir. It's an old reservoir that's more than 60 years old. There are many wild goods there."

"Mr. Qin, wait for me. I'll go with you." Chen Shengfei suddenly became interested and instructed the driver at the side, "Go to the parking lot and help me bring in the two fishing rods in the trunk."

Previously, he had also seen the news of an old reservoir letting out water. There were dozens of wild big goods under the reservoir.

The reservoirs that had been holding water for decades were actually natural fish reservoirs. It was just that it was usually difficult to catch large goods at the bottom of the reservoirs.

Hearing Qin Lin's words, as a fishing enthusiast, he was really eager to try.

The driver heard the order and turned toward the parking lot of the villa.

Seeing Chen Shengfei's expectant expression, Qin Lin could only wait.

Not long after, the other party's driver returned with two fishing rods, fish food, and a bucket containing hooks, wheels, drops, drifts, and other items.

.....

This thing was quite complete.

Who would have thought that a tycoon like Chen Shengfei would have these things in his car?

"Boss Qin, let's go!" Chen Shengfei said and handed one of the fishing rods to Lu Jianxian. "Old Lu, this is for you."

Lu Jianxian was a little helpless. He had long heard that Chen Shengfei liked to fish, but he really didn't. Didn't he say that he brought him here to eat delicious wild goods? Why did he drag him out to fish?

It was already winter. Wouldn't it be torture to go to the reservoir?

However, although their company was partners with Chen Shengfei, their company relied on him more. He did not dare to refuse and could only follow behind with his fishing rod.

Qin Lin led Chen Shengfei and Lu Jianxian to the east side of the reservoir.

Their villa was close to the west, not far from the reservoir drain.

Most fishermen knew not to fish in the reservoir drains. Firstly, the current was strong. Secondly, there would not be any big fish in this area, so they had to walk in.

But not long after, Qin Lin saw another unexpected person.

Wasn't this Liu Hua?

The other party seemed to be darker than before, and his face was much more haggard. He was walking out with a bucket that seemed to be filled with many fish and prawns.

Could this guy still think that he could catch wild albino tiger fish here and was still trying?

What was wrong with having this tenacity?

Liu Hua was still a little embarrassed when he saw Qin Lin. He was secretly catching wild albino tiger fish here. He really didn't want to bump into Qin Lin unless he really caught the fish.

Qin Lin couldn't be bothered with Liu Hua and continued walking in with Chen Shengfei.

Liu Hua looked at the fish, crabs, and prawns in the bucket and frowned.

Although these things could be sold for some money, why couldn't he catch a wild albino tiger fish?

He even broke up with his girlfriend in order to catch this fish.

How could he be satisfied until he caught one?

He watched Qin Lin leave and secretly followed him.

He felt that the location the other party mentioned previously was definitely a lie. The location where the other party caught the wild albino tiger fish was definitely not that area.

...

Not long after.

Qin Lin brought Chen Sheng to a relatively stable spot in the middle of the reservoir.

There happened to be a small, sloping terrace, a good spot for fishing.

The conditions were limited, so he could only find a rock to use as a stool.

Chen Shengfei followed suit. When fishing, he could overcome many situations.

On the other hand, Lu Jianxian was a little helpless. His butt hurt from sitting on the rock.

After Qin Lin sat down, he took out the LV2 bait from the game and threw it out. The hook and bait instantly fell into the water.

When Chen Shengfei saw Qin Lin use the rod to pierce through the bait and throw it away, he said in surprise, "Boss Qin, is fishing this simple?"

He used fishing rods that he had assembled himself. Every fishing line and float had to be tuned, and then the bait had to be mixed by hand. He had even specially consulted a fishing master and knew how to fish with a high success rate.

Boss Qin seemed a little casual to him. He didn't even have a net.

As Chen Shengfei thought about it, he continued to adjust his fishing rod. When he adjusted his fishing rod, he was surprised to find that the fishing rod in Qin Lin's hand had started to shake.

A fish had taken the bait.

"So soon?" Chen Shengfei was a little surprised.

Qin Lin reeled in the line. It was a tilapia fish. He was a little surprised to remove the fish from the hook.

Although he was not good at fishing, he had seen others fishing in the reservoir. They might not come up for half a day. How long had it been since he had casually thrown it down?

This should be the effect of the LV2 fishing rod and LV2 bait.

With that in mind, he loaded the bait again and swung the fishing rod in another direction.

A moment later, Chen Shengfei also prepared the bait and threw the fishing rod out.

Seeing that Qin Lin had caught one so easily, he gave up on the idea of hunting. There should be a lot of fish in this reservoir.

Looking at the tilapia fish in Qin Lin's bucket, he smiled and said, "Boss Qin, your luck seems to be pretty good today. Let's compete and see whose fish takes the bait first this time."

As soon as he finished speaking, Qin Lin's fishing rod started shaking crazily again.

Another fish had taken the bait.

"???" Chen Shengfei opened his mouth and gradually looked embarrassed.

Qin Lin reeled in the line and took the fish down again. "Mr. Chen, what did you just say?"

"Nothing!" Chen Shengfei had selective amnesia.

"Oh!" Qin Lin placed the fish in the bucket, confirming his thoughts.

This was definitely the effect of a fishing rod and bait.

In other words, such items in the game would retain their attribute effects like watermelons and fish.

Qin Lin got on the bait again and threw it out.

This time, no fish took the bait for a long time.

The reservoir was so big that not all areas had fish. Only if there were fish beside them would they be attracted by the bait.

This was also why many people wanted to catch fish in order to gather them together.

Qin Lin retracted his fishing rod. This time, it was empty. He reloaded the bait and threw it towards another area.

Chen Shengfei had already thrown down the bait. It was only normal for him to feel empty when he saw Qin Lin. It seemed that he was extremely lucky the first two times.

Although he wasn't a master, he was still a professional at fishing. If he couldn't catch a fish, how could he still have the face to call himself a professional in the future?

Just as Chen Shengfei was thinking this, he saw Qin Lin's fishing rod shake violently.

"???" Chen Shengfei.

Qin Lin reeled the fish in.

This time it was a large catfish.

After putting the fish in the bucket, he put on the bait again and swung it in another direction.

Now, the speed of this fishing was not in the fishing rod and bait. In the place he had chosen, as long as he chose a place with fish, under the game-attribute fishing rod and bait, he would immediately take the bait.

Qin Lin seemed to be very lucky this time. Not long after the bait was thrown, the fishing rod started shaking crazily again.

Besides, there seemed to be a lot of activity this time.

"..." Chen Shengfei looked at this scene and then at the fishing rod in his hand.

On what basis?

He was here to fish. Boss Qin was probably here to stock up!

Chapter 106: Real Wild Goods! Their Status Can't Be Lower Than Others!

This time, Qin Lin's fishing rod movement was indeed a little violent.

Even with his grip tight on the rod, it wobbled wildly, as if trying to escape his grasp.

Immediately after, he felt a strong force from the fishing rod that almost slipped out of his hand. In order to hold the fishing rod tightly, he was pulled a step forward.

"Big goods! Boss Qin, quickly swim the fish." Chen Shengfei subconsciously shouted as he stared at the fishing line.

As a fishing enthusiast, whether it was himself or the people around him, they could not help but feel excited when they caught something big.

Qin Lin still knew what it meant to be a fisherman. Usually, one couldn't relax before catching a big fish. Many people caught big fish because they were careless.

Wasn't there news online that a young man caught a big fish? Not only did the fish not come up, but he also lost his fishing rod and went into the water himself.

The netizens all teased that this person had used all his strength on his wife the night before.

This kind of wild fish in the reservoir was fierce and cunning. They needed to swim until the fish ran out of strength.

Qin Lin and the fish were in a stalemate for a while before he pulled the fish to the shore. It was a black carp. From afar, one could tell that it was quite big.

Chen Shengfei hurriedly took the net and filled it with fish.

Boss Qin had eaten a lot of big items in the villa. This was the first time he had seen this big item being fished up from the wilderness.

Lu Jianxian, who was at the side, did not understand what Chen Shengfei was thinking. He was the chairman of a large corporation, yet he rolled up his pants and ran on the mud.

.....

Was there a need to be so passionate?

In a moment, the unlucky black carp was brought up by Chen Shengfei. It weighed more than 20 catties. Chen Shengfei grabbed the fishtail and raised his hand to his waist. The fish head was almost hanging to the ground, and it could not even fit the bucket.

He could only throw the fish to the ground first and sink into self-doubt.

They were both fishing, but Boss Qin casually caught fish consecutively and even caught such a big fish. Meanwhile, he didn't even see the shadow of a fish.

In the distance.

Liu Hua, who had secretly followed them, saw it too. His eyes were bright. He thought his guess was right. He had not caught a fish this big in so long.

"Boss Qin, isn't your bait a little special?" Chen Shengfei looked at the big guy and asked curiously.

This was all he could think of. After all, the effect of the fishing rod was that it affected the operation, weight-bearing, and other factors.

Boss Qin's fishing rod was obviously a fixed one. A newbie's simple and crude fishing rod was far inferior to the fishing rod in his hand that was worth more than 100,000 yuan.

Then it was the bait's problem.

“Try it.” Qin Lin smiled and handed some LV2 bait to Chen Shengfei.

The fishing bait had to be used with the LV2 fishing rod. It should be useless if Chen Shengfei used it alone.

Qin Lin put on the bait and found an area to hook the rod into the water again.

Chen Shengfei thought that it was because of the bait and started looking forward to it.

However, a moment later, he saw the fishing rod in Qin Lin’s hand shake again. A bass weighing 2 catties was caught again.

“...” Chen Shengfei.

Next, he watched as Qin Lin took the fish, put it on the bait, and swung the hook again. He repeated this action, and then the fish were caught one after another.

There didn’t seem to be a problem with the bait either?

Chen Shengfei suddenly felt a sense of defeat.

It was too damn demoralizing. It had nothing to do with bait, either. Then it was purely a technical problem.

Previously, he had seen the video of the fishing master, Deng Gang, the Sobbing Fish Farm on the Internet. He had found it unbelievable. The same fishing rod bait was in that guy’s hand, but why did it seem like the fish had bumped into the other party’s fishing rod?

Looking at Boss Qin’s skills now, he seemed to be even more impressive than Deng Gang.

There were probably not many such people in the fishing circle.

After thinking it through, Chen Shengfei did not hesitate anymore. There was no way to compare.

It was no wonder that Boss Qin’s villa could get so many big goods. It was said that every time Deng Gang fished, he would sweep the goods. Sometimes, he would especially look for those old reservoirs to fish for big goods.

Qin Lin caught a few more fish in a row and filled the buckets that he and Chen Shengfei had brought. At this moment, Chen Shengfei’s fishing rod caught a 3-catty black carp.

“Mr. Chen, let’s go back!” Qin Lin said happily. This was the joy of sweeping up goods. Most importantly, even if the bucket was full, there was no place to store it. If it was in his fish pond, he could just throw the fish back. In any case, the tourists would quickly catch them back and consume them.

However, if it was placed back in the reservoir, the fish would probably die soon. There were many bacteria in the water, and the injured fish’s mouth was easily inflamed.

Wild fishing generally did not advocate putting the fish back into the water.

“Let’s go back!” Chen Shengfei looked at the fish in the bucket and decided not to fish beside Boss Qin anymore. It was really boring.

Lu Jianxian was the happiest when he saw that the two of them were going back.

He really couldn't understand the mentality of someone who was still fishing by the lake in the middle of winter.

This was torture, no?

After the three of them left, a figure sneaked to the same spot as before. It was Liu Hua.

"I'll come here tomorrow," Liu Hua muttered to himself.

...

Qin Lin brought Chen Shengfei and Lu Jian back to the villa's hall first. Chen Shengfei smiled and said, "Boss Qin, are we going to deal with this big fish today?"

"Alright, treat me to lunch today." Qin Lin also wanted to try the taste of the big fish he had caught outside, so he waved at the security guard patrolling at the side.

The security guard stepped forward respectfully and asked, "Boss, what can I do for you?"

"Let Master Lin cook the big goods inside and some other dishes. I'll treat Mr. Chen to a meal. As for the other fish, let Master Lin cook them for the staff." Qin Lin instructed the security guard and led Chen Shengfei and Lu Jianxian to a table at the side.

The security guard immediately carried the fish into the kitchen.

"Boss Qin, do you have ornamental fish?" Chen Shengfei saw the aquarium beside him and walked forward to take a look.

Lu Jianxian said, "Cichlid, redbtail catfish, and flowerhorn fish. They have some value based on the quality. The most expensive one is this flowerhorn fish. It's worth about 20,000 to 30,000 yuan, but it's still considered an ordinary ornamental fish. I saw a wild albino tiger fish in Ming City's Aquarium City before. That's a classic. Unfortunately, the boss doesn't sell it."

"If you don't understand this, President Lu, what's the point of wasting money on this?" Chen Shengfei shook his head. He liked fishing, but he really had no interest in ornamental fish.

"..." Lu Jianxian was speechless. He really wanted to ask Chen Shengfei, What's the point of spending money on those fishing rods? But he didn't dare. He had money, but it was far from Chen Shengfei's. He even counted on the other party's company.

Qin Lin was stunned when he heard the wild albino tiger fish. He had sold one before.

After the three of them sat down at a table, Chen Shengfei asked, "Boss Qin, I heard from Old Ma that you have a medicinal wine here. Can you sell me a bottle?"

Qin Lin smiled and said, "That wine is a little small, but since Mr. Chen has asked, we can still sell one bottle. However, let me make it clear first that the price is not cheap."

Chen Shengfei immediately smiled and said, "Don't worry, I know. I've heard the price from Old Ma. It's only 5,000 yuan per catty. The key is that there must be something."

One catty was 5,000 yuan. This was the price of Qinglin Medicine Wine for three years.

Qin Lin had originally planned to pay 1,000 yuan per catty, but he learned from Li Qing that the medicinal wine passed down by the two Chinese medicine families in Min Province for half a year to two years was basically above 3,000-5,000 yuan.

His effect was no weaker than the other party's. There was no reason to lower his value.

It could be seen in Li Qing's desire at that time.

Moreover, he did not intend to sell this wine on a large scale. He wanted to restrict sales like the two stores that Li Qing mentioned. Naturally, he did not want his items to be lower than those two stores.

"Mr. Lu, do you want to bring a bottle back?" Qin Lin asked Lu Jianxian first politely. After all, he had come with Chen Shengfei.

Chen Shengfei was the first guest of the villa. Ma Liewen and Li Qing could come because of Chen Shengfei. In addition, they got along quite well with Chen Shengfei, so he had to give him enough face.

"Forget it, I'm not used to medicinal wine." Lu Jianxian shook his head. None of the medicinal wines on the market was useful. They were all just bragging about buying it for a psychological effect.

Especially after a channel found out what happened to the medicinal wine, he had long stopped buying medicinal wine.

5,000 yuan for a catty of wine. He might as well get someone to buy Maotai liquor.

However, under such circumstances, he had no choice but to find an excuse. Otherwise, he would be embarrassing Chen Shengfei.

Chapter 107: What An Unlucky Person!

Qin Lin was stunned when he heard Lu Jianxian's words.

This was the first time he had encountered someone who did not want his medicinal wine.

Most importantly, he could vaguely sense that the other party seemed to be very disdainful.

Then, he wouldn't insist.

In the future, not everyone could buy this medicinal wine. This time, it was because of Chen Shengfei. In the future, if the other party wanted to buy it again, it would depend on his mood.

Lu Jianxian naturally did not know about this. He still looked as sober as ever.

Chen Shengfei did not remind him.

Since Lu Jianxian had rejected Mr. Qin's good intentions, it would be bad if he spoke again. Under normal circumstances, Lu Jianxian was indeed not qualified to come into contact with such things.

He and Ma Liewen still had a chance to get their hands on some of the medicinal wine passed down by the two Chinese medicine schools. Lu Jianxian did not even have a chance.

Chen Shengfei also changed the topic and asked about Qinglin Ketchup. "Boss Qin, I've been paying attention to your ketchup. It's very popular now, but your promotion and sales don't seem to be keeping up."

"There's a problem with the funds. The production is limited, but we're already working two shifts. The production will reach 140,000 bottles a day soon." Qin Lin did not hide it. As long as the new factory's products exploded in popularity, they would face this problem.

In order to expand those production lines, he had already spent most of the villa's daily turnover.

He thought about a loan, but a loan bank also depended on the value of your factory. The program would not approve too much money there, nor would it meet his current needs.

.....

"It's still too little." Chen Shengfei shook his head and said, "Why don't you apply for a special corporate guidance fund? The popularity of your villa can bring a lot of benefits to Youcheng County, right?"

"Now that this tomato sauce is so popular, if we hurry up and expand, we can occupy more markets. When the time comes, we can also increase jobs, Youcheng County's reputation, and taxes... It's a series of benefits. I wonder if Youcheng County has a special large corporate guidance fund. You can ask around."

Lu Jianxian agreed first. "That's right. It would be a waste not to use the official money."

Chen Shengfei reminded him again, "If there's a special fund, don't use capital to invest. The officials will definitely send people to invest. It's equivalent to being tied up and using interest and debt. It's not like the products won't be able to pay back the money. If you want to invest capital, you might as well look for Old Ma and me."

Qin Lin nodded.

Actually, he was already thinking about this. 140,000 bottles of ketchup a day, after deducting what the villa and the Internet had ordered, the remaining would probably not be enough to expand the market.

He had to find out if there was such a special fund in the county.

Previously, the villa had applied for a support fund of 23 million yuan. He felt that spending the official money was really satisfying.

As for looking for Chen Shengfei and Ma Liewen to raise money, perhaps he could do so in the future when he needed it. He hadn't thought about it yet.

As they chatted, the waiter brought up the big black carp he had caught, along with some other dishes. As he had not specially prepared the Quality 2 okra and yams, this meal only had Quality 1.

Qin Lin picked up his chopsticks immediately, wanting to know the difference between the taste of wild goods in reality and those in the game.

But as he ate the fish, he frowned slightly.

Because the texture and taste were wrong.

It wasn't that it wasn't delicious, but compared to the taste and texture of ordinary fish, it was still much worse.

"Old Lu, come and try it. It's all good stuff. Boss Qin's wild fish are top-notch delicacies. You'll definitely forget to return." Chen Shengfei also picked up his chopsticks and greeted Lu Jianxian.

When Lu Jianxian heard this, he picked up his chopsticks, picked up a piece of fish, and put it in his mouth. After taking a bite, he looked at Chen Shengfei with a strange expression. This was an ultimate delicacy?

This fish was delicious, but it wasn't like the Hundred Fragrance Pavilion didn't have such fish. Why would they come all the way to this villa to eat it?

Most importantly, did Chen Shengfei need to brag like that? He seemed to be flattering the owner of the villa.

Could it be that the relationship between the owner and Li Qing was really extraordinary?

Thinking of this, Lu Jianxian was even more certain. Otherwise, why would Li Qing keep coming to such a villa? Why would Chen Shengfei be so polite to the owner of this villa?

After Chen Shengfei ate the fish, he looked at Qin Lin in shock. There was something wrong with this big fish today. It no longer had that smell.

Seeing Chen Shengfei's puzzled expression, Qin Lin fabricated, "It should be related to the water quality."

Chen Shengfei nodded and did not ask further. There were many reasons that affected the taste of the fish. The water quality was indeed one of them. Unfortunately, he had chosen a low-quality fish this time.

This meal was indeed a pity for Chen Shengfei. Although the Quality 1 okra and 1 yam had some effects, they were still far inferior to the Quality 2.

After Lu Jianxian finished eating, he felt that he had guessed correctly. This meal was similar to the private kitchen meal at the Hundred Fragrance Pavilion. It was not to the extent that Chen Shengfei had specially come over. However, he also smiled and praised, "Boss Qin's food is really good. It's top-notch and delicious. I can't forget it."

It was just bragging. With Li Qing having a good relationship with this villa, he had to go against his conscience and brag.

These words made Chen Shengfei and Qin Lin look at each other awkwardly.

What was he bragging about?

This meal was ruined.

At this moment.

Gao Yaoyao came over to ease the awkward atmosphere. "Boss, Mr. Cheng He wants to see you."

Qin Lin also instructed, "He's here so quickly. Let him come over!"

Cheng He seemed even more anxious about the agency than he was.

Gao Yaoyao also ran towards the entrance of the hall and said to Cheng He, who was standing there, "Mr. Cheng, our boss wants you to go over."

"Thank you." Cheng He naturally saw Qin Lin and Chen Shengfei and Lu Jianxian, which shocked him.

This was because he knew about Chen Shengfei and Lu Jianxian. Who in Ming City did not know about Chen Shengfei?

Although he had some money in Ming City, someone like Chen Shengfei was out of his reach. Not to mention Chen Shengfei, even Lu Jianxian, who was one level lower, was out of his reach.

But what did he see now? Chen Shengfei and Lu Jianxian were actually sitting at the same table as President Qin and chatting happily.

This also reminded him of the time when Qinglin Ketchup had been hacked. The Internet publicity fraud department in Ming City had come out to stand on the stage. Could it be that Chen Shengfei had called?

To be able to greet President Qin for such a matter, their relationship must be extraordinary.

"President Qin, sorry to disturb you again." Cheng He arrived in front of Qin Lin and his tone had become very respectful.

Who would have thought that President Qin had such powerful connections?

Initially, he just wanted a ride. After all, Qinglin Ketchup was really popular and tasted alright, but who would have thought that this car might be a train?

There was no doubt that someone who could be recognized by someone like Chen Shengfei was definitely not an ordinary person.

Qin Lin also smiled at Chen Shengfei and explained, "Mr. Chen, President Lu, this is an agent I found for Qinglin Ketchup."

"Mr. Chen, Mr. Lu," Cheng He said respectfully to the two of them.

Chen Shengfei nodded politely, but Lu Jianxian did not do anything. He did not need to care about a small ketchup agent at all. They were not on the same level.

Cheng He saw that Lu Jianxian did not care about him.

"I'll talk to the two of you first," Qin Lin said and stood up to invite Cheng He to another table. Then, he went straight to the point. "Mr. Cheng, as agreed beforehand, I'll give you a regional agent for the province. As for the rest, we'll talk about it later. In addition, my Qinglin Ketchup production is limited. Currently, the factory only has 4.2 million bottles of ketchup per month."

"Therefore, we can only give you three million bottles of production for the time being. It should only be enough for you to lay out one to two cities. Naturally, we will think of a way to resolve this problem immediately. As for the factory price, we will temporarily set it at 11 yuan."

"Alright, but I want priority as the general agent of the region." Cheng He agreed without hesitation.

With the popularity of Qinglin Ketchup, many people wanted to buy it. Actually, there was no need for much publicity at all. As long as the goods arrived, his secondary agents and the previous market would come running to him.

With a profit margin of four yuan, even if he only had three million bottles at the moment, that was 12 million a month. After deducting the cost and the cost of giving secondary concessions, he still had a lot of profit.

The key was that such daily products were sold in quantity. As long as Qinglin's company production increased and all nine cities in Min Province were opened, it should not be a problem to guarantee 15 million bottles a month. That would be 60 million a month. After deducting the cost and giving the secondary ranges, they could make a huge profit.

The point was that he wanted more than a provincial agent.

"Alright, I'll give you the priority as the general agent of the region. As for the contract, I'll get someone to sign it with you." Qin Lin did not reject Cheng He's request. The general agent of the region was not a province, but a region with several provinces. It was usually divided into eight regions.

After the discussion, Qin Lin also called Deng Guang and asked him to come over and discuss the details of the contract with Cheng He. He would sign it at the end.

...

Afternoon.

Chen Shengfei also said goodbye to Qin Lin. He had skipped work while talking to Lu Jianxian. He still had to make a decision when he returned.

Qin Lin sent Chen Shengfei to the parking lot. Chen Dabei followed behind with a security guard, each carrying a game-produced Quality 2 wild fish.

Qin Lin also handed a bottle of wine to Chen Shengfei. "Mr. Chen, this is your wine and two big items. This big item is the same as the previous one."

"Thank you, Boss Qin." Chen Shengfei held the wine with a face full of joy. He had drunk some from Ma Liewen. After all, this wine was the main purpose of this trip.

He also asked the driver to put the fish away. After getting into the car, he said to Lu Jianxian, "President Lu, do you want to bring a big fish back? It should taste better than what we had for lunch."

"Forget it, it's too troublesome." Lu Jianxian shook his head. He had already eaten the so-called big stuff. The taste was nothing much. If he wanted to eat fish, he could just go to the Hundred Fragrance Pavilion. He didn't want to bring a fish back.

Naturally, he could not say it so bluntly to Chen Shengfei.

"Then you're really out of luck." Chen Shengfei was overjoyed.

"..." Lu Jianxian looked at Chen Shengfei in shock.

He had already left the villa and wasn't in front of Boss Qin anymore. Was he still pretending?

Qin Lin also returned to the villa and called Chen Li.

"Boss Qin, why did you call me?" Chen Li's hearty laughter sounded.

Qin Lin went straight to the point. "Chief Chen, I just want to ask a question. Does the county have a corporate guidance fund? My factory's production capacity can't keep up, and I need funds. I want to ask around."

"Wait a minute, let me ask!" Chen Li said anxiously. Then, there was a long silence on the other end of the line.

After an unknown period of time, Chen Li's voice sounded again. "Boss Qin, the county doesn't have such a special fund before, but we can set up one especially for your Qinglin Food Company. However, apart from the stipulated interest on the creditor's rights, there are also requirements: the factory with this special fund must be in Youcheng County's industrial area and must have priority in hiring workers in Youcheng County..."

Chapter 108: Who Doesn't Know How to Speak Human Language?

A few days passed in the blink of an eye.

The trademark rights that Qin Lin had applied for had finally been approved. This made him inexplicably relieved. He no longer had to worry about anyone suing him with this trademark.

The incident with the roujiamo and the pepper soup was not over yet. There was news of the green pepper this morning.

Once something started, the atmosphere would really be bad.

The appearance of the scammer provided a job opportunity for many old people who wanted to get something for nothing. Now, the trademark registration seems to be developing in this aspect.

In addition to the trademark matter, there was something else that made him happy. Chen Li informed him that in the past few days, the county had already passed an enterprise guidance fund specially set up by Qinglin Food Company.

In the warehouse in the suburbs, Qin Lin entered the game.

In his mind, the Level 3 seven-colored symbiotic triangular plum had grown again. This was the second batch. In addition to the batch that had grown three days ago, there were already two batches.

These were used to make triangular plum pots.

Qin Lin went to the courtyard where the triangular plums were stored. There were a total of 50 seven-colored symbiotic triangular plums with a quality of 2.5 meters, and two seven-colored symbiotic triangular plums with a quality of 3.5 meters.

Qin Lin spent some time moving these triangular plums from the game to the warehouse outside before calling the transport team's supervisor, Zhao Liyuan.

Soon, Zhao Liyuan arrived with the convoy. When he saw Qin Lin, he went up to him. "President Qin, is it these triangular plums?"

Zhao Liyuan's attitude was clearly respectful because President Qin was already his father. The transportation business of Qinglin Food Company had been outsourced to him.

.....

If President Qin had any instructions, he would definitely do it well.

Everyone knew that Qinglin Ketchup had become popular and that the factory would expand in the future. There would definitely be a lot of transportation businesses.

"Yes, transport these triangular plums to the villa." Qin Lin nodded and instructed.

Most of the transportation in the factories was outsourced, and the Qinglin Food Factory was no exception. During the month of transplanting the Triangular Plum Blossom Sea, Qin Lin had already felt that Zhao Liyuan was not bad. He did his job well and did not ask too much, inquire too much, or get curious.

He had made a good impression, so he contacted him quickly and gave the opportunity to him.

Zhao Liyuan immediately called out to his subordinates, "Get to work."

Those triangular plums were soon loaded into cars and transported to the villa.

After Yu Shui received Qin Lin's call, he rushed over with more than ten people.

These dozen or so people were all landscapers. After the successful cultivation of the triangular plum pot, they had recruited some landscapers one after another. The employees of the villa were increasing.

After that, the rafting, sea of flowers, bridal chamber, pasture, and aquarium were all created according to the plan. They had to recruit people in batches.

Apart from those who were maintaining the Triangular Plum Blossom Sea, the rest of the landscapers had to follow Yu Shui to cultivate the triangular plum potted plant.

When the seven-colored triangular plum potted pot was cultivated on a large scale, Qinglin Villa would have its first tourist souvenir for sale.

In a scenic area, tourist souvenirs were indispensable. The bigger the scenic area, the more they had to have tourist souvenirs that represented their own characteristics. Even if they didn't, they had to create one themselves.

Many tourist souvenirs from scenic spots could be recognized if a tourist posted on their Moments.

"Get to work," Yu Shui instructed the landscapers. Then, he said to Qin Lin with a smile, "Boss, do you want to take a look at the flowerbed?"

"Let's go take a look!" How could Qin Lin not understand Yu Shui's thoughts? He had just been promoted because he wanted to seize the time to perform and let him see the other party's results.

As the boss, he naturally had to give this opportunity.

The triangular plum plantation flower bed was on the east side of the villa, near the forest. The flowerbed was now surrounded by wooden railings.

Yu Shui brought Qin Lin inside and arrived at an area. There were already many potted plants neatly placed there. The seedlings were all transplanted from the branches of the flowers.

Yu Shui also introduced excitedly, "Boss, we'll plant the seedlings over there in the future. We'll plant the seedlings in the surroundings and build a reservoir in the middle to create an irrigation system."

"Is there enough funds?" Qin Lin asked.

Yu Shui hurriedly nodded. "Yes, the lady boss has approved enough funds. The rest can also be bought to decorate the wooden railings."

"Yes." Qin Lin nodded and was not stingy with his praise. "Well done. Next, transplant those seedlings in and nurture the first batch of triangular plum pots as soon as possible."

"Don't worry, Boss." Yu Shui smiled and nodded enthusiastically.

He had invited his boss over for an inspection because he wanted his boss's approval.

...

When Qin Lin returned to the hall, he saw Zhao Moqing paying attention to the situation online.

"The county's delivery orders have been sent out. No one is defaming us this time," Zhao Moqing said when he saw Qin Lin enter.

These days, Qinglin Ketchup has become popular again.

Qinglin Food Company gradually began to work double shifts. They had already completed the 200,000 bottles of Chen Li's live broadcast. The netizens who had ordered also received the products and tried them.

Everyone knew that Qinglin Ketchup was more delicious. After it was sold on a large scale, more and more people commented on it to increase their appetite.

Increasing one's appetite was an effect that ketchup originally had because there was citric acid in the tomato. It was just that the Qinglin Ketchup had the additional attribute of appetite +1, so the effect was stronger.

Those who had tasted it really found that their appetite had improved, especially the picky children who could do a lot more food.

For a time, Qinglin Ketchup became a boon for parents of picky children and patients with low appetites. It was well-liked by more and more people who bought it.

Unfortunately, the desire to buy online was like a tide. Qinglin Food Company's production capacity was really limited, so they could only wait for the county's corporate guidance fund to approve it.

With the popularity of the Internet, Zhao Moqing would also silently like it on her alternate account. When she encountered interesting comments, she would also silently participate in the discussion. However, others did not know that she was the lady boss of Qinglin Ketchup.

“Look at this video.” Zhao Moqing handed the phone to Qin Lin.

He looked over, puzzled.

This seemed to be a video that had just been published by a somewhat famous expert. A hot topic would always attract all kinds of hype, even if the other party was an expert.

“I’ve been researching about Qinglin Ketchup these past few days. This product’s process from its appearance to its popularity is unbelievable. Not to mention the taste of this ketchup, just the other party’s hunger marketing method is definitely a classic case. The boss behind this has control over hunger marketing...”

Qin Lin was stunned to hear the expert’s logical analysis in the video.

Damn his grasp of hunger marketing...

He used Zhao Moqing’s private account to comment on the video: Teacher, maybe Qinglin Ketchup production is really just insufficient?

Because this video was newly released, not many people saw it. The expert teacher even replied to Qin Lin, “This is a very unprofessional view. If you have seen my class, you will change your current view. There is a purchase link for my class in the link below.”

“...” Qin Lin shook his head helplessly and replied, “The expert teacher is still the best.”

It was no wonder that as society developed, there were more and more experts and professors, but this identity was becoming less and less credible.

It wasn’t that expert professors weren’t capable. That was impossible. The high-tech construction of so many industries in the country was the result of the hard work of countless experts and professors.

However, true-strength expert professors don’t come out and play to the public. They’re immersed in the ocean of expertise and have higher aspirations.

However, there were some strange experts and professors on the Internet who were ruining this noble identity that originally represented honor.

Otherwise, there wouldn’t be such high-profile things as ‘Poor people can’t afford to go to school because the tuition is too low!’ and ‘Housing prices are high because they’re connected internationally. At the moment, property prices are still too low.’

If the standard of such an expert professor was not to speak human language, Qin Lin could also become an expert.

It was just that the wedding gifts were not enough and the salary of the young people was too high. Who wouldn’t know how to speak human language?

Chapter 109: This Person Deserves Success! Level Up Again!

When Zhao Moqing saw Qin Lin's comment, he couldn't help but tease, "Looks like this expert teacher knows the situation of Qinglin Food Company better than you."

One would always encounter all kinds of strange things in life. He could not let an expert teacher affect his mood.

If he had the time to fuss about this, he might as well solve the factory's production capacity problem quickly.

Qin Lin asked, "Moqing, have you registered the bank details of the employees? We're going to the bank in the afternoon. I'll bring them over to settle the payment."

"It's all registered." Zhao Moqing took out a notebook, entered a password, and logged in. She opened a data document.

The documents were filled with names. At the top were the names of Gao Yaoyao, Master Lin, Chen Dabei, Sister Hong, Deng Guang, Yu Shui, and the other employees.

Previously, there were few employees in the villa, so he had to transfer the salary himself.

Now that there were more people and the villa had recruited those landscapers, there were already 55 employees. The factory was also producing seven production lines. After hiring double shifts one after another, the number of employees had reached 95 and there would be more in the future.

In other words, he already had 150 employees. He was considered a big boss in Youcheng County.

Therefore, in the future, when he paid his employees, it would be impossible for him to transfer the insurance and funds one by one. He would have to get the bank to pay on his behalf.

They would first give these employees' information to the bank. After that, the employees would have to take out their own photocopies of their ID cards to confirm their payroll.

This way, he would open an account that specialized in paying wages and sign an agreement with the bank. In the future, if he transferred the total amount into this account every month, the bank would send it to the employee's salary card.

Looking at the neat data, it was obvious that Zhao Moqing had put in a lot of effort.

Qin Lin said, "You've worked hard."

Zhao Moqing snorted. "It's good that you know."

Qin Lin looked at the slightly arrogant Zhao Moqing and whispered in her ear, "So, I want to reward you by helping you scrub your back tonight?"

"We're in public..." Zhao Moqing immediately glared at Qin Lin and subconsciously hit his waist.

What did he mean, scrub her back?

He just wanted to shower with her.

In the afternoon.

Qin Lin received a call from Chen Li and drove to the factory.

Deng Guang was already waiting with a document.

After getting Deng Guang into the car, he asked as he started the car, "Is there any problem with the information?"

Deng Guang said, "Don't worry, President Qin. I've confirmed it several times. There won't be any mistakes."

"Okay!" Qin Lin nodded and drove to the Youcheng County branch.

The enterprise guidance fund that the county had specially set up for him, as well as the factory of this fund, had to be in Youcheng County. They had to prioritize hiring in Youcheng County... and a few other conditions.

He did not refuse.

Youcheng County's expressway, train station, logistics park... All kinds of transportation facilities were available. It was actually not a bad place to open a factory here.

Naturally, the special corporate guidance fund this time was different from the previous support fund application.

It took a few days for the county to go through the motions for a company-specific corporate guidance fund.

Now that the county process had run its course, they needed his factory details to dock with the bank. At this point, it would be quick. The money would be coming in soon.

When Qin Lin drove into the bank parking lot with Deng Guang, Chen Li was already waiting for him in the lobby with a middle-aged man.

The middle-aged man couldn't help but ask, "Chief Chen, do you think Qinglin Food Company can really achieve that kind of expectation?"

Chen Li smiled and said, "Even if it doesn't meet expectations, the results shouldn't be too bad. Otherwise, the county meeting wouldn't have passed so easily."

The county was paying more and more attention to Boss Qin.

At first, they thought highly of Qinglin Villa only because the tourists brought by the villa could supplement the county's global tourism plan.

As it turned out, the development of Qinglin Villa was better than expected. There was already a need to limit the number of tourists. Moreover, the villa was right next to the county city. Its influence could be said to be greater than any other scenic spot in Youcheng County.

When the projects at Qinglin Villa were completed, the county had even decided to do their best to help Qinglin Villa advertise. As long as they could help Qinglin Villa receive more than a million visitors every year, the impact on Youcheng County would be huge.

However, the county did not expect that Qinglin Villa would create another brand of Qinglin Ketchup. The key was that the ketchup was even popular and tasted better than other brands.

In a situation like this, the county would naturally pay attention. They even investigated the related industries of ketchup and knew how big the market for it was.

Tasty had made 37.7 billion yuan in the country last year, seven times more than Lao Gan Ma. Most of it was by selling ketchup.

Among the top 10 brands, the worst could earn more than 4 billion yuan with ketchup.

Now, Qinglin Ketchup has entered the market in a very simple and crude manner. There was hope for him to take a big bite out of this market.

Therefore, the county had no choice but to take it seriously. If things went according to plan, Qinglin Food Company would definitely become a big business in Youcheng County.

The benefits to Youcheng County were also immense.

Naturally, this was what was expected. Anything could happen before it reached a certain point. After all, many companies that were originally bright had quickly collapsed because their operators were eager for quick success or made mistakes.

That was what the county was most worried about now. Fortunately, Boss Qin had left a good impression on the county and was very methodical. He was considered successful at a young age, but he was not as ostentatious as those young people. He wanted everyone to know about his achievements, and his life was not chaotic like some young people who made a little money.

It was not surprising that such a young man would succeed. That was why the county had decisively approved the money again.

Beside them, the receptionist in the business suit listened curiously to their conversation.

The President and Chief Chen had personally come down to wait for her. She was very curious about their identities.

From their words, it was not difficult for her to tell that these two were waiting for the boss of Qinglin Villa.

This made her a little curious. After Qinglin Villa and Qinglin Ketchup became popular, many people online were curious about what kind of person the boss behind it was.

However, the boss of Qinglin Villa was too low-key. Very few people knew about him.

As she was thinking, she saw Chief Chen welcome a young man who came in through the door.

“Boss Qin!” When Chen Li saw Qin Lin, he immediately went forward and introduced the middle-aged man who followed him. “This is President Lin, Lin Shiwei.”

“I didn’t expect Boss Qin to be so young.” Lin Shiwei’s face was filled with enthusiasm and flattery.

As the branch president of his small county, he was actually very miserable. The tasks given by the higher-ups were heavy, and the salary was also related to the business.

However, it was also very difficult to complete the business in a small county. In such a big place, there was a lot of farming, engineering, construction, handover, village, town, and merchants Bank.

For example, if Boss Qin could make Qinglin Ketchup bigger, he would definitely be the best customer. Even if the other party gave him his employee salary in the future, there would be hundreds of people after the county approved this sum of money, right?

That was still very high.

If the accounts of the villa and Qinglin Food Company were included, it would definitely be a client that all the branches in Youcheng County wanted to compete for.

Naturally, he had to seize this opportunity.

“Boss Qin, let’s go to President Lin’s office,” Chen Li invited Qin Lin.

“Yes, let’s chat while making tea.” Lin Shiwei also invited him with a smile.

The receptionist beside him was already looking at Qin Lin in surprise.

Wasn’t the boss of Qinglin Villa too young? No one would believe this was him.

After following Lin Shiwei and Chen Li upstairs, there was actually nothing much for Qin Lin to do. He just asked Deng Guang to give the factory information to Lin Shiwei and also give the employee information to the other party to handle the salary distribution.

Lin Shiwei couldn’t wait for Qin Lin to do this and directly found a director to explain the matter. Qin Lin also asked Deng Guang to hand over the position to that director. Then, he was pulled by Chen Li and Lin Shiwei to make tea and chat while waiting.

As Chen Li made tea, he told Qin Lin something. “Boss Qin, there will be a team of tourist patrol officers going to your villa.”

...

The relevant procedures were settled two hours later. All that was left was to wait for the county to approve the money.

Qin Lin left the bank and sent Deng Guang back to the factory. When he drove back to the villa, it was already evening. A notification appeared in the game in his mind. The batch of crops in the evening had ripened.

He directly controlled the game characters to pick the ripe crops and put them in the storage room. The ripe crops in the evening were all sent to the villa with the ripe crops the next morning.

After picking the ripe crops, Qin Lin controlled the game character to plant new seeds.

He was only halfway through planting when another prompt suddenly appeared in his mind:

[Game character level increased!]

Chapter 110: Fruit of the Tree of Strength!

Qin Lin's face lit up. He had finally leveled up again.

He immediately looked at the changes after the upgrade.

After leveling up, he could open another six levels and level up another Level 3 land.

In addition, the paddy field could also be upgraded to Level 2.

During this period of time, not only did he sell the rice and some Quality 1 land crops in the game, but also the ores dug in the mine. There was no shortage of game gold coins in the game.

Qin Lin immediately leveled up the Level 3 and Level 2 paddy fields before controlling his game character to head to the seed shop.

Every time the land was upgraded, the seed shop would open new crop seeds. He had already known about Level 3 seeds before. This time, he wanted to check on Level 2 paddy fields. Perhaps, special seeds like the seedless watermelon seeds would be refreshed again.

After talking to the NPC, he clicked on the seed list.

The Level 2 paddy field did indeed add some seeds that could be bought. There were water pines, poplar trees, joy trees... and other saplings that could be planted in the paddy field. Unfortunately, he did not find any special seeds with a star. However, as he scrolled down, Qin Lin found something unexpected.

Conch eggs, loach eggs, frog seedlings, and buttercup seedlings.

These things were marked as supporting crops in the paddy fields. This meant that when the paddy fields planted rice, they could support these things.

Seeing this, Qin Lin was filled with memories.

He had grown up in the countryside as a child. Even before the sixth grade, he had been in primary school in the village.

At that time, once it was time to plant rice, he would follow behind his father with a small basket. When he flipped the field, he would always catch a lot of conch, loach, and eel.

This season was also the happiest of his childhood. Not only could he eat more, but he could also play in the mud without fear of being beaten.

Now that the villagers had moved to the county city, it seemed that no one was farming anymore.

The past could not be recalled.

The conchs that were commercially cultivated no longer had the same taste as before.

Qin Lin immediately bought a set of conch eggs.

The conchs his father used to make were his favorite.

[Conch Egg: Quality 1]

[This is a special cultivated crop that can be matched to aquaculture. Mature period: one day.]

Qin Lin controlled his game character to return to the ranch. When he arrived at the Level 2 paddy field, he realized that there was also a notification on whether the Level 2 paddy field that had been planted with rice had been cultivated.

[Do you want to farm conchs?]

Qin Lin directly chose to farm, and a notification immediately appeared in the Level 2 paddy field.

Then, he controlled the game characters to develop the six plots of Level 1 land that could be opened.

These six plots of crops would continue to be sold in the game.

He did not want to increase the Quality 1 crop of the game.

After the expansion of the villa project was completed, he planned to gradually reduce it or use it for activities. He would provide a batch regularly and only tourists who had consumed a certain amount could buy it.

Even a Quality 1 item from his game was worthwhile.

He controlled the game character to go to the six plots of land to weed, smash the stones, and chop the wooden stakes on the ground. After that, he changed into the hoe and developed the six plots of land.

The first five plots had been normal. As he developed the sixth, another prompt appeared in his mind:

[Congratulations on obtaining the fruit of the Tree of Strength!]

“???” Qin Lin looked at the red melon-like fruit in the game character’s hand in surprise.

As everyone knew, Ranches Story was a fantasy farming game in an urban town. Not only were there mines more than 200 floors underground, there were goddesses, kappas, and flying stones that filled the map with a whoosh.

And this fruit of the Tree of Strength was definitely something with a hint of fantasy.

There were a total of 15 of these in Ranches Story. Its function was to increase one’s physique after using it.

At first, the game characters would get tired after working for a while. If they continued, they would suffer from heatstroke and lie on the ground with a purple face. Then, they would have to rest or eat food to replenish their strength.

However, once they ate the fruit of the Tree of Strength, they could work longer.

If they ate 15 pills in a row, they would only take out a handkerchief to wipe the sweat and could work for half a month without eating or drinking.

Of the 15 fruits of the Tree of Strength, three could be randomly dug out from the ranch.

Qin Lin did not expect to find one of the fruits of the Tree of Strength in the six plots of land that he had developed after this upgrade.

He found a deserted place as quickly as possible and entered the game to replace his game character. He was also holding the red sweet potato-like fruit in his hand.

He focused and saw the message.

[Fruit of the Tree of Strength: Mystery!]

[Rumor has it that it's a fruit from a strange tree on Mount Notre Dame. This tree was a seed left behind by the goddess and carefully taken care of by the dwarves. For some reason, the tree disappeared and the fruit from the tree was scattered in the area near Mount Notre Dame. If anyone can obtain the fruit, eating it can increase their physical fitness.]

Qin Lin saw the note on the fruit of the Tree of Strength. There didn't seem to be such a background in the game. However, he was really eager to eat this thing that could increase his physical fitness.

The taste of the fruit of the Tree of Strength was nothing special, just a little sweet. However, when the fruit of the Tree of Strength entered his stomach, a strange warmth appeared in his body.

This warm current was different from when he had eaten Quality 2 products previously. It seemed that there was really some energy surging and modifying his body. It made him feel comfortable and he almost hummed.

That feeling was even more comfortable than when he and Zhao Moqing were exercising.

The feeling didn't last long. Soon it was over.

Qin Lin tried to stretch his back. After the comfortable feeling ended, it seemed to be boring again.

His body felt nothing special.

However, this thing would definitely have an effect. Besides, if he wanted to test if his physical fitness had increased, he would know after doing a push-up.

Qin Lin immediately bent down and did push-ups in the game.

Standard push-ups were actually quite difficult. When he was in college PE, he could only do 40 standard push-ups in a row. This was a number that most ordinary people could achieve.

But this time, one after the other, he quickly achieved 40. And he felt relaxed.

Qin Lin counted silently. It took him 150 consecutive attempts before he finally felt exhausted.

This was nearly four times the number during his university days.

150 push-ups in one go seemed to be the standard for athletes, but athletes were trained over a long period of time. He had only used one of the fruits of the game.

He had to admit, the system was impressive.

Qin Lin exited the game and returned to the hall. Just as he entered the bar, he saw Zhao Moqing busy on a laptop. He walked into the bar and saw that she was organizing the settlement data.

Tomorrow was the day to settle accounts with suppliers like Lin Feng and Wang Wei.

As the sales center opened, after Qin Lin poached two product quality monitors from RT-Mart, more and more suppliers' products came in. The final settlement cycle was set to be a week. After all, they were all small suppliers. If the cycle was too long, they wouldn't be able to afford it.

"You've worked hard." Qin Lin went behind Zhao Moqing and massaged her shoulders.

"It's good that you know," Zhao Moqing said proudly.

Qin Lin smiled and said, "That's why I should help you scrub your back tonight."

"Hmph!" Zhao Moqing snorted when she heard this topic again.

She knew this guy too well. Once he was so persistent, he would definitely not give up until he achieved his goal. He could pester her for a month for a shameful position.

Qin Lin smiled when he saw this. He knew his girlfriend well. A light snort indicated that she had tacitly agreed to this matter. She was just shy and embarrassed.

When they returned home at night, Qin Lin eagerly picked up Zhao Moqing and was stunned for a moment.

Zhao Moqing seemed to have become much lighter.

Naturally, she couldn't be a lot lighter all at once. That meant he was stronger.

The increase in physical fitness from the fruit of the Tree of Strength should be comprehensive, not just physical strength.

Then in some ways...

Qin Lin quickened his pace and entered the room, eager to experiment.
