

The Game 1021

[Chapter 1021 The Increasing Influence! The Mysterious Valley! 1](#)

The news about Linlin Ranch and the Wagyu cow was all over the internet.

it was mainly to vent his anger.

Previously, the people from Japan and the Bulls Association were so disgusting. Now that everyone saw the people from Japan protesting, they felt relieved.

Even the ranches that had benefited from Linlin Ranch knew that the boss behind Linlin Ranch was going to teach Fusang and the cattle a lesson, so they all came to add fuel to the fire.

After those ranchers bought the cow's essence, they naturally found people to breed the cows as soon as possible.

it didn't take long for these ranchers to release news one after another, saying that the cows in their farms had been successfully impregnated and fertilized.

There was no doubt that this kind of news that could strike a blow to Fusang and Niu, almost at the fastest speed, became a hot search.

After that, the artificial insemination was successful in one Ranch after another.

In other words, Wagyu, which was regarded as a national treasure by Fu sang, would soon bloom all over the country.

Naturally, after this incident, the International wine and meat tasting conference that was deliberately held in min province by Japanese and the president of the cattle Association, Yagyu yilang, was left unsettled.

However, an internet celebrity suddenly became popular on the internet and attracted everyone's attention:

Hello everyone, my name is shanmu. I've always hated the Fusang culture and liked the Chinese culture. So, I brought the Wagyu here and sold it to Linlin Ranch. There are also transaction records and transaction records as evidence. Now, I've married into the family and changed my name to Chu mu. My biggest wish now is to get a Chinese nationality and I'm very experienced in raising Wagyu.

This internet celebrity who had suddenly become popular had really attracted a lot of attention.

People hated traitors, but they definitely did not hate traitors of Fusang.

Especially a traitor of Fusang who sold the National treasure of Fusang.

There were even many netizens who ridiculed and welcomed this son-in-law of Fusang.

Qin Lin was a little stunned when he saw the news.

He had thought that he could trick the boss of shanmu farm and make him the scapegoat. He didn't expect that not only did he take the blame, but he also played this trick.

However, thinking about it, he felt that Shan mu was very smart.

kazufuru was the national treasure of fu sang, and now that it had been made, it would soon be everywhere in the country. this was not a blow to fu sang, but a humiliation.

After all, Japan was a small place, and there was a limit to how many cattle could be raised. However, it was different in China, and they could definitely crush Japan in terms of quantity.

Therefore, it was certain that Shan mu would not be able to return to Japan. Now, he was doing this not only to complete his surrender.

Moreover, after this incident, the country didn't protect him and didn't give him a nationality. Otherwise, where would our foreign friends help us in the future?

Ning city.

liang cheng met someone early in the morning.

the other party was a rancher supported by the county, lin fa.

The other party had come today to report the good news about kazufuru.

Because Linlin villa had become very popular in you city, bringing a terrifying number of tourists, so from the beginning, the counties thought that such a small villa tourism project would have a big market and might be the mainstream in the future.

Therefore, all the counties were also imitating the manor houses.

It was the same for ning city. He had even specially hired a 211 University Graduate to be in charge of it. Unfortunately, this 211 University Graduate did not manage to achieve anything.

Later on, he even imitated Linlin Manor. Whatever Linlin Manor did, he did. He spent a lot of money, but in the end, it all went to waste. The manor was still not built up.

Therefore, what boss Qin did could not be imitated by others.

It was not that there were no reservoirs in each county. Several counties had even imitated the floating bridge viewing area. Even other places with reservoirs were imitating it, but in the end, they were all floating on the water.

Even if some people were attracted, they would all give bad reviews and no one would go a second time.

After that, boss Qin set up the Linlin Ranch and imitated it in all aspects. If the villa couldn't be imitated, couldn't the ranch be imitated?

With this idea in mind, the counties started to set up ranches and tents. The end result was obvious. It was neither fish nor fowl, and it did not feel like Linlin's ranches at all.

in the end, in order not to go to waste, the ranches in each county were also completely converted into breeding ranches, dedicated to raising animals.

It was better for him to go to you city to poach Linlin leisure tea. After that, ning city also changed their strategy. They kept an eye on Linlin Manor and tried to poach them, or they followed them to drink the soup.

This time, they planned to drink soup with the Wagyu cattle project. Moreover, they wanted to drink soup with meat. The ranches in the county also went to buy the essence of the Wagyu cattle.

Although he didn't know what boss Qin was thinking, he actually wanted to use this method to teach the Japanese Wagyu Association a lesson. Although he was relieved, it was really a waste of God's gift from an economic point of view.

Liang Cheng was very clear about the meaning of this bull fight.

if wagyu beef could be so expensive, it must have its own value. even if wagyu beef became widespread in the country in the future, it could still be exported. the export price would definitely be more valuable than ordinary beef.

Lin Fa came to see Liang Cheng early in the morning to report the good news, " "liang county. our farm went to linlin farm and bought a set of cattle sperm. we've been doing in-vitro fertilization recently, and a number of cows have gotten pregnant."

as long as the quality of the offspring of this batch of heiresses is good, Liang County will have our own Wagyu in the future. After that, we'll see how to breed them and make the meat quality the best, " Wang Yao said.

well done. We can't lose to the other counties in this matter. Liang Cheng was still very happy to hear this good news.

[Chapter 1022 The Increasing Influence! The Mysterious Valley! 2](#)

In the past, the wakeful beef was high above the International high-end food market. Now, it could only be raised by a small ranch in their small county.

Although from an economic point of view, boss Qin's way of doing things was a bit of a waste of God's gift, from a personal point of view, he really felt that boss Qin's way of doing things vented his anger. He admired boss Qin very much.

There were even people on the internet who provoked Japan, asking them to ban them with a few more things and see if Linlin company would do anything to them.

Some people even said that Linlin company was only good at dealing with Western countries.

Liang Cheng thought about it again. It seemed that to boss Qin, this was nothing like a cow.

With Linlin company, boss Qin might not be interested in the money he earned from selling beef, so he was being too shallow.

alright, Liang County. If there's nothing else, I'll go back to the ranch and keep an eye on it. Lin Fa left Liang Cheng's office after he finished his report.

after liang cheng sent lin fa off, he received a call. when he heard the news, he was overjoyed, " "Really? Alright, alright, I'll be right there."

With that, Liang Cheng rushed out of the office and asked the driver to start the car.

Ning city had changed their strategy from imitating to drinking soup. The beef project was soup, and the Linlin rice project was also soup. Moreover, both were stock.

If ning city was suitable for planting the Linlin rice, the benefits it could bring to ning city would be unimaginable. Next year, they could promote the planting of Linlin rice in ning city.

How much did a Jin of ordinary rice cost? Many people in Peace City were not willing to farm.

however, planting linlin rice was different. the previous version was xiangshui tribute rice, and the quality of the linlin rice had been proven to be better than xiangshui tribute rice.

Therefore, even if the Linlin rice was sold at the same price as Xiangshui tribute rice, if it was promoted in ning city, the GDP of ning city would rise to another level next year.

The only problem now was whether the Linlin rice could be grown in ning city. After all, everyone knew that the Xiangshui tribute rice had very strict environmental requirements, and so did the Linlin rice. Otherwise, the Linlin laboratory would not have conducted experiments in so many places.

he even knew that the linlin rice would not germinate after he left ming city.

Now that the Linlin rice in their ning city experimental site had ripened and the people in Linlin's laboratory were harvesting it, Liang Cheng naturally had to go and check it out as soon as he received the news.

The car soon arrived at the place where Linlin's laboratory was growing Linlin rice. The security had been set up, and the people in Linlin's laboratory were harvesting inside.

Liang Cheng got out of the car immediately and ran over in a hurry.

As the Deputy County chief of ning city, he was naturally allowed in. He was even welcomed to a researcher and explained, " "Researcher li, this is the Deputy County Head of ning city."

"Hello, Liang County!" That researcher li also hurriedly greeted Liang Cheng.

He was only a researcher in the Linlin Rice Research group at the Linlin laboratory. He didn't dare to be rude to a Deputy County Head.

nice to meet you, researcher li, " Liang Cheng said very politely. I wonder how the quality of the Linlin rice is in our County? "

In his eyes, researcher li from Linlin laboratory was now the person who could decide the future of ning city.

Whether or not their ning city could grow Linlin rice in the future would depend on other people's testing.

Now that he was asked this question, he was really a little nervous.

If they said it wasn't suitable, then they would really beat their feet and beat their chests.

researcher Li seemed to understand what Liang Cheng wanted to know. He smiled and said, "Don't worry, County Liang. I've done a preliminary inspection. The Linlin rice grown in Ning City is of good quality, so it's very suitable for planting and promoting the Linlin rice. Later, Director Shen from the laboratory will probably discuss this with Ning City."

"Really? I'm so grateful to researcher Li." When Liang Cheng heard this news, he clenched his fists and was as happy as a child.

The GDP of Ning City had stabilized, and the income of the people of Ning City had stabilized.

By now, all the counties had learned from the Linlin laboratory that there were several grades of Linlin rice. The average grade was similar to Xiangshui tribute rice, but it was produced in places far from you city, which were not very suitable for growing Linlin rice.

But even so, if it could reach the level of Xiangshui tribute rice, it had to seize the opportunity to promote the planting with Linlin laboratory.

One level higher was fine grade (quality 1).

The fine quality Linlin rice could only be grown in a few County cities near you city. Three County cities had already been confirmed to be able to grow fine quality Linlin rice.

Now, their Ning City was the fourth.

This also meant that the Linlin rice would be very delicious in Ning City.

Of course, the meat in the pot must have been eaten by you Cheng. Besides the high-quality Linlin rice, there were even higher-grade ones. It seemed that only you Cheng's Linlin Mountain Villa could grow it.

All the good things would go to you Cheng, but what could he do? Boss Qin was from you city.

...

Linlin Manor.

Qin Lin was in the office, controlling his game character to complete his daily tasks when Shen Li came in with a smile on his face.

"President Shen, do you have good news?" Qin Lin asked with a smile.

Shen Li smiled and said, "Chairman Qin, it's the report on the experimental planting of the Linlin rice. The Linlin rice can be grown in all 12 counties in Ming City. The experimental plots outside of Ming City have seven counties that can grow the Linlin rice.

In other words, there are a total of 19 counties that can grow Linlin rice. Among them, the quality of the Linlin rice grown in the six counties outside Ming City and the four counties in Ming City is only comparable to the Xiangshui tribute rice.

the Linlin rice grown in the other counties has reached the level of fine quality (quality 1) Linlin rice. As for the other places, the experimental planting has failed. Either the quality of the rice is not good, or the nutrition content is low, and some are even bitter.

"Well, at least I've gained a lot," Qin Lin nodded.

A total of 19 counties could plant it. Even if the quality of planting in 10 counties had dropped to the level of Xiangshui tribute rice, nine counties had reached the level of quality 1.

This was a huge improvement compared to the Xiangshui tribute rice.

After all, Xiangshui tribute rice could only be grown in such a small area.

Moreover, he had also used the seed processing machine to process some Xiangshui tribute rice seeds, which doubled the output. Then, these seeds could be planted in the future, and the output would be higher.

Even if the price of Linlin rice remained at a few hundred Yuan per 500 grams, it would not only appear on the dining tables of the top people. At least, it could be eaten by ordinary people occasionally.

During festivals, no one would be willing to spend money on this rice.

This was good.

Shen Li laughed again. the leaders of the counties that can grow the Linlin rice call us a few times a day. They're all in a hurry to discuss the promotion of the Linlin rice. Some of the leaders even want to come to the Linlin laboratory. We're going to be busy.

With the development of Linlin company, its influence was obviously not limited to you city.

After all, you city was just a County.

The surrounding counties had also begun to be affected by Linlin company. The Linlin rice project alone would definitely increase the GDP of these counties by a level.

"I'll have to trouble President Shen with this." Qin Lin smiled.

"I should." Shen Li didn't feel that it was hard. To him, this was something that made him very happy. After all, he had the shares as a reward.

After Shen Li left, Qin Lin looked at the screen in his mind. He controlled his character to go to the mountain road of Mount goddess and entered the game with a thought.

As soon as he appeared on the mountain path in the game, Qin Lin compared the location and headed in one direction.

Yesterday, he had entered the goddess mountain to investigate. He had seen a small valley in this direction and there were many buildings in the valley.

The building was a little strange. He couldn't see it clearly from too far away, so he was very curious.

The game didn't seem to have such a place.

This should be the real world that the system had conjured after he entered.

Yesterday, due to time constraints, he had not investigated further after logging out of the game. Today, he was curious and wanted to find out more.

Following that direction, Qin Lin moved forward. With the help of the two fruits of the tree of power, he finally arrived at the valley after half a day.

He walked towards the valley with some anticipation. As soon as he entered the valley, he saw a few figures walking out. He was stunned when he saw these figures.

"It's you. Why are you here?" One of the figures also looked at Qin Lin in surprise.

[Chapter 1023 The Flower House Tree And The Parrot That Talks Slyly](#)

"What are you doing here?" The figure looked at Qin Lin in surprise.

"It's you?" Qin Lin also looked at the other party in surprise.

Wasn't this the dwarf ah ni whom he hadn't seen in a long time?

Although the dwarf ah ni's appearance in real life was different from the game, it was still easy to recognize him.

There were a few other dwarves beside ah ni.

the dwarves all looked at qin lin in surprise. they were obviously curious about the person who had suddenly barged in.

"Ah ni, who is he?"

"How did he get here?"

"It's been a long time since someone came to our dwarf Valley."

ah ni immediately explained, "He's the rancher. He's the one who took in Xiao Lu and the others."

His words made the other dwarves look at Qin Lin.

"It's him!"

"ah ni, he's our friend. you have to treat him well!"

"yes, we dwarves are very hospitable."

The dwarves said their goodbyes to ah ni and left the valley.

They had something to do, so they left ah ni to entertain Qin Lin.

Ah ni looked at Qin Lin curiously and asked, "How did you get to the dwarf Valley?"

"I walked in," Qin Lin answered honestly.

"That's impossible," ah ni said subconsciously, "humans can't enter the cricket!"

He stopped mid-sentence and looked at Qin Lin for a while before saying politely, "Since you're here, I'll treat you to a big meal. Come with me!" He said.

After saying that, ah ni walked towards the canyon and motioned for Qin Lin to follow him.

Qin Lin felt that ah NI's words were a little strange, but he could not put his finger on it. He could only follow him into the valley.

As soon as he entered the valley, he revealed a surprised expression because it was very strange and beautiful inside.

On the other side of the valley entrance, there was a special iron gate. The iron gate was covered with a very strange and beautiful flower wall.

Moreover, the entire Valley was filled with all kinds of flowers that were rarely seen outside. The sunlight shone down on the flowers, giving them a kind of dreamy beauty.

It seemed that the flower had a special fluorescent material.

Rather than a Valley, it was more like a strange garden.

Qin Lin followed ah ni through a small path. On both sides of the path were walls of pink roses, like a colorful waterfall in full bloom.

Soon, Qin Lin and ah ni arrived in front of a building.

"This is my house," Ah ni didn't forget to introduce them to Qin Lin.

Qin Lin, on the other hand, was looking at ah NI's house in surprise.

It was a house made of vines, green leaves, and flowers.

The flower seemed to be wisteria.

As he got closer, he could even smell a strange fragrance.

Just by looking at it, the greenhouse gave people a huge impact. It was very beautiful and very eye-catching.

If this thing was seen in real life by emotional women, they would probably cry out in surprise.

Ah ni entered the house.

Qin Lin also followed him in.

The interior of the house was only a few dozen square meters. It was small for him, but it was not small for a dwarf like ah ni.

most importantly, after he entered, he felt refreshed and comfortable. it was a strange feeling.

This was probably a special attribute.

What surprised Qin Lin even more was that the house was also covered with green leaves and wisteria flowers, which were very beautiful. Even the ground was laid with the same kind of stem, with a thick layer of green growing on it, as soft as a carpet.

It was as if the entire house, apart from the furniture inside, was built with a whole plant.

It was a little too magical.

"Ah ni, is your house a plant?" Qin Lin could not help but ask.

Ah ni nodded and said, "that's right. This is cultivated from a type of seed we found in the remains. It's called a greenhouse tree. It has a strange characteristic. After the seed is planted, it will grow into a greenhouse tree like this. The entire stem is the main supporting theme, and it will be very hard when it matures.

"Do you like this greenhouse tree? When you go back, I can give you a bag of seeds. Not only do these greenhouse trees grow fast, but they can also live for a long time, up to dozens of years."

Qin Lin didn't refuse.

This was obviously a good thing. Although it was too small for humans to live in, it could still be used as a small pavilion to rest.

They could be used to decorate the landscape outside.

when the greenhouse tree had successfully grown, he could place a stool inside. it would also be a very elegant place to rest.

in linlin villa and linlin ranch, they could do it. remove all the benches and replace them with this greenhouse tree.

That would be another unique characteristic.

Suddenly, an ear-piercing voice rang out, "I'm back, I'm back. Is the food ready?"

"This glutton!" Ah Ni's expression changed when he heard the voice.

The next moment, the sound of wings flapping could be heard, and then a parrot flew in.

This one was very strange. The feathers on its neck were golden, and there were round black spots all over the Golden feathers. There were small clusters of light purple feathers on both sides of its neck, like a bow, which made it look particularly beautiful and cute.

Its eyes were also very agile, and it was obvious that it was very intelligent.

looking at qin lin, the parrot cleverly shouted, "We have a guest. Hello, Guest!"

This surprised Qin Lin.

Parrots were very smart. It was good that they could learn how to speak like humans, but he had only seen parrots that spoke like this in movies and TV shows.

ah ni looked at the parrot impatiently. he was even a little annoyed. however, he concealed it very well and qin lin did not notice. he even sneaked a glance at qin lin, not knowing what he was thinking.

Chapter 1024 The Flower House Tree And The Sneaky Parrot

1024 The Flower House tree and the sneaky parrot

After rummaging through the cabinet for a long time, ah ni finally took out a plate of small fruits and placed it on the table.

When the parrot saw this, it flew to the table and began to eat the small fruit crazily. It ate as fast as a Hungry Ghost.

more importantly, the parrot didn't forget to raise its head and complain while eating, " "The fruits today are a little rotten!"

This made ah ni's eyes even more determined.

the sun rose to the middle of the sky.

at noon, the dwarf ah ni brought several kinds of fruits for qin lin. there were peaches, bananas, and fruits.

These things were common in real life, and there were also seeds that could be planted in ranches. The fruits that were planted were all of Grade 1, and some could even produce Grade 2 fruits.

The taste of the fruits that the dwarf ah ni had taken out had also reached the level of Grade 1. The taste and texture were definitely not wrong.

Qin Lin wasn't actually that hungry. He was almost full after eating some fruits.

He looked at the time and decided to leave.

He had been in the game for a long time. When a real person came into the real world, the time that passed in the game was the same as the time that passed outside.

But before he could say goodbye, ah ni suddenly said, " "Can we play a game? If I lose, I can give you a present."

what game? " Qin Lin was suddenly dumbfounded.

He could trigger the plot mission when he entered the game in person?

And why did he feel that something was wrong?

The dwarf ah ni hurriedly said, "let's play Rock, Paper, Scissors." We'll decide the winner in one round, and there's a gift!"

[the dwarf ah ni has invited you to play Rock, Paper, Scissors. Do you accept?] If you win, ah ni will give you a gift!]

"This works too?" Qin Lin received a hint in his mind.

However, with a plot quest to do, who would care about the situation?

He immediately chose to accept.

"Then let's start playing the game. Rock, scissors, paper, Pixiu!" Ah ni said excitedly.

Qin Lin was very serious about this game. As ah ni shouted, he quickly pulled out a piece of cloth.

However, he was shocked to find out that ah ni had deliberately waited a second before he appeared.

This was clearly cheating.

Just as he was protesting, ah ni threw out a rock.

Qin Lin didn't react for a moment.

He used a piece of cloth, but the dwarf ah ni cheated a second later and used a stone.

Didn't that mean that he had won?

That shouldn't be the case.

Only an idiot would use rock and scissors to win.

Without waiting for Qin Lin's response, ah ni said in a dejected tone, "Al, I lost to you. I can't even beat you once. But I'm a man of my word. I lost, so I'll give you this parrot. Its name is Xiao Wu."

"? ? ?" Qin Lin looked at ah ni with a weird expression and thought of the way he gave red fur to him.

The other party seemed to be looking for a replacement because red hair had a huge appetite.

Now, he was looking for him to take over again?

Otherwise, how could he explain his strange behavior?

The parrot was also looking at ah ni with a bitter expression. It seemed to be very sad. "Are you going to abandon me?"

The dwarf ah ni did not fall for this trick at all. Instead, he pointed at Qin Feng and said, he's a big rancher, and he has an endless supply of fruits. It's not a problem to eat a bowl or throw away a bowl.

"Really?" Hearing this, the parrot looked straight at Qin Lin. It no longer shook the dwarf ah ni and flew directly to Qin Lin's shoulder. "Master, Hello, I'm Xiao Wu, nice to meet you!"

qin lin didn't know what to say. he grabbed the parrot and looked at the note with a bitter smile.

[special mount goddesses parrot: pet (xiao wu)]

[this is a very strange parrot. It's very beautiful and has a very tall Lingzhi. Unfortunately, it's a foodie. After it clung to the dwarf ah ni, it made the dwarf ah ni suffer. He had a headache waiting for someone to take over.] Intelligence +2, intelligence +2, human language learning +2!]

[the current pet can be bound. Do you want to bind it?]

Looking at the attributes, Qin Lin finally understood why the parrot was so smart. Lingzhi +2, intelligence +2, this was a bit too much for animals.

Learning human language +2 was the reason why it was so good at speaking human language.

Looking at the binding notification, he immediately confirmed the binding.

The advantage of binding was that he could bring it to reality, and these pets would not run away. They would only recognize him, and he would not be affected by the special game mechanism of the ranch.

Otherwise, with the game's mechanics, one month was equivalent to 15 years. Anything that was put in here would lose a large part of their lifespan in a short while.

After binding, he would not be affected by this.

"Master, do you really have an entire farm that you can't finish eating?" Xiao Wu was grabbed by Qin Lin, her eyes still filled with anticipation.

"Yeah, I can't finish it." Qin Lin shook his head, sighing that the parrot was not only smart but also a foodie. It didn't forget to ask about food when it opened its mouth.

Ah ni didn't want Qin Lin to realize that he was the scapegoat, so he hurriedly sent Qin Lin out of the dwarf Valley.

After they left the valley, the dwarf ah ni gave Qin Lin a bag of seeds. These were the greenhouse tree seeds and the method to cultivate them.

Qin Lin took the bag of seeds and saw its attributes:

[greenhouse tree: mysterious!]

[this is a type of seed that the dwarves found in the ruins. After special cultivation, it can grow into a beautiful greenhouse with a mysterious power: +2 aesthetic,+2 photogenic,+2 attraction,+2 floral insect repellent,+2 refreshing!]

planting restriction: belongs to a special type of seed. There is no land restriction for planting. Level 4 land is required to breed and produce seeds!

When Qin Lin saw the note, he knew that it was another fantasy.

A plant that was planted could actually grow into a greenhouse by itself. Wasn't this magical enough?

At the same time, he also knew why he felt that the greenhouse was so beautiful when he first saw it. He felt that he had been shocked.

It was all because of the +2 beauty and +2 eye-catching attributes.

It was no wonder that there were no mosquitoes in ah NI's house. This was the +2 insect repellent effect of the floral fragrance.

It was a refreshing +2 experience, which was why he felt so comfortable when he entered ah NI's house.

This attribute was really quite amazing for a scenic spot.

Not only was it beautiful, but for people who needed to rest, the +2 refreshing attribute had too many practical uses.

Moreover, these seeds didn't have any soil requirements, which meant that if they were planted in the real world, their attributes would be perfectly preserved.

However, there was a limit to cultivating seeds, which required level 4 land.

There were no level 4 plots of land in reality, which meant that the greenhouse tree seeds could only be planted in the game.

Qin Lin retraced his steps and returned to the mountain road in the game. Then, he logged out of the game with a thought and returned to the office in the villa.

He was still holding the bag of greenhouse tree seeds in his hand.

On his shoulder was the parrot Xiao Wu.

Seeing the change in the unfamiliar environment, the parrot was obviously surprised. It flapped its wings and flew around the office a few times, then landed on Qin Lin's desk and asked, "Master, where is this place? Your farm? Where's the delicious food? Quickly bring me something good to eat."

"I'll get you some fruit." Qin Lin was helpless. He remembered that this guy had just started eating at the dwarf ah Ni's place. And now he wanted to eat.

No wonder ah ni didn't want it.

When Qin Lin opened the office door and walked out, the parrot landed on his shoulder again. Its small head kept shaking, obviously observing something.

When he arrived at the main hall, he saw Zhao moqian, Lin Liu, and Tang xiuwan sitting at the same table. There were all kinds of fruits on the table. Strawberries, nuts, peaches, grapes.

The women were obviously having afternoon tea and chatting.

"It's delicious." Xiao Wu's eyes flew from Qin Lin's shoulder to the table where the women were.

When Zhao mochen and the other women saw a parrot suddenly land on the table, they were all shocked.

"Is this a parrot?" Zhao Mo sneered.

"Yes, it's a parrot!" Tang xiuwan.

Xiao Wu, however, flapped her wings, immediately flattering him: "Beautiful ladies, it's a pleasure to meet you. You're so beautiful."

These sudden words stunned Zhao mochen and the other girls.

[Chapter 1025 An Animal Translator! Entering The Advertisement! 1](#)

When Zhao mochen and the other girls heard Xiao Wu's words, their faces all showed surprise.

"It can actually talk!" Lin Liu said in disbelief.

"Parrots can talk." Chu Qing was also surprised, "but isn't it too powerful?" It actually knows how to praise people!"

Xiao Wu looked at the women, but already opened her mouth again: "You girls are too beautiful. I've never seen anyone more beautiful than you."

His words once again made the women laugh.

It took the opportunity to grab a nut with its head tilted, as if it was afraid of being found. It flapped its wings and flew away. Then, it landed on Qin Lin's shoulder and began to gnaw on it happily.

When Zhao Moyu and the others saw Qin Lin, they knew that the parrot must be a new pet that Qin Lin had brought back.

"Qin Lin, where did you get this parrot? It's so smart." Zhao Moyu walked directly to Qin Lin's side.

"It's called Xiao Wu, I only brought it back because I saw it was smart." Qin Lin didn't answer directly, but simply lied.

There were many smart parrots out there, but his one was especially smart.

Xiao Wu finished a nut, looked at Zhao mochen, and praised him again, "Beauty, you are the most beautiful woman in the world. You don't mind giving me some more food, right?"

"Pfft!" "Qin Lin, it's really good at coming up with things," Zhao mochen laughed.

Qin Lin also pointed at Zhao mochen and said to the parrot, yes, she's the mistress of the house. She's in charge of all the food here.

When Xiao Wu heard this, she flapped her wings and flew to Zhao moyin's shoulder, mistress, you're the kindest beauty in the world. I'll help you keep an eye on master. I'll tell you if he calls or messages the beauties on WeChat.

"Ran ran," Qin Lin said in the story.

This parrot was treating him too badly. When it heard that Zhao Moyu would provide food, it actually expressed its loyalty to Zhao Moyu in front of him.

Besides, he wouldn't mess around. He wouldn't send WeChat messages or call beautiful women. Why would he give you a chance, you damn parrot?

did you hear that? don't call or send WeChat messages to the pretty girls! Zhao moyin looked at Qin Lin proudly, obviously very happy. Then, he brought Xiao Wu back to the table.

Lin Liu and the other women were even more curious and interested in the parrot.

Zhao mochen picked up a strawberry and handed it to Xiao Wu. She wasn't polite at all. She grabbed it with her claws and gnawed on it, not forgetting to cheer, this is so delicious! It's really delicious!

After all, it was a Grade 2 strawberry.

The dwarf ah ni had probably never fed it such a good thing.

"I heard that the smart parrot can do mathematics. Chairman Qin, does it know?" Tang xiuwan asked curiously.

"I'm not sure about that." Qin Lin told the truth.

He only knew that Xiao Wu could speak the human language, and the attribute of learning the human language was +2.

"Little parrot, what's 1+1?" Lin Liu asked curiously.

Xiao Wu simply looked somewhat disdainfully at Lin Liu: "You don't even understand such a simple question? 1+1 equals 2, 1+2 equals 3, 1+3 equals 4 "

A parrot actually recited an addition table of 99 points in front of everyone.

This made the women so shocked that they couldn't close their mouths.

the parrots in the movies are too conservative. The parrots in reality are smarter. Chu Qing said with a face full of surprise. In the past, when she watched movies, she felt that those talking parrots were too fake. Animals couldn't be so smart.

Now she knew that she was ignorant. This parrot was obviously smarter than the ones in the movie.

Lin Liu also jokingly suggested, " "Boss Qin, I think we can send this parrot to school."

Of course, this was just a joke.

After all, he couldn't possibly send a bird to school.

Qin Lin, on the other hand, subconsciously looked at Xiao Wu.

He knew Xiao Wu's attributes, intelligence +2, intelligence +2, if she really went to school, then it would be too much of a burden, wouldn't it be enough to crush those immature little broken children?

When the women were happy with Xiao Wu's teasing, a dog's barking sounded again.

He saw red hair being chased by the dog into the hall. He jumped onto the shelf at the side. The dog stopped in front of the shelf and whined at red hair.

red hair was also waving his claws on the shelf, chirping.

This seemed to attract Xiao Wu's attention, and she actually flapped her wings and flew over, still calling out: "It's fun."

Xiao Wu quickly landed beside red hair, and hearing red hair call out to the dog, she also shouted: "You come up! Come on up!"

The dog barked even more ferociously and bared its teeth at red hair.

Who knew that Xiao Wu would fly to the dog's side and call out, " "Get down here, you're sneaky attacking me again!"

"Ran ran," Qin Lin.

"Hehe." Zhao Mo hehe.

"Wanwan" and the other girls.

The scene in front of them stunned everyone.

This is an animal translator?

The dog subconsciously stopped and looked at the guy who had suddenly appeared. Then, it seemed that red hair attracted its attention and barked at red hair.

Xiao Wu's participation did make the manor a lot more fun. It didn't take long for it to join the dog and snowy, and they strolled out of the manor.

Red hair had already run away. He was running around the manor's flower wall with a few squirrels in small clothes.

The dog walked out of the manor. When it saw the red hair on the flower wall, it didn't forget to whine a few times. It was like it was saying some tough words before it walked towards the manor.

Gou 'Zi was an internet celebrity and was naturally very famous in the villa.

they were discovered by the tourists as soon as they arrived at the villa.

[Chapter 1026 Animal Translator! Intrusion Into The Advertisement 2](#)

"It's Wang Cai!"

"Quick, take a picture!"

They were a couple and they were excited to see wangcai.

&Nbsp; Gou 'Zi started to whine and then ran towards the inner area of the villa.

Xiao Wu was standing on the dog's back, as if she was translating: these people are very annoying. Hurry up and leave. There will be people surrounding us later.

at first, the young paparazzo enjoyed the fact that the tourists were taking photos of him and he enjoyed the feeling of being noticed.

However, as time passed, Gou 'Zi would obviously get tired of it.

Therefore, if the young paparazzo was like this, it was no wonder that those celebrities hated acting on behalf of others.

The couple was dumbfounded when they saw this.

What the hell?

That parrot?

The young paparazzo quickly brought Xiao Xue and Xiao Wu to the inner area of the villa.

It naturally went to the multimedia department. It had gained intelligence more than once in the game. The young paparazzo remembered many things, especially the work of shooting videos in the multimedia department and becoming an internet celebrity.

The staff of the media department were also used to the young paparazzo reporting to them every day as if he was really a staff member of the media department.

Seeing the young paparazzo arrive, the female employee who was in charge of taking care of the little guy immediately got up.

Although her job was very strange, being an assistant to animals, the salary was really good. Her monthly bonus was more than 20000 Yuan, which many people could not get.

Wangcai obviously remembered the female employee as it started to wail at her as soon as it entered the door.

This call made Xiao Wu excited, and she shouted to the female employee: "It said to bring out the good food, it wants to eat it!"

"wuwuwu!" &Nbsp; Gou 'Zi barked.

"Hurry up and get two bags!" Xiao Wu almost shouted.

The female employee suddenly looked at the parrot in shock.

The other staff in the media department also looked over subconsciously.

No one could stay calm when they saw a parrot.

As the manager of the media department, Lin Lanzi was in charge of more things now, not just the official account video and a few animal videos.

The media department was also in charge of all kinds of activities, publicity, and External Relations.

For example, the order of the Cola fruit. Although it wasn't expensive for her to manage, the media department had to deal with the connections with the laboratory, the villa, and the beverage companies.

The sales of the Cola fruits were very high now, especially after the Cola fruits grown by the beverage companies had ripened. Almost all of them were promoted and dominated the market.

Now, the two Cola companies were still in the process of reforming, so he could only watch helplessly.

Lin Lanzi sorted out the relevant information and looked at another set of information. There was a box next to it.

This was the perfume from the Imperial fragrance company.

She knew that the boss had a large share in this company. Now that the company's perfume was going to be advertised through the official account of the villa, she was responsible for getting people to make the video.

Just as she finished organizing the information, an assistant ran in. "Mr. Lin, go outside and take a look. Chairman Qin has another pet, a talking parrot!"

"parrots?" Lin Lanzi was no stranger to this kind of animal.

But when did Chairman Qin start raising parrots?

Lin Lanzi walked out curiously and heard a commotion. "Don't be stingy, let me eat a little more!"

"wuwuwu!"

"You still have so much, let me eat more!"

"Wuwuwu!"

"Give me some!"

Lin Lanzi thought that it was some employee quarreling with the dog.

When she went inside, she found that it was a parrot flapping its wings beside wangcai, and it kept nagging.

Why was this parrot so good at talking?

Lin Lanzi's eyes lit up.

To be honest, Chairman Qin's pets, whether it was the dog wangcai, the Fox snowy, or the squirrel red hair, were all very smart and had their own characteristics.

However, with her experience, she could tell that this parrot was more unique than the other three. It was enough that it could talk.

He could get another account to attract fans.

...

After Xiao Wu left with wangcai, Qin Lin didn't care about it. After all, it wouldn't run away even if it was bound. There were surveillance cameras and security guards everywhere in the villa, so nothing would happen.

He went straight back to his office and took out the bag of greenhouse tree seeds, wanting to try them.

Qin Lin entered the game with a single thought and brought in the greenhouse tree seeds. He then left one seed in the game character's backpack and logged out of the game.

He controlled his character to plant the greenhouse tree seed on a level 4 plot of land and a level 1 plot of land.

In less than four hours, he received the news that the two greenhouse trees could harvest seeds.

In other words, according to the time ratio, the greenhouse tree would be able to grow well in a month's time, and they could also harvest seeds.

qin lin looked at the game screen and saw that the two greenhouse trees were already on the two plots of land.

It was just that the greenhouse trees in the Level 4 plot had produced seeds, and they could be picked.

However, the greenhouse trees on the ground at Level 1 did not have a seed harvest notification.

This was probably the difference between planting it on a level 4 ground.

If it was not planted on the level 4 land, it would not produce seeds.

Only when planted on Level 4 land would the greenhouse tree produce seeds.

in the game, the dwarves in seven colors had surrounded the two greenhouse trees.

Qin Lin was also very curious. He entered the game with a thought and heard the conversation of the Seven Dwarves.

"It's a greenhouse tree!"

the shop owner actually planted this. Has he been to the dwarf Valley? "

"boss, can you plant a greenhouse tree for us too?"

"Boss, you're a good person!"

"Boss, you're the best person we've ever seen!"

"....."

A few dwarves surrounded Qin Lin and started to flatter him.

The key was that these guys 'flattery was so stiff that he couldn't continue listening to it. He could only pick Seven Seeds from the greenhouse tree and throw them to them.

After the Seven Dwarves received the greenhouse tree seeds, they ran away happily. They were obviously looking for a place to plant the greenhouse trees.

Qin Lin also began to observe the two greenhouse trees in front of him. Just like ah NI's greenhouse tree, they still had green leaves, stems, and flowers. They were perfect and beautiful.

The flower was still similar to wisteria, but it was definitely not wisteria. Wisteria seeds were poisonous, and its stem was not suitable for long-term contact with humans.

The greenhouse tree did not have such a problem.

However, this flower was indeed very similar to wisteria and was very beautiful.

the interior of the greenhouse tree was still dozens of square meters. for humans, it was too small to live in a house, but it was perfect as a resting pavilion.

He tried the structure of the tree's trunk.

He had eaten two fruits of the tree of power, but it was very hard to do anything to it. It was very strong, so there was little danger.

In fact, he was just testing it out. After all, the dwarves could live like houses, so they must have tested that there was no danger.

Qin Lin did some other tests and found that after the greenhouse tree was planted, not all chairs were needed. They could also build a swing or something.

With the strength of this stem, it would not be a problem for a fatty who weighed a few hundred pounds to swing on the swing.

After completing some tests, Qin Lin controlled the game character to pick the seeds of the greenhouse trees and plant new greenhouse tree seeds on the new level 4 land.

The manor and the pasture were so big, so he naturally had to keep more seeds.

After that, he called Yu Shui over and told him to mark out the places where the benches were set up in the villa and the ranch. In the future, he would plant greenhouse trees in these places.

When Yu Shui received the order, she didn't ask for the reason. She immediately brought people to deal with it.

At night.

A video posted on Linlin villa's official account had attracted the attention of many fans.

Linlin villa's fans all knew that once the official account of the villa posted a video, something big might happen.

even if it wasn't a big deal, there must be something new and interesting. he definitely had to take a look.

Chen Xue was one of them. She was from you city and was more familiar with Linlin villa. She was a loyal fan of Linlin villa. She also found the video and directly clicked on it to watch.

A man appeared in the video. The man was struggling to decide what gift to give to the girl he liked. Seeing this, Chen Xue guessed that this was an advertisement.

It must be some new product from Linlin's company. Someone would tell the man what they were going to give him later, and it must be a new product.

This was also the usual routine of all advertisements.

However, in the next moment, something that flapped its wings and entered the room caused Chen Xue to be stunned.

[Chapter 1027 The Mutation Of The Tea Tree 1](#)

Chen Xue opened the video.

in the video was a man. the man muttered to himself as soon as he came out, " my name is Chen dachui. I'm very troubled right now because my girlfriend's birthday is coming up. I don't know what gift to give her, Yingluo.

This video stunned Chen Xue. The style of the video was completely different from the video in the villa. It was simply an advertisement video.

According to the routine, someone should have come out to remind the man what gift to give. Moreover, the gift was the product that the advertisement wanted to promote.

Chen Xue wasn't the only one who thought so. The other fans who saw the video also thought so.

everyone was too familiar with this kind of advertising strategy, okay ...

However, no one had expected that the official account of Linlin Manor would also start to play such a cliché advertising routine.

The next moment, something happened that surprised everyone. A parrot flapped its wings and flew over.

the parrot was holding a bottle of perfume in its claws.

The parrot threw the perfume on the table in front of the man.

No one had expected this to happen.

Everyone thought that someone would remind the man of the present, but it turned out to be a parrot.

It seemed that he had wronged Linlin Manor. Even if it was a trick, Linlin Manor would still play different tricks.

However, what happened next was so shocking that they could not close their mouths.

After the parrot threw the perfume away, it started scolding the man, " "You've been nagging for half a day, disturbing my peace, aren't you annoying? He didn't know how to give his girlfriend perfume? This perfume is very popular with girls."

As he spoke, the parrot flapped its wings to show that it was very dissatisfied with his noise and was very angry at being disturbed.

" ? ? ? "When Chen Xue saw this, she was so shocked that her mouth was wide open.

The other people on the internet who saw the video also exploded with disbelief.

Did the parrot just curse?

f * ck, I've seen a ghost. This Xuanji is cursing.

"I've seen parrots talk, but I've never seen parrots that can talk like this."

"I don't think many celebrities can recite those lines and that tone, right? Did a parrot really tell you that?"

"I think it's probably a dubbing!"

"....."

Chen Xue had a huge shock at this time. There were many movies where talking parrots appeared, but even the parrots in the movies didn't dare to be so cowardly, right? He was afraid that others would say that it was too fake.

No matter how good a parrot was at learning how to speak, it was still different from a human.

The video continued.

The man was also very surprised when he received the perfume. "Really? Do all girls like this perfume?"

"Get lost!" The parrot impatiently slapped the man's face with its wings.

The man didn't dare to hesitate. He covered his face, picked up the perfume, and was about to leave.

The parrot shouted, "Idiot, you didn't even wash your head, take a shower, or change your clothes when you went out on a date?"

Only then did the man react. He placed the perfume on the table and ran into the bathroom.

At this moment, the camera turned to Xiangfei perfume. The parrot flew up and landed next to the perfume. It said, "Consort perfume. It's a perfume that girls like."

The video ended there.

Meanwhile, the comments section of the video had gone viral. Those who had seen it were all stunned by the parrot.

It was just a parrot.

It could actually do such a thing?

And he's so cooperative in shooting a video?

The key was the lines and the acting.

I can only say that it's 666. Some celebrities really can't compare to a parrot!

"The person above, just @ moukun, Yingluo."

"I want to know how Linlin villa convinced this parrot to cooperate with the advertisement."

"Is this parrot a voice-over, or does it really speak so smoothly?"

"....."

Without a doubt, the parrot Xiao Wu was on fire, and so was the perfume.

The next day, the advertisement inevitably made it to the hot search.

Naturally, the perfume fire was only in passing, the one truly on fire was still Xiao Wu, this parrot.

It was said that parrots mimicked words, but who had ever seen such an awesome parrot?

They couldn't be called parrots, and it wouldn't be an exaggeration to call them parrot spirits.

Just from the lines alone, the parrot was no different from a human. Really, some people didn't have the ability to cooperate with the camera like this.

What everyone was most curious about was whether the parrot had said those words.

If it was only post-production dubbing, then it was nothing.

If it wasn't voice acting, then it would be amazing.

This doubt was quickly confirmed by everyone.

Because in the following time, when many tourists saw the internet celebrity dog, wangcai, they would also see the parrot. Many tourists took videos of the parrot, especially the video of the parrot speaking human language.

Under such circumstances, it was impossible for someone to dub for the parrot all the time. This meant that the parrot could really speak human language.

therefore, xiao wu, the parrot, became completely popular. she became the fourth internet celebrity animal in linlin villa after wangcai, snowy, and redhead.

of course, other than xiao wu's parrot, another thing that had attracted the attention of many tourists in linlin villa these days had also attracted the attention of many people.

The long benches on the roads and resting areas of Linlin villa and Linlin Ranch had been removed.

These benches were originally provided for tourists to rest.

When the tourists were tired, they could sit on these benches.

Now that the people from Linlin villa had completely dismantled the benches, it was impossible not to attract attention.

[Chapter 1028 The Mutation Of The Tea Tree 2](#)

Moreover, the people of Linlin villa had planted something on the ground and surrounded it with a wooden fence.

The positions of these benches were originally calculated by the designers as the best positions. Therefore, it was impossible to plant a greenhouse tree next to it and then remove the benches, which would affect the overall beauty.

Therefore, he could only take down the bench and plant a greenhouse tree.

However, the tourists didn't make a fuss. Everyone knew that there must be a reason for Linlin villa's actions. Even if they tried it, it would give them a huge surprise.

Now that the bench had been dismantled to plant something, this thing must be very important. For a while, it led to many speculations.

There were even posts on the internet, guessing what Linlin Manor was growing.

linlin manor office.

Zhao Moyu also entered Qin Lin's office and asked, "Hubby, did you ask Yu Shui to remove the bench and plant something? Everyone's talking about this on the internet."

"I'll send you a few videos and photos!" Qin Lin had guessed that Zhao Moyin would ask this. Even if Zhao Moyin didn't ask, someone else might ask, so he had already prepared for it.

As he spoke, he took out his phone and sent a few videos and photos to Zhao Mochen.

The videos and photos were naturally about the greenhouse trees.

When Zhao Moyu received the video and the photo, he immediately opened WeChat to watch it. When she saw the video of the greenhouse tree, she was surprised. "Hubby, is this a house or a Pavilion? It's so beautiful, it's made of flowers and green leaves. How can it be so exquisite?"

Qin Lin explained with a smile, "This is actually a whole tree. It's also a special experiment. The seeds can't be duplicated. As long as the seeds are planted, the tree will eventually grow like this."

It was an accident that these seeds were cultivated, and there aren't many left. I've only gotten some seeds after I've given up my reputation and owed a favor.

"Hubby, are you saying that the seeds will eventually grow into these treehouses?" Zhao Mochen asked.

"Yes, that's how it ended up!" Qin Lin nodded with certainty.

"This is unbelievable." Zhao Mochen was completely shocked, but she also knew that science was very magical, and that it could create many magical things.

Therefore, she didn't ask further. Instead, she would go out of the manor and start to observe the greenhouse tree seeds.

The greenhouse tree's seeds grew very fast. It only took a month for the greenhouse tree to grow, and it only took two or three days for it to germinate.

Moreover, after a few days, all the greenhouse trees' seeds had not only sprouted, but they had also grown a large section. A stem had extended in a strange direction, and its shape was extremely similar.

This made Zhao Moyu feel very magical.

Although it was the same crop, it was clearly a different seed. How could the stems grow in the same direction? Even the shape of the extension was similar?

Zhao Moyin also took out the video that Qin Lin had given him. Although it had just started to grow, he could already see some of its outline.

The outline of the treehouse now was almost the same as the bottom of the treehouse in the video.

Zhao Mogan surprisingly determined that after these seeds had fully grown, they would really grow into the treehouses in the video.

This was truly too miraculous.

Without the help of external forces, how could these seeds grow at the same time?

Zhao moyin couldn't figure it out at all, and could only sigh at the wonders of science.

At the same time, the incident of Linlin villa tearing down the bench and planting something had been the focus of the tourists' attention. These days, many tourists had also been paying attention to these things.

now, many tourists had also discovered the situation with these seeds. the stems of the seeds actually extended in a special direction, which was definitely not a normal phenomenon.

Some people even took pictures of the greenhouse trees planted everywhere. Through comparison, everyone could see that the appearance of each greenhouse tree was extremely similar, as if they were clones.

Even a fool would be able to see that there was a problem.

This also made more people pay attention to these greenhouse tree seeds. They wanted to know what these things would eventually grow into.

...

Time passed.

Linlin Manor Office.

After Qin Lin finished his daily tasks, he took out his phone and started to watch videos. Then, he was attracted by a video:

ten days ago, after Linlin Manor removed the benches and planted the mysterious plant, everyone was very curious about the mysterious plant. However, Linlin Manor did not give an explanation.

I've seen the latest video taken by the visitors, and I made a magical discovery. If the stems of the plants start to merge together, it seems like they can form a natural treehouse.

This video had already become a hot topic, and there were many likes and comments.

As the days passed, the greenhouse grew bigger and bigger, and the leaves grew more and more. Overall, the prototype of a treehouse had begun to appear.

There were many capable people on the internet, so naturally, some people had discovered this problem. As a result, some people had posted their findings on the internet.

qin lin was scrolling through the video when he heard a knock on the door. he opened the door and saw marvin walking in.

"Old Ma, you're on time." Qin Lin said with a smile when he saw Marvin.

Qin Lin, you know I love tea, " Marvin said. when do I start? "

"let's go!" Qin Lin smiled and took Marvin to get his pockets.

[Chapter 1029 The Mutation Of The Tea Tree \(3\)](#)

ever since the manor had three more tea trees transplanted from the game, marvin had been thinking about them.

after the three tea trees were transplanted, they were no longer affected by the game's characteristics. not only could the tea leaves be picked once, but new tender leaves would grow after the previous harvest.

During the period when the tea leaves were growing, the tea leaves could be picked once every three to five days. Before that day, Gao Yaoyao would bring the manor's service staff to pick the tea leaves as soon as the tea leaves grew.

today, however, marvin had seized the opportunity. he happened to be free and rushed over.

The basket and apron were in a cabinet in the hall. After taking them out, Marvin put them on with great familiarity.

Marvin had come personally to pick the tea leaves, so Qin Lin naturally had to accompany him. He also brought his basket and went to pick the tea leaves from one of the tea trees.

But as soon as he started to pick, Marvin suddenly froze. "Qin Lin, there's something wrong with the tea leaves of this tea!"

As he spoke, he actually took the tea leaves and started to rub them. He even put them in his mouth and chewed for a while. Then, he continued, "It's not right. It's different from the tea leaves we picked last time! After chewing it, the bitterness is stronger, and it seems to have lost some tea fragrance."

"Old Ma, you can tell?" Qin Lin looked at Marvin in surprise.

&Nbsp; to be honest, he really didn't notice anything different about the tea leaves. Old Ma had just picked them and he was able to notice it.

marvin nodded. " it's different. i can't tell you the details, but i like tea and have done a lot of research on tea leaves. i can still feel it after chewing it. "

after that, marvin walked to the other two tea leaves, picked them and tasted them. he frowned and said, " "The tea leaves from these two tea trees are also different from the last time."

old Ma, wait a moment. I'll take it in and study it. Qin Lin thought of something. He picked some tea leaves from the three tea trees and went back to his office.

Previously, when he transplanted the three tea trees, he had used special soil for each of them. It was impossible for the tea leaves to be different from the same tea tree.

If old Ma was right, there was a possibility that the tea tree had undergone a mutation due to a special soil, which was why the tea leaves were different.

It must be known that the special soil itself had the attribute of causing crops to mutate.

It was also because of this attribute that ordinary crop seeds had a chance of mutating and becoming Grade 1 crops.

However, for three tea trees to mutate at the same time, the probability was truly shocking.

Qin Lin returned to the office and took the tea leaves picked from the three tea trees. He entered the game with a thought.

He immediately looked at one of the tea leaves that he had brought into the game and saw the remark:

[(rare) wild Tieguanyin leaf: quality 2]

[this is a wild type of tie Guanyin. It is definitely a high-quality tea, but unfortunately, it is extremely rare. It can be used to stir-fry and brew tea. It has many effects. Also, due to the special soil, it has undergone a certain mutation: Tea fragrance +1, sweet aftertaste +1, eliminate greasiness +1, promote digestion +2, refresh the mind +2, cancer prevention +2, tea growing season +2!]

The attributes of the tea leaves had changed. Many of the attributes had changed from +2 to +1. However, there was the addition of the tea growing season +2.

Qin Lin then looked at the attributes of the other two tea leaves. The attributes were exactly the same, with some attribute debuffs and an additional attribute of growing season +2.

There were many types of tea leaves, but they only grew in one season, either spring tea, winter tea, or winter tea.

Now that the growth season of this grade of tea leaves was +2, didn't that mean that there would be three seasons in a year where tea leaves could grow?

was this kind of attribute awesome? Or not awesome?

It should be awesome, right?

After all, the tea had the +2 effect of cancer prevention.

This attribute was already very amazing. If the tea leaves could only grow in three seasons a year, that would be even more amazing. As long as it was cultivated, would cancer still be a threat?

Compared to this, the drop in the tea leaves 'taste and aroma attributes was nothing.

He could also take this opportunity to let old brother Li examine it and let people discover the magic of this tea.

[Chapter 1030 This Tea Leaf Is Actually Effective Against Cancer](#)

Qin Lin exited the game and took out his phone. He was about to call Li Kai to come over and help him test the tea tree and find out its anti-cancer effects.

Someone knocked on the door.

He opened the door and saw Li Kai standing outside.

"brother qin, i saw ma lewen picking tea leaves outside. is he here to drink tea again?"

As soon as Li Kai entered the office, he sat down at the tea table and skillfully took the quality 2 wild Tieguanyin and made some tea.

He also liked Qin Lin's tea.

Qin Lin also sat at the tea table and explained with a smile, " old Ma likes tea, " Wang Yao said. these tea leaves are newly grown, so he can pick them.

yes. Li Kai nodded. Marvin, Chen shengfei, and Li Fei. They're all bad friends. All three of them have their own hobbies.

Qin Lin agreed with this.

the three of them didn't just have a hobby, they had also found the way to their own hobbies.

after a few words, he wanted to lead li kai to the tea leaves.

"Brother li, are the plants in the villa and the ranch cultivated with special soil?" Li Kai asked solemnly.

brother Li, I've seen the seeds planted in the villa and the ranch. The same branches extend in the same direction, and the similar shapes are incredible.

I picked some stems and leaves to check the genes. I found that the genes are very special. Only a special soil can cause a genetic mutation!

"Old brother li, have you checked those trees?" Qin Lin realized that Li Kai was talking about the greenhouse tree.

The greenhouse tree was a little magical. After all, a seed could grow into a greenhouse tree in a specific form after being planted. As it was impossible to cultivate seeds in the outside world, he had never thought of testing it.

Li Kai nodded and said,"those trees can naturally extend their branches and grow with a similar mentality. That's very impressive, okay?" as a crop expert, how can i not be curious?"

"It's just that there are so many seeds affected by the special soil. This one is the most magical."

" for a plant to have this kind of property, it must have a special gene fragment. the appearance of a creature is affected by a special gene. "

for example, the shape of a human, an animal, or a plant. The reason why they can form life and grow into their final form is because they have special genetic forms.

in fact, the quality of a person's appearance is sometimes related to the special genes unique to humans.

I found a special thread-like gene in those special trees. It should be the gene that caused those trees to grow in a special way!

Qin Lin was surprised and asked, " "Old brother li, do you have a way to research that special gene fragment?"

The greenhouse tree's seed limit was that it could not be cultivated under Level 4 soil. However, if he could use scientific methods, he might be able to cultivate it.

More importantly, if he could crack the reason behind this, he might be able to make the greenhouse tree grow into more forms, and it might not just look like the treehouse.

However, Li Kai shook his head helplessly. old Brother Qin, that gene fragment is too strange and profound. I've used all sorts of genetic technology methods at the current stage, but there's no way to pry into it. I feel that the genetic technology will be helpless for the next 30 years.

Hearing this, Qin Lin could only continue to make up stories. old brother Li, I'm not sure about these seeds. They were indeed soaked in special soil. I don't understand either, so I only cultivated them secretly. Seeing that they had a strange appearance, I wanted to use these seeds to decorate the villa and Manor.

"Sigh, then I have no choice." Li Kai could only sigh.

He knew how unbelievable the gene was. In addition, he could tell that Brother Qin didn't want to say more. Therefore, he didn't ask further. He could only try to see if he could decipher the gene, although the possibility was very small.

"Brother Li, I'd like to ask you for a favor. Didn't I transplant three tea trees before?" Qin Lin changed the topic. I've filled every tea tree with special soil. Today, old Ma and I found that the tea leaves growing from these tea trees seemed to have mutated."

"I don't know if the mutation is good or bad, so I wanted to ask Linlin's laboratory to do a test. since you're here, I'll leave this matter to you. "

Although he knew the exact situation of the mutation of the tea leaves, he had to pretend that he didn't know anything and try to fool them.

"The tea leaves have mutated? Then I'll bring some tea back for testing." Li Kai, on the other hand, was attracted.

Moreover, since Qin Lin had asked, he would not refuse.

Testing the tea leaves was a small matter.

Qin Lin led Li Kai out of the office and to the three tea leaves.

Marvin was still picking tea leaves and putting them into the basket on his waist. When he saw Qin Lin, he asked, "Qin Lin, how is it? This tea is different from the last time, right?"

Qin Lin pretended to be confused. old Ma, it's a little different. I think it's better to let old brother Li check it and see what's going on.

Marvin also saw Li Kai and immediately greeted him, " "Professor Li!"

Although he wasn't old, he was good friends with Li Qing. Li Kai was older than Li Qing by a generation, so he had to be respectful to him.

Not to mention that he was now Professor Li Kai.

Li Kai nodded. yeah, give me some tea leaves. I'll bring them back for testing. I'll let you know when the results are out.
