

The Game 1031

[Chapter 1031 This Tea Leaf Is Actually Effective Against Cancer 2](#)

Marvin also gave some of the tea leaves to Li Kai. After Li Kai left, he pulled Qin Lin along and continued to pick the tea leaves.

Regardless of whether the tea leaves had changed or not, his purpose for coming here had not changed. He had to finish picking the tea leaves.

The three stalks of tea leaves weighed at least 70 catties. It was impossible for the two of them to pick all of them in a short time. In the end, Gao Yaoyao had to bring someone to pick them.

however, after the tea leaves were harvested, the speed of stir-frying the tea leaves was faster.

Marvin was in charge of taking a bath. After he was done, he handed it over to Qin Lin and asked him to put it into the pot to stir-fry.

this time, when he was just frying, marvin's brows slightly furrowed.

This was not the first time he had seen Qin Lin stir-fry this wild tie Guanyin. He could still remember the tea leaves when he was stir-frying them before. Now, although the tea fragrance was still very strong, it was obviously not as good as before.

Not long after, Qin Lin stir-fried all the tea leaves into cooked tea. This time, there was also about 15 catties of tea.

After Qin Lin finished cooking the tea leaves, Marvin grabbed some tea leaves and hurried to a tea table in the hall. He then started making tea.

when qin lin came out with 15 pounds of stir-fried tea, marvin's pot of tea was already ready. he poured himself a cup and began to taste it.

But after a few mouthfuls, Marvin frowned and said to Qin Yu, Qin Lin, there's something wrong with this tea. The tea's fragrance, taste, and aftertaste are all lower than before by more than one level. Come and try it.

Qin Lin naturally knew the reason. After all, A +2 attribute had become A +1 attribute, and the difference was huge. Seeing Marvin pour him a cup of tea, he pretended to drink it and said, "The tea's fragrance and taste are indeed much worse."

"hey, how did this happen?" Marvin let out a deep sigh. For someone like him who loved tea, this was the last thing he could accept.

So, for the rest of the day, Marvin started to be depressed. He was caught in a dilemma, and even his wife, Chu Qing, was ignored.

It was only when he realized that Chu Qing was angry that he hurriedly asked Qin ran for a bottle of Linlin medicinal wine and went back to his room.

Come to think of it, the best way to coax an angry wife was to give her an intense **.

Linlin's laboratory.

As night fell, Li Kai and a few researchers were still sitting and doing the experiment.

He knew about the special soil, so when Qin Lin said that the tea tree had changed because of the special soil, he was naturally anxious to test the specific condition of the tea leaves.

The researchers were now very impressed with Li Kai as the person in charge, so when Li Kai was working overtime, they wouldn't even say that they were going to get off work. They were still full of energy.

However, not long after, Li Kai and the researchers stopped and looked at the composition extracted from the tea leaves in shock.

"Professor Li Kai, is this the kind of ingredient?"

"It seems somewhat similar, but also a little different."

"if it really has that kind of effect, then it's really unbelievable."

"....."

It was no wonder the researchers were shocked. Even Li Kai himself was shocked.

Previously, academician Li recuperated in Linlin Manor because of his stomach cancer. Later, through the special herbal fish and the king eight-herb cuisine in the manor, academician Li's stomach cancer slowly recovered.

therefore, the Chinese Academy of Sciences conducted in-depth research on the giant turtle and the yellow croaker and found that there was indeed a special substance in the meat that could treat stomach cancer.

the discovery of this substance made the Chinese Academy of Sciences very excited. they even thought that they had found a way to treat stomach cancer.

Unfortunately, this substance could only be produced during the eight years of growth of the giant yellow croaker and the king. There was no way to replicate or crack it.

No matter how amazing science was, there were times when it was helpless against the products of the laws of time. At least, the current technology was helpless.

Therefore, since there was no way to replicate it, the Chinese Academy of Sciences could only record this special material and then set up a special research team in an attempt to crack it.

After this material was recorded in the database of the Chinese Academy of Sciences, some laboratories that cooperated with the Chinese Academy of Sciences could also see it.

After all, this wasn't a technology, but a material that was discovered.

These cooperative laboratories could not only see the material information, but they could also study it if they wanted to.

The Chinese Academy of Sciences was even eager for more laboratories to participate in this to crack this substance and completely solve stomach cancer.

The Linlin laboratory and the Chinese Academy of Sciences were partners.

Moreover, academician Li's stomach cancer was treated in Linlin Manor, so they were close to each other. They naturally knew about this substance and obtained some yellow fish and big turtle meat from Linlin Manor for research.

The Linlin laboratory had the most complete data in this area, second only to the Chinese Academy of Sciences.

Now that they were testing the composition of the tea leaves, a researcher had just seen the material information and unexpectedly found that it contained a similar material, but it was different.

This naturally attracted their attention, and they had their own speculations.

If it was as they had guessed, it would be a very sensational matter.

don't just stand there, " Li Kai hurriedly said. hurry up and start the test.

The researchers didn't dare to hesitate. They immediately took action. First, they extracted the ingredients similar to the yellow croaker and the giant turtle.

They already had data on the effect of this ingredient on stomach cancer, so they would know after a comparison.

Soon, the ingredients were extracted and compared, and everyone's mouths were wide open in shock.

The ingredients after extraction were actually completely similar. Furthermore, the stress effect seemed to be even stronger.

This was too unbelievable.

In other words, this tea had a therapeutic effect on stomach cancer, and it was even stronger.

That night.

li kai directly led the researchers to work through the night. even though they had swollen eyes and were extremely sleepy by the second half of the day, the researchers 'faces were still full of excitement and disbelief.

After further research on the extracted ingredients, it was discovered that the ingredients contained in the tea leaves could not only target stomach cancer.

Therefore, they were more shocked with each test.

Furthermore, the giant yellow croaker and the giant turtle had to grow for a long time before this substance would appear. There was no way to replicate and cultivate it.

The growing period of tea leaves was not very long. If it could be cultivated, it would only take three to five years for a tea tree to be transplanted with new tea leaves.

Therefore, it could be trained.

The most important thing was that they were a country with a great deal of tea leaves. They were absolutely good at transplanting tea leaves and had the most suitable environment and soil for the growth of tea leaves.

One could imagine that if this tea was planted all over the country, everyone would be able to drink it. Then cancer would no longer be a terminal illness, at least not in their country.

.....

The next day.

Qin Lin came out of the inner area and walked to the office. He met Marvin and was pulled by him to the three tea trees.

Marvin looked at the three leaves and said, "Qin Lin, aren't you a professor in Crop Research? The Chinese Academy of Sciences even gave you a certificate."

"What's wrong?" Qin Lin asked, puzzled.

hurry up and study these three tea trees, " Marvin hurriedly said. these tea leaves can't be compared to the ones before. Isn't this a waste of God's gifts? " Can you see if you can restore these three tea leaves to their previous state?"

" ran ran. " qin lin didn't know how to answer for a moment.

Was there a misunderstanding in old Ma's crop experiment?

&Nbsp; moreover, apart from making the taste and fragrance of the tea worse, it was also a good thing that the tea leaves could be harvested in three seasons.

after all, this was a tea that could prevent cancer.

Only a fool would turn the tea leaves back.

As they were chatting, Li Kai came running over with dark circles under his eyes. He looked shocked as he thought about the results of the tea test that he had brought with the researchers.

When Marvin saw Li Kai, he said, " professor Li Kai, the taste and aroma of the tea leaves have dropped too much. There must be some changes to the tea tree. This is a waste of natural resources. Do you have any way to restore the tea tree to its original state? "

"Are you kidding me?" When Li Kai heard this, he immediately became anxious.

You must be joking, right?

[Chapter 1032 This Was Trained By Little Qin, It Has Nothing To Do With Me](#)

Li Kai was a little anxious. Return to his original state? Are you kidding me? you're not allowed to touch the tea tree.

Cancer had always been one of the biggest threats to mankind.

although there were already some treatments for some types of cancer after the continuous research of medical scientists, those treatments were also very expensive.

Some tycoons could spend tens of billions of dollars to live to 70 years old after getting terminal cancer.

However, most people basically sold their cars, houses, and even went bankrupt. In the end, they couldn't keep their lives.

This tea tree had ingredients that were effective for all kinds of cancer. If it could be cultivated, it would definitely be a blessing for humans.

Marvin saw Li Kai's excitement and asked, "Professor Li Kai, is there a problem with the tea tree?"

"Brother Qin, do you know what I found when I tested these three tea leaves for you?" Li Kai explained excitedly. The three tea leaves you've cultivated actually contain ingredients that are effective against cancer."

if these three tea leaves can be planted and transplanted, we might be able to solve the cancer problem.

Although Qin Lin already knew the attributes of the tea tree, he still pretended to be excited and said, "Really? Old brother Li, are you sure you didn't make a mistake?"

"It's true." Li Kai couldn't tell that Qin Lin was acting at all. He nodded and said, "there's no mistaking it. Congratulations, Brother Qin. You've actually managed to cultivate such a tea tree!"

Qin Lin continued to put on an act and said, "Old brother Li, I didn't expect that the tea tree would have such an effect after its mutation. I'm so lucky!"

"Anyway, you were the one who cultivated this tea tree." Li Kai said as he took out his phone. It was actually recording.

"? ? ? ?" Qin Lin looked at him in shock.

Li Kai smiled. Brother Qin, whether it's intentional or not, or if you're lucky, it's definitely an amazing thing that you've cultivated this tea tree. So, it's best to record our conversation. It can be used as evidence for the scientific community in the future.

"ran ran." Qin Lin's head was full of black lines.

it would be strange if he believed those words.

This was f * cking premeditated.

Old brother Li had turned bad.

the narrator, marvin, was dumbfounded. "Professor Li, you're saying that the tea leaves of this tea tree are effective for cancer?"

Li Kai nodded and asked, "So, do you still think it's a waste of God's gift?"

Marvin subconsciously shook his head when he heard this.

What a joke.

No matter how good the taste of the tea was or how strong the tea fragrance was, how could it be compared to this effect?

in fact, there had always been rumors of tea being able to prevent and cure cancer, especially those top-grade tea leaves, which were even more widespread.

However, there had never been any experimental data to prove this.

However, he didn't expect that the tea leaves from the three tea trees transplanted by Qin Lin would be effective for cancer.

This was based on scientific data.

After all, professor Li Kai had just brought someone to do the test, so there was no way it would be wrong.

Marvin couldn't help but praise him. Qin Lin, you're amazing. No matter what, these three tea trees were transplanted by you. It will cause a sensation if the outside world knows about this.

Li Kai held the recording phone and suddenly looked at Marvin with admiration. He felt that it was enough and turned off the recording.

Brother Qin, "Li Kai said to Qin Lin, "we should put these three tea trees under special protection. I'll get someone from the laboratory to test the specific condition of these tea trees and see if they're suitable for cultivation and transplantation.

"En!" Qin Lin had always wanted to cultivate and transplant the tea tree, so he naturally agreed with Li Kai.

Therefore, the villa's Engineering Department was called over to set up a fence around the three tea trees, surrounding them.

After that, Li Kai also called over the researchers from Linlin Laboratory.

When the researchers arrived at the manor, they were like Granddaughter Liu entering a Grand View Garden, completely attracted by the manor's scenery.

They had all heard and seen videos of the manor. Now that they had seen it with their own eyes, it felt really different.

Qin Lin and Li Kai were already waiting at the three tea trees.

When the researchers saw Qin Lin, they also greeted him respectfully. "Chairman Qin."

"Yes, I'll have to trouble you." Qin Lin also responded to the researchers.

At this moment, Li Kai deliberately raised his voice and said, "these three tea trees were transplanted and cultivated by Chairman Qin. You have to help him examine them and report to him later!"

Qin Lin's mind was filled with black lines. He seemed to have understood Li Kai's intentions.

It was just that he had already been taken advantage of, so he was helpless now.

The researchers immediately nodded. After taking out their tools, they began to examine the three tea trees.

Some researchers who were eager to show off didn't forget to report to Qin Lin.

Although Qin Lin had obtained the knowledge from a book on genetic experiments through his cheat, he was really confused about the specific scientific data and professional knowledge.

Most importantly, he could not reveal anything, so he could only pretend to nod.

Seeing this, Li Kai did not forget to take out his phone and take two photos. He was as happy as a child.

The commotion in the manor naturally attracted the attention of academician Li.

Tang Xiuwan, Lin Liu, and the other women who were taking care of their children also noticed.

However, when they saw the researchers doing the test, they didn't go up and disturb them. Instead, they went straight into the hall.

When they arrived at the hall, they saw Marvin making tea and sighing.

[Chapter 1033 This Was Trained By Little Qin, It Has Nothing To Do With Me](#)

The one he made was naturally the wild Tieguanyin tea that Qin Lin gave him, which was of Grade 2.

Seeing her husband like this, Chu Qing asked in confusion, "Hubby, what's wrong?"

I don't think we'll get to drink this kind of good tea in the future," Marvin sighed. There's something wrong with those three tea trees. Qin Lin probably won't be able to get this kind of tea leaves.

What's wrong with the tea tree?" Chu Qing asked curiously. Is that why the researchers came to check?"

"No," Marvin shook his head. "Those researchers didn't come here because there's something wrong with the tea trees. It's good news. The three tea trees Qin Lin transplanted have mutated. The tea leaves are effective against cancer. Naturally, they want to test it."

"Tea leaves are effective for cancer?" Chu Qing exclaimed when she heard the news.

The other women couldn't help but be surprised.

Everyone knew how terrifying cancer was. If this tea could be effective against cancer, how shocking would that be?

On the other side, academician Li had already walked straight to the three tea leaves. He was an academician researcher himself, so he didn't have many concerns.

Seeing Li Kai and Qin Lin busy with a group of researchers, he couldn't help but want to find out more.

"Professor Li Kai, boss Qin, what's wrong with these three tea trees?" academician Li also asked curiously.

Qin Lin was about to answer when Li Kai said, "Academician Li, you know, Brother Qin transplanted these three tea trees and used his special nutrient soil."

"En!" Academician li nodded.

He had looked at the three tea trees when boss Qin had transplanted them, but he hadn't paid much attention to them. It seemed that he had put some special fertilizer in them.

That should be the nutrient soil that boss Qin made.

He had not paid attention to the tea tree before, but now it seemed that something had changed.

li kai continued, " the three tea trees that brother qin transplanted have undergone some wonderful changes. their tea leaves actually have a very strong effect on cancer. brother qin's luck is very good this time. he actually managed to cultivate these tea trees! "

"Al." Qin Lin sighed silently.

Brother li, is this necessary?

He kept saying that he was the one who had trained them, as if he was afraid that others would not know.

F * cking f * ck!

When academician li heard Li Kai's words, he was shocked. professor Li Kai, is what you said true? the tea leaves are now effective for cancer? "

he himself had stomach cancer, so he naturally knew how terrifying cancer was. this news was shocking.

It was not surprising that his stomach cancer was cured. After all, he knew the expensive price of the old yellow croaker and giant turtle.

Who knew how much money the higher-ups had spent to help him purchase these two items?

This wasn't something that ordinary people could afford to treat. Even if one had money, they wouldn't be able to replicate this method.

Now that the tea leaves were effective against cancer, he knew what it would mean if he could transplant and cultivate the tea leaves.

It could be said that boss Qin could be crowned as a God in medical books just for this.

Li Kai nodded with certainty. academician Li, you're a senior. Why Would I Lie to You? " Otherwise, what are we testing here for?"

"If the test results are good and this tea tree can be transplanted and cultivated without being affected, then we'll start to try the transplant cultivation."

Academician li didn't want to stay any longer, so he quickly walked back to his room.

This news must be reported to Minister Lu and the others.

The entire Chinese Academy of Sciences would be shocked by this news.

The Chinese Academy of Sciences had spent a lot of money on Cancer Research. Although there were results, they were definitely not qualified to say that they could solve the problem of cancer.

now, professor li kai was telling him that the tea could completely solve the cancer problem?

if someone else had said this, he wouldn't have believed it. however, since professor li kai said it, he had to believe it.

Chinese Academy of Sciences.

Minister Lu was reading a report.

previously, the incident with watari had caused an uproar. the higher-ups had instructed them to help promote watari. the intention was to teach watari a profound lesson. the goal was to spread watari all over the country.

Therefore, the Chinese Academy of Sciences had also found several experts to study the promotion of cattle fertility.

After getting the sperm from the wazzles at Linlin Ranch, the research of the experts was quite effective. the information in his hands was proof.

After that, he could send this information to the ranches in the country that had started to cultivate the whe cows so that they could cultivate the whe cows better and faster.

This time, the Japanese association with the Bulls had really suffered a double loss.

Who asked him to be targeted by boss Qin?

Just as Department Lu finished reading the information in his hands, his phone rang.

When he saw it was academician Li's number, he immediately picked up.

Academician li was an old man, so there must be something important for him to call him at Linlin Manor.

He pressed the answer button, "

Minister Lu, boss Qin transplanted three tea trees for cultivation, and now these three tea trees have mutated. The tea leaves from these three tea trees are actually effective for cancer.

Academician Li's words shocked Minister Lu, "

This news was simply too shocking.

Cancer had always been a difficult problem in the world. Otherwise, it would not be called a terminal illness.

what news did he hear now?

Boss Qin had cultivated three tea trees that were effective for cancer?

It was just tea leaves. It sounded like a fantasy, but he knew that academician li wouldn't joke about this.

But was boss Qin that powerful?

As the person in charge of the Chinese Academy of Sciences, he naturally knew what this news meant.

Minister Lu hung up the phone, got up, and walked out of the office in a hurry. "What tourism major? You've wasted so much time."

At the same time, he didn't forget to call his Secretary and ask her to book the plane tickets for him.

After learning about this situation, he had to go to Linlin Manor to see the plot.

Before leaving the Chinese Academy of Sciences, Minister Lu went to the medical research Division of the Chinese Academy of Sciences and brought out an old man.

The old man was Yuan Shan, an academician in medical research.

Yuan Shan's face was full of doubt when he was called out. "Minister Lu, why did you drag me out in such a hurry? where are you going? Professor Yan still has to report to me about this week's research on liver cancer."

Minister Lu explained, " don't worry about the research. There's no big movement anyway. There must be no progress. Come with me to Linlin Manor. Boss Qin has cultivated tea leaves that are effective for cancer.

"Tea leaves?" Yuan Shan was stunned and asked in surprise. It's effective for cancer? Is that true?"

"It shouldn't be fake." Minister Lu said.

"Wait!" Yuan Shan suddenly noticed something and said, " "You said that the tea leaves were cultivated by boss Qin, the one who cultivated the Linlin tribute rice?"

"En!" Minister Lu nodded.

"Heavens!" Yuan Shan lost his cool, 'did he really graduate with a major in tourism? You didn't study any related professional research before this?"

"According to the information we have, that is the case." Minister Lu nodded his head.

Yuan Shan heaved a deep sigh, his face filled with emotion, " "This is unbelievable. There's actually such a genius in this world? is he trying to embarrass us people from the chinese academy of sciences to death?"

Minister Lu agreed with him.

He didn't know how to describe boss Qin's genius.

Some people might have a unique talent in scientific research.

Just like Einstein.

The other party was a patient with reading and writing problems. At the beginning, he had gotten zero marks in school and even in his exams.

What was a reading and writing Disorder? In his eyes, the words and words were dancing, even jumping non-stop, making it impossible for him to read the words, remember them, and write them down.

This kind of person could basically say goodbye to studying and knowledge.

Who would have thought that a patient with reading and writing problems would eventually become one of the greatest scientists?

Einstein's talent was almost buried.

Now that he heard the news, he felt that boss Qin might be a genius who had almost been buried.

Who would've thought that a tourism major could develop Linlin rice and now tea leaves that were effective against cancer?

Although it had not been confirmed, the news could not be fake since it had reached him.

If this was true, who could say that boss Qin's legendary story couldn't be compared to Einstein's story?

[Chapter 1034 I'm Going To Be F * Cking Exposed! 1](#)

Linlin Manor was more lively than usual today.

Many researchers from Linlin laboratory and the planting Department of Linlin villa had come.

The mutation of three tea trees and the effect of tea leaves on cancer were not only important to the researchers in Linlin laboratory, but also to Yu Shui and the other employees in the plantation Department.

Therefore, the planting Department employees who came to Linlin Manor today were all old employees. Yu Shui had carefully selected them. They were honest and tight-lipped.

Even Ma Hong and the others were more serious than usual.

The researchers had already begun to mark the three tea trees according to the test data.

The three tea trees were mature, and if they wanted to cultivate them, they could only rely on methods such as grafting, transplanting, and fixed planting.

No matter which method he used, he had to cut the branches from these three tea trees.

Now, everyone knew how precious these three tea trees were, so they naturally couldn't cut them randomly, for fear of affecting the three trees.

Therefore, the position and branches had to be carefully calculated by the researchers.

The training speed would be much slower.

According to Qin Lin's plan, he could just cut and plant them. Even if these three trees died, the mountain goods area would refresh and he could still transplant them.

Such a brutal cultivation speed would definitely be faster than now.

However, when he used the special soil, he did not know if it would still produce attributes that could be harvested over three seasons.

However, he couldn't tell anyone about this.

Under normal circumstances, it was right for these researchers to be cautious.

In their eyes, the three tea trees were the only ones, and they could not afford to make any mistakes.

After the researchers marked the locations on the three tea trees, one of them reported to Qin Lin, "Chairman Qin, the preparations are done. We can start cutting the transplant.

"Yes." Qin Lin nodded and ordered Yu Shui and the others to get to work.

For things like transplanting, the people from the plantation Department were better at it.

There was a flower pot prepared by the side, and the flower pot was filled with a special mixed soil.

it was a mix of ordinary soil and special soil.

In the eyes of the researchers and Yu Shui, the mixed soil was a special nutrient soil developed by Chairman Qin and professor Li Kai.

This special nutrient soil was beneficial for the research and planting of crops.

Only Chairman Qin and professor Li Kai knew about this arrangement. No one else dared to ask about this secret, as that would be insensible behavior.

Some of the flower pots had already been planted with tree trunks. Those were the branches cut off from other tea trees for grafting cultivation. When the time came, the strips of paper from the three tea trees could be cut off and grafted on.

Now, Yu Shui had to cut the branches from the three tea trees, graft, transplant, or plant them in the flower pots.

When these transplanted ones had grown tea leaves, he could then conduct an inspection to see which attributes were the best to retain.

After that, these flower pots would be taken to Linlin's laboratory, where they would be taken care of and tested daily until new tea leaves grew out of the transplanted tea trees.

This was not something that could be done in a short period of time. It would take at least one to two years, or two to three years if it was slow.

However, as long as these transplanted tea trees could retain the ingredients effective for cancer, it was definitely worth the time.

During this period of time, as long as the branches of the three tea trees in the manor grew out again, they would be transplanted with the same method again to increase the number of transplanted bodies.

While Qin Lin and Li Kai were watching Yu Shui and the researchers transplant the plants, they received a call from Minister Lu.

Minister Lu had come again without a word.

Qin Lin and Li Kai went to pick up director Lu. When they saw academican li, they immediately understood that director Lu knew about the tea tree.

However, there was nothing strange about it.

Academician Li would definitely report this to his superiors.

"Boss Qin!" Academician Li immediately greeted Qin Lin and explained, "I've reported the matter of the tea tree to Minister Lu. This time, Minister Lu brought a medical academician over. He might use your tea leaves to conduct a patient experiment to see the clinical effects."

Qin Lin nodded.

In fact, he also wanted to find a few cancer patients to try this tea.

However, this kind of experiment required all kinds of procedures and applications, which were very troublesome. Naturally, it was just tea leaves. He could also invite them to drink tea and skip this step.

However, it was still a question whether the cancer patient would agree to it.

The only thing he was afraid of was that the contract wouldn't be signed, and if he cured the patient, the other party would report him saying that he had conducted experiments on him in private and demand compensation. That would be a pain in the ass.

Don't think that this kind of thing won't happen.

on the internet, parents begged teachers for help to tutor their children. after the teachers helped their children get into a good school, the parents would turn around and report to the teachers.

There were definitely a lot of such people.

Therefore, this kind of thing was troublesome and disgusting. It was best to avoid it if possible.

Minister Lu had already gotten out of the car and was waiting.

As soon as he saw her, he went up to her warmly and said, "Boss Qin, you really surprise me every time. I wouldn't be surprised if I heard that you cultivated grass that can grow in the desert one day."

Now that the world was in serious desertification, desert management was also the most difficult thing to do.

If cancer was a terminal illness for humans, then the desert was a terminal illness on earth.

Now that boss Qin had cured people's terminal illnesses, no one would find it strange if he cured the terminal illnesses on Earth One day.

"Minister Lu, you're too kind. It's all luck." Qin Lin could only helplessly reply.

To be honest, he really didn't have much confidence in this kind of praise.

[Chapter 1035 We're Going To Be F * Cking Exposed 2](#)

The more people praised him, the more he felt that he was a deceitful person. His knowledge could not support this kind of confidence at all.

But what could he do? "I wanted brother Li to be the scapegoat."

However, old brother Li had become smarter now, and his series of moves left him with no power to fight back.

Now, it was basically confirmed that he was the one who had cultivated the three tea trees.

This tea tree came from the game, and there was no way to explain its origin. The pot had to be taken, but this time, he took the blame.

"Boss Qin, you're still so humble." Minister Lu smiled and introduced the old man beside him to Qin Lin, "Boss Qin, professor Li Kai, this is academician Yuan Shan, an expert in medical research."

"Academician Yuan!" Qin Lin also immediately shook hands with the other party and greeted him.

When Yuan shanzhen saw Qin Lin's young appearance, he couldn't help but sigh. "you're really young and promising, boss qin. this time, you're going to make our medical research division feel ashamed."

Even though he knew about the other party's situation before he came, it was still a huge shock to see him in person.

He was too young.

however, it was this young man who solved the problem that they had been researching for more than 20 years without much progress.

It didn't matter if the other party was lucky or not, they were really hit hard by this young man in this aspect.

"Boss Qin, take us to see the three tea trees." Minister Lu couldn't help but be curious.

This was also the purpose of his visit this time.

"Minister Lu, academician Yuan, this way please!" Qin Lin smiled as he welcomed the two of them into the manor and to the three tea trees.

As soon as Minister Lu and Yuan Shan saw the three tea trees, they ran forward.

The two of them surrounded the three tea trees and examined them, their eyes filled with an inexplicable emotion.

These three tea trees didn't seem to be any different, just like ordinary tea trees, but who would have thought that the tea leaves growing from these three tea trees would have such a magical effect?

After watching for a long time, Qin Lin also invited him, "Minister Lu, academician Yuan, let's go sit at the pavilion and try the tea made from these tea leaves."

Minister Lu and Yuan Shan followed Qin Lin to the pavilion, along with Li Kai and academician Li.

boss Qin, your Pavilion is not bad. It makes me feel at peace just by walking in. Minister Lu entered the gazebo and sat down. He noticed the abnormality of the gazebo.

there's also a fragrance, "Yuan Shan added. it's very nice. This isn't made from ordinary wood, right?"

Academician li helped to explain, " academician Yuan, you're right. This Pavilion is made of yellow Rosewood. I heard from boss Qin that 500 grams of this wood is worth tens of thousands.

"Tens of thousands of Yuan per 500 grams?" When Yuan Shan heard this, even though he had seen many things, he was still greatly shocked when he saw the size of the pavilion and the corridor.

"No matter how valuable this wood is, it's still for use. Let's make tea!" Qin Lin also asked someone to bring a pot of water and a tea set. He took out the newly stir-fried tie Guanyin and started working.

After a pot of tea was ready, he poured a cup for Minister Lu, Yuan Shan, academician li, and the others. this is the tea that is effective for cancer. Everyone, have a taste.

Minister Lu and Yuan Shan had been curious for a long time, so they picked up the tea and took a sip.

Even if the tea fragrance and taste attributes only had +1 left, the two could still feel it intuitively after tasting it.

"this tea is not bad." "Even if it doesn't have any effect on cancer, it's still a very good tea," Minister Lu said in surprise.

Academician li nodded and said, " yes, it has the effect of treating cancer. It's also very delicious. When boss Qin promotes the cultivation of this tea tree, tea will be popular all over the country. Tea culture will be popular again.

yuan shan drank a cup of tea and said with anticipation, " "Boss Qin, can you let me see the test data of these tea leaves?"

"Old brother li!" Qin Lin looked at Li Kai. The test results were no secret.

However, the information was with old brother li. He didn't have it.

"En!" Li Kai nodded and found a computer. Logging into his private account, he pulled out the data of the tea test and handed it to Yuan Shan, " "Academician Yuan, please!"

Yuan Shan was a professional. With one look at the test data and comparison ingredients, he knew the effect of this tea on cancer.

After reading it, he looked at Qin Lin very seriously. "Boss Qin, we must cultivate this tea tree and then promote it."

when the time comes, not only will it benefit the country and the people, but the medical community around the world will also have to give in to us because of this tea tree.

The reason why the Lu Department had brought Yuan Shan here was because he was an expert in this field.

Now that he heard his serious words, he knew that the effect of the tea leaves on cancer must have exceeded Yuan Shan's expectations.

This was good.

Moreover, after this thing was cultivated and promoted, it wasn't just the medical community that had to look up to them.

We have tea leaves that can treat cancer. Cancer will no longer be a problem for us. What will happen to people from other countries?

How many of them had cancer, and how many of them were afraid of cancer?

Especially those countries that had previously smeared their tea leaves, they would be dumbfounded.

To a certain extent, these tea leaves could be used as a strategic resource.

that's for the best, Minister Lu, " Qin Lin said immediately. our ultimate goal is to treat cancer.

Minister Lu nodded. okay, I'll arrange it for you. The location will be you City Hospital. I'll contact you city and specially isolate an area for clinical trials.

[Chapter 1036 We're Going To Be F * Cking Exposed 3](#)

As he spoke, he took out his phone and made some calls to make arrangements. He didn't want to waste any time.

Not long after Minister Lu made the call, you city also received a call.

It was a call from the relevant Department in Beijing.

Sun Xian was a little confused when he received the call. Why would someone from Beijing call his office directly?

However, he was also very clear that he didn't dare to neglect the call from Beijing.

however, after hanging up the phone, he called chen li over with some confusion and instructed, " the people from Jing called and asked us to isolate a separate area in kuake City Hospital and keep it a secret. You should contact you City Hospital about this.

"County sun, why would the capital have such a request for no reason?" Chen Li asked with some doubt.

Sun Xian shook his head. I'm also very puzzled. But the people from Beijing directly called my office and even requested to keep it a secret. This matter is definitely not simple.

Chen Li thought of something and said,"could it be that boss Qin has come up with something again?"

"That's possible!" Sun Xian's eyes lit up.

This seemed to be the only explanation.

He also immediately looked at Chen Li.

Chen Li took the hint and dialed Qin Lin's number.

If it was related to boss Qin, he would definitely know what was going on.

When the call connected, Chen Li asked anxiously, " "mr. qin, does it have anything to do with you? beijing has requested for a separate area in the county hospital? I'll cooperate with you guys."

In the pavilion of the manor.

Qin Lin was still making tea with Minister Lu and the others.

he didn't expect minister lu to make such a strong call. you cheng actually got the order so quickly.

Regarding this matter, Qin Lin did not hide it from Chen Li. "County Chen, it's related. We've developed a kind of tea that's effective for cancer,"

In sun Xian's office.

When Chen Li heard this news, he immediately exclaimed, "It's effective for cancer?"

After hanging up the phone, his face was still filled with shock.

When sun Xian heard Chen Li's cry of surprise, he hurriedly asked, "What's going on? What cancer?"

sun Xian, " Chen Li immediately explained, " you might not believe me, but boss Qin has developed a type of tea that can cure cancer!

"What?" When sun Xian heard this, his reaction was even greater than Chen Li's. He immediately stood up.

What kind of shocking news was this?

everyone knew how scary cancer was, but now boss qin could cure cancer with tea leaves?

Besides, who said he didn't believe it?

Not only did he believe it, but he also rushed to the county hospital with Chen Li after hearing the news.

He still had to personally arrange this matter.

Linlin Manor.

Yu Shui and the others had already finished the transplantation. New branches were planted in all the flower pots and then sent to Linlin's laboratory.

after that, the researchers and the people from the plantation department also left.

In the pavilion.

Qin Lin made another pot of tea.

Today, Minister Lu, academician li, and the others seemed to love drinking tea. They enjoyed the tea that could treat cancer.

After another cup of tea, Minister Lu suddenly said to Qin Lin, " boss Qin, you've cultivated tea leaves that are effective for cancer this time. You should publish a related paper and an experimental report.

"This is an important milestone in the fight against diseases in human history. It's a good opportunity for the people at the Chinese Academy of Sciences to learn about it."

"What Lin Lin?" Qin Lin was dumbfounded when he heard this.

He didn't even know how to write a thesis or an experimental report.

He had relied on his cheat to learn from that book on genetic experiments. He could use the cheat's characteristics to carry out the experiments in the book, but he didn't know anything else.

Now, he was asked to write a paper and an experimental report. Wasn't that a joke?

Otherwise, what excuse could he have found to reject it?

However, if he could reject this once, what would he do next time? It would be suspicious if he kept doing this.

This was also the reason why he wanted old brother li to take the blame. He couldn't do it himself.

li kai looked at qin lin in shock.

This 'seems to have gone too far'.

[Chapter 1037 Another Mysterious Stone Book! This Time It's A BUG! 1](#)

Qin Lin had a headache about the thesis and academic report.

Even though this kind of thesis and academic report wouldn't include core technology experiments, they would at least have some arguments, theses, and conclusions.

This required real talent.

his true talent was only half-baked.

So, after making tea with Minister Lu and the others, he pulled Li Kai back to his office. "Old brother Li, can you help me write that thesis and academic report? you should know very well that it's all thanks to the special soil."

Li Kai sighed. Brother Qin, give me some time. I can write the thesis and academic report, but there's a possibility that people will find out that I wrote it.

" so, you might as well find an excuse, like you were forced to fall sick tomorrow and need to recuperate for a while, yingluo. "

"ran ran." qin lin's head was full of black lines.

This excuse was too f * cking ridiculous.

However, if there was really no other way, it seemed like this was the only way.

However, there was a saying that the heavens never left a way out.

At night.

qin lin controlled his character to go to ore town to see if he could trigger the plot quest. when he entered the library, he saw the librarian mary walking out from the front desk and appearing in the center of the library.

This was another guessing game.

When Qin Lin saw this scene, he immediately thought of the mysterious stone Book.

He immediately controlled his game character to step forward and click on Mary.

[we meet again. We have a guessing game event today. Do you want to join? There will be a special gift if you win!]

Qin Lin naturally clicked to participate. It would be strange if he didn't.

Then, Mary's conversation reappeared.

[really? [then you have to answer properly and try to get the gift. Now, let's start the riddles!]

[Question 1:1+1=?]

【a:1、 b:2、 c:3、 d:4!】

ran ran. when Qin Lin saw the question, he cursed in his heart. He didn't know if he should say it.

Wasn't this the first question from the last time?

If he agreed, it would be a 2. Who would choose anything else?

The lousy game producers were really insulting the players.

[congratulations, you got the first question right. you're so smart. let's move on to the second question!]

[what's 8 divided by 4?]

【a:0.5、 b:2、 c、 1.5、 d:4】

"ran ran." qin lin really didn't have the energy to complain.

It really was the same question as last time.

The lousy game producers were really too lazy.

Couldn't they have set up a few more interesting questions?

Unfortunately, the following questions made Qin Lin realize that he shouldn't expect too much from the game planning. The following questions were exactly the same as the last time.

Didn't this guessing game mean that after participating once, the rest would be free?

But he liked it.

In a game, one had to be so simple and straightforward.

There was no reason not to accept the free gift from the system.

He suddenly felt that this lousy game producer was quite good.

Those lousy game producers who designed difficult problems to deliberately make things difficult for the players were not good game producers.

After he answered 10 questions in a row, Mary's conversation reappeared.

[congratulations, you answered all the questions correctly. You're so smart. This gift bag is for you!]

As they spoke, Mary had already left and went to the front desk of the library.

The game character's backpack was the same as last time, with an additional riddle gift bag with a question mark.

Qin Lin immediately opened the gift bag.

As the grand prize disappeared, a book-like stone tablet appeared in his backpack. It was the mysterious stone Book from last time.

It had to be said that the system was too understanding.

He had just been troubled about how to study papers and academic reports, and now there was warmth.

the mysterious stone book's attribute was that it could copy any book's content and create a skill book, which could be learned in an instant.

Just like the last time, as long as he gave a book to the mysterious stone Book to copy and produce a skill book to learn, he would be able to fully grasp the knowledge in the book and even integrate it.

Qin Lin immediately looked at the computer and searched for information online.

He naturally wanted to know what kind of books he had to read to write a paper and academic report on the cultivation of tea trees.

However, after checking the information, he was a little dumbfounded.

according to the condition of his three tea trees, he could not write a paper and an academic report with just reading a book.

You have to learn at least 2 books on crop genetics and read 2 books on crop transplantation. You also have to read some books on crop transplantation and some other things.

All in all, it involved at least 12 books on research, and he had to master them all.

however, he only had one of the mysterious stone book.

What was this good?

Qin Lin subconsciously controlled his character to go to the library. Mary was still at the front desk.

Therefore, it was impossible for another guessing game to appear so soon.

It was even more impossible for more than 10 guessing games to happen in a row.

Just as he was feeling vexed, Qin Lin thought of something.

When he was in junior high school, he had a classmate who liked to read novels. At that time, he basically went to the bookstore to borrow physical books to read.

In the beginning, that student had divided a novel into several parts, one, two, three, or four, so he had to borrow a novel several times to read.

Later on, he found it too troublesome, so he specifically borrowed those big books, which were top, middle, and bottom books, or 1,2,3, and 4 books combined into one book.

What if he put all these books together and printed them into a new book?

[Chapter 1038 Another Mysterious Stone Book! This Time It's A BUG! 2](#)

Could that be considered a book?

After all, the mysterious stone Book didn't specify what a book should be like.

As long as it's a book, who cares how thick it is?

Qin Lin went online again and searched for the multimedia number that had a book printing business. Then, he added her on WeChat to contact her.

These were all private printing. Even if they had a business license, they didn't have a customer base, so they could only take orders from some scattered customers.

After adding each other on WeChat, the other party sent a message: "Hello, may I know what kind of books you need to print? How many sets do you need to print?"

Qin Lin didn't want to waste any more time and directly sent the 12 books he felt he needed to the other party. At the same time, he added two books, " how to write a good thesis " and " how to study well ".

He immediately requested for the other party to print the contents of these books into a new book.

In a small printing workshop.

Zhuang Chenglong looked at the WeChat request he had received on his phone in shock.

To be honest, he had received a lot of commissions through various media accounts when he founded this small printing workshop. Some commissioned him to help print the content of novels, and some commissioned him to help print the content of comics.

These people were either loyal readers or the authors who couldn't publish it had asked him to print it for them to remember or to give it to their fans.

With a few million authors and a few hundred thousand mangakas, the market was still very big.

However, this was the first time he had seen someone asking him to print something like crop genetic research, crop Transplantation Research, and some papers or academic content.

The titles of these books gave off the feeling that they were very high-end, and they were things that people like them could only look up to but not touch.

However, these books were already published and could be bought at those large bookstores. Why did she still ask him to print these books?

wasn't this just looking for trouble?

Moreover, he had looked up these books on the internet. Did the other party know how thick these books were when printed together?

"Sir, are you sure you want to print these books into one?" Zhuang Chenglong asked with uncertainty.

Qin Lin saw the message and naturally replied, "That's right!"

"Then how many copies do you want to print?" Zhuang Chenglong asked.

Even if he didn't understand, if there was a profit, even if it was only a few hundred, he would still accept the order.

"One book is enough." Qin Lin said directly.

One copy was enough for the mysterious stone Book, why print so many? He didn't sell books.

"Sir, I'm sorry, I can't accept this business!" Zhuang Chenglong replied politely, but he wanted to curse in his heart. Wasn't this just making him happy?

He wouldn't be able to earn back the money he earned just by printing a copy.

Qin Lin naturally knew the reason when he saw the other party's words. He smiled and directly transferred 5000 Yuan to her. At the same time, he replied, "This was the deposit, and another 5000 after the book was in his hands.

On the other side.

Zhuang Chenglong was about to put down his subordinate when he saw the transfer of 5000 Yuan.

He put down his hand and picked up his phone again.

this couldn't be a joke, right?

When he saw that Qin Lin still had 5000 Yuan left, Zhuang Chenglong immediately sent a smiley face. "Sir, it's my pleasure to serve you. You want to print all these books into one book, right? Do you want to use a new title after printing it out?"

He loved this kind of nouveau riche who threw money at him the most.

Qin Lin was distressed.

What kind of title should he use for the new book?

Just pick one of those books?

He thought for a moment and replied, "Let's call it 'this is a book'!"

"??? "zhuang chenglong was stunned when he saw the title of the book.

What the hell is this title?

However, he would naturally satisfy the requests of the rich customers.

So, he replied, " okay, the title will be 'this is a book'. Also, I'd like to remind you that this book has a publication number, so you can only use it after it's printed. It can't be used for commercial purposes.

Qin Lin finally gave the delivery address to the other party.

Zhuang Chenglong was dumbfounded when he saw the address of 'you city, min province's Ming city, Linlin Manor'.

In China, as long as one didn't just have internet access, one would know where Linlin Manor was, right?

Did he meet a lunatic?

She wanted him to print these books and then send them to Linlin Manor?

What kind of place was that? only the big bosses or the boss of Linlin company could live there.

But why would such a person ask him to print books and have such a weird request?

Did the other party think that he was the boss of Linlin company? he actually left this address?

He really wanted to confirm with the other party, and even wanted to ask if the other party had drunk too much. otherwise, a few peanuts wouldn't be floating like this.

However, looking at the 5000 Yuan transfer, he finally chose to accept it.

Who cared if the other party was crazy or not.

Since he was willing to spend money, he would just treat it as compensating the other party.

Then, Zhuang Chenglong started to download the books and started to type them on the computer.

The font size and content of the books that the other party had reported were all different, so he had to redo them all.

This was also the reason why he didn't want to do it when the other party said that he would only print one copy.

He couldn't even earn a salary from the profit of a book.

However, since the other party was willing to spend 10000 Yuan to print a book for fun, why not?

...

After Qin Lin put down his hands, he continued to look at the screen in his mind and controlled the game characters to go to the development sites.

Previously, when he leveled up, he could level up a piece of special attribute land. However, to level up this special attribute land, he needed special attribute materials.

[Chapter 1039 Another Mysterious Stone Book! This Time It's A BUG! 3](#)

It was just that he had always been lacking this special attribute material, so he had not been able to upgrade the land until now.

Qin Lin studied it again and tried out all kinds of things he had obtained during this time, but he kept getting the same hint:

[able to upgrade a piece of land with special attributes. Currently lacking special attribute materials, unable to upgrade!]

Qin Lin studied it for a long time, but he still couldn't find anything. He could only control his game character to go to the lake mine and continue mining.

He had already dug up the 32nd floor of the lake mine.

After entering the 32nd floor, he continued to dig.

It seemed that his luck today wasn't good. He dug three layers in a row without any gains, so he gave up. Otherwise, he wouldn't have found anything even if he dug all the remaining layers.

the next day.

Qin Lin got up, had breakfast, and saw Minister Lu, academician Yuan, and academician Li as soon as he left the inner area.

The three of them surrounded the three tea trees and looked at them very carefully, as if they could see something.

Seeing Qin Lin come out, Minister Lu also smiled and said, "Boss Qin, we've found the cancer patients who used your tea leaves for the experiment overnight. They're all from your City County. There are five of them in total, and their family conditions are quite bad.

Obviously, Minister Lu told Qin Lin this on purpose. Otherwise, there would be more people conducting clinical trials if this matter was slightly hyped up.

This also showed that he valued Qin Lin more and more.

Boss Qin was a genius. He had studied tourism for four years, but he also put his mind on Linlin villa and the Linlin company.

However, such a person could do his own experiments and even cultivate crops by simply reading some books on Crop research and learning from professor Li Kai.

The key point was that the other party had also cultivated the Xiangshui tribute rice and then the tea tree that was effective for cancer.

Even if luck played a part in this, his luck was so good that it could make most of the researchers feel ashamed.

After all, most researchers would never be able to produce such results in their entire lives.

It was no wonder that the other party was a chef. His cooking skills were so terrifying that even the top Chef in the West was no match for him. Even the difficult Traditional Chinese Medicine was better than those old Chinese medicine doctors from Traditional Chinese Medicine aristocratic families.

It was really a case of learning one's profession and improving one's profession. At the same time, he could also attack people in this profession.

As the saying on the internet went, this was probably the kind of thing that could use one's interests and hobbies to smash other people's rice bowls.

To put it bluntly, he was a demon.

If the other party put more effort into Crop Research, he did not dare to imagine what the future would be like.

Qin Lin heard Minister Lu's words and smiled. Minister Lu, I'll take out the batch of tea leaves that were fried before to experiment. The new tea leaves should have grown before these tea leaves are used up.

"En!" yes! Minister Lu nodded and said, " boss Qin, I told the academicians last night that you're going to write a paper and an academic report. The academicians are all looking forward to it!

ran ran. Qin Lin didn't want to say a word. He just wanted to make sure that the printed book didn't disappoint him.

Moreover, the speed at which the book was printed was very fast. In the afternoon, Qin Lin received a call from the courier. He asked a security guard to send in the book he wanted.

The book contained the contents of 14 books. It was extremely thick and heavy. On the cover of the book was the big title " this is a book!

Qin Lin immediately locked the office door and entered the game with a thought. He then took out the mysterious stone Book.

[do you want to use The Stone Book on the book before you?]

Qin Lin couldn't help but laugh when he saw the notification.

This was another super BUG!

[Chapter 1040 The Bandit Of Knowledge! Learning A Book In One Go! 1](#)

Qin Lin did not hesitate and chose to use the mysterious stone Book.

In the next moment, the mysterious stone slab began to light up before disappearing and floating up. Then, bit by bit, it drilled into the " this is a book " that he had brought in.

In just a short while, the mysterious stone Book completely disappeared.

Then, just like the last time, a shadow appeared next to 'this is a book'. An identical 'this is a book' appeared.

Qin Lin quickly picked up the book and looked at the remarks:

[this is a book: mysterious]

[this is a book transformed from a mysterious stone Book. It contains the contents of 14 books. After using it, you can learn all the knowledge recorded in the book! Do you wish to use it?]

Qin Lin chose to use it without hesitation.

He had done all this just for this moment.

he didn't need to be stupid.

The book transformed from the mysterious stone slab suddenly turned into a light screen and poured into Qin Lin's mind.

Then, a series of information was deeply imprinted into his memory.

The information was all from the book. However, this time, the contents of so many books were put together. It was very complicated and the information was beyond imagination.

However, when the content entered his mind, it was also completely imprinted in his mind, making it difficult for him to forget.

Moreover, the experiment information involved in the various crop genes seemed to be something he had done countless times. The muscle memory also contained the memory of the operation.

This was not the first time he had experienced such a miracle.

But it was still a wonderful feeling.

This was because the increase in his knowledge seemed to have broadened his horizons. His view of the world was different.

At the very least, when he looked at the crops grown on the ranches, the relevant knowledge of crop cultivation and genetic experiments would appear in his mind as soon as he thought about it.

This gave him a clearer view of the world.

It could be said that none of the current crop Research experts or professors had a better understanding of the contents of these 14 books than him.

Qin Lin picked up the book "this is a book" that he had brought in and flipped through a random page. He clearly remembered all the information in it, even the content and knowledge points described in it were integrated and mastered.

The cheat, the mysterious stone Book, was still awesome.

Qin Lin exited the game with a thought. He walked out of the office and went to the three tea trees. He broke a branch from one of the tea trees.

There were old leaves of the tea tree on the branch, as well as new and young leaves that could be used.

He took the branch directly to Linlin's laboratory. After being checked by the security guards, he also entered the laboratory.

When he arrived at one of the laboratories, he saw several researchers doing a series of genetic change tests.

The cultivated tea trees were in Linlin's laboratory.

Their responsibility was to observe every day, detect the state of the cultivated tea trees, and record the data.

Li Kai, on the other hand, was vexed in front of a computer. After typing a few words on the keyboard, he grabbed his head in distress.

naturally, he was writing a thesis on the cultivation of the tea tree. he was helping brother qin.

He did not have much knowledge about tea tree cultivation. After all, as a crop expert, he was also good at Crop Research.

However, he also knew Brother Qin's situation. If he were to let Brother Qin write this paper, wouldn't that be the same as putting the special soil in front of Minister Lu and the others?

He had suggested that Qin Chu be forced to fall sick and then recuperate. He couldn't possibly ask him to write a paper, could he?

However, this was a matter that could only be done once. Once tea leaves that were effective for cancer were introduced, if one did not have a thesis or a presentable academic report, it would always cause doubts and questions.

If he met someone who was jealous and hated him, he might jump out and say that there was something fishy about it. Otherwise, why didn't he write when everyone was in a hurry to publish their papers and academic reports to prove themselves after researching something?

Don't doubt it. There were many people like this on the internet. It was as if everyone had to show off what they had. If they didn't show it, it meant that they didn't have it and it was fake.

In fact, this was essentially a problem with the mentality of such people. Envy, jealousy, and hatred were also chaotic thoughts.

Therefore, it was necessary to write a thesis and an academic report to deal with the public.

He could only help old Brother Qin make up stories.

However, he was really not good at cultivating tea trees. The key was how the tea trees mutated. He had not participated in the process and had no idea at all.

Therefore, it was really painful for him to come up with an in-depth paper just by relying on his knowledge of tea tree genes and the test data of those researchers.

Li Kai frowned and mumbled to himself, 'the linear genes of this tea tree are different from the genetic mutation of ordinary roots. We have to do an experiment to know.'

"It's not similar!" so, there's no need to waste time, " a voice said. these two types of crops have opposite genetic mutations.

"I see." Li Kai nodded. thank you, " he said subconsciously. this will save me some time to waste on you, Brother Qin.

As he spoke, he turned around and looked at Qin Lin in shock as if he had seen a ghost.

the one who spoke just now was really old brother qin.

To hell with it, he almost believed what she said.

However, as he thought about it, he felt that something was amiss. Why was Brother Qin so familiar with these genetic terms? Could it be that the other party had already read these points?
