

The Game 1051

[Chapter 1051 474-Unparalleled Scholar Of The State!](#)

The four meteorites weren't heavy. Each of them had a weight of about 200 grams.

However, Qin Lin was really shocked by the effect of this special meteorite.

The special scientific effect +2 also puzzled him.

Science was a very broad term, and its uses were too broad.

sometimes, an item had many scientific uses.

He didn't know much about the profound insect stone, so he didn't know what this science was used for. He would have to check it out later.

Then, he looked at the special effect of the meteorite.

Counting carefully, there were more than 20 health effects.

Which foot spa would have a pile of meteorites? their business would definitely be booming.

However, who would rub a stone against their feet?

Qin Lin thought to himself. He took a meteorite out of the game and returned to the office.

He looked at the meteorite in his hand and hesitated for a while. Then, he walked to the sofa in the office and sat down. He took off his shoes, raised his foot, and started to rub the meteorite against it.

"Shua, shua, shua." Qin Lin only rubbed it a few times before he took a comfortable breath.

No wonder it had the +2 comfort attribute.

It was really comfortable.

Moreover, as the meteorites rubbed against the soles of his feet, he felt a warm and comfortable feeling all over his body.

This meant that the health attribute of the meteor stone had taken effect. After all, it was A +2 attribute.

"This thing is good!" Qin Lin was surprised by the comfortable feeling.

At the very least, it was a very enjoyable pastime.

While Qin Lin was rubbing against each other, Li Kai and Minister Lu's conversation could be heard.

The two of them walked into the office with academician Yuan Shan following behind them.

Because of the clinical trials of the mutated tea leaves on cancer, Yuan Shan would stay at Linlin Manor permanently to be in charge of the clinical trials. Minister Lu would also come over often.

A clinical trial that could solve cancer was no less significant to the Chinese Academy of Sciences than a rocket or strategic weapon research project.

If they could completely cure cancer, it would be equivalent to mastering another type of strategic weapon.

When the three of them came in, they saw Qin Lin rubbing the bottom of his feet with a stone.

The scene was rather unsightly.

Minister Lu quickly shifted the focus and said with a smile, "Boss Qin, let me tell you something. These days, the number of cancer patients has dropped again."

Yuan Shan also smiled. "Boss Qin is really amazing to be able to cultivate this tea tree. After the thesis and academic report were sent to the institute, the academicians were amazed and observed!"

Minister Lu, academician Yuan, you're welcome. Sit down and let's make tea! Qin Lin said and invited the three of them to sit at the tea table.

Just as he was about to make tea, he remembered that he had been rubbing his feet with a meteorite for a long time. He hurriedly went to the side to wash his hands and then began to make tea.

After the pot of tea was finished, Qin Lin poured a cup for the three of them.

Minister Lu hesitated for a moment before asking, "Boss Qin, do you have any plans for the next step of cultivating the tea trees?"

In fact, this was also what the leader wanted to know and the task assigned to him.

It was precisely because if this tea was successfully cultivated and promoted, it would become an alternative strategic weapon that the higher-ups were very concerned about it.

It was the attention of the higher-ups.

Qin Lin glanced at Minister Lu, poured him another cup of tea, and said with a smile, "Minister Lu, is the Chinese Academy of Sciences interested in participating in this tea tree cultivation experiment? We'll work together to promote the cultivation, and we'll share the technology with the country."

Both Minister Lu and Yuan Shan were stunned.

They understood the meaning of his words. It was equivalent to half-donating their technology.

Minister Lu opened his mouth, but he didn't know what to say.

With boss Qin's words, the task assigned by the leader was no longer important.

The leader didn't expect boss Qin to suddenly make such a decision, did he?

Perhaps no one would have thought.

After all, everyone knew how much benefits this tea would represent in the future. After cultivation and promotion, it would not only be drunk by cancer patients.

After knowing that it could treat cancer, people would drink it on a daily basis to prevent cancer.

In other words, it wasn't an exaggeration to say that the wealth from this tea alone could make those super-rich people go down.

Now, boss Qin had donated the money just like that. His magnanimity and breadth of mind made them admire him.

naturally, the two of them didn't understand qin lin's current state of mind.

Qin Lin naturally knew the huge benefits contained in these tea leaves.

however, he knew that it would be a great crisis if he had it in his hands. this crisis was not comparable to linlin leisure tea, purification grass, or linlin hot spring powder.

Linlin leisure tea, purification grass, and youlin hot spring powder. No matter how effective these things were, they would not be life-threatening in general.

Cancer was a life-threatening disease. Moreover, the tea was effective against all kinds of cancer and could even prevent cancer.

This news would definitely not spread to the West within a certain period of time. The state would also block it.

Anyone with a brain would know what they would face.

Therefore, this technology would be shared with the country, and he would just enjoy a piece of the cake.

The rest would be distributed by the country.

The situation would be different.

Even if the Western scoundrels wanted to do something, they would not just focus on him.

More importantly, if he shared this technology with the country, there would be a lot of hidden benefits.

No matter what, the country had to protect him more strictly and give him more places.

[Chapter 1052 Unparalleled Scholar Of The State! Too Inhumane! 2](#)

Everyone knew how to buy a horse with a thousand gold, not to mention a country.

Of course, these were not the most important. The most important thing was that he did not care.

after all, his current businesses, from the large purification grass, hot spring powder, linlin leisure tea, to the small tomato sauce and dog food, had occupied a large market.

If these companies chose to go public, the scale would be unimaginable.

Even if he didn't choose to go public, with the shares he owned, the money was just a number. So, sometimes, he should be willing to give up when it was necessary.

He was willing to give up some things in exchange for his golden body to shine even brighter.

Moreover, he had the game and the system. He would have plenty of good things in the future.

Minister Lu and Yuan Shan only reacted after a long time.

Minister Lu picked up the tea leaves solemnly and said, " "Boss Qin, let me offer you a cup of tea!"

"Boss Qin, I'll also toast to you!" Yuan Shan also picked up his teacup solemnly.

If this country had an unparalleled National scholar, then boss Qin should be the number one of this generation.

This was undisputable.

"You two are too polite." Qin Lin smiled and returned the toast.

"Boss Qin, I'll go make a call." minister lu couldn't help but say after drinking a cup of tea.

He was in a hurry to report this matter.

After all, this was a huge matter.

So, after saying that, he hurried back to his room.

He was going to call a leader, and to call this leader's number, he needed an encryptor.

A moment later, he called his superior. "Leader, I need to report to you about the cancer tea leaves. I just talked to boss Qin."

This leader also became serious. "Tell me, what's boss Qin's next plan? Did you tell him the significance of this thing?"

Minister Lu said, " leader, there's no need to say that. Boss Qin is really a National scholar. I haven't even said anything, but he said that he wants us to participate in the cultivation and promotion of the tea trees and share the technology with the country.

The other end of the phone was silent for a while.

After that, the leader said, " ah, he's really a role model for the younger generation. The country is lucky to have such a young man. Send more people to Ma Hong!

.....

In the office.

Yuan Shan and Qin Lin were already chatting happily.

The two of them were talking about Qin Lin's thesis and academic report.

It was mainly Yuan Shan asking questions and Qin Lin answering. It was an Academic Exchange between researchers.

Qin Lin didn't change the topic this time. He answered fluently and confidently with the knowledge he had obtained from the mysterious stone Book.

that scene made li kai sigh with emotion once again.

He knew very well what kind of knowledge Brother Qin had before. At the start, he had blindly cultivated watermelons and did not even know the most basic agricultural knowledge.

Now, Qin Chu was able to talk to top experts like academician Yuan.

He was envious of such a monstrous talent.

"Brother li, what's this stone?" when li kai saw that the two of them had stopped talking, he finally noticed the profound insect stone and asked, " "Why did you rub your feet with this stone just now? Are there any special effects?"

"Old brother li, try to rub it against your feet," Qin Lin said with a smile.

When Li Kai heard this, he also took off his shoes and rubbed the meteorite against the soles of his feet.

In fact, he had been curious since he saw Qin Lin doing this.

However, as he rubbed it, a very comfortable expression appeared on his face.

"Wuuu!" Li Kai couldn't help but Mutter.

He really didn't expect that a stone rubbing against the soles of his feet would actually be so comfortable.

No wonder old Brother Qin was rubbing a stone against the bottom of his feet.

this piqued yuan shan's curiosity.

It was just that he was already so old, so he wouldn't ask.

Li Kai rubbed the meteorite against the soles of his feet and felt comfortable. He asked curiously, " "Old Brother Qin, what kind of stone is this? It actually has such an effect?"

"Profound insect stone!" Qin Lin explained.

"What?" what? " Li Kai exclaimed when he heard this.

at that moment, he almost lost his grip on the meteorite. his hand trembled and the meteorite almost fell to the ground. fortunately, he caught it in time.

"Profound insect stone?" Even Yuan Shan, the old academician, stood up in shock.

The two of them were shocked.

Li Kai's hand trembled even more as he held the profound insect stone.

He had never thought that the stone he was rubbing against his feet was actually a profound insect stone.

It was actually this thing.

Old Brother Qin actually used such a thing to rub the soles of his feet.

This Kasaya

qin lin saw their reactions and seemed to understand that this meteorite was not simple.

After all, whether it was old brother li or academician Yuan, they wouldn't be like this if it wasn't for something amazing.

Li Kai had already carefully placed the profound Qi stone on the tea table. "Old Brother Qin, is this thing synthetic or natural?"

"It's natural," Qin Lin immediately said and then explained, "After all, it's an inspection on the mountain."

"Natural?" Yuan Shan trembled when he heard this.

Li Kai was about to explode, "Brother Qin, you're actually rubbing your feet with a natural meteorite? what are you thinking?" A gram of this thing costs 200 million!"

Qin Lin was holding a cup of tea. He almost dropped the cup when he heard the price.

He really didn't expect the profound insect stone to be so valuable.

He had dug up four pieces in the game, each of which was more than 200 grams. One gram was 200 million, which meant that he had dug up more than 160 billion.

how could he have known that the profound insect stone was so valuable?

Li Kai also did not expect the stone that Qin Lin used to rub his feet was a meteorite.

[Chapter 1053 Unparalleled Scholar Of The State! Too Inhumane! 3](#)

More importantly, he didn't think that rubbing his feet with the profound insect stone would be so comfortable.

This should be something that no one knew about.

It must be known that the world record for the meteorites was only five kilograms. All of them had been collected by the major countries around the world and used in top-secret scientific experiments.

Furthermore, it was extremely difficult to fuse them together, and the cost was unimaginable. It didn't even have the effect of a natural meteorite.

Of course, on a certain platform, this meteorite was definitely not just 5 kilograms. Everyone would have 5 kilograms.

When Minister Lu returned to his office, he saw Li Kai and Yuan Shan observing the stone that boss Qin had rubbed his feet on.

What's there to observe about this stone? Could it be that he could leave some air on his feet and make the smell strong?

"academician yuan, what's wrong?" Minister Lu asked in confusion.

"minister lu, the stone that boss qin is rubbing his feet on might be a natural meteorite!" yuan shan said hurriedly.

"What?" what? " Minister Lu exclaimed when he heard this. He hurriedly came forward and joined the two people, carefully observing the profound insect stone.

Natural meteorites.

He was in charge of the Chinese Academy of Sciences, so he naturally knew how important this thing was and what kind of scientific experiments it could be used for. These were all tightly guarded, and there were two uses that were even more sealed off. Ordinary people in the outside world would never know about it.

First of all, meteorites could cause nuclear explosions, so they could be used to make atomic bombs (the amount of meteorites used was very small). If there was enough research on the consumption of meteorites, the next stage of weapon science could even use a very small amount of meteorites to make an atomic bomb the size of a rifle bullet.

It was like the sci-fi guns in sci-fi movies, where one bullet would cause a mushroom cloud.

In addition, the meteorite could treat cancer. It only needed 4 milligrams of it to be implanted into the human body to treat tumors. It had excellent effects in treating cancer such as uterus, stomach, and nasal cavity.

The last option was to use Pi as a neutron source, allowing it to exist in particles stably. This could promote particle research.

Just how important was this research?

For example, most of the weapons at the current stage were useless in the zero-gravity state of space, and even their power was greatly reduced. However, it was a different story if it was a particle weapon.

There was also the research on particle propulsion, which was directly related to the power of spaceships.

If humans wanted to conquer and explore space like in the movies, this was of utmost importance.

All the known meteorites had been divided up by the major countries, and most of them had been used up for the research of strategic weapons.

This was also why in the first few years, the research on strategic weapons was very fast. It could be said to be a leap in development, and various countries had achieved results soon after.

However, it had been almost 80 years since the results were released, and the progress was still very slow. There was no more leap in progress.

if they continued at this stage, even if it was just simple space resource excavation, the time given by the dominant country's aviation administration was 50 years.

If one wanted to travel the universe in a spaceship, it would definitely take more than 50 years.

However, if there was something to stimulate it, then the time could be shortened.

Although the profound insect stone wasn't a decisive item, it was still very useful. If there were enough of it, even if it was a few hundred grams, it would still be very significant.

Now, he was told that the stone that boss Qin used to rub his feet was a meteorite. One could imagine how shocked he was.

If this matter was known by those countries, everyone's jaw would drop.

He was simply too inhumane.

Otherwise, why would he do such a thing?

[Chapter 1054 Don't Forget The Greater Good For The Sake Of Small Profits! Maybe Your Luck Is Good?](#)

"are these really profound insect stones?" Minister Lu could not help but ask.

academician Li, " Yuan Shan said, " he's involved in this research. He knows.

"Yes, yes, find him." Minister Lu quickly took out his phone and called academician Li.

Qin Lin, on the other hand, had secretly sat in front of the computer, logged into his scientific research account, and started to search for information about the meteorite in the external database of the Chinese Academy of Sciences.

After reading it, he opened his mouth.

He really didn't expect this thing to have such a great scientific research use. Compared to this, the foot massage was nothing.

More importantly, his nightmare stone was a special nightmare stone, and it had A +2 attribute for special scientific effects.

Isn't this awesome?

Thinking of this, Qin Lin subconsciously looked at the screen in his mind and controlled his game character to go to the lake mine and continue to dig on the 40th floor.

After digging more than a dozen squares, the system prompt appeared again.

[congratulations, you have discovered a special meteorite!]

Seeing this, Qin Lin's face couldn't help but reveal a happy expression.

The amount of disdain he had for the profound insect stone before was the same amount of anticipation he had for it now.

He immediately controlled his game character to continue digging. Unfortunately, things didn't go as he wished. He kept digging and didn't get any more meteorites even after the 40th floor.

This was a f * cking pain in the ass.

When you find this thing annoying, it will keep appearing. When you think it's okay and want it, it will go against you and won't even show its face.

Just as Qin Lin was feeling frustrated, academician Li Ran in with a small toolbox and said, " "Minister Lu, where's the meteorites?"

He was very surprised when he received the call.

Boss Qin might have a piece of natural meteorite?

Not small?

academician li! Minister Lu quickly pulled academician li over. academician li, here! Quick, take a look!

When academician li saw the meteorite, he immediately opened his small toolbox and carefully picked up the meteorite to examine it.

After a long time, academician Li said in disbelief, "It's indeed a meteorite. Everyone better be careful now. I'll find a container to keep this meteorite."

some meteorites carry unclear elements, and their unstable structure may cause some reactions, resulting in radioactive radiation!

These words made Li Kai and Yuan Shan cautious.

Academician li also carefully took out a container from his toolbox.

Only Qin Lin was not worried.

The remarks on the meteorite stated that it had a stable structure, so it was definitely different from ordinary meteorite stones. Not to mention, it also had the foot massage attribute, so it was meant to be used. The situation that academician li was talking about would not happen.

however, after confirming that it was a meteorite, minister lu rushed out of the office and returned to his room to dial the leader's phone again with the password device.

The leader on the other end seemed a little confused."Minister Lu, what's wrong? But it's rare to see you call twice in a day!"

The leader also knew that Minister Lu wouldn't keep calling him if it wasn't something important. Once he called, it must be something important.

leader, " Minister Lu reported, " boss Qin has a natural meteorite over 200 grams.

"What?" when the leader heard this news, he was shocked. after a long time, he said,"We must bring the meteorite back. Can we let boss Qin pick it up? we'll pay for the pick up."

"Alright, leader." That was also the reason why Minister Lu made this phone call.

since the profound insect stone was so important, boss qin should have donated it to a large extent.

However, boss Qin had just decided to share the technology of the cancer tea leaves.

Now that he had the meteorite, he wanted others to donate it. What did this become?

You can't do this even if you want to fleece.

Even if boss Qin was willing to donate, if they took it for granted, it would probably affect the relationship between both parties.

Therefore, buying it was the best choice.

More than 200 grams was only more than 40 billion.

Moreover, the benefits of the tea technology were far more than this.

He couldn't forget the greater good for small profits.

Soon, Minister Lu returned to his office and asked Qin Lin without any hesitation, "Boss Qin, we would like to buy this profound stone of yours. According to the market price, one gram is worth 200 million."

Minister Lu, this ran ran ... Qin Lin opened his mouth immediately and didn't know how to answer.

200 million per gram, isn't this a piece worth more than 40 billion?

What did 40 billion represent? It meant that he could be on the Forbes rich list, and on that list, he had 40 billion in assets.

this was 40 billion in cash.

For example, even the richest man in the country could not take out 40 billion in cash.

There was a piece of data that stated that the highest personal cash flow record of the top tycoons was more than 40 billion. Moreover, the 40 billion in savings had not been maintained for long.

Therefore, it was ridiculous to think that those internet celebrities in mouyin had tens of billions of cash flow.

Only the big bosses in the top 30 of the rich list could come up with 10 billion cash flow in one go without relying on stocks.

With 40 billion in cash in front of them, even the two big bosses' hearts would race.

In fact, when Qin Lin knew the function of the meteorite, he had wanted to donate it to the country instead of selling it.

First, the lake mine could be dug, so he didn't care too much.

Secondly, he wanted the country to be strong and scientific research to be strong.

He had always known that the country had always been the most powerful force that held up a person's happiness. The reason why there were so many people who had nothing better to do now was because of the country's power.

Therefore, those who complained about the country on the internet should really be thrown back 100 years ago. That way, they might know how to thank today.

[Chapter 1055 Don't Forget The Greater Good For The Sake Of Small Profits! Maybe Your Luck Is Good?](#)

At that time, it wouldn't be a problem of being full. It would be that they wouldn't even have food to eat, and they wouldn't even have any dignity.

But now?

Anyone who had watched Wolf Warrior 2 would know that even if the main character wore a national flag, both sides would stop fighting and no one would dare to shoot at the main character.

This was the influence of a powerful country.

In a certain period of time, when the people were ruled, they had to bow to the invaders when they entered the city. If they didn't bow, they could find an excuse to kill them.

"It's also because our country is strong that we don't have to experience that kind of life without dignity anymore.

Therefore, Qin Lin really didn't mind making more contributions if it was within his ability.

However, Minister Lu seemed to be very interested in buying.

furthermore, he was not given a chance to express his thoughts. in the end, the deal was confirmed, and even the contract and confidentiality agreement were mentioned.

In any case, everything was done as fast as possible.

"Boss Qin, where did you get these meteorites?" academician li suddenly asked.

Yuan Shan also hurriedly said, " that's right. Boss Qin, you said that you found it on the mountain. Which mountain is it? there's a meteorite here. Maybe there are other ones on the mountain.

Minister Lu also looked at Qin Lin. yes, I can apply to send people to look for it. If there are more profound Qi stones, they can be found with advanced equipment.

"Eh?" Qin Lin was stunned. How would he know which mountain it was? he was just making it up.

But now, he had to give a reason. If he didn't check it, he couldn't just make it appear out of thin air, right?

Once he said where it was, Minister Lu would definitely spend a lot of money to find it with great fanfare.

He didn't want to waste the power and resources of the higher-ups because of his lies.

" it's on the top of the mountain behind linlin villa. chen dabei and i went to pick some wild fruits. we washed our feet by the river and stepped on this meteorite. it felt very comfortable, so i brought it back. i only found out later that it was a meteorite. "

After hearing this, Minister Lu, academician li, and Yuan Shan looked at each other and hurriedly left Qin Lin's office.

only li kai and qin lin were left.

Li Kai was about to say something, but Qin Lin also rushed out of the office, leaving Li Kai alone.

whoosh, whoosh. Li Kai furrowed his brows. He was in a hurry. Finally, he sat down at the tea table and picked up the teapot to make himself tea.

Now that they were all gone, the pot of tea belonged to him alone.

Old Brother Qin's tea is still delicious.

After Qin Lin left the office, he naturally rushed to the inner area of the manor.

He told Minister Lu that the meteorite was found on the top of the mountain behind them.

After Minister Lu applied, he would definitely spend a lot of manpower to search in the mountains.

Therefore, he planned to give two more profound Qi stones to the higher-ups.

However, he had to think of a way to give it to her. He couldn't give it to her directly.

That would be no different from telling others that it appeared out of thin air.

The reason why he told Minister Lu that he picked it up from the mountain behind was so that it would be more convenient for him to give out the meteorite.

Throw two meteorites into the mountain and let Minister Lu and the others find them.

This had nothing to do with him.

As for how to throw the two meteorites into the mountain, he had to pay attention.

Although he didn't know what equipment Minister Lu and the others were going to use or how they were going to find the meteorite, it was better to be cautious.

If the Chinese Academy of Sciences was looking for something, they might already have satellites scanning the mountain behind them.

That was a possibility.

After all, wasn't that how movies were supposed to be?

It was too strange for him to suddenly run into the mountain behind and throw meteorites.

Therefore, in an inner area, the parrot Xiao Wu, who was eating, directly reached out and grabbed it, then went to the top floor of the manor.

Xiao Wu was suddenly ambushed, and immediately called out in panic: "Master, what are you doing? be gentle!"

"Shut up and be quiet!" Qin Lin said.

Xiao Wu immediately quieted down and was carried by Qin Lin to the rooftop.

When they reached the top floor, Qin Lin pointed to the mountain behind them and said, " "Help me to the top of the mountain and throw two things."

This was also his goal.

Even if a bird flew in, it would not be noticed even if it was scanned by a satellite like in the movies.

Xiao Wu immediately looked towards that mountain, immediately becoming anxious: that's so far away. Master, do you want to kill me? "

"I'll find you two female parrots to keep you company after I'm done," Qin Lin said immediately.

"Master, are you using a honey trap?" Xiao Wu looked at him with shock.

"Are you in or not?" Qin Lin asked directly.

"But I'm a female!" Xiao Wu blankly said.

"Female?" Qin Lin was stunned.

"My name is Xiao Wu, is that a male's name?" Xiao Wu very seriously asked.

"Eh!" "Then I'll help you find a male parrot!" Qin Lin was stunned and immediately changed his words.

a beauty trap works, so does a beauty trap, right?

"The previous master had a brother, a handsome gold silk parrot, I want it, master you want to keep us in a cage."

"I want a small cage!" He added.

Yingluo. Qin Lin's mouth was wide open. Why did it feel so weird? the previous owner must be the dwarf ah ni!

"Alright, let's get things done first!" He agreed.

Xiao Wu was excited: "I'm exhausted. What is master going to lose? "

Qin Lin also didn't hesitate, returning to a room, entering the game and taking out two more profound insect stones, then placing them in front of Xiao Wu, saying: these are the two stones. You can throw them in two separate times.

Xiao Wu looked at the two stones, and then at the distant mountain: "It's so far away. My life is so bitter. I'm going to risk it for you."

It flapped its wings, grabbed a rock, and flew up the mountain in the distance.

In the manor.

Minister Lu, academician Li, and Yuan Shan were also gathered together. There was no satellite scan as Qin Lin had expected.

Movies were movies, and reality was reality.

This was the third time Minister Lu was reporting to the leader.

Academician Li and Yuan Shan were also looking up information in front of a computer!

The profound insect stone couldn't have appeared here for no reason. There must be a reason.

"eh, i found some useful information. there are records of celestial stones falling in your city at the end of the qing dynasty. " Academician Li suddenly said in surprise.

Heavenstones were like falling meteorites, right?

Meteorites could be formed when meteorites fell, so meteorites were sometimes called meteorites.

if meteorites had appeared here before, then it was possible that meteorites had appeared here.

It was just that after such a long time, the profound insect stone would still appear. That was very mysterious.

However, this was definitely a good thing for them. It was also their good fortune that the profound insect stone was not buried deep underground.

Yuan Shan and academician Li looked up other information, especially the county Journal of YOU city, but they couldn't find anything useful.

Thus, the descent of the celestial stone was the only possibility.

Otherwise, how could the meteorites that were so rare in the world appear here?

Minister Lu quickly hung up the phone and heard academician Li's report. He said, "that's probably the case. Now, we have to look carefully at the mountain where boss Qin found the meteorite, even if the chances of finding another meteorite are slim. Academician Li, you're an expert in this field, you have to take responsibility for this.

"Yes." Academician Li nodded. His stomach cancer was almost cured, and he hadn't been on a project for a long time.

Now that he suddenly had this meteorites, it was time for him to participate in some projects.

However, the chances of finding the profound insect stone should be very slim. It was already a great fortune to have this one appear. If this thing was so easy to find, there would be more than 5 kilograms of it in the world after so many countries had searched for it.

But even so, they still had to try to find it. If they didn't try, they really wouldn't find anything, but if they tried, maybe they could find one or two more pieces?

That would be a great surprise.

At the same time.

A parrot was already flying toward the mountain in the backyard of Linlin Manor. After a long time, it threw the meteorite down while panting heavily.

"I'm so tired." The parrot complained and landed on a tree to rest.

As for the meteorite, it rolled on the ground and stopped under a tree.

[Chapter 1056 The Parrot's Little Cleverness! Is This Pixiu Real?](#)

the parrot, who was resting on the tree, looked at the meteorite lying on the ground. it thought that there was still one more stone to give and complained, "I'm exhausted, I'm exhausted!"

after complaining, it encouraged itself,"handsome golden parrot!" The handsome golden parrot!"

However, when it thought of the last piece it had to give, it wanted to sigh again. It flew down from the tree and landed on the meteorite. Then, it raised its leg, as if it was doing something on the meteorite.

In the end, it left behind a lump of unknown substance, then flapped its wings and flew in the direction of Linlin Manor.

after some time, it returned to the roof of linlin manor and saw qin lin again.

"Master, I've lost a piece." When Xiao Wu saw Qin Lin, she didn't forget to flap her wings to claim credit.

"Mm! There's still one more!" Qin Lin handed over the other meteorite.

Xiao Wu helplessly could only once again grab that meteor rock, once again flapping her wings and flying towards that mountain.

At first, it was still very fast, but after flying past the plantation area, it slowed down.

Finally, it reached the entrance of the mountain again. Then, it could no longer hold on to the meteorite and fell directly into the grass at the entrance.

This made it anxious.

Its master told it to throw it at the top of the mountain.

It hurriedly flew into the grass and started to search, complaining, " "I'm just a parrot, and my master wants me to do hard labor. There's no justice!"

However, as it was looking, it suddenly stopped."What's the shape of the stone again?"

"It's over, it's over Yingluo." Xiao Wu was now anxious, flapping her wings to the tree next to her, unexpectedly learning to use her wings to cover her head in worry.

After an unknown amount of time, it muttered, " "i said i left it at the top of the mountain, but master doesn't know either!"

All of a sudden, it was upset, as if it had been too stupid to think of that.

After that, it rested on the tree with a peaceful mind.

It was a smart parrot, so it knew that it couldn't go back now. It had to wait for some time.

Not long after.

It then continued to flap its wings and returned to Linlin villa. The moment it saw Qin Lin, it said guiltily, " "Master, I'm done."

Qin Lin nodded with a smile. well done. I'll give you something good to eat later!

Xiao Wu saw that her master didn't notice, and also excitedly said: "And the handsome golden parrot!"

Qin Lin smiled helplessly.

He had already agreed to this, so how could he go back on his word with a parrot?

the only problem was how to enter the game and get the dwarf ah ni to introduce him to his brothers, and then how to get the gold silk parrot from them.

As he was thinking, Qin Lin also brought Xiao Wu downstairs to the living room in the inner area. He saw Zhao moyin coming out of the bedroom in surprise and said to him, hubby, sister LAN Zi will be bringing the designer Lin Han over later. Also, people have started to submit their works on the official account of the villa. Let's go down and meet them.

When Qin Lin heard this, he had some ideas in his mind.

When he had entered the game, he had seen the dwarf ah Ni's greenhouse. The decoration style was very LOW, and it could not be compared to Lin Han's design.

So, how about using the design to trick the gold silk parrot?

There would be a lot of people who would submit their designs, even though only 10 of them would be hired and paid.

However, if he printed out the designs and brought them into the game, those designers wouldn't be able to ask him for the copyright, right?

Of course, he could also be generous and buy all the designs. Then, he could build a greenhouse and tree accommodation project in Linlin villa.

"It's good to go and see him!" qin lin nodded.

"What about the greenhouse tree seeds? I've already chosen the location of the greenhouse tree in the manor." Zhao Moyu asked.

"Wait for me!" He said. Qin Lin said as he entered the workshop. He had already prepared the seeds, including the ones that Zhao moyin wanted to plant in the manor and the ones that would be used for the event.

Qin Lin took out the seeds and gave them to Zhao moyin, then the two of them went downstairs.

Linlin Manor.

Lin Han followed behind Lin Lanzi, heading to Linlin Manor with anticipation.

She had long heard of Linlin Manor. It could be said that it was the most magical and most curious healing and Vacation Manor in the country.

Unfortunately, it was too difficult to apply for treatment at Linlin Manor. Many rich people wanted to apply but failed.

Everyone could only understand Linlin Manor through videos.

From the video, Linlin Manor was definitely a beautiful place, making people yearn to explore it.

Naturally, Lin Han was the same. As a furniture designer, he would sometimes join some teams to design big villas, manors, and resorts. Among them, there were holiday manors like Linlin Manor.

hence, she was even more curious about linlin manor.

Now, he actually had a chance to find out.

"Manager Lin, what should I pay attention to when I enter the manor later?" Lin Han asked Lin Lanzi. She had a good impression of this beautiful woman with the same surname.

She was a little envious of his beauty and good figure.

Lin Lanzi smiled and said, "there's nothing special to take note of. Just don't disturb the people recuperating inside. Don't take pictures of them with your phone either."

"Alright," he said. Lin Han nodded.

She understood such things about manners.

Finally, Lin Han followed Lin Lanzi into the manor. In an instant, a mesmerizing, artistic, and decorative bamboo forest appeared before her eyes.

Then, she found it unbelievable.

She was this type of designer, and her way of looking at things was different from ordinary people.

The first thing she saw was the design style and type, as well as the design ideas.

[Chapter 1057 476! Parrot's Little Cleverness](#)

however, at first glance, she realized that she couldn't see through it at all. she only felt that it was very beautiful and was attracted at first glance. she actually had a feeling that she couldn't turn her eyes away in this beautiful scenery.

This must have been designed by the best designer, right?

After passing through the garden, Lin Han was led by Lin Lanzi to the manor's Hall, and they went to Zhao moqian's office.

lin han was a little nervous at this moment.

After all, he was going to meet the boss of Linlin company.

Although the other party's photo was already known all over the internet, seeing the person in person was nothing compared to looking at the photo.

moreover, there was only a picture of the middle-aged man in his forties on the internet, and there was not much specific information on him in the encyclopedia.

However, when Lin Han saw Zhao moyin and Qin Lin, she was just like the people who had come before, her eyes widened in shock.

The difference between little Qin and the middle-aged man in his forties was huge.

After seeing Lin Han, Qin Feng only asked a few questions and left.

Zhao mochen treated Lin Han seriously.

She obviously admired Lin Han's design talent.

designer Lin, I'm going to plant some greenhouse tree seeds. Do you want to go together? " After Zhao moqian understood Lin Han's situation, he also invited her.

"Alright, I'll listen to President Zhao's orders." Lin Han was not a fool. The woman in front of her was the lady boss of Linlin company. She would be a Super Fool if she didn't grasp this opportunity to get close to her and build a relationship.

"Let's go!" Zhao Mo said with a smile.

Lin Lanzi walked to Zhao mochen's side, and hurriedly supported him when they went down the steps. "Be careful, Mo Mo."

Her boss's wife was pregnant, so she was a little worried.

She had been poached by Zhao moyin, and after spending so much time together, their relationship was no longer just that of a boss's wife and an employee. They had already taken a step closer and were now good friends. She was really worried.

"Sister LAN Zi, I'm not that delicate!" Zhao Mo said with a smile.

In fact, she also felt that she was different from other pregnant women. She did not suffer the same kind of pain as other pregnant women. She knew that it was probably because of the factors that Qin Lin gave her.

Zhao mochen brought Lin Lanzi and Lin Han to a place in the northern corner of the manor. It was a relatively empty place, which was reserved for the beginning.

After all, if the manor wanted to add something, there had to be a reserved land for implementation.

Naturally, if there was really no more space and they did not want to destroy the original facilities, they could only expand outside, leaving a lot of space outside.

"Moqian, Lin Han and I will dig the land!" Lin Lanzi saw that Zhao mochen had brought a small hoe and was about to work. She didn't dare to accommodate him and immediately took the small hoe.

Qin Lin had returned to his office at this time. He opened the official account of Linlin Manor and entered the submission page of a specially designed greenhouse tree design.

Sure enough, someone had already submitted a manuscript.

However, it was obvious that the standards of the current submissions were very low.

Therefore, Qin Lin lost interest in it.

...

the next day.

qin lin saw minister lu, academician li, and yuan shan lead a person to him.

"Boss Qin, this is Captain Tang. Please help me arrange a room in the manor!" Minister Lu introduced.

"Yes, I'll get someone to arrange it!" Qin Lin nodded.

Academician li had already informed him that Captain Tang was the leader of the team who came to find the meteorite base. He was a military scientist.

"Boss Qin, I'll leave the others" meals to Linlin Manor,"Minister Lu added.

"Alright!" Qin Lin agreed.

During the time Captain Tang brought people to find the meteorite, the three meals had to be prepared, so Linlin villa's cafeteria was in charge.

when the time came, they would just have to install the detector and tell the public that linlin villa might have a new development and needed to be detected. three meals were provided.

as for when they left, he would say that the results of the exploration were not good and that linlin manor had given up on the development plan.

As for their accommodation, you city's guest house would naturally arrange it.

As he thought about it, he took out his phone and called Master Lin, asking him to arrange the restaurant in the villa.

What was different from what Qin Lin had expected was that Captain Tang, academician li, and the others didn't make a big noise when they were looking for the meteorite. There were no scenes of helicopters flying back and forth.

Captain Tang and the others just brought some equipment in the boxes into the mountain in a very simple and unadorned way.

Qin Lin also knew that he had been too cautious in letting Xiao Wu throw the meteorites.

Movies were all lies. Anything in the movies could cause a huge commotion.

However, it was also true. In addition to adapting the film based on real events, most of the screenwriters also relied on their own imagination. It was impossible for them to come into contact with such top-secret matters.

Only, this made him owe Xiao Wu this guy a deal.

It was simply too much of a loss.

Qin Lin didn't participate in what happened after that.

He didn't want to have anything to do with the two meteorites in the mountain.

From now on, the two meteorites in the mountain would have nothing to do with him.

After Minister Lu found Qin Lin to arrange the logistics, he followed academician li and Captain Tang into the mountain.

Yuan Shan, the senior, continued to pay attention to the clinical trials of the tea leaves for cancer.

The area he was in charge of didn't have much to do with the profound insect stone, so he couldn't get involved in the follow-up matters of the profound insect stone.

The team stopped after Minister Lu and his men reached the entrance of the mountain.

"The meteorite that boss Qin picked up might be a natural meteorite formed when a special meteorite fell from the sky," academician Li said.

but the meteorite fell too long ago, and the area of the fragments should be very large. If there are more meteorites, they could be anywhere on this mountain.

Captain Tang also said, " everyone has heard it, so we must be prepared to fight hard. Even if we can't find a meteorite for a long time, we must turn the mountain upside down. If we can find a meteorite, then we have made a great contribution to the country's scientific research. Let's start working now.

The people brought by Captain Tang also immediately began to take action.

They opened up the equipment they had brought and began to assemble it.

This was a special equipment, and the cost of making one was over ten million. It was specifically designed to search for meteorites.

Meteorites could be used in research on atomic bombs and particle propulsion because they contained some special elements.

These special elements could be detected by releasing some special rays.

These devices could release a special ray. As long as the Ray scanned the surroundings, the special device would reflect the situation.

He could even know the situation 10 meters underground.

The people that Captain Tang brought were very skilled in operating the equipment. They assembled the equipment in a very short time. Then, a few technicians began to test the equipment and released special rays to test the condition of the equipment.

however, as soon as these machines started the test, a special toot sound was heard, indicating that a target had been discovered.

It was the same for every machine.

This made Captain Tang frown,"what happened?" What's wrong with the equipment? Didn't you check before coming out?"

Academician li also frowned.

It would be a very serious accident in the scientific research field if the problem was discovered only after the equipment was transported.

It would be unforgivable if it happened during a special staff experiment.

A person in charge of adjusting the equipment hurriedly said, " "We checked before we came. There's no problem with the equipment. Let's make some adjustments."

Then, the technicians started to adjust the equipment again. After that, they began to release the special ray again.

This time, the equipment beeped again.

what happened? " the technician from earlier frowned. there was no problem with the inspection. How did this happen? "

"Damn it!" Captain Tang saw that there was still a problem with the instrument and said in annoyance.

Wasn't this embarrassing him?

"Could it be that there's nothing wrong with the device?" Minister Lu suddenly asked. "Could it be that there are really meteorites around that have been discovered?"

" ? ? ? "Captain Tang.

" ? ? ? "Academician Li.

" ? ? ? "The technicians.

Was that possible?

He didn't dare to imagine it.

After all, it was a profound insect stone, and they were all prepared to fight for a long time. Who would dare to think that they would discover the profound insect stone at the beginning?

[Chapter 1058 You Found One Just Like That? The Lucky Chen Dabei!](#)

Minister Lu's words stunned academician Li, Captain Tang, and the others.

What these people didn't know was that the entrance they were at was the place where a parrot had accidentally dropped the meteorite.

"Could it be possible?" Academician Li said in disbelief.

This was a profound insect stone.

If it was really so easy to find, it would be too fantastical.

This was because the device could only measure a distance of a dozen meters.

It was as if they had stepped on a meteorite the moment they entered the mountain.

The people who were doing the testing had already started to operate.

They had tested the equipment before they came, and there was no problem at all.

Now that such a situation had suddenly occurred, it was just as Minister Lu had said. Not only were they not at fault, but they had also made a contribution.

A moment later, a radar-like ripple began to appear on the device.

The laser emitted by the instrument also began to fluctuate.

After a while, the radar waves on the screen gathered together, and a dot appeared.

Then, the technicians all looked at Minister Lu.

Minister Lu felt a little uncomfortable being stared at. He asked with a puzzled face, " "What's wrong?"

Minister Lu, " one of the technicians said, " the device shows that there are meteorites in the grass behind you.

" ? ? ? "Minister Lu subconsciously turned around and looked at the grass behind him.

When he finally reacted, he hurriedly said, " "Quick, cut this Bush."

captain tang didn't hesitate and took action with his operation personnel.

a moment later, the grass in that area was all cut down and cleaned.

"I found it." Someone said excitedly.

Captain Tang immediately led his men over. A moment later, he came out with a meteorite.

Minister Lu and academician li immediately looked at the size of the meteorite. It was no smaller than the one Mr. Qin picked up.

"Hurry up and check if it's a meteorite!" Minister Lu hurriedly shouted.

Academician li immediately asked someone to bring over the Detection Tools and began to test it.

After some time, academician Li said excitedly, " "Minister Lu, it's a profound insect stone, this is really a profound insect stone!"

"That's great." Minister Lu clenched his fists tightly. He was extremely excited by this surprise.

who would have thought that they would find another profound insect stone so easily?

" quick, place it in a special device. we'll bring it back to report the good news. captain tang, you continue to search with your people. " minister lu quickly ordered.

After the meteorite was placed in a special container, he and academician li took the meteorite back to Linlin Manor.

Captain Tang sent a few people to escort the two of them, then led some people into the mountain and began to search with the instrument again.

They had found a meteorites right at the start of the match, so they were all in high spirits.

...

Linlin Manor.

Qin Lin had just started playing games in his office when he suddenly received a payment message with a series of zeros behind the number "43."

This was the money for the meteorite.

To be able to transfer over 43 billion so quickly, only the country could do such a thing.

However, he didn't know that this 43 billion had directly frightened you city industrial and commercial sub-branch and the president, Lin Shiwei.

Lin Shiwei's life now was very comfortable.

After all, every branch had a task every year. If the task was not completed, even the branch president would have to go out at the end of the year to boost sales and drink with them.

it was not easy to be the president of a bank in a small place.

However, after he had managed to get into the good books of Qin Lin's company, he had been able to secure his position. The monthly salary of Qin Lin's company was enough for him to complete a year's worth of tasks.

And when they suddenly discovered a sum of 43 billion entering their account, the branch system was the first to notice.

If they couldn't even find such a huge amount of money, the entire bank would be in for a long time.

"what account did the money go into?" Lin Shiwei asked as soon as he received the news.

Such a large sum of money was either a problem or a great achievement. He naturally had to ask.

"President, it's Mr. Qin's account!" A bank manager immediately reported.

"That's good." Lin Shiwei immediately heaved a sigh of relief.

He naturally knew who the boss Qin the manager was talking about was. If it was this person, 43 billion would not be a problem.

However, this was also very shocking.

After all, the two bosses of Penguin Corporation and farmer's spring water would be envious of such a large amount of cash flow. After all, these two didn't need to cash out their assets and stocks, and they couldn't produce so much cash flow.

"Do you know what account the money came from?" Lin Shiwei immediately asked again. He was very curious.

"President, I don't have the authority to check the account," the bank manager immediately said.

"Why would I?" Lin Shiwei frowned. He opened the bank's background and searched, but he soon received a notification that he didn't have access to it.

"Don't bother about the account," Lin Shiwei immediately ordered in shock.

The bank accounts that even he, the branch manager, did not have the authority to check were only a few specific accounts in the country. How could he dare to check these accounts?

He didn't even have the right to check.

Linlin Manor.

Qin Lin went out of the office and saw Zhao mochen in the living room.

Zhao mochen was looking at a drawing on the table. It was the design of the greenhouse tree, which was also Lin Han's design.

It was just that this picture had been divided into blocks, and it was a new and detailed picture.

Once a woman was interested in something, her energy would always be focused on it.

[Chapter 1059 You Found One Just Like That? The Lucky Chen Dabei!](#)

Now, Zhao Moyu was very concerned about the greenhouse tree, so he would pay attention to this matter when he was free.

On the side, the parrot Xiao Wu was joining in the fun.

"Honey, Lin Han's design skills are really good." Zhao moyin saw Qin Lin and greeted him, "I want to invest in her and help her open a studio."

"It's good that you like it," Qin Lin said with a smile. He didn't refuse.

When he had the ability, he could always do whatever he liked.

Zhao mochen was also helping Lin Han.

Many big shots would sometimes guide others based on their own preferences.

However, to Lin Han, it was definitely a lucky thing.

Qin Lin smiled again. oh, by the way, Motian, I received some pocket money. I don't know how to spend it. You can think about it.

Zhao mochen looked at Qin Lin speechlessly, "you don't even know how to spend the money?" If you want to give me flowers, just tell me, how much do you have?"

"See for yourself!" Qin Lin smiled and showed her the message.

When Zhao moyin saw the message, he was stunned. After a long time, he hit Qin Lin and said, "This is the pocket money you were talking about?"

She simply couldn't describe her current feelings.

Who would have so much pocket money?

"Yeah, I'll give it to you as your pocket money in the future," Qin Lin said seriously.

When Zhao moyin heard this, his heart started beating rapidly. Which woman could stand such words?

It was also at this time when the atmosphere became thick that the nearby parrot Xiao Wu suddenly interjected, "Master, master, you promised me, you promised me!"

Obviously, she was in a hurry to get the handsome golden parrot.

"I didn't forget about you, what's the rush?" qin lin said unhappily. he was playing with his wife and this guy interrupted. wasn't he looking for trouble?

The parrot Xiao Wu was about to continue speaking when Minister Lu's laughter entered the hall. "Boss Qin, good news, good news, we found another meteorite in the mountain you mentioned."

"this is really good luck," academican li said excitedly. "this meteorite is heavier than the one you picked up."

"You've found it so quickly?" Qin Lin was stunned.

He had Xiao Wu throw the profound insect stone to the top of the mountain, right?

At this time, Minister Lu and the others should have just entered the mountain. How could they find the meteorite so quickly?

There was a problem.

The parrot Xiao Wu seemed to know that she had been exposed. At this time, she hurriedly flapped her wings and flew out of the hall, not forgetting to say goodbye: "Master, I'm going to play with the dog and fox."

Seeing this, Qin Lin immediately understood that the parrot must be slacking off.

However, since Minister Lu and academician Li didn't suspect anything, he didn't think it was a perfect parrot.

Minister Lu went back to his room after telling Qin Lin the good news.

Finding another meteorites was not a small matter, so he had to report it first.

Zhao Moyu looked at Minister Lu who was leaving in a hurry and asked curiously, "Honey, what's a meteorite? Why is Minister Lu so excited?"

She knew Minister Lu's position. With her influence, leaders like him would not be happy with things and not sad about themselves. At least, under normal circumstances, they would not be so happy on the surface.

Qin Lin also briefly explained to Zhao Moyin what a profound insect stone was, and then said, that day, Chen Dabai and I went up the mountain to pick wild fruits. We found a meteorite and bought it. It cost 200 million per gram, so it was 43 billion in total. That's how we got the money. I didn't expect Minister Lu and the others to find another meteorite so quickly.

"What?" Zhao Moyu was dumbfounded when he heard this.

This was too fantasizing for her.

Her husband had picked up a stone and sold it for more than 43 billion Yuan. He even wanted to give this 43 billion Yuan to her as pocket money.

Wasn't this God forcing money into his hands?

Zhao Mochen suddenly thought of something and said, hubby, Chen Dabai went to pick the wild fruit with you. You sold it for 43 billion. Shouldn't you give Chen Dabai a reward? "

"Eh!" Qin Lin was stunned.

He really hadn't thought of this.

After all, he had just made up a story about picking wild fruits with Chen Dabai.

But he made it up, and in the eyes of others, including Minister Lu, academician li, and even Zhao moyin, it was a fact.

In this version of the story, although it was said that he was the one who picked up the meteorite and had nothing to do with Chen dabe, he was still accompanying him to pick wild fruits.

As a boss, he should at least give Chen dabe a reward for earning such a large sum of money.

how much should I give Chen dabe? " Qin Lin asked Zhao Mo Xi.

In order to cover up his lie and make others feel that it was reasonable, he could only let Chen dabe take advantage of him. Besides, he was very satisfied with this guy running errands, so he would treat it as a reward for running errands for a long time.

the reward can't be too little. After all, we've earned more than 43 billion. But it can't be too much to avoid suspicion. After all, the meteorite has to be kept a secret. Also, if we give too much, it might not be a good thing for Chen dabe.

Qin Lin nodded.

that was indeed the case. to ordinary people, suddenly becoming rich was sometimes a source of trouble.

Zhao Moyu thought for a moment and said, " give him a house and a car. It can be considered as physical items that can be directly cashed in. He doesn't have to face his friends and relatives who borrow money if he gives a cash reward.

"Alright, I'll listen to you." Qin Lin said with a smile.

A house and a car. Chen dabe was really lucky.

"Okay, I'll get the finance department to look at the cars and houses first. I'll give it to him after the procedures are done," Zhao mochen said with a smile.

.....

After Minister Lu and academician li went to the room, they used the encryptor to call the leader again.

Soon, the call was connected and the leader's voice came through, " " minister lu, you're calling me so soon. did something happen? "

Department head li quickly reported, " leader, nothing happened. It's good news. We heard about the mountain that boss Qin mentioned. We did some research and found out that a meteorite once fell in you city. It should be on that mountain.

so, when Captain Tang and the others arrived, I went up the mountain to look for meteorites. Who knew that as soon as I entered the mountain, I would find a meteorites at the entrance. It was even bigger than the one Mr. Qin picked up.

The leader fell silent upon hearing this.

There was such a magical thing?

This luck ...

the two meteorites were in the Linlin manor, and the higher-ups were obviously worried. In just two days, a special escort vehicle arrived at the Linlin manor.

Minister Lu left with the two meteorites and the escort vehicle.

As for the search for meteorites in the mountains, he left it to Academician Li and Captain Tang.

...

Back at Linlin villa, Chen Dabeai was already used to working as a Security Manager. He was well aware of his own capabilities. He had only been an ordinary security guard before and had never been a major manager.

He had only become the security Manager because of his boss, so he knew how to separate power. He hadn't interfered with the manor's matters after he'd found out that Ma Hong's status wasn't simple. He'd given all his authority to Ma Hong, the security Captain.

As for Linlin villa and Linlin manor, he had promoted several captains, each of whom was carefully selected and a veteran with strong abilities.

Moreover, he would not promote those who were opportunistic and smooth-tongued to get close to him. These people were the same as him, they had no ability.

How could he be promoted by such a person?

Therefore, the team leaders were all very capable. He also gave all his power to these team leaders. He only needed to manage these team leaders.

The other matters were all handled by these team leaders, so he had less to worry about. The main thing was to maintain a good relationship with Captain Hong.

This way, he could run errands for his boss at any time.

In the security department's meeting room, Chen Dabeai called for a meeting with a few of the team leaders. The main purpose was to ask about the security situation. Even if he had to delegate the power, he still had to show his presence.

While he was in the middle of the meeting, Chen Dabeai received a call from the lady boss.

He didn't dare to delay and hurriedly pressed the answer button. He heard the lady boss's voice, "Manager Chen, please come to the finance department."

Chen Dabeai was puzzled. He did not understand why he was called to the finance department. But after he hung up the phone, he still rushed to the finance department.

When Zhao Moyu saw Chen Dabeai, he took out two books and handed them to him. One was a Red Book and the other was a blue one.

Confused, Chen Dabeai passed the two booklets. One of them was a 120-square-meter property certificate, and the other was an E300 motor vehicle.

"Lady boss, What is this?" Chen dabeai asked in shock.

"Manager Chen, this is your reward!" Zhao Moyu said.

"What?" Chen dabeai was dumbfounded.

[Chapter 1060 Not! Bad Development Project!! 'Li Add Two More If! Have Feelings For It](#)

In the past few days, while the internet was still abuzz with the voting for the greenhouse tree design, there was another matter that caused a sensation in Linlin Manor.

Chen dabeai, the manager of the security Department, was rewarded with a first-class apartment in you city, the best residential area in you city, and a Mercedes-Benz E300.

This reward made all the employees of Linlin villa envious.

That was a house and a luxury car.

Soon, everyone knew that manager Chen had followed the boss up the mountain and discovered the value of the mountain behind Linlin villa. It could be developed for a project, so he had been rewarded by the boss.

Now, in order to develop the mountain, the boss had even hired an exploration team to explore the mountain.

The members of the exploration team were still eating in the cafeteria every day.

This also made the working atmosphere of the entire Linlin villa even higher. In a short period of time, many employees were carefully observing the villa's surroundings, trying to find any development value to discover, or any areas for improvement to give the villa suggestions.

obviously, he wanted to get the same reward as chen dabeai.

After all, with Chen dabeai as a precedent, there would always be people who thought that they were lucky.

This had aroused the passion of the people in Linlin villa.

Chen dabeai himself was a little confused.

When he went up the mountain with the boss that day, other than helping the boss pick some wild fruits, what else did he do?

He didn't seem to have done anything.

Why did the boss give him a reward when he found development value in the villa?

It couldn't be that the boss felt that he had worked hard at his beck and call, so he deliberately found an excuse to give him a reward, right?

He felt that it was more likely to buy a horse's bones with a thousand gold.

After he became the security Department manager, he had read some management books.

sometimes, management was about finding a person to set an example, punishing the other party and warning others, or giving rewards and encouraging others.

Don't you see that the other people in the villa are more enthusiastic about work now?

Chen dabei felt that he had not read the book for nothing.

It was definitely like this.

This also made him make up his mind to work hard for his boss.

After all, why did his boss not reward others but give him a reward instead? this showed that he thought highly of him. He had to repay his boss well.

Naturally, this was only an explanation to the outside world.

After all, he couldn't talk about the nightmare stone.

Moreover, this would also be a better cover for Captain Tang and the others.

linlin manor office.

Qin Lin was looking at the documents on the development of high mountain on his computer.

the development of high mountains was mostly about the development of plank roads, mountain climbing, and cable cars.

The reason why he was looking at these was naturally because he wanted to wait for Captain Tang and the others to find the second meteorite and go back. He might as well contract the mountain and develop it.

Although this project would not have the system's attributes after development and might not necessarily be popular, with the support of so many tourists in the villa, it was impossible to make a loss.

linlin villa could add some mountain climbing, plank roads, cable cars, and other activities to make up for some of the sightseeing activities.

Taking the cable car would allow them to view the villa, the manor, and the entire drifting project from afar. It was also a very good sightseeing attraction.

The key point was that the mountain was high enough, and they could develop a project to watch the sunrise. They could plant a greenhouse tree on the top of the mountain.

This seemed to be a good idea.

Living in the greenhouse tree, there was A +2 attribute of flower fragrance and insect repellent. At night, mosquitoes and insects would not get close. There was also A +2 attribute of refreshing, so he could welcome the sun in his best state.

Qin Lin was looking at the information when Xiao Wu, the parrot, flapped her wings and flew in. She landed on the top of the computer screen, staring at him like a tiger watching its prey, "Master, I've heard that you need to be honest when doing business. If you don't have your integrity, it'll ruin your reputation."

Qin Lin glared at the parrot.

Who was this scolding?

"Honesty is the most important!" But Xiao Wu stubbornly said, that appearance completely like those fools who didn't care about anything for love.

Qin Lin had no choice but to turn on mouyin on his computer and enter the official account of Linlin villa, which was the exclusive page for submissions.

Over the past few days, many designers had submitted their designs, and fans of Linlin villa had also voted for them.

Each fan could only vote once and it was bound to their ID card to avoid dirty means of cheating votes.

As such, the designs that were currently at the top of the rankings were basically those that the fans felt were very good.

After all, fans could also participate in the lucky draw and get the greenhouse Seeds as a reward if they voted. Therefore, everyone was very cautious when voting.

Qin Lin didn't hesitate to print out a hundred pages of these top-tier settings.

"Master, honesty is the most important!" xiao wu, this parrot, jumped on the computer, once again repeating.

Qin Lin ignored him.

Wasn't he printing out these designs to exchange for the Golden parrot? After collecting the printed designs, he looked at the game in his mind and controlled his character to head to a location on the mountain path of Mount goddess.

This was the perfect place to go to the dwarf Valley.

Then, he locked the office door and entered the game with a thought.

On the computer screen, the parrot Xiao Wu saw Qin Lin suddenly disappear and jumped up and down in joy.

It obviously knew where its master had gone.

After Qin Lin entered the game, he entered the forest according to his memory and went straight to the dwarf Valley.

The dwarf Valley was located to the North of the mountain path. After some time, Qin Lin saw the familiar dwarf Valley.

This time, he saw a lot of dwarves.

The dwarves also looked at him in surprise.

"He is that human."

"It seems like he's the only one who can enter our dwarf Valley."

yes, the other humans can't enter. It must be him!

"....."

Qin Lin felt a little uncomfortable being stared at by these dwarves. He could only smile at them and quickly walked to ah NI's house.

just as he reached ah ni's greenhouse, he saw ah ni walking out.

When ah ni saw Qin Lin, he was so shocked that he immediately went into the greenhouse and closed the door.

This made Qin Lin, who walked to the greenhouse tree, stunned for a moment.

What did this mean?

Shut out?

Qin Lin stepped forward and was about to knock on the door when ah NI's voice was heard. well, I won't take it back since I've lost it to you. I've always been like this, so you can't make an exception for me.

f * ck! when Qin Lin heard this, he wanted to curse in his heart. This guy actually asked him to be the buyer, but he did this because he was afraid that Qin Lin would return the goods.

"I'm not here to return the goods. I'm here to play with you," Qin Lin said helplessly.

"oh, i'm relieved then!" Ah ni then opened the door and looked at Qin Lin curiously. "Why are you here again?"

qin lin didn't want to waste any more time on ah ni and went straight to the point. "Ah ni, I heard you have a brother!"

"Yeah, what's wrong?" Ah ni asked.

take me to your brother and have some fun, " Qin Lin said with a smile. I like to make friends.

Ah ni looked at him warily, " my brother has just planted a greenhouse tree. He might be busy renovating the greenhouse tree now. He's very busy!

Qin Lin's eyes lit up when he heard this. that's great! Take me to him. I happen to have the design of a greenhouse tree. Maybe he will need it.

"Really?" Ah ni then led Qin Lin to a certain place in the dwarf Valley.

Not long after, Qin Lin saw another dwarf busy in front of a newly grown greenhouse tree, closing a curtain and decorating.

However, the height of the curtain hook was much higher than his, making it difficult for him to hang it.

The dwarf ah ni immediately ran over and greeted, " "Hi, my brother ah 'Bao, I'm here."

The dwarf ah 'Bao turned around and was pleasantly surprised to see ah ni, ah ni, you're here just in time. Help me with the renovation.

Then, he saw Qin Lin and asked in surprise, " "Ah ni, he's that human?"

Ah ni nodded. that's right. He's that human. He's the one who took in Xiao Hong, Xiao Lu, and the others. He also said that he has the greenhouse tree design you need.

Ah 'Bao stepped forward and stared at Qin Lin for a while, then said tentatively, "Human? Are you telling the truth?"

When Qin Lin heard ah ni mention this, he immediately went with the flow and said, " "Yeah, I have a lot of designs."

As he spoke, he took out the stack of greenhouse tree designs that he had printed.

The dwarves 'greenhouse tree decorations were very low-class and could not be compared with the designs submitted by designers in reality.

therefore, when the dwarf ah 'bao saw the designs in his hands, he was attracted to the first one.

"It's so beautiful!" The dwarf ah 'Bao revealed a surprised expression.

Even ah ni was attracted by it and looked over.

Before the two dwarves could react, Qin Lin had already drawn the first design and revealed the second design.

The second design also attracted the attention of the two dwarves.

Then, the third, fourth, and fifth Pixiu.

Every design was very beautiful in the eyes of the two dwarves, and they were both attracted.

The dwarf ah 'Bao even looked at the window of his greenhouse. There was also a design on it, but the design was too rough and casual, so he subconsciously covered it with a curtain.

Ah ni looked at Qin Lin's beautiful designs and was moved. "Can you give us these designs?"

The dwarf ah 'Bao also looked at him expectantly.

It would be wonderful if he could use one of the designs to decorate the greenhouse he had just planted.

Qin Lin put away the designs in front of the two dwarves and said solemnly, " "Actually, I own a drama design company. These designs are the result of the hard work of my designers."

I can't just give away their work for free, so I'm going to sell these designs for the designers. Of course, if you have something to exchange, such as a parrot, I don't mind exchanging the designs with you.

"Parrots?" Ah NI's face fell when he heard this.

He had a parrot before, but he had passed the parrot to this human in a hurry. Now, the parrot belonged to him.

He suddenly regretted it.

If he hadn't been in a hurry to push the blame away, he could have used the gluttonous parrot to exchange for the design.

Ah ni had the urge to stomp his feet at the thought.

Then, he looked at ah 'Bao and said hurriedly, hey, brother, don't you have a parrot? show it to him. If he's satisfied, he can exchange the design for us.

Ah ni didn't forget to tell Qin Yang, " my brother has a gold silk parrot. Although it's not very smart, it's very beautiful. We can use it to exchange with you, um, two design drawings.

Hearing this, ah 'Bao became anxious. no, I've raised little treasure for a long time. We have feelings for each other. I need two more!
