

## The Game 1071

### [Chapter 1071 482-Yun Hua Is Shocked By The Bright And White Ginseng!](#)

This recovery speed was simply shocking.

Even the laser surgery that the hospital was promoting now would take two to three days to recover, and it would take even longer if the time for eye examination was included.

Yun Hua had her breakfast early in the morning and she hurriedly called Chu Yue.

When the call went through, he said even more urgently, " "Director Chu, is your Linlin pharmaceuticals interested in controlling the shares of our Ming le? As long as you give us the right to distribute Ming le's Ming Ming white ginseng, it'll do."

He actually knew why Linlin pharmaceuticals was looking for him. It was definitely for Ming le's customer information, sales channels, skilled employees, and transportation channels all over the country.

As long as the Mingming white ginseng was spread among Ming le's customers and allowed them to recover their vision, it would be enough to cause all the short-sighted people in the country to explode.

That way, he could blow up those foreign glasses companies with the fastest speed and the lowest price.

After knowing the effect of the Mingming white ginseng, he didn't think about injecting capital, but directly talked about controlling the shares.

This was because he knew that Linlin pharmaceuticals was going to flip the table. In the future, there would be no market for short-sighted glasses in the country, and Ming le's previous biggest business was short-sighted glasses.

if linlin pharmaceuticals didn't take the initiative to surrender after offering an olive branch, then they could only wait for their destruction.

More importantly, allowing Linlin pharmaceuticals to control Ming le was equivalent to giving the company to Linlin. He would only have a small share, which was equivalent to becoming a senior Manager of Linlin company.

However, he believed that many people would make the same choice as him.

Between being the boss of a company with a market value of tens of billions and having limited development potential, and being a Senior Manager of a group like Penguin, and holding some shares of a subsidiary of Penguin Group, everyone knew which one to choose.

moreover, he was certain that with the right to distribute the bright ginseng, ming le's future market value would far exceed its current value. more importantly, when he entered linlin's company system, his position would be completely different.

"CEO Yun, let's talk in detail in the company!" When Chu Yue heard Yun Hua's words, he hung up the phone with a smile.

He was still thinking about how to negotiate with the other party. After all, his original intention was to have absolute control of Ming le, but he didn't expect this CEO Yun to bring up this matter himself.

Yun Hua also arrived at Linlin pharmaceutical as soon as possible and met Chu Yue. The two of them discussed a lot and finally signed a few contracts. They also confirmed the two most important points of cooperation.

One was that Linlin pharmaceuticals had absolute control over Ming le.

The second was that Linlin pharmaceuticals would authorize Ming Ming and white ginseng to Ming le.

In other words, if Ming le wanted to sell the goods from Linlin pharmaceuticals, it would need to order the money for the bright white ginseng for Linlin pharmaceuticals. As Linlin pharmaceuticals had absolute control over Ming le, the majority of the profits would go to Linlin pharmaceuticals.

This was an unequal cooperation.

But sometimes, cooperation wasn't about equality, but about what bargaining chips the two sides had.

To Yun Hua, this was a good deal. So, after signing the contract, he returned to Ming le company as quickly as possible.

Ming le had to make a plan as soon as possible to cooperate with Linlin pharmaceutical.

The moment Yun Hua returned to the company, she immediately held a meeting and gave an order to stop all sales in the company's stores. All the glasses were recalled, and the store signs and publicity were all removed.

As for the new signboard and the notice for publicity ...

In addition, the company's short-sighted glasses company had stopped production and cleared production lines at low prices.

yun hua's series of orders made all of ming le's people confused and confused.

However, with Yun Hua's orders, the entire Ming le company also took action, but some people were still on tenterhooks.

this series of actions was equivalent to giving up the business of short-sighted glasses.

A company that sold glasses gave up on their business?

It was also at this time that an assistant hurriedly ran over to Yun Hua and said, " President Yun, Yishi Lu's people are here. They said that their Chairman, Paul du, has come in person. They said that you know why they're here, President Yun.

"DuPaul!" When Yun Hua heard this name, her expression turned dark. The other party was the person who had forced Ming le into a dead end.

Or, the other party was a brutal invader of the domestic glasses market. It was the other party's series of plans to annex and acquire the domestic glasses brands.

And they, Ming le, were the enemy's last target.

"Get them to the reception room." Yun Hua said with a frown.

The assistant nodded and ran out in a hurry.

Not long after.

Yun Hua immediately saw DePaul. He was wearing a suit and glasses. The only difference was that he was bald a few months ago, but now he had thick hair. He had obviously used Linlin company's hot spring powder.

DuPaul was an ambitious man. There were about 2.6 billion people with myopia in the world, and this country occupied 700 million, more than a quarter of them.

Therefore, as long as he completely occupied this market, he could establish a Kingdom and issue his rules in this kingdom.

Companies like Karl Zeith and Hendry were the nobles of his Kingdom. Around him, the price and materials used were all up to him.

In the words of this country, they could cut the leeks like crazy. They could do it however they wanted, and the leeks could not resist at all.

This was also the reason why he personally came to Ming le.

When many Kings wanted to unify their countries, they would always like to go in person and meet their last enemy. In the end, they could make this enemy submit to their feet and lay the foundation for the glory of their country's unification.

Now, this Ming le was naturally his last enemy.

" Mr. Yun, I'm sure you know why I'm here today. " After seeing Yun Hua, DuPaul didn't waste any time and went straight to the point. After you lose the case, you have no other choice. Either you let me buy Ming le and you can still be a rich man with financial freedom, or you will be completely destroyed by me and go bankrupt.

There was a threatening tone in his words. I believe that Mr. Yun is smart and knows what to choose!

[Chapter 1072 I'll Sell You The Factory Equipment First](#)

After saying that, DuPaul sat down on the sofa next to him with confidence.

He was sure to win.

In the face of bankruptcy, everyone knew what to do.

Yun Hua looked at DuPaul's arrogant expression and was really very unhappy.

Before this, he really had no choice. But now, it was completely different.

DuPaul thought that he had completely settled the domestic glasses market, but he didn't know what he was about to face.

Yun Hua really wanted to tell the other party about the bright white ginseng and see what kind of expression he had.

However, he still held back. Instead, he rolled his eyes and said to DuPaul in a humble tone, " Mr. DuPaul, I'm willing to accept my loss this time. I know what kind of situation I'm facing.

so, as you said, Mr. DuPaul, I know which choice I should make, to go bankrupt or to become a rich man.

"Our factory, equipment, and materials are all willing to be sold exclusively to Mr. DuPaul's esoll company."

hehehe, Mr. Yun, " laughed DuPaul. you've made the best choice.

It was exactly as he had expected.

The reason why Ming le was not willing to be bought out was because they still had a portion of the market under their control. There was still hope, and even a bit of overconfidence.

Now that they had to stop production and couldn't use the patented materials, the other party had to sell it even if they didn't want to.

The smile on DuPaul's face grew wider.

After all, his plan was about to be completed.

A King's happiest moment was probably when he unified his country.

Although brands like Karl Zeith still occupied a large part of the glasses market, the other party had already signed a private cooperation agreement with him.

He had the power to set the price and the rules.

That was enough.

"Mr. DePaul, can we sign the contract first?" Yun Hua asked anxiously.

"hehe, as mister yun wishes." DuPaul didn't suspect anything.

Or perhaps, he didn't even need to suspect anything.

If a glasses company sold their factory, equipment, and materials, they wouldn't be able to do anything.

"Please wait a moment, Mr. DuPaul." Yun Hua said to DuPaul again and left the reception room under DuPaul's satisfied gaze.

As soon as he left the reception room, he sneered and took out his phone to call his lawyer.

Not long after, the lawyer arrived at his office.

He asked the lawyer to help him draft the contract. After the contract was done, he didn't inform anyone else in the company.

Other than the shareholders who withdrew their shares as soon as they heard that something had happened, the remaining two shareholders were in charge of the company's management and did not hold much shares.

Now that he had signed a controlling contract with Linlin pharmaceuticals, their shares would be compressed again, and in the future, it would be even smaller.

After drawing up the contract, Yun Hua went to the reception room again.

DuPaul was in a very good mood and was talking to two foreign men next to him. When he saw Yun Hua come in, he smiled and said, " Mr. Yun, I didn't expect you to have prepared the contract so quickly.

The underlying meaning of his words was that he was in a hurry, but it was more or less mocking.

After all, they had been unwilling to be acquired before, but now they knew how to be anxious.

"Isn't he already powerless?" Yun Hua pretended to be embarrassed and walked forward. She handed the contract in her hand to DuPaul and said,"Mr. DuPaul, please take a look at the transfer contract of the factory, equipment, and materials."

dupaul took the contract with a smile on his face, but when he saw the price on the contract, his face turned gloomy. " "Mr. Yun, are you joking again? Your equipment isn't brand new, yet you want to sell it at brand new prices? The price of the materials is also much higher."

Yun Hua laughed. Mr. DuPaul, this is the depreciating price according to the price I bought it at. Maybe I'm not smart enough. I was cheated before and bought it at a high price. If I was smart, I wouldn't be in a desperate situation now.

" i want to sell it at this price now. of course, mr. dupaul is not willing to buy it. i can try to find more investors and research new materials. "

at most, I'll just use the materials that have already been eliminated and reduce the price of the glasses I make. Even if I don't make any money, I can still maintain them for a year or two.

When she said this, Yun Hua was sneering in her heart.

He was extorting them.

This was because he had long heard that DuPaul had compared himself to the king of the glasses market. Today, he had come to mingle, so he could see DuPaul's mentality better.

Without them, Ming le, the other side would have fewer obstacles.

"Mr. Yun, what a good plan!" DuPaul's face turned gloomy.

He saw through Yun Hua's purpose.

But this was what made him angry.

he didn't want to waste another two years.

What a King hated the most was to see people rebelling and betraying their kingdom.

The other party's intention was clear. If he didn't accept the price, he would become a traitor to his Kingdom.

Therefore, he had to accept the premium.

However, this proved that the other party was indeed determined to withdraw from this market. Otherwise, they would not have sold their factories, equipment, and materials.

At the very least, this was good news. No one would stop them.

Moreover, this money was spent on the sheep, and if the price were to increase later, it would not take long to recover.

"Mr. Yun, I can agree to your price." in the end, Dupaul nodded with a gloomy face. then he said, " however, I still want to acquire Ming le's stores, customer information, and employees!

### [Chapter 1073 I'll Sell You The Factory Equipment First \(2\)](#)

his original plan was to acquire the entire ming le company.

The stores, customer information, and skilled employees were more important. Equipment and materials could be bought with money.

Yun Hua laughed.

How could he sell things like stores and customer information?

These were all prepared for the bright-eyed white ginseng.

However, Yun Hua still said, " Mr. DuPaul, although we are not in the business of selling glasses for short-sightedness anymore, we are still in the business of sunglasses, cosmetic contact lenses, medicine, and so on. I will have to discuss these with the other shareholders.

DuPaul didn't know the exact situation inside Ming le, so he could only frown and say, " " mr. yun, as far as i know, you're already the biggest shareholder of ming le. if you choose to sell it, the other shareholders will also consider your opinion. "

Yun Hua smiled and said, " Mr. DuPaul, I'll sell the factory, equipment, and materials to you. There's only so much money. You'll spend it all eventually. I also need some small businesses to maintain my income.

unless Mr. Paul is willing to pay a special commission fee. I can help Mr. Paul to hold a shareholder meeting of Ming le and sell my shares to Mr. Paul.

DuPaul understood what he meant.

He was trying to extort him again.

However, this also showed that Yun Hua really wanted to quit. She was just trying to get a little more money now.

However, if he could take down the entire Ming le, then compared to the money needed to buy the factory, equipment, and materials, it was nothing to be extorted from here.

"Mr. Yun Hua, how much commission do you want?" asked DuPaul.

"500 million!" Yun Hua said with a smile. He didn't ask for more.

After all, the other party wasn't a fool. 500 million wasn't too much or too little. It was just within the range that the other party could afford.

No matter how many there were, even if the other party was determined to get it, they couldn't be a fool.

500 million wasn't much to Eselu, but to give it away for nothing in order to buy Ming Le, that was a lot.

Okay, I promise to give Mr. Yun the Commission, but you have to sign a contract. Mr. DuPaul must sell his shares to us. In the end, DuPaul agreed.

After all, compared to buying the entire Ming Le, it was worth it.

As long as Yun Hua helped to hold a shareholders' meeting and publicly announced that they were willing to sell their shares to them, the other shareholders would not have much thoughts of resistance, and they could successfully acquire Ming Le.

Finally, there was an additional contract.

Factory, equipment, and materials transfer contract!

Then, there was the Commission fee contract, which was specially prepared by Yun Hua.

Yun Hua laughed when she saw DePaul signing his name on the two contracts because he had left a trap in them.

He had agreed to sell his shares, but he had not stated how much he would sell them for in the contract.

Then wouldn't 0.000000001% be considered a sale too?

Previously, Eselu had set up a trap for them on the patent materials, and he was giving them a taste of their own medicine.

DuPaul was too proud to notice it.

He was now looking forward to seeing the expression on the other party's face when he found out the truth.

After DuPaul signed the contract, he handed it over to Yun Hua. Mr. Yun, when will you fulfill your promise? "

Yun Hua took the contract and immediately promised, " Mr. DePaul, as soon as the money is in my account, I will arrange it for you immediately. I will hold a shareholders' meeting and invite you to come over.

Anyway, director Chu was going to send a board representative over soon. The shareholders' meeting was going to be held soon, so he might as well invite Paul du to witness it.

He had also fulfilled his promise.

Of course, if Paul could convince Linlin to sell their shares to them, it would be his ability, wouldn't it?

"Alright, it's a deal." DuPaul laughed.

Back in the car, the assistant congratulated DuPaul. "BOSS, congratulations. you can buy ming le now, and your future plans can be carried out smoothly."

DuPaul was obviously in a good mood. After that, he called over the person-in-charge in China and handed over the contract for the purchase of Ming le's factory, equipment, and materials to the other party. He asked the other party to settle it as soon as possible in the next two days.

When the person in charge in China saw the contract, he was overjoyed and immediately brought people to handle it.

Without these, a company selling glasses for short-sighted lenses was no different from a Tiger without teeth.

A few days passed in the blink of an eye.

DuPaul also sent the money he promised Yun Hua over. At the same time, eslu's men also took over all of Ming le's factories, equipment, and materials.

The person in charge in China reported, " Mr. DuPaul, Ming le's production line is maintained well. It can still be used for a long time. We can start work directly when the time comes.

but the acquisition of Ming le as a whole has to be done quickly. I've received news that Ming le's stores have been under construction for a while now. Could the other party have other intentions? "

When DuPaul heard this, he frowned slightly and called Yun Hua directly. After the call went through, he said, " "mr. yun, i think you've received the money. how's your promise going? We've already signed a contract."

Yun Hua's voice was immediately heard. Mr. DePaul, since we've signed the contract, I naturally wouldn't dare to break it. I was just about to inform you that Ming le will be holding a shareholders 'meeting this afternoon. I'd like to invite Mr. DePaul to come.

haha, Mr. Yun is indeed a man of his word. DuPaul hung up the phone with a smile. He then said to the person in charge, " it seems like your worries are unnecessary. That Mr. Yun has already helped us to call for the shareholders 'meeting at Ming le. We can head over to Ming le in the afternoon to settle everything.

However, what DePaul did not know was that on the other side, Yun Hua had already brought the two remaining small shareholders of the Company to welcome the two people.

One of them was naturally Chu Yue, and the other was a middle-aged man. He followed behind Chu Yue and followed his every step. This man was a manager of Linlin pharmaceuticals, and was also the representative of the Board of Directors that Linlin pharmaceuticals had sent to Ming le.

the matter of controlling ming le was not a small matter, so chu yue naturally came personally.

the other two small shareholders of ming le naturally had no objections to linlin company's control.

After all, everyone knew the potential of Linlin company. Or rather, at the moment, Linlin company was not inferior to any company in the country.

Moreover, compared to the shares, they were now the senior management of Ming le, and in the future, they would be the management of the Linlin Department.

just like little tanuki's father and the penguin company, as long as they were recognized, they would have the opportunity to work in the head office when the company developed again.

It was a huge attraction to anyone, a heavenly passage to promotion.

After Yun Hua hung up the phone, she turned to Chu Yue and the middle-aged man and said, " director Chu, director Shui, this is the phone number of that Paul du. I've invited him to the shareholders 'meeting this afternoon.

Upon hearing this, Chu Yue and the rest laughed.

Naturally, he had heard about how Yun Hua had tricked du Paul.

however, isilu had dug such a big hole for ming le, and they had even stopped production. it was normal for them to retaliate and vent their anger.

On the other hand, when DuPaul was at his proudest, he would never have thought that there would be such a thing as the bright white ginseng.

...

The afternoon came quickly.

DuPaul also arrived at Ming le company with his men at the agreed time.

Yun Hua had already arranged for someone to wait for him. When he saw DuPaul, he welcomed him with a smile."Mr. DePaul, our President Yun said that if you come, please go to the shareholders 'meeting room."

it seems that Mr. Yun has arranged it very well. Said Paul to the person in charge in China.

Soon, DuPaul was led to the shareholders 'meeting room of Ming le.

As soon as he entered, he saw the five people sitting inside.

One of them was Yun Hua, and the other four should be the other shareholders of Ming le.

When Yun Hua saw DuPaul, she immediately smiled and introduced him, " "Let me introduce you. This is Mr. DuPaul."

Hearing this, Chu Yue and the others also looked at DuPaul with a strange look.

However, when DuPaul saw that everyone was looking at him, he also stepped forward with a smile. "Everyone, it's our first time meeting. I'm sure everyone knows who I am. Today, I've come to Ming le on behalf of isilu. I don't have any other purpose, I just want to discuss the acquisition with everyone."

Mr. Yun of your Ming le company has already agreed to sell the shares to me, so I hope that everyone can consider this matter.

" also, there's something else to tell everyone. mr. yun has already sold ming le's factory, equipment, and materials to us. "

I'm sure everyone knows what this means. Your Ming le company has already lost its biggest business.

[Chapter 1074 484-Dumbfounded!](#)

DePaul's words were reasonable and threatening. His purpose was to expose the fact that Yun Hua had already agreed to sell his shares in order to break the other people's line of defense.

However, Chu Yue and the others were looking at him with a playful look.

It was a different feeling to see a Big Shot like DuPaul acting like a fool.

Seeing that Chu Yue and the others did not respond for a long time, DuPaul frowned and looked at Yun Hua. "Mr. Yun, aren't you going to say something at this time?"

At this time, Yun Hua also smiled and said, " then I'll say a few words. First of all, I would like to thank Mr. DuPaul for purchasing the factories, equipment, and materials that Ming le no longer needs. In addition, as a form of gratitude, I've decided to sell 0.0001% of Ming le's shares to Mr. DuPaul. As for the shares in everyone's hands, everyone is willing to do so.

His words made DuPaul's face turn gloomy. Mr. Yun, this is different from what we agreed on. We have signed a contract.

Yun Hua smiled and said, " Mr. Paul, we have indeed signed a contract. So, I'm not holding Ming le's shareholders 'meeting on your behalf. I've also invited you here. It's you who can't convince others to sell your shares.

as for my agreement to sell you my shares, I'm not selling you 0.0001%. The contract doesn't state how much I'm selling you.

Chu Yue and the others also looked at DuPaul in a joking manner.

Chu Yue said directly,"you're Mr. DuPaul, right?" This is Ming le's shareholders "meeting, so if there's nothing else, please leave."

" f \* ck you! " dupaul seemed to have understood something now. he glared at yun hua, chu yue, and the others."Very good, Mr. Yun is playing word games with me."

"Looks like I'm too soft-hearted to think I'd give you guys a chance. Without the market for short-sighted glasses, do you guys really think you can survive on the remaining sunglasses, medicine, and cosmetic contact lenses? You guys are too naive."

DuPaul was very angry now, as if a king who had just recovered his territory was being played.

He would make these people pay the price.

The sunglasses, potions, and cosmetic contact lenses market were also dominated by esolu. If they wanted to suppress Ming le's market, it would be a piece of cake.

Since the other party wanted to court their own destruction, then don't blame him for being impolite. as he thought about it, dupaul walked out of the shareholders 'meeting room of ming le in a huff.

At this time, Yun Hua reminded him, " Mr. DuPaul, remember to read today's news when you go back. I'm sure you'll be surprised.

DuPaul paused for a moment, snorted heavily, and left.

When he returned to the eselu branch in the country, he asked the person in charge with a gloomy face, " why is there such a big problem in the contract that your legal department can't see? "

the chinese person-in-charge's face was also a bit ugly. he knew that depaul was angry now, so he hurriedly called the person-in-charge of the company's legal department.

The person in charge of the legal department arrived very quickly. He was also a blond foreigner.

What followed was a wave of criticism from DuPaul.

The person in charge of the legal department didn't dare to say a word. He had seen the contract, but he didn't expect the people of this country to be so bold.

The other party's company was already on the verge of bankruptcy, yet he still dared to play such word games at this time.

Moreover, he did remind Mr. DePaul at the celebration party, but Mr. DePaul didn't pay attention to it at that time and seemed to have forgotten about it.

Therefore, he didn't dwell on this matter.

DuPaul criticized the person in charge of the legal department. He suddenly thought of something and immediately said, " "Let's see if there's any news today."

The person in charge did not dare to waste any time at this time. He immediately took out his phone to check today's news and searched for Ming le.

A moment later, a lot of news appeared.

However, what puzzled the person-in-charge was that most of the news headlines were about Linlin pharmaceutical company, saying that they had cultivated a kind of white ginseng that could improve eyesight.

Obviously, this was a new product developed by Linlin pharmaceutical company, which was being reported by the news media.

But what did this have to do with Ming le?

Why did Linlin pharmaceutical company pop up when he searched for Ming le? the two companies were clearly not related.

The person-in-charge in China subconsciously clicked on one of the videos. When he saw the content, his face changed.

" thank you, everyone, for paying attention to our linlin pharmaceutical company, wanwan. "

in the video, it was obviously the beautiful public relations officer of linlin pharmaceutical company who released the news to the public.

" our linlin pharmaceutical company has cultivated a type of ginseng called the white ginseng for improving eyesight. it doesn't have the same effects as ginseng and can't be used as a supplement. however, it has a special effect, which is to treat myopia. "

according to many experiments, our Linlin pharmaceutical company's vision-improving white ginseng can be cured in four to five months if you cut small pieces and eat three pieces a day.

of course, if the alcohol is less concentrated, the recovery time will be faster. Furthermore, Linlin pharmaceuticals has already cooperated with Ming le. As long as you are registered customers of Ming le's stores in the country, you can have the priority to purchase the first batch of Ming Ming white ginseng. Those who have not been registered can also register at Ming le's stores and obtain the right to purchase it.

At this point, the image changed. It was a store. It was obviously Ming le's store, but now it was changed to Linlin-Ming le visual rehabilitation Center.

This was Ming le company's embarrassment. Previously, Yun Hua had ordered for the store signs and advertisements to be removed in order to embarrass themselves. All the stores had Linlin as their prefix.

The shop in the video was obviously built in a hurry.

In front of the store, there was an employee wearing a Lin Lin prefix shouting slogans, " Linlin has a white ginseng that can improve one's eyesight. I'm returning you a healthy vision.

It could be seen that these employees were very enthusiastic. After all, the company had become embarrassed, and so had the employees.

From an employee of Ming le to an employee of Linlin, even if the salary did not change, the employees were happier. That was a change in mentality.

he didn't see that many people had posted on their wechat moments on the internet. he was an employee of companies such as penguin, ali, and xiaomi, and he would attract a lot of envy.

It was the same for Linlin company now. The only difference was that Linlin company was in the midst of development, and the chances of entering it were higher.

Moreover, after Ming le's employees were embarrassed, their salaries would be even higher. According to the standards of Linlin pharmaceutical company's employees, they would have insurance, housing funds, and bonuses.

Therefore, it would be strange if these employees weren't enthusiastic.

The person in charge felt like the sky was falling when he saw the news. He hurriedly reported to DuPaul, " Mr. DuPaul, it's bad. Linlin company has developed a kind of ginseng that can improve eyesight. It will have a huge impact on our esilu.

DuPaul was surprised and asked, " "Linlin company? The company that sells hot spring elixirs? What kind of impact will he have on our glasses company?"

he didn't know much about linlin's company. after all, there weren't many news reports about linlin's company in their country.

The only impression he had of Linlin company was the hot spring powder.

Because he was previously bald, he had used the hot spring powder. He absolutely agreed with its effect.

however, he didn't think that this company would have any influence on their eselu. a company that sold hair and glasses were not in the same industry at all.

The Chinese representative was anxious when he saw DePaul's attitude.

He knew that DePaul didn't know the power of Linlin company because the news was blocked.

Linlin company had sanctioned Western companies several times, and the companies led by the United States had long blocked the information.

Other than the hot spring elixirs that had already been circulated, it was impossible for those countries to let any news related to Linlin company appear.

In fact, there was also such a blockade in the country, and a lot of foreign news could not be seen.

It was just that the United States and other countries had a more serious blockade, especially not wanting people to know about the purification grass.

Once they found out about the purification grass, and Linlin company was not selling it, they would have to face all kinds of protests in those big industrial countries with bad air quality.

That would be a very bad thing. At that time, those countries would have no choice but to come to China to negotiate. At that time, they would have to pinch their noses and agree to any request made by their country.

The person in charge hurriedly explained to du Paul about the power of Linlin company and showed him the news to let him know about the bright white ginseng.

"How could there be such a thing?" After understanding the situation, DuPaul's face turned ugly.

Perhaps he now understood why those people in Yun Hua were so fearless. It was all because of Linlin company and Mingming white ginseng.

The local representative frowned and said, " Mr. DePaul, Linlin company has made an announcement. It shouldn't be fake. In our country, Linlin company is already an iconic company. Their products have never disappointed us.

"I don't believe in such a thing." no! DuPaul shook his head. we have been researching for a long time on myopia. We have also tried to research potions to restore vision, but we have not found anything. How can this ginseng cure myopia? this is not reasonable.

The local representative was also in disbelief, but that was Lin Lin's company. He added, " "Mr. DuPaul, let's get some ginseng to see how the plot is going."

"Then why aren't you doing it?" Although DuPaul didn't believe him, he still gave the order in a hurry.

It was obvious that he was more anxious than anyone else to know the authenticity of the bright white ginseng.

If it was true, he knew how much influence this thing would have on their esdew.

If he didn't even have myopia, what market would there be for myopia glasses?

If the market was gone, their esoll would be finished.

Furthermore, he thought about how Ming le had decisively sold the factory, equipment, and materials.

Previously, he had thought that the other party was at a dead end, but now that he thought about it, it was possible that the other party was doing this on purpose to get him to take over.

However, before he could confirm the effects of the Mingming white ginseng, he would never believe this.

even if it's effective, it won't be strong. It's just like their eye protection liquid. They're just exaggerating.

DuPaul and the others were not the only ones who saw the news.

On the internet, countless people had also seen the news about Linlin pharmaceutical.

Linlin's company was the source of the hot search, and the number of fans on Linlin villa's official account had already exceeded 100 million. The bright white ginseng was first posted by Linlin villa's official account.

In addition to the special effect of the vision-improving white ginseng, it was hard not to become popular.

Therefore, the internet had long been filled with news about the bright-eyed white ginseng.

Countless people were attracted by this, and they were all curious about the bright white ginseng. At the same time, Ming le's company also became popular. In a short time, the entire internet knew about Ming le's company.

naturally, when they saw the company's name, everyone knew that linlin had taken control of ming le.

This had made many companies envious.

Of course, the most popular item was still the Mingming white ginseng.

there were too many short-sighted people in the country. if there was such a thing, who would not want to use it?

Who didn't want to take off their glasses?

However, the effect of the Mingming white ginseng was still a question mark. After all, no one had used it before.

However, most of the people on the internet believed this.

After all, Linlin company's reputation was there.

At the same time, there were also many people who questioned it. However, what Qin Lin didn't expect was that the first person to question it wasn't a glasses company, but a hospital, which mainly focused on treating myopia.

The one who voiced out his doubts was a doctor wearing glasses!

### [Chapter 1075 It's Over, It's Completely Over](#)

Linlin pharmaceuticals 'sudden introduction of the Mingming white ginseng had indeed attracted a lot of attention.

After all, there were more than 700 million people in the domestic market for myopia. This huge market was a huge benefit, and no one wanted their interests to be violated.

Qin Lin naturally paid attention to the promotion of the Mingming white ginseng.

However, he didn't expect that the first company to target the bright-eyed white ginseng wasn't the glasses company, but a hospital.

This hospital was also very famous in the country. It was a company that specialized in treating myopia surgeries and was known to be very good at all four major myopia surgeries.

A doctor wearing glasses said indignantly, " the patient is short-sighted. It's already very uncomfortable to wear glasses. Please don't exaggerate the effects of these things and let the short-sighted patient fall into the trap. This is a very irresponsible behavior, "

the hospital's statement did not mention linlin pharmaceuticals or the mingming white ginseng, but every word was directed at them.

however, qin lin didn't pay much attention to the hospital's statement. he even brushed it off when he saw the news. it was just a joke.

The effect of the bright white ginseng was not something that could be changed by a few words from the hospital.

To describe this hospital in one word, it was like a Mantis trying to stop a car.

Qin Lin wasn't the only one who saw the hospital's comment. Many people on the internet had seen it too.

after all, when linlin pharmaceuticals and the bright-eyed white ginseng were on fire, if someone suddenly came out to support the bright-eyed white ginseng, everyone would be willing to pay attention to it. it was impossible for it not to be popular.

cheng dabao saw the video. he wore thick glasses and looked at the hospital in the video. he said disdainfully, " the Doctor Who's doing the surgery is wearing his own glasses. Is he trying to be funny? "

The next moment, he received a WeChat message on his phone: Mr. Cheng, although we don't have the bright white ginseng in stock, we've already accepted reservations. You can come over to register and we'll explain the relevant information to you.

this was a message from linlin-ming le's store, which used to be ming le glasses 'store.

The promotion of the Mingming white ginseng was in such a situation this time. Online orders were not available, and only those who had registered at Linlin-mingle store were qualified to buy it.

The reason was simple-it was the client's information.

After knowing the effect of the Mingming white ginseng, what would the customers of companies like isilu, Carl Zeith, Hendi, and Haichang do?

They would definitely run to Linlin-mingle's store to register.

This way, not only could he easily obtain the customer information of these companies, but it was also a form of hunger marketing.

What would be the effect of something with magical effects and hunger marketing?

It was naturally a huge benefit to Linlin pharmaceuticals, but it was a huge disaster for companies like isilu.

Cheng Dabao's face lit up when he saw the message and he immediately rushed out.

He had serious myopia. In the past, he was insensible. He had hidden under the blanket to read novels and play little tyrant for too long, so he gradually became nearsighted.

Once a person was short-sighted, it was basically impossible to recover. As time passed, the degree of short-sighted would always increase.

Therefore, he was wearing thick glasses now.

It was not that he had never thought of doing a laser surgery to treat his myopia.

However, he also saw that the doctor Who treated his myopia was wearing glasses. He was not a fool.

Fortunately, the first batch of Mingming white ginseng could be bought at Ming le's store, and he was a customer of Ming le.

the ming le glasses had always been cheaper.

It wasn't that the materials and quality weren't as good as the glasses like esolu and Henry, it was just that they weren't as famous.

Cheng Dabao didn't choose the Ming le glasses because they were cheap, but because he already knew the current state of glasses in the country.

He knew that the domestic glasses market was about to be monopolized by foreign glasses.

That was why he supported the domestic market.

On the contrary, his job gave him a high annual salary of at least 300000 Yuan.

On the other hand, his support for Ming le's glasses had become a huge benefit this time. He now had the opportunity to buy his first batch of Mingming white ginseng.

This was definitely good news for him.

With Linlin company's reputation, the Mingming white ginseng would definitely be effective.

Very quickly, Cheng Dabao arrived at a nearby Ming le store.

The store's name was also changed to Linlin-mingle.

The staff in the store had also changed into their work clothes with the words "Linlin."

As time was of the essence, the design, style, and color of the work clothes had been sent out by Ming le's headquarters. The store had gotten someone to custom-print them, so they were a little rough. They would only be issued by the head office in the future when they had time.

However, with the name Linlin, even if the clothes were crudely tailored, they still looked very high-class.

At least, that was what Cheng Dabao thought when he saw it.

Cheng Dabao was led into the store by a staff member. Mr. Cheng, please come in. We'll need to use your ID card to confirm our information. This is a request from Linlin pharmaceutical company.

Cheng Dabao nodded and took out his ID card. As the first person to buy the bright-eyed white ginseng, the more serious he was, the more honored he felt.

The store was already very lively.

It could be seen that many people, like Cheng Dabao, had already taken out their ID cards to confirm.

These people were either Ming le's customers like him or they were in a hurry to register their information.

It had only just started, but there were already a lot of people. After a while, the line would probably start.

This also showed how attractive the bright white ginseng launched by Linlin pharmaceutical company was, even if its effects had yet to be proven.

#### [Chapter 1076 It's Over, It's Completely Over](#)

Cheng Dabao's information was quickly confirmed.

The staff member also began to introduce the bright-eyed white ginseng to Cheng Dabao. He also gave him a list of information, which described the bright-eyed white ginseng.

Cheng Dabao took the list and looked at it.

The first thing was the price. The normal price was not expensive. One was only three times more expensive than a bottle of hidden glasses potion. Moreover, one could be used for ten days to half a month.

This was something anyone could afford.

The information stated that the treatment for this kind of common Mingming white ginseng would take four to five months, which was also the time stated in the news.

Next, Cheng Dabao saw an unexpected piece of information. In addition to the ordinary white ginseng, there were a few high-grade white ginseng and a few high-grade white ginseng.

However, there was a limited number of these bright-eyed white ginsengs, and he had to draw a lottery to have the chance to buy them.

The high-grade ginseng was naturally of Grade 2, while the high-grade one was of Grade 3.

Qin Lin had specially taken this out and it was only for this one time.

The purpose was naturally to let people know the effects of the Mingming white ginseng faster.

The effect of a Grade 1 mingmu white ginseng was too slow, but it was different for Grade 2 and Grade 3 mingmu white ginseng.

the mingming white ginseng didn't grow for long, and he could grow them quickly in the game. under the limited quantity, he could supply a batch.

Moreover, this was the only time he would sell it. He would not sell it again in the future unless he had to do some favors.

Naturally, Chu Yue would not ask about the things that Qin Lin had taken out. After all, he was not a fool.

Therefore, he just had to use this batch of Mingming white ginseng. He would limit the quantity if it was small.

cheng dabao was astonished by the effects of the high-grade and high-grade white ginseng.

the normal eye-clearing ginseng would take four to five months to recover, but the high-grade one only took two months, and the high-grade one only took less than a week to recover.

Recovering vision in a few days, wasn't this the advertisement for those myopia surgeries?

Naturally, the price of high-grade and high-grade bright white ginseng was much higher than that of ordinary ones.

the high-grade bright white ones cost more than 1000.

A high-quality ginseng for the purpose of improving eyesight would cost more than 20000 Yuan. Wasn't this the price of a hospital that performed a surgery that required a person to fly in seconds?

Wasn't this implying something?

Cheng Dabao immediately said to the store staff, "How do I participate in the lucky draw and obtain the right to buy these high-grade and high-grade bright white ginseng?"

the staff immediately brought him to a lucky draw box.

The lucky draw was very simple. It was done using a software provided by Linlin pharmaceutical company. The system would draw at random, and the participants only had to press "confirm."

After Cheng Dabao finished registering, he pressed "confirm" in front of a computer.

A moment later, the software jumped, and the lottery began. It only stopped after a few seconds.

congratulations, you've obtained the right to buy high-quality bright white ginseng!

Cheng Dabao was in disbelief when he saw the results. He clenched his fist and shouted.

High-quality vision-improving white ginseng. Does that mean that it can restore vision within a week?

"Mr. Cheng, congratulations!" The staff immediately congratulated him.

"Thank you, I'm so lucky." Cheng Dabao's face was full of joy. He decisively registered with the staff and paid more than 20000 Yuan. Now, all he had to do was wait for the Mingming white ginseng to be delivered to his door.

the same scene was happening in ming le's stores all over the country. ming le's customers all placed orders for ordinary ming ming white ginseng.

Of course, there were also lucky people like Cheng Dabao who had obtained the right to purchase a Grade 2 or Grade 3 bright white ginseng.

these people were naturally looking forward to the arrival of the bright and white ginseng.

Chu Yue had long prepared for this, and so had Linlin pharmaceutical. Hence, the delivery of the ginseng was not slow.

soon, people received their packages one after another.

Cheng Dabao was at work when he received the express delivery. For this reason, he took a special leave and went directly to the express delivery station near his home to pick up the express delivery, then hurried home.

Cheng Dabao immediately opened the express delivery and saw the bright white ginseng inside. There was also an exquisite card that gave instructions on how to use it.

Only three thin slices of this high-quality (quality 3) vision-improving white ginseng could be taken every day. If you exceeded that, the effect would not increase.

the effect of the eye's absorption in a day was limited.

There was also a hint on the card,"after consuming the high-quality eyesight-improving white ginseng, take a nap. You will be very surprised."

Apart from that, it also came with a very exquisite knife specially used to cut open white ginseng.

Cheng Dabao didn't hesitate. He decisively picked up the knife and washed it. Then, he cut a piece of ginseng that could improve one's eyesight and put it in his mouth. Then, he followed the instructions on the exquisite card and looked at it with anticipation.

He would think about it after he had a good sleep.

When Cheng Dabao woke up again, he said that it would be three hours later. But when he put on his thick glasses again, he was as shocked as the card said.

His vision had obviously recovered a lot.

"This effect is real." Cheng Dabao's face was full of joy. As expected, Linlin company was still Linlin company.

Based on the current effects, he would definitely be able to regain his vision within a week.

He knew that the short-sighted person would go crazy very soon.

This famous white ginseng could really treat myopia.

He was afraid that there would be no more short-sighted people in the country.

On the other side.

DuPaul had been waiting for the bright white ginseng.

For the entire day, he had been paying attention to the news about the Mingming white ginseng. He also knew that Ming le's store was very popular. Their customers of isilu must have gone to the other store to register their information.

he knew what this meant.

However, the key was that he had sent people to find a water Army to smear the White ginseng and even found experts to explain how the White ginseng was.

This was also a common tactic in the business world.

As long as there were many people who said something bad, there would always be people who were skeptical.

Who knew that it would be of no use? it seemed that no one believed them at all. Even the expert was being criticized badly.

It seemed that the people in this country believed in Linlin company.

This was not in line with the rules of the mall.

in their country, there was no company that could be trusted so much by the people.

At this moment, the person-in-charge from China came in hurriedly with a few packages in his hands. Mr. DuPaul, I've found Ming Bai's ginseng. I've asked someone to buy it from Ming le's customers. I've paid a high price for the high-quality and high-quality ones. Should I get someone to test it out now? "

DuPaul stood up in a hurry and said, " "I want to test it out myself."

He was also short-sighted. Only by using it himself would he have the greatest say and be able to react better to fight this war with Linlin company.

He still firmly believed that the news was exaggerating. After all, this was a common tactic.

"Mr. DuPaul, which level do you want to use?" The person in charge in China asked.

just use the best one, " said DuPaul without hesitation. if the best one doesn't have much effect, let's not even talk about the ordinary one.

the person-in-charge immediately opened the express delivery containing the high-quality bright white ginseng. in order to buy this ginseng, he had spent 100000 yuan.

The other party actually didn't buy anything below this price.

soon, a high-quality (quality 3) bright white ginseng was delivered to dupaul's hands, along with a cutting knife.

DuPaul also cut a piece of white ginseng and put it in his mouth.

After the initial bitterness, there was a sweet aftertaste.

The smell didn't attract DuPaul's attention. Instead, the warm and comfortable feeling in his eyes made him look serious.

This feeling was very comfortable, and it seemed like the bright ginseng was working.

The speed was too fast, how could it be effective in such a short time?

He had only eaten a small piece of ginseng that could improve eyesight.

DuPaul's face was gloomy. Just like Cheng Dabao, he followed the instructions on the card. He closed his eyes nervously and planned to take a nap to see what was going on.

A few hours later, DuPaul's face was pale.

He did not know what he was looking at.

After he woke up from his sleep, he could clearly feel the effects of the high-grade bright white ginseng!

His short-sightedness was not too serious, so the effect was f \* cking obvious!

The scene in front of him was clearly clearer than before he went to sleep.

that kind of image gave people a more comfortable feeling than the blurry feeling without glasses, or perhaps a sense of security.

However, this effect scared him and made him see the future of his company.

The result of experiencing it for himself made him feel powerless.

"it's over, it's completely over!" DuPaul looked dejected.

He already knew the status of Linlin company in this country. He couldn't slander or frame them.

Under such an effect, what other methods did they have to deal with the vision-improving white ginseng?

He had never felt so powerless before!

[Chapter 1077 Two Silver Drops Eliminated! How Do You Describe Luck? 1](#)

For the rest of the time, DuPaul completely locked himself in his room.

he had to think of a countermeasure.

However, no matter how many countermeasures he thought of, he found that it seemed to be useless in this country.

This was because the effect of the bright-eyed white ginseng was too strong.

If they were to resort to underhanded business tactics, the country's officials would not ignore them.

He knew very well that the country's officials would definitely be able to see that he had joined hands with companies like Carl Zeith to monopolize the market.

If he really used improper means, it would be equivalent to personally handing a knife to the other party and then using it to kill himself.

In the end, DuPaul couldn't come up with a way to deal with the bright-eyed white ginseng.

Finally, he thought of his country's market.

In the foreign market, he could use his own capital to push for the official blockade of information in his own country.

Their esdew had the capital to support the Council, and it was time to make use of it.

However, just as he thought of this method, he immediately thought of something else. If the other party was willing to sell the bright white ginseng to the West, as long as someone discovered the effects of the bright white ginseng, the seal would not last long.

Most importantly, losing the market for short-sighted glasses meant that their company's City Council would shrink significantly.

Knowing that they were in such a terrible situation, it was hard to say if the supporting parliament members would still maintain their current relationship with them.

The more he thought about it, the more annoyed and annoyed DuPaul became. He didn't understand why there was such an unreasonable thing as the bright white ginseng.

That night, DuPaul couldn't sleep.

When he woke up the next day, his expression was even uglier.

Because the scene in front of him had become clearer.

This meant that his vision had recovered a lot.

But now, he really didn't want his vision to get better. Instead, he wanted his vision to get worse.

This way, he could deal with the bright white ginseng.

Soon, DuPaul met with the person in charge of eslu in China.

It was the other party who had come to report the situation in a hurry. Mr. DuPaul, the situation is not good. The ordinary white ginseng has no obvious effect, but the high-grade white ginseng has shown obvious effects after one night.

"en!" DuPaul nodded weakly and asked, "How's the situation with the Mingming white ginseng?"

When the Chinese representative heard this question, his expression turned ugly and he said, "Mr. DuPaul, the effect of the bright white ginseng has been spread out. Those who bought high-grade and high-grade bright white ginseng have been sharing its effects on the internet since early morning. I'm afraid the bright white ginseng is unstoppable now.

"That means there's no other way." DuPaul continued to sigh.

His mind was in a complete mess.

He had never thought that he would one day face such a helpless situation.

He had spent more than ten years to take over the glasses market in this country.

However, just as his Kingdom was about to be unified, a meteorite fell and a huge earthquake destroyed his Kingdom.

Now he finally understood that Ming le had sold him the factory, equipment, and materials so easily, but it was all a trap.

However, he was so immersed in the joy of victory that he knew nothing.

Suddenly, DuPaul asked, "Can we be the agent for the bright-eyed white ginseng?"

"Eh!" The domestic representative was suddenly stunned.

He understood that his boss's mind was probably in a mess for him to ask this question.

But who could do anything against an unreasonable company like Linlin company?

Those who were unlucky were the ketchup companies, the two big colas, and the sports drink companies.

Before Linlin company launched tomato sauce, Linlin leisure tea, and Cola fruit, which of these foreign companies weren't behemoths that controlled most of the country's market?

However, what happened to these companies after Linlin company launched these products? They were still unable to resist.

Now, the two Cola companies could only bitterly support themselves by crazily lowering their prices. Their selling prices were now worthless.

With the sales of the fruit juice, the stock prices of the two Cola companies fell sharply again.

Now, it was just their glasses company.

history seemed to be the same again.

However, he couldn't disobey DuPaul's order. He picked up the phone with a frown and asked someone to find the contact information of Linlin pharmaceutical.

isilu was a big company, and their investigation ability in this area was very strong. they quickly found the phone number of chu yue, the person in charge of linlin pharmaceutical.

Of course, the main reason was that Linlin pharmaceuticals had a lot of business with the hot spring elixir. Chu Yue's public number was not a big secret, so he could always find it with some connections in the business circle.

The person in charge in China also called Chu Yue's phone immediately.

As soon as the call went through, he asked, " Hello, director Chu. I'm Zhong Fei, the person in charge of esdew in China. I'm representing the chairman of esdew, Mr. DePaul. I'd like to make an appointment with you to see if you can talk about the distribution of the bright white ginseng? "

"I'm sorry, the headquarters has decided that the Mingming white ginseng will not be sold overseas for the time being." Chu Yue didn't expect that the people from isilu would call him.

He hung up after saying that.

The people from this foreign company were also interesting. They were arrogant and domineering when they occupied the domestic market, but once they saw that the situation was not right, they were thick-skinned enough to come to their door.

Zhong Fei sighed after Chu Yue hung up on him.

It was within his expectations.

Therefore, he could only report the truth, " "Mr. DuPaul, the other party has no intention to authorize the agent from abroad. They hung up the phone."

#### [Chapter 1078 How Do You Describe This Thing Called Luck? 2](#)

"What right do they have?" When DuPaul heard the news, he became angry and despaired. He kicked the chair next to him and sent it flying.

...

Linlin Manor.

Qin Lin also paid attention to the news about the Mingming white ginseng again.

After releasing a batch of Grade 2 and Grade 3 Mingming white ginseng, the effect was indeed very quick. Now, the popularity on the internet had completely exploded.

In other words, the overall situation was set.

At least in China, with the leader's words conveyed by Minister Lu, the glasses companies abroad could not make any waves at all.

you want to use improper means? From above, he could easily press it down.

Therefore, he didn't need to put his mind on this anymore. He would just leave it to Chu Yue.

If he had to worry about this, he would have to consider whether Chu Yue was qualified to be the person in charge.

However, after watching a few news videos, Qin Lin realized that something was wrong. The bright-eyed white ginseng was already so popular, but it was not in the top three of the hot search list.

This should not be the case.

With Linlin company's popularity and the bright white ginseng, what other major event could push them out of the top three Hot Searches?

He took a look at the trending Searches and was shocked by the news of the top three.

No wonder.

This was news about a certain snowy assassin hiring a Hitman to shoot a Big Shot with the character 'an' in order to reduce the popularity.

Looking at the miserable state of the big boss who started with the word "an," Qin Lin inexplicably had the urge to laugh.

Of course, he wasn't gloating. He was just happy that the Mingming white ginseng had been successfully promoted.

Qin Lin's mood suddenly became better. Just as he was about to continue browsing the news, something suddenly appeared in his mind.

At the entrance of the farm, the dwarf, ah ni, appeared once again.

He was overjoyed. This guy was probably here to deliver farm equipment. He quickly controlled his character to appear in front of ah ni.

However, the bug had appeared again, and he only received one notification:

[ the dwarf ah ni seems to have something to give you, Yingluo! ]

Then, there was no further explanation.

obviously, this should be another plot mission outside of the game, so he had to enter the game himself.

Qin Lin locked the office door and entered the game with a thought. He saw the dwarf ah ni.

"These two things are very heavy, hurry up and take them away!" Ah ni also spoke up at this moment.

The real world was different from the anime. The dwarf ah ni was holding two silver Farming tools in his hands, an axe and a hoe.

Axes and hoes were meant for normal humans, but they were too big for dwarves.

Qin Lin immediately took the hoe and axe.

The two farm tools were silver in color and had a special pattern on them. These patterns seemed to be some kind of mysterious runes.

At the same time, he also saw the attribute remarks of the two farm tools:

[ silver hoe: special! ]

[ this is a special tool made by the dwarven craftsmen. It's more efficient to dig! ]

[ silver axe: special ]

[ this is a special tool made by the dwarf craftsmen. It is very sharp and more efficient to cut down trees! ]

The note was simple.

According to the game's mechanics, it wasn't easy to be more efficient. The hoe could only dig one plot of land at a time, but with this silver hoe, he could dig four plots.

Moreover, mining could also increase the probability of finding good stuff to a certain extent.

Although it couldn't be compared to the Blessed hoe, it was always a good thing to increase the probability.

It was the same for an axe to cut a tree. Originally, it would take a few strikes to cut a tree down, but with a silver axe, one strike was enough to cut the tree down.

Alright, I've given you the farm equipment I promised you. I'll go back first. I'll come and find you again. After ah ni handed over the two silver farm tools to Qin Lin, he also left.

Qin Lin also exited the game with a thought and returned to reality.

When he looked at the game screen again, there were already two more farm tools in his backpack.

Qin Lin took out his silver axe and controlled his game character to go directly to the goddess mountain. He had not cut down the trees that had spawned today.

Very quickly, he controlled his character to find a new tree.

In the past, when he controlled his game character to cut down a tree like this, he had to cut it several times.

This time, he controlled his game character and cut down the tree in a short time. There was a pile of wood on the ground for picking up.

This was efficiency.

With the special attributes of the game, the silver axe could theoretically cut down any tree no matter how big it was.

Qin Lin suddenly had an idea.

Did the silver axe have such an attribute in real life?

As he thought about it, Qin Lin entered the game with another thought and appeared at the place where the trees in the game refreshed.

Unlike the game's screen, it wasn't just a few trees that would refresh here. It was a real forest, surrounded by dense trees.

Qin Lin appeared in the game with the silver axe in his hand.

He held his silver axe and walked towards a tree. The tree in front of him was about as thick as a human thigh.

He immediately raised his axe and chopped down at the big tree.

In that instant, he clearly felt the patterns on the silver axe shake.

Then, the blade of the axe cut into the tree and cut horizontally. The cut was smooth.

hualala!

The trees collapsed instantly, and the leaves fell all over the ground.

Qin Lin looked at the axe in his hand in surprise. It was really awesome. It could be cut in half with one strike.

Moreover, at that moment, when his axe cut through the trees, it was as if the trees were soft soil and did not pose much of a hindrance.

This meant that he could still cut down thicker trees.

Therefore, Qin Lin walked forward again and found a big tree that was twice as thick as an adult's thigh. He went forward and swung the axe again. It was still very clean and the cut was neat.

Hualala!

The trees collapsed, and the leaves fell like rain.

He found an even bigger tree and chopped it down with the same axe. It was still a flat cut, and it was still chopped down.

"This is a little awesome!" Qin Lin's face was full of surprise.

According to the attributes of this silver axe, he could pass off as a martial arts expert in ancient times.

Even the experts in wuxia TV series couldn't cut down such a big tree with one sword strike, right?

As Qin Lin thought about it, he found a few more trees to try. Almost all of them could cut down a big tree with one axe.

He wondered what would happen to a human body.

It was a pity that the real world was so peaceful that the silver axe was completely useless. It had appeared at the wrong time.

Qin Lin played for a while and then exited the game. He controlled the game character to leave goddess mountain again.

he was more concerned about the silver hoe than the silver axe.

This was because the silver hoe was clearly more practical to him.

There were no new plots of land available, so there was no way to test the attributes of digging four plots of land at once, unless there was a special plot mission.

However, mining alone was a great help. Mining was also more efficient, and there was a higher probability of obtaining good items.

Most importantly, if he could dig out the curse attribute and turn the silver hoe into a cursed hoe, he would be able to fly.

If he used the cursed hoe to repent in the church, it would become a blessed hoe. Then, he could dig up some special items that could only be found with the Blessed hoe.

For example, flying stones, goddesses, Kappa sculptures, mysterious ancient skeletons, extraterrestrial remains, and special relics of civilizations.

With that thought in mind, Qin Lin controlled his game character to go to the lake mine. When he reached the 41st floor, which had not been dug yet, he controlled his game character to start digging.

Sometimes, luck was something that couldn't be explained. It was better to play a game. You might spend tens of thousands of dollars to get A +12 Wing and still fail. Sometimes, you could just casually click on it and it might directly become +12.

This time, Qin Lin controlled his game character to start digging on the 41st floor. He saw that four squares of the lake mine had been dug out, and one of the squares flew out a cloud of black gas, which then wrapped around the silver hoe.

He also received a notification in his mind:

[ congratulations, you've discovered a curse attribute. Your farm equipment has undergone a bad change! ]

"A one hit kill?" qin lin was really surprised.

### [Chapter 1079 ! Special Space Ground And Magical Vines](#)

Qin Lin could only say that his luck was unparalleled.

He had just gotten the silver hoe and had been thinking about the curse attribute. Who knew that he would get the curse attribute after the first dig?

In the game, the silver hoe in the game character's hand had completely turned black.

He continued to control the game character to dig, and he got a notification:

[ your farm tools have undergone a bad change. Any further digging will be affected! ]

...

[ unfortunately, you've dug up a diamond ore, but it has been negatively affected! ]

...

[ unfortunately, you've dug up a piece of gold ore, but you've been affected badly! ]

Qin Lin dug a few more times, but after seeing a series of notifications, he stopped digging. Instead, he controlled his character to go back to the farm.

Then, he entered the game with a thought and saw the remarks of the hoe, diamond ore, and gold ore:

[ cursed hoe: mysterious ]

[ this is a cursed hoe. When digging, it will produce very bad changes. You need to go to the church to repent and turn the curse into a blessing! ]

[ affected diamond ore! ]

[ this is a diamond ore affected by an unknown force. It has been contaminated and has no value. ]

[ affected gold ore! ]

[ this is a gold ore affected by an unknown force. It has been contaminated and has no value at all. ]

As expected, it was already a cursed farm tool.

Moreover, the items dug out by the cursed hoe were all affected by the curse and had no value.

After Qin Lin saw these remarks, he logged out of the game with another thought. He looked at the game screen again and controlled the game character to go to the church in ore town.

Since he was so lucky to have cursed farm tools, he had to turn them into blessed farm tools immediately.

to turn cursed farm equipment into blessed farm equipment, one had to go to the church and ask a priest to pray.

To go to the church to pray, one also needed to talk to the church priest Carter a certain number of times, and have a certain favorable impression of him.

The good thing was that Qin Lin had often controlled his game character to talk to all the NPCs in the town in order to trigger the plot mission. He had also visited Carter's Church many times.

Moreover, in order to try to trigger the plot quest, he also regularly delivered crops to the various NPCs in ore town, hoping to trigger the quest through this method.

Although it was just a waste of effort and he did not trigger any plot quests, sending items to NPCs would increase their favorability.

However, he often gave Carter things, so he had a good impression of him.

Therefore, his luck today was obviously very good. Everything was going smoothly, and everything seemed to be coming to his door.

It was likely that many people would feel this way at a certain point in time.

When Qin Lin controlled his game character to click on Carter, he received a prompt:

[ Oh my God, what's wrong with your hoe? [ I can feel a very bad power. Do you need me to pray for you before God? ]

Qin Lin naturally chose yes.

Then, in the game, his character gave the cursed hoe to priest Carter.

Carter took the cursed hoe to the statue and began to Mutter.

He didn't know what he was mumbling, but there was only a string of ellipses above Carter's head. When he controlled the game character to click on it, it was a prompt that Carter was praying!

Clearly, the prayer needed some time.

so, qin lin let his game character wait in the church. he snapped back to reality and took out his phone to read the news again.

As soon as he turned on the messenger, news about the Big Shot who started with the word " an " popped up again. This news was very hot, and there were many comments.

However, after watching a few videos, he found two of them related to him interesting.

One of the videos was popular. It was about a new novel. The introduction was like this: I was the Prime Minister of a country. After being assassinated, I transmigrated and became a slave.

The other video was about a celebrity.

It seemed that after the incident with Mr. An, celebrity Wang had failed to make the headlines again. Therefore, some netizens had counted the various incidents that had happened in the past few years to prevent this celebrity Wang from getting promoted.

It seemed that once this celebrity with the surname Wang wanted to make the headlines, something big would definitely happen. It was as if he was a prophet of big events.

Just as Qin Lin was looking at the hoe happily, he heard a prompt in the game. Carter had finished his prayer and returned the hoe to him.

[ it's really unbelievable. Not only did the prayer dispel the bad power, but it also transformed into a special blessing power. It's really unbelievable! ]

[ congratulations, you have received a brand new blessed hoe! ]

Qin Lin saw the notification and smiled. He quickly controlled his game character to leave the church and return to the farm.

With a thought, he entered the game again and looked at the attributes of the Blessed hoe.

[ blessed hoe: mysterious ]

[ this is a special hoe. It has received a special blessing. Not only does it have a higher digging efficiency, but it can also dig up some very special things! ]

Qin Lin looked at the note and exited the game again.

There were still some levels left in the lake mine that had yet to be dug. Wasn't this blessed hoe just in time?

He looked at the game screen again and controlled his character to head to the lake mine. After entering the 41st floor, he continued to dig.

This time, Qin Lin felt that something was different. In addition to being able to excavate four plots of land at once, after the 41st floor of the mine was excavated, the amount of gold ore, silver ore, and diamond ore had obviously increased.

### [Chapter 1080 Special Space Land! Magical Vines! 2](#)

42nd floor!

Level 43!

he continued to dig, but it seemed that other than gold, silver, copper, and diamond ores, he did not find anything special.

When he reached the 44th floor, he had only dug half of the mine when a different special notification appeared:

[ congratulations, you have excavated a special outer space meteorite (no harm)! ]

Qin Lin's eyes lit up when he saw the notification.

He had finally dug up something special.

Space meteorites should belong to the category of 'blessed hoes' that could excavate extraterrestrial remains, right?

This was the first special item that the Blessed hoe had found.

Qin Lin quickly returned to the farm and entered the game with a thought. He saw the meteorite's attributes.

[ meteorite from outer space: special! ]

[ this is a special meteorite from outer space. It fell from the sky and smashed into the sea. The sea water washed it into the ley lines where the lake mine is located. After many years of deposition, it no longer has radiation and can be used for special land transformation! ]

From the remarks, it seemed that this meteorite from outer space did not have any special effects.

However, he suddenly thought of the special land where his character had leveled up but had not yet leveled up.

To upgrade that special land, he needed special materials. Before this, he had not been able to find any materials to upgrade that land.

now that this meteorite could be used to transform the land, could it be used as a material to upgrade this special land?

Thinking of this, Qin Lin exited the game again and controlled the game character to go to the land. Then, he clicked on the land upgrade and then clicked on the upgrade to that special land.

This time, a different notification appeared.

[ would you like to use this meteorite to upgrade the land? ]

Qin Lin's eyes lit up. Sure enough, it was possible. Of course, he chose "yes."

The land that had not been able to level up before could be leveled up in such an unexpected situation.

The next moment, a notification that the special land was being upgraded appeared.

The land upgrade this time was completely different from the previous ones. There was an animated scene, and there were even stars and space.

When the animation ended, a special piece of land appeared in the ranch.

At the same time, Qin Lin also saw the name of the land on the game screen: Space!

This was a piece of space land that carried some special space soil attributes, which could grow special plants that had undergone space mutation.

Qin Lin didn't quite understand this information.

However, when the land was upgraded, new seeds would appear.

Therefore, Qin Lin immediately controlled his game character to go to the seed shop in ore town.

He clicked on the NPC, and a new planting catalog appeared. It was called the space Seed.

He controlled his game character to click in and received another prompt: Seeds in space were extremely rare, and a certain amount of luck was needed to buy new seeds.

The next moment, he clicked on the table of contents.

There was only one seed inside, the [ evolved space vine ]!

Qin Lin didn't know what the mutated space vine was, but he would definitely buy it whenever something new appeared.

moreover, the mutated space vine was a seed with a star.

After Qin Lin bought the seed of the mutated space vine, he immediately controlled his game character to go back to the farm. At the same time, he entered the game to check the attributes of the mutated space vine.

[ mutated space vine: special! ]

[ this is a vine that has been mutated in outer space. It has a special function. It can absorb light during the day and has a special effect on cells. It also emits a special fluorescent light at night. The time ratio is: Soft fluorescent light +1, fluorescent makes people calm +1, light +1, appreciation +1, growth speed +1! ]

[ restrictions: as it is a space mutant plant, it has high environmental requirements. it can only adapt to the environment once, and it will be difficult to survive if there is a slight change in the environment! ]

Qin Lin saw the remarks and finally knew that the mutated space vine was a special item. It could only be planted in such a special land.

This thing was a little awesome.

There were many fluorescent plants, but they could only light up in the dark. However, the brightness was limited, and most of them were dangerous.

However, this mutated space vine could absorb sunlight and emit fluorescent light at night. It had a light +1 attribute. This was probably not smaller than the light from a street lamp, right?

The most important thing was that this fluorescent light was harmless.

Moreover, apart from this, there were also +1 soft fluorescent light, +1 serene fluorescent light, +1 appreciation. Not only could people appreciate it, but it was also suitable for people to take a nap and play.

The mountain behind the villa was being developed to build a cable car project and a mountain-climbing project. At the top of the mountain, greenhouse trees would be planted and a sunrise Project would be developed.

If he had the space mutant vine, he could plant it all over the mountain. It would make the entire Mountain Glow with a kind of fluorescent light, and it would be a beautiful scene at night.

most importantly, this thing also had an attribute of +1 growth rate, which made it very fast to cultivate.

Moreover, the most important point was that it was limited by the environment. The requirements for the environment were very high, and they could only adapt to the environment once. If they were to cultivate and transplant again, it would be difficult for them to survive if there were any slight changes to the environment.

He thought of the Xiangshui tribute rice.

The requirements for this thing to the environment were probably even more demanding than Xiangshui tribute rice.

In other words, the seed could only be planted wherever he brought it out.
