

The Game 1081

[Chapter 1081 Special Space! Magical Vines! 3](#)

It was actually better to have this attribute. It was also a good attribute for preventing theft, cultivation, and transplantation.

Qin Lin controlled his character to go to the space and began to plant the mutated space vine in the space.

The mutated space vine had a growth rate attribute of +1, so it was certain that it would grow very fast.

to qin lin's surprise, only an hour had passed in the real world, and the news of the mutated space vine had already appeared.

This speed was indeed a little fast.

Qin Lin waited for a while before entering the game. He then looked at the scorching sun above the farm.

The mutated space vine could absorb light during the day and emit fluorescent light at night. Now that it had come in later, it must have absorbed a lot of light.

Qin Lin walked toward the space and saw the mutated space vines. They were no different from common vines, just that their stems were thicker.

The bamboo poles that had been refreshed by the system were already standing on the space ground. At this time, the mutated space vines were wrapped around the bamboo poles.

when qin lin got close, a dwarf came over too. he was wearing yellow clothes. it was goldie.

Goldie deliberately circled around Qin Lin, as if it was deliberately letting Qin Lin see it. Then, it ran behind him and said, " "Boss, make way, I'm going to work!"

Why did he look like one of those office workers who would do their best to show off when their boss came?

it was as if he wanted to express that he was working hard.

Goldie approached the mutated space vine and began to harvest it.

A moment later, Qin Lin brought a space vine into the ranch house. He closed all the doors and windows, drew the curtains, and blocked all the light from entering.

In this way, there was no light coming in from all directions. However, with Qin Lin as the center, a soft fluorescent light began to spread in all directions.

It was the mutated space vine in his hand.

Moreover, the fluorescent light was very bright. It actually lit up the entire area in an instant. The light was not much weaker than the light.

This kind of light could actually be used as a street lamp in many places.

Moreover, the fluorescent light was very beautiful, which was A +1 appreciation attribute.

Under this fluorescent light, Qin Lin also felt a sense of tranquility, which was the effect of the +1 tranquility attribute.

He was more and more certain that when the mountain opened, if he planted this thing, it would definitely be a very unique and unique Mountain View amusement park.

...

In the mountains, a group of people were seriously searching.

Because the meteorite was too important, Captain Tang and the others didn't dare to slack off. However, other than finding a meteorite at the entrance, they didn't find anything else during this time.

They had been divided into three teams. One team was searching up the mountain, one team was searching to the side, and the last team was searching in the valley.

The valley was located on the east side of the mountain, and it was also a special terrain.

When Captain Tang entered the valley with his men, he gradually realized that something was wrong.

In particular, a member holding a special device reported, " "Captain Tang, there's an SMC value here."

" Space material composition " was an abbreviation for Space material composition.

These things were often carried in meteorites and would not dissipate easily. They would change and integrate into the surrounding land environment. Some special materials in space might not dissipate even after hundreds of years.

Therefore, scientists from all over the world developed an instrument that could detect the PMC value.

It was precisely because of this monitoring that scientists from all over the world were able to confirm whether some places were space meteorite ruins.

From time to time, mutated space meteorites or plants would be discovered in these places.

This time, they had brought this device because academician Li had read about the celestial stone landing in your city in the county records.

The heavenstone was a meteorite, and the meteorites were probably formed from that meteorite.

Now that the instrument had detected the Valley's PMC value,

This meant that a meteorite had fallen here before, and this Valley might have been formed by that meteorite.

[Chapter 1082 The Seed Was Found In The Valley! 1](#)

In the valley.

Captain Tang and the others were already a little busy. They began to order people to search the surroundings.

There was an PMC value here, indicating that there had really been a meteorite here. The special space material had integrated into the surrounding environment, so the PMC value could still be detected.

Naturally, he didn't expect to find a meteorite. After all, in ancient times, there were records of the descent of a celestial stone. This celestial stone must have been taken away by someone long ago.

In ancient times, these heavenstones were either regarded as auspicious signs or disasters. Most of the time, they were used to forge something to represent a certain special meaning.

In ancient times, many diseases that destroyed towns were actually carried by meteorites.

Some meteorites carried radiation or viruses.

the ancient people didn't know about this, so they took it away directly and even showed it to the crowd.

then, it cooled down.

However, this discovery confirmed academician Li's speculations.

The meteorites were indeed brought here by meteorites.

Now that they found out that the meteorite had fallen in this Valley, they could only hope to find another meteorite here.

At the same time, Captain Tang also informed academician Li.

Academician Li was the person in charge, so he had to report this situation.

...

Linlin Manor Office.

Qin Lin exited the game with the mutated space vine in his hand.

Without a doubt.

If the mutated space vines could be planted in the mountains, and there were enough of them, the entire mountain would be surrounded by fluorescent light. At night, it would definitely be as magical and beautiful as a fairy tale.

Many tourists would go into the mountains at night, and this fairy-tale fluorescent forest must be very romantic.

When the time came, this mountain would be called 'fairy tale mountain'.

naturally, in order to develop the mountain, in addition to the mountain path, many activity areas had to be opened up in the mountain.

When that time came, with the Sunview area and the cable car in the greenhouse area on the top of the mountain, the tourism and fun of the entire mountain would definitely not be any less than that of Linlin villa.

However, there was a problem.

space plants were very rare, and humans had not even discovered any space plants yet.

The existing space plants were also the result of humans bringing their seeds into space and mutating them after being affected by some space matter.

The mutated space vine was a seed that had undergone space mutation in the game. After it was planted, there would definitely be some space-element substances in it, which were not available on earth.

These substances were more or less found in space crops.

If they were to be slightly tested, they would be exposed.

Just as Qin Lin was thinking about this, he heard a knock on the door.

He opened the door.

Academician Li came in with a face full of joy. boss Qin, let me tell you some good news. Captain Tang and the others have detected an PMC value in a Valley.

in other words, the meteorite recorded in the you City County records might have fallen into that Valley. Maybe we can find more meteorites there.

"Do you want to go and take a look? Perhaps there are some mutated plants in the valley." academician Li sent out an invitation.

This was out of courtesy and respect for Qin Lin, the host. After all, he had already recognized Qin Lin's scientific research ability in crop cultivation.

That was why he had invited them.

"Mutant plant?" Qin Lin's eyes suddenly lit up.

Wasn't this a great opportunity?

It was not good to take out the mutated space vine directly as it would be detected. Who knew if someone would secretly take some and test it when it was really planted in the mountains?

Or perhaps, this would definitely happen.

Now, it seemed that the problem was solved.

He and academician Li went to the valley and found some seeds by accident. They used these seeds to grow the mutated space vine.

Isn't that reasonable?

However, the meteorite really did exist, and it had once landed in the mountains near the villa, which was unexpected.

qin lin immediately replied,"academician Li, did you really find the place where the meteorite fell?" I really have to go with you, but I have to go home first. Academician Li, you might have to wait for me. "

"that's no problem." academician Li smiled.

The two of them left the office together.

Academician Li was waiting in the lobby.

Qin Lin went back to the inner area.

He was going to enter the game and take out some mutated space Vine Seeds.

When the time came, he would find an opportunity to say that he found the seeds in the valley. He could also throw a few in the valley so that the mutated space vine could grow in the valley. That would be more convincing.

Entering the inner area of the manor, he saw Xiao Wu, the parrot, forcing Xiao Bao, the parrot, to a corner, as if they were discussing and playing something.

The two guys noticed Qin Lin and stared at him in unison.

Qin Lin didn't have time to care about the two parrots. He went straight to the dedicated workshop and controlled his game character to go to the seed store in ore town to buy some more seeds of the mutated space vine.

After controlling his game character to return to the farm, he locked the door and entered the game with a thought. Then, he took out the seed of the mutated space vine that he had bought.

Just as he was about to exit the game, he thought for a moment and took out a meteorite.

In order to be safe, he planned to use other things to attract the attention of Captain Tang and academician Li.

Qin Lin walked out of the workshop with the profound insect stone and directly said to Xiao Wu, the parrot, who was still playing in the corner, "Xiao Wu, come over for a moment. Help me throw this stone back into the valley of that mountain. Do you understand the valley?"

[Chapter 1083 The Seed Was Found In The Valley! 2](#)

Xiao Wu turned around, looking at the profound insect stone on the table, complaining: "Master, it's very tiring. Can I not go now? Can't you see that I'm still busy?"

"It's fine if you don't want to go," Qin Lin sneered. "When I come back, I'll send little treasure back to his previous owner."

"No!" Xiao Wu immediately pounced over, staring at Qin Lin like a tiger watching its prey: "You can't do this!"

Qin Lin pointed to the meteorite on the table and said, "This time, you can't be lazy. You must leave it in the valley."

Before Captain Tang and the others found a profound insect stone at the entrance of the mountain, needless to say they knew that Xiao Wu this guy was lazy.

hey, this is exploitation! This is a threat! Xiao Wu unwillingly grabbed that profound insect stone, flapping her wings and flying out of the manor.

At this moment, little treasure flew over and landed on the table. He stared at Qin Lin and called out anxiously, "I'm not sending it back, I'm not sending it back,"

Qin Lin laughed when he saw how anxious this guy was. "Alright, I won't send you off. I'm just scaring Xiao Wu."

He also didn't know if this little treasure now liked the real life, or if he'd been tamed by Xiao Wu and couldn't leave, didn't he have an illness called Stockholm Syndrome?

she remembered reading a news article about a handsome man being raped by an auntie in a bar. he was even imprisoned for the whole day and had done it continuously.

Later on, the handsome man married the Auntie, lived in a luxurious villa, drove a Lamborghini, and had two mistresses.

When this handsome guy's story was exposed, he insisted that he had Stockholm Syndrome.

After Qin Lin was ready, he also left the northern area and found academician li. They got into a car and went to the mountain.

To be honest, academician li was the person who lived in the manor the longest.

At first, academician li wanted to treat his illness and recuperate. Later on, he had the opportunity to recuperate, so he sat down.

But now, because of the nightmare stone, he was the person in charge, so he continued to stay.

The car stopped at the foot of the mountain.

Next to it was the construction site of you city.

The foundation of the cable car station had been built, and there was still a pillar Foundation.

Not far away, there was the foundation of a reception hall.

If fairy tale mountain was opened to the public, tourists would have to buy tickets at the reception hall again. Besides, the cable car would also have to go through the reception hall.

After getting out of the car, Qin Lin and academician li went into the mountains.

Under the guidance of the people arranged by Captain Tang, they walked towards the valley.

At the same time, in the sky above the valley, a parrot had already flapped its wings and flew in.

Below.

Captain Tang was seriously searching every inch of the valley with his men and did not notice the approach of a parrot at all.

Xiao Wu looked at the valley below and the people searching, knowing that this was the place her master had spoken of.

It didn't hesitate. It landed on a tree beside the valley and released its claws.

the meteorite fell and rolled into the river below.

The mission was completed, and it did not stay any longer. It flapped its wings and flew back in the direction of the manor.

It could not let its little baby wait for too long.

not long after.

Qin Lin and academician li entered the valley.

Captain Tang put down his tools and hurried to the two of them. "Academician li, boss Qin is here too!"

Qin Lin nodded in response.

"Captain Tang, what's the situation?" academician li asked.

Captain Tang explained, " the SMCs have checked. This Must Be the Place where the meteorite fell, but the meteorite can't be found. It should have been taken away a long time ago. So, the SMCs that integrate into the surrounding environment are not strong.

"Let's go and take a look!" Academician li nodded and followed Captain Tang.

Naturally, he knew the SMC value.

Some special space materials were very difficult to dissipate and could exist for hundreds of years after blending into the surrounding soil environment. The highest record was thousands of years.

this was the special stability of some space materials. otherwise, it would not have existed under the super high temperature of friction when the meteorite fell.

As academician li and Captain Tang walked in, they didn't forget to say to Qin ran, " "Boss Qin, take a look first."

qin lin couldn't wait to see this. when academician li and captain tang left, he also walked around the valley, not forgetting to take out a seed from his pocket from time to time.

it was the seed of the mutated space vine.

After throwing some, he pretended to walk to a remote Bush and squatted down. He took out all the seeds from his pocket and pretended to be looking for something.

After academician li finished talking to Captain Tang, he really thought that Captain Tang was looking for something. He asked, " "Boss Qin, what are you looking for?"

Qin Lin took the opportunity to open his hand and handed the seeds to academician li. " academician li, look. i found these seeds. i just gave out some dead vines. these seeds should belong to the dead vines. "

I've checked these seeds and found that they're a little strange. Their appearance and texture don't seem to be the type of seeds that the current vines should have.

so, I plan to bring these seeds back to try planting them.

Qin Lin's words had a loophole.

If academician Li had more time, he might have been able to find something.

However, at this moment, a staff member holding an instrument shouted excitedly, " Captain Tang, academician Li, there's a discovery. The device detected another meteorite.

"Where is it?" Academician Li didn't care about Qin Lin anymore. He ran over with excitement on his face.

Meteorites were an important and rare material that every country was looking for.

Moreover, this thing could not be regenerated.

The 5kg record had probably been used up by the various countries.

They had already found one in the mountain, and now they had found a second one. It was definitely a huge harvest.

If the Western countries knew about this, they would be envious.

Captain Tang was already calculating on the screen of the instrument.

"Academician Li, the meteorite is in the river. We'll immediately get it out of the water," he said after academician Li arrived.

"En!" Academician Li immediately looked at the river.

Captain Tang took his men and started to move. First, he measured the height of the river.

The river was still a little high, so they had to bring diving gear to fish.

Captain Tang personally led his men into the river, and they were soon submerged in the water.

Qin Lin also came over and saw the scene of Captain Tang and the others busy in the river.

Why did Xiao Wu throw the meteorite into the river? wasn't it increasing the difficulty of Captain Tang's search?

But Xiao Wu this time could be considered to have done pretty well, not slacking off.

With the help of the meteorite detector, the salvage this time still took more than an hour before Captain Tang and his men disturbed the meteorite.

hurry up and get the equipment, " academician Li immediately said. let's check if it's a meteorite.

While academician Li was talking, the equipment was already assembled.

Academician Li immediately started the test, and he couldn't help but excitedly say, " haha, it's a meteorite. We've found another meteorite. Captain Tang, you've done a great job again.

Captain Tang and the others also showed joy on their faces.

Sure enough, he found a place to start at the place where he had fallen.

Academician li then said, " Captain Tang, you guys continue to search for it. I'll put this meteorite in a safe place and take it back. I'll report to Minister Lu and the higher-ups.

"Okay, academician li." Captain Tang nodded and asked someone to bring a container to put the meteorite in. He then asked someone to send academician li and the meteorite back to the manor.

Qin Lin naturally left the valley with them.

He deliberately swayed his seed in front of academician li and said, " academician li, do you think there'll be a surprise with this seed? "

His plan could be considered to have been completed perfectly.

After returning to the manor, academician li immediately went back to his room to report the good news to Beijing.

After he finished his report, he came out of the room and went down to the living room. He saw that Qin Lin had already prepared flower pots and was filling them with soil. It was obvious that he was going to plant something.

He thought of the seeds that Qin Lin had found in the valley and said, " "Boss Qin, are you planting the seeds we found in the valley?"

[Chapter 1084 The Effect Of The Fetus-Beneficial Factor! This Child Might Be A Genius!](#)

qin lin saw academician li coming over, so he immediately nodded and said, " that's right. I just checked the seed again and found that it is indeed a little different. I just don't know what it will look like when it is planted.

Academician li was in a good mood. He smiled and said, " "How do I do it? I'll help you!"

"Just fill the flower pot with soil normally," Qin Lin said with a smile.

Academician li nodded and helped Qin Lin fill the pot with soil. He smiled and said, " "Boss Qin, we found another meteorite in that Valley. Maybe this seed can also give you an unexpected harvest."

qin lin smiled. " then i'll take your blessings. if there's an unexpected harvest, then it's all thanks to you, academician li. "

The mutated space vine was definitely an unexpected harvest. Academician Li's jaw would probably drop.

Qin Lin filled the flower pots with soil. There were dozens of them in total. Then, he placed the flower pots in an area in front of the hall and planted the seeds of the mutated space vine into the flower pots one by one.

After that, academician li and Qin Lin started talking about the meteorite.

It could be seen that he was very happy to find two meteorites in a row in that mountain.

After the mutated space vine was planted, Qin Lin watered it pot by pot. After that, he just had to wait for the mutated space vine to grow.

however, qin lin's family was a little nervous.

This was because Zhao Mo was about to give birth.

It was his first time being a father. Even though Qin Lin knew that there would be no problem if he kept feeding Zhao Moyan with fertility-enhancing factors, he still slowly felt a sense of tension.

...

Time passed by quickly.

The development of fairy tale mountain and the promotion of the Mingming white ginseng were all progressing in an orderly manner.

Outside Linlin Manor's recovery room.

Qin Lin was waiting outside nervously.

Because Zhao moyin was about to give birth, he had been waiting outside for a long time, and he finally experienced what it was like to be a father-to-be outside the delivery room.

The fertility room in the manor was finally put to use.

Tang xiuwan was helping the county hospital's Gynecology director deliver Zhao Moyi's child.

Other than him, his mother Lin Fen, his mother-in-law Chen Xiao, his father-in-law Zhao xianhong, his brother-in-law Zhao moyun, and Li Jiawen and her husband were also waiting.

The other ones were the three girls.

Li Jiawen and Lin liusan were holding their daughters.

They were very good friends with Zhao Moyi, so they were naturally worried about him.

"Qin Lin, it's everyone's first time being a father. It's normal to be nervous. It's simply torturous to see the mother and daughter safe and sound," Zhao moyun said to Qin Yu.

Qin Lin didn't listen at all.

Even though she knew that Zhao moyin and the child would be fine because of the fetus-beneficial Foundation, human emotions were uncontrollable.

Therefore, he could not suppress his worry.

"Lin Fen, do you think moxiao's child is a boy or a girl?" chen zhao was most concerned about this.

Although she would love it if her daughter gave birth to a boy or a girl, it was always better if her daughter could give birth to a son.

lin fen hurriedly said, " i'll like it regardless of whether it's a son or a daughter. they're both our children. "

In fact, Lin Liu and the others were also curious about the boy or girl.

After all, they had both given birth to girls.

At the same time, Qin Lin was also curious about whether Zhao Moxi would give birth to a girl or a boy.

Because he didn't go for a special examination, he didn't know if Zhao Mo was pregnant with a man or a woman. Now, he could only wait for the child to come out to know.

If Zhao moyin still gave birth to a girl, then he would have to consider if there were any hidden problems with the Linlin medicinal wine.

Although this wine was very good for men, it was not like everyone who had drunk it would give birth to girls, right?

If Zhao Moxi gave birth to a son, then it meant that it was the problem of old Chen, old MA, Li Qing, and his brother-in-law.

If the seed didn't work, you can't blame the wine.

after an unknown amount of time, the door to the recovery room opened.

Tang xiuwan immediately came out to congratulate him. Chairman Qin, congratulations. Mo 'an has given birth to a boy, and he's in an exceptionally good condition. Both mother and child are safe.

Qin Lin heaved a sigh of relief.

This was no longer a problem with the wine.

The mother and child's safety was obviously the best news.

Lin Fen and Chen Zhao hurriedly went into the recovery room to see Zhao Moyi.

On the other hand, the child was just born and had a weak resistance. He needed some time to adapt and was sent to a special nursery room in the birth room. He could only watch through the glass.

However, what surprised Lin Fen, Chen Zhao, and even Lin Liu was that when they came in, Zhao mochen was already leaning on the birth bed.

There was no sign of exhaustion or exhaustion on her face after childbirth.

When he saw Lin Fen and Chen Zhao, he even said, " mom, I'm a little hungry. I used some strength just now. Get me something to eat.

The women who had given birth were petrified.

This was especially so for Lin Liu, Li Jiawen, and the other girls.

They had just given birth not long ago and knew the pain. They also knew how powerless they were after giving birth. They were about to collapse, okay?

How was he like Zhao mochen? Her face wasn't pale, and she still had the strength to eat after giving birth?

They were both having children, but why was it different?

Naturally, they didn't know the reason why Zhao Mo had been taking in the fetus-enhancing factor for a long time.

Factors that are beneficial to the fetus are not only useful for the fetus, but also for the pregnant woman.

"Alright, I'll get you something to eat!" Lin Fen, as the mother-in-law, didn't care about this. Her daughter-in-law had given birth to a grandson, so she was the family's hero. If she wanted to eat, she would immediately prepare it.

[Chapter 1085 The Effect Of The Fetus-Beneficial Factor! This Child Might Be A Genius! 2](#)

at this moment.

Tang xiuwan and the doctor also brought the baby to the special nursery.

This place was dust-proof and sterile, so newborn babies could get the best protection.

Tang xiuwan put the child down and was surprised to see that the child's eyes were open. He had his hands out and was looking around curiously.

Tang xiuwan and the doctor were both surprised.

because a newborn baby wouldn't open his eyes so quickly, and he couldn't see his surroundings clearly.

Most importantly, it was impossible to make any movements. It was impossible to reach out, and his spine had not developed yet, so it was impossible to turn his head and look around.

However, this child in front of him was actually able to do this. This was very unbelievable.

unless the child had developed better. but could it be that a newborn child had already started to develop before the other children in the mother's womb?

Obviously, the two of them did not know that there was such a thing as a beneficial fetal factor in this world.

If he knew, his jaw would definitely drop.

In the ward.

Lin Fen quickly prepared a light soup.

Zhao Moyi was really hungry after giving birth, and he ate very well.

Moreover, on the second day, Zhao Moyu actually left the recovery room by himself.

This undoubtedly made Lin Liu and the other women who had given birth to children envious.

If a woman could have a child as easily as Zhao moyin, then she would be too happy.

In the following days, Qin Lin and Lin Fen's Center was the recovery room, mainly to take care of the children.

Babies usually needed two weeks to be discharged from the hospital.

Although Qin Lin knew that his child was different from other children because of the fetal factor, he couldn't say it out loud.

However, in the past few days, the child's name had been confirmed. He was called Qin Feng.

Qin ran felt that this name had a strong sense of the protagonist's name in a novel.

However, this was a row of names, and his son was ranked as Feng, so there was no other way.

In some places, the tradition of using poems or couplets to rank one's seniority was still popular. In other places, names were used.

His house was named after the auction.

In fact, changes could be made.

However, since his mother was willing to do so, he could only follow her wishes.

It was just a name, not a name that would make his son a laughing stock in school. There was no need to make the old man unhappy.

...

In front of the main hall of Linlin Manor.

Dozens of pots were arranged there.

Qin Lin was holding a watering can and watering the pots.

The flower pots were naturally filled with mutated space vines.

There were already small bamboo poles in the flower pot. Vines had already wrapped around these small bamboo poles, and the leaves were also very lush.

However, until now, the mutated space vine had been absorbing sunlight every day, but it didn't glow at night like the ones in the game.

With the experience from the greenhouse tree, he knew that the mutated space vine had not grown long enough and had not triggered its attribute effect.

Academician Li walked out of the living room and looked at the vines in the flower pots. "Boss Qin, there doesn't seem to be anything special about these vines. It seems that those seeds are just ordinary Vine Seeds."

When Qin Lin heard this, he knew what was going on, but he still pretended to be disappointed and said, " " yeah, academician li, you guys were lucky to find a meteorite there. you might even be able to find some seeds there. "

As the two of them were talking, Zhao mochen came out with the child.

After two weeks, Qin Feng was able to come out of the recovery room.

"Take a look at this, it's the guest list!" Zhao Moxi handed a list to Qin Lin.

After the child was born, they had to invite their friends and family over for a meal. Some people would usually invite them.

She and Qin Lin didn't want to do much. They didn't want to show their faces once it opened. If they did, they would invite too many people. When Chu Yue, Deng Guang, and Shen Li came, their identities would be exposed.

Therefore, she and Qin Lin only wanted to invite their close relatives, friends, and the company's top management to the manor for a meal and share their joy.

qin lin smiled and said, " you're in charge of these things. i'll listen to you. "

Zhao moyin must have discussed with his mother who to invite, and they would not forget who to invite from both families.

As for who the company would invite, it would just be a few people in charge and some senior management.

Zhao Moyu would also make the arrangements.

Therefore, he had the greatest trust in her.

"You're just lazy, throwing everything to me." Zhao mochen snorted and complained, but it was obvious that she liked this kind of trust.

On the other hand, Qin Feng, who was in Zhao moyin's arms, was very happy to see Qin Lin. He reached out his hand and called out to Qin Lin, as if he was asking for a hug.

This scene made academician li look at him.

A baby's language development was a gradual process. A two-month-old baby could make a gurgling sound and laugh. A three-month-old baby could make a babbling sound to show that he knew his parents.

However, boss Qin was able to do what other babies could only do at three months old in just two weeks.

How could this not be surprising?

Qin Lin looked at his son, his heart full of joy. He directly carried Qin Feng over. "Come, let daddy carry you!"

It was true. Only after becoming a real father could she understand the happiness of looking at the little guy.

Naturally, those bastards who were not qualified to be parents would not have such feelings.

Qin Feng was held in Qin Lin's arms and he babbled happily, " "Daddi, carry!"

This shocked both academician li and Zhao moyin.

"Hubby, did our son just call him dad?" Zhao Moyu's face was full of surprise.

Academician li was shocked.

it went against the principles of physics.

Other babies would only be able to speak after four to five months, and the earliest was four months old.

It would have been fine if he didn't know, but he knew that the child was only two weeks old.

Although calling him 'dad' in two weeks wasn't accurate, he really did speak.

Just now, he thought that it was already strange for it to make a babbling sound. Now, it actually spoke directly.

Wasn't this child developing too quickly?

Academician Li couldn't help but ask Zhao Moyi, "Director Zhao, how's the child's physical examination?"

"The child's condition is very good. The doctor also said that his body, brain, and bones are developing better than ordinary children," Zhao Moyi answered honestly.

When Academician Li heard this, he subconsciously thought, "A genius!"

This child might become a genius.

At the same time, he also thought of a theory on genetic evolution that an academician friend had shown him.

It meant that if the Father's genes were excellent to a certain extent, it could be passed on to the younger generation. The Father's genes could even evolve and make the younger generation more excellent.

This was also the reason why some people looked for someone with excellent genes to mate with.

Naturally, this theory of genetic evolution had no basis. After all, there had never been such a special case at the current stage.

Also, this kind of theory was not allowed to be studied, as it was against humanity.

It was said that if you were one step ahead, you would be one step ahead. You would be able to learn to speak in two weeks, much earlier than other children.

If Boss Qin continued to develop better than other children, what would his future be like?

Then, he thought of Boss Qin's monstrous talent. He was good at everything he learned.

He was clearly a tourism major, but now he had learned about crop cultivation research out of interest. He would have results that professional scientists could only dream of.

Minister Lu felt that it was a pity. He even regretted that Boss Qin couldn't use his thoughts in the right place.

Given Boss Qin's son's current condition, he might have inherited Boss Qin's talent.

No matter how much Academician Li thought about it, Qin Lin knew that his son's condition was caused by the game's good fetus Foundation.

However, when he heard the child call him 'dad', Qin Lin's face was full of excitement. He guided the little guy, "Call me Daddy, Daddy, Daddy, Daddy,"

Aiyo Aiyo! Qin Feng stared at Qin Lin and responded. Then, he began to cry out happily.

"Pfft!" Zhao mochen was immediately amused and laughed.

Academician Li couldn't help but smile.

"Ran ran," Qin Lin.

[Chapter 1086 Do You Want A Wife? These Vines Can Actually Glow?](#)

The weather was getting colder, and it was difficult to get up again.

All the scenic spots in the country were also in a depressed state.

Many of the scenic spots were already in a 'half-dormant' state.

This was an irresistible seasonal reason.

naturally, there were many scenic spots that were still popular.

These scenic spots often had a saying: There was no such thing as a bad scenic spot, only bad marketing.

Although it was somewhat gloating, it also showed that scenic spots were really different.

Linlin villa should be the least affected of all the scenic spots.

this meant that the sea of triangular plum flowers only had a flowering period of about 300 days. at this time, the presbyopic flowers would wither, and the new flowers would not bloom.

All the other projects in the villa had system attributes, especially the Linlin Ranch, which had Green Dog tooth grass and magical animals all year round. The project was still popular.

Even for the river-drifting event, there were still countless tourists lining up in the cold river in winter.

The joy of drifting in the rain was an unsolved mystery of the drifting world.

That kind of atmosphere that made people immerse themselves in happiness was something that drifting in other scenic spots could never learn.

moreover, compared to the cold weather, the employees of the youli villa and linlin ranch were all very enthusiastic about work, because each of them had received a 200 yuan red packet from their bosses.

Although it wasn't much, anyone would be surprised by an unexpected gain.

It was the same for all the employees of Linlin company. They all received red packets.

Everyone knew that the lady boss had given birth to a son for the boss.

Linlin Manor was already very lively.

Zhao Moye had given birth to a chubby little boy. Today, they had invited the relatives, friends, the people-in-charge of various companies, and senior management. Even sun Xian and Chen Li from the county had been invited.

It was also the first time the manor had been so lively.

Qin Lin even prepared a batch of 2 quality vegetables and meat. He also transferred a few chefs from the villa to help master Lin.

otherwise, master lin wouldn't have the energy to attend such a banquet at his age.

On such a happy day, he definitely had to do his best.

During the banquet, Qin Lin also brought Zhao moyin to propose a toast to everyone.

" county sun, county chen, thank you for taking the time out of your busy schedule to come. here's a toast to you! "

"....."

"Uncle Dashan, uncle shuigen, Zhenzhen, this little fellow is called Qin Fengyun. Of course, I'll drink a cup of Zhenzhen to you!"

"....."

dad, mom, thank you for letting me marry Mo Han. I'll give you a toast for your grandson!

"....."

old Deng, President Shen, President Chu, please don't stand on ceremony. Eat well and have a drink together!

"....."

"Old Ma, old Chen, Li Qing, old brother li, let's have a drink too!"

"Academician li, welcome."

"Huang xinkun."

"....."

As a father, this was a time of happiness and pain. After all, you would respect others, and others would respect you and force you to drink.

Even though Qin Lin had eaten two fruits of the tree of power and his physique was stronger than the average person, he still felt a little dizzy after drinking it all.

Fortunately, he had The Hangover grass!

He stuffed it into his mouth twice in a row. Because it was of a 2 Grade quality, it was better than the ones outside, so he was in high spirits again.

This made Chen shengfei and the others, who wanted to get him drunk, feel no sense of accomplishment.

After the lunch party ended, relatives and friends, the company's person-in-charge, and the senior management all left. After all, everyone had things to do.

At night, only old Chen, old MA, Li Qing, old brother li, Qin Ren and his wife, Huang Xin and his wife, and Zhao moyun and his wife were left in the manor.

Qin Lin wasn't stingy. He prepared another Emperor's Supreme medicinal cuisine for everyone in the evening.

After the meal, everyone chatted in the hall.

Zhao mochen was chatting with the women at a table with some fruits and snacks on it.

Both of them were holding their children and sharing their experience of raising children. Zhao moyin was listening very seriously.

As a woman who had just become a mother, she couldn't wait to make these experiences her own.

The table was surrounded by Wang Cai, snowy, and red Feather. The parrot Xiao Wu also brought xiaobao to a corner of the table, asking for something.

The scene was very heartwarming.

Qin Lin brought Qin Ren, Chen shengfei, and the others to make tea.

The tea leaves were from the game and had not changed. It was a quality 2 Tieguanyin tea.

After drinking, making a pot of such good tea was definitely a wonderful enjoyment for men. They could also chat about the mountains with each other, which was the perfect leisure life.

The pressure of society was very great, and everyone was busy with many things. It was really rare for good friends to get together, make tea, and chat.

Even an old-timer like academician li joined in and said a few words.

Gao Yaoyao was standing by with some waiters.

The boss and the lady boss were entertaining their friends and guests. If there was anything they needed, they had to deal with it immediately.

Li Kai drank a cup of tea and suddenly thought of something. He turned to Qin Lin and said, "Brother Qin, do you still remember what I told you before?"

Qin Lin was stunned by the question, then he said, "Old brother li, what's the matter? It's about that new rice plant that you've just cultivated, and it's ripened?"

This caught academician Li's attention.

Although his research direction wasn't crops, he would always pay attention when he heard other people's new research results.

Moreover, he knew that the new rice plant Li Kai was cultivating did not exist in the existing rice system, which meant that he had opened up a whole new rice system.

[Chapter 1087 Do You Want A Wife? These Vines Can Actually Glow?](#)

Senior Yuan had created a whole new rice system and solved everyone's food problem.

Now, Minister Lu and the Institute were also looking forward to the changes that professor Li Kai's new rice system would bring.

It was said that the Paddy was growing taller and taller, and its stem was getting thicker and thicker. It was completely unlike how normal Paddy should look.

Li Kai hurriedly shook his head. old Brother Qin, look at your memory. It's about your son and my daughter's engagement. Have you forgotten? "

we've talked about it before. Xiuwan has a daughter. If Mojing has a son, we'll get engaged. We'll be even closer.

"Ran ran." Qin Lin was stunned.

Old brother li was so serious that he thought it was something important.

Who knew that he would have to talk about this?

He naturally remembered.

but he had always thought that it was a joke, so why did old brother li take it seriously?

Engagement was too old-fashioned and was also a form of restriction.

He had never thought of putting such a restriction on his son.

In the future, if his son really liked old brother Li's daughter, he would just marry her. If he didn't like her, they might have a second son after the engagement.

Didn't most of the melodramatic plots in television dramas start from the engagement?

the children of both parties did not like each other, so they left the family and fled from each other's marriage, causing all kinds of funny things.

"Mr. Li, you can't do this. Shouldn't my daughter be the one engaged to Qin Lin's son?" Chen shengfei chimed in. It seems like I was the one who suggested it. "

old Chen, you're wrong, " Marvin said. I was the one who spoke first. You can't steal her away.

Li Qing was even more direct. old Chen, old Ma, you can't even be friends anymore. Are you trying to steal my son-in-law? "

"Ran ran." Qin Lin opened his mouth, but he didn't know what to say.

You guys were just joking around when the child didn't come out.

the child had already come out, and he still wanted to take it seriously?

"What does it have to do with you guys?" Li Kai was annoyed when he saw the three of them. Today, I was the one who was talking to Brother Qin about this."

After saying that, he asked Qin Lin, "don't you think so, Brother Qin?" We're both in the field of scientific research, and we have the same family atmosphere. Our children will definitely have the same interests in the future."

marriage is all about matching social status. We have the same thoughts, so we should match social status. For example, those who drink and do business are not the same as our children.

These words made Chen shengfei and the other two unhappy.

"So what if I'm drinking?" Li Qing immediately asked. Who could compare to Qin Lin's wine cellar? He's the ceiling of the wine collection. In the future, little Qin Feng will definitely inherit those wines."

"that's right. qin lin has so many companies, which one of them doesn't have the potential of a unicorn?" chen shengfei added. Is his son not going to inherit these companies?"

that's right, " Marvin agreed. Qin Lin's son will need a good wife like Moyan in the future. My daughter can be taught by Moyan. She'll be as outstanding as Moyan in the future.

"Hehe." Li Kai was dumbfounded.

The three of them suddenly joined forces?

Qin Ren and Zhao Mo Yun were stunned by this scene. They looked at their daughter silently. It was a pity that they were close relatives. There was no chance.

Otherwise, Qin Lin's son would be the perfect son-in-law candidate.

What did it mean to be born at the end? Qin Feng was like this, and he was definitely born at the end point that 99% of people couldn't even see.

huang xin, who was at the side, subconsciously looked at his daughter who was chasing after the little fox. what a pity, she was three years older!

In the end, Li Kai, Chen shengfei, MA Levin, and Li Qing argued to no avail.

Li Kai could only look at Qin Lin and ask, " "Old Brother Qin, tell me, who do you want to get engaged to? One has to go first."

Chen shengfei, MA Levin, and Li Qing also looked at Qin Lin.

qin lin was helpless and could only awkwardly say, " brother li, we are open-minded people. We should see if the child likes it. I can't make the decision for the child in case he complains in the future!

"That's true! it's fine as long as the child likes it. " li kai nodded, but what he did next stunned qin lin.

He walked toward Tang xiuwan.

Tang xiuwan was holding her younger daughter in one hand, while her elder daughter (ex-husband) was playing with her younger daughter. The elder daughter had already been injected with the special Sima drug for the fourth time, and she was in good condition.

Sima disease was originally a terminal illness, but it was no longer a terminal illness after senior brother Li cultivated the adonaxi plant root. Because of senior brother Li, her eldest daughter was the first to use the Chinese Academy of Sciences 'newly-made medicine, and she recovered very well.

xiuwan! Li Kai walked over to Tang xiuwan and said, " xiuwan, give me the child.

Tang xiuwan handed the child over to Li Kai.

Li Kai carried the child to Zhao Mochen, then leaned into her arms. He stared at Qin Feng, who was looking around curiously, and said, " "Little Qin Feng, do you not want your lover anymore? I'll give you a wife. What do you think about my daughter?"

As he spoke, he carried his daughter and moved closer to Qin Feng.

This scene shocked Tang xiuwan, Zhao Motian, and Lin Liu.

After all, he was a professor, and the famous professor Li Kai at that. Who would have thought that he would be so interesting?

Qin Lin was stunned.

Old brother Li said.

It was fun for the two children to be together. The little girl in Li Kai's arms giggled. Qin Feng's development was different from normal children because of his fertility, so he could also giggle. He even grabbed the little girl's hand.

When Li Kai saw this, he laughed. Haha, Brother Qin, you've seen it. Little Qin Feng likes my daughter and is holding her hand. Let's settle this.

Ran ran. Qin Lin wanted to cover his face. Did he mean that just now?

Why didn't old brother Li let go of his son? He was a newborn.

"F * ck, little uncle is actually playing this trick." Li Qing was immediately displeased. He actually walked towards his lover and took his daughter over. He also put his daughter in front of Qin Feng and said, "Little Qin Feng, look, isn't this sister even more beautiful?"

How could a newborn child know whether she was pretty or not? When she saw the little girl come over again, she also giggled and thought it was fun, so she also grabbed the little girl's hand.

Li Qing finally had something to say, "little uncle, did you see that? Little Qin Feng admits that my daughter has become more beautiful, so don't join in the fun."

The uncle and nephew's actions made Chen Shengfei and Ma Leiwen unwilling to be outdone. They also picked up their daughter and brought her to little Qin Feng.

Qin Lin was speechless.

Why did old Chen and the others also join in the fun? He was an old man.

The key was that his son didn't know anything, yet he was holding each of their little hands. Did he want them all?

F * cking Yingluo

The few women were completely dumbfounded by Li Kai, Chen shengfei, and the others.

However, Lin Liu and Tang xiuwan had to admit that if Zhao mochen was willing, they wouldn't mind getting engaged.

Little Qin Feng was born into a good family, and he had Qin Lin and Zhao moyin to teach him. He would definitely be an excellent man in the future.

Lin Fen was the only one who was happy as she watched from the side. Her grandson probably wouldn't have to worry about a wife in the future. If this were ancient times, he would have married all these girls.

The old man was still greedy. Of course, the important thing was that the grandson was his and the girl was not his.

Gao Yaoyao and the other service staff were amused by the scene in front of them. Many people would be envious of the little boss. Someone was in a hurry to send his wife to him when he was just born.

In today's society, there were many people who were still single at their age.

"Yaoyao, you guys don't have to stand there. Take them to the kitchen and get them something to eat." Zhao mochen didn't forget about Gao Yaoyao and the others, so he gave them an order.

Since the start of the banquet, Gao Yaoyao had brought someone to serve them and had yet to drink a single drop of water.

"Okay, sister silent." Gao Yaoyao nodded, but she still called two waiters to take over the shift before heading to the kitchen herself.

however, the moment she walked out of the hall, she was stunned by the scene in front of her.

Outside the hall, the fluorescent light was very gorgeous. The surroundings were set off like a science-fiction fairy tale world.

some of the fluorescent light shone in, and it was very gentle. under this light, they actually felt a special kind of tranquility.

It was as if the moonlight was like water, and the stars were shining.

The room was indescribable.

anyway, it was very beautiful.

And the thing that was glowing was actually the vines in the flower pot.

Those were all planted by the boss before.

However, these vines had never emitted such a beautiful fluorescent light before.

Why did it suddenly glow today?

Moreover, why were these vines emitting such a bright and beautiful fluorescent light?

This didn't make sense.

[Chapter 1088 Night View More Beautiful Than Planet Pandora's! Only One Person Knows The Truth](#)

In the end, Li Kai, Chen shengfei, MA Levin, and Li Qing's fight for a husband came to an end.

No one had succeeded.

Li Kai naturally didn't have a good temper towards Li Qing, Chen shengfei, and MA Levin, who had ruined his plans. He snorted at the three of them.

Academician li laughed and said, " boss Qin, it seems like your son is destined to have a bright future. However, he's naturally outstanding and talented. He will definitely be able to inherit your business in the future!

"Academician li, it's still too early to talk about this. The child is just born." Qin Lin said with a smile.

Zhao moyin had always been eating factors that were beneficial to the fetus, so his son's genes were better than that of current humans to a certain extent.

He wasn't worried about his son's future. As long as he didn't go down the wrong path, bully others, or do evil things, he could do whatever he wanted.

Academician li smiled and nodded. He then changed the topic and asked Li Kai, " "Professor li, how's the cultivation of your new rice plant going?"

When Qin Lin heard this, he immediately helped to explain, " "Academician Li, you don't know, but brother Li's rice plant is amazing. It's already taller than sorghum, and its stem is thick and solid like a sapling. Furthermore, it's already in full bloom."

this was the biggest black pot he had ever prepared for old brother li.

Previously, old brother li had given him a backstab. Now, he had to prove that old brother li was the one who trained him.

"Higher than sorghum, and the stem is like a sapling?" Academician li suddenly thought of something and said, " "Then if this new rice plant can produce more rice than the current rice, then wouldn't it be able to fulfill Mister Yuan's dream of enjoying the cool breeze under the grain?"

li kai panicked when he heard the words "he xia is having a cold dream."

He knew what this meant, but he was more worried that the new rice plant would live up to his expectations and really produce great results for him.

That would be a pain in the ass.

Please don't produce too much.

At that moment, Gao Yaoyao ran in and reported to Qin Lin, " "Boss, something's wrong with the vines you've planted. They're actually glowing."

His words immediately attracted the attention of everyone at the table.

Especially academician li.

He knew that the vines planted by Qin Lin were brought out from the valley.

Previously, he had thought that there was nothing special about these vines other than their fast growth.

But now, he heard that the vines could glow?

qin lin naturally knew what was going on.

This was because the mutated space vines had grown enough and triggered their attribute effects, so they glowed at night.

He didn't expect it to happen at this time. What a coincidence.

Academician li immediately got up and walked out. He knew that something must have happened to the vine to be glowing. It might be because of the meteorite that landed in the valley.

Qin Lin also got up and followed him out.

Li Kai, Chen shengfei, Marvin, and Li Qing saw this and also followed out curiously.

The table's sudden actions attracted the attention of Zhao moqian, Tang xiuwan, Lin Liu, and the other women. They also curiously carried their children and followed them out of the hall.

as soon as academician li left the hall, he saw the fairy-tale scenery outside.

The vines in the flower pots glowed brightly, illuminating the surroundings. The vines themselves also became bright, as if they had turned into Jade. They were very obvious and beautiful.

"Old Brother Qin, are these vines newly cultivated by you?" Li Kai walked out and asked. No matter what, he couldn't get involved with this thing, so as not to take the blame.

it has nothing to do with me, " Qin Lin hurriedly explained. I went to the valley in the back of the mountain with academician li and picked up some seeds to plant.

No matter what, they had to bring academician li as a witness. The mutated space vine was found in the valley.

In order to cover up this lie, he had Xiao Wu throw another profound insect stone, to have the effect.

it's so beautiful. Qin Lin, why are these vines suddenly glowing? " Zhao mochen walked out with little Qin Feng in his arms, shocked by the scene in front of him.

Lin Liu, Tang xiuwan, and the others also nodded in surprise.

It was not that they had never seen fluorescent lights before. Some scenic spots would even specially create fluorescent lights in the shape of plants for illumination, but those fluorescent lights were obviously incomparable to the fluorescent lights in front of them.

the natural, fairytale-like sci-fi scene was not something that artificial fluorescent lights could compare to.

Moreover, it was very beautiful at first glance, and the feeling of appreciation was not something that those fluorescent lights could compare with.

However, the women didn't dare to get close to the fluorescent light.

Now that the situation was unclear, they were also afraid of radiation and the like. It would not be good if it affected the children.

This was a normal worry for a mother.

Qin Lin knew why the mutated space vine glowed, but he still explained after hearing Zhao Moyin's words, "I don't know what's going on at the moment. It should be affected by the meteorite that fell from the valley, and something has happened."

"Boss Qin," Academician Li said, "if that's the case, there should be other vines in the valley. It's impossible that they only mutated now. It's just that we haven't found them yet."

"Mm! That should be the case." Qin Lin nodded. He thought of the seeds he had left in the valley and felt lucky.

If he didn't leave those behind and only grew them here, it would really be a little difficult to make up for it now.

Academician Li took out his phone and called Captain Tang. As soon as the call connected, he asked, "Captain Tang, you're out of the mountain now, right?"

I just took a shower at the drifting project," Captain Tang said. I'm going to eat at the cafeteria at the house.

[Chapter 1089 Night View More Beautiful Than Planet Pandora! Only One Person Knows The Truth](#)

Captain Tang, "Academician Li immediately said, "I'll have to trouble you to take a look at the valley where the meteorite was found. There should be some kind of vine that has been affected by the meteorite. It will emit fluorescent light.

There was a plant mutation here, which was also proof that they had speculated that meteorites would carry meteorites when they fell.

Captain Tang heard Academician Li's words and didn't waste any time. He took a few people into the mountain and went to the valley.

Because he had found a meteorite in the valley, he had specially led his men to search the valley a few times. However, they didn't find anything new, so he led his men out of the valley and continued to search places that they had not searched.

Captain Tang went through the forest and spent some time in the mountains.

But this time, when they entered the valley, he and the few people beside him all revealed astonished expressions.

There was an area in the valley that was emitting a kind of fluorescent light all around, illuminating the area and making it look very beautiful.

"Captain, what's going on?" One of them asked.

"Academician Li asked us to come in again just for this, right?" another person said.

Captain Tang walked in with his men. When they got closer, they saw that the glowing things were vines.

The fluorescent light of the vines shone on the stones, making them as beautiful as Jade.

Especially under some bushes and trees, the vines went through the bushes and wrapped around the trees. The fluorescent light made the bushes and trees look like science fiction.

The valley seemed to have turned into a science-fiction world.

Captain Tang led his team in. Under the fluorescent light, his whole body felt peaceful, which was a very comfortable feeling.

Captain Tang didn't forget what he was here for. He took out his phone and took a video of the surrounding scenery. He then sent it to academician Li and asked, "academician Li, do you need to dig some vines and bring them back?"

Linlin Manor.

After academician Li received Captain Tang's message, he opened the video and saw the scene in the valley. He knew that his guess was correct.

These vines had indeed been in the valley for a long time. It was only this time that they were discovered. Moreover, in addition to emitting fluorescent light, these vines could grow against the season in such a cold day. They definitely had great research value.

Naturally, they didn't need to worry about the vine now that it was in boss Qin's hands.

In this area of research, there should be no one in the country who could compare to boss Qin and professor Li.

Furthermore, it grew against the season in winter, which was similar to Li Kai's low temperature genetic technology. There was no need for the Institute to waste resources on research.

As he thought about it, he also replied to Captain Tang's message that there was no need to bring back the vine.

After that, academician Li handed his phone to Qin Lin and said, "boss Qin, take a look. Captain Tang found something in the valley. It's very beautiful.

Qin Lin took the phone and played the video. He also saw the picture taken by Captain Tang.

To be honest, the mutated space vine grew in the valley, among the grass, and often wrapped around the trees. The fluorescent light it emitted illuminated the surroundings. It was more spectacular, more shocking, and more beautiful than the flower pot he had planted.

Li Kai curiously took the phone, and so did Chen Shengfei and Li Qing.

When they saw the video, they were clearly shocked by the beautiful scenery.

Zhao mochen and the rest also came over curiously to watch the video that Captain Tang had taken.

The few women were also stunned by the beautiful scenery. Furthermore, women were more sensitive and attracted to it.

Motian, sister xiuwan, " Lin Liu said. don't you think this scene looks like a scene from a movie you've seen before? "

"Is it the night view of avatar's planet Pandora?" Zhao Moyu was reminded.

The nightscape of avatar was known as the most beautiful in science fiction, and no other movie could surpass the nightscape of planet Pandora.

Tang xiuwan had also watched that movie, so she said, " but I feel that the fluorescent light emitted by these vines is more beautiful when I look at it from a single perspective.

Qin Lin listened to the girls 'conversation and also remembered the avatar movie.

The fluorescent light emitted by these vines was much better than the night scene in avatar, after all, it was the system's added attributes.

"Hubby, can these vines be cultivated?" Zhao Moyu suddenly asked Qin Yang. Wasn't that mountain being developed? Other than the cable car and the greenhouse plan on the top of the mountain, there are only mountain climbing projects. There are also few mountain activities, and the scenery is much worse than that of the ranch."

if we can cultivate them, can we plant these vines on that mountain? if we have enough of them, the entire mountain will become a real planet Pandora.

the beautiful scenery will definitely attract countless people. There might even be movie and TV crews fighting to come to our mountains to shoot.

Zhao Moxi had been in charge of the Linlin villa and the Linlin Manor for a long time, so he had obviously thought of the use of these vines.

Once you're familiar with something, you'll always be able to do it.

Motian, we're thinking the same thing. Besides, when these vines shine, their stems are like jade, and the brightness is very obvious. After planting them, we can hire people to style them to increase their beauty and appreciation. Also, it's a good idea to set the scenes for TV dramas and movies. Qin Lin replied with a smile. He was a little impressed by Zhao moyin's reaction.

Wasn't this the purpose of him bringing out the mutated space vine?

moreover, he didn't expect that the film crew and tv drama crew would come to film.

[Chapter 1090 Night View More Beautiful Than Planet Pandora's! Only One Person Knows The Truth](#)

however, thinking about it, there were so many ancient costumes, xianxia, fantasy movies, and tv series now. if he built a few special scenes in different places in the mountain, he would be able to see the real world.

for example, the valley could be used as a scene to plant mutant space grass.

Xianxia TV series such as the book on the bed for three lifetimes would all be shot in the valley.

When the time came, what could he do to compete with him?

With such a fairytale-like place, people would definitely come here to shoot, right?

As long as they chose to shoot here, it would naturally add points to the shooting.

After the shooting of the TV series was over, it would definitely cause a craze if it was still open for tourists to enter when it was empty.

They just needed to open up two more roads into the mountain. Otherwise, once the film crew came, the tourists would definitely be in chaos.

Zhao moyin was a little worried. hubby, there's one more question. Are these vines dangerous? especially this fluorescent light. Will there be radiation or something? "

Qin Lin naturally knew that the mutated space vine was harmless, because the remark indicated that it was harmless.

However, he hadn't done any tests, so he couldn't say it directly. Otherwise, it would be suspicious if he was so sure.

Brother Qin, leave the testing to me. I'll get the people in the laboratory to work overtime. It won't take much time. Li Kai smiled and took over the task. He then called Linlin's laboratory and asked them to send containers over with two pots of vines.

Since he knew that the vine had mutated because of the meteorite, he didn't dare to be careless.

When the people from Linlin laboratory came to transport the vines, academician li also followed and said, " "I'll go and take a look together!"

Since the vine had mutated because of the meteorite, it must have contained genes affected by space matter. This was also evidence. Perhaps they could use the information that the Academy had already known before to deduce what kind of meteorite it was.

Linlin's laboratory was indeed very fast.

In just two days, while Qin Lin was in the office controlling the game characters to complete daily tasks, academician Li and Li Kai came together.

as soon as academician li entered, he congratulated, " boss qin, congratulations. the vine has been tested to be harmless. you can use it to cultivate and promote it. you've got something good this time. "

Qin Yang knew this, but he still pretended to be happy,"Academician Li, can it be better than a meteorite?"

Academician li laughed. that's true. However, the Vine's genetic mutation is similar to a space material. We can roughly guess what type of meteorite it is.

moreover, with this record, there will be other places to learn from in the future.

I'll record the scene here as information, or even print it into a book, and then collect it in the internal information Library of the Chinese Academy of Sciences.

Upon hearing this, Qin Lin opened his mouth and his expression changed.

Academician Li obviously didn't know that neither the meteorite nor the mutated space vine had anything to do with the meteorite.

Academician Li wrote this and put it in the Chinese Academy of Sciences Library.

This would become another huge scientific scam in the history of scientific research.

However, the truth would never be revealed.

He was the only one who knew the truth.

Moreover, the origin of the vines was now completely confirmed.

Academician Li was the best witness.
