

The Game 1091

[Chapter 1091 No One Can Refuse Linlin Manor \(1\)](#)

Qin Lin, academician li, and Li Kai chatted for a while. After the two of them left, he told Zhao Moyi the test results.

After watching the video shot by Captain Tang, Zhao moyin was very interested in this matter, mainly because the sci-fi and fairy-tale-like scenes were too beautiful.

Therefore, he had instructed him to tell her the results as soon as possible.

After Zhao Moyu got the test report that the vines were harmless, he also called Lin Lanzi to Qin Lin's office.

"Chairman Qin, mo Xiao!" Lin Lanzi arrived very quickly.

"Sister LAN Zi, take a look at this video first!" Zhao mochen passed the video that Captain Tang had taken to Lin Lanzi and played it.

"Moyu, what's with this video? She's too beautiful." Lin Lanzi was immediately attracted to it. However, this video should have been edited with special effects, right?

Otherwise, even the specially made fluorescent lights would not have such a shocking effect.

"This is a special kind of vine. It can emit this kind of fluorescent light at night. Moreover, it's very bright and can illuminate the surroundings," Zhao Moyu immediately explained.

" if this thing is used with the greenhouse tree, it will definitely be even more shocking. in addition, we plan to plant this vine on the developed mountain, so sister lan zi has to have a new development plan. "

If he wanted to plant these vines on the mountain, it was not possible to just plant them.

After all, the original development only included the mountaintop path. Even if both sides of the mountaintop path were planted with these vines, it would still be less shocking.

She was planning to plant them all over the mountain.

The entire mountain would be developed.

At the very least, there had to be a few small paths in the mountains for people to walk on. They had to be paved with stone or cement roads, and guardrails had to be set up on both sides. After all, it was in the mountains.

This event was also destined to be a night event.

On both sides of the path, there were also anti-insect, snake and fire facilities.

In fact, they could even set up tents and campsite in suitable locations.

Now, even if there were no activities at Linlin villa and Linlin Ranch, under normal circumstances, they could receive 40000 tourists, and that was only because of the limited number of visitors.

Because the mountain villa's reception capacity was limited, this was already the limit. There were more tourists who came to you city at the same time.

Many tourists who couldn't buy tickets could only stay in you city, walk around the food street, and visit other scenic spots.

It could be said that you city's scenic spots were basically the beneficiaries.

In the past, there was no Linlin villa. The major scenic spots in you city had a few big fish and small fish daily. Now, even the worst ones had hundreds of people every day, and at most, there were thousands of people.

For this, the county had allocated funds several times to renovate and develop these scenic spots. They could not afford to be too embarrassing and shabby.

Because of this, many of you city's cultures were spread very well.

At least, many people knew about the old house mural expressing homesickness, Zhu Xi's inspired creation, Dong Gong Xin Su, yunchang Hall's Xinfang eight formations.

he also knew about you city's history of bamboo carving, tofu making, and sugar making.

These were all good ways to spread you city's culture through the scenic spots.

it was also because there were too many tourists that even though you city had built new hotels in the new district, and there were more and more homestains and hotels in you city, it still couldn't fully meet the accommodation requirements of tourists.

Linlin villa only had the nuptial area and the ranch tent area.

After the completion of the greenhouse tree area on the top of the mountain, there were only a few more spots. Compared with the vast number of tourists, it was still not enough.

Moreover, the price of the greenhouse tree seed had already reached 10 million Yuan on the internet. In other words, this greenhouse tree was no different from a house in a first-tier city.

Therefore, it was impossible to build too many greenhouse trees on the top of the mountain.

After all, the value of the greenhouse trees in the outside world had already soared to the sky. The villa had also announced that there were not many of them. If they produced too many at the top of the mountain, it would be a slap to their own faces. It would also cause the value of the greenhouse trees to drop significantly.

Therefore, it would be great if they could build more accommodation and tent camps in the mountains to meet the needs of more tourists.

For example, the valley in the video could be used to build a tent camp.

The mutant vines decorated the entire Valley, making it look like a fairy tale world. Tourists would fight to stay there.

As for the film location in the valley, she decided to give up after thinking about it for two days.

This was because she had seen some bad news on the internet in the past two days.

For example, a certain film crew would destroy the environment.

Or for example, a certain film crew had ruined a certain scenic spot.

There were also a bunch of trivial matters caused by some popular celebrities.

Therefore, she still felt that this was a little unreliable. He didn't want to really have a crew to shoot and then cause such trouble.

Although it was easy for Linlin villa and Linlin company to deal with any crew or actor, no one wanted to be disgusted.

therefore, in order to prevent such a disgusting thing from happening, she discussed with qin lin and changed the plan to build campsite and tent camps instead of film shooting locations.

They could even use the slogan of 'camping in nature and enjoying the fairy tale world'.

Zhao Moyu told Lin Lanzi his thoughts, and Lin Lanzi agreed with him and even gave her own opinion.

In the end, the two of them became happier and more excited as they talked.

It was as if they were no longer talking about a Scenic Area project, but the science fiction world that they liked and yearned for.

The more Zhao mochen talked, the more he felt a sense of accomplishment.

[Chapter 1092 No One Can Refuse Linlin Manor \(2\)](#)

After all, Qin Lin had always been the one behind the projects at the Youli villa and the Linlin Ranch. She had never felt a sense of participation.

Now, she was full of participation in this fairy tale mountain. She had put in a lot of effort and energy.

It was the same for Lin Lanzi. Previously, she was only the manager of the media department and only cooperated with her boss to promote. Although she had watched the manor and Ranch develop step by step, it could not be compared to the sense of accomplishment of personally participating in the design of a project.

Therefore, the two women treated this project as the most important thing at the moment.

Lin Lanzi even took out her phone and recorded everything she said to Zhao Moyu.

After the discussion was over, Lin Lanzi and Zhao mochen left the office together and headed to the North corner of the manor.

The North corner of the manor was originally a reserved space for expansion. At this time, 11 greenhouse trees were planted there.

Moreover, the greenhouse trees had grown during this period of time.

Lin Han was commanding the villa's Engineering Department to finish the decoration of one of the greenhouse trees.

The interior decoration of the greenhouse was naturally based on the design of the greenhouse tree that she had posted online before.

she was also full of energy now.

because zhao moyin had already invested in her and allowed her to open a studio, in addition to her previous popularity, she had gained a lot of fans. this would be a new start for her.

Moreover, the greenhouse trees in Linlin Manor were her studio's first project, so she had to do a good job.

In this greenhouse, one could see beautiful decorations. The bed, sofa, green plants, and Kasaya were all exquisitely arranged.

When she saw Lin Lanzi and Zhao mochen, she immediately came out to greet them, " " president zhao, president lin, come and take a look at this newly renovated greenhouse tree. "

Lin Lanzi and Zhao mochen followed Lin Han into the greenhouse tree.

The decorations inside were indeed beautiful, just like the design drawings. Or rather, the real world was more three-dimensional, and the scene in front of him was more beautiful than the 3D design drawings in the video.

"The decorations are very beautiful." Zhao moyin was also very satisfied with the decoration of the greenhouse, and he was not stingy with his praise,"Miss Lin, you're indeed a very talented designer."

she nodded at lin lanzi as she spoke.

"president zhao, you're too kind." lin han replied humbly and said, " however, I've already finished the renovation for this design. After that, I'll just wait for the other 10 designs of the villa.

Because Zhao moqian liked greenhouse trees and Lin Han's designs, Linlin had organized a greenhouse tree design competition.

The following fans voted for five, and Linlin villa chose another five, for a total of ten.

By then, these design drawings would be used to decorate the greenhouse trees in the manor.

As for the project, it was handed over to Lin Han.

Lin Lanzi said, " don't worry, miss Lin. The results are out. I'll get someone to send it over later. However, we still have another cooperation that we would like to discuss with you.

Following that, Lin Lanzi told Lin Han about the eye-catching greenhouse tree on the mountain top and then said, " when the time comes, the greenhouse Tree Project on the top of the mountain will need to plant a lot of greenhouse trees for decoration. Moreover, we hope to renovate it into a special form of a community with a special decorative vine.

but it's not just about the interior design of the greenhouse. There's also the design of the outdoor decoration, beautifying, design, layout, style, and so on. I wonder if miss Lin is confident in it? "

As they acknowledged Lin Han's design ability and the greenhouse in front of them was also perfectly decorated, they wanted to give the other party another opportunity to cooperate.

When Lin Han heard this, he did not hesitate and said hurriedly, " " director zhao, director lin, that's not a problem. i have many senior brothers and sisters who know how to design related things. i can invite the most outstanding senior brothers and sisters to participate in it. "

She knew very well that the Linlin villa project would definitely be very popular in the future. It might even be the only Scenic Area project in the world.

This was because there were no greenhouse trees in the world.

If this project could be completed well, her name and her studio would also rise to fame. In the future, when others talked about these greenhouse trees, they would also talk about her name, Lin Han.

This was definitely a great opportunity.

hearing lin han's words, zhao moqian smiled and said, " "Then I'll entrust this matter to miss Lin."

Lin Han quickly promised. director Zhao, director Lin, don't worry. I will definitely do a good job on this project. I won't let you down.

At the same time, she also secretly vowed to do this project well and that there must be no problems.

This was president Zhao's way of helping her.

She knew very well that in a person's life, good luck might happen many times, but when it came to the support of a noble person, it might only happen once.

To be able to get the support of someone like President Zhao was something that 99.99999999% of people would not even encounter once.

After all, President Zhao was the lady boss of the famous Lin Lin company.

for example, if president zhao wanted to open the bid for the greenhouse tree project, the largest design company in the country would participate. they would even pay various conditions and prices to get this project.

If that happened, she wouldn't even be qualified to enter the venue.

Therefore, she had to make this project the best and the most perfect. Not only did she have to repay President Zhao, but she also had to make herself famous.

If she missed this opportunity, she knew that she would never have another chance like this in her life.

After chatting with Lin Han for a while, Zhao mochen went back to take care of the child.

[Chapter 1093 No One Can Refuse Linlin Manor \(3\)](#)

Lin Lanzi went back to the villa and called for someone to settle the design. Then, she brought a document to Qin Lin's office.

"Chairman Qin, I need you to sign this document." Lin Lanzi handed the document to Qin Lin.

It was a document about the lucky draw for the greenhouse tree seeds.

The top five designs were chosen through a fan vote.

He had to fulfill his promise of giving the greenhouse tree seeds to the fans who had voted for him.

There were five design drawings, and the fans who voted had two chances to draw each.

the lucky draw was done through a live broadcast and a random lucky draw using an electronic software.

Qin Lin read the contents of the document and asked, " the price of the greenhouse tree seeds has been raised to 10 million Yuan online. When the lucky draw is broadcast live, is there a notary? "

Lin Lanzi nodded and said, " I've already asked the city's notary. When someone wins the prize, the winner will have to come to Linlin villa to collect it in person. This is to prevent any problems from occurring during the delivery process.

"En!" qin lin nodded and signed his own name.

Lin Lanzi left the office and returned to Linlin Manor. She got someone to release the live broadcast of the lucky draw through the official account of the manor.

at the same time.

On the other side, Lin Han had also returned to her own residence. She looked through her address book, then took out her phone and made a call.

He was the most outstanding senior brother she had ever known. He had the most flexible design style and the strongest ability. Therefore, he was now a partner of a well-known design company in the industry.

As soon as the call went through, a magnetic male voice came from the other side. "Lin Han, how come you have the time to call me? i saw that your design was on the hot search a while ago."

"Senior brother Wu, I have a project here that I would like to invite you to participate in," Lin Han said immediately.

His words made the other side fall silent for a moment before saying, " "Lin Han, it's not that I don't want to participate in your project, but I still have a few large residential area projects to design."

Lin Han knew that his senior brother had rejected him tactfully. After all, the other party's design company had taken on big projects.

"There's a new greenhouse project in Linlin villa, and it's built on the top of the mountain," she said calmly.

"I'll go!" Senior martial brother Wu's voice came almost instantly, " "Lin Han, you must bring me along to this project. I can go over immediately."

What a joke, that was the project of Linlin villa.

Every project in Linlin Manor was a hit, and there were countless designers who wanted to be invited by Linlin Manor. When the Linlin Manor project became popular, they could introduce to the public that they had participated in the design.

This was a living signboard.

Besides, he knew about the greenhouse tree.

And that was the flow of data.

Just the sound of this mountaintop greenhouse community project was enough to make it popular.

" senior brother wu, didn't you say you had a project? " "How can I ask you to put down your project and come to me?" Lin Han said jokingly.

"I'm embarrassed, I'm absolutely embarrassed!" Senior brother Wu's voice was even more urgent.

"Alright then, I'll reluctantly agree to senior brother's request." Lin Han hung up the phone with a smile, looking very proud.

If this senior brother Wu was settled, then the other Senior Sister, who was also an influential figure in their schoolmates, would definitely not be a problem.

The Linlin Manor project wasn't attractive enough, but there was still senior Wu's beauty trap, right?

If that Senior Sister knew that senior brother Wu was here, she would definitely come as well.

Next, Lin Han made a few more calls. Without exception, when they heard that it was a project at Linlin villa, no one could refuse.

This was the temptation of Linlin Manor!

[Chapter 1094 Have You Watched "Jurassic Park"? 1](#)

The notary office had the function of notarization and was an institution that could bear civil responsibility. Usually, it would handle the notarization of various legal acts, documents of legal significance, or on-site notarization.

Linlin villa's live broadcast of the lucky draw and the invitation of the city's notary to notarize it belonged to this category.

Ming city notary office.

Liang Fei was called to the leader's office. "Have you seen the official application documents for Linlin villa? The city leaders have already informed us about this, so we can't make any mistakes. There will definitely be a lot of people watching the live broadcast."

"Yes, I know!" Liang Fei nodded.

To be honest, many people were fighting for Linlin villa's position.

After all, it was Linlin villa.

moreover, the price of the greenhouse tree seeds had already been raised to 10 million yuan each. linlin villa's live broadcast of 10 greenhouse tree seeds was a notary for 100 million yuan.

This was a notary's qualification.

Of course, the most important thing was that he could travel for official business. As long as there were no problems with the notarization, he could make his own arrangements.

After Liang Fei left the leader's office, she also made relevant preparations. Then, she left the notary office and went to Linlin villa.

As soon as the announcement of Linlin villa's lucky draw live broadcast came out, it immediately spread all over the internet and became a hot search.

Because of the greenhouse seed event, the number of fans following Linlin villa had reached 130 million.

Countless netizens followed the official account of Linlin villa and voted for those designs, hoping that they would be chosen and get a greenhouse tree seed worth tens of millions.

After such a long time, many people who followed the official account of Linlin Manor and voted for it had almost forgotten about this.

In theory, a person's attention to one thing would only last for a week.

After a week, if he didn't keep an eye on it, he would slowly stop paying attention to it.

Now that Linlin villa was finally going to draw, these people immediately paid attention to it again, and their enthusiasm was even higher than before.

After all, the previous voting had to wait for the Linlin villa event to progress. This time, they were directly starting the lottery. What if they won?

Therefore, as soon as Linlin villa's official account started its live broadcast, countless people began to pour into the live broadcast room.

The increase in the number of viewers had definitely broken a certain voice's record.

The official site of the music industry naturally paid attention to this matter immediately.

however, even mouyin was shocked by the amount of traffic coming from linlin manor. after all, an account that was not under their control or even affected by them had the most traffic on their platform.

At night.

Ji Wentao returned to his rented apartment after dealing with the company's clients.

Fortunately, he had The Hangover grass. Otherwise, he would have to be half-dead before he could come back.

As soon as he entered the room, he lay down on the sofa, took out his phone, and started to watch videos to pass time.

After watching a few videos, he found an unexpected livestream room, which was the livestream of the official account of Linlin villa.

When he saw the title of the livestream, he remembered that Linlin villa had an event for the greenhouse tree seeds.

He had followed Linlin's official account before, filled in his name and ID information, and participated in the voting.

Ji Wentao hurriedly entered the live broadcast room and put on his Wolf Fang headphones.

This was also his habit.

It was a form of courtesy to watch a video in public without making a sound that would affect others. After getting used to it, he would wear Wolf Fang headphones no matter where he went.

In the live broadcast room, the lottery had not even started, but the number of online viewers had already reached 20 million. It was terrifying.

Ji Wentao hurriedly checked the design he had voted for. It was one of the five designs that had won.

In other words, he was now qualified to participate in the lottery?

This made his face reveal a look of anticipation and joy.

After all, the seed was worth 10 million.

If he won the lottery, he and his girlfriend would be able to buy a house and leave this apartment in this second-tier city. They could also buy a car and have money to marry.

Soon, the lucky draw for Linlin villa's live broadcast room began.

Just as Ji Wentao was about to watch the live broadcast, the door opened and his girlfriend, who had just returned, came out. Her hair was let down and she was wearing her pajamas. She had obviously taken a shower.

"Baby, your new pajamas are so pretty." Ji Wentao couldn't help but praise his girlfriend, and then put his phone on the table.

His girlfriend was dressed so sexily and beautifully. He had to do something, right?

With the Bluetooth headset, he could tell whether he had won the lottery by listening to the sound of the music without watching the live broadcast.

Soon, the surroundings were filled with the rhythm of clothes fluttering in the wind.

After a long foreplay, they entered the main topic.

However, just as he got to the point, a message came through his Bluetooth headset. "Congratulations to Mr. Ji Wentao whose ID card is 3504291996xxxxx, you've been hit by the 5th greenhouse tree seed!"

Upon hearing this, Ji Wentao was so excited that he immediately lost his composure.

hubby, what are you doing? " his girlfriend was shocked and looked at Ji Wentao with her eyes wide open.

She couldn't take it anymore after all that.

But it had only been three seconds, right?

only then did ji wentao react, and said embarrassedly, "Baby, let me explain, Yingluo."

"Ah, I don't want to listen to Yingluo!" His girlfriend shouted and kicked him to the ground, her face full of annoyance and dissatisfaction.

At the same time, nine other lucky people were also hit by the greenhouse tree seeds on different occasions, just like Ji Wentao.

...

The next day.

Linlin villa was on the hot search again.

One of the reasons was naturally because of the Linlin villa's official account's live broadcast. Last night's live broadcast of the lucky draw had directly broken the record for the number of online viewers, and it had created a number that no one else could reach.

[Chapter 1095 Have You Watched "Jurassic Park"? 2](#)

There were also the greenhouse tree seeds and the winning fans and designers who could receive the seeds.

These people rushed to the Linlin Manor as fast as they could.

There were even people who set off overnight.

Moreover, after the broadcast of the lucky draw in the house, countless people had sent out messages to purchase greenhouse tree seeds.

No one knew if he was really buying or if he was trying to cheat the seeds.

however, after a day, someone saw the loser rich second generation young master wang at linlin villa.

He was a big internet celebrity and a hot topic.

When he arrived at Linlin villa, he naturally got someone to take a video and upload it, which made it to the hot topic.

Not long after, Linlin Manor distributed the greenhouse Seeds to the designers and the winning fans. Young master Wang also posted a picture on his private media account.

The picture was a greenhouse tree seed.

There were two seeds inside.

The title was "seeds bought for 20 million."

Qin Lin naturally didn't ask about these matters anymore and left them to Lin Lanzi to handle.

In the office of Linlin Manor.

Qin Lin controlled his character and went to the seed store.

After the space land was upgraded, the seed store opened a Space Seed Project. According to the introduction, the seed store might refresh space seeds.

Therefore, he would control his game character to come to the seed store every day to check on the situation.

Unfortunately, in the space Seed Project, he had not seen any other seeds refresh except for the mutant space vine seed.

Today, there were only mutant space Vine Seeds, and no new seeds were spawned.

Qin Lin could only give up. He controlled the game character to leave the seed store, then controlled the game character to go to the lake mine and directly entered the 45th floor.

With the Blessed hoe, the probability of obtaining good items from mining increased. He could also mine special items that could only be obtained by the Blessed hoe.

This time, the lake mine wasn't restricted, so he definitely had to continue mining.

After entering the 45th floor, Qin Lin controlled his game character to smash the stones on the 45th floor one by one with a hammer. Then, he took out a blessed hoe and began to dig.

Because the Blessed hoe retained the efficiency of the silver hoe, it could dig four pieces of land around him. It didn't take long for him to control his game character to dig the 45th floor.

Unfortunately, the 45th floor did not drop anything good.

He had no choice but to control his character to go to the 46th floor and continue digging.

unfortunately, after continuously excavating up to the 48th floor, other than gold, silver, copper, and diamond ores, there was no other harvest.

There wasn't even a single special item.

This was a little too much.

As if the system had heard his complaints, finally, when the 48th floor was completely excavated, a notification appeared:

[congratulations, you have found a special ancient brachiopod bone!]

There was also a small animation of a bone being dug out in the game. The brachiopod also appeared. Then, the brachiopod died, and its corpse fell into the sea, settled, and was washed into the mine.

The small animation showed the origin of the ancient Brachiosaurus bone.

Moreover, out of all the things he had dug up, this was the first thing that had a small animation.

"Brachiosaurus?" Qin Lin was a little surprised. He had read about this before when he was studying.

Brachiosauruses were very docile herbivorous dinosaurs. They were also one of the largest and heaviest dinosaurs that had ever appeared on Earth. They were famous for their huge forelimbs and long necks like giraffes.

In other words, they had dug up a dinosaur fossil?

Qin Lin looked at his game character putting the bone into his backpack with some confusion on his face.

The special Brachiosaurus 'bone must be one of the special ancient remains that the Blessed hoe could dig up.

But what could a piece of dinosaur bone do? It had a special effect when used to brew wine, just like the bones of a Sea Dog?

he would have to wait until he saw the remark of the bone to know.

Qin Lin controlled his character to go to the 49th floor, but he received a system notification.

[the current level is restricted from entering the next level!]

This meant that his character's level was not high enough.

Seeing this, Qin Lin had no choice but to control his game character to go back to the ranch. Then, he took out the special ancient Brachiosaurus bone and entered the game with a thought.

This special ancient Brachiosaurus bone was about half a meter long. Most of it was already petrified, so it still felt a little heavy.

At the same time, Qin Lin also saw the remark of this special ancient Brachiosaurus bone:

[special cause Brachiosaurus bone: special!]

[this is a special dinosaur bone. It seems to have been left behind from ancient times. For some reason, a Brachyponera gene was left in the bone. Special effect: [it seems that this gene can be extracted for research, and there is a chance to breed an ancient and very docile brachiopod!]

Qin Lin was shocked when he saw the note.

What was the meaning of this?

There was also a Brachiosaurus gene in the bone. If this gene could be extracted, there was a chance of breeding a Brachiosaurus?

It could be considered a heaven-defying attribute.

Many people had watched the film series " Jurassic Park " before. In the film, a gene company had accidentally obtained genetic research and bred ancient dinosaurs.

They raised these bred dinosaurs and built a Dinosaur Park for people to admire.

naturally, these dinosaurs in the movies would always have accidents, causing a lot of trouble.

There were no dinosaur genes in the real world, only dinosaur fossils. These fossils had long turned into stone, and it was impossible for the genes to exist anymore.

[Chapter 1096 Have You Watched Jurassic Park? 3](#)

on the other hand, there were many research institutions that fooled investors or exaggerated their propaganda about researching and extracting genes from fossils to resurrect dinosaurs.

However, this had been going on for more than 10 years, and many of these research institutions had disappeared in the end. No one had ever seen anyone who had obtained dinosaur genes.

Perhaps some people would say it, but others might not say it even if they had it.

This was where they were wrong. With this kind of research, if someone could really obtain dinosaur genes, it was guaranteed that the whole world would know about it soon. This was because it involved fame, status, and money. It was also a genetic miracle that led the world.

Now, he could extract the Brachiosaurus 'gene from this special ancient Brachiosaurus bone.

Then, Qin Lin thought of something else. Was it really possible for him to breed brachiosauruses with this gene?

thinking of this possibility, he was even more distressed. should he put the brachiopod in linlin ranch or in the developed mountain?

At that time, people all over the world would be shocked.

However, this was just a thought.

He still had another problem, and that was that he had no knowledge in this area.

Plant genes and animal genes were different in nature, let alone the recovery of dinosaur genes.

The key was that he couldn't even make old brother li take the blame. Old brother li was also not good at animal genes.

Find someone else to take the blame? The risk was too great.

He had no way to completely grasp this kind of thing.

So, after thinking for a long time, Qin Lin pulled his hair madly. He had to take the blame for this.

the key was that he really didn't know anything about animal genes.

Unless he went to the library, obtained a mysterious stone Book, and then compiled all the research books, knowledge books, and scientific research books related to animals into a book, and then studied them all.

In that case, he could extract the gene himself and try to breed a Brachiosaurus.

The key was the mysterious stone Book.

this wasn't something he could get just because he wanted it. it depended on whether the game and the system gave him face or not.

Therefore, after Qin Lin logged out of the game, he controlled the game and went to the library. Unfortunately, Mary was still at the front desk and did not come out.

In other words, he could forget about the mysterious stone Book.

Qin Lin sighed.

The game was not giving him any face at all.

Therefore, he couldn't take out the special ancient Brachiosaurus bone for the time being. After all, without the corresponding knowledge, he couldn't do anything at all. It was better to keep it in the game.

However, even if he had obtained the mysterious stone Book later on, it was still too shocking for him to suddenly have so much animal-related knowledge.

There was always a need to lay the foundations for everything, right?

Qin Lin dialed Minister Lu's number.

Minister Lu was obviously very happy to receive Qin Lin's call. He smiled and said, "Boss Qin, why are you calling me?"

Qin Lin put on an act. Minister Lu, I've been interested in animal-related genetic research recently. I've read a lot of books. Can you help me find some experimental theories and materials related to animal genes at the Chinese Academy of Sciences? it'd be best if an academician published some related books.

Minister Lu was pleasantly surprised when he heard this. He subconsciously said, "Boss Qin, you've thought it through? You should read more of these scientific research papers and books. You can't waste your talent. Just wait, I'll go find it for you."

He hung up the phone almost immediately, called his assistant, and began to contact the academicians in the Institute who were involved in animal genetics research.

He had put in a lot of effort into this matter. After all, boss Qin had put in a lot of effort into this.

Naturally, Minister Lu's series of actions made many people in the Chinese Academy of Sciences know that Qin Lin wanted to study animal genetics.

Those who knew about Qin Lin's monstrous talent, such as Minister Lu, academician Hao, academician Zhu, and academician Jin, couldn't help but look forward to it.

With boss Qin's talent, who knew when he would have some achievements in animal genetic research?

This thought made them jump in shock.

only a person with demonic talent like boss qin could make them have such thoughts.

[Chapter 1097 494-A Sudden Turn Of Events!](#)

Linlin Manor.

In the office.

Qin Lin opened a package delivered by Ma Hong.

The package contained some information and research papers on animal genes, which were sent by Minister Lu.

This information was not available to ordinary people, and the Chinese Academy of Sciences would not give it to outsiders.

Qin Lin was obviously different.

Minister Lu couldn't wait for Qin Lin to put his monstrous talent in the right place and stop learning cooking and other improper things.

Furthermore, Qin Lin had also donated a lot of technology to the higher-ups.

This bit of information was nothing compared to the technology.

After Qin Lin took out the documents, he rubbed them twice to show that he had read them. They were all wrinkled by himself.

He then locked the documents in the drawer.

What kind of joke was this? without the mysterious stone Book, wouldn't he have a headache if he were to read these things by himself?

Naturally, he would wait until he obtained the mysterious stone Book and then use it again.

as for learning, he was done with it.

qin lin was looking at the game in his mind when master lin came.

"Master Lin, please sit." Qin Lin was very polite to Master Lin.

firstly, this old master was a senior figure. he had been around when the mountain villa had just started planting the triangular plum and had helped him a lot.

In the beginning, it was the other party who helped to keep an eye on the villa.

In terms of experience, this old master was even older than Chen dabe.

Moreover, the other party was also of a certain age. Even if he was the boss, he still had to give him a certain amount of respect.

After Master Lin sat down, he looked a little conflicted and a little embarrassed. He looked like he wanted to say something but stopped.

"Master Lin, what's the matter?" Qin Lin asked.

master lin wanted to say something but stopped for a long time. boss, I just want to ask you for a favor. Isn't Ginkgo Garden doing an ancient costume photoshoot and is looking for a photographer? "

"Is there such a thing?" Qin Lin turned on his computer and logged into the Linlin villa APP to check the latest news.

the ginkgo garden was the most special place in Linlin Manor.

The sound of trees was still the most popular pure music on the internet.

The sound of the tree chirping could be heard from all the rest areas in Linlin Manor.

This was because the tree chirping sound had the attributes of +2 to the ear, +2 to the mind, +2 to relieve stress, and +2 to relax the body and mind.

Even if it was recorded and uploaded online, the attribute effect would be reduced to only +1, but it was still regarded as a way to comfort the mind and relieve stress by those who were under extreme work pressure.

Many people wanted to come to Linlin Manor's Ginkgo Garden for a pilgrimage and see these two ginkgo trees.

It was a pity that not everyone could enter the Ginkgo courtyard. One had to draw a lottery. Only those who won the lottery had the chance to enter, and the number of people who could enter was fixed.

After Qin Lin logged into the Linlin villa APP, he found that Ginkgo Garden was indeed recruiting photographers, and there was a description of the project below.

Someone had suggested this project and wanted to give the reason and benefits. Then, the villa had a meeting and passed it. The project had started, and Zhao Moyin had already signed it.

However, this was just a small project that could not be any smaller.

The person who suggested this project was a supervisor of the villa.

The reason for his statement was very simple. The ancient Ginkgo Plus retro courtyard construction itself had a strong ancient style.

If people could wear Han Chinese clothing and take pictures under two ginkgo trees, this golden scenery was the most beautiful season of the ginkgo trees. It would add to the ancient style and make it more attractive.

Moreover, the villa had already found someone to wear Han Chinese clothing and had the multimedia department's photographer shoot a series of videos. It was indeed very attractive and beautiful.

The video received more than 2 million likes when it was uploaded with the Song of the Tree.

It was not important whether this project would make money or not. After all, the main purpose of limiting the number of visitors entering the Ginkgo Garden every day was to increase its attraction and function. This could also increase the popularity of the two ginkgo trees.

Since the project had been decided, they naturally needed a photographer.

Originally, there were photographers in the multimedia department, but in addition to shooting the videos required by the official account, they also had to shoot videos of a few animals, so it was difficult for them to stay there permanently.

In addition, fairy tale mountain had been developed, and they would also need photographers.

Therefore, the multimedia department planned to recruit three more photographers and train them. Then, they would take turns to work in Ginkgo Garden. After the development of fairy tale mountain was completed, they could also send photographers over directly.

"master lin, ginkgo garden is recruiting photographers. what's the matter?" Qin Lin knew that Master Lin must have something to say since he suddenly asked this.

Master Lin hesitated for a moment, then took out a phone and handed it to Qin Lin. "Boss, take a look at these videos."

Qin Lin took the phone.

there were a few videos saved in it, all of which were videos of beautiful women in traditional chinese clothing shot by ginkgo garden.

The video was quite well taken.

Master Lin said, a little embarrassed, " boss, I have a granddaughter who studies photography. She graduated last year and used to work at a photography company in Shanghai. When she saw that the villa was looking for a photographer, she wanted to come, but the competition is too big. For this granddaughter, I can only thicken my face and come to you, boss.

Linlin Manor wanted to recruit some positions, so the competition was definitely huge.

Even in a first-tier city, the salary of a photographer was only about 7000 Yuan a month after graduation.

Even if he worked as a photographer for a famous internet celebrity, the other party would only give him a little more than ten thousand Yuan.

The salary of the chief videographer of a top brand in Shanghai was less than 20000 Yuan a month.

Of course, this was referring to most of the photographers. Some photographers were flexible and had their own ideas. They could take on their own jobs. If they did well, they could easily get 40000 to 50000 Yuan or more.

[Chapter 1098 494-A Sudden Turn Of Events!](#)

However, these people were in the minority.

On the other hand, Linlin villa gave the photographer a base salary of more than 20000 Yuan. There was also a bonus every month, food and accommodation. Even if he did not live in the dormitory, he would still receive accommodation subsidies.

For those who sought stability, this was definitely a dream position. Even the chief photographer of Shanghai's top brands would be envious.

master lin was a veteran and rarely asked him for anything. now that he had asked, he had to give him some face.

After all, being a photographer wasn't an important position. If it was a department management position, he believed that Master Lin wouldn't have asked for it.

He believed this.

He added, " Master Lin, I'll give the multimedia department a call. You can just let your granddaughter go for the interview in the afternoon. Naturally, whether she needs it or not is the multimedia department's business. She has to at least meet the most basic requirements of the multimedia department.

He didn't give Master Lin any guarantee, but the underlying meaning was already a guarantee.

In this kind of competitive recruitment, the first thing that mattered was the ability.

For those with the same ability, it would be up to who had connections and who had a strong backing.

Naturally, countries that used human relationships all paid attention to close and distant relationships. If one's relationship and background were strong enough, there was no need for others to say anything. If one could meet the usage requirements, it was equivalent to an internal agreement.

Of course, the most important thing was that Master Lin's granddaughter's videos were of a certain standard.

"Thank you, boss. I'll go back and talk to her." master lin immediately thanked him and left the office happily.

He had confidence in his granddaughter and was certain that she would meet the requirements of the multimedia department.

The reason why he came to beg the boss was that there were too many people competing for it. There were too many outstanding people, and he just wanted to give his granddaughter more protection.

Seeing this, Qin Lin also called Lin Lanzi and explained the matter to her.

Lin Lanzi was naturally very clear about this matter. She was originally the organizer of the county's performance group, and her parents were also part of the system.

She understood the ways of the world better than anyone else.

As long as it didn't affect the overall situation, there were some benefits to this kind of worldly wisdom. At least, it was more convenient for his own people than for those outside, and he didn't have to worry so much.

Sometimes, they needed such people.

master lin left qin lin's office and immediately went to the parking lot of linlin villa. he got into a honda feidu and drove out of the manor.

His salary and bonus were actually not low, and he could drive a better car.

In Linlin villa, he was considered a high-level manager of a Department.

He had the final say in the kitchen of the dining hall and the kitchen of the manor.

However, he was an old man, so he could just have a car. Besides, he rarely went anywhere other than the villa and the manor.

Master Lin's house was in a small town in Taixi, which was 40 minutes away from the villa.

Now that his family had built a house, he had naturally paid for it. He had also paid for his grandson's studies.

Therefore, his words still carried enormous weight at home. Whether it was his son or son-in-law, none of them dared to say a word when he spoke.

His two son-in-laws also lived in the same town and were close to each other.

The small town of Taixi was not big.

Everyone in the town knew that Master Lin had driven his car in.

As the only person in the town who had been on the news and was in charge of the kitchen in Linlin villa, he was a famous person in the town.

Who in your city didn't know about Linlin company?

Most of the people in the town relied on Linlin's company for a living. They either grew Linlin watermelons or Linlin tribute rice.

Moreover, many of them had entered Linlin's factory.

To the townspeople, Master Lin was in charge of the kitchen in Linlin Manor, and the boss of Linlin company was often seen. He was like a popular person in front of the Emperor in ancient times.

Hence, the moment Master Lin returned, not only did the townspeople know about it, but they also came to get close to him.

He was surprised to find that Master Lin's family was the most famous person in the town.

After Master Lin dealt with the people in the town, he immediately called his granddaughter, Chen Hui.

Chen Hui had just graduated and was still a young girl in her prime. Plus, she was a photographer, so she had some special temperament.

In today's society where all women were beautiful and goddesses, she would probably be a beauty in the eyes of many men.

"Grandpa, how is it?" Chen Hui asked expectantly when she saw Master Lin.

In the past, her grandfather was just a chef, and her family was not considered rich. In fact, she did not have a family background in school.

However, she did not expect that in just two years, her grandfather, who was a chef, would become her biggest backing.

In school, when others heard that her grandfather was the one who cooked for the boss of the Linlin company in the Linlin Manor, the one who saved the two ginkgo trees in the Linlin Manor, their classmates would immediately show their envy.

This time, Linlin villa was looking for a photographer. Although she might be able to hire one with her ability, if her grandfather interceded, it would be a done deal.

Linlin villa's photographer's job was the same even as the chief photographer of Shanghai's top photography studio.

As far as she knew, there were many outstanding and well-known photographers who sent their resumes to apply for the job.

yes, " Master Lin nodded. come with me to the villa this afternoon. I'll take you to the multimedia department.

When Chen Hui heard this news, she immediately hugged Master Lin in excitement. Grandpa, you're the best. I'm so grateful to you.

Master Lin looked at his happy granddaughter and solemnly reminded her, " Xiao Hui, I've shamelessly looked for the boss for this matter. So, I have a few things to tell you.

[Chapter 1099 494-A Sudden Turn Of Events!](#)

first, don't mess around when you're working in the villa. You have to work seriously.

second, I can't give you any special treatment. I have to listen to the leader's arrangements and learn from my seniors seriously. I can't be put in a difficult position by my boss.

His way of dealing with people was that since his boss gave him face, he couldn't let his boss lose face.

When Chen Hui heard this, she immediately said,"Grandpa, I understand. Do you think your granddaughter is that stupid?" What good will it do me in the future if I embarrass you in front of the boss?"

"It's good that you know." Master Lin nodded.

After inviting his two son-in-law's families over for a meal, Master Lin brought Chen Hui back to Linlin villa and went to the multimedia department.

...

Linlin Manor.

Qin Lin controlled his game character to complete his daily tasks in the office. Then, he controlled his game character to stroll around ore town, especially the seed shop and the library.

The seed store still did not have any space seeds.

The library was the same.

Mary was still at the front desk, as if telling him not to think about the mysterious stone Book today.

then, he walked out of the office. the mutated space vines outside the hall had been moved away. he only saw them when he arrived at the north corner of the manor.

Zhao Moyu planned to use these mutated space vines to decorate the greenhouse trees in the manor.

Lin Han had already led the engineering department of Linlin villa to renovate the other greenhouse trees.

Moreover, she had already made an appointment with her senior brothers and sisters.

When the greenhouse trees were finished, the senior brothers and sisters should have finished their work and come over. At that time, they would discuss the greenhouse Tree Community on the mountaintop.

Zhao mochen was also supervising from the side, checking on the progress of the renovation. It was clear how much she liked the greenhouse trees.

"chairman qin!" Lin Han greeted Qin Lin as soon as she saw him.

"Honey, let's see how the renovation is going." Zhao Moxi hurriedly pulled Qin Lin towards a greenhouse tree.

The decoration of the greenhouse and the decoration of ordinary houses were different in the game.

However, it had to be said that Lin Han really had artistic talent and ability. Whether it was her own design or the design of others, she had brought people to renovate it very well.

It was no wonder that Zhao mochen would invest in her.

Qin Lin accompanied Zhao mochen to check out the decoration of the greenhouse. Just as they were about to leave the manor, Gao Yaoyao ran over anxiously. "Boss, something's wrong. Go and see wangcai and the rest."

"what happened to wang cai and the rest?" Qin Lin asked with a frown when he saw how anxious Gao Yaoyao was.

Gao Yaoyao explained anxiously, " I don't know either. They're not moving at all in the living room. Their bodies are still burning, and their eyes are listless. I've already called sister Guizhu and asked her to bring someone over to check!

When Qin Lin and Zhao Moyu heard this, they hurried back to the manor's Hall. Sure enough, they saw wangcai lying on the ground, its tongue hanging out weakly. Xiaoxue, who was next to it, was also listless.

At the side, the little squirrel, red hair, was a little anxious as it circled around wangcai. It even squeaked at the two, as if it was anxiously asking how they were.

That anxious look was not at all like the fire and water relationship from before.

When wangcai saw Qin Lin, it started to whine at him. Its voice was a little hoarse, as if it couldn't make a sound.

Xiao Wu flapped her wings and flew to the table to the side, saying: "Master, the dog said it felt uncomfortable!"

"Why did they suddenly become like this?" qin lin asked as he squatted down and touched the dog and snowy. their bodies were really hot, and he could feel it even through their fur.

Gao Yaoyao shook her head. I don't know. They've been listless since they came back.

Soon, Zhang Guizhu came with the veterinarian and began to check on wangcai and Xiaoxue.

However, as the veterinarians checked, their expressions became more and more serious because the situation was complicated.

Even at night, the veterinarians still could not find anything.

The next day, Qin Lin woke up and received very bad news.

[Chapter 1100 We Can Only Rely On The Pet Merchant](#)

Qin Lin woke up early in the morning and heard his mother's anxious voice. "Lin Lin, come out and take a look at little red hair and the two parrots."

When Qin Lin came out, he saw his mother anxiously looking at Chi Mao, Xiao Wu, and Xiao Bao, who were sitting on the sofa.

Their bodies were lying on the sofa, just like wangcai and Xiaoxue yesterday.

Xiao Wu still weakly muttered, "Master, it's uncomfortable, it's so uncomfortable!"

Qin Lin hurriedly went over and touched the three little ones. Sure enough, they were as hot as wangcai and Xiaoxue.

He quickly called Chen dabei and asked him to send Chi Mao, Xiao Wu, and Xiao Bao to the veterinary Department.

Qin Lin saw Zhang Guizhu and the veterinarians when he arrived.

Zhang Guizhu and the veterinarians looked Haggard. They had stayed up all night.

Wangcai and Xiaoxue had special status in Linlin villa. They were both internet celebrities. Now that they were sick, the whole Veterinary Department did not dare to neglect them and worked overtime the whole night.

Qin Lin saw Zhang Guizhu and immediately asked, "How are Wang Cai and the rest? Did you find out the reason?"

Zhang Guizhu's face didn't look good. Chairman Qin, the situation is a little complicated. Our doctors in the veterinary Department have examined and analyzed it overnight, but we haven't seen the symptoms. Now we have to use their feces, blood, and saliva to go to a special institution for testing.

This was obviously not good news.

Qin Lin also hurriedly asked Zhang Guizhu to bring people to check red hair, Xiao Wu, and xiaobao.

"Why are red hair and the others like this? Quick, check them." Zhang Guizhu was very familiar with red hair.

When she came to the mountain villa for a job interview, her first job was to take care of red hair and those little squirrels.

However, as they examined red hair and the rest, Zhang Guizhu and the veterinarians' faces became more and more ugly.

After a thorough inspection, Zhang Guizhu reported with an anxious expression, " "president qin, red hair and the others have the same symptoms as wangcai. this means that the disease may be contagious. we don't know if it's harmful to humans, so we must take the corresponding precautions immediately."

qin lin also frowned.

No matter what disease it was, as long as it was contagious, it would be very troublesome.

Thinking about the previous disaster, it was highly contagious and caused a huge disaster.

At this moment.

Yang Dong ran over in a hurry, his face pale as he said, " Guizhu, it's not good. There's a big problem. Hurry and take the doctor to see the animals in the ranch and the Ducks in the duck house.

Seeing this, Qin Lin's heart skipped a beat and he hurriedly asked, " "What's going on?"

Yang Dong saw Qin Lin and said hurriedly, " Chairman Qin, it's good that you're here. I was just about to report to you. I don't know what's going on with the animals on the farm and the Ducks in the Duckhouse. Many of them were lying on their stomachs listlessly this morning, and their bodies are burning hot.

These words made Qin Lin and Zhang Guizhu's mood drop.

Qin Lin ordered people to take care of red fur and the rest, then went straight to Linlin Ranch.

When they arrived at the ranch, all the horses, white peacocks, happy elephants, Wahe cows, fitness pigs, and beauty ducks were sick. They were lying on the ground listlessly, just like wangcai and red hair.

Zhang Guizhu hurriedly said, " Chairman Qin, it seems that the situation is a little bad. The disease has spread. Moreover, it seems to be very contagious.

we have to separate the sick animals from the healthy animals. Also, the situation is unclear, so the staff must wear protective masks and the like.

"The scenic Area can't open for business today!" Qin Lin naturally knew the seriousness of this matter.

If the disease affected people, how serious would it be for the scenic Area to receive so many tourists every day?

Qin Lin immediately called Zhao moyin and informed him of the situation. Then, he hurried back to the manor.

Now, he had to treat these wangcai and the rest first.

If the vet Department couldn't find anything, they could only go to the pet merchant in the game, who sold potions to treat various diseases in animals.

However, he received a call from Chen Li the moment he left the farm.

"Hello, Xian Chen, what's wrong?" he answered the call immediately.

"Boss Qin, how are the animals in your Linlin Ranch?" Chen Li's anxious voice came through. Did you feel weak all over, or did you feel hot?"

Qin Lin was stunned when he heard the news, but he didn't hide it. County Chen, the animals in our farm are all experiencing this. We don't know the reason yet. County Chen, how did you know? "

"It's that bad?" sigh ... Chen Li's anxious sigh sounded, " yesterday, you city's Animal Control Department and Pet Hospital found that the pets have abnormal symptoms. They are all in the same situation.

also, in the past day, we have received reports that, whether it is the county or the towns, the same situation has occurred in everyone's chickens, ducks, cattle, or pets.

you city's Animal Control Department suspects it's some kind of infectious disease, but the specific situation is unknown.

In you City County.

after chen li hung up the phone, he turned to sun xian with an unsightly expression and said,"sun xian, the situation is not good. the animals in linlin ranch are also affected."

Sun Xian's expression turned ugly when he heard this.

Linlin Ranch was a key tourism industry in you city. The animals played a big role in its popularity. If anything happened to it, it would be terrible.

Why did such a situation suddenly occur in you city?
