

The Game 1121

[Chapter 1121 504-Adding Flowers To The Brocade And Transforming Into The Night Empress Who Wants To Secretly Harm Qin Lin?](#)

Bowens' laboratory.

After receiving Rast's order, Bowen immediately gathered the experts from several Western countries and started to re-experiment the effects of the potion.

He had also shown the news to these experts.

These experts obviously felt that their world views had been impacted.

A potion that could cure the cobble plague at high temperatures could actually cure all animal plagues?

With this potion in the future, wouldn't all animal plagues be safe?

However, such a potion should not appear in reality.

As the top laboratory for animal plagues, Bowen's laboratory naturally contained all kinds of animal plagues. Even plagues that had never been announced to the outside world or even appeared before were present.

As for why there were diseases that had not been announced to the outside world, or even never appeared, it would have to be studied in detail.

Bowen and the experts began their experiments as quickly as possible. Just like the people in the Chinese hospital, they first infected animals with the disease and then treated them with the medicine.

But as the experiment went on, the faces of Bowen and the experts became more and more ugly, and they were more and more shocked.

This potion actually cured the animal plagues one by one.

One had to know that these plagues were still a big problem in many cases.

Although many companies' drugs could treat it, their effects were limited. They couldn't be compared to this medicine at all.

Moreover, the experiments of this potion had cured all the animal plagues that had been recorded in the outside world, and even those plagues and diseases that the outside world did not know about.

In other words, the plague that they had kept unknown to the outside world was now useless.

They still wanted to study the animal plague that had never appeared in the outside world.

When the animal plague appeared, they would amaze the world with a single brilliant feat.

When the last animal plague was cured, Bowen and the experts were completely numb.

It's unbelievable. It really has such an effect.

"That Qin from the eastern kingdom is still a young man, right? What will his future be like?"

" i can't imagine it. i don't want to believe this. "

however, this was the reality.

The more you didn't want to believe it, the more it happened.

This also meant that they were really not as good as the young man from the eastern country in terms of animal plague.

In the end, Bowen sighed deeply. Now, he also recognized the fact that he, the world's number one animal plague expert, was indeed no match for the other party.

This all-purpose medicine for treating animal plagues should not have appeared in this era.

in the end, bowens met rast again with a nervous heart.

"How is it? Have you checked everything?" Rast immediately asked.

Bowens reported with a frown. Mr. Rast, that potion can indeed cure all kinds of animal plagues. The effects have been confirmed. The person who developed this potion is definitely a genius.

Bowens couldn't help but praise him.

He had no choice. Even if he was very unwilling, he had to be praised for developing such a thing.

That was because the higher he praised the other party, the lower he would seem.

otherwise, wouldn't he be someone who didn't know his own limitations?

It could be said that a large number of people in this world didn't know their own limitations to a certain extent.

For example, if he scored 60 on an exam, he would shamelessly boast that others only scored 95.

For example, he didn't even have his own car, but he shamelessly said that the other person only drove a BMW.

This kind of person who didn't know his own limitations was reflected in all aspects of life.

what a pity, " LAist could not help but sigh. why would such a genius appear in that Eastern country? "

Then, he frowned and looked at Bowen. "We have to think of a way to get this genius. You know, asking for help and getting the help of this potion will cost a lot."

" because my previous plan offended the other party. if i can't solve it, the others will make me bear the price alone. "

" mr. rast, that qin is very young, very young, " bowenz said immediately. " at his age, he'd probably only be in the lab all day, dealing with research equipment, and immersing himself in science books, research data, and information to achieve such an achievement. "

This was what Bowens knew, but he didn't know that in Linlin Manor, Qin Lin, who was seriously watching the game in his mind, sneezed and complained about who was talking about him.

Rast nodded in agreement with Bowen's words. How did Einstein create the year of Einstein?

Back then, Einstein dominated the scientific world, but it took countless days and months for him to achieve that. He had to leave the laboratory several times a year.

Mr. Rast, "Bowen said, "fortunately, he's still young. Young people always have great desires, and they're more interested in fame and reputation!

you know, we used these to rope in many young people from that Eastern country to join our nationality. These young people have basically become a front for our publicity, right? "

that's true, "said Rast, nodding. Honor is always able to move these young people. But for this person, I'm afraid a normal price won't do.

Mr. Rast, "Bowen said with a smile. There's a great opportunity recently. Isn't the Nobel award about to be awarded? The reward for this year's animal plague was supposed to be for me, but it hasn't been announced yet."

[Chapter 1122 504-Adding Flowers To The Brocade And Transforming Into The Night Empress Who Wants To Secretly Harm Qin Lin?](#)

I can give this award to that Qin. I'm sure he won't be able to resist the temptation of the highest honor and will go to receive it.

"When the time comes, as long as the other party is here, isn't this an opportunity? The other party isn't in that Eastern country, so many things will be easy to do. It's just that this will require Mr. Rast to operate."

Rast's eyes lit up when he heard this.

The Nobel Prize was a candidate recommended by various awards from September the year before last to January 31 of the following year.

From February 1st every year, the various evaluation committee would screen and approve the recommended candidates. Their work was strictly confidential.

In the middle of October every year, the list of Nobel Prize winners would be announced.

It was then presented to the winners on the anniversary of Nobel's death.

Naturally, this was the established process, but there were also unexpected circumstances that would delay the date.

This year's date was pushed back, and the reason was naturally because of the **** incident.

But because of this, the list of winners had been delayed and had not been announced yet, which created an opportunity for him.

However, it would cost a lot to suddenly place a winner in and replace Bowen with Qin.

It had been difficult in the past. After all, the Nobel Prize was won in a Lake Country, and the other party had always been neutral.

However, in recent years, the lake nation had been getting closer and closer to them. They had already applied to join the northern Tang organization and were also a member of the capital.

therefore, there was already a lot of room for manipulation.

"bowens, you've given a very good suggestion." LAist said with a smile.

As long as Qin Lai and nobei 'er received the award, there would be many things they could do, even if they had to destroy it if they couldn't get it.

...

In the greenhouse in the North corner of Linlin Manor.

Qin Lin looked helplessly at little Qin Feng in his arms. Next to him, Zhao moyin was in front of a computer, checking the financial statements of various companies in Lin Lin's company.

now, she had handed over the management of linlin villa to lin lanzi. she only had to manage the financial situation of each company.

qin lin was not used to the life of a stay-at-home dad all of a sudden. the key was that he held little qin feng in his arms. the little guy easily treated him as a mother. the key was that he got hungry easily and would open his mouth to bite when he was hungry.

This Kasaya

Qin Lin saw that little Qin Feng had fallen asleep. He looked at the screen in his mind out of boredom and controlled his game character to start dealing with daily tasks.

There were no surprises when fishing.

Almost all the fish that could be caught were already in the aquarium.

After that, it was time to cut down the trees.

This time, he was lucky enough to cut down another Chinese fir.

This was not the first time he had seen this tree. The way it was cut down was frightening. After all, cutting this tree would mean spending a long time in prison.

If it was in the game, he wouldn't have cut it just once or twice. In reality, not only would he have to sit in prison, but he would also have to step through the sewing machine.

he was a little lucky today. the mountain products had a new grade 2 tea, tie guanyin.

after completing these daily tasks, qin lin controlled his game character and went to rancher.

Moreover, his luck today was indeed pretty good.

In the seed store, he clicked on it and was surprised to find that a new space mutation seed had been refreshed in the space Seed list.

[mutated Night Queen of space: special!]

[this is the seed of the night queen flower that has mutated in space. After planting it, it can grow into a night queen flower that has mutated in space!]

this was a pleasant surprise.

This was not the first time Qin Lin had opened the seed store, but he had never seen any new seeds. He did not expect to see one today.

He knew about the night Empress flower. It was very beautiful.

The most important thing was that the seeds and flowers would emit a beautiful light at night. They were very beautiful. This could be planted in fairy tale mountain with the mutated space vine.

Moreover, this night Empress was the seed of space mutation. She would definitely have a lot more game attributes than the average night Empress, right?

Qin Lin immediately chose to buy it. This seed was like adding flowers to the brocade of fairy tale mountain, but the effect of adding flowers to it would definitely be very good.

After buying the seeds, he immediately controlled his game character to go back to the farm. Then, he went to the space land and planted the seeds on it.

After he was done, he was suddenly jolted back to his senses by a movement in his chest. He looked down and saw that little Qin Feng had woken up. He was biting his *** and was hungry again, treating him as his mother.

"mo xiao, save me!" qin yang immediately wailed for help.

Zhao Moyu saw the scene of his husband and son and couldn't help but laugh. He quickly put down his work and took little Qin Feng.

At this moment, his phone rang. It was Lin Lanzi.

He pressed the answer button and asked, "manager Lin, what's wrong?" What's the matter at the villa?"

Lin Lanzi immediately said, "Chairman Qin, there's nothing much going on at the villa. It's about you. You seem to have won the Nobel Prize.

"The Nobel Prize? What the hell?" qin lin was stunned.

lin lanzi immediately said, "president qin, quickly go online and take a look. this is the new hot search on the internet."

Qin Lin was puzzled. He hung up the phone and went online to check. As soon as he opened youyin, the first video he saw was the news about himself.

"congratulations, little qin, for winning the nobel prize and becoming the 4th national nobel prize winner, yingluo. "

" ? ? ? "Qin Lin scrolled through a few more videos and found out the reason.

it was all because of the coagulosis plague.

The medicine he produced had solved the plague, so he had received this award.

Moreover, this was nobel's third last-minute winner. According to the past, this would only be given out next year.

The first two were both Giants in the scientific community.

This was also what nobel 'er valued, and nobel' er had stated this on its official website.

One of the videos was of the world's top animal plague research expert, Bowens, praising him and calling him a rare genius.

The video was circulated in all Western countries, and it blew up on the Internet in China.

some people with strong national pride had already started to praise him. they even felt that china's research in this area had completely crushed the world.

qin lin frowned. he had a feeling that bowens was praising him to death.

After all, under normal circumstances, even if that was the case, the other party would not admit it and would even remain silent.

Qin Lin knew the Nobel Prize very well.

this award was good, and the intention was good. but many people on the internet said that the nobel prize was becoming more and more biased.

therefore, there are only three people who have obtained chinese citizenship.

The two seniors yang and tu were undisputable, using their strength to make everyone speechless.

However, the third-place literary scholar was highly controversial.

In fact, many Chinese people were proud of this nobel 'er and felt ashamed of him.

Qin Lin was not interested in this literary novel. He only knew that this person probably had a lot of ugly judging literature in literature, and the West liked this kind of domestic literature.

It was like a certain movie director, who did badly at the box office in China and was criticized badly, but always won awards in the West.

This was because his movies always demeaned a lot of things in the country. This was something that people were willing to see. People were also willing to play such demeaning movies in front of people all over the world.

In fact, there were many beautiful things in China, which was also what the netizens were arguing about.

Why can't I see so many good things? why do I only see ugliness?

In fact, the first person to win the nobel Literature Award was not the Grand Literature Award, but the senior from decades ago, whose surname was Zhou and Lu.

everyone had read the senior's essay in the textbooks. it was a living version of the old era, which was more in line with western aesthetics.

only, this senior had directly rejected the nobel prize.

While the internet was abuzz, Bowen and rast were both paying attention to this matter.

The two of them were very satisfied with the popularity.

you did well, bowenz, " said rast. your flattery, coupled with the praise we deliberately led to, should have made the other party's heart flutter at his age.

all we have to do now is wait for him to go to the lake nation to receive the award, " said Bowen with a smile. at his age, he can't resist the temptation of such honor.

[Chapter 1123 505-Without Anyone Knowing, He Must Go And Receive The Award](#)

The news that the Nobel Prize was going to be presented to Qin Lin was getting more and more popular on the internet.

because of someone's guidance, all kinds of praise appeared one after another. there were also many posts and videos that began to talk about how many benefits qin lin would bring if he went to receive the award, and how much honor he would bring to the people.

In other words, Qin Lin would suffer a huge loss if he didn't go to the award ceremony.

Even the official website of the Nobel Prize praised him many times and said that they would be looking for Qin Lin for the cover interview this year.

This even made many of nobel's award winners jealous.

This was because there was only one such interview every year, which meant that the person being interviewed was the most honored Person of the Year.

Under such high praise, a younger person might not be able to suppress their vanity.

However, Qin Lin became more and more annoyed as he watched the news. He felt like a wicked person who wanted to harm him.

Naturally, he was still worried that the game would be discovered.

Moreover, the Western countries had been sanctioned so many times in terms of technology. Only a fool would go and receive the award.

Besides, he didn't care about the Nobel Prize at all.

Many people on the internet had exposed what this award was about. It wasn't like they didn't know.

For example, in order to prevent her from returning to the country, senior Wang had been threatened with the Nobel Prize.

This was because senior Wang had the chance to win the Nobel Prize.

But what did senior Wang say? what was the use of winning the nobel prize if he couldn't return to china?

There were many such seniors.

This was also another reason why there were so few Nobel Prize winners in China.

Naturally, this was just his guess. Whether it was true or not, he did not know. After all, he had never come into contact with it.

If this kind of senior had such a strong character, why would he care about the Nobel Prize if he wanted to learn?

After all, he wasn't a scholar, nor was he a great writer.

Wasn't there another joke on the internet?

The president of a certain country launched 10 Wars and caused the death of 6 million people, but he received the nobel 'er Peace Prize.

Qin Lin put down his phone and ignored the news on the internet. However, a notification appeared in the game.

it was a notification that the night queen had matured on the space ground.

There were already dwarves harvesting the night Empress.

Qin Lin locked the office door and entered the game.

When they reached the game farm, the dwarves had already finished harvesting the night Queen.

The night Empress also placed it in the courtyard where she stored the seedlings.

The night Empress was a flower of the liliaishi family, the tulip family. It had a bright color and a smooth, silk-like appearance.

Moreover, the flower was a noble black-purple color. At night, the flower would sparkle like fireflies, mainly because the pistil was rich in phosphorus element.

These phosphorus elements would have a chemical reaction when they came into contact with the air in the dark of the night, and they would appear to shine.

This type of tulip was also very popular. Moreover, because it was artificially cultivated, it was easy to buy and not very expensive.

The night Empress that he had harvested were all exquisite potted plants that were planted in flower pots.

Qin Lin stepped forward and touched one of the pots. He saw the remark:

[mutated Night Queen of space: special]

[this is a vine that has mutated in outer space. It has a special function. It can absorb light during the day and have a special effect on its cells. It also emits a special fluorescent light at night. The time ratio

is: one hour of light absorption can release ten hours of fluorescent light. It is harmless and has no seasonal limit. Gentleness +1, tranquility +1, brightness +1, photogenic +1, appreciation +1, growth speed +1!]

[restrictions: due to the space mutation, it has high environmental requirements. It can only adapt to the environment once, and it will be difficult to survive if there is a slight change in the environment!]

Qin Lin was a little surprised to see this remark.

This was because the remark was the same as the mutated space vine, even the special environmental restrictions were the same.

This seemed to be a unique attribute of the open space.

Qin Lin looked up at the sky. The sun was shining in the game.

He immediately exited the game. Due to the game's special time ratio, time passed quickly in the game.

When the sky in the game turned dark, he returned to the game with another thought.

at this moment, the courtyard where the seedlings were stored was completely different.

In the dark night, a purplish-blue fluorescent light enveloped the entire courtyard. It was very magical, beautiful, and beautiful!

This was the glow released by the night Empress. Moreover, with the light +1 attribute, the light emitted by the night Empress was even more brilliant and beautiful, not weaker than the mutated space vine.

It also had the property of calming people down, and it was very comfortable to be in this fluorescent light.

The +1 appreciation attribute also made the night Queen as eye-catching as the mutated space vine.

Qin Lin suddenly thought of something.

If more of these seeds were spawned in the outer space, fairy tale mountain would be planted with these seeds in the future. What would it be like?

moreover, due to the limitations of the special environment, even if someone stole it, they couldn't grow it. it was even more difficult than xiangshui tribute rice. after all, it was impossible for others to have external modifications.

As he thought about it, Qin Lin logged out of the game and controlled his character to go to ore town. He bought a lot of night Empress seeds from the game seed store, then entered the game again and brought the night Empress seeds out of the game.

However, he had to consider how to promote the night Empress and plant her.

A lot of mutated space vines had been planted, and they were just waiting to harvest the seeds. When Captain Tang and his team found the last meteorite on fairy tale mountain, they could plant them.

[Chapter 1124 505-Without Anyone Knowing, He Must Go And Receive The Award 2](#)

Moreover, the mutated space vine was created by the meteorite that fell from the valley. With academician Li's proof of its origin, it could be taken out openly.

The night Empress couldn't possibly come again, right?

Then, he patted his head and thought, 'f * ck.'

There was already a mutated space vine.

He could say that he had studied the space vine and was lucky enough to raise the night Queen.

After all, everyone now thought that he was a genius and that he was very good at plant research. They didn't know that he was a fake that deceived the world to steal his reputation.

So, it should be normal for him to develop some kind of plant through the mutant space vine, right?

Therefore, in the future, such things could be created using this method.

This was his best solution.

As soon as he thought of this, he immediately went online and ordered some Night Queen Seeds. In order to avoid being an experiment, he could plant these Night Queen Seeds together. By then, he could avoid using the probability and luck.

in addition.

Qin Lin also bought some other seeds.

By that time, none of these seeds would have any results. Only some of the night Empress 'seeds would have succeeded, and the effect of pushing away probability and luck would be even better.

The next day.

The seeds that he had purchased arrived.

He put these seeds together and then mixed the night Queen Seeds he brought out from the game with the night Queen Seeds he bought outside.

the night queen seed produced by the game was a little different from the ones bought outside. however, it was mixed in with so many seeds that no one would notice it if they didn't pay attention.

After that, he took a pot of mutant space vines to Linlin's laboratory.

After going through a series of checks, they entered a laboratory. There were already many researchers doing tests inside.

Some of these researchers had already applied for their own small project research, and these researchers were usually PhDs of various kinds.

these doctors were not lacking in talent. some already had their own experimental ideas, and the only thing they lacked was funding.

Linlin's laboratory couldn't just rely on the previous technology, so Linlin's laboratory would also recruit this kind of researchers. However, their project applications had to be strictly reviewed to determine the feasibility and future possibilities before they were authorized with wholesale research funds.

The other researchers were naturally doing follow-up research on some experiments. Even if they couldn't make any technological breakthroughs, they could still make a variety of them.

that was another kind of achievement.

For example, Li Kai had already conducted a low-temperature genetic experiment on the three-colored watermelons. Now that he had obtained enough seeds, the new three-colored watermelons could be promoted on a large scale.

There were also researchers in the laboratory who specialized in researching the three-colored watermelons. Although they didn't manage to produce three-colored watermelons, they surprisingly managed to produce another kind of one-colored watermelons.

The watermelon meat wasn't red and was different from normal watermelons. It was still fruity and harmless.

this increased the variety of linlin watermelons, which was also a kind of result, wasn't it?

When they saw Qin Lin, the researchers stopped and greeted him.

"Chairman Qin!"

"Good day, Chairman Qin."

"....."

The researchers were all very respectful, not only because Qin Lin was their boss, but also because of their boss's research ability.

They all knew that their boss had studied tourism before becoming a monk, but his abilities had already made countless scientific researchers feel ashamed.

Now, even the Nobel Prize was being given to the boss.

The reason why Qin Lin went to this laboratory first was that there were enough researchers. Then, he pretended to check it.

He wasn't just pretending, after all, he had learned so much from the two mysterious stone books.

Therefore, the experiment he was doing was also a very profound experiment, especially the experiment of formulating nutrient solution.

This nutrient solution was also used to cultivate new crops.

it was just that every scientist would formulate different nutrient solutions based on the different plants.

it would even adjust according to the various attributes of the plant.

This was not something an ordinary scientist could do. Only those experienced and capable experts could do it.

With the help of the mysterious stone Book, Qin Lin could easily do this.

Besides, the researchers didn't know what was going on.

Qin Lin also asked other researchers for help from time to time to prove that he was doing an experiment to cultivate new seeds.

in the following time.

Qin Lin was the same. When he felt that it was about time, he brought the seeds back to Linlin Manor.

Then, he asked academician Li and Yuan Shan to make tea in the Linlin Manor Pavilion. He took out a flower pot and filled it with special soil to plant the seeds.

The two academicians wouldn't pay attention to anyone else, but Qin Lin was different. He was planting something, and the two academicians were immediately attracted.

Boss Qin didn't usually grow anything. He might be cultivating and researching something new.

Moreover, boss Qin had first obtained the Xiangshui tribute rice and had deciphered the drug this time. If he were to do any cultivation research, it would definitely not be simple.

After all, even the Nobel Prize winners were in a hurry to give it to boss Qin.

Although they didn't care about the Nobel Prize, they didn't have the right to enjoy this kind of treatment.

"Boss Qin, what are you planting?" academician Li asked.

Qin Lin saw that he had taken the bait and also smiled. I used the mutated vine as an experiment and extracted some genetic material to cultivate other seeds. I wanted to see what would happen.

He took out the seeds he had prepared and waved them in front of the two academicians.

everything was going according to plan, and everything was going to be fine.

Academician Li and professor Lu were also witnesses. He had to make good use of them to ensure that nothing went wrong.

Academician Li and Yuan Shan didn't know about this at all, and they even went over to Qin Lin.

"Boss Qin, I'll help you." Academician Li said.

Yuan Shan also joined in the fun.

He also knew about the mutant vines in the valley and was curious if Qin Lin could find something new.

Space mutant plants usually relied on space materials to have a chance of mutation.

moreover, the difficulty of mutation was very high, and the probability was very low. it was not that no one had tried it before, but this research was also very difficult.

Those who succeeded were few and far between.

Therefore, there was a reason why space vegetables were so expensive.

However, boss Qin was different. He might be able to figure it out.

After all, boss Qin had even developed Xiangshui tribute rice.

The planting speed of the three of them was still very fast.

Soon, most of the seeds Qin Lin had prepared were planted in the flower pots.

The two academicians quickly ran out of energy, so they had to take a break and make tea.

Qin Lin also took the opportunity to plant the night Queen seed that he had taken out from the game without anyone knowing.

After planting all the seeds, Qin Lin went to academician Li's place to make tea with them.

"Boss Qin, what do you think of the Nobel Prize?" Academician Li mentioned this.

After all, the internet was full of news about this matter. Moreover, the voices praising boss Qin and hoping that boss Qin would receive the award were getting louder and louder.

Now, the Nobel Prize had even given this year's cover interview to boss Qin. It could be seen how much money they had put in.

the two old men even felt that there was something wrong.

However, boss Qin had not responded to this matter, so it was inevitable that he would be curious.

While the three of them were making tea, a middle-aged man carrying a suitcase alighted from a plane from the lake nation.

There were a few people following behind him.

This group of people had come from nobei's side, and they were the team that was interviewing the cover characters of the nobei winners.

Of course, she was here to interview Qin Lin. When the time came, this cover interview would be broadcasted at the awards ceremony and the whole world would see it.

This was a great honor for anyone, and they could become famous in the world in the shortest time.

The leader of the team was called Ellida, also one of the nobei's Committee members.

Of course, he had a mission this time, and that was to make sure that Qin mo went to receive the award. As long as he did it, he would get more benefits in the future.

[Chapter 1125 Arrogance Is The Original Sin! Who Are You Threatening?](#)

After allida got off the plane, he found the person he had contacted in China and asked the person to lead the way to you city.

the news that ai 'er li had arrived in china to interview qin lin spread quickly on the internet.

Ellida even cooperated by filming a video of Qin Lin's maniacal praise and had it posted online.

In the video, he, like Bowens, compared Qin Lin to a genius that only appeared once in a hundred years and was another milestone in the history of the Nobel Prize.

this made the internet even more heated up.

Before, Bowens, the world's number one animal plague expert, had praised him like that. Now, one of the nobel's Committee members, Ellida, had also praised him like that, as if Qin Lin was already the world's number one.

On the internet, those netizens who had nothing to do with Qin Lin started to get carried away.

After all, they and little Qin were fellow countrymen and had the same idea of glory.

In fact, some people had even begun to call for little Qin to bring back the Nobel Prize, and more and more people were supporting it.

This was probably the current situation of modern netizens. The Emperor was not anxious, but the eunuchs were anxious, and they were too easy to lead.

soon after, ellida arrived at you city.

you city's environment made him sigh. " i didn't expect this country to have such a good environment. the air here makes one feel like they're going to ascend. "

Mr. Eliza, according to our investigation, this is the effect of the purification grass, " the assistant beside him said. the capital of this country has already begun to be fully transformed with the purification grass.

also, some people from the global environmental protection organization have specially conducted tests on the capital of this country. They found that after the purification grass was planted, the air quality there is getting better and better. It has even gone below 50 degrees Celsius. This city was already covered in haze before.

" this technology can benefit all of humanity, " said eliza with a frown. " they should really share this technology. "

However, the assistant condemned him righteously, " unfortunately, they blocked this technology and didn't sell any support to other countries. The laboratory that developed this purification grass technology is called Linlin laboratory, and that Qin is the Research Institute of Linlin laboratory.

At this point, Ellida finally understood why the big boss of the capital wanted Qin so badly.

it seemed like it wasn't just about the potion.

After checking into the central Min hotel, Ellida received a report from his assistant. " mr. eliza, the video you posted has further stimulated the popularity of this country's internet. now, a large number of netizens in their country are urging that qin to go and claim the nobel er award. "

"en!" Ellida smiled and nodded.

This would be of great help to his line of work. Many times, public figures had to consider the opinions of the outside world when they did things.

Now that so many people wanted Qin mo to receive the award, this could be one of the reasons why he was affected.

The people online, no matter which country they were from, were all so easily led by the nose.

naturally, this was only external assistance.

How he was 100% sure that the other party would receive the award would depend on his performance in the interview after that.

For this reason, he had been thinking hard for a long time to come up with a countermeasure.

"Rent the hotel's interview room and set it up immediately. Also, send a letter to Linlin's laboratory. Tell them that we're going to interview that Qin. Ask them to inform them to come over." At this moment, Ellida also instructed his assistant.

This was also the usual practice.

Every year, for the cover interview of the Nobel Prize, the Nobel Prize would arrive in the city where the other party was located. Then, they would prepare the location for the interview and inform the other party, and the other party would rush over to cooperate.

this was an honor that resounded throughout the world, and no one would waste time.

There were even times when the interviewee was very powerful and rich. He would send someone to pick them up as soon as they got off the plane and help them decorate the venue.

"alright, mr. ellida." The assistant nodded and immediately went out to get to work.

on the other side.

Beijing.

In the Hua * Yuan.

Chief Lu had also received news that Elli had arrived in the country.

nobei 'er's people have already arrived in you city, " the Secretary said to him immediately. I'm sure they've already started contacting boss Qin.

"I know." chief lu nodded and immediately took out his phone to call qin lin.

The news about the Nobel Prize and boss Qin was so hot on the internet, it was impossible for them not to pay attention to it. The higher-ups were also very concerned and naturally saw the trick.

Wasn't this a show to gain the Jade Kylin's favor? He obviously had other motives for boss Qin.

The leader was naturally anxious, and so was he.

It was not easy for a God's pride like boss Qin to appear in the country, a figure that was hard to come by in a hundred years. The key was that the other party's vision was not ordinary. He was still so young and had infinite possibilities in the future. It would be of great benefit to the country.

Even though boss Qin's vision and intelligence would definitely see through the trick, they were still worried.

Because boss Qin was really young, this kind of opportunity to become world-famous immediately, why would they worry about boss Qin's brain acting rashly?

There were very few people who could resist this temptation.

Didn't they see that the people online were all bystanders? they were all led to the point where they were a little hot-headed.

Therefore, he had to make a phone call to find out boss Qin's attitude.

He was anxious, and so was the leader.

Linlin Manor.

Qin Lin returned to his office. Just as he was about to look at you Xi's screen, he received a call from Mr. Lu.

[Chapter 1126 Arrogance Is The Original Sin! Who Are You Threatening?](#)

* Chief Lu, what can * do for you ** he asked with * smile *

boss Qin, " Minister Lu said anxiously, " I'm here to ask you something. What do you think of the Nobel Prize? "

qin lin laughed. " chief lu, what's there to think about? they're giving out awards. it's my business whether i go or not. "

"So you're not going?" Chief Lu's voice was filled with joy.

"What's there to go?" "They think I'm a fool, but I can't really think of myself as one," Qin Lin continued.

"that's good, that's good!" chief lu heaved a sigh of relief."boss qin, i knew you'd see through everything."

Qin Lin could feel that chief Lu was very concerned about this matter. He could even hear the nervousness in the other party's voice, so he continued to comfort chief Lu for a while.

he could also feel the concern from the higher-ups, and even more so, from chief lu.

So, only a fool would accept the award?

Wasn't it good to be in their own country?

He didn't have any rebellious genes and didn't feel that the moon overseas was rounder and brighter. It wasn't like a walking 500000 Yuan.

In the Chinese hospital, chief Lu heaved a sigh of relief after hearing Qin Lin's reply. However, he was still worried and immediately asked his Secretary to book a plane ticket for him.

It was better to go to you city personally.

He was really concerned about Qin Lin.

...

Linlin Manor.

Qin Lin hung up the phone and was about to look at the game in his mind again when Shen Li came in a hurry.

"Chairman Qin, I have something very important to report." Once Shen Li entered the office, he said, "

"what's wrong?" Qin Lin asked, puzzled.

Shen Li explained, " it's a committee member from nobei 'er who has arrived in you city. He's here for the cover interview of nobei' er. He said that the interview venue has been prepared. He informed little Qin, who is Chairman Qin, that you can go over for the interview.

"You're telling me to go over for an interview?" Qin Lin laughed and said with disdain, " "do they really think they're something? Don't care about them. If you ask again, just say that I'm not free."

"Alright, Chairman Qin." Shen Li nodded. He could see his boss's attitude. He didn't care about these people at all. In other words, his boss probably didn't want to lead this general Nobe.

he felt that it was really possible.

After all, everyone knew of their boss's monstrous talent. He had conquered the Xiangshui tribute rice and deciphered the magical potion.

More importantly, how long had it been since the boss became a monk?

The boss was a genius.

Geniuses were disdainful of many things.

Just like Tesla, the man who was known to be the closest to God.

He had rejected the Nobel Prize nine times in a row.

Just as everyone was praising the Nobel Prize, trying to win it, looking forward to winning it, and really wanted to win it ...

However, this person thought that the Nobel Prize was not qualified to give him an award, and his achievements were beyond the level of the Nobel Prize.

The Nobel Prize did not have the right to give him an award.

So, the boss was going to be the second person to reject the Nobel Prize?

If the boss wasn't so lazy and used his talent well, putting all his attention on the laboratory, he might not be worse than teslaa, right?

That might become a good story.

For some reason, when Shen Li thought about it, he felt his blood boiling.

It was a pity that the boss was too lazy. He was obviously very talented, but he only cared about the laboratory based on his mood. He didn't even go to the laboratory a few times a year.

Naturally, after returning to Linlin's laboratory, Shen Li had forgotten about this matter. It was as if he did not know that nobei 'er's people had arrived. He directly stood aside.

Time passed, and a day quickly passed.

However, Ellida and his group quickly grew anxious.

"what's going on? Has Linlin's laboratory not replied yet?" what's going on? " Eliza asked his assistant with a frown.

not yet. the assistant shook his head in confusion. they seem to have forgotten about this.

"How can I forget? We are the team for nobei's cover interview." ellida immediately shook his head in denial.

What a joke, there was actually someone who could reject nobei's cover interview?

to put it bluntly, their cover interviews every year were almost equivalent to being crowned gods, okay?

Who could reject such an honor?

When the assistant heard this, his brows furrowed even deeper. "Then the other party must be deliberately not replying."

These words made Ellida's face turn dark. call them again. They can't look down on our Nobel Prize.

The assistant nodded and went out to contact Linlin laboratory.

Elli waited and after a while, he saw his assistant enter and immediately asked, " "How did the other party reply?"

The assistant's expression was dark. they said that Qin is currently doing an important experiment. He doesn't have time for an interview.

"Damn it!" Hearing this news, Ellida could not help but feel vexed.

In the face of the cover interview for the Nobel Prize, the other party was still in the mood to do some experiments? Did he not know how ignorant he was?

However, he had come with a mission, so he could only patiently tell his assistant, " call the other party again and tell them that we can personally interview them.

This was already a huge step back.

There had never been an interviewed winner that could make them feel this way.

However, that was the only way now.

As long as he could trick the other party into going to the venue to receive the award, the other party would pay the price. By then, there would be no chance for the other party to be arrogant and ignorant.

The assistant had no choice but to go out again and continue to call Linlin's laboratory.

Ellida was still waiting.

[Chapter 1127 Arrogance Is The Original Sin! Who Are You Threatening?](#)

The assistant came in quickly and reported hurriedly, " Mr. Eliza, Linlin's laboratory has refused. They said that the laboratory is an important place and that outsiders are not allowed to enter.

"what? "This won't do, that won't do, they want to f * ck Yingluo!" Said Ellida angrily, but she stopped mid-sentence.

He wasn't a fool. He immediately understood that the other party was doing this on purpose.

"mr. ellida, could it be that the other party doesn't even want to accept our interview?" the assistant could tell.

The reason was directly stated by the assistant, and Ellida could only say, " call them again. If they really dare to treat us like this, it will affect their impression of this country's candidate for the Nobel Prize. Ask them if they can afford it.

It was obvious that this was a threat.

The general meaning was that if they didn't cooperate with them, the people of this country might not be able to win the Nobel Prize in the future.

Obviously, after being looked down upon, this was the only way out for Ellida.

He believed that if nobel were to ban the people of this country, the other party would not be able to bear the responsibility.

in linlin's laboratory, shen li also received the same message.

This time, he did not dare to make his own decision.

He couldn't afford to be threatened like this. He drove directly to Linlin Manor and reported to his boss in person.

In Linlin Manor.

Qin Lin was making tea at the coffee table in his office. In addition to academician li and Yuan Shan, there was also Captain Lu.

Because of the Nobel Prize, this person was worried and rushed over.

Qin Lin, on the other hand, was already used to her habit of coming in quietly.

The three of them were chatting when Shen Li hurriedly arrived. The moment he entered, he immediately said, "Chairman Qin, academicians, and chief Lu, you're here too."

Qin Lin looked at Shen Li's anxious expression and asked, "What's wrong? Is it about Nobei'er's group?"

Yes! Shen Li nodded and immediately said, "Chairman Qin, that Eliza threatened you. She said that if you don't cooperate with them, if Nobei'er blocks our country in the future, can you bear the consequences?"

"??? "Qin Lin was speechless.

Was there something wrong with this guy?

Some foreign scientists couldn't go to receive the award in time for many reasons. There were some who were absent, but this Nobei'er still delivered the award to his door.

He was threatening him because he felt that he was a pushover.

Qin Lin thought about it, but before he could flare up, Chief Lu flared up first. "Who are you threatening?"

As he said that, he made a phone call in front of everyone. Leader, the lake nation can't support them with the formula anymore. Their country's bird award is actually threatening boss Qin.

Are you kidding me?

Was he threatening boss Qin in this way?

I wonder what's the situation now?

Without their potions, the other party would have to wait for the coagulin plague to completely lose all the animals they could keep.

Moreover, even if he gave the formula to the other party, the other party still had two main medicinal materials that were unique to their country. He could not make it himself even if he wanted to.

This was because they had already studied the gray-cloth grass and the double sickle grass. Although these two kinds of grass were wild in their country, they were basically difficult to survive in other countries.

It's just like a weed that's a headache for the beautiful country and costs a lot of money to grow every year. It has once appeared in our country and this species invasion often happens.

As for how and why the invasion happened, it was still to be found out.

However, this kind of wild grass didn't even have any soil to survive in their country.

This was the delicate part of plants. Not all plants could adapt to other environments.

Moreover, the intestinal Guiyuan powder had already been through three clinical trials and had been approved by the medicine number and was already in production. This medicine could treat gastrointestinal stromal tumors, intestinal obstruction, colon cancer, and black lesion. Did the other party need it?

There are also tea leaves that can treat all kinds of cancer. Don't come up and ask for help when the time comes.

he believed that when the time came, the other party would be in a hurry to come and ask for help. in every country, there were many people with cancer, especially those rich people with cancer.

If these people were to cause a ruckus, what would happen?

It's just an award from a small lake Country, what's the big deal?

On the other side.

After having her assistant make the threatening call, Ellida instantly felt her anger had been vented.

He thought viciously, 'I don't believe that the other party would dare to take on such a threat. How dare they look down on them.'

He believed that there was no one who wasn't worried about being banned by nobel 'er.

The people from the eastern kingdom were the same.

this was especially so for the outstanding people of various projects. if they weren't banned, they could at least still dream of receiving an award. although it was impossible for an award to be given to them unless they were forced to, they wouldn't even have the chance to dream if they were completely banned.

With this thought in mind, Ellida waited for the other party's reply. He believed that the other party would come knocking on his door very soon.

He had thought of so many tricks and countermeasures, and he couldn't not even have the opportunity to meet and implement them.

As long as the other party came to him, he believed that he had the ability to convince the other party to accept the award with his eloquence and foolproof plan.

He was confident in this.

This was because he had convinced 11 winners who didn't want to go to the venue to receive their awards.

However, he waited until midnight and the next day, but he still didn't receive a reply from Linlin's laboratory.

The other party seemed to have forgotten about it.

Ellida's expression darkened once more.

the other party really didn't know what was good for him!

[Chapter 1128 Schemes And Intrigues Are Useless In The Face Of Strength!](#)

Seeing that his group had been ignored again, Ellida could no longer suppress his anger.

But one of nobel 'er's men said hurriedly, " " mr. eliza, hurry up and look at the news on the internet. the other party is really looking down on our nobel prize. "

As he spoke, the man passed the news he had read to Ellida.

He was in charge of monitoring the news on the internet and was the first to notice the other party's excessive announcement.

Ellida took the phone and looked at it. His face darkened.

Or rather, he could not believe his eyes.

the news was a video of the linlin laboratory's announcement, and the main character of the news was qin chu.

I'm not interested in the Nobel Prize, so I won't receive it.

This crucial sentence almost made Ellida explode in anger.

The other party actually rejected the Nobel Prize?

What did the other party have?

Where did the other party get the burden from?

Indeed, with chief Lu's words, Qin Lin didn't have many scruples. Instead of watching the Nobel Prize winners threaten him, he might as well reject them clearly and ask them to get lost.

Qin Lin's announcement instantly became a hot topic. The internet was already full of news about him and the Nobel Prize.

there were also many people on the internet calling for qin lin to receive the nobel prize back.

for many people, the nobel prize was a great honor, and qin lin would become the fourth chinese citizen to win it.

Moreover, he won the award not because of his special literature, but because of his own ability. He was even the cover of the annual interview, and there was only one such person every year.

However, no one had expected Qin Lin to directly announce that he didn't care about the Nobel Prize and refused to accept the award.

Then, the internet exploded.

In fact, many people were stunned by the impact.

That was the Nobel Prize, the world's biggest honor, and now little Qin had rejected it?

It was hard not to be excited.

"I don't know why, but I suddenly feel that little Qin is very domineering!"

"I thought that the Nobel Prize was amazing, but after little Qin's announcement, I don't think it's a big deal anymore."

"Haha, I was too shallow. I shouldn't have asked little Qin to receive the award. Isn't it just a Nobel Prize? You want to give it to me, but I'm not even paying attention to you."

I didn't expect this to happen. Little Qin is the second person in history to reject the Nobel Prize, right? "

â€œ.....â€

The more heated the internet was, the angrier Eliza's expression became.

The whole world knew that their Nobel Prize had given the other party such a big award and even assigned the cover interview task for the year.

Now, the other party's actions were simply an insult to the Nobel Prize, which would greatly reduce their authority.

however, they couldn't go back on their word, nor could they give the award to someone else.

If that really happened, then their Nobe general would truly be worthless.

Also, the other party didn't want to receive the award at all, nor did he want to accept their interview. How could he carry out all the plans he had in mind?

The key was that he didn't complete the mission, so he wouldn't be able to get any benefits.

"We can't just let it go like this!" ellida was furious. no one knew if it was for the benefits or for the honor of the nobel prize.

In any case, he had to send the news back. In the future, he would definitely ban this country and not let anyone from this country win the nobei er award again.

just as he was thinking about it, his phone rang. it was the person in charge of the nobel prize.

The other party must have received the news as well.

Ellida immediately picked up the phone and wanted to report the matter to the person in charge, but an angry voice immediately came from the other side of the phone."Eliza, what are you doing? you actually went to threaten them? Who gave you the right to do so?"

the person in charge was obviously very angry.

He was originally discussing the spots for the Nobel Prize's reception with a few young models.

As for why the young model had to be the concierge, was it fun to stand in the lobby to welcome him? fine grade, fine grade.

however, just as he was having fun, he received a call from a big shot from the lake nation. he was scolding him.

Although norbei was going to be world-famous, it was still a product of the lake nation. All the registration and other things could be done here.

He didn't even have a chance to refute this Big Shot.

After being scolded for a long time, he finally found out that it was Ellida who had threatened that Qin, and that the leader of the eastern country had found out.

Now, that country wanted to support the Lake country's potion that restricted the coagulation plague.

moreover, even things like hot spring powder would be limited to the lake country, not to mention the purification grass that might be released in the future.

The leaders of the lake nation were shocked.

not to mention the high-temperature coagulation potion, their country's agriculture and animal husbandry only accounted for 6% of the economy. even if all the raised animals died, it would cause a great problem for the country, but it would be fine as long as the economy was fine.

After all, they were already close to the capital countries to ensure that there would be no problems with the upper capital, and the lower problems could be solved.

However, if the purification grass was still restricted and would not be sold to them in the future, then it would be over.

After all, animal husbandry and agriculture only accounted for 6% of the country's economy, and the country's economy was mostly supported by industry.

If the industry was prosperous, the air quality problem would be serious. Sooner or later, there would be a big problem.

The purification grass could prevent such a big problem. Therefore, the lake Kingdom had been communicating with the purification grass.

Who knew that they would suddenly stop communicating and directly ban him, not even giving him a chance to talk?

[Chapter 1129 Schemes And Intrigues Are Useless In The Face Of Strength! Why Is It Him Again? 2](#)

It was only later that he found out that the trouble was caused by the people from the Nobel Prize.

This was terrible.

He immediately found the person in charge of the Nobel Prize.

After being scolded, the Nobel Prize winner finally realized the severity of the matter. Naturally, he immediately went to find trouble with Eliza.

Even if he wanted to ban that country, he couldn't just threaten them directly. He could just do it silently.

After all, they had always been doing this.

the more he thought about it, the angrier nobei became, and he said even more angrily, " hurry up and get back here, Eliza. We need to have a new meeting to discuss your position as a committee member.

just as ellida was about to complain and ask the headquarters to help her vent her anger, who knew that she would be scolded like this?

Before he could explain further, the person in charge hung up the phone.

He was dumbfounded.

He had never thought that things would turn out like this.

Not only would he not be able to get the reward entrusted to him, but he might also lose his position as a committee member?

It seemed that Eliza still did not understand what was going on. In the end, she could only dejectedly ask her assistant to book a plane ticket back.

How could he still care about Qin Lin now? He had to go back and protect his position.

Eliza rushed back to the Lake Kingdom as quickly as she could.

At the same time.

The news of Qin Lin's refusal to receive the Nobel Prize quickly spread all over the world.

This was huge news for all the countries.

Even though many people knew what the Nobel Prize was, it was still one of the biggest awards in the world.

Now that someone had refused to receive the Nobel Prize, it was a sensation.

Bowens' laboratory.

As usual, Rast was here today. Before that Qin went to receive the Nobel Prize and their plan succeeded, they still had to conduct experiments on the coagulation plague.

As soon as he saw Bowens, he immediately asked, "Bowens, how's your cracking going?"

"Mr. Rast, we still haven't found anything," said Bowens helplessly. "I really suspect that this potion was really made by that young man, and not a gift from God?"

"This isn't something that humans can come up with at the current stage. Otherwise, how could there be a finished product that we can't do anything about?"

You're reminding me again," Rast said, frowning. I have to get that Qin.

Yes. Bowens nodded. Even if I can't get him, I'll have to take the opportunity to get rid of him when he leaves that Eastern country.

Rast nodded.

However, as the two of them were talking, someone walked in and reported, "Mr. Rast, we have the latest news.

As he spoke, he started to operate a computer. A news report appeared on the LCD screen on the wall.

The video was of Qin Lin refusing to receive the Nobel Prize.

This piece of news stunned both Rast and Bowen.

"Damn it!" when bowens saw the news, he was stunned for a moment before he angrily kicked his chair to the ground.

Are you kidding me?

he had planned so much and even bribed the nobel prize committee so that qin mo could receive the award and he could do something.

With that Qin, the problem of the potions would be solved.

He wouldn't have to pay a huge price for the previous incident of bowenz's Alliance isolating him.

But now, the other party had directly rejected the Nobel Prize.

Are you kidding me?

How could someone from an Eastern country reject the Nobel Prize?

The people from that country could deliberately discredit their country in literature and even change their nationality in order to win awards.

What was the reason now?

Rast was suddenly confused, and then he became even more furious.

What was he supposed to do?

In fact, if the other party didn't leave the country, he couldn't even 'destroy it if he couldn't get it'.

In that country, no one would dare to take the task to get rid of such a person. If he went, he would definitely not be able to come back. He might even be implicated.

Rast suddenly felt a sense of powerlessness.

How could anyone be indifferent to this kind of international opportunity?

.....

The person in charge of nobei 'er was called Noa Fei, and he had a deep relationship with nobei' er.

He had been very angry at first. After all, Ellida had caused a lot of trouble and implicated the entire Nobe awards.

However, when he heard about what happened after he returned, his anger subsided a lot. Instead, he was filled with hatred for that Qin and that Eastern country.

not only had the other party refused to accept the nobel prize, but the eastern country had also come forward to threaten them. they were completely treating the nobel prize as if it did not exist and ignoring them.

In the meeting room.

It wasn't just noafi, all the committee members of the Nobel Prize had a serious expression on their faces. They were obviously in a meeting.

although the award selection was conducted by the scientists, they were the ones who did the dirty work.

They had been so flamboyant before, but now that the other party had refused to accept the award, there was no way for them to clean up the mess. They could only bite the bullet and pretend that they didn't know.

"So, we can't just sit back and do nothing." A committee member said.

that's right. We have to do something. We can't let that country's people win any more awards. Another committee member said.

"also, the latest news has come back. the people from that country are now mocking us on the internet."
"

I've seen all the ridicule too. Now, even their ordinary people dare to say that our nobel 'er is nothing. They've forgotten that this is an award that they can't even win.

that's true, " noafe nodded. but we'll have to wait until the lake Country gets their hands on the potion resources and solves the frozen blood clot plague. By then, without this threat, the number of shortlisted candidates from the eastern country will be reduced.

this suggestion was agreed upon. it was indeed necessary to do so in order to make the people from the eastern country regret.

a country with very few candidates was bound to be ridiculed.

Just as they were in agreement with the suggestion, an assistant ran in hurriedly and said to noafi,"Mr. Noyafe, that Eastern country has released another piece of news. Quick, take a look!"

"What news?" Noyafe was stunned.

His assistant usually wouldn't barge in during a meeting. Now that he had barged in, it must be something very important.

The assistant immediately pulled up a piece of news.

This news was released by the officials of that Eastern country:

we have successfully carried out clinical trials on a medicinal herb, intestinal Guiyuan powder, which can treat gastrointestinal stromal tumors, intestinal tumors, and intestinal lesions with amazing effects. The drug will be considered to be introduced to international patients, as long as the medical case and identity information are available.

Seeing this news, noyafe's expression changed. It was very ugly.

"Is this news true?" Noyafe asked with an unsightly expression.

That was why they decided to ban him and not let him win the award, but he had come up with such a research result?

They could ban a country and not let that country's people win awards. They could even not let that country's people enter the list of candidates. However, that was based on the fact that the other country's skills were slightly inferior, or if there was another country with similar skills, even if it was slightly inferior, it would be fine.

if there was a technique that was clearly better than everyone else, or even something that no one in the same project could surpass, then ...

Under such circumstances, no matter how unwilling they were, they had to give out the award. If they didn't give it to the other party, they were all smart people and not stupid. That would also make the Nobel Prize lose its credibility and authority.

The other party's intestinal energy restoration powder was made with such a technique.

It could be used to treat gastrointestinal stromal tumors, intestinal obstruction, gastrointestinal cancer, and intestinal lesions. Everyone knew what this meant.

Therefore, if they didn't want to kill 1000 enemies at the cost of 880% of their own lives, no matter how reluctant they were, the award for this project next year had to be given to the other party.

The key was that the researcher of the Changyuan Guiyuan powder gave them a bigger headache. It was actually that Qin.

what a joke.

How old was that young man?

Obviously, these people roughly knew what it meant: In the face of true strength, any schemes and intrigues were futile.

Rast also saw the news.

His face turned pale when he saw the news. He was still thinking about the price he had to pay for the high-temperature blood clotting potion.

After all, if he didn't pay the price and couldn't get the support of this potion, the other capital would not let him go.

Facing such a situation, he had to bleed a lot.

Who knew that the other party would release such a piece of news and have such a result?

and obviously, this was what they needed. there was only one capital boss who was more powerful than him who had this illness.

but why was the key now?

wasn't this asking for his life?

[Chapter 1130 How About Having A Prize Of Your Own?](#)

However, no matter how helpless rast was, he also realized that he was unable to resolve the situation before him.

The various means he had were all based on the special social status of the capitalist country he was in.

In this capitalist country, he had a huge amount of capital, so he had all kinds of rights and could do a lot of things.

for example, one of his mistresses had killed two children while driving under the influence of alcohol. it was rare for the news to be so popular, but he could find the most famous team of lawyers in drifting country and bribe the relevant personnel.

In the end, the two children were left unruly. They were mischievous and didn't know the immensity of heaven and earth. They broke the traffic rules and hit the car.

in the end, his mistress naturally had no responsibility.

In fact, when the other party's parents refused to let it go, he even spent some money to make the other party's parents disappear without a trace.

However, these methods were completely useless in that Eastern country.

The phone rang.

When rast saw the number, he frowned and picked up the call. When he hung up, his expression became even uglier and more annoyed.

It was a representative of those big shots who had asked him to settle the issue of the Changyuan Guiyuan powder.

Rast suddenly regretted it. Why did he want the techniques of the purification grass and Linlin leisure tea?

Now, he had gone for wool and came home shorn. He had not obtained anything and had to pay a huge price.

Now, the cost of the intestinal energy restoration powder was X2.

The news about the intestinal energy restoration powder was suddenly released, and the people in the country naturally saw it.

To be honest, the people who saw this news were a little shocked, not because of the effect of the intestinal energy returning powder.

it was because it was little qin who had created this thing.

Previously, when he had cultivated the Xiangshui tribute rice, everyone knew that little Qin had done an amazing thing after being popularized by many people.

After that, it was time for the coagulin plague potion.

Everyone knew just how terrifying the coagulosis plague was.

Little Qin had developed a cure for the plague. Moreover, while everyone was cheering for little Qin's amazing abilities, the news said that this medicine was like an all-purpose medicine in the game, and could cure all animal plagues.

This was even more shocking. Other than calling it amazing, they could only call it amazing.

Who knew that not long after this shock passed, there was this intestinal energy restoration powder again, and it was even caused by little Qin.

Just by looking at the effects of the intestinal energy returning powder, one could tell how powerful this thing was.

Many people who suffered from this illness were even in despair and had to go bankrupt.

Now that they saw this life-saving elixir that had suddenly appeared, they could not help but cry from joy.

It could be said that the internet was once again filled with popularity about little Qin.

at this time, everyone remembered that little qin was only studying tourism, a researcher who had become a scholar halfway through his career.

However, his research results came one after another, and each one was shocking. It was an achievement that countless scientific researchers could not achieve in their entire lives.

Therefore, many people on the internet were already curious about how great little Qin would be in the future.

With just these techniques, even if he died, he could still leave his name in many books.

in the office of linlin manor.

Qin Lin sat at the tea table and made a pot of tea, then poured a cup for chief Lu.

chief lu was completely relieved.

General nobei's group had already left the country, and boss Qin had also announced his refusal to receive the award.

after taking a sip of tea, captain lu suddenly asked qin lin, "Little Qin, what do you think will happen if there's an international Nobel Prize in our country? This way, we won't have to be controlled by others in the future."

In fact, many people in the country were asking why they didn't organize an award themselves.

Many people even said that Penguin, Fox, and mouyin would each donate a little and the prize money would be higher. Was there anything to be afraid of?

It could only be said that these people were very ignorant.

The Nobel Prize was really not a matter of prize money. Which of those who could win the award lacked money?

Don't tell me you can raise the prize money to the level of a few hundred million that people can't resist?

Otherwise, how are you going to evaluate the award?

give them an award? What if he didn't admit it or accept it? What if many people directly refused to accept the award?

That would be a slap to his own face.

In the end, to a large extent, he would have to play by himself behind closed doors.

Then what was the difference between this and a certain Korean or a certain Taiwan that they joked about daily?

Don't make fun of others, and you'll be laughed at by others on the same issue.

"if anyone wants to host this, i can donate money!" qin lin laughed.

Lu Changsheng sighed. it's not a matter of money to hold an award like this. The nobel er award's popularity today is based on decades of accumulation, as well as its own convincing status and achievements.

nobel 'er had 355 patented inventions in his life. Although the explosives he invented didn't become a weapon of peace as he wished, but instead became the Pandora's Box that started the war, this was indeed a technology that could affect the world.

it's too difficult for our country to set up our own Nobel Prize. Unless there's someone who can research a technology that can affect the world like the Nobel Prize, and our scientific research strength has to be convincing to other countries.

now, our country has some technological confidence, whether it's Linlin leisure tea, purification grass, high temperature blood clotting plague medicine, intestinal energy restoration powder, or the world-leading deep space exploration rocket technology of academician Hao.

these are all things that the Western countries can't hope to reach, and they even need our help. However, it's difficult to find someone like nobel 'er.

" boss qin, if you put all your efforts into research, maybe ten years later, you'll have more results. you can be the founder and create a linlin award. "

for now, your drug is still very limited. It only works on animals and has no effect on the world.

As Minister Lu spoke, he looked at Qin Lin expectantly, hoping that Qin Lin would stop slacking off.

Of course, he did not mention that boss Qin had the right to do so. For example, he could take out the body-building potions, which could improve a human's physique.

Now, the athletes and soldiers who had been summoned for special training by the higher-ups, with the cooperation of the Linlin leisure tea, had made unimaginable progress.

In the Olympics next year, those athletes would shock the world.

If those soldiers participated in the military Sports event, they would definitely shock everyone. Each of them had the physical fitness, strength, and endurance of a Soldier King in the Special Forces.

However, this thing was top secret and absolutely could not be made public.

However, after this group of people was successfully trained, it seemed that he would have to send a few to boss Qin.

after all, boss qin was still so young. who knew what other things he would come up with in the future? what if he provoked someone?

Qin Lin hurriedly said, " "Captain Lu, what do you think of old brother li? Let him be the founder?"

What a joke. If he really wanted to create an award, he could donate money or use Linlin's name, but he would not stand in the front and be a target.

There would be too many things to do and it would be too troublesome.

He was afraid of trouble and trouble.

"Professor Li Kai?" Chief Lu was stunned for a moment, then he shook his head and said, " professor Li Kai is amazing. He has the materials to cure the Sima disease, the low-temperature genetic experiment, and the Cola fruit, but it's still not enough!

"Chief Lu, have you forgotten about the new rice seedling?" Qin Lin suddenly laughed.

Without a doubt, the rice seedling that old brother li took the blame for could definitely accomplish the great feat of enjoying the shade under the grain.

Just the high yield of sorghum and the large size of peanuts alone could change the status quo of the world's food supply.

What's more, the seeds had been processed by the seed processing machine, so the output was directly X2.

That would be more than just changing the food structure of the human race.

Once this thing came about, it would definitely have an impact on the human world. At least, many countries did not have enough food. Many people were still not full, and some countries relied on imports for food.

When chief Lu heard this, he seemed to have realized something and his face lit up."Boss Qin, you're saying that professor Li Kai's new rice plant has produced results?"

"we'll know once we go and take a look." Although Qin Lin knew this in his heart, he didn't say it out loud, leaving chief Lu in suspense.

This piqued chief Lu's curiosity. He immediately followed Qin Lin out of the office and to his laboratory.

It didn't take long for the two of them to reach Linlin's laboratory.

There was a difference between internal and external tests.

The external experimental plots were all planted outside the laboratory, such as the experimental plots for the Xiangshui tribute rice in each county and the area planted in the Linlin Manor's planting area.

The internal test site was completely within the scope of the laboratory, and there were many security guards patrolling. For example, the new Paddy was in this internal test site, and it was heavily protected.

After several inspections, Qin Lin and Minister Lu also entered the internal test site and went to the planting area where the new rice plant was.

Coincidentally, Li Kai was no longer competing with the seven compound substances of the drug. Instead, he brought the researcher to the new rice plant.

This was because he had received a report from the researchers that the new rice had grown taller and new branches had grown out.

on these new branches, there were new flowers growing thickly.

In other words, the new rice would not be gone after one harvest. Furthermore, if the rice was still normal after it ripened and there were no problems, the yield would be unimaginable and would far exceed his expectations.

this scared him.

that was because he himself had not fully researched how the new rice appeared. it was completely an unknown mutation caused by the special soil. there was no regular pattern to speak of.

this was a pain in the ass, the pot was too big.

He could only hope that the rice would not be edible after they ripened.

However, he could only hope for it, as the probability was 55%.

However, this 55% wait was really torturous.

At this time, he also saw Qin Lin and Minister Lu. He immediately greeted them, " "Brother Qin, Minister Lu, why are you here?"

However, Minister Lu was instantly attracted by the rice that was taller than sorghum, especially the rice that had already borne on it.

Although it wasn't full, one could tell that it was definitely the size of a rice grain.

This also instantly reminded him of a saying.

What would happen if that happened? That was unimaginable.

As he thought about it, Minister Lu solemnly said to Li Kai, " "Professor Li Kai, you're amazing. If your new rice is successful, it will shock the world. How about we find some time to talk about it later? I have something to discuss with you."

"What do you want to talk about?" li kai's heart skipped a beat when he saw minister lu's burning eyes on the new rice.

Why did it feel like something bad was about to happen?
