

The Game 1131

[Chapter 1131 Reason For Resignation, Qin Lin Is Back](#)

Linlin Manor.

Qin Lin watered the seeds in the flower pots as usual.

The night Queen seed from the game had already grown. As for the other seeds, some of them had sprouted due to the special soil, while some had not sprouted and had rotted in the soil.

It was winter now, and the weather was getting colder and colder. Some seeds could not germinate even if they had special soil.

However, in this situation, it was easy for people to pay attention to the night Queen Seeds produced by these games.

Academician Li was at the side, staring at the night empresses who came out of the game. "Boss Qin,... The lower temperature in winter has a great impact on the enzymes in the plants. The reduction of the enzymes' activity will result in the growth rate to be very slow. However, these plants are growing very fast. Could it be that there is a difference?"

"I've tested it. It's a little different, but I don't know if I'll get anything." Qin Lin nodded and said half-truthfully.

Academician Li nodded.

He naturally understood this principle. Scientific research still had to look at the final results.

As the two of them were chatting, Li Kai came in a hurry with a helpless expression on his face. "Brother Qin, go and tell chief Lu that I really can't be the founder of the Linlin award. Who the hell am I? No, I'm nothing. No, I can't explain it clearly, Zhenzhen."

He was clearly a little impatient, and he couldn't even speak clearly.

When chief Lu came to him, he knew that it was not something good. Who knew that it really was not good. It was a terrible thing.

The key was that he didn't know what had happened at that time, but he had been tricked by chief Lu.

Chief Lu talked to him about all kinds of righteousness, about vision, and so on. He felt that it would be unreasonable if he didn't agree, so he agreed in * moment of heat.

After the incident, the more he thought about it * the more he felt that something was wrong * Weren't chief Lu's words used by his father and brother to fool others?

In fact, it was just a fake empty space, and it was meaningless.

the key was that he had been tricked.

During this period, he had been completely immersed in this matter. Chief Lu had sent him this document and that document from time to time.

He didn't even have the time to spend with his wife and children.

The key was that if the new rice was successfully cultivated and the rice was edible, it would be even worse. He still had to think about how to write the paper.

'What the f * ck?'

"Old brother li, that matter is very meaningful." qin lin looked at li kai solemnly, but he couldn't help gloating in his heart.

The Linlin award was the kind of international award that Minister Lu had mentioned before.

Linlin was naturally using the name of Linlin's laboratory, because once the new rice was successful, it would be a product of Linlin's laboratory.

Moreover, the Linlin laboratory was not an official laboratory, so this kind of award could not be held by an official organization. In the future, the Linlin laboratory would be responsible for the funds and bonuses.

of course, this award was not something that could be prepared in a short time. there were a lot of people and things that needed to be contacted.

in particular, in order to hold an influential award, it required a large number of international scientific research leaders to respond, acknowledge, and even act as judges.

Take the Nobel Prize for example. Although the Nobel Prize was the organizer, there were at least 12 big names in international scientific research.

This would be settled by chief Lu. After all, all the countries needed the help of the high-temperature blood clotting medicine and the intestinal energy restoration powder.

Both of them were chips that could be used to manipulate some things.

Of course, they had to wait for the new rice to bear fruit before they could talk about the future. Otherwise, if there was no one of importance to be the founder, then everything would be useless.

However, there were some things that could be done first, such as preparing the office location, reviewing and recruiting some personnel, and information about the research awards.

In particular, chief Lu had gotten a lot of information about the Nobel Prize from somewhere and handed it to Li Kai.

just this alone made it impossible for li kai to get away from his experiments.

Qin Lin was naturally glad that this matter did not fall on him.

Old brother li, just bear with it!

Academician li naturally knew about this. He smiled and said, "Professor Li Kai, this is a good thing!"

"You're academician li, right?" Qin Lin chimed in.

"Yes, that's right!" academician li also nodded.

Li Kai looked at the two of them and was speechless. He felt that he shouldn't have come to talk to Brother Qin about this. Why did it feel like Brother Qin was acting as if this matter didn't concern him?

In the end, Li Kai could only sigh deeply and pray that the rice would not fail when it ripened.

He would only be free if the new Paddy failed.

Otherwise, he would have no choice but to continue with the Linlin award.

Qin Lin returned to his office after watering the plants. He opened the APP's back-end and saw an internal email from Lin Lanzi. Chairman Qin, please take a look at this document. It needs your approval.

Qin Lin opened the file and saw that it was about this year's annual party. unknowingly, another year was going to pass.

Due to space constraints, each company could only hold their own Annual Meeting this year. There was no way to gather all the employees of Linlin's Department to hold a Grand Annual Meeting.

It should be much better next year's Annual Meeting.

By then, the stadium in the new district of the county should have been completed. The stadium could accommodate 60000 people, which could completely accommodate all the employees of Linlin company in you city.

As for this year, it could only be the same as last year.

Qin Lin approved the email and sent it back to Lin Lanzi.

As the new year approached, you city slowly quieted down. Linlin villa and Linlin Ranch inevitably became desolate.

[Chapter 1132 Reason For Resignation, Qin Lin Is Back](#)

During the new year, more people chose to go home than to play. This was also a rare time to reunite.

The employees of Linlin villa and Linlin Ranch had also begun to wrap up their work, waiting for their vacation period. They were only waiting for the annual meeting to end and finish their work for the year. Naturally, they were also looking forward to being lucky enough to win a big red packet at the annual meeting.

Linlin villa, the drifting project.

As there were fewer and fewer tourists, the villa was about to close. The employees had begun to put away most of the kayaks, life jackets, and safety hats.

This way, when the garden was completely closed, they could also use the fastest speed to clean up and take a leisurely vacation.

The end of the year was actually a test for many companies.

this was because the end of the year was the time when there was a wave of resignations, especially in the service industry. many people resigned at the end of the year, and some people couldn't resign and left after the new year.

Naturally, the boss had to reflect on this situation.

linlin manor did not have such a situation. many people in the service industry had even resigned from other places and come back to find out if linlin manor was hiring.

Naturally, there were exceptions.

While everyone in the drifting Department was working, Chu Ye had no choice but to write his resignation letter on the table.

A colleague next to him saw this and asked doubtfully, " "Manager Chu, why did you resign all of a sudden? Didn't the manager want to recommend you to be the deputy manager? what a great opportunity! Other people dream of this opportunity!"

Chu Ye was helpless.

Did he come here for a promotion? did he still have to come here for a promotion?

He was trying to figure out why Lin Lin was so popular, so that he could use it as a reference to create the world's number one drifting.

This was his dream.

why else would he come to linlin drifting?

However, compared to the confidence he had at the beginning, he was a little dejected now. After spending all his energy, he still had no results. What else could he do with that sense of powerlessness? in the end.

he could only think that lin lin's drifting was a result of luck. first, it was a sense of anticipation. second, it was a sense of atmosphere. third, it was the effect of publicity. fourth, it was mixed with psychological hints.

All of these combined to produce the current effect.

However, he also knew that all of this was built on the popularity of the Linlin Manor. Without the Linlin Manor, all of this would not have been possible.

Therefore, he was surprised to find out that if there was no way to create a Linlin Manor, there would be no way to create an atmosphere like Linlin drifting.

Of course, this was just his own guess. He didn't know that it was actually because of external hacks.

After writing his resignation letter, Chu Ye handed it to the person beside him and said, " "Help me pass this letter to the manager and tell him that I'm leaving."

He didn't want to see the manager.

Although he didn't want to say it, the project manager of Linlin drifting was indeed a very good person. At the very least, in terms of the management and employment of the drifting project, he was well-deserved.

He was still thinking of poaching the manager when he was going to create drifting in the future.

He didn't need to think about it now.

Therefore, he didn't want to see the manager, in case the other party tried to persuade him again. He also made a reluctant gesture and explained too much.

Chu Ye left after he finished speaking, leaving the person beside him with a stunned expression. This was the first time he had seen someone leave after being promoted to the deputy manager of Linlin Manor.

After all, this was Linlin villa, and the deputy manager's status was no less than those big groups in the International metropolis.

seeing that chu ye had really left, the man could only pick up his resignation letter and hand it to the manager. however, he saw chu ye's reason for resignation: He would go home and inherit the family fortune worth more than 10 billion.

"Cross!"

seeing this reason, the man cursed.

When he handed the resignation letter to the project manager, the project manager was at a loss for words.

This can't be a joke, right?

after all, he didn't even want the position of the deputy manager of linlin villa.

Very quickly, after Chu Ye left, the resignation letter was reposted in the various private chat groups of Linlin villa's employees.

the employees of the villa were also discussing chu ye. however, while they believed that he had inherited the family fortune, they did not believe that he had ten billion yuan.

This was probably learning internet trolls.

It was only until one time when Chu Ye appeared on the news as a handsome and domineering CEO that all the employees realized that it was true that he had inherited tens of billions of dollars.

time passed.

The holidays started all over the country.

After the annual meeting between Linlin Manor and Linlin Manor ended, all the employees, except those who stayed behind to guard the manor and the ranch, were on vacation.

those who stayed behind were all you city's local employees. they would be on leave after the new year and would receive red packets.

Moreover, staying behind to celebrate the new year was the same as before. They could also have their family members spend the new year at the villa. Many people were willing to stay behind.

Naturally, Qin Lin and Qin Ren's family were going back to their hometown for the new year.

However, academician Li and Yuan Shan weren't going back to Beijing this year. They were going to stay in the manor.

Captain Tang and the others were almost done searching the mountain, and they planned to do it in one go. As the person in charge, academician Li naturally accompanied them.

After they finished searching the mountain, academician Li and Captain Tang would go back to Beijing to start the next step of their research on the meteorite.

Whether it was a particle propeller or a particle weapon, as long as one succeeded, it would definitely be ahead of the world.

Yuan Shan, on the other hand, was talking about the cancer treatment with the tea leaves. The cancer treatment experiment had also entered the later stage.

Now, it was basically confirmed that the tea leaves produced by Boss Qin's two tea trees could cure cancer. It was now up to Linlin's laboratory to see if the new tea trees could retain their effects.

[Chapter 1133 Reason For Resignation! Qin Lin Is Back! 3](#)

To be able to retain the effect of treating cancer was something that was even more sensational than the intestinal energy restoration powder.

Qin Lin and Qin Ren's family made an appointment and went back to the village together.

Qin Ren had been developing very well this year. With the help of Linlin Villa and Linlin Company, Millennium Works had basically taken over the advertising business in you city and Ming city.

They were even involved in the advertising business in Min province and other provinces, and they had also recruited a strong team.

Of course, apart from the advertising business, Millennium production was also developing online media. Their online media account was also running very well. They already had several million fans and a personal account with five million fans.

This account was his daily working status, which was the video of his daily life as a President. The key was that Qin Lin was still driving a BMW and he hadn't changed his Audi A4.

In the beginning, people had even questioned him for driving an Audi A4 and pretending to be the CEO. Some had even asked internet celebrities to scold him and call him a liar.

This suited Qin Ren's intentions. He directly bought internet traffic and the Internet Water Army to scold him for being a liar. Then, it became the hot search. After that, he began to play videos of his company meetings and the videos of him going to Linlin Manor, intentionally or otherwise.

The video of him talking to the boss of Linlin company was quite popular on the internet.

Slowly, the situation changed. With the good marketing, the number of fans also began to increase rapidly.

On the other hand, the internet celebrity who was looking for a sense of presence was flamed. Can't he be the CEO just because he drives an Audi A4?

Can't a CEO drive an Audi A4l?

When they returned to the village this year, Qin Lin and Qin Ren found that the village had changed a lot. At least, there were fewer old houses, and many Western-style houses and country villas had been built.

this was because many people in the village had made money from planting linlin watermelons.

In the past, everyone would definitely choose to buy a house in the county town. After all, everyone wanted to leave the countryside.

However, the situation was different now. The Linlin laboratory had promoted the Linlin watermelons. Next year, everyone would grow the Linlin tribute rice. In Ming city, a rural household register was more valuable than a city household register.

just by relying on private land and divided fields, they could earn more than the hard work of first-tier cities. if they contracted out more land for wasteland reclamation, they could earn even more.

It could be said that the villages in the entire Ming city were recovering. The young people who had left came back one after another. Growing Linlin watermelons was more profitable than working. They could also reunite with their families. The village was becoming more and more lively. Everyone in the generation had companions and friends. The days when they played in the forest when they were young seemed to have returned.

Naturally, many people in the village bought cars, including Audis and BMWs. After all, the younger generation had more cars than houses.

Therefore, some people didn't have a house and rented a house, but drove BMW and Mercedes-Benz. This was all caused by the concept of consumption.

For example, if one bought a house, the mortgage would be 7000 to 8000 Yuan a month, and he would have to pay off the loan for 30 years. The key point was that after 30 years, the house would not look good anymore. If he passed it to his son, it seemed that his son's girlfriend would not like it and would want to buy another house.

then I'll choose to rent a house. It's 2000 a month. Even if I'm not in a big city, I can rent very well. I can save an extra 5000 a month and 50000 a year.

Twenty years later, when his son grew up and got married, he would have more than a million Yuan. He could directly give his son a down payment for a house and live in a new house.

The key was that he could still have a son without buying a house.

Everyone in the village knew Qin Lin and Qin Ren's car plate numbers. Therefore, when the two cars drove into the village, everyone knew that they had returned.

In the village.

qin lin's reputation was unparalleled. after all, everyone depended on him for a living.

Naturally, many of the respected elders in the village also received the news and immediately gathered together.

"Qin Lin is back. He came back for the new year this year."

"Well, it's time to deal with this matter." indeed, he gave birth to a son. This year, he'll be added to the family tree.

[Chapter 1134 Qin Lin Is The Clan Leader? Ah Ni Is Here Again?](#)

After returning to the old residence and parking the car, Lin Fen, aunt shuigen, and uncle shuigen started to clean the old residence.

On the other hand, Zhao Moye and Qin Ren's wife, Liao Li, were having fun with their children.

Qin Ren's daughter had been born last year and was more than a year old this year. She was the older sister and had been staring at little Qin Feng curiously.

Qin Ren was taking a video with his phone. His private media account was to share his CEO's daily life.

Now that the president was back at the old house for the new year, it was natural to take a photo. It was inevitable to let Qin Lin enter the country.

Little Qin's popularity was so high, and there were many internet celebrities on the internet who were trying to gain popularity.

As a brother, he naturally had to take a share.

Qin Lin, on the other hand, was scrolling through the news on his phone.

However, the first piece of news that he saw when he opened the video made him feel a little disgusted. It was another fish that had slipped through the net of quality education.

The news was about a beautiful woman's engagement photo, which was rumored to be the club's technician.

In fact, this beauty worked in the finance department of a company. It was just that she looked like she was drifting and was dressed sexily.

She didn't know if it was her ex-boyfriend or her bootlicker's disappointment.

The police had already filed a case, and the rumor was a fact.

It was just that some of the netizens' mentality was a little problematic. Everything had a reason and couldn't be groundless. They said that they had been recognized and even had a dog's head emoji.

These people actually had a problem with their mentality.

Therefore, there was a good saying:

The internet was full of 'if there's a hateful person, there's a laughing person, but there's nothing'.

Especially in xueyin, your girlfriend can't be prettier than others, your parents can't be richer than others, your education can't be higher than others, and there can't be happy events in your family."

This was because there were many people with twisted hearts.

Once you were better than others, these people would first conclude that you were guilty.

Qin Lin scrolled through the next video. He sighed that sometimes, people really shouldn't be too envious and jealous, or else their minds would be distorted.

However, when he scrolled to the next video, he was speechless.

This was a case of several women jointly accusing a man with the surname Chen of destroying their family.

Qin Lin almost misunderstood when he saw the title. What was this man doing with their husband?

After reading the content, he realized that it was because these women were at the same time as the man at their friends' parties, birthday karaoke, or company gatherings.

This man might be a psychopath. He was still single at the age of 34, and he secretly took photos of these women. He even found a good angle that could easily cause misunderstandings.

if it was just taking photos, it would be fine. the key was that this man was brainless. he actually took these photos out to show off, saying that he had slept with these women and even told some stories, as if he was a handsome man who roamed freely among the flowers.

Therefore, just because those women appeared in the same place as the man surnamed Chen, they inexplicably became the ones who slept with him.

The key point was that the man with the surname Chen had bragged in front of a female husband, and then something would happen.

with the joint appeal, the man surnamed chen would have to work in the sewing machine for a long time.

Qin Lin was no longer in the mood to browse the news.

Two news videos in a row were fake. This kind of thing was very disgusting.

He didn't understand how perverted these people's minds were.

He put away his phone and went to help his mother clean up.

this year, he returned to the village for the new year. to qin lin, it was a little different because he had a son. on the first day of the new year, he still needed to bring his son into the family tree.

this was also a rule. a son had to be recorded in the genealogy. there was no need to give birth to a daughter like qin ren.

Many people cared about the genealogy, especially the older generation.

To many of the older generation, the genealogy represented the continuation of the family's bloodline and the inheritance of the ancestors' teachings and expectations.

In ancient times, the genealogy also had the edifying effect of "gathering his flesh and blood to tie his body and mind."

It was just that in many places, many people basically didn't have a genealogy.

However, one thing was for sure. Those with a genealogy would definitely be more United than those without it.

At the very least, those without a genealogy were basically living their own lives. As the relationship grew, even if they were from the same village, the feelings would often fade.

As for those who had a genealogy, every year during the new year and special occasions, everyone would organize a gathering to improve their relationship.

Therefore, when a person was in trouble, many people would come out to help. In some places, each village had its own genealogy. When a person was bullied outside, all the villagers would come out with hoes and carrying poles to help.

Just like in the movies, the police had to be very careful when they went to catch people in such villages, for fear of causing trouble.

of course, this was because there was a person with enough prestige in this village who could lead everyone. in ancient times, he would be the clan leader, and everyone would obey him.

Otherwise, these were all relative and not absolute.

just like their village, each village had its own genealogy. in the past, because they were poor, there was no one to lead everyone, and the village was torn apart, with a lot of trivial things happening.

After all, human nature was always hard to grasp.

However, with the development of society, more and more places began to repair the genealogy, strengthen the communication between the members of the family and the families, enhance the mutual understanding and trust within the family, and unite the people.

Qin Lin didn't care about this. After all, when his father was sick, he suffered too many cold looks. He didn't have a good impression of many people in the village.

[Chapter 1135 Qin Lin Is The Clan Leader? Ah Ni Is Here Again?](#)

However, from another perspective, uncle Dashan, uncle shuigen, and the others were also part of the genealogy. Therefore, their family had also benefited from the genealogy to a certain extent.

In addition, his mother was very concerned about this matter.

As the eldest grandson of this generation, little Qin Feng had to be included in the family tree.

this matter could be discussed with uncle water root after new year's eve with a few elderly people in the village.

the new year's eve passed quickly. as usual, he spent it with qin ren's family. then, he invited his close friends from the village to have a meal together.

after that, uncle shuigen also brought uncle dashan and the others to find the elders in the village for the matter of little qin feng's entry into the family genealogy.

the genealogy was usually recorded on the third day of the new year. every year, if a child wanted to be recorded in the genealogy, the ancestral hall would be opened on this day.

early in the morning, zhao mochen got up and said to qin yu, hubby, get up quickly. Today is the big event of our son's entry into the family tree.

perhaps she was influenced by lin fen, but she was also very concerned about this matter.

Qin Lin had no choice but to get up early.

Lin Fen and Zhao Moyu even helped little Qin Feng change into the clothes they had specially prepared.

This little girl naturally didn't know anything. She was still babbling, but she would call out 'grandma' and 'mom' from time to time, making the two women very happy.

After preparing little Qin Feng, Lin Fen began to prepare the things needed to be included in the family genealogy before having breakfast together.

But after breakfast, Qin Lin was ready to go to the ancestral hall in the village. Yesterday, uncle shuigen and uncle Dashan went to the village elders to tell them about little Qin Feng's entry into the family tree today.

However, before he went out, he heard the sound of gongs and drums outside.

When he came out, he saw many people from the village outside. It seemed that every family had people coming.

They were led by a few senior granduncles, whom Qin Lin had met before.

Behind them were the young and strong young people of the village.

among them, there were a few young people carrying a jubilant sedan chair.

When they saw Qin Lin come out, all the young people looked at him. Some of them were ashamed and did not dare to look at him.

Because of what happened in the previous generation, many people knew that Qin Lin didn't like the elders in his family.

Therefore, this year, when the few granduncles asked each family to select people, their parents did not allow them to come. They only allowed the younger generation to come.

The other young people all looked at Qin Lin with either admiration or respect.

Everyone in the village knew that Qin Lin was the owner of Linlin villa and Linlin company, but no one believed them when they told the outsiders.

No one knew who the middle-aged man who was believed to be the boss of Linlin company was, but he had actually pretended to be the boss. However, Linlin's company ignored it, so no one exposed this lie.

Therefore, it was inevitable for these young people to admire him.

However, Qin Lin really didn't understand the situation in front of him.

On the other hand, Lin Fen and Qin Shuigen were stunned when they saw the scene before them.

Because they were old, they knew what this meant. Moreover, it had been a long time since the village had used such a formation.

eight palanquins were used to send the children of the clan leader to the ancestral hall.

Today, when little Qin Feng entered the ancestral hall, a few senior granduncles came to do this. It meant that they treated Qin Lin as the patriarch.

Although there was no such thing as a clan leader in the new era, there would always be a person with high prestige, similar to the clan leader.

However, Qin Shuigen quickly understood.

In the past, everyone in the village was poor. There was no one who could convince the people and had a high moral standing. Therefore, the village was divided and there was no cohesion. Most of them were just bystanders.

Now that Qin Lin was out, the elders obviously had an idea. They wanted to push Qin Lin out to increase the cohesion of the village and restore the role of the family tree.

In addition, the village now relied on Qin Lin for a living, so they wanted to repair the relationship between Qin Lin and the village. Therefore, this was the reason why the young man came.

Qin Dashan came out of the group very quickly, followed by the few old granduncles who were looking down on the crowd.

"Juan Zi, call mo Xiao out and let her take the child to the palanquin!" Qin Dashan came up to him and reminded him.

"Big mountain, what's going on?" Qin Shuigen asked, puzzled.

I only found out this morning, " Qin Dashan said helplessly. but I heard from Qin Long that the matters of the older generation have little to do with the younger generation. After all, everyone was still studying at that time. They were either in junior high, Senior High, or University. Many people didn't know about it.

" all the young people in the village admire qin lin now, " wang yao said. " moreover, many of them are different from their parents. everyone relies on qin lin's company for a living, and they also have to grow linlin watermelons and xiangshui tribute rice. it's good to improve their relationship. "

in the end, everyone is on the same genealogy. The previous village was also because of the bad atmosphere. With Qin Lin's leadership, the atmosphere must have changed.

hearing this, qin shuigen fell into deep thought.

it did make sense.

However, he couldn't make the decision for Qin Lin. If Qin Lin didn't want to, he would be dissatisfied if he insisted.

The old granduncles also looked at Qin Lin expectantly and said, "

"Qin Lin, the village has received many favors from you. Please don't blame us, the old and the young, for acting on our own."

" yes, the village has changed a lot because of you. every family is rich, young people can drive cars, and it's easier to get a girlfriend. "

"....."

lin fen was very happy as these old granduncles spoke. she said to qin ran, "lin lin, look!"

As a woman, she naturally hoped that her son would be respected. Now that these granduncles had recommended her son, she felt a sense of pride.

Qin Lin naturally saw his mother's intention and said to Zhao moyin, who was holding little Qin Feng in his arms, "carry the child up!"

He didn't care about this matter.

perhaps, the matter had passed, and he was no longer on the same level as those people in the village, so he should not implicate the next generation.

upon hearing this, the granduncles 'faces immediately revealed a look of joy. one of them shouted, "Lift the sedan and welcome Zifeng into the ancestral hall!"

With these words, the young men who were responsible for carrying the palanquin immediately lifted the palanquin and entered Qin Lin's old house. They only stopped when they reached Zhao moyin.

these people were full of energy and didn't feel ashamed at all for helping someone carry a palanquin. instead, they felt that it was something they could brag about in the future.

After all, carrying Qin Lin's son into the ancestral hall wasn't something that anyone could do.

It was Zhao Moyi's first time experiencing this kind of thing, so he was a little nervous. On the other hand, little Qin Feng was very happy after getting on the palanquin. He seemed to be a little excited, and he kept babbling. Then, he was carried in the direction of the ancestral hall.

Naturally, this scene had envied countless little brats.

When they arrived at the ancestral hall, Qin Lin also found that the layout this year was better than in previous years. This showed how much importance the village attached to little Qin Feng's entry into the family genealogy, and also showed that the village was indeed richer.

Therefore, little Qin Feng's entry into the family register was also very Grand.

after it ended, qin lin also made some remarks. after all, the village had given such an attitude under the urging of his old granduncles.

He also asked Zhao Moyu to transfer a sum of money to the ancestral hall every year. First, it was to repair the ancestral hall. Second, it was to repair the roads for the village. Third, it was a Relief Fund.

He was still brooding over his father's matter. He only hoped that there would be this relief money. If anyone encountered such a situation, they would have some emergency money.

After that, the new year also ended in a hurry.

Qin Lin and Qin Ren also left the village and returned to you city. Everything in you city was back on track.

Soon, Linlin villa and the ranch resumed their business and became lively again.

Qin Lin took care of some matters at Linlin villa and the company. Just like last year, he started looking at the screen in his mind again to check the days when he would complete the daily tasks of his game character.

however, on the 15th day of the lunar new year, as soon as he woke up, he saw a notification in the game. a figure appeared at the entrance of the farm.

It was the dwarf ah ni who had come to ask for the greenhouse tree blueprint.

This time, he was holding something black in his hands.

[Chapter 1136 Really Eating Grass? 1](#)

When Qin Lin saw the dwarf ah ni appear, he guessed that ah ni must have come to trade for the greenhouse tree.

After all, ah ni had said that he would come back to trade with him again.

he controlled his character to walk in front of the dwarf ah ni and clicked on ah ni. as expected, a notification appeared:

[the dwarf ah ni seems to be looking for you for something!]

Sure enough, it was another BUG. He couldn't click on the conversation.

It was another transaction outside of the dwarven game's plot.

Seeing this, Qin Lin also locked the office door and entered the game with a thought.

At the entrance of the farm, the dwarf ah ni was still waiting.

He walked forward and saw what the dwarf was holding. It was a baby crocodile. The dwarf was holding it in his arms and shaking its head.

Moreover, this baby crocodile was also a little strange. It looked a little different from ordinary crocodiles. Its body was more curved and angular.

When the dwarf ah ni saw Qin Lin, his face lit up with joy. "I'm here to exchange the greenhouse tree design with you again."

qin lin looked at the chinese alligator in ah ni's hand and asked,"Are you planning to use this crocodile to exchange for it?"

"You're so smart, you actually guessed it." The dwarf ah ni immediately said in surprise.

"Ran ran." Qin Lin was simply speechless.

Did the dwarf think he was an idiot?

Was it something that was not clear?

it was just that every time this guy gave him an animal, it seemed that his purpose was not pure, and he wanted to push the blame to him.

The dwarf ah ni saw that Qin Lin was deep in thought and immediately handed the baby crocodile to him."It's not an ordinary crocodile. It hatched from a crocodile egg I found in a pond in the ruins. It's very smart."

Qin Lin took the baby crocodile. The baby crocodile opened its mouth to him, revealing two rows of teeth. However, it was yawning, and its eyes were blurred, which gave him a stupid and cute feeling.

at the same time, he also saw renekton's information:

[(unnamed) special vegetarian crocodile: [pet!]

[Chinese alligators are a type of alligator that can live for 70 to 80 years. They are very docile and do not attack humans under normal circumstances. They usually eat fish, shrimp, and mussels. It is rumored that their ancestors were creatures from the same era as dinosaurs, called kun.

The strength of its bones was so great that it could even tear dinosaurs apart. It could even compete with a huge Azure Dragon in the water. This crocodile seemed to have activated a trace of its ancestor's bloodline under the influence of a mysterious force, and had also undergone some changes.

It loved the smell of plants, and it also had a special attribute: Gentle personality +2, body growth +2, vitality +1, acting cute +1, intelligence +2, companion protection mechanism +2, strength +2!]

It was a Chinese alligator, and a very special one at that.

Have you heard of the vegetarian crocodile?

There was one here.

More importantly, the crocodile had a trace of Yi's blood.

this was awesome.

it was rumored that during the dinosaur era, this thing could even tear apart large dinosaurs in the water.

Of course, what surprised Qin Lin the most was the remark.

the alligator was originally docile, and now it had a docile +2, wasn't this asking it to be an honest person? A crocodile that didn't fight back when hit or scolded?

Body size growth should be referring to the final Growth Size.

Otherwise, if it was only A +2 in body size, then the baby crocodile should be even bigger now. This baby crocodile was obviously only of a normal size, so it should grow bigger as it grew. In the end, it would still be bigger than an ordinary crocodile.

vitality +1, needless to say.

He also wanted this attribute. If the quality was higher and it was +3, he would really be an unkillable cockroach.

The +1 acting cute attribute was enough to make people complain.

it was no wonder that when it yawned earlier, it actually made him feel a sense of dullness.

It turned out that it had such an attribute.

Intelligence +2 was easy to understand.

strength +2 was also easy to understand.

As for the protection of companions +2, that was a bit puzzling.

In the end, Qin Feng felt that this was probably a dog, who would come forward to protect its master, mistress, and little master when they were in danger.

That was probably what he meant.

But crocodiles protect people like dogs? This was unbelievable.

Especially when the dinosaur grew up, its body would be bigger than an ordinary crocodile, and its power would be much greater than a dog's.

therefore, the mechanism to protect his companions should be like this. otherwise, he couldn't figure out what this attribute meant.

"What do you think? it's not bad, right? I want 4 or 5 designs in exchange!" The dwarf ah ni immediately said.

Qin Lin laughed when he heard this.

This guy!

However, he was thinking maliciously. Now that the crocodile was in his hands, if he wanted to Rob it and immediately quit the game with the crocodile, wouldn't it be a double loss for the dwarf ah ni?

"Alright!" Qin Lin didn't do that.

He returned the alligator to ah ni and logged out of the game. He then took out 5 greenhouse tree blueprints from his office drawer and entered the game.

After passing the blueprint to ah ni, ah ni handed the crocodile back to him.

This time, a system notification appeared.

[congratulations, you have obtained a special vegetarian crocodile!]

[do you wish to bind the special vegetarian crocodile?]

Qin Lin smiled wryly when he received the two notifications. No wonder ah ni gave him the crocodile so easily. There was a mechanism to it. If he didn't receive any notifications, he was afraid that there would be some trouble even if he brought it out.

[Chapter 1137 Really Eating Grass? 2](#)

Qin Lin chose "yes" directly, and the system prompt appeared again.

[congratulations, you have successfully bound the special vegetarian crocodile!]

At that moment, the young Chinese alligator in his hand also felt something. It actually took the initiative to rub its head against his chest in an attempt to please him, and its round eyes were looking at him adorably.

this crocodile had not been named yet, and the remark showed that it had not been named. qin lin thought about giving it a name as well: assistant yang.

The system also prompted, "

[congratulations, you have successfully named your pet.]

The Yangzi little yang seemed to have sensed something and started calling out to him.

This cry also seemed a little cowardly.

Qin Lin looked at the crocodile in his hand and smiled. The next moment, he logged out of the game.

The crocodile also appeared in reality.

Qin Lin brought little yang out of the office. He had to put the little guy in a place with water.

There was a special pool in the manor where the moonstones were placed.

"Boss, is this a crocodile?" Gao Yaoyao was checking the guards in the main hall when she saw Qin Lin carrying yang out. She was surprised.

"Yes, it's called little yang!" qin lin nodded and ordered, " it will be in the manor in the future. Tell everyone not to be afraid. It's a specially bred alligator. It's very docile and won't attack people.

the alligator seemed to know that its master was introducing it, so it cried out again, uh huh uh huh uh huh!

Gao Yaoyao was immediately attracted by the scene and followed Qin Lin out of the hall. When they reached the moonstone and took out the pool, she saw Qin Lin put the Chinese alligator down by the pool.

However, to Qin Lin's surprise, assistant yang didn't seem to be interested in the pond at all. Instead, he got up and wagged his tail as he climbed into the pavilion.

Then, he found a place to lie down comfortably. Four of his legs were propped up, as if he was lying on the sofa.

Seeing this, Qin Lin wanted to sigh. Could it be that the crocodile could also feel the attributes of this Pavilion?

"Boss, can I touch it?" Gao Yaoyao couldn't help but ask when she saw Yang's silly look.

"Yeah, it's fine," Qin Lin said with a smile.

When Gao Yaoyao heard her boss's words, she gathered her courage and squatted in front of little yang. She tried to poke little Yang's belly with her finger.

The baby crocodile seemed to have felt something and called out twice.

Seeing this, Gao Yaoyao was even more daring. She started to touch assistant Yang's belly with her entire palm, making him moan even more.

It seemed to be too ticklish and sensitive, so assistant yang couldn't help but use his front paws to hug Gao Yaoyao's hand.

this gave gao yaoyao a fright, and her face turned pale.

yang, the baby crocodile, didn't attack. instead, he stared at gao yaoyao with his eyes wide open. he hummed, as if he was expressing his dissatisfaction.

Gao Yaoyao's heart almost melted when she saw his silly and adorable look. She said excitedly, " "boss, it's too smart!"

Qin Lin nodded and ordered, " "Yaoyao, remember to harvest some Dogtooth grass for this little guy to eat first."

At the moment, the large field behind the manor was planted with quality 2 Dogtooth grass, which was enough for Yang's crocodile baby to eat.

ah???? " Gao Yaoyao looked at Qin Lin in confusion. "Boss, you mean the dog tooth grass? Do crocodiles eat grass?"

"Yes, I eat grass." Qin Lin said solemnly.

Gao Yaoyao couldn't believe it. but my previous teacher said that crocodiles can bite people. They can even eat people.

"then your teacher must have said something wrong, or he's a physical education teacher," qin lin continued seriously.

As he said this, he still had a mischievous smile on his face as he looked at Gao Yaoyao teasingly.

He was naturally teasing this girl.

Crocodiles weren't vegetarians, but little Yang's baby crocodile was. It had been affected by the ruins of Mount goddesses and had a trace of Leviathan's blood in its body. No one knew how it would grow in the future.

Qin Lin left the pavilion and walked towards the villa. He hadn't inspected the villa for a long time, but he still had to go occasionally.

However, before he left the villa, he still took a cap and a mask for himself.

He was also a famous person. If he was recognized at the villa, it would be easy for him to be surrounded.

after qin lin left the manor, he went straight to linlin villa. soon, a greenhouse tree appeared in front of him.

There was a long line outside the greenhouse tree. There were several swings inside the greenhouse tree, and these people were all waiting in line to swing.

The greenhouse tree was now a special feature of Linlin villa. Although it was not as popular as before, many people still wanted to enter the greenhouse tree to play due to its special attributes. Especially for those that had a swing inside, there were many people lining up.

Soft music was playing around them.

This was the recorded sound of the tree.

Although the attributes of the sound of the tree singing after recording could not be compared to the sound of the two trees, the +1 calmness attribute could calm the tourists in line. They would not be impatient and could line up quietly. This way, there would be fewer disputes and quarrels.

After the whole villa was played with this music, the tourists did not quarrel a lot.

those who could still argue, make trouble, or even cause a storm under this kind of music would definitely have no problem getting captain hong to give them a pair of silver handcuffs.

As Qin Lin was thinking, he suddenly heard a commotion at the entrance of the villa. He saw a young man walking in the middle with a group of bodyguards around him. The bodyguards even wore glasses.

This was quite a big scene.

Not far away, a group of tourists was also attracted by the scene. They were all discussing it.

who is this? why is he so ostentatious coming to the scenic Area? "

"It's a celebrity or an internet celebrity, right?"

it's a celebrity. I think he's the third male lead in a recent drama!

"A third male lead acting so ostentatiously when he's out playing? Imagine Tian le, Qing Yun, and the others riding their own bikes to the theater."

"There's also the kind miss Zhou."

"Mr. Liu is a good star."

"....."

Qin Lin heard these discussions and roughly knew what was going on. He could only sigh helplessly.

There were many good things in the country, but many things were also twisted, such as the entertainment industry.

A celebrity whose rank was unknown actually had more influence than those Heavenly Kings.

For this reason, there were many more jokes on the internet:

For example, if a group of security guards were walking around, they wouldn't know who was inside. The key was that the security guards had dispersed and they didn't know who was inside.

Another example would be hiding in a crowded place, afraid that passers-by would find him, but also afraid that passers-by would not know it was him.

To put it simply, he was looking for a sense of existence.

Qin Lin shook his head and ignored the other party. He continued to stroll around the mountain villa. As long as the other party had bought the tickets and did not cause any trouble, he was a tourist of the mountain villa.

...

In the Linlin Manor, Gao Yaoyao was completely dumbfounded by Qin Lin.

She even wondered if her teacher really taught P.E. But that shouldn't be the case. There were also scenes of crocodiles biting people in TV and movies.

However, she still left the pavilion and tried to go to the sports field. She cut a large bunch of dog tooth grass and then hurried back to the pavilion.

The little crocodile baby was still rolling on its belly, and when it saw her, it hummed, as if greeting her.

She took out the Dogtooth grass and placed it next to the baby crocodile.

Yang didn't seem to care about the green Dogtooth grass at first, because he wasn't hungry at all.

But suddenly, it moved closer to the grass and sniffed it. Then, it tried to roll its tongue and put a few blades of grass into its mouth, and then began to chew.

It didn't take long for it to flip over, as if it was very excited. Its belly was back on the ground, and then it buried itself in the green dogtooth grass.

He looked as if he had just eaten a delicious Taotie.

It was obvious that the quality 2 Dogtooth grass had completely attracted it. Just like how quality 2 food could attract people, it couldn't stop eating.

Gao Yaoyao was really surprised to see this.

The crocodile was really eating grass, and it was eating so happily. It was unbelievable.

Now, she really wondered if her previous teacher had taught physical education. At the very least, that teacher had definitely taught the wrong thing. Crocodiles really ate grass.

...

[Chapter 1138 Fighting For! Job With The Pandas And The Extinction Of The Cattle](#)

qin lin went back to the manor after a tour around the villa. he saw gao yaoyao and two waiters watching something at the sports field.

Academician li was sitting there, and he was curious.

He was still taking pictures with his phone.

qin lin walked up to yang and saw him rolling around on the grass in the field. while rolling, he didn't forget to bite off a blade of grass and chew on it.

as he chewed, he began to roll around in the green dogtooth grass again. his eyes were so happy that they were wide open, revealing a dazed look.

That would be no different from heaven, right?

"Boss!" gao yaoyao saw qin lin and immediately greeted him.

"Chairman Qin!"

The other two waiters immediately greeted him respectfully and left quietly. They were afraid of being misunderstood as being lazy.

Academician li also looked at Qin Lin and said in surprise, "Boss Qin, this is just a Chinese alligator, right? It looks like it's a newly born baby, and it's a little special!"

while he was talking, he took out his phone and sent the video to a familiar academician.

The other party studied animals and crocodiles. Perhaps they knew the reason for the abnormality of the baby crocodile.

It was surprising that a crocodile liked to eat grass.

It was just that he had not done any research in this area.

Qin Lin explained with a smile. It was indeed a little special, and there were some changes to the breed!

In any case, he'd already thought it through. He'd push the blame on Yang's abnormal behavior, especially if he looked different from a normal Chinese alligator in the future because of his spinal cord.

Academician li naturally knew this, so he was waiting for his friend to say something.

After chatting with Qin Lin for a while, academician li went back to his room. As soon as he entered the room, he received a phone call from his friend.

He immediately picked up the call and heard a surprised voice from the other side. "old li, that crocodile must've gone through a genetic mutation. otherwise, it wouldn't be like this."

this kind of genetic mutation is very rare. Just like our national treasure, the Panda, they were originally carnivores, but later became bamboo-eating animals.

"it's just that the change in their carnivorous nature is a change in their living condition. at first, they were like foxes, a very small animal. they usually hunt in groups. however, during the glacial period, the

climate changed, and there were fewer and fewer animals. food was running out, so they had no choice but to eat bamboo to supplement their nutrition. "

"It's just that there are very few animals that can complete this kind of carnivorous mutation. Carnivorous animals like saber-toothed tigers failed to complete their carnivorous mutation in that environment and eventually went extinct."

it's just that there aren't any environmental changes in today's society. It's really surprising that a young crocodile can have a change in its eating habits.

furthermore, if this alligator is a vegetarian like the Panda and no longer eats meat, it would be a miracle like the Panda. It wouldn't be an exaggeration to say that it's a different kind of national treasure.

"There must be a reason." Academician li was obviously surprised. Otherwise, he wouldn't have asked his friend.

On the other side of the phone, another question immediately came from the other side. "Old Li, where did you see this crocodile? Linlin Manor?"

"Yeah, it's boss Qin's." Academician li didn't try to hide it.

the person on the other end of the phone was surprised, "is it boss qin?" Last year, Minister Lu came to us with a lot of information, papers, and book data about animal genes, saying that he wanted to give it to this boss Qin. Could it be that boss Qin is really a demon, and he has come up with some results in animal genes?"

"There's such a thing?" Even academician li was surprised.

Minister Lu had given boss Qin information, papers, and book data on animal genes, and boss Qin had come up with results so quickly?

Obviously, the two of them were just imagining things.

In fact, Qin Lin had already locked the documents given by Minister Lu in his office drawer and hadn't even taken a look at them.

"There's definitely some information. I'm the one who organized it," the person on the other end of the phone said.

Academician li thought for a while and said, "if it's boss Qin, it wouldn't be strange, right?" everyone knows that his talent is on the level of a demon."

"I didn't completely believe it before, but now I do," the person on the other end of the phone said seriously.

Academician li hung up the phone and was even more certain.

The Chinese alligator had obviously just been born. Boss Qin must have been training it before and now it was out to adapt to the environment.

However, boss Qin's talent had shocked everyone time and time again.

Linlin Manor sports field.

Yang, the baby crocodile, was rolling in the sea of green fodders when he noticed his master. He immediately ran to Qin Lin's feet and barked at him.

The way she raised her head to look at him was very adorkable.

Qin Lin chuckled, then knelt down and touched Yang's head.

with this ability to act cute, when the baby crocodile grew up, hatched eggs, and hatched baby crocodiles, they could still retain their cute attributes. this was a new species that could compete with pandas for a rice bowl.

At this moment, Gao Yaoyao, who was beside him, said, " boss, I heard that the Chinese alligator is a protected animal. You can't keep it for yourself. Do we have the procedures? "

This reminded Qin Lin.

Although it didn't matter if he had the procedures or not, no one would care about him now.

Because even now, he still had this privilege.

However, it was better to go through the procedures. After all, it was better to make himself invulnerable. There was no need to cause any disgusting trouble because of the procedures.

Moreover, although this thing couldn't be raised in private, places like the zoo could apply to raise it. It just depended on whether the application was approved.

qin lin was quite confident about this. if he applied for it at linlin ranch, no one would know the procedures and no one would dare to apply.

With that thought in mind, Qin Lin called Lin Lanzi and applied for the breeding procedure for the Chinese alligator.

Now that Zhao Moyu had handed over the position of the villa's general manager to her, she would only be in charge of the finance department. In the future, these things would be handed over to Lin Lanzi to deal with.

After hanging up the phone, Qin Lin saw Zhao Moyi carrying little Qin Feng over, and on Zhao Moyi's shoulder stood the little guy, red hair.

"Hubby, what are you guys looking at?" Zhao moyin asked curiously when he saw Qin Lin squatting down.

"Let's look at the new kid." Qin Lin explained with a smile.

"Crocodile?" Zhao mochen also saw Yang's crocodile baby and asked in surprise, " "Hubby, are you going to keep crocodiles in the manor? Will it be dangerous when it grows up?"

Qin Lin shook his head and said with a smile, " it's a special kind of Chinese alligator. It's very gentle and doesn't eat meat. It only eats vegetarian food. It likes to eat Dogtooth grass.

Zhao mochen looked at the baby crocodile. Sure enough, he saw the baby crocodile rolling around in the dog tooth grass and rolling it into its mouth again.

"squeak!" Red hair suddenly squeaked and got down from Zhao mochen's shoulder. When he saw little Yang's crocodile baby, he curiously went in front of him to greet him.

"Yes, yes, yes!" little yang also saw red hair, but he didn't expect it to bark and take two steps back.

the red hair seemed to feel that his new partner didn't like him, so he took two steps closer and squeaked.

However, Yang ran to Qin Lin's back with his tail wagging and started barking at him, as if he was asking for protection.

Qin Lin was stunned.

in the past, he had heard that the chinese alligator was the shame of all alligators. it couldn't even defeat the goose. the main reason was that it couldn't defeat the goose, but it would be defeated by the goose.

You can't beat the big goose, but you're afraid that this is too much for a little squirrel, right?

The baby crocodile had a strength +2 attribute.

With such a cowardly look, if it wasn't for the +2 attribute of the companion protection mechanism, who would believe that this guy could still protect his companions?

"daddy, yiya, yiya, yiya!" Little Qin Feng's voice rang out. He was staring at little yang, who was standing next to Qin Lin's feet, and he kept reaching out to him.

"hubby, does the little one want to play with it?" Zhao mochen frowned and asked.

"En!" Qin Lin took little Qin Feng and put him on the ground.

Because the sports field was covered with soft dog tooth grass, and people regularly de-wormed them, there was no problem.

Most importantly, little Qin Feng's physique was stronger than an ordinary baby's because of his fetus-beneficial Foundation. Now, he could already crawl on the ground by himself.

An average child at this age would not be able to do so.

Moreover, which child would not crawl on the ground?

"Yiya Yiya!" After little Qin Feng was placed next to yang, he happily crawled over to him.

Yang's baby crocodile seemed to be very curious about the human baby who was crawling happily.

After all, they were both just born.

Before it could react, little Qin Feng pounced on it and laid on its body.

Perhaps because of the strength +2 attribute, it did not care about little Qin Feng's weight. It just looked at little Qin Feng for a while, then looked up at Qin Lin curiously.

after looking at qin lin, he looked back at little qin feng. he looked back and forth repeatedly, not knowing what it was looking at.

little qin feng, on the other hand, picked up little yang's crocodile tail and smiled happily.

Red hair took the opportunity to jump onto Xiao Yang's back, making the baby crocodile nervous. But with its tail being grabbed by little Qin Feng, it didn't dare to struggle and could only lie there.

Qin Lin, Zhao mochen, and Gao Yaoyao were all amused by its behavior.

Really, even a Panda might not be as cute as it.

Zhao Moyu was relieved to see this. She didn't believe that the little crocodile would be in any danger.

Qin Lin played with little Qin Feng for a while, then asked Zhao Moyi to carry him into the manor.

Little yang, the crocodile baby, was released. He only reacted when he saw Qin Lin and Zhao Moyu walking into the manor. He hurriedly moved his little legs to follow them, but the red fur on his back didn't come down.

Red hair had been a dog Knight, a Fox Knight, and now he was going to be a crocodile Knight.

Qin Lin played with little Qin Feng in the living room while Zhao moyin brought the little guy to take a shower before returning to his office.

Back in his office, he took out his phone and started to read the news.

He had wanted to read the current affairs for fun, but who knew that he would see two explosive news.

One was the news of a taxi company being fined more than 8 billion Yuan. It was really well done.

Another piece of news was even more shocking.

because the plaster country failed to reach an agreement with the domestic government on the medical support of the coagulated plague, the disease in the domesticated animals in the plaster country broke out completely, and a large number of deaths occurred due to the extinction of small domesticated animals.

In particular, the country of ointment and cattle had suffered a major blow. More than 70% of the cattle in several famous Wawa cattle ranches had died, including the carefully cultivated breeding cattle.

[the paste country and cattle are facing the crisis of extinction. The paste country is calling on the world, condemning the country, and hoping that the country will carry out humanitarian aid.]

[Chapter 1139 Using All Of His Property To Exchange For Qin Yang's Life!](#)

The next day.

The news about the country of medicine and cattle attracted more attention.

Naturally, the comments were all '6'.

if there is a country that we can gloat over, then this country of medicine is definitely one of them.

Although this wasn't humane, he really couldn't help it!

the coagulated plague was already a thing of the past in china.

With the healing potions, it would not be a disaster in the future.

However, to other countries, it was still a huge disaster, because they had not yet developed a healing drug.

Therefore, they could only ask for pharmaceutical support from their country.

However, with so many countries asking for help, no matter how much medicine was produced, it would not be distributed evenly.

After all, gathering gray cloth grass and double sickle grass required time. There were barely enough materials for his own use in the country, but if he were to help the world, these two types of grass would not be enough.

in the future, these two kinds of grass could no longer be called weeds, because the smart ones in the south had already contracted land to grow these two kinds of grass.

Since the medicine that little Qin had developed could cure all kinds of animal plagues, even if the coagulosis plague had passed, this medicine would still be a common medicine in the future.

It was under such circumstances that the distribution of potions was naturally based on close and distant relationships.

There's no reason for me not to give more people who are close to me, but to give more people who cause trouble for me all day, right?

Even if I help those who are close to me, it's not a problem for me to help you guys who are looking for trouble, right?

This country of healing was naturally one of those who were looking for trouble. Furthermore, it was not just that.

therefore, even though the other party had negotiated, there had been no response from china. they were just dealing with the wrangling.

i'll drag yingluo first.

this also led to the death of countless animals in the plaster country, and the national treasures and cattle were also exterminated in batches.

In the country of medicine.

on a wakkefu cattle farm, yagyoshan yilang was no longer the high-spirited president of the wakefu association. his face was full of dejection.

He looked haggardly at the news that he and the Bulls Association were appealing to the world.

He hoped that his appeal would receive the world's sympathy, and he could use the momentum to force the other party to give them the potion.

Without this medicine, their Heniu country would really go extinct.

They really didn't dare to imagine that kind of scene.

could it be that if japan no longer had any more cows in the future, they would have to find the other party to lure them in like zhu zan?

The crested ibis was the national bird of their jiaiyao country. It had been on the verge of extinction a long time ago, and that country had managed to breed 7000 of them out of 7.

However, their national bird wanted to be introduced to the other party.

This was definitely a great humiliation.

Now, their national treasure and cattle were on the verge of extinction. Were they going to end up like Zhu Zan in the future?

However, yagyama Yoshihiro's appeal did not receive any response.

This was because everyone needed the healing potions for the cobble plague at this time.

it's already humanitarian to appeal for the country's medicine for you, but wouldn't that mean that we have to share the medicine with you?

Come to think of it, I'll help you out as a humanitarian after I'm done with the coagulative plague in my country.

As for whether your country of ointment and your Bulls can last until then, it will all depend on luck.

This was probably what the other countries were truly thinking.

If he helped someone else, he might die with the other party, or he might die while the other party lived. In such a situation, even the goddess Phoenix would choose to stand by and watch coldly.

therefore, even if the ointment country spent a lot of money to buy some medicine, it was still a drop in the bucket. the animals that had just been treated could not be completely cured, and those that were treated soon became infected again.

Moreover, no one would dare to resell more potions before everyone had cured the plague.

If they were discovered, not only would the people in their own country cause a ruckus, but the eastern country might also feel that they had enough medicine and would not support them anymore. That would be super troublesome.

"damn it, everyone has no humanity." Yagyama eiro saw that his appeal was not being responded to, and shouted angrily.

It was as if the entire world had offended him.

At this moment.

The assistant ran in hurriedly and reported, " "Mr. Yagyama Yoshihiro, the last two Wagyu cattle in our farm have also been infected."

Upon hearing this, yagyoshan Yoshihiro fell to the ground in despair.

They were the last two of his hope, and now they were infected.

If they couldn't come to an agreement on the potion, everything would be over.

Yagyama Yoshihiro held on to his last hope and made a phone call to the Department.

As soon as the call went through, he anxiously said, " 'i'm ichiro yanagi, the president of the bulls association. what's going on in the negotiation department? Why hadn't they come to an agreement on the potions? If you don't have the ability, then don't sit in that position."

Obviously, Yanagi Ichiro had found someone to vent his anger on.

His words seemed to have angered the other party.

One of them said coldly,"if it wasn't for you and the beef Association trying to make their presence known by holding an international beef conference to isolate them, would this be the situation now?"
You guys are the sinners."

what a joke, the cobble plague was so serious, they didn't want to take the blame, but if the other side didn't give them any potions, they couldn't talk about it.

Now, the Association of Bulls was obviously the best scapegoat.

After hanging up the phone, yagyama Yoshihiro's entire person had completely lost his last bit of color.

Was it all his fault that their country of medicine was going extinct? Was this all because he wanted to hold a beef tasting conference in the other country?

[Chapter 1140 Using All Of His Property To Exchange For Qin Yang's Life!](#)

he thought about how the last two breeding cows on his farm had been infected.

His face turned ashen at the thought that they might have to import their own national treasures and cows from the other party in the future.

Yagyama eiro quietly walked to his office.

He locked himself up for a day, then called his assistant and instructed, " it's not my fault. It's all that little Qin's fault. He was the one who raised the Wagyu and developed this medicine.

"Why did he have to be able to research it? why do we and the bulls have to face extinction? He must be the one who caused the plague. He wants us and the cows to go extinct, and then we'll beg him to steal the cows."

The assistant was stunned when he heard yagyama Yoshihiro's words.

Was this nonsense?

Just to exterminate them and the Bulls, and then the other party created this plague?

It was impossible.

However, looking at Liu Shan yilang's messy hair and red eyes, it was obvious that he was a little crazy.

Yagyama Yoshihiro continued to mumble to himself, " "I've already used all my assets to hire a top assassin from our country to kill that Qin."

he's the real culprit. I must kill him. I'll leave the rest of my real estate to my family. Help me hand it over to them.

As he spoke, yagyoshan Yoshihiro took out a few documents as if he was leaving his last words.

The assistant obviously felt that yagyama Yoshihiro was going crazy, so he hurriedly walked out to call his family.

He had to be sent for treatment.

however, as soon as he made the call, the assistant heard a scream and rushed back to the office. in the office, yagyama yoshihiro was already lying in a pool of blood, and there was a knife in his abdomen.

" achoo! " when the assistant saw this scene, he immediately cried out in horror.

Not long after, the news of the death of the president of the Wagyu Association, Yagyu Yoshiro, came.

...

A few days passed in the blink of an eye.

Linlin Manor.

Qin Lin was watering the flowers in pots. After these days, the seeds that the night Empress had taken out had already grown out of the branches and leaves.

In reality, the seeds had either rotted or were growing at an incredible speed.

Of course, the seeds that the game brought out were already believed by academician li and Yuan Shan that he cultivated them with the mutated space vine gene.

So, it wouldn't be strange for the night Queen to emit a bright glow like the mutated space vine.

The source was reasonable, and the two old academicians could testify.

When Qin Lin was watering the plants, he would occasionally look at little Qin Feng, who was playing in the living room, and little yang, the baby crocodile, who was holding his tail.

There was also a chirping little girl next to them. She was Lin Liu and Tang xiuwan's little girl.

After Qin Lin finished watering the plants, he walked to a field of ornamental bamboo.

The ground there was covered with a special plastic film and covered with a layer of dense seeds.

These seeds were naturally the seeds of the mutated space vine.

He had planted the first batch of space Vine Seeds that he had taken out from the game, and he had already harvested the seeds.

The mutated space Vine's newly harvested seeds needed to be dried for some time, just like watermelons, to kill bacteria.

Of course, these seeds were not only harvested from the outside world, but also from the game that Qin Lin had mixed in with them.

His goal was naturally to increase the number of monsters and speed up the progress of fairy tale mountain.

Otherwise, how long would it take to gather all the seeds in the mountain?

Fortunately, the mutated space vine did not lose its seeds after one harvest. Even if it had withered, it would grow back after some time.

Qin Lin looked up at the sun and began to put away the seeds of the mutated space vine.

At this time, Zhao Moyu also came over and asked, "hubby, are these fairy tale Vine Seeds ready to be planted?"

"En!" qin lin nodded.

He wanted to complain about the name 'fairy tale vine'.

this was the name that zhao moyu had come up with. the mutated space vine didn't have a name in the outside world, but it was a new mutated species in other people's world, so they had to give it a new name.

However, Zhao mochen was really bad at naming things. Why wasn't the fairy tale vine called hornet's vine?

No matter what, it was still called a luminous vine.

however, it was up to zhao moyin to like him.

He even felt that Zhao Moyu would change the name of the game's Night Queen to fairy tale flower.

When fairy tale mountain was completed, there would be a casual remark: Fairy tale mountain had a fairy tale vine, and next to the vine were fairy tale flowers.

That would be too vulgar.

"Then let's ask sister LAN Zi to go to the valley to take a look!" Zhao Moyu said.

"Alright!" qin lin nodded again.

The valley that Zhao Moyu was talking about was naturally the valley where Captain Tang found him when he asked Xiao Wu to throw meteorites.

Captain Tang and the others had already reached the top of the mountain, and you city construction had also begun to develop the bottom of the mountain.

After the foundation of the cable car station was built, the pillars were next. Then, the mountain path and the forest path were developed and laid at the same time.

At that time, the entire mountain would be transformed into a natural scenic spot for sightseeing and some unique landscapes. This was a very big project for you city construction.

naturally, the construction of several tent camps and the greenhouse on the top of the mountain, which zhao moyu had planned, was handed over to lin han.

Zhao Moyu took out his phone and called Lin Lanzi. Lin Lanzi also drove a car to the manor very quickly.

She invited Qin Lin and Zhao moyin to get in the car, then started the car and drove directly to the valley.

Now, you city construction had already built a passage from Linlin Manor to the valley. Although it was a simple road without any asphalt, there was no problem with traffic.

Lin Lanzi stopped the car at the entrance of the valley, and then entered the valley with Qin Lin and Zhao Moyu.

The construction in the valley was still going on. There were going to be tents and camps here.

the most important thing was the surrounding environment. the first thing was to build the railing to separate the river. the railing had to be strong, low in density, safe, and beautiful.

The requirements were extremely high, and it all depended on the abilities of Lin Han and the senior designers she had found.

When Qin Lin arrived, the entire Valley had been cleared out. All the big and small stones had been cleared out, and the surrounding landscape Foundation had been built.

qin lin also saw that the mutated space vine had been transplanted in some places.

These mutated space vines were grown from the seeds that he had left behind. After Lin Han and his men started the project, they transplanted the space vines to suitable locations and took care of them carefully.

When the three of them arrived, Lin Han was already in her work clothes and directing the construction workers. There were a few men and women beside her. They were holding a drawing and painting the entire Valley, making notes from time to time.

These people were naturally Lin Han's senior brothers and sisters. These people were obviously very attentive. The reason why they abandoned their current project and came to help Lin Han's junior was because this was a project of Linlin villa, and they wanted to leave their names on it.

Not to mention other things, with the popularity of Linlin villa, the campsite and the greenhouse community on the top of the mountain would become popular in the future. In the future, when he took on projects, the client would ask about his past designs. He just had to tell the client that he had participated in the project.

In that case, it would be more useful no matter how much he said.

Just as Qin Lin entered the valley, a figure appeared in the villa in the distance.

The figure carried a violin case on his back, as if he was an aimless mountaineer. After he appeared not far from the valley, he took down the violin case.

There was a violin in the violin box. He took it out and found some special parts inside.

When these parts were put together, they actually formed a special crossbow.

The crossbow bolt wasn't big, only the size of two palms.

the figure nodded in satisfaction with the arrow in his hand.

Even though it was small, its range and power were great. It was enough to hit the target's position, all thanks to modern technology.

This country had no way of bringing weapons over. It was too difficult, so they could only bring these more primitive weapons.

it was even more dangerous to come to this country.

He didn't know if he would be able to leave alive after assassinating the target.

However, he had to come. After all, someone had offered him all his belongings for him to kill this person. Moreover, the other party's belongings were a temptation that he couldn't resist. They could allow his family to live very well for a few lifetimes.

Moreover, the employer said that the goal was to make their country's Wagyu extinct, and his dead father had also raised Wagyu all his life.

Most importantly, the target was famous enough in this country. This was a great opportunity for him to become famous.

the figure took out a box and opened it. there was a small crossbow arrow inside. the arrow head was blue, which meant that it had been poisoned. as long as it hit the target, the target would die within two minutes.
