

The Game 1191

[Chapter 1191 Magical Effect! The Guess Is True! 1](#)

qin lin got up early in the morning and looked at zhao moyin * who was hanging around him, and he couldn't help but feel * little tempted.

People often say that eating is also eating.

There was also the feeling of warmth and desire.

That was probably what he was thinking right now.

With his current status and money, it was no longer just keeping him warm. He was full and warm.

Even if they used money to cover their sleep, they would find it too warm and sweat.

therefore, he could only fantasize about it.

After giving birth to the child, Zhao moyin had gained a more mature charm. He was more attractive and wanted to eat her more.

"It's early in the morning, don't mess around!" Zhao Mo snorted.

"I won't mess around, I'll do it straight away." Qin Lin said with a smile.

"Hehe." Zhao Mo hehe.

Qin Lin was proud of himself. Just as he was about to take action, he heard crying from the cubicle outside.

zhao moyin hurriedly pushed qin lin away and got up to put on his clothes.

Little Qin Feng was clearly awoken by his hunger.

Qin Lin sighed.

Parents 'true love would always be destroyed by their children!

He could only get up and wash up. When he left the room, Lin Fen had already prepared breakfast.

Lin Fen's body was getting tougher and tougher because of the daily consumption of the Yingying rice and other quality 2 things.

Therefore, she would wake up early every morning to make breakfast for her son and daughter-in-law.

Especially after Zhao Moyi gave birth to little Qin Feng, she had been making all kinds of tonic soups, for fear that the mother and son would not be well-nourished.

Naturally, she was enjoying it. She enjoyed the blessing of having three generations in the same house. She was also glad that her family did not have the Bullsh * t mother-in-law and daughter-in-law affairs of other families.

After breakfast, Qin Lin went to his office and received a call from Minister Lu.

This was definitely because of the Jade consort cream.

Previously, Minister Lu had stayed in the manor for a week. He wanted to buy some time to cover it up, so he did not immediately crack the secret recipe through doctor Dott's BUG.

After all, it was a little too monstrous to solve it every time he got the recipe.

It was normal for him to stall for time.

In addition, he had focused all his attention on the matter of the Atlantic sturgeon and the Alabaster devourers, so the matter of the Jade consort cream had been delayed.

Seeing that he wouldn't be able to solve the secret recipe so quickly, Minister Lu and Chu Qingfeng went back first.

Now that so much time had passed, Minister Lu probably couldn't wait any longer.

After pressing the button, Minister Lu's urgent inquiry came, "Boss Qin, I'm really sorry to call you so early, but senior Chu and the others still have no clue about the secret recipe of the Jade consort cream, so they wanted to ask you."

Qin Lin understood. He smiled and said, "Minister Lu, I've already cracked a few of the secret recipes. I need some time to test the efficacy and see which one is correct."

Even though there was a BUG, he didn't say too much. Instead, he replied in an uncertain way.

"really? I'll head over to your city immediately." Minister Lu's voice was filled with surprise when he heard Qin Lin's words. For him, since Boss Qin had a lead, it meant that there would be results soon.

He had great trust in Boss Qin's achievements in traditional Chinese medicine.

Therefore, after he hung up the phone, he immediately asked his assistant to book a plane ticket. He wanted to know the effects of the Jade consort cream as soon as possible.

.....

on the other side.

Qin Lin hung up the phone, locked the office door, and brought the secret recipe and information that Minister Lu had given him into the game.

Then, he logged out of the game and controlled his character to bring the secret recipe and information to doctor Dott.

After a short while, a conversation prompt from Dr. Dott appeared.

[this seems to be a very good secret recipe. I'll need some time to repair and supplement it. Please wait a moment.]

Qin Lin's eyes lit up when he saw the notification.

This meant that the Jade consort cream was indeed an amazing secret recipe.

Most importantly, the secret recipe that doctor Dott came up with would have the characteristics of the game, and it would be even better.

He was suddenly looking forward to the Jade consort cream.

not long after, doctor dott's prompt appeared again.

[congratulations, the recipe has been repaired. This is a very rare medicinal recipe, but the recipe is too mysterious and difficult to understand, so I have compiled a new one!]

[you have received a secret recipe for a special medicine, the jade consort cream, written by dr. dott!]

Qin Lin immediately looked at his game character's backpack.

There was indeed a recipe scroll inside.

If he wanted to see the specific information of the recipe, he had to enter the game.

therefore, qin lin re-entered the game and saw the remark of the jade consort cream:

[special Jade consort cream recipe: Grade 2]

[this is a special secret recipe for the jade consort cream. after using it, you can obtain the specific formula of the jade consort cream. this is the legendary cream used by noble consort yang, and after dr. duo te's repair and improvement, it has a stronger effect: Scar recovery effect +2, wound recovery effect +2, old scar removal effect +2, tissue recovery effect +2!]

This secret recipe only had 4 simple effects.

However, these four effects accurately reflected the effects of the Jade consort cream.

There was no need to mention the recovery of scars. The recovery effect of scars was very good.

Not to mention healing wounds, scars usually only appeared with the wound.

Old scars meant that some wounds would heal, but the scars would remain. After becoming old scars, it would be hard and dead.

This kind of scar was generally impossible to recover from. If this kind of old scar could be recovered, it could be said that the attributes of the Jade consort cream were very magical.

The last one was healing damaged tissue, which was a little difficult to understand. It should be like those larger wounds that would damage muscle or nerve tissue.

[Chapter 1192 Magical Effect! Guess Established _ 2](#)

the recovery effect should be able to recover the damaged muscle or nerve tissue.

This was clearly a very impressive effect.

It must be known that many people with burns could not even make facial expressions due to their facial muscles being damaged.

With this attribute, even the muscle tissue could be restored.

He had previously obtained many secret recipes through doctor Dott's BUG, but most of them only had +1 effects.

This was the first time he had seen the effects of the Jade consort cream increase by 2 points.

More importantly, the effects were all very impressive.

Although this was due to the bugged effect of Dr. Dott, it also meant that the original effect of the Jade consort cream should also have A +1 degree.

After all, the scar on noble Consort Yang's back had already solidified into an old scar. Even after beheading so many Imperial physicians, it still hadn't been cured, but it was cured by this Jade consort cream.

Now, through this secret recipe, doctor Dott had upgraded it to another level.

If this ointment were to be made public, its scar recovery effect would probably cause a sensation.

At that time, it would also confirm the legend of noble Consort Yang and the Jade consort cream.

[do you wish to use the special Jade consort cream formula? Who was it? [no?]

qin lin immediately chose "yes."

In the next moment, the secret recipe dissipated into specks of Starlight and entered his body. Then, a stream of information quickly gushed into his memory.

those were the ingredients and data for the jade consort cream.

after a while, qin lin also got the specific formula of the jade consort cream. then, he exited the game, turned on the computer, and wrote down the detailed herbs of the formula.

Naturally, these herbs alone were not enough to make the Jade consort cream. After all, during the preparation, the order of the herbs added, the time to fuse the cream, and the proportion of the herbs added had to be known.

Otherwise, if one step went wrong or the ratio was wrong, he would not be able to concoct the Jade consort cream. Not to mention healing scars, he might even be disfigured and his skin might fester.

after qin lin wrote down the recipe, he left the office and drove to you city pharmacy to buy the herbs.

Most of the herbs in the recipe were sold in you city's pharmacies.

However, there were a few herbs that were not common. The few pharmacies in you city did not have many herbs and needed to be ordered.

even if he paid enough money for these herbs, he would only be able to reach you city tomorrow at the earliest.

Therefore, Qin Lin could only pay the deposit first and come back tomorrow.

At the same time.

You city Min River Branch area.

chen li once again accompanied qi kaiyou and the other experts to the water.

on a ship, qi kaiyou and the experts were fiddling with the instruments and equipment.

"Director Qi, is this equipment really that magical?" Chen Li asked curiously.

Qi Kaiyou explained with a smile, " this is the most advanced underwater detection equipment. It can move through the water. With the light of the equipment, it can clearly illuminate the surroundings. It can also use special sound waves to scan the surrounding fish.

also, the background data of this instrument records the information and images of the existing fish, which can be compared with the fish in the water.

if the fish found in the water doesn't match the information in the database, it may be an extinct fish with no existing data image records.

qi kaiyou explained a lot, but chen li still didn't fully understand. he only knew that this instrument was very powerful.

He watched as the experts placed the special-shaped equipment into the water. The equipment was connected to a screen that could transmit videos.

After these instruments went into the water, the connected screens quickly showed the underwater images.

Qin Lin thought that the fish he had set free were small and medium-sized, and that they wouldn't be discovered so quickly. Obviously, he didn't expect that people could find fish with such high-tech technology.

Chen Li looked at the video that was shot and was somewhat looking forward to it.

the appearance of the sturgeon and the white-fin dolphin was already very shocking.

If it was as the experts had guessed, that there were other extinct fish in you city's River, then the meaning of you city's River was even more extraordinary.

Qi Kaiyou brought the experts 'control equipment and scanned the surroundings. They were also full of anticipation.

It was now speculated that the Atlantic sturgeon and the Atlantic dolphin mutated in the same special environment, and then they were attracted to you city by the changing climate. It was possible that other extinct fish lived in that environment.

there were many such environments, such as an underground river.

now, as long as they could find another extinct fish, their speculation would be confirmed. when that time came, they would have to apply to the higher-ups and start to find this special environment.

However, you city's min River tributary was not large. Even with the help of scientific instruments, it would take some time to find the fish in the water.

Unless they were very lucky or there were a lot of extinct fish.

Naturally, the possibility of these two possibilities was very small.

just as qi kaiyou was thinking about this, an expert's surprised voice was heard. " "What is this?"

The expert controlled his device and stared at the image captured on the screen.

"What's wrong?" qi kaiyou immediately asked.

there's an unusual fish detected in the sonar of my device, " the expert said hurriedly. it doesn't seem to be an existing fish. I'm controlling the device to get closer.

"What?" Qi Kaiyou was stunned.

If it wasn't an existing fish, then it was already extinct?

was he that lucky?

He hurriedly went to the video of the expert, and the other professionals also came over.

[Chapter 1193 537-Magical Effect!](#)

The image of a fish appeared on the screen, and the image was quickly approaching the fish.

soon, under the not-so-bright light of the equipment, a strange-looking fish appeared in front of everyone.

"this fish is a two-legged fish?" The expert said subconsciously.

The other experts also inched closer, wanting to take a closer look.

Because the bipedal fish was a fish that had been extinct for more than 30 years.

"It's indeed a two-legged fish!" Qi Kaiyou's face was filled with surprise and joy.

they were shocked that they had found another extinct fish so quickly, and they were happy that their speculation was almost true. there must be a special environment near you city.

Qi Kaiyou immediately gave another order. quick, keep looking. The two-legged fish is not a single creature. There should be other two-legged fish nearby.

The ship slowly moved forward, and the experts began to control the equipment to spread out in search of the surroundings. Soon, they found two more two-legged fish.

However, not long after, another expert exclaimed, " "Director Qi, come and take a look."

"You found two-legged fish again?" Qi Kaiyou immediately went over, but when he saw the fish on the screen, he was stunned and even exclaimed, " strangulation plaque fish!!!

The plaque strangle fish was another extinct fish.

there was no way he was mistaken. it was an extinct fish that looked like a fish.

This was because he once wrote a thesis about this strangling fish.

when the other experts saw qi kaiyou's confirmation, they were also surprised.

this was the second species of extinct fish.

Time passed.

as they continued their search, qi kaiyou and the others almost thought that they were dreaming because they found other extinct fish.

by the time the sun had set, they had explored the entire river basin and found nearly ten extinct fish species.

Before the sky turned completely dark, they even discovered another extinct fish.

" director qi, " one of the experts shouted. " come and take a look. is this changhe northern salmon? "

Qi Kaiyou stepped forward and saw the fish in the video. He nodded numbly. "it's longjaw northern salmon."

The other experts could not help but sigh.

"Another extinct fish!"

I didn't expect that there would be so many extinct fish in you city other than the Atlantic sturgeons and Atlantic pufferfish.

"There are 10 types here, right? Department head Qi, our guess is completely correct."

Qi Kaiyou nodded.

How could this be just a speculation? With the addition of the Atlantic sturgeon and the Atlantic dolphin, the appearance of more than a dozen extinct fish in the river area of you city would cause a sensation throughout the country.

this kind of shock was simply indescribable.

In the past, the first class protected fish were Chinese sturgeons, Dagon sturgeons, Atlantic sturgeons, and big-headed fish.

In the future, there would be more than ten species of fish under the National first-class protection, with you city occupying 70%.

How shocking was this?

Chen Li looked at the extinct fish that had been discovered. He had been excited at the beginning, but now he was a little scared.

There were too many extinct fish in the river.

If news of this got out, the entire country would definitely pay attention to this River.

This River had to be strictly controlled. As long as the discharged water could affect the river water, it had to be treated seriously. Moreover, even throwing garbage would be severely punished.

otherwise, the re-emergence of these extinct fish would have been an exciting thing for everyone.

if the fish died again, you city would be cursed and even nailed to the pillar of shame.

[Chapter 1194 538-The Situation Escalates!](#)

At noon the next day.

Qin Lin received a phone call from a pharmacy in you city, saying that the herbs he needed had arrived. There were whitewashed, Sanqi, crane grass, palm charcoal, blood charcoal, and so on, all of which were effective in healing wounds and removing scars.

Qin Lin went to the you City Pharmacy immediately.

Yesterday, the apothecaries had said that these herbs were not often used and would only arrive in a few days.

In the end, he increased the price, and the pharmacy in front of him could be reached today.

The price he added had even exceeded the price of the herbs.

The herbs used to make the Yufei cream were not too expensive.

Although money wasn't omnipotent in today's society, it was still very useful sometimes.

After receiving the herbs, Qin Lin thought for a while and asked the owner of the pharmacy to help order the seeds of these herbs.

The herbs purchased outside were of different ages, and there were very few old herbs.

he had tested it out before. the same formula, when made with the high-quality medicinal materials produced in the game, would have better effects and higher quality.

Now that the Jade consort cream was a quality 2 formula, the final product should also be a quality 2.

however, what if these medicinal herbs were all quality 2 medicinal herbs produced by the game?

That should be enough to make a quality 3 Yufei cream.

No matter what, it was worth a try.

in any case, no matter how effective the items were outside, he would have better ones.

these herbs could also be grown in the game's level 2 herb garden.

although the pharmacy owner was confused, he had to give face to little qin, who was a famous person, so he agreed to help order the seeds.

We'll inform you when we arrive.

Qin Lin paid the deposit, took the herbs, and left for Linlin Manor.

However, as soon as he left you city, he was surprised to see a convoy of transport vehicles whizzing by. Their destination seemed to be in the direction of Linlin villa.

After driving for a while, Qin Lin realized that the convoy had gone in another direction, which was the direction of the river where the reservoir was.

He followed them out of curiosity and found that the motorcade had stopped on a road by a River. They were unloading the things from the cars.

They were all made of steel.

Qin Lin found that guardrails had been installed for a short distance along the river, and there were signs on the guardrails at intervals.

Above it was "it is forbidden to dump garbage into the river!" "Fishing is prohibited!" "Those who violate this will be investigated!" and so on.

Moreover, there was a line at the bottom of each sign: the you city government announced.

this was an official warning, clearly to protect the river, or to be more precise, to protect the atlantic sturgeon and atlantic dolphin in the river.

Qin Lin was surprised. How did the situation escalate overnight?

After looking around for a while, he also turned around and went back.

As soon as he arrived at the Linlin Manor's main hall, he found Yuan Shan, his senior, watching the news seriously.

boss Qin, come and watch the news, " she greeted him. something big has happened in you city.

"Academician Yuan, what's wrong?" Qin Lin asked, puzzled.

"look at the news." Academician Yuan picked up the remote control and pressed the playback function.

Qin Lin was also surprised by the news.

we're broadcasting a piece of exciting news. Just yesterday, the rare animal protection Department found another extinct fish in you city other than the Atlantic sturgeon and the Alabaster Dolphin.

Among them, there are two-legged fish in Kawachi, long-maned salmon, Bianchi fish, and more than ten other types of fish. Most of them are first-class protected fish species, Bianchi."

this is definitely one of the most shocking discoveries of the new era. It's also something the entire world will be shocked by. It's also our greatest treasure, a mayfly.

according to the overnight meeting of the relevant departments, all protective measures will be carried out for the min River tributary of you city. The water quality of this section of the river Basin will also be thoroughly tested.

qin lin understood the reason after seeing the content of the news.

no wonder the situation in you city had escalated.

The fish had been discovered.

The speed was a little fast.

The following news footage let him know the reason.

the video was of deputy county chief chen li accompanying the experts in the water to control various equipment and instruments to look for fish in the water.

Those experts had obviously used the power of high technology.

"I didn't expect you city to be such a blessed land." Yuan Shan couldn't help but sigh. If it wasn't a blessed land, how could they have such luck to have so many extinct national treasures appear?

Qin Lin smiled but didn't say anything. He knew what was going on with the fish.

He took out his phone again.

it wasn't just the news that was being broadcasted on the television, it was almost all over the internet as well.

you cheng was on the hot search again.

Moreover, this time, the trending search was even higher.

More than a dozen extinct fish species had appeared, and many of them were first class protected fish. It was hard not to be shocked.

on the other hand, there were some interesting comments in the official videos, and there were many likes.

haha, I live in Ningcheng, which is also close to Min River. I saw the news about the water quality test, and now the county is in a panic to check all the wastewater discharged by all companies.

it's the same here. We're all going through economic checks. The inspection cars pass by one by one. It's just next to Min River, and the water will flow to the branch in you city.

"let me know. the factory that i've been complaining about for two years has suddenly shut down. haha, it's also because it's near min river, the upper-class area of you city. no matter how many complaints i've made, it's still working. "

I'm afraid this matter will be serious. This time, because of you Cheng's incident, the relevant departments will be very serious. I feel that a lot of people will die this time.

[Chapter 1195 538! The Situation Escalates And Is Completely Crushed](#)

"....."

it was very lively on the internet, but the cities in the upper reaches of you city were just as lively.

the rare animal protection department had said that they would test the water quality of the entire river basin. this was an application approved by the higher-ups, so it was definitely a very high level.

Which city wasn't afraid?

If the water quality in their City area was detected to be problematic, they would just have to tell the higher-ups that the water quality here was not good.

At the very least, they would need to be reorganized.

If it was exposed on the news again, it would definitely be a disaster.

Moreover, there seemed to be more problems in these cities than he had imagined, because there were many videos of reports.

They all reported that the factories or enterprises in these cities had serious pollution. They reported it directly on the internet and it became a hot topic with such popularity.

usually, no one really paid attention to them, or they were suppressed.

This time, he directly used the demon revealing mirror. There was no escape.

You city.

He arranged for Qi Kaiyou and the other experts to stay in the station.

qi kaiyou and those experts had also been paying attention to the news on the internet.

An expert reported, " Minister Qi, someone in Dongda city reported that the drainage system of the Zhong Xin industrial and chemical Company is not up to standard. The wastewater could possibly flow directly into the min River region.

when qi kaiyou heard this, he immediately took out his phone, opened an internal group, and typed a few words: Check the water quality near the Zhong Xin industrial and chemical Company.

The group's name was: the various departments of the min river basin were working together on the water quality issue.

This was also the reason why Qi Kaiyou was in such a hurry to get the higher-ups to broadcast the news.

Fish had very high requirements for the water quality. If the water quality was bad or changed, the fish could die.

therefore, in order to protect these extinct national treasures, the water quality had to be the first priority.

wasn't his sudden appearance on the news just to let all those evil people come out?

At this time, as long as they caught a few typical ones, those companies along the river would be more at ease and not dare to act recklessly.

Now, it seemed that the results were very good.

At the very least, they had already confirmed that there were a few companies that had problems. The information had been sent to the relevant departments, and the relevant departments would deal with these companies.

from this, it could be seen that the higher-ups also valued these national treasure fish.

Zhong Xin industrial and chemical Company was one of the top companies in PU Cheng. At this time, in the office of Chairman Hu chunlai, Hu chunlai was a little panicked.

To start a business, it was always necessary to think about some things to save money.

many companies were doing this kind of waste disposal, but who knew that they would report it on the internet? more importantly, it was on the hot search. wasn't this exposed in front of everyone?

Hu chunlai hurriedly said to his assistant, " quick! Get someone to turn on the equipment that is used to discharge the waste. Don't let the wastewater out anymore.

The assistant's face was ugly. Chairman, it seems that we won't be able to make it in time. We just found two groups of people coming to our drainage outlet to take the water samples. I recognize one group, they are from Pucheng. I don't know about the other group, but they may be from the relevant departments above.

"Damn it!" Hu chunlai didn't expect it to happen so quickly. book a plane ticket for me. I'm going on a vacation abroad for a while. Director li is in charge of the wastewater, right? "

if anyone from the relevant Department comes, tell them the truth. Oh right, I'll leave some information with Minister Li's signature on it. You can just hand it to them.

Wanwan. the assistant's eyes widened slightly when he heard his boss 'words.

That was because Minister li was the Chairman's brother-in-law.

The purpose of the Chairman's action was self-evident.

...

Linlin Manor.

Qin Lin was also surprised after reading the news.

He obviously didn't expect that taking out those fish from the game would cause such a big commotion.

however, the problem with the water quality made sense. at the same time, it could be seen that the higher-ups really valued these extinct national treasure fish.

As long as those unlucky companies didn't blame him, he was fine.

These people didn't know he was the one who started it anyway.

Qin Lin thought about it and went back to the inner area with the herbs. He took out the herbs he brought back yesterday.

After dividing the medicinal herbs one by one, he found a small electronic weighing scale and weighed the required weight of the medicinal herbs one by one.

In this case, when he was concocting the ointment, he just had to add these medicinal herbs in the order and time.

Qin Lin then took a small clay pot and began to pound the herbs into powder. He proceeded step by step.

It took Qin Lin a long time to make a portion of the Jade consort cream. He then locked the door of the workshop.

as soon as he entered the game, he immediately saw the remarks for the preparation of the jade consort cream:

[special Jade consort cream: Grade 2]

[this is a privately concocted Yufei cream. Legend has it that it's a cream specially used by noble Consort Yang. After being repaired and improved by doctor Dott, it has a stronger effect: Scar recovery effect +2, wound recovery effect +2, old scar removal effect +2, tissue recovery effect +2!]

This was the first time he had successfully concocted it.

The next step was to test the effects of the ointment.

qin lin exited the game again, opened the door, and came out of the work area. he returned to his own office and was about to call lin lanzi to ask her to bring over a few injured employees when there was an urgent knock on the door.

The person who came in stunned him for a moment.

"minister lu!" Qin Lin was a little surprised.

[Chapter 1196 538! The Situation Escalates And Is Completely Crushed](#)

This person was becoming more and more elusive.

Although he knew that the other party would come, he didn't expect it to be such a coincidence.

"Boss Qin, how's the Jade consort cream you made?" Minister Lu asked anxiously as soon as he sat down.

Qin Lin had made up a story to Minister Lu before, saying that he had made several portions of Yufei ointment, but he was not sure which one was a success.

therefore, he could only say, "minister lu, what if you came at the right time?" I just confirmed one of the ointments, but I can't be sure if it's the Jade consort cream."

as he spoke, he took out the jade consort cream that he had just concocted.

"Have you tested it?" Minister Lu's eyes lit up as he asked in a hurry.

"i haven't tested it yet." qin lin said, shaking his head.

If it wasn't for Minister Lu's sudden appearance, he would have immediately found someone to experiment with it.

After all, he knew the note, so he could be sure that there was no problem with the Jade consort cream. There was no need to test it.

However, he couldn't say this out loud. In the outside world, the normal procedure was to make the ointment and test it on others after confirming that there were no problems.

"Then quickly get academician Yuan to do the test." Minister Lu then called Yuan Shan.

Yuan Shan was an academician in the field of medical science. Because of the clinical trial of the tea in treating cancer, he had brought a lot of equipment with him, so he could easily test the ointment.

A moment later, Yuan Shan entered the office.

Minister Lu immediately handed the ointment made by Qin Lin to Yuan Shan and said, "Academician Yuan, can you please help me test this ointment?"

"This is the Jade consort cream?" Yuan Shan naturally knew about the Jade consort cream. Many people in the courtyard knew the purpose of Minister Lu and Chu Qingfeng's visit.

Now, he didn't dare to underestimate this Chinese medicine recipe. After all, he was also an insider and knew that the treatment for the coagulation plague came from a Chinese medicine recipe.

And this potion could even cure all kinds of animal plagues.

Western medicine couldn't make such a medicine at the current stage, but Chinese medicine had such a magical recipe.

It was a pity that he was getting old. It was impossible and impossible for him to not have the energy to study Chinese medicine again systematically. On the other hand, his grandson, in addition to starting to study Western medicine, he also wanted him to study Chinese medicine systematically.

now that the jade consort cream could make a chinese medicine senior like minister lu, chu qingfeng, and boss qin treat it seriously, it was definitely not simple.

boss Qin just picked this out from a few plasters he made, "Minister Lu said. we still need to test if it's Yufei cream.

"Alright, leave it to me." Yuan Shan nodded and immediately left with the Jade consort cream, heading to you City County Hospital.

The equipment he brought was in the area that the hospital had isolated.

If the Jade consort cream really had the legendary effect, it would be of great significance.

When they arrived at you City County Hospital, Yuan Shan entered the examination at the fastest speed. This kind of scar-removing and wound-healing Ointment first had to be tested to see how effective it was on the growth factor of flesh and blood.

the test was simple. he just had to compare the effects of the growth factors of similar products on the market.

Moreover, it wasn't difficult to find such products in the hospital. With a phone call, the director of Youcheng County Hospital had personally delivered it.

However, when Yuan Shan tested the growth factor of the Jade consort cream and compared it with this type of product, the expression on his face gradually changed.

"This ..." Yuan Shan couldn't believe it.

he realized that the effects of similar products on the market on the growth factor were not even a fraction of the jade consort cream.

He naturally knew what this meant.

In other words, this Yufei cream's scar removal and wound recovery effects completely crushed similar products on the market.

Not only that, but after testing, he found that some of the ingredients contained in the Jade consort cream were beyond his imagination. They were not something that current drugs should have.

Or rather, Western medicine had this topic, but it was difficult to figure out the ingredients.

Even if some of the world's top laboratories managed to produce it, the price of that potion would still be in the millions, and that was in USD.

What was he seeing now? The Jade consort cream actually contained ingredients that could heal damaged tissues.

This composition even surpassed the so-called epoch-making drugs produced by the most advanced scientific research laboratories in America.

He knew what the ingredients were used for, and he also knew how much the medicine produced by the research laboratory in America cost. A portion cost 3.5 million dollars.

Only the upper class tycoons would choose to use this item when they had no other choice.

the yufei cream that boss qin had concocted, according to the data, contained far more ingredients than the 3.5 million u.s. dollars medicine made by the united states.

"this is unbelievable." Yuan Shan muttered to himself.

he had once again witnessed the incredulity of chinese medicine.

If the foreign laboratories knew about this, they would probably start learning Chinese medicine in secret.

[Chapter 1197 It's Possible To Restore Severed Limbs 1](#)

The sky was getting dark.

Because of Minister Lu's sudden arrival, Qin Lin specially prepared a King's Supreme medicinal dish for him. Naturally, he didn't forget academician Yuan's portion.

However, academician Yuan didn't show up at lunchtime.

For this reason, Minister Lu made a phone call, but the answer he got was that he was not free at the moment.

Minister Lu was stunned.

Boss Qin had personally prepared the emperor's Supreme medicinal cuisine. Who would be busy?

However, he could tell from academician Yuan's voice that he was in disbelief.

He guessed that it might have something to do with the Jade consort cream, which made him curious about what the Jade consort cream was.

Therefore, after he finished eating the emperor's Supreme medicinal cuisine, he gave Yuan Shan a call. this time, no one picked up the phone.

"Still in the testing?" Minister Lu was puzzled, but he did not continue to call.

If Yuan shanzhen had detected a critical moment, his continuous phone calls would be a form of interference.

The night passed.

at noon the next day, minister lu called yuan shan again, but this time, his phone was turned off.

He couldn't hold back anymore and went to you City County Hospital.

When he saw Yuan Shan, he mumbled to himself in front of a piece of equipment, " " chinese medicine is too amazing. western medicine can't even figure out the compound ingredients of several medicinal herbs. "

As he said that, Yuan Shan buried his head in his work again.

Minister Lu stepped forward and saw that Yuan Shan already had dark circles under his eyes and looked tired.

It was obvious that he had stayed up all night.

"academician yuan, you didn't rest all night?" minister lu asked.

yuan shan saw that minister lu had arrived and said excitedly, " "Minister Lu, I was just about to report to you later. The Jade consort cream that boss Qin deciphered is amazing."

not only can this Jade consort cream remove new scars, but it can also heal wounds. It's also effective for old scars. More importantly, there's a component in this thing that can heal damaged tissues. It's very effective, far better than the medicine in America.

"Heal the damaged tissues?" Minister Lu's eyes lit up when he heard that. He asked, " "it's the medicine with a cost price of 3.5 million usd, and you want to exchange it for the intestinal energy returning powder formula?"

Recovering damaged tissues was different from removing scars.

many people were injured. not only would it leave a scar, but it might also damage the tissues and nerves. it might even cause difficulty in movement or area flesh necrosis.

It could be said that in many cases, the effect of recovering damaged tissue was much more effective than removing scars.

In theory, as long as the effect of this ingredient was sufficient, even if a finger was cut off, it could be reconnected with this Yufei cream and the finger would be restored to its original state without any effect.

the jade consort cream actually had such an effect?

Furthermore, the Jade consort cream had the effect of removing scars, and it would not even leave a trace of a severed finger.

if that was the case, it would be terrifying.

Of course, this was only a theoretical effect. The extent of the Jade consort cream's effect still needed to be tested in clinical trials.

"Yes, that's the one!" Yuan Shan smiled. the United States developed that medicine and treated it as a treasure. They would never expect that we would have this Yufei cream by accident.

Minister Lu couldn't help but smile and nod.

One tube of the drug that the United States had developed cost 3.5 million dollars.

From this, one could see how valuable the ingredients were.

Previously, the United States had proposed to use this medicine to exchange for intestinal energy restoration powder, and the higher-ups had been struggling to decide whether to exchange it or not. They had also discussed it with the other party several times.

In fact, the cost of this formula was 3.5 million USD, and not many people in the country could afford it. The most important use for it could only be used for in-depth research.

He didn't expect this Jade consort cream to have such an effect. There was no need to exchange it with others.

Thinking that the cost of the other party was 3.5 million US dollars, Minister Lu subconsciously took out his mobile phone and dialed Qin Lin's number.

He didn't know how much the cost of the Jade consort cream was.

when the call was connected, minister lu hurriedly asked, " "boss qin, how much does it cost to make a portion of the jade consort cream for the secret recipe you deciphered?"

qin lin's voice came from the phone. the herbs I made yesterday cost about a few hundred Yuan!

"only a few hundred?" minister lu was pleasantly surprised.

He remembered that the amount of Yufei cream that boss Qin had taken out yesterday was not small. If the cost of the cream was only a few hundred Yuan, it could only be said to be very cheap.

A few hundred dollars to 3.5 million dollars, the difference was ten thousand times.

Minister Lu thought about it and asked Yuan Shan, " academician Yuan, does this Jade consort cream not have any harmful side effects? "

"No harm, no side effects." Yuan Shan shook his head.

"that's good." When Minister Lu heard this answer, he couldn't wait to leave the hospital and return to Linlin Manor.

he naturally wanted to get the recipe from boss qin.

Boss Qin was still boss Qin.

There was nothing wrong with leaving the secret formula of Chinese medicine to boss Qin. There was no need to be afraid that there would be no gains.

minister lu arrived at linlin manor. when he saw qin lin, he couldn't help but say, " " boss qin, the effect of this jade consort cream is incredible. after academican yuan tested it, he found that this jade consort cream can not only remove scars, but it can also help with the recovery of wounds and remove old scars. "

more importantly, this Jade consort cream actually has an ingredient that can repair damaged tissues. Boss Qin, do you know what this ingredient represents? "

[Chapter 1198 It's Possible To Recover Severed Limbs _2](#)

" the next stage of medical research is this. if the effect of this component is enough, even soldiers who are disabled in battle can repair their injured tissue. "

at this stage, only America has made breakthroughs in this area of research, but it's still very expensive. The cost is 3.5 million dollars.

" but our country's traditional chinese medicine doctors were able to produce such ingredients more than 600 years ago. now, the cost is only a few hundred yuan. what kind of treasure have we lost? "

"Is this Jade consort cream really that incredible?" Qin Lin pretended to be surprised again.

However, he knew very well that this was probably due to Dr. Dott's contribution.

However, it was impossible for him to talk about this.

boss Qin, it's true. Minister Lu nodded. I'm really grateful to you for this.

Qin Lin also knew Minister Lu's purpose, so he gave him the formula he had prepared at once. Minister Lu, this is the formula of the Jade consort cream. As long as you follow the steps and proportions written on it, you can make the Jade consort cream.

Minister Lu took the formula with trembling hands. He knew very well that with the addition of an ingredient that could heal damaged tissues, the cost of the Jade consort cream could completely make it a strategic resource.

Jade consort cream, this was really the wrong name.

Therefore, it was not unreasonable to say that imperial consort Yang's beauty would harm the country.

If imperial consort Yang had made this Medicine Public, it would have been of great use to the country. Perhaps many things would have changed because of this Jade consort cream.

minister lu thanked qin lin again and again.

With the recipe in hand, he didn't know what else to say other than thank you. With his position, he couldn't just casually make promises.

After that, he also felt relieved.

In the face of boss Qin and the others, no reward could express his contribution.

The best way was to protect him.

After Minister Lu got the formula, he couldn't wait to book a plane ticket.

He had to return to the capital as soon as possible and produce the Jade consort cream on a large scale. At the same time, he had to report the good news to his leader.

In this case, the leader would not have to worry about whether to discuss the exchange of formulas with the United States.

The reason why the United States wanted the intestinal Guiyuan powder was actually very simple. They wanted to use this secret recipe to develop other cancer drugs.

Moreover, the rich people in beautiful countries were also one of the people with the most serious intestinal problems in the world.

As for the reason, no one knew.

Another important reason was that the medicine was worth 3.5 million dollars, so it was of little value to them at the current stage.

It's tasteless, but it's a pity to throw it away.

In that case, with the Jade consort cream, there was no need to be conflicted.

After Minister Lu left, Zhao moyin also came to Qin Lin's office and said, " hubby, I heard that an observation station is being built on the reservoir. Let's go and have a look. We can also see the sturgeons and white-fin dolphins with our own eyes.

An observation station was a building for scientific research and testing.

the water reservoir had an observation station because the nature reserve had been set up. such an observation station was needed for the staff to detect fish and the water quality of the river.

If there were any changes, the observation station would have to notice it immediately and report it.

several such observation stations would be built around you city.

Qin Lin and Zhao Moyu had no way to go to the viewing area of Linlin villa's floating bridge.

There were too many tourists there now, and he was a famous person.

Therefore, he could only drive along the reservoir.

He knew a few places where Atlantic sturgeons and Alabaster pufferfish roamed, and there were observation stations built in those places.

The car quickly came to a stop.

Qin Lin and Zhao mochen both saw an observation station that was about to be built. There were even Atlantic sturgeons and Atlantic pufferfish swimming around when the workers were working on it.

They weren't afraid of humans working at all. From time to time, they would poke their heads out or jump out of the water. They were probably looking forward to when the people working would fall into the water.

Qin Lin saw a group of people dragging things out of the water not far away. A truck was also parked by the side of the road to load things.

A wild man with a rough face and long hair, who was giving instructions on the side, made Qin Lin take a second look.

Because he looked familiar. Wasn't that Liu Hua?

in the beginning, the other party believed that there was really an albino yellow tiger in the river, so he had been soaking in the reservoir.

During this period, he came in to see the other party a few times and even found that the other party had raised fish in the river, and it was on a large scale.

It was rare to see such a persistent person.

by the way, his ex-girlfriend, shanshan, even had a child with qin long now.

hua liu looked at the river with a complicated expression in his eyes. he even looked a little lonely.

It had been two years.

Who knew how he had spent the past two years?

He had been guarding it for two years, but he still hadn't caught the White Yellow tiger.

At one point, he even thought that he had been tricked. There were no white Yellow Tigers here.

After all, how could a fish worth 650000 RMB appear in a River like this?

But now, he believed it.

There must be some White Yellow Tigers in the river.

After all, there were Atlantic sturgeons, Atlantic pufferfish, and so many other national treasures. So, was it strange that there were albinism yellow Tigers?

It could only be said that his luck had been extremely bad for the past two years, as he had not seen the White Yellow tiger.

Now that the nature reserve had been established, he was not allowed to keep fish at all. It was also impossible for him to fish, or else he would get cold accidentally.

he was really reluctant to leave now.

it had been two years.

How many two years of life could he waste?

.....

Time passed.

beijing.

Minister Lu returned to the Chinese courtyard with an anxious mood.

As soon as he returned to the courtyard, his assistant came to the door and reported, " Minister Lu, you're back. The higher-ups have sent a drug to you and asked you to arrange a detailed test. It's the HKR drug from America.

"I know." Minister Lu frowned slightly when he heard this.

The HKR drug was the drug that the United States had developed.

The leader asked them to do a detailed examination. It seemed that he was somewhat tempted.

this thing was not of any help to the people now. the cost of 3.5 million usd was too high, but it was indeed crucial for the next stage of medical research.

At the thought of this, Minister Lu found the HKR drug sent by the higher-ups and went to find the leader.

"Little Lu, you've come?" The leader said with a smile when he saw Minister Lu.

Minister Lu placed the HKR drug on the table and said, " "leader, i'm here to talk to you about this HKR drug."

the leader smiled and said, " we've already discussed this. although this thing is a little useless to us now, we still need the technology in this area. this will be the research direction in the future. "

Minister Lu naturally knew this, but the leader misunderstood his meaning. He immediately said, " "Leader, what I want to say is that we don't need their HKR medicine at all, because we have better ones ourselves. Do you remember the Jade consort cream we mentioned before? it's the one imperial consort yang used more than 600 years ago."

boss Qin has already deciphered the formula for this. This ointment has a component that can recover lost tissue, and its effect is much stronger than the HKR medicine from America.

When the leader heard this, he stood up with a face full of joy. "Really?"

Minister Lu nodded. it's been tested by academician Yuan. If you're worried, we can make another one and test it with the other one.

"Okay, go make the arrangements." the leader hurriedly urged.

Minister Lu didn't hesitate. He immediately went back to Hua Yuan to make arrangements, buy medicinal herbs, and make Yufei ointment.

The test data of the Yufei cream was similar to that of Yuan Shan's. After that, he had someone test the HKR medicine and compared the two.

The result was that the ingredients used to recover damaged tissue were much better than the drugs in America.

Minister Lu immediately reported the data to his leader.

When the leader received the data report, his face was full of disbelief.

This beautiful country had spent a lot of money to develop drugs, and it was even regarded as the most advanced technology in the medical field, but the cost was very high.

Who would have thought that this technology had existed in their country more than 600 years ago, and the effect was even better?

After getting this result, the leader decisively picked up the phone and dialed a number. He directly ordered, " Cancel all the negotiations with the United States 'HKR and give them a clear reply that we're not interested in sex.

[Chapter 1199 540-Wishful Thinking! The Hero's Downfall](#)

A lot of things had happened in the country in the past two years, which had a huge impact on the lives of the people.

One of them was Linlin ketchup, which all ketchup lovers liked.

those who had originally chosen famous foreign tomato sauce brands were now choosing linlin ketchup.

the emergence of the linlin leisure tea not only changed people's choice of energy drinks, but also affected the working state of many people.

At least, he didn't have to work himself to death after work every day. Sometimes, he even worked overtime and didn't even have the energy to pay his wife.

Now, not only did he have the strength to pay for public food, but he also had Linlin leisure tea, which helped him recover his strength quickly. He could pay a few times a night.

Cola had also completely replaced soda.

Now, everyone could enjoy the fun of carbonated drinks without any harm. On the contrary, they had vitamin nutrition.

The appearance of The Hangover grass had also reduced the number of traffic accidents and drunk-driving accidents.

a smart and virtuous wife would prepare two bags of hangover grass for her husband before he left.

Moreover, if an experienced man saw that a woman had a lot of hangover grass in her bag, he would know that she either loved to drink or was a frequent drinker.

Then things would be easy.

There was also the hot spring powder, which had saved countless people's lives.

there was also the mingming white ginseng. this thing was rapidly reducing the number of people with myopia in the country. it was likely that it would completely disappear in the near future.

This thing was really a blessing for mobile and computer enthusiasts, allowing everyone to be unscrupulous and not think about resting their eyes.

There was also pet dog food that made people want to fight with their own dogs to eat.

who would have thought that dog food for dogs was more delicious than snacks for humans?

Fortunately, there was a new dish for people to eat.

Although many people guessed that it was actually just a change of packaging, no different from what dogs ate.

But it didn't matter, at least he didn't have to fight with Gou 'Zi and could eat with Gou' Zi.

Naturally, the intestinal Guiyuan powder also saved many people with intestinal diseases and colon cancer from the sea of suffering.

while the whole world was still suffering from the high temperature coagulation plague, the country was already singing and dancing again.

The coagulopathy plague seemed to have happened a long time ago.

the purification grass was also not to be ignored.

The modification of the purification grass in the capital had almost been completed.

The city, which used to have terrible air quality, was now fresher and better than ever.

the other cities had long been waiting for this, hoping that their own cities would introduce purification grass as soon as possible.

These things had an impact on everyone's lives. The key was that these things could not be cracked overseas. Even foreign companies could not apply for agents.

As a result, everyone seemed to realize that domestic products were actually so good. When they looked back, they realized that these were all products of Linlin company.

Indeed, Linlin company's products had a huge impact on everyone's lives.

The key was that many of Linlin company's products were really amazing.

it was precisely because these products were so magical that western countries had always tried to get their hands on them.

among them, the people from america were the most anxious.

Previously, in order to get the purification grass, the Americans had used many tricks, but they had underestimated a certain person with a cheat, so they had never succeeded.

However, the people of the United States had never given up. Other than the fact that the intestinal Guiyuan powder was a serious problem for the rich people in drifting country, it was also a second-rate alternative.

He had never succeeded in using the purification grass as his target.

The intestinal Guiyuan powder was not as important as the purification grass.

If he succeeded this time, it would be much easier to get the purification grass in the future. If he compromised once, he would compromise a second time, right?

Therefore, for the sake of the intestinal energy restoration powder, they all took out something like HKR.

The person in charge of this matter in the United States was called adoxi, and he had a few capitalists behind him. If he could get those things from Linlin company, the capitalists would support him even more.

adolphus was a smart person.

unlike the previous people, he did not immediately set his eyes on the purification grass. instead, he set his sights on the intestinal energy restoration powder, which was easier to succeed in.

It was not the first time that Adolphus had talked about this with the people of this Eastern country.

Moreover, after several negotiations, the other party finally accepted the medicine and promised to reply after testing it.

This was good news for him.

he also knew that the other party would definitely agree.

The HKR drug could recover damaged tissues, and it was the next research direction in medicine.

This Eastern country didn't have any research or products in this area, so they couldn't miss this opportunity.

It would take at least 20 years for the other party to develop a technology with such an effect on their own.

Therefore, the other party had to change.

moreover, it was still the same sentence. once there was a compromise, the second compromise would be much easier.

His next target would be the purification grass.

This was the purpose of taking a step back.

Just as he was thinking, a blonde woman rushed in. "Mr. ADOS, the other party has replied."

"When is the meeting?" Adoxi asked immediately.

Now that the other party had replied, the next thing to do was to discuss the exchange and obtain the intestinal energy returning powder.

the woman with blonde hair and blue eyes said with an ugly expression, " Mr. Adosy, the other party has rejected the intention to continue the negotiation. They also said that they don't need our technology.

[Chapter 1200 540-Wishful Thinking! The Hero's Downfall! 2](#)

"why would i?" Adoxi's expression changed.

This was not what he had expected.

How could the other party not exchange?

This was completely out of his plan.

Adolphus felt that he was a smart person. He thought for a moment and roughly guessed the reason.

Perhaps it was because of the 3.5 million USD cost price.

Everyone in the world knew that although the GDP of this country was very high, the population was also high. On average, the rich were very rich and the poor were very poor. Many people did not reach the level of the average salary.

It seemed that in their country, there was a saying that it was equal.

If a person with a 3000-Yuan salary and a million-Yuan monthly salary were averaged out, the average salary would be 500000 to 1500 Yuan.

The person with a salary of 3000 Yuan was the one who was averaged out.

So, the 3.5 million US dollars had scared the other party?

This meant that the technology could hardly be popularized.

Thinking of this, Adolphus said to the blonde, blue-eyed woman, " announce our latest cost price after our technological breakthrough to the eastern countries.

also, spread the news that we're going to do a clinical trial of HKR in this Eastern country. We'll also do a live broadcast for everyone to see.

Adoxi felt that he had guessed the other party's thoughts and immediately responded.

The 3.5 million USD cost price was the previous technology.

The latest technology only cost 300000 dollars.

The reason why he didn't offer the latest technology at a cost of 300000 US dollars was naturally because he couldn't bear to.

moreover, they were used to using outdated technology to fool the people of the eastern country.

Now that the other party was indifferent to the 3.5 million US dollar technology, he had no choice but to take out the 300000 US dollar technology.

There should be quite a number of people in this country who could afford this price.

Moreover, even an ordinary person would sell their house for treatment if they really encountered a situation where they needed to use the damaged tissue repair agent.

After all, his face was severely burned and he couldn't even make any expressions. The numbness was very painful.

After using the HLKR drug, he would be able to recover and make some expressions.

moreover, this potion could be used in many other aspects.

as such, he had spread the news and broadcasted the experiment so that countless people in the country would know about it.

As long as countless people knew about it, they would be able to put the other party on fire if they proposed to use this technology in exchange for the intestinal energy restoration Powder Technology. By then, even if the other party did not agree, they would have to renegotiate with him.

This was called borrowing power. Using the other country's power to deal with them was a scheme of the other country. He had learned it quite well.

the blonde woman nodded at the order and immediately went out to take action. they had their own people in this country.

These people would help them spread the news.

Therefore, an announcement from a hospital with foreign investment called America soon spread all over the internet.

<< our hospital will be conducting a live broadcast of the clinical trial of the American HKR drug in China. HKR drug is a drug that can recover damaged tissue.

This medicine can recover the damaged tissues of the human body and can be used on all kinds of injuries. It is the most advanced medical technology in the world.

The news about the clinical trial of the HKR drug spread all over the internet.

the attention of the netizens on the internet was also quickly attracted. they followed and discussed it.

" the effects of this HKR medicine are quite amazing! "

it's not just awesome. If we continue in this direction, we'll be able to reattach severed limbs and restore them to their original state, just like in the movies.

that's true. I've looked it up on the internet, and at this stage, only America has a perfect product for this technology.

"....."

This public opinion swept through the area.

Because of some walking 500000 Yuan adding fuel to the fire, the popularity was getting higher and higher.

adoxi had been paying attention to this matter, and his face was naturally full of joy.

The more popular it was, the better.

At the same time, he also got his people to start preparing for the live broadcast of the experiment of the HKR drug.

it was impossible for minister lu not to know that the news was trending on the internet. he was once again called to the office of the leader.

When the leader saw Minister Lu, he opened a video and showed him, " "did you see this incident on the internet?"

The video was about the live broadcast of the clinical trial of the HKR drug.

Minister Lu nodded. I've already seen this. The other party suddenly announced that the cost price was only 300000 US dollars. They obviously had a trick up their sleeve. Moreover, the other party's purpose in doing this is obviously not pure.

The leader nodded. the other party is using our influence. Previously, we rejected the technology exchange. The other party is using our influence to pressure us.

Minister Lu laughed. the other party really thinks that they can make a deal with us by playing such tricks. They have no idea that we have something like the Jade consort cream. Leader, it just so happens that the production of the Jade consort cream has also begun. The other party wants to do a live broadcast of clinical trials, so we should do it too. If the other party wants to embarrass himself, why can't we fulfill his wish? "

The leader nodded. hurry up and get this done. It's best if you can find some representative people to carry out the clinical trials.

"i understand, leader." minister lu nodded.

After that, he left the leader's office and returned to the Chinese Medical Hospital. He called his assistant and began to give orders to find experimental subjects.

Of course, the relevant departments also received the notice from the Chinese hospital very quickly and cooperated fully.

.....

Guanglin city was a first-tier city, so the train station was bustling with people.
