

The Game 1211

[Chapter 1211 This Is A Bit Of A Heart-Killing Move](#)

He was like an ignorant college student who had just started studying scientific research when he faced these factors. He could only see the meaning of the formulas on the surface, but he did not understand the meaning behind them at all.

It was as if this was a completely new component factor.

how could he crack this?

It would probably take ten or twenty years to solve it.

Not only Bellida.

In a Research Laboratory in Germany, a team of research reporters was recording the test results of the Yufei ointment.

the eastern country's clinical trial of the jade consort cream had really shocked everyone.

They couldn't believe that any medicine could have such an effect.

a professor in the research laboratory had already analyzed the factor composition of the yufei cream.

Now, as long as he deciphered the composition of this factor, he would be able to obtain this Jade consort cream.

This professor was the best medical research professor in Germany, bobida. He was also one of the best experts in the world.

There was a middle-aged man next to him. He was Liszt, one of the German magnates.

liszt had invited bobida here to crack the jade consort cream.

After Lister had found out about the effects of the Jade consort cream from a reporter from a research media organization under his name, he had immediately invited Lister to try and crack the Jade consort cream.

as long as he could decipher the jade consort cream, he could imagine the benefits it would bring.

at the beginning, bobida was full of confidence.

After all, he was one of the best medical research professors in the world.

However, when he began to decipher the composition of this factor, he was shocked to find that he was completely unable to understand the composition of this factor according to the current laws of scientific research. He could not figure out a single clue.

"This Kasaya ..." Bobby tried a few times but couldn't get it. His confidence was shattered instantly.

"professor bobida, what do you think?" Liszt, who was beside him, asked hurriedly.

Mr. Liszt, I've never seen any of these elements before, " Bobby da said with a frown. I feel like I'm a beginner in medical research when I'm faced with these elements.

Liszt wasn't stupid, and he understood what was going on. "In other words, you can't crack it?"

"at least not in a short time," bobida nodded.

Liszt frowned. He knew that cracking this method would not work, so he could only use other methods.

He waved at a scientific research reporter who was taking notes. After the reporter came over, he ordered, " " contact all the research media and publish a report together. say that the effects of the jade consort cream are real and that it's definitely the best cream in the world. do your best to support it. "

"Alright, Mr. Liszt." the reporter immediately left.

Lister did this to show his goodwill. Since he couldn't crack it, he would apply for a proxy. One had to know that someone from Germany had also successfully substituted the hot spring powder.

It wasn't like he didn't have a chance to act as the agent for this Jade consort cream.

Therefore, expressing goodwill was the first step.

soon, various german media began to boast about the magical effects of the yufei cream. almost in a short time, the whole of germany knew about the yufei cream and its magical effects.

This shocked everyone.

Following closely behind Germany was England. The research media in England also published the news of the magical effects of the Jade consort cream almost at the fastest speed.

This was naturally the doing of the English royal family.

After all, they had already successfully become the agent of the hot spring powder. Naturally, they wanted to become the agent of the miraculous ointment, the Jade consort cream.

Soon after, various scientific research media in the Western countries began to publicize the news of the Yufei ointment.

Adoxi had also noticed the situation. After all, so many Western countries were supporting the Jade consort cream.

Then, he immediately understood the purpose of these countries.

they wanted to apply to be the agent of the jade consort cream, and now they were showing their goodwill, so they promoted it this way.

But which Eastern country would be the agent for the Jade consort cream?

As soon as he had this thought, he immediately took out his phone and started to contact them.

This was also an opportunity. After all, he didn't have a better idea.

Therefore, the research media in America also began to report on the Yufei cream.

For a time, the whole world was paying attention to the Yufei cream, this magical Traditional Chinese Medicine cream.

After seeing the news released by the American Scientific research media, he immediately ordered someone to make the news appear on the internet of Eastern countries.

This would better let the other party know that he was expressing his goodwill. One must know that this was a gesture of goodwill from their beautiful country. The other party should consider it more, right?

After doing all this, adoxi immediately went to find the blonde and blue-eyed woman, wanting to instruct her about the Jade consort cream.

When the blonde woman arrived, she frowned and said, " "Mr. Adoxi, hurry up and take a look at the news that just came out from that Eastern country."

As he spoke, he passed a tablet to Adolphus.

" ? ? "Adoxi took the tablet in confusion and saw the news about the eastern country. However, when he saw the content of the news, he was so angry that he smashed the tablet on the ground.

[Chapter 1212 I Have To Completely Break My Arms And Legs! We're In The Atmosphere Now!](#)

The news that the whole world was praising the Jade consort cream naturally became a hot search.

Because the popularity of the Jade consort cream was still on fire, these flattering news were transferred to the domestic internet as soon as they came out.

The research media in drifting was the most hyped up, especially under the arrangement of Adolf.

Everyone could see that the Americans were obviously trying to get on their good side.

The smart people had already guessed that this beautiful country's people wanted to apply for the agent of the Jade consort cream.

The people of America also had such moments.

however, at this time, a piece of news from the chinese hospital was very interesting.

due to the lack of raw materials for the Jade consort cream, the production of the Jade consort cream is limited. In the future, it will not be sold to the outside world until it meets its own needs. When it meets its own needs, it will be sold to the outside world according to the situation!

this kasaya

The moment he saw the news, he smashed the tablet in his hand into pieces in anger.

"Dammit!" Even though Adolphus had expected this to be the outcome, he still couldn't control his anger when it really happened.

It wasn't just Adolf, but all the agents of the Jade consort cream in the West started cursing when they saw the news.

it was only then that they realized the purpose of the eastern country giving the international red cross the yufei cream. it was probably to let them get it, test the effects of the yufei cream, and then let them flatter and fawn on them in order to get a representative of the yufei cream.

Or rather, they should have thought of this, but the magical effect of the Jade consort cream had blinded them with greed and they did not think much about it.

The netizens on the internet naturally saw the news about the Hua hospital. Many smart people reacted to what was going on and immediately began to spread the news online.

This time, everyone reacted.

It turned out that he had been fishing when he had given the Jade consort cream. When the fish had taken the bait, someone had helped to promote the Jade consort cream to the whole world, and then they had come up with this one-hit kill.

this made many people recall the incident where the old demonic woman surnamed pei had been fished.

Now, he was not happy with fishing.

Linlin Manor.

qin lin naturally also saw the latest news released by the chinese academy of medicine, and he couldn't help but smile.

it was just as he had thought.

It could only be that the benefits were too attractive. The benefits contained in the Jade consort cream were too great. Otherwise, if he could see through the trick, the people of those countries would not have been fooled one by one.

Just as Qin Lin was about to put down his phone, it rang. He immediately picked it up when he saw the number.

it was from the pharmacy in you city.

The other party informed him that all the seeds had arrived.

After Qin Lin hung up the phone, he immediately left the Linlin Manor and went straight to you city to bring the seeds back to the Linlin Manor.

As soon as he returned to his office, he locked the door and entered the game.

There were 14 kinds of medicine to make the Yufei cream.

He put all 14 seeds into the game and then exited the game.

He had to first make sure that these 14 herbs could all be planted in the level 2 herb garden.

After confirming them one by one, it was just as he had guessed. In reality, these herbs could be grown in the level 2 herb garden.

However, there was only one herb garden, so he needed some time to plant all the herbs.

Moreover, he just had to make sure that normal seeds in the real world would produce quality 2 herbs in the level 2 herb garden.

Qin Lin controlled the game character to plant the first seed called the White fir grass.

It took a full day for the FIR grass to ripen.

After the dwarf picked up the FIR grass, Qin Lin controlled his game character to plant the second herb in the herb garden.

he entered the game with a thought, then went to the storage room and saw the fir grass picked by the dwarves.

The Chinese fir grass was divided into two piles, one big and one small.

[shanbai grass: quality 1]

【.....】

[shanbai grass: quality 2]

【.....】

sure enough, just as he had expected, a large number of them were of grade 1, while a small number of them were of grade 2.

It would be good if it could get a quality 2.

Moreover, the roots of the FIR grass produced by this game were obviously larger than the ordinary ones he had bought before, and the quality 2 ones were even larger than the quality 1 ones.

This meant that the higher the quality and the longer the age, the better the effect.

after qin lin quit the game, he searched for information on the chinese cedar grass on his computer.

Through the records on the internet, he could confirm that it was impossible for there to be a plant that could last longer than a Grade 2 white fir grass in reality.

In the next half a month, Qin Lin had completed the production of all the herbs needed to make the Yufei ointment through the game's level 2 herb garden.

Each of these medicinal herbs was larger than the ordinary ones. In reality, they were all old medicinal herbs, and the quality 2 ones were even older.

Half a month later, when the last herb needed for the Jade consort cream was planted, Qin Lin left the office immediately.

It was impossible for this kind of old medicinal herb to appear out of thin air, so he still had to go out and put on an act.

As he walked out of the office and into the living room, Qin Lin ran into Yuan Shan, who came in with an excited face.

yuan shan's face was glowing, and it was obvious that he was in a good mood.

"academician yuan, it looks like there's good news." qin lin asked with a smile.

"yes, boss qin," yuan shan immediately nodded. "the experimental patients are almost fully recovered."
"

Qin Lin knew what Yuan Shan was talking about when he heard his words.

It was the tea tree that he had brought out of the game. The tea tree had mutated once due to the special soil and had the attribute of +2 cancer prevention.

[Chapter 1213 I Have To Completely Break My Arms And Legs! We're In The Atmosphere Now!](#)

Therefore, Minister Lu arranged for a clinical trial of the tea in you City Hospital for cancer, and found many patients with late-stage cancer.

Now that so much time had passed, with the +2 attribute, those patients should have been cured.

"Boss Qin, are you going out?" Yuan Shan asked curiously after explaining.

"Yup," Qin Lin's acting skills came online out of habit, and he made up a story. "Isn't the Jade consort cream the best ointment in the world now? i've done some research on the jade consort cream and wanted to try buying some older herbs to see if i could make a stronger jade consort cream."

"A more effective Jade consort cream?" Yuan Shan was shocked.

He had personally tested the Jade consort cream and knew very well how terrifying the effects of the Jade consort cream were. It was a product that was many years ahead of the world.

what was boss qin saying now?

there's a possibility of making the even more effective jade consort cream?

"Boss Qin, bring back the herbs you bought. You must let me participate in the preparation of the medicine," Yuan Shan immediately added.

The Jade consort cream was already a miracle in the world's medical research.

if he could participate in the production of the jade consort cream, which had a stronger effect, and even succeed, it would definitely be an honor.

yeah, academician Yuan will come with us. Qin Lin said with a smile.

wasn't academician yuan the best proof?

He hinted that he had obtained these medicinal herbs from outside.

As for the others who couldn't get it, he could only get it.

Therefore, a quality 3 would only be exclusive to him in the future.

after qin lin drove out of the manor, he stayed outside for a long time before he drove to the cheap warehouse again. then, he took out the medicinal herbs from the game.

After that, he drove back to Linlin Manor.

After parking the car, he carried the medicinal herbs into the hall and saw that Yuan Shan was already waiting for him.

"Boss Qin, are these the herbs you bought?" Yuan Shan asked as he looked at the two big bags in Qin Lin's hands.

"En!" Qin Lin nodded and handed the bag to Yuan Shan. He smiled and said, " " academician yuan, take a look at these herbs. they all said they were older, did i fall for it? "

Yuan Shan took the bag and immediately said with a smile, " "Even if we fall for it, you won't."

Wasn't that a joke?

It was publicly acknowledged in the Chinese Medical Hospital that boss Qin's Chinese medicine attainments were not even comparable to the seniors of the Traditional Chinese Medicine families in the country.

For example, even Chu Qingfeng and the other top Chinese medicine seniors couldn't crack the Jade consort cream, but boss Qin had cracked it alone.

Yuan Shan thought about it and opened the bag to take a look. When he saw the medicinal herbs inside, his eyes lit up.

as an academician in medical research, he had studied the raw materials of the yufei cream before he came into contact with it. naturally, he could recognize that the medicinal materials were not old.

medicinal herbs of this age were definitely not comparable to those purchased in large quantities from the outside world.

The Jade consort cream made from such herbs might really have a better effect.

"Boss Qin, can I concoct the Jade consort cream with you?" Yuan Shan asked expectantly.

"Of course," Qin Lin nodded and said with a smile.

This academician was the only certified student, so why couldn't he?

Then, Qin Lin brought Yuan Shan along and returned to the inner area with the medicinal herbs.

it was yuan shan's first time in the inner area of the manor villa. he was a little surprised when he saw qin lin's work room.

He had guessed that Qin Lin had his own private laboratory in the company. After all, boss Qin had created so many things every time.

However, now that he saw it, he felt that boss Qin's work room was a little simple. Other than many props, there was no other scientific research decoration at all.

Or rather, this place did not look like a private laboratory at all.

"Academician Yuan, let's start!" Qin Lin said as he divided the herbs one by one.

he found two small electronic weighing scales and gave one to yuan shan.

Yuan Shan didn't know the specific content of the formula, so he didn't go to the hall. He just asked Qin Lin to give him the weight data, and then he helped to weigh the required weight of the herbs one by one.

the next step was to grind the powder. there was nothing to pay attention to, just grinding it.

This could be left to Yuan Shan.

qin lin only needed to arrange the order of the herbs and give it to him.

In this case, as long as Yuan Shan ground those medicinal herbs into powder in order, he would then use the medicinal powder according to the proportion to make the ointment.

Qin Lin took the small clay pot from before and began to prepare the medicine.

An hour later.

Yuan Shan stared at the claypot in front of Qin Lin. When he saw Qin Lin open the claypot, he could smell the smell of medicine.

With his previous experience, Qin Lin knew that the Jade consort cream had been successfully made when he smelled the fragrance.

"boss qin, is the ointment a success?" Yuan Shan immediately asked.

"Yes, it should be a success." Qin Lin nodded and divided the ointment into two portions. He handed one portion to Yuan Shan and said, however, academician Yuan, I need you to check the specific condition of the ointment again. See if the age of the ingredients has any other impact on the ointment.

"alright, leave this to me." Yuan Shan nodded. He couldn't wait as he spoke. He took the Jade consort cream and left the inner area. Then, he left the manor and went to you City Hospital for a test.

Qin Lin also picked up the other ointment and entered the game with a thought. He immediately saw the remarks for the preparation of this Yufei ointment:

[Chapter 1214 I Have To Completely Break My Arms And Legs! We're In The Atmosphere Now!](#)

[special Jade consort cream: quality 3]

[this is a privately concocted yufei cream. legend has it that it's a cream specially used by noble consort yang. after being repaired and improved by doctor dott, it has a stronger effect: Scar recovery effect +3, wound recovery effect +3, old scar removal effect +3, tissue recovery effect +3!]

qin lin smiled when he saw the remarks on the jade consort cream. it was a success.

The next thing to do was to test the effects of this Grade 3 Jade consort cream.

The effects of a quality 2 pill had already been tested at the Chinese hospital. Even a burn like Liu Zhendong's could cure it. So, this time, they had to find someone with broken arms and legs. Moreover, it had to be the kind that was cut in two.

However, he still had to wait for Yuan Shan's test results.

Taking advantage of the free time, Qin Lin once again concocted the Jade consort cream.

He had tried to use all the ingredients at grade 2 to cook the Supreme medicinal cuisine before, but the Supreme medicinal cuisine he made was only at grade 3.

The only thing that he had ever made was the beef that could only be made at the food Festival.

Now, he wanted to use these quality 2 ingredients to make a few more portions of Yufei ointment and see if he could get a quality 4 one.

Qin Lin concocted four more portions of Yufei cream in a row. After bringing them into the game, he saw that the attribute remarks were still of Grade 3.

Therefore, even if all of these ingredients were of Grade 2 and caused a qualitative change, they could only be used to make a Grade 3 ointment, not a Grade 4 one.

Then, Qin Lin could only look at the game in his mind again and control the game character to go to the mine town.

If he wanted to make a quality 4 ointment, he would have to have some sort of potion-making skill.

Otherwise, he could only try to tamper with the seeds.

there was a seed processing machine in ore town.

He wanted to try to process these medicinal seeds to see if there would be any surprises.

qin lin controlled his game character and headed to the processing machine experience hall in ore town. he soon arrived in front of the seed processing machine and took out the seeds of a certain kind of medicinal material from his backpack and put them into the machine.

[do you want to proceed with seed processing? who was it? [no?]

he directly chose yes!

[Baibin grass seeds are being processed. Production has increased by 20%!]

...

[Baibin grass seeds are being processed. Production has increased by 20%!]

...

【.....】

After Qin Lin processed the seeds continuously, the seeds he obtained still had the attribute of increasing production. Obviously, he was not surprised.

in other words, he could only concoct a quality 3 jade consort cream at the moment. if he wanted to concoct a quality 4 cream, he would have to wait and see if he had the opportunity in the future.

Time passed.

in you city hospital, yuan shan's expression became more and more excited as he tested the yufei cream. just from one test, he discovered the terrifying effects of the newly formulated yufei cream.

When Yuan Shan finished testing the Jade consort cream, he could not hide his shock.

If the previous Jade consort cream could be said to be superior to the HKR potion, then this newly-made Jade consort cream could be superior.

then, he couldn't wait to go back to the linlin manor and find qin lin. " boss Qin, you're amazing. It's just as you said. This Jade consort cream is even more effective than the previous one. If the previous one is already so good, this new one is as good as going straight into the atmosphere.

"So awesome?" Qin Lin knew this in his heart, but he still pretended to be surprised.

Yuan Shan didn't doubt him and nodded seriously, " yes, boss Qin. Maybe we should find two patients to test the effects of this new Yufei cream. Besides, I'm afraid we have to find someone with very serious injuries.

"Yes, that should be the case!" Qin Lin nodded.

"Leave this to me!" you City Hospital might have a suitable patient, " Yuan Shan immediately said. if it really doesn't work, we can ask Minister Lu for help.

...

Chinese Academy of Sciences.

Minister Lu had already entered a laboratory.

The researchers inside were all busy working on the ointment. They were trying to crack the Yufei ointment.

Although they already had the formula, it would be very helpful for the research of other drugs if they could crack the elements in it.

Minister Lu beckoned to an old man and asked, " "Academician Dong, how's the cracking coming along?"

Academician Dong was another medical academician besides Yuan Shan. This time, he was also responsible for leading the team to crack the Yufei ointment.

Academician Dong sighed. Minister Lu, I can only say that the wisdom of the ancient people was really too strong. Even if we have the formula for this Jade consort cream, we can't crack it even if we want to.

"It can be said that the factor contained in it is not something that the current medical rules can crack. We are helpless, and foreigners are even more helpless."

"I'm sure that the effect of the Jade consort cream I've concocted will not be stronger in the next 20 years."

[Chapter 1215 Conjectures About A Sci-Fi Product! Plans To Concoct An Even Stronger One! 1](#)

Minister Lu nodded after hearing academician Dong's words.

Although they couldn't crack it themselves, at least no one else could crack it either.

Moreover, the Jade consort cream was at least 20 years ahead of the rest of the world. It could be used for many things, not just for medical purposes.

As Minister Lu was thinking, a phone call suddenly came in. It was Yuan Shan.

This made him happy. He immediately picked up the call and asked, "Academician Yuan, are the results of the cancer treatment with tea leaves out yet?"

This was something that he had been constantly thinking about.

Boss Qin's two tea trees were the focus of the Chinese Academy.

The tea leaves that could cure any cancer would cause a sensation that would be even more sensational than the Jade consort cream.

If not for the two tea trees, who would have thought that there would be such a magical tea tree?

Now, it was up to Linlin to see if the tea plants transplanted and cultivated in Linlin's laboratory could have anti-cancer effects.

If Linlin's laboratory's transplant was successful, then they would have this product. In a sense, it was equivalent to having a nuclear bomb-level strategic material.

"Minister Lu, it's not about the tea leaves, it's about the Yufei cream," Yuan Shan immediately said.

Minister Lu was stunned for a moment. He then discussed the Yufei ointment with Academician Dong.

So, he immediately asked, "Academician Yuan, what's wrong with the Jade consort cream?"

Yuan Shan explained, "Minister Lu, Boss Qin has used a lot of old medicinal materials to formulate a stronger Yufei cream. It can be said that the effect of this new Yufei cream is better than the previous one.

"So, Boss Qin and I want to test the effect of the new Jade consort cream. We don't need to test it to remove scars. The previous one already has such magical effects."

"Now, we want to test the effect of the recovery of lost tissues, the best kind is the kind that has just completely broken arms and legs. There are no such patients in the three hospitals in your city, so I hope that Minister Lu can help arrange it."

Minister Lu was surprised when he heard the news, "I'll make the arrangements as quickly as possible."

After he hung up the phone, he said to Academician Dong, "It seems that our Jade consort cream's effect is not limited to this. Boss Qin has made an even better Jade consort cream with the herbs from last year. Now, we need to conduct a treatment experiment.

Academician Dong's eyes lit up. Minister Lu, it's possible. The medicinal properties of the herbs are higher. The effect of the ointment will be stronger.

in theory, as long as the medicinal properties of the herbs are not limited, the effects of the Jade consort cream are also not limited. Even if the body is cut off at the waist, as long as the medicinal effects are sufficient, it can be restored to its original state.

" of course, this is only in theory, because it is impossible to have such an old medicinal herb. to achieve such an effect, we will have to crack the factor composition of this yufei cream and re-research it to make a breakthrough. "

that's the only way to achieve a sci-fi effect. Besides, I'm afraid it's going to take 20 years. By then, old people like us will be retired and won't be able to work anymore. We can only hope that some young talent will be able to do it.

Minister Lu nodded and said, " now, prepare the patients for boss Qin and academician Yuan. Academician Yuan said that the new Yufei ointment made by boss Qin is more effective than the previous one. I'm curious to see how strong the effect is.

"Let's go together." Academician Dong was just as curious.

Broken arms and legs were a common disability in modern society. The advancement of modern industries was relatively fast, and many mechanical operations required human operation.

When manual operation and mechanical operation were not coordinated, it was easy to cause broken hands and feet.

Some accidents could also easily cause broken arms and legs. With the current medical situation, some broken arms and legs could be recovered.

For example, the soldier who had to have his arm amputated only managed to keep his hand after the treatment of the Yufei cream. There was no need for amputation.

however, if it had been completely broken, even if it was reconnected and restored, it could only meet the basic needs of living. it was impossible to recover to its original state.

The bones, blood vessels, and other tissues in the arm were too complicated.

Now, academician Yuan was actually looking for a patient with completely broken arms and legs to experiment on boss Qin's newly formulated Jade concubine cream. This showed his confidence in the Jade concubine cream.

...

Linlin Manor.

Yuan Shan soon received a call from Minister Lu and immediately went to find Qin Lin. " boss qin, minister lu has contacted us. he'll transfer two patients with completely severed arms and one completely severed leg from ming city and min province. we have to prepare the ointment for the treatment now. "

Qin Lin went to take out the Jade consort cream that he had prepared earlier and gave it to Yuan Shan."academician yuan, this ointment should be enough."

"according to the data i've collected before, it's enough." yuan shan nodded and took the jade consort cream to you city hospital. he then contacted the hospital.

the hospital's director had gone to the city for a meeting. hence, the one who had come to receive them was a deputy director called chen feng.

"Academician Yuan, what do you need?" Chen Feng asked. The director has said that we will do our best to satisfy your needs."

The higher-ups of the hospital knew that Yuan Shan was conducting clinical trials in the isolated area of the hospital, so they naturally did not mind.

Yuan Shan directly told the other party about the matter and then instructed, "get your hospital ready to receive patients. get the operating theaters and wards ready."

"okay, academician yuan." Chen Feng immediately went to get it done. He was very curious about what kind of treatment experiment this academician Yuan was going to conduct.

[Chapter 1216 Speculation On A Sci-Fi Product! Plans To Formulate An Even Stronger One 2](#)

It seemed that he placed great importance on it, or else the other party wouldn't have personally arranged it.

With his fastest speed, Chen Feng arranged the operating room and Ward. Moreover, he soon received three patients in succession. Surprisingly, all of them had broken limbs, and they were completely broken.

the parts that were separated from his body were protected by a medical kit.

seeing these three patients, chen feng subconsciously thought of yufei ointment.

After all, the Jade consort cream had the special effect of recovering lost tissues, which was related to the recovery of broken arms and legs.

Could it be that the Jade consort cream could treat such a completely severed limb?

Chen Feng was filled with suspicion, but he was actually looking forward to it. He hurriedly arranged for the three patients to enter the operating room. At the same time, he informed academician Yuan.

If such a completely broken arm and leg could be completely recovered, then the effects of the Jade consort cream would be even more terrifying than the live stream experiment.

The three patients' faces were filled with anticipation and anxiety.

they were just ordinary workers. when they were in the big hospital, the doctor said that their broken hands and feet could not be fully recovered even if they were reattached. it was good enough that they could stay, and the key was that they would need a lot of money.

The key was that they didn't have that much money.

When they were in despair, he would tell them that there was an experiment for the Jade consort cream and that they could be treated for free.

They had heard of the Jade consort cream. That news had been on the hot search for so long.

Now that they had the opportunity to get the treatment of the Yufei cream for free, they were naturally eager to agree.

This was their last chance.

after yuan shan was notified, he also brought qin lin's 3 grade jade consort cream into an operating room.

the patient's name was chen mo. his leg had been cut in half by the factory's machine. even though the bleeding had stopped, it was still terribly swollen.

They had given the other party an anesthetic, otherwise, he would be crying and screaming right now.

Chen Mo wanted to ask something, especially if his leg could be reattached. However, the doctor had already administered general anesthesia on him and he fell asleep under Yuan Shan's instructions.

yuan shan was also very anxious. he wanted to know the effects of the newly concocted jade consort cream immediately. according to his test data, the effects of the jade consort cream would be beyond his expectations.

The doctor next to him had already put on his Surgical Gown. He began to untie the bandage on Chen Mo's leg, revealing his wound. At the same time, he removed his broken leg.

limb replantation was a very sophisticated medical surgery. only a few doctors in you cheng knew how to do it, and the skills they had were limited.

In order to test the Jade consort cream with the best results, the doctor had been transferred from Ming city.

After two hours of surgery, Chen Mo's leg was reattached. At the same time, the Yufei ointment was applied and it was wrapped in thick bandages.

The doctor had done this kind of surgery countless times. In fact, before the surgery, he already knew how much the patient would recover after the surgery.

However, today was a little different. Because of the Jade consort cream, the doctor was not sure to what extent the patient would recover in the end.

Even doctors like them were very unfamiliar with the Jade consort cream. They could only find out about it through the live stream experiment. They had not even seen the official documents before.

At the same time, the two patients with severed arms were also done with their surgeries in the other two operating rooms. They were sent to an isolated Ward together with Chen Mo.

Naturally, Yuan Shan had been paying close attention to the condition of Chen Mo's three patients. He had also instructed Chen Feng, the Deputy Director, to stand by and watch over them.

After the surgeon checked that there were no problems after the operation, he was arranged to rest.

Yuan Shan also received a call from Minister Lu at this time. He answered the call and rushed out of you City Hospital.

Minister Lu had arrived with academician Dong.

"Minister Lu, academician Dong," Yuan Shan picked up the two of them and headed to the area where the Yufei cream was being tested.

Along the way, Minister Lu asked curiously, "academician yuan, how's the yufei cream and the patient?"

"

Yuan Shan immediately explained. Minister Lu, the surgery is done. The Yufei cream has been used. We're just waiting for the results.

alright! Minister Lu nodded and said, "let's go and take a look at your test report on this newly cultivated Yufei cream.

Yuan Shan immediately led the way. I haven't sorted out the test data report yet. Otherwise, I would have sent it back," he said.

The three of them quickly arrived at a testing room. There was the testing equipment that Yuan Shan had brought here, which could be used to test all kinds of medicine.

yuan shan turned on a computer, pulled out the test data of the yufei cream, and handed it to minister lu and academician dong.

Minister Lu wasn't a professional in this, so he could only see the general situation.

Academician Dong was a professional. When he saw the data in the test report, he was shocked.

According to this data, the effect of the Yufei cream made by boss Qin with old herbs was heaven-defying.

At this moment, Chen Feng, the Deputy Director, hurriedly ran over and reported, "Academician Yuan, I think something happened to the three patients."

"Why would I?" Yuan Shan frowned and went to the ward with Minister Lu and academician Dong.

The moment they entered the room, they saw Chen Mo's three patients grabbing their newly reattached arms and legs.

"What's going on?" Yuan Shan immediately asked the three of them.

chen mo immediately said,"doctor, my leg is a little itchy. it's the part where i'm having the surgery."

"what?" yuan shan seemed to have realized something.

minister lu and academician dong were also shocked. they probably thought of something.

this was the recovery of the surgical wound.

Yuan Shan immediately went to Chen Mo's bedside and pressed on his wound. He then asked a few questions.

"The Jade consort cream is working," he finally confirmed.

"So fast? didn't you just finish the surgery not long ago?" minister lu was shocked.

"This effect is too terrifying." Although academician Dong knew that the effect of the Yufei cream was terrifying after seeing the data, he didn't expect it to be this terrifying.

How was this crushing the Jade consort cream from before?

This effect was already like a product in a science fiction movie.

The sudden situation made the three of them pay more attention to Chen Mo's group.

In less than two hours, Yuan Shan found another patient with a broken hand. His fingers could already move, and he could even make the action of clenching his fist.

Oh my God.

This Kasaya

It must be known that it would take at least six to eight weeks for the wound, flesh, and nerve function to recover.

This was only the beginning.

what were they seeing now?

The patient had recovered to such an extent in such a short time.

the next day.

When Minister Lu, Yuan Shan, and academician Dong came to the ward again, they were shocked by what they saw.

A patient with a broken hand was actually trying to spin a pen, and he was very agile.

In order to complete this command, the nerves and functions of the arm meant that the other party had recovered a lot.

" doctor, my leg seems to have recovered a lot! " chen mo even took the initiative to report. he even lifted his broken leg and moved his toes up and down to show yuan shan and minister lu.

Minister Lu and academician Dong looked at each other.

The effects of the Jade consort cream were more terrifying than they had thought. Perhaps their previous speculation that as long as the Jade consort cream was effective enough, a cut in the waist could also recover immediately seemed to be feasible.

As long as he could crack the factor composition of the Jade consort cream.

Time passed again. After three days, Minister Lu and academician Dong were completely numb from shock. The patient with the broken hand could already hold a cup with his broken hand.

Chen Mo was even able to get off the ground and tried to exert force with his broken leg.

"academician yuan, are you sure boss qin's ointment is made from aged herbs?" minister lu asked yuan shan anxiously.

Yuan Shan said with absolute certainty, " that's right. I've seen the herbs myself. They're very old. I helped boss Qin prepare them. I tested them as soon as I finished.

Seeing Yuan Shan's firm answer, Minister Lu didn't want to waste any more time. He left with academician Dong and even gave up on Qin Lin.

at the same time, he made a phone call and ordered his men to purchase older medicinal herbs. as long as they were the medicinal herbs needed for the jade consort cream, the older the better.

The effect of boss Qin's newly concocted Jade consort cream was already so strong.

he wanted to try and see if he could concoct something with a stronger effect!

[Chapter 1217 Eliminating The Correct Answer! The Strange Li Kai! 1](#)

Time always slipped away unknowingly.

sometimes, a month was a long time.

But sometimes, a month would pass by without him knowing.

Hua hospital.

Minister Lu was looking at the department's information when his Secretary came in and reported, " "Minister Lu, the last batch of herbs is here."

"we've arrived?" Minister Lu's face was filled with joy.

A month ago, after he had witnessed the magical effects of boss Qin's Yufei cream, which was made from older herbs, at you City Hospital, he had sent people to purchase older herbs.

It was just that these medicinal herbs needed to be calculated in terms of age. It was not just three or five years. It required a longer time.

moreover, he wanted the hua * yuan to make a yufei ointment that was stronger than boss qin's, so he needed to find the oldest medicinal herbs.

such medicinal herbs had to be searched all over the world, purchased from medicinal herb vendors, and inquired from traditional chinese medicine aristocratic families.

in a month's time, he had already found other medicinal herbs, which were definitely the oldest on the market.

Now, the last ingredient had arrived.

He immediately called academician Dong.

When academician Dong saw the medicinal herbs, he said, " "have they all arrived? Then we can make the Jade consort cream."

"Well, I'm sure you can make a better ointment than boss Qin's this time, right?" Minister Lu said with a smile.

boss qin could make the emperor's supreme medicinal cuisine with that kind of effect, but the effects they brought back were only so little.

This was a huge blow.

Now, he finally had a chance to turn the tables.

Academician Dong didn't waste any time. He asked someone to take the herbs away, and then they went to the laboratory together to start preparing the Yufei ointment.

After he spent some time preparing the Jade consort cream, academician Dong reported it to Minister Lu.

As soon as Minister Lu arrived, he immediately ordered, "it's already been prepared?" hurry up and test it, i'll get someone to find patients to experiment on. "

Academician Dong nodded and called a few assistants over. He then began to examine the Jade consort cream.

His face was filled with excitement. Boss Qin's Jade consort cream, which was made with aged herbs, had the same effect.

What kind of effect would the Jade consort cream, which they had made with the oldest medicinal herbs on the market, have?

this anticipation slowly disappeared as the test went on.

Academician Dong had seen the test data of boss Qin's Yufei cream, and he had remembered it in his mind. So, as soon as he found the first data, he automatically compared it in his mind.

But to his surprise, the first data he detected was far inferior to the Jade consort cream made by boss Qin with old medicinal materials.

"Why would I?" Academician Dong's face darkened. He immediately asked the assistants beside him, "how's the test going?"

The assistants immediately replied, "

"Fellow Dong, I've already found some data."

"i've also gotten the data from the test."

"The data I'm in charge of is the same!"

"Give me all the test results," academician Dong immediately said.

The assistants summarized the data and sent it to academician Dong.

When academician Dong saw the data, his face turned even uglier. He said, " "i shouldn't."

These numbers were actually not as good as boss Qin's, and they were far worse.

He had thought that he had made a mistake.

However, even if one person could make a mistake, it was impossible for so many people to make a mistake together.

In other words, the Jade consort cream that they had made with the highest age on the market was far less effective than the one made by boss Qin.

Minister Lu also received the news very quickly. He asked in disbelief, " "Why is it like this?"

Academician Dong shook his head and said, " I still don't know. There must be some problem. You can ask senior Chu Qingfeng. He's a leading figure in Chinese medicine. He might know the reason.

Chief Lu nodded and called Chu Qingfeng over. The latter explained everything to him as soon as he arrived.

Minister Lu, academician Dong, " Chu Qingfeng asked with a smile, " could it be that boss Qin's herbs are older than yours? "

" whoosh! " minister lu.

"Wanwan" academician Dong.

this question stunned the two of them.

They were only concerned about why the effects of their potions were worse than boss Qin's. They didn't think that boss Qin's medicinal herbs were older than theirs.

The two of them quickly discarded this thought.

this couldn't be the case.

Because the connections they used were not something boss Qin could compare to.

Since they had already bought the oldest one on the market, boss Qin couldn't possibly buy any older.

Moreover, the data was so different. How old must boss Qin's herbs be to reach this level?

"Senior Chu, are there any other possibilities?" Minister Lu asked again.

chu qingfeng nodded and explained, " the formulation of chinese medicine is very strict. the same recipe may have different effects if it's formulated by different chinese medicine practitioners. "

" the jade consort cream you made is less effective than boss qin's. that might be because boss qin's ability to grasp the medicinal properties of the herbs is better than yours. "

when it comes to the preparation of Chinese medicinal herbs, sometimes, due to the nature of the medicine, two seconds more or two seconds less may have an effect. Maybe some people's medicine with ordinary herbs is better than others 'medicine with old herbs.

it's just that not everyone can master this kind of fine control. With boss Qin's Chinese medicine attainments, no one can compare to him. It's a little naive to say that he can make better ointment than others.

His words were obviously praising Qin Lin. Naturally, he was also praising Chinese medicine.

[Chapter 1218 Eliminating The Correct Answer! The Strange Li Kai! 2](#)

In the current situation, the higher Qin Lin's status was, the higher Chinese Medicine's status would be. Only then would Chinese medicine pay more attention to it.

More importantly, Minister Lu and academician Dong actually thought that it made sense and nodded.

moreover, he had suffered a huge blow. after all, he had been full of confidence before.

...

linlin manor.

Qin Lin was already controlling his game character to fish by the river. Soon, a fish was hooked.

[congratulations on fishing up an Atlantic sturgeon!]

Another Atlantic sturgeon was hooked.

During this period of time, he had already caught who knew how many Atlantic sturgeons. In any case, who knew how many were already stored in the pond.

If these Atlantic sturgeons were brought out to the outside world, they would form a spectacular school of fish.

He had even secretly tasted the Atlantic sturgeon in the game.

Did they use the kitchen of the ranch house to cook the all-fish banquet or used the Chinese fir that they had cut down before as wood to make the fire?

He had to admit that the taste was really good.

One word incense.

The two words were very fragrant.

It was no wonder there was a saying that the Atlantic sturgeons were too delicious to be eaten until they became extinct.

after personally tasting it, he knew that it was not a groundless rumor.

Qin Lin controlled the game character to put the Atlantic sturgeon into the pond. Just as he was about to continue controlling the game character to go to the beach to fish, Zhao moyin walked into the office with little Qin Feng in his arms.

daddy, carry me, carry me, carry me! little Qin Feng reached out to Qin Lin when he saw him.

Because of the baby-strengthening factor, little Qin Feng's development was much faster than other children.

Qin Lin also hugged little Qin Feng.

Although this little guy was a hindrance and caused her and his mother to lose a lot of happiness, he was still her son.

After handing Qin Feng over to Qin Lin, Zhao Moyu said, " let's go and take a look at fairy tale mountain. the cable car is already built. "

"en!" Qin Lin nodded and left the office with little Qin Feng and Zhao mochen in his arms.

How powerful was the infrastructure in the country? This was actually a very uncertain matter.

The construction of a certain sacred mountain hospital was completed in a few days, and a certain building was also completed in a short time.

to put it slowly, sometimes it would take a few years to build a community, or even a real estate development zone for ten years and still not finished. this would make countless people who were pre-purchasing houses suffer.

Of course, the construction speed of Linlin Manor was the fastest. Firstly, the Youcheng county government was supervising it. Secondly, Linlin Manor had money and manpower. It was fast and could afford any amount of money.

Therefore, the construction of fairy tale mountain was very fast.

The cable car was completed and could be used.

you city construction and the engineering department of linlin manor had confirmed several times that there were no problems with the operation and that it was very safe.

In the future, Linlin villa's Engineering Department would be in charge of the maintenance of the cable car.

Qin Lin and Zhao Moyu drove to the foot of fairy tale mountain and saw the reception hall of the cable car from afar.

The reception hall was made of water-proof and moth-proof hardwood and specially made bamboo, which was very retro.

Due to special requirements, even the entire cable car had a retro and simple shape and color.

when qin lin arrived, lin lanzi had already brought a few people to the reception hall of the cable car to give a lecture.

although fairy tale mountain had not been completed, the relevant staff and waiters had already been recruited and trained.

Now that the cable car had been built, some workers could get used to it in advance. The hall also needed maintenance.

Seeing Qin Lin and Zhao Moyu looking over, Lin Lanzi immediately went up and greeted them,"Chairman Qin, mo Xiao."

"Sister LAN Zi, Qin Lin and I will go up to the cable car to take a look," Zhao mochen said.

Lin Lanzi nodded and got someone to make the arrangements.

The cable car started moving quickly. Lin Lanzi accompanied Qin Lin and Zhao moqian into a carriage. As the cable car moved, the carriage also slowly slid up the mountain.

Lin Lanzi looked at the little Qin Feng in Zhao mochen's arms and even reached out to tease him, making the little guy giggle.

When they arrived at a place, she also introduced, " Chairman Qin, the construction of fairy tale Valley is almost complete because the plan is for the tents and dormitories. The only thing missing is the fairy tale vines.

" when we plant the fairy-tale vine, we'll decorate the surroundings with other beautiful green plants. they'll also look very beautiful when they're illuminated by the fairy-tale vine at night. "

in addition, we have also reserved an area for planting the night Empress. This way, when the night Empress seed you have cultivated is harvested, you can plant the night Empress.

Qin Lin nodded and saw the valley.

The valley was completely different from the beginning. The river next to it was completely separated by a fence.

it was also divided into several functional areas, and various facilities were designed and built.

There were also tents that were set up on the spot. They were well-arranged and very beautiful.

Looking down from above, this fairy tale Valley was built very well and made people feel very comfortable. In this way, the mutated space vine and the mutated Night Queen would play their role. With the fluorescent light twining around, it was definitely a fascinating fairy tale.

The cable car went up the mountain and looked down. They could see the entire mountain. Many places in the mountain had already been opened up to build forest passages.

Soon, the cable car reached the top of the mountain.

the top of the mountain had also been opened up, and with the help of the original terrain, a vast flat land had been shoveled out.

The base station where the cable car got off was at the edge of the vast flat land. In the vast flat land, Lin Han was busy with the design drawings with his senior brothers and sisters in a simple work shed.

If the other places on fairy tale mountain were designed and built by them conveniently, then the flower greenhouse and Tree Community on the top of the mountain to watch the sunrise could completely make her famous.

therefore, she was very serious and rigorous with her senior brothers and sisters.

When he saw Qin Lin, Zhao mochen, and Lin Lanzi, Lin Han immediately went up and greeted them, " "President Qin, President Zhao, President Lin!"

qin lin nodded at the other party. while lin lanzi, zhao moqian, and lin han were talking, qin lin also looked around.

he could not see the plan of lin han and the others. in one area, the staff of the plantation department was busy planting the seeds of the greenhouse.

After this area, it would be the residential area for the sunrise viewing area.

On the mountaintop, he had to pay as much attention to the door of the greenhouse as possible to avoid any problems that were difficult to deal with in time.

after all, many of the tourists were beautiful and had good figures.

In this society, many men would think that the woman was seducing them after drinking with her twice. If the woman dressed a little sexier, a certain part of her body would be aroused, and she would think that the woman was seducing him.

If such a strange tourist appeared, it would be troublesome no matter what happened.

Of course, it was not only men who had such idiots. Once a woman had such an idiot, it would also be a problem.

qin lin then walked to an area where a very tight fence had been built, blocking the area in front of the cliff.

There was also a very large platform there, on which the staff of the plantation Department were also transplanting green plants. He could see hanging baskets, swings, pavilions, and other facilities being built.

without even thinking, he knew that this was the place where the sunrise was closed. from here, he could see the sun rising from the mountain in the distance.

this reminded qin lin of the peak of the goddess mountain in the game. there, the sunrise could be turned off and people could watch the sunrise.

Qin Lin and Zhao Moyu took a brief look at the construction progress, then took the cable car back to the foot of the mountain and went back to Linlin Manor.

When Qin Lin returned to his office, he looked at the virtual screen in his mind and played a game. Li Kai was here.

"Old brother li, are you free to come over today?" Qin Lin was a little surprised. Brother li had been staying in Linlin's laboratory all this time. It was rare for him to come here.

li kai handed a stack of documents to qin lin and said, " "Brother Qin, I need you to sign these documents. Deng Guang wanted to bring them over for you to sign, but I just happened to bring them over."

Qin Lin took the documents and glanced at them. They were all related to Linlin's laboratory. They weren't big issues, but there were some regulations that required his signature as the boss.

This kind of document was a necessity in every company.

Qin Lin took a look, took a pen, and began to sign the documents one by one.

When Li Kai saw this scene, a strange expression appeared on his face. He also had a deep sense of anticipation.

[Chapter 1219 Li Kai's Trick Is Bigger Than A Peanut \(1\)](#)

Qin Lin didn't notice Li Kai's abnormal behavior at all. He was still signing the documents.

Most of these documents were cumbersome documents under the company's rules.

But suddenly, Qin Lin felt that something was wrong with one of the documents.

A summary of Linlin's research on the cultivation of new rice in his laboratory.

It was obviously a research report on the cultivation of the new rice plant, which should have been written by Brother Li.

The key was that the names of the experiment participants were not written in the report, not even Brother Li's own name.

Why did she let him sign this document?

"Old brother Li, this document is not clear. You can't sign it!" Qin Lin said as he took out the document and handed it to Li Kai.

When Li Kai saw the report, he looked embarrassed. "That ... I think I put it in the wrong place when I took the document.

As he said this, he felt very vexed.

Why is Brother Li being so cautious? Couldn't he just sign it?

The TV series didn't play out like this. Didn't they always mix an insignificant document into a pile of documents and the company's chairman wouldn't read it too much?

Some unimportant documents were signed, and the real important matters had to be decided through meetings.

The TV series was indeed a lie.

He actually believed this.

Moreover, was it easy for him?

The pot of the new rice was too big, and he felt like he was going to be hunchbacked if he carried it.

It was clearly the effect of the special soil, but now everyone thought that he was the powerful one.

That was why he wanted to use this method.

As long as Brother Qin signed it, he could add his name to the list of experimental participants.

At that time, wouldn't he be the one to write whatever little brother Qin did?

Old Brother Qin should be qualified to take the blame for most of it, right?

After all, Brother Qin had signed the document, and the outside world knew about his ability in plant research.

Now that this move had not succeeded, he was f * cking miserable.

"Brother li, how's the new rice plant?" Qin Lin asked.

li kai sighed and said, " the rice is very good. the rice has ripened. now we just need to harvest the seeds. when the time comes, we can use the low-temperature genetic technology to modify it. it can be planted in winter. "

"let's go and take a look!" Qin Lin's eyes lit up.

He was looking forward to the mutated rice produced by the game.

According to the original note, this mutated rice could fulfill the dream of Hexia.

moreover, he had also processed the seeds to increase the yield of the mutant rice by two.

"Let's go!" Li Kai said weakly.

This method didn't work. He really couldn't think of a way to share the pot.

When he saw this on TV, he thought he had found a way and was excited for a long time.

The director of the TV series was so brainless that it was not realistic at all.

The two of them left Linlin Manor and went straight to Linlin's laboratory. After a series of security checks, they arrived at a temperature control experiment site.

It was also the place where the mutated rice plant was planted.

After the mutant rice was discovered, all the rice in the area was dug out.

they were even afraid of the influence of other plants 'pollen, so they did not plant other plants.

It could be said that the stalk of mutated rice was standing alone in that area. Similarly, it was particularly eye-catching in the experimental plot.

Qin Lin followed Li Kai into the area and saw the mutated rice plant at first sight.

Hexia's first point in her dream was that rice was as high as sorghum.

The first thing Qin Lin saw was that the mature mutated rice had already surpassed sorghum in size. It was even taller than sorghum, like a small tree.

Even if there was only one, it was still a very spectacular scene.

He could even imagine that if the mutated rice was planted on a large scale, it would probably form a forest.

qin lin hurried to the front and saw that the mutant rice was growing on top of it, and the pressure had already made the branches droop.

Furthermore, each grain of rice was not only the size of a peanut, but even bigger.

The key was that the production rate was really amazing.

The rice was as tall as a tree, with many branches, and each branch was heavy rice. How long could a person eat such a rice plant?

"Old brother Li, will such rice have a great impact on the fertility of the land?" Qin Lin had also obtained a lot of knowledge about plant genes through the mysterious stone book.

He knew that under normal circumstances, if the plants grew in such a way, long-term planting would definitely have a huge impact on the fertility of the soil.

Old Brother Qin, I was just about to tell you about the magical aspects of this new rice plant, " Li Kai said excitedly. Although this rice plant's growth will have a greater impact on the soil's fertility than ordinary rice, it's not uncontrollable.

" I've already had people research a special fertilizer that can be completely controlled. The cost of this special fertilizer is higher than ordinary fertilizer, but compared to this production, the cost of that little bit of fertilizer is nothing. " "En!" Qin Lin understood that brother Li's words meant that there was no problem.

Linlin laboratory not only had more and more excellent researchers, but it also recruited promising graduate students from various famous schools every year.

Since there was no problem with the fertility, this thing would be awesome if it were to be promoted on a large scale.

If most of the rural fields in the country were restored to planting, coupled with the low-temperature genetic technology, they could grow all year round. Their country alone could probably feed the entire world.

"Old brother Li, can you go down and help me pick some rice? I'm too lazy to go down to the fields, it's too muddy." Qin Lin suddenly said with a pretentious face.

Li Kai didn't think much of it and immediately took off his shoes and stepped into the field. At the same time, he didn't forget to preach, " " brother Qin, when did you become so friendly? You're doing genetic research, after all. Researchers like us shouldn't be afraid of the soil. "

As he spoke, he picked a small handful of rice. When he turned his head, he was surprised to see Qin Lin taking a picture of him with a mobile phone.

For some reason, he felt that something was wrong.

Qin Lin immediately put away his phone and urged, " "Old brother Li, hurry up, let me see this rice."

Li Kai nodded and came out of the field. He rubbed his hands a few times to remove the shell, revealing the white and crystal-like rice inside.

He could see that the grains of rice were indeed bigger than peanuts.

If they didn't know that this was rice, who would have dared to imagine it?

As Qin Lin thought about it, he took out his phone and started taking pictures of the rice.

"Old Brother Qin, have a taste." Li Kai suddenly said.

Qin Lin nodded, put a grain of rice into his mouth, and began to chew.

the next moment, his eyes brightened.

the taste of the mutant rice was the same as the ones he had harvested in the game, and it was even more fragrant and sweet than the ordinary rice in reality.

Previously, he was afraid that the harvested mutated rice would not taste good after cooking. If that happened, no one would go back to eat it, and it would be meaningless.

After all, no one in today's society was short of food and clothing.

On this point, the people of our country are definitely the happiest. Otherwise, there wouldn't be so many people who have nothing to eat.

therefore, with such a terrifying production, the meaning was different if the taste was better.

This was like a woman with a very good figure but an extremely ugly face, the kind that couldn't be fixed by plastic surgery. What was the use of that?

Except for those who had no choice, they could only cover their heads and endure it.

therefore, if the taste of the mutant rice was not good, only those who could not fill their stomachs would eat it. there was no such person in the country who could not fill their stomachs.

if this woman had a good figure and a beautiful face, it would be different. she could make more money than others who worked hard for more than ten hours.

This was the case with the mutated rice. The yield was high, and the taste was sweet. It was like a beautiful woman.

Qin Lin thought about it and immediately pretended to be surprised. brother Li, you're amazing. The mutated rice you're cultivating tastes so good. When it's fully cultivated, the whole world will be shocked.

"Hehe." Li Kai immediately felt bitter.

This was exactly what he was afraid of.

He felt that his virtue did not deserve it. Even if he was a scapegoat, there should be a limit to how much one person could bear the blame, right? You can't add pots without limit.

therefore, he hurriedly said, " old brother qin, you know that this is all the credit of that special soil. at most, i'm just taking care of it. so, take a look and see if you can help it. "

Qin Lin knew what Li Kai was going to do when he heard him speak, so he immediately interrupted him, " "Old brother Li, I'm sorry. I almost forgot that I have other things to do. I'll take my leave first."

He didn't give Li Kai any time to react. As he walked, he took out his phone and called Lin Lanzi. yes, President Lin, I'll go and find you. Professor Li Kai has successfully developed a new type of rice Pixiu. I've made a video and I'll send it to you. You can use the official account of Linlin villa to post the Pixiu.

Li Kai's eyes widened when he heard Qin Lin's voice getting weaker and weaker.

He finally understood why Brother Qin wanted to take a picture just now.

f * cking yingluo

he felt a sharp pain in his back.

It really hurt inexplicably.

In the end, Li Kai could only helplessly look at the mutated rice plant and start cursing, " "Why are you so capable? I clearly don't give you enough fertilizer, and I even skimp on your water content occasionally. Can't you grow a little less? I've never seen someone as capable as you."

Li Kai felt better after cursing, but he turned around and felt awkward. Three researchers came in from outside and looked at him awkwardly.

Obviously, she had heard his mumbling.

That f * ck! Even Li Kai himself was embarrassed.

"Professor Li, I just arrived. I didn't hear anything." One of the researchers immediately said and left in a hurry.

"Professor Li, I just remembered that I have something to do." The other researcher also left immediately.

"Um, sorry to disturb you, professor Li." The third researcher didn't know what to say and hurriedly followed.

What a joke. If he didn't know how to play dumb after seeing professor Li lose his composure, he would be in a hurry to make things difficult for himself.

However, they could understand. After all, the new rice plant had grown so fast and produced so much. It tasted better than ordinary rice.

They could imagine how sensational this thing would be when it came out.

However, he did not know why professor Li hoped that the rice would grow worse. Perhaps professor Li was too excited and lied?

It was just like a person who had scored full marks in a school exam. He liked to say that he didn't want to score full marks either and that it was boring to keep relying on full marks.

Li Kai looked at the three researchers' retreating figures and opened his mouth. He wanted to explain something, but he didn't know what to say.

[Chapter 1220 You're Really A Genius! 1](#)

Linlin Manor.

Lin Lanzi had just finished a meeting with all the Department managers of Linlin villa.

this was because there would be two small events at the moon villa.

After accepting President Zhao's position as the General Manager, she had to take control of the overall situation. It was much more tiring than just being the head of the media department.

However, for a woman like her who had been hurt in a relationship, this was her career, and she was willing to tire herself out.

Now, the value of the General Manager of Linlin villa was no less than that of the General Manager of the top 100 domestic groups.

When she received Qin Lin's call, she also went to the multimedia department as soon as possible.

She was still the manager of the media department.

She would only be free after she found a suitable person to take over the multimedia department.

when she arrived at the multimedia department, she clapped her hands. " it's not an urgent matter. Stop what you're doing and wait for orders in the conference room.

many of the staff in the multimedia department stopped and greeted lin lanzi before heading to the conference room.

President Lin's actions meant that there was an important and urgent mission coming up.

Lin Lanzi, on the other hand, left the office and saw Qin Lin arrive shortly after.

qin lin saw lin lanzi and ordered, Mr. Lin, I'll send you the video later. When you make the announcement, you must highlight professor Li's hard work. Also, you must give a close-up of the rice to show that it's more fragrant than ordinary rice. When you're done, send me the video.

"Alright, Chairman Qin." Lin Lanzi immediately replied. She was curious about what kind of rice professor Li Kai had cultivated this time, and even needed Chairman Qin to personally come and instruct them.

Could it be that professor Li Kai's rice was better than Chairman Qin's Linlin rice?

after qin lin gave his instructions, he sent the two videos he had just taken to lin lanzi and left.

lin lanzi opened wechat and watched the two videos. when she saw the rice that was the size of a small tree and the crystal-clear rice grains that were bigger than peanuts, she subconsciously opened her mouth.

This is rice?

Lin Lanzi felt incredulous.

if her boss hadn't personally forwarded the video to her, she would never have thought that such a scandal would appear.

Thinking back to the things that were produced in Linlin's laboratory, it didn't seem strange that professor Li Kai could cultivate such rice.

Lin Lanzi immediately went to the office of the multimedia department. She believed that once this video was published, it would definitely cause an uproar on the internet.

When she arrived at the conference room, she forwarded the video to the staff of the media department.

The staff in the media department started making a commotion after watching the two videos.

Clearly, the two videos were too unbelievable.

...

Qin Lin returned to the manor's office and sat down. He looked at the game on the screen in his mind and began to do his daily tasks.

After completing the daily missions, he tried to control the game character to enter the ranch house and turn on the television.

The television was also one of the ways he obtained items on a daily basis.

Once there was an auction program, he could bid for it. Otherwise, when he turned on the TV, it would be the news or the weather forecast.

The game character turned on the television, but the scene that appeared today was a little strange.

It wasn't the news, nor was it a weather forecast. It wasn't even the auction from before. It seemed to be a live broadcast.

The comments on the bottom left corner and the likes on the right were a live broadcast hosted by a celebrity.

But when he saw the star with the goods, he was stunned for a moment. He was wearing sportswear, with a football on the table and a huge poster of the star playing football on his back.

"Hello everyone, I'm Caddy. I love football, but do you know why I'm so good at it? That's because I often eat sea cucumbers."

I have to eat a sea cucumber in the morning, one in the afternoon, and one in the evening. That's why I'm very strong and energetic. That's why I've become a world superstar.

Today, I'm going to share with you a type of sea cucumber. The link below is a special sea cucumber egg. After this type of sea cucumber egg is successfully bred, it will become the sea cucumber I eat. If you need it, quickly place an order.

"Ran ran." Qin Lin was a little dumbfounded when he saw the live broadcast on TV.

There was such a thing?

He didn't know what the lousy game producer was hinting at. How could he be so ruthless!

Qin Lin was very curious about the sea cucumber.

In reality, there was also a star player who said the same thing, but this star player only became a domestic star player. Everyone knew what a domestic star player meant.

In the game, this star player had become an international star.

This was different.

In the same way, one had such an achievement and the other didn't, which meant that sea cucumbers were different.

Qin Lin was very curious. He immediately controlled his game character to click on the live link on the TV and buy the sea cucumber eggs.

[please confirm the number of sea cucumbers you want to buy!]

qin lin immediately controlled his game character to buy more sea cucumber eggs. then, he confirmed and paid the in-game gold coins.

[congratulations, you have successfully purchased the special sea cucumber egg. We will mail it to you as soon as possible!]

following that, the weather forecast was shown on the television."It is expected that there will be heavy rain after today."

qin lin also returned to his senses and waited.

With the ratio of in-game time to real-life time, the in-game system notified him that the package had arrived in the afternoon.

qin lin controlled his game character to receive the delivery, then locked the door and entered the game with another thought.
