

The Game 1251

[Chapter 1251 562! The Festival Of The Kappa \(3!](#)

The other road was a special Stone Road with flowers and green plants on both sides.

Although Linlin villa and the ranch were some distance away from fairy tale mountain, there were always some tourists who liked to take a walk.

Moreover, there should be a lot of such tourists.

Qin Lin rode on the little lion and strolled along the stone Road.

the little lion shook its ponytail and hissed from time to time.

When they reached the foot of fairy tale mountain, they could see that a large parking lot had been opened up.

The parking lot was connected to the cable car base, and the cable car base also had two roads leading out.

one led to the campsite in the valley, and the other led directly to fairy tale mountain.

Fairy tale mountain had also opened up a winding passage, but the passage had not been cleared yet.

when the entire mountain was filled with mutated space vines and night queen, the entire mountain would become an ornamental area.

By then, these winding passages would be the best routes for tourists.

Naturally, other than the mutated space vine and the night Queen, fairy tale mountain would also be planted with many other species of flowers and plants.

during this time, yu shui had been busy with some of the planting department employees in fairy tale mountain.

Qin Lin gave Yu Shui a call. After getting the location, he rode his little lion into the mountain.

Along the way, he could see that many plants were surrounded, and the mutated space vine was growing inside.

Before fairy tale mountain was fully developed, the villa didn't want to reveal it. Therefore, they used this method to surround the mutated space vines.

"Chairman Qin, why are you riding a little lion here?" Yu Shui asked Qin Lin in surprise.

Qin Lin got off the horse and handed the night Queen's seed to Yu Shui. this is the seed. Just plant the seed in the corresponding place according to the design.

"Alright, Chairman Qin." Yu Shui nodded.

The night Queen seed had very strict requirements for the climate and environment. Other than fairy tale mountain, it shouldn't be able to grow anywhere else.

However, he still didn't want these seeds to drift out. It was better to leave them to his own people to plant.

After Qin Lin gave the seed to Yu Shui, he rode the little lion down the mountain and took it to a River in the mountains to drink water. He saw a group of people.

These people seemed to be exploring something.

He recognized one of them. It was Qi Kaiyou, an expert in the fishery and protected animals.

After the emergence of extinct animals like the Atlantic sturgeon and the establishment of you city's precious fish Nature Reserve, experts like Qi Kaiyou had been stationed in you city.

They were researching extinct animals like the Atlantic sturgeons in search of their possible source.

They naturally didn't know that this Atlantic sturgeon was made from a wall.

according to their guesses, there must be an underground river. the extinct fish had been in the underground river before and were attracted by the climate change in you city.

Therefore, they wanted to find the underground river now.

"Boss Qin, I'm surprised to see you here." qi kaiyou saw qin lin and jogged over to greet him.

"mr. qi, i didn't expect you to still be in you city." Qin Lin said with a smile.

"We might have to study it in you city for a long time," Qi Kaiyou said with a smile.

Qin Lin nodded. He chatted with Qi Kaiyou for a while before riding his little lion away.

However, he had only taken a few steps on the lion when the game screen in his mind moved. In the next moment, Mayor Thomas appeared at the entrance of the ranch.

He made the lion cub stop and looked at the screen in his mind. He controlled his game character to go to the gate of the ranch and clicked on Thomas to talk.

[it's great that you're here. I need your help. Can you help me plant these cucumbers? This was the cucumber that Kappa liked!

[the Kappa number 1 Festival is coming up soon. We need these cucumbers. Help us plant them and throw them into the lake for the Kappa during the contract Festival. There will be unexpected rewards!]

[Chapter 1252 The Kappa's Recovery Stone! The Underground River! 1](#)

Qin Lin saw Thomas's conversation and immediately controlled the game character to accept the mission.

In this version of the story of the farm, no matter what the quest was, it was related to the Kappa or the goddess, and the rewards were the most abundant.

However, he didn't understand why the Kappa liked cucumbers so much.

In the game, Kappas were female.

This made one think too much.

[thank you so much. these cucumber seeds are for you. please plant the cucumbers as soon as possible and throw them into kappa lake!]

[you have obtained a special Kappa sacrificial cucumber seed!]

When Qin Lin received the notification, a bag of seeds appeared in his game character's backpack.

After Thomas gave his orders, he also left the farm and disappeared from Qin Lin's sight.

seeing this, qin lin hurriedly rode the little lion back to the linlin manor.

the little lion was also left in the manor.

The playground of the manor was a large patch of dog tooth grass, and there was enough grass for the little lion to eat.

Qin Lin returned to his office, locked the door, and entered the game with a thought. He saw the bag of special Kappa sacrificial cucumber seeds that Thomas had given him.

These seeds were slightly larger than ordinary cucumber seeds and were small oval in shape.

[Kappa sacrificial cucumber seed: special!]

[this is a special cucumber seed preserved in ore town. The planted cucumbers are usually used as sacrifices for Kappa. They have special effects, and the effects can be seen when they mature.]

qin lin looked at the seeds and took out half of them.

Such game items would usually be used up automatically by the system's default, and there was no way to control them in the game.

Now that he had entered the game, he could do a variety of operations.

no matter how special the cucumber was, it would always be good to keep a portion of it except for the one he planted for the kappa.

After that, Qin Lin took half of the special Kappa sacrificial cucumber seeds out of the game.

then, he looked back at the game and controlled his character to plant the remaining half of the cucumber seeds.

Taking out half of these special cucumber seeds through a BUG did not affect the progress of the mission.

qin lin came back to his senses, opened the office door again, and walked out. he continued to check the condition of the everlasting warmth grass.

In the afternoon, he was surprised to find a notification in the game that the contract sacrifice cucumber was already ripe.

This speed was a little fast.

Qin Lin hurried back to his office, locked the door, and entered the game again.

The dwarf had already finished picking the special cucumber and placed it in the storage room.

Qin Lin was a little stunned when he saw the cucumbers.

This was because this cucumber was different from ordinary cucumbers.

Most cucumbers were hard.

These cucumbers, however, were soft and limp, as if they had withered and rotted.

"It's spoiled?" Qin Lin frowned and picked up a cucumber. With a little force, the cucumber's skin broke and a sticky white liquid flowed out.

When he opened it, even the melon meat inside was sticky, a little like porridge that had been boiled dehydrated.

[Kappa sacrificial cucumber: special!]

[this is a special Kappa tsahik sacrificial cucumber, which is also a kind of cucumber that Kappa likes very much. Because Kappa breeds a lot of precious wild fish, this kind of cucumber is very popular with fish. Special effect: Fish nutrition requirement +1, fish growth requirement +1, aquatic creature liking +1, fish ecology maintenance +1, growth speed +1!]

Qin Lin saw the attributes and roughly knew why the Kappa still liked the sacrificial cucumber.

it had nothing to do with what he had been thinking about before.

After all, it was impossible to be so soft.

However, the cucumber was very magical. It was specially made for fish.

Fish nutrition requirements, fish growth requirements, fish likes, these attributes could be used as fish food.

Moreover, it was easy to maintain the fish ecosystem. Places like lakes were different from the ocean. It was very easy to affect the ecological environment due to small changes.

For example, if the water quality became worse, it would cause the death of a type of fish and shrimp. If these fish and shrimp could not reproduce, the fish that fed on these fish and shrimp would probably have to cool.

another example was that if a new species of fish entered a lake, it would feed on the fish and shrimp in the lake. in the end, the ecosystem would go wrong, and everything would cool down.

moreover, the cucumber was liked by fish and had those attributes. no matter how it was fed, it would be attracted by the cucumber. the fish would eat the cucumber one after another, so the ecosystem could be maintained.

At the very least, there wouldn't be any problems with the ecology of the fish. If there were other fish that joined in, then there was no other way.

Qin Lin put down the cucumber and logged out of the game.

Then, he controlled his character to go to the storage room and put the Kappa sacrificial cucumber into the inventory.

at this moment, the follow-up of the mission was triggered:

[the kappa worshipping seems to have begun. do you want to go to the kappa lake and put in the kappa worshipping cucumber?]

Qin Lin chose "yes" and controlled the game character to leave the farm.

kappa lake was also on mount goddesses.

However, it was located at the westernmost part of the goddess mountain.

qin lin controlled the game character to cross the long mountain path and forest, and arrived at kappa lake.

the situation at kappa lake was also different from before.

as it was the kappa show, many npcs in the town had come. there was even a sacrificial platform specially built by the lake.

Mayor Thomas was there. Seeing him, he immediately ran over to talk to him.

[it's great that you're here. the kappa sacrificial cucumber has been planted. hurry up and put it on the sacrificial cucumber at the altar!]

qin lin confirmed and continued the task, controlling the game character to go to the sacrificial platform by the lake.

[Chapter 1253 The Kappa's Secret Stone Of Recovery! The Underground River! 2](#)

As soon as he stood on it, he immediately began to put in the sacrificial cucumber.

This time, the cucumber was different from the previous ones. After the first cucumber was thrown into the lake, fish immediately surrounded it and ate it.

This was the scene before the cucumber was put in.

then, the second cucumber was put into the lake, and the third steamed bun was put into the lake.

After throwing in five in a row, Qin Lin didn't see any movement from the Kappa, so he had to continue.

Moreover, as if it knew how many cucumbers he had in his backpack, when he threw the last cucumber in, ripples immediately appeared on the water surface, followed by a vortex.

Qin Lin knew that the Kappa was about to appear.

Sure enough, after a while, the Kappa sister appeared, sticking her head out of the lake.

[so it's you. Did you give me those cucumbers just now?]

apparently, sister kappa still remembered the cucumber he had thrown last time.

[I'm really grateful for your cucumbers. My friends all love them. I'll give you a gift too. This is for you!]

[congratulations, you have received a mystery gift bag from the Kappa!]

it's the same mystery gift bag as last time. could it be that he got a kappa happy stone like last time?

That would be a pain in the ass.

He didn't need to use that thing to modify the second river.

Qin Lin didn't hesitate and opened the gift bag. In an instant, the gift bag turned into countless light spots and disappeared.

At the same time, Qin Lin received another notification.

[congratulations on opening the Kappa mystery gift bag. You have received a Kappa recovery secret stone!]

The Kappa recovery stone?

Qin Lin heaved a sigh of relief. It was good that it was not a Kappa's happiness stone.

other items would not have the same attributes.

He immediately controlled the game character to return to the farm, and once again entered the game with a thought. He saw the Kappa restoration secret stone.

It was blue in color and was in the form of a hexagonal crystal. There were also ripples in The Shape of Water droplets inside the crystal.

[Kappa recovery stone: (underground river)!]

[it is rumored that Kappa can control water veins and can restore all kinds of dried rivers through a very magical stone. This Kappa recovery stone is used to restore the attributes of underground rivers. It can restore a dried underground river and also find traces of nearby underground rivers!]

Qin Lin's eyes lit up when he saw the attributes.

He suddenly recalled Qi Kaiyou's words.

didn't they always suspect that there was an underground river in you city? the atlantic sturgeon and the atlantic dolphin were in this underground river before they went extinct.

However, this was only a guess. He had taken the fish out of the game.

Therefore, if Qi Kaiyou and the others really couldn't find the underground river, they would deny this conjecture and think of new possibilities.

With a group of experts staring at this, what if their minds went haywire and they thought of him?

Now that he had this, could he make up for this last part?

Then, everything that happened in you city had nothing to do with him.

the experts had proven that it was reasonable and well-founded.

At the same time, Qin Lin received a message. After the Kappa recovery stone was used, if there was an underground river nearby, the water droplet in the crystal would turn into an arrow to point the way.

if there was no underground river, there would be no reaction.

With that thought, Qin Lin took the Kappa recovery secret stone and exited the game.

After returning to the office, he tried to use the Kappa recovery stone.

He just wanted to see if there was an underground river nearby. If you city didn't have any underground stones, then this thing was useless.

he couldn't possibly take this thing to another city and help them restore an underground river, right?

Wouldn't that be too free?

To Qin Lin's surprise, the Kappa recovery secret stone actually reacted. The water droplet pattern inside changed and turned into an arrow pointing in the direction of fairy tale mountain.

Did that mean that there was an underground river in you city?

Seeing this, Qin Lin immediately left the office and went to the manor again. He rode his little lion and headed in the direction of fairy tale mountain.

Not long after, he entered fairy tale mountain.

however, the kappa restoration stone was still pointing in the direction ahead, which was the mountain range behind fairy tale mountain.

Qin Lin could only ride on the little lion and continue forward.

However, the mountains were full of thistles and bushes, so the little lion couldn't go in. He could only leave the little lion outside the mountain and then enter the mountain himself.

qin lin followed the directions of the kappa's recovery secret stone and continued to move forward, shuttling through the mountains.

The forest behind fairy tale mountain was filled with dense vegetation. There were almost no roads, and it was very difficult to walk.

If it wasn't for the two fruits of the tree of strength, Qin Lin would've been exhausted to death if he wanted to travel through it.

The key was that the water drop pattern on the Kappa recovery stone had not changed, which meant that they had not reached it yet. They had to continue deeper.

Finally ...

after crossing two mountains, he followed the instructions and saw a cave in a canyon.

after entering the cave, there was actually a winding crimson stone path.

This red stone Road continued down, and it seemed to be the direction of the underground river.

Qin Lin took two steps and found that there was no light inside.

He entered the game with a thought and took out a pot of night Empress that he had stored previously.

The night Empress's fluorescent light illuminated the surroundings, allowing people to see the road ahead clearly. However, the path down was still getting more and more rugged.

[Chapter 1254 The Kappa's Secret Stone Of Recovery! The Underground River!](#)

Qin Lin didn't know how long they had been walking when he heard the faint sound of water flowing.

This made him happy. This should be the underground river.

sure enough, they reached a stable area. through the fluorescent light shone by the night empress, they could see a winding river bed.

The river bed also had many tiny tributaries that flowed in all directions.

however, the river bed had already dried up, leaving only a little bit of flowing water at the bottom.

qin lin made a mark and tried to walk forward.

He didn't know how long he had walked, but he still couldn't see the end of the dried-up riverbed.

This underground river must have been very wide in the past, and no one knew where it would flow to. However, it was most likely connected to Min River or the branch of Min River in Youcheng.

Qin Lin didn't continue to explore. He took out the Kappa recovery stone and chose to use it.

[currently, you can use the Kappa recovery stone in the underground river. Do you want to use it?]

Qin Lin chose "yes." The Kappa restoration stone in his hand glowed with a special light, then turned into countless special light spots, flying into the riverbed.

after that, the surroundings fell silent.

Qin Lin looked at the entire river bed seriously, but he didn't see any movement.

This made him puzzled. The Kappa's recovery stone did not work?

It should be impossible.

The products of the game had never been ineffective.

The biggest possibility was that the recovery of the underground river would not be possible in a short time.

qin lin waited for a long time, and when he saw no response, he decided to leave first.

To be honest, staying in such a dark place was very uncomfortable.

So, he decided to go back first.

There were many places where underground rivers and above-ground rivers were connected.

If the underground river was restored, the surface River would react in many places.

It should have caused quite a commotion when they arrived.

after spending a lot of time, qin lin returned to the outside world and spent a lot of time outside the mountains.

When the little lion saw him come out, it ran forward happily and let him get on the horse.

When he returned to the manor Office, he looked at the other half of the Kappa sacrificial cucumber seeds that he had taken out earlier.

If this kind of cucumber could be cultivated in the real world, it would definitely be very useful for raising fish.

...

Time passed.

Three days passed in the blink of an eye.

Once again, Qi Kaiyou set off from you city and arrived at a River that he had visited two days ago.

They had studied you city's old water tributaries and checked the condition of many rivers. Through scientific analysis, they felt that this River was one of the rivers that might be connected to the underground river.

they had come to collect samples two days ago, and today they were going to investigate the situation on the spot.

Qi Kaiyou brought his men to a place not far from the river and put down the tools they were carrying. Someone then walked to the river, but a moment later, that person exclaimed, " everyone, come and take a look. Something's not right.

Qi Kaiyou frowned and brought his men over. When they saw the river, they were all shocked.

That was because the current in that River was much faster than the two rivers before, and the water level had also increased significantly.

You city hadn't rained recently. According to the time, it was impossible for the water level to suddenly rise.

however, they definitely remembered correctly that the water level was not this high when they came to check.

Something was wrong.

The sudden rise in water level in a River was definitely not without reason.

Therefore, something must have happened!

[Chapter 1255 Water Quality Monitoring! There Must Be An Underground River!](#)

"Quick, check the water quality!" Qi Kaiyou immediately ordered the people around him.

The biggest reason for the sudden rise of the water level was definitely the addition of other water currents.

The water might have come from the mountains, or it might have been from other rivers.

Finally, it might be the underground river.

The underground river and the river above the ground were actually connected in many places. Therefore, the underground river could also affect the water flow of the river above the ground.

As for the exact reason, he would know after checking the water quality.

Whether it was the sudden influx of other rivers, the influx of water from the mountains, or the emergence of underground water, the water must have contained special components.

Through the comparison of these ingredients, he could roughly know what was going on.

As soon as Qi Kaiyou gave the order, someone immediately took out an instrument and various test papers to test the water flow.

After a series of skillful and professional operations, one of them suddenly said in surprise, " "Mr. Qi, perhaps our previous guess was right."

"what's wrong?" qi kaiyou immediately asked.

the man explained, " this water contains a lot of special minerals that are contained in the underground river. we didn't detect any of them when we took samples before. this means that a large amount of underground river water has flowed into this river in the past two days. "

"Really? That's great." qi kaiyou immediately looked excited.

if their guess was correct, then you city's special situation would be the most important discovery in the fish industry.

They had verified this conjecture and proved that they had found the underground river. This meant that their investigation this time could be printed in related books.

Qi Kaiyou took the test data and found the content of those special minerals.

At that moment, his phone rang. It was another expert's number. He was leading another team to another river.

You city was said to be a small county, but its overall area was not small. Other than Min River and its tributaries, there were many rivers of various sizes.

Therefore, it was impossible to find the underground river by checking these rivers alone. There were other experts who had brought people to check the rivers in other parts of you city.

Once the call went through, the expert's excited voice could be heard. we've found something. The water level in the river suddenly rose. After testing, we found that the water contains mineral content unique to underground water. So, there must be an underground river in you city. We should be able to find it soon.

When Qi Kaiyou heard the news, he said excitedly, " "Really? We've also discovered it here."

When the specialist heard this, he was also excited and surprised.

The happiest thing for experts like them was to gain something from their research and their conjectures were confirmed.

as soon as qi kaiyou hung up the phone, another call from an expert came in. they also discovered that the water level of a river had risen, and the river water contained special mineral components.

This time, Qi Kaiyou was surprised.

For so many rivers to be in such a state, and for them to be some distance away, it meant that this underground river was very wide and had many branches.

Moreover, there must be a reason for such a situation to suddenly occur at the same time.

Qi Kaiyou thought about it, then picked up his phone and called the experts, telling them to go back to you city for a meeting.

He had made substantial progress in his investigation of the underground river today. The next step was to find the underground river.

.....

Linlin Manor.

Qin Lin exited the game and appeared in the office.

He was holding a bag of seeds in his hand, which were the Kappa sacrificial cucumber seeds.

He had already controlled his game character to process the seeds in the processing machine, which still increased the output attribute.

Qin Lin took the seeds out of the office and walked to a corner of the bamboo forest with a small hoe in his hand.

he dug under the bamboos, and then planted the kappa sacrificial cucumber seeds next to them.

In this way, when the cucumber seeds sprouted, the vines could wrap around the bamboo for viewing, which saved him the trouble of putting on a shelf.

Of course, he was still a little lazy.

"Old Brother Qin, what did you train this time?" Li Kai's voice suddenly sounded.

Qin Lin turned around and saw Li Kai teasingly ask, " old brother Li, you've just had a good rest. You're in the hospital now. Is there any problem? "

previously, li kai had taken the linlin medicinal wine, quality 2 okra, and quality 2 special sea cucumber at the same time. he had even been sent to the hospital and had to rest for some time.

some things could be repaired if they were not strong, but once they were broken, they would be gone.

Li Kai seemed to understand what Qin Lin was talking about and said awkwardly, " "Old Brother Qin, in the future, you really can't let people eat those things at the same time. It'll really kill them."

"old brother li, since you're done, can you get me a bucket of water?" qin lin couldn't help but smile.

"En!" Li Kai nodded and was about to pick up the bucket when he suddenly remembered something. He took out his phone and started taking pictures of Qin Lin. "Old Brother Qin, what kind of seeds have you cultivated this time?"

"i tried to get some cucumber seeds, but i don't know what will happen in the end," qin lin said, his head full of black lines.

Old brother li was walking on his own path, and he wanted to make him have no way out.

Old brother li wasn't so easy to push the blame on.

qin lin continued digging holes to plant cucumber seeds.

A moment later, Li Kai also came over with a bucket of water.

[Chapter 1256 Water Quality Monitoring! There Must Be An Underground River! 2](#)

not long after, the cucumber seeds were planted, and li kai had already started watering them with a pot.

Qin Lin knew the condition of the cucumber. He just had to wait for it to grow and ripen.

He thought of something. How was he going to prove that the cucumber could be fed to fish?

He couldn't just take out the cucumber and give it to the fish to test. That would be very strange.

When the time came, it would be reasonable to take the cucumber to the man-made spring near the moonstone, where there were many ornamental fish.

Qin Lin felt that it was too troublesome, so he dug out two more seeds and went to the man-made spring where the moonstone was located to plant them.

"Brother Qin, are you trying to test the growth conditions of the seeds in different environments, pure soil and moist soil?" Li Kai asked.

"You're right, old brother li. You're amazing," Qin Lin said.

"I'm not that great, but I can still see through such a simple goal," Li Kai replied humbly.

Qin Lin smiled and didn't say anything. After they were done, he invited Li Kai to his office to make tea.

After Li Kai left, he took out his phone and started to browse the news.

Linlin's laboratory was still the mainstream news, but the popularity of the tea leaves for cancer treatment and the ** fund had slowly declined.

Since this was already a fact, the netizens 'attention would slowly shift to other places.

Even if there was a beautiful woman in front of him, he would get tired of looking at her every day.

However, a hot search news caught Qin Lin's attention.

It was news about irrigation, and it was news about you city's irrigation.

after extinct fish such as Atlantic sturgeons and Atlantic pufferfish appeared in you city before the founding of the new year, experts speculated that these extinct fish might exist in an underground river because they were attracted by the climate change in you city.

recently, experts had found that the water level of many rivers in you city had risen. after testing, they found that the water contained a lot of mineral components unique to underground rivers.

Therefore, it was almost certain that there was an underground river in you city. The experts were already investigating and trying to find out the underground river one day!

This news involved extinct fish such as the Atlantic sturgeon and the Alabaster pufferfish, so it went viral in an instant.

After all, these extinct fish had been the hot topic in the past.

Qin Lin saw the hot search news and knew what was going on. It must be the Kappa's recovery secret stone.

He immediately left the office, went to the parking lot, and drove to the mountains behind fairy tale mountain.

After parking the car outside the mountain, he followed the previous route and quickly headed to the cave.

After entering the cave, he did the same thing and took out a pot of Night Queen from the game. He followed the path down the cave and soon reached the underground river again.

This time, it was different from the previous ones.

The wide river bed from before was only a little trickle.

now, all he could hear was the sound of water hitting the shore and the huge rocks.

the entire river bed had been covered by the rapid current.

If he hadn't seen it with his own eyes, he wouldn't have believed what had happened three days ago.

One could only say that Kappa's Secret stone recovery was amazing, or that his external ability was amazing.

Qin Lin looked at the underground river. With an idea, he took it and entered the game.

Now that he had the underground river, he could proceed with the next step of his plan.

One had to know that the number of Atlantic sturgeons, Atlantic pufferfish, and those extinct fish that he had caught in the game was not small.

if those fish were brought to the real world, it would be very shocking, and the number would be even more terrifying.

previously, he couldn't take it out in you city, as it was too sudden and easy to discover.

There was no problem in the underground river.

Moreover, this underground river was restored by the Kappa recovery mystical stone. There were no fish in it, so it was just right for him to let these fish in.

Of course, some people would say that there was no ecology there, and the fish would starve to death.

However, the original riverbed had its own ecosystem. There were all sorts of small animals and plants, and that was enough for now.

After a long time, the underground river and the river above ground would be connected to each other, and the ecosystem would slowly shift and assimilate. The ecosystem of the river above ground would slowly supplement the ecosystem of the underground river.

This was a complicated matter, and many people would not understand it if it was explained so simply. naturally, if it was complicated, more people would not understand.

After entering the game, Qin Lin went to the pond, picked up a Sturgeon, and immediately returned to the bank of the underground river.

The fish in his hand struggled, and the moment he let go, the fish jumped into the underground river with a plop.

In this turbulent underground river, the Atlantic sturgeon was obviously unaffected. It could still swim with its head above the water. After a while, it swam back into the water.

seeing this, qin lin entered the game again. after a while, he took out another atlantic sturgeon and entered the game again. he kept taking the atlantic sturgeon out of the game and placing it into the underground river.

Then there were the White-fin dolphins and other extinct fish.

Qin Lin caught a lot of these extinct fish every day, and the number of fish stored in the game pond was even more terrifying.

As Qin Lin moved the fish away, more and more fish appeared in the underground river.

This was especially so for the White-fin dolphins, who were very close to humans. They even formed groups and swam around him. As they jumped, the sound of water flowing could be heard.

[Chapter 1257 Water Quality Monitoring! There Must Be An Underground River!](#)

qin lin thought for a moment. it was strange to bring out these extinct fish alone.

So, he went back into the game and started moving the ordinary wild fish.

these wild fish also had a quality of 2, and their size was still quite large compared to ordinary fish.

Moreover, there were a lot of these fish stored in the game pond, about 20000 in total.

It was impossible for Qin Lin to move all 20000 fish out. He would only move a portion.

One by one, he moved the fish out of the game and put them into the underground river. He only stopped when he felt that it was enough.

He didn't know how much time passed.

Only then did Qin Lin leave the underground cave and go to the mountains outside. After leaving the mountains, he drove back to Linlin Manor.

He just didn't know when the entrance of this underground karst cave would be discovered.

.....

In the following week.

the news on the internet was almost completely dominated by you cheng.

After extinct fish like the Atlantic sturgeon and Atlantic dolphin appeared in you city, everyone was curious about where this fish came from.

It had been a hot search before.

After all, a national treasure that had been extinct for decades had reappeared.

Now, experts speculated that there was an underground river, and these fish originally lived in the underground river.

Now that the experts had a lead on the underground river, it naturally attracted everyone's attention.

for this, you city even had people report the progress.

Moreover, these experts were also very capable. Through the exploration of the water flow, they found a large underwater crack that connected to the underground river.

The underwater crack was located at the branch of Min river's you City section.

chen li was personally in charge of this matter. he had brought some people to follow qi kaiyou and the other experts here early in the morning.

this was the intersection of the rivers.

Qi Kaiyou pointed at the surface of the river. these days, the price of this place has increased again. Moreover, this increase has exceeded that of other places. The biggest reason is that this place is connected to the underground river.

moreover, to be able to cause such an increase in the water level, it means that the underground river is very rich in water. I just don't know if it's only recently or in the past.

These words made Chen Li feel a little embarrassed. To be honest, before Linlin villa was created, you city was a small county that no one paid attention to. Who would pay attention to this?

Qi Kaiyou had already looked to the side. There was already a person changing his diving equipment. This person knew how to go underwater. He was a diving expert called MA Dalin.

The motor engine would enter the underground river through the link.

When the time came, they would also bring live broadcast equipment so that the people watching the live broadcast could also see the whole process.

After ma da Lin made some preparations, he also said, " " mr. qi, county head, i'm ready. we can go into the water. "

Qi Kaiyou nodded and immediately ordered, " everyone, cooperate and get into the water.

The people in the surroundings started to move. Following that, MA Dalin also boarded a speedboat. The crack that was connected to the water was in the middle of the water.

when the speedboat reached its destination, ma da lin also jumped into the water. then, he quickly moved in the direction that qi kaiyou and the others had set.

At the same time, on the shore, Qi Kaiyou, Chen Li, and the others were also watching through a screen. On it was an image that was being transmitted by MA danlin's live broadcast equipment.

Just as MA Dalin was getting closer and closer to the bottom of the river, the visibility of the equipment was getting lower and lower.

"What are those?" Qi Kaiyou looked at the screen and was shocked.

in the blurry light, many black figures were rushing towards ma da lin.

At this moment, ma da Lin, who was in the water, had also noticed the black shadows that were charging towards him. He could not help but panic, " "Damn it, what's that?"

[Chapter 1258 A Terrifying Number! There's No Future For Lifeguards!](#)

Ma da Lin's expression was grave.

he knew very well that it was very dangerous to be hit by a giant underwater object while diving.

moreover, the depth was too deep, and the light was limited. he couldn't see clearly what was rushing towards him.

however, those things seemed to have noticed him and were charging at him even faster.

very quickly, ma da lin saw these things clearly, and his face revealed an expression of disbelief. they were all white-fin dolphins.

This extinct national treasure fish had actually appeared in front of him in a group. Moreover, the number was astonishing.

But immediately after, he became even more flustered, because those white-fin dolphins directly charged towards him.

They seemed to have just rushed out of the darkness and were attracted by the searchlight on his body.

Moreover, if one suddenly saw light in the dark, they would not be able to open their eyes for a while.

If humans were like this, fish would definitely be like this too.

Therefore, these white-fin dolphins might not be able to see due to the light and were charging straight at him.

more importantly, he had no time to turn off the searchlights.

the next moment, he felt a collision. he was stunned, then a second collision, and a third shock.

in the end, he fainted and his body slowly sank to the bottom of the river.

on the shore.

Qi Kaiyou's and Chen Li's expressions changed as they looked at the screen in front of them.

Because the video was blurry, they couldn't see what they were.

Now, the screen had turned completely dark, and the scouting equipment had been destroyed.

"Hurry, hurry and save them." chen li immediately took out his walkie-talkie and shouted to the rescue team of the min river tributary in you city that he had brought with him.

He was a little anxious.

You Cheng's discovery of the underground river proved that it was a good thing that the Atlantic sturgeon and the Atlantic dolphin came from an underground source.

However, if someone died during the process, or if they discovered that there were animals in the underground river that attacked people, it would be terrible.

With so many people paying attention to this matter, it would cause a huge storm.

the you city min river branch rescue team had already put on their rescue uniforms and were on standby.

After hearing Chen Li's order, the ship immediately sailed to the center of the river. At the same time, the screen on the shore was connected to the rescue team's camera equipment.

these lifeguards were about to go into the water to salvage it. they didn't know much about diving, but they were professionals in underwater rescue.

The only difference was whether the one who came up was alive or dead.

With the sound of water splashing, the lifeguards all entered the water. However, before they could dive for 10 meters, they were shocked to see a group of big guys rushing towards them.

They looked at the group of people in disbelief.

As you city's water rescue team, they had long been asked to learn about extinct national treasures such as the Atlantic sturgeon and the Atlantic dolphin.

as such, they recognized those to be white-fin dolphins, and there were surprisingly many of them.

Before they could react, the White-fin dolphins swam towards them. Then, they were shocked to find that their bodies were lifted up by the White-fin dolphins, floating to the surface of the water.

The lifeguards were dumbfounded.

What the hell?

They still had to go down to get people.

If he was a little later, he would really be seriously injured and run out of oxygen. Then, he would really have to search for corpses.

but now, they realized that they were completely powerless. these white-fin dolphins were too strong in the water.

they were forced to rise to the surface.

they could only look at each other helplessly in the water.

Some people even waved their hands helplessly, indicating that they had no choice.

On the boat on the water, the others were also waiting for the rescue. They were waiting to perform simple treatment.

However, at this moment, they saw ripples appear on the surface of the water. Someone was about to surface.

"So fast?" one of them said in surprise.

"I just got into the water. It shouldn't be." Another person said.

The others also looked at each other.

Those lifeguards had just gone down, and it was impossible for them to come back and waste time. They were not that unprofessional.

after all, it was a race against time to rescue underwater.

It would be understandable if only one person had a problem with the equipment, but now, it wasn't just one person. Everyone had come up.

huala!

Huala!

The sound of water splashing could be heard.

The lifeguards rose to the surface one by one.

The commander on the ship was about to curse.

Wasn't this delaying the rescue?

But before they could curse, they were shocked to find that there was something under the lifeguards' butts.

Following that, the White-fin dolphins were happily calling out as they pushed the lifeguards to the surface.

Everyone was stunned.

They all knew that the White-fin Dolphin would save people.

The White-fin dolphins seemed to have rescued the lifeguards from the water?

this kasaya

on the shore in the distance.

Chen Li and Qi Kaiyou were also looking at the rescue scene. The scene that happened in front of them made them open their mouths.

Who could have predicted the situation in front of them?

But how was he going to save ma da Lin?

At this moment, everyone was surprised to see another figure emerge from the water. It was ma da Lin, who was wearing a diving suit.

a white-fin dolphin could be seen carrying him out of the water.

This scene surprised everyone, but they also heaved a sigh of relief.

It was good that he was saved.

The White-fin Dolphin was obviously very smart. It dragged MA Dalin to the side of a boat, as if it was going to hand him over to the people on the boat.

The rescue commander was even more surprised, and quickly got someone to pull MA Dalin onto the boat.

following that, he was surprised to find that the white-fin dolphin was staring at him with its eyes wide open. its stupid and cute appearance made him reach out to touch it.

Due to its human nature, the White-fin Dolphin was very cooperative and actually took the initiative to stretch out its head. This caused the rescue commander to like this little fellow.

[Chapter 1259 A Terrifying Number! There's No Future For Lifeguards! 2](#)

After a while, the White-fin Dolphin also swam away and started playing with its other white-fin dolphin friends.

The rescue commander looked at the White-fin dolphins and suddenly fell into deep thought. With these white-fin dolphins, would the rescue team still be of any use on Min River?

These guys seemed to be faster and more professional than them in saving people.

More importantly, Min River not only had white-fin dolphins, but also Atlantic sturgeons.

Should I? Consider switching careers?

wasn't the county hiring a water caretaker for the nature reserve? in the future, he would have to take care of these extinct fish.

When MA Dalin was rescued, Qi Kaiyou and Chen Li, who were on the shore, also heaved a sigh of relief.

In their country, no matter what they were doing, official or unofficial, once a life was lost, it was a very bad thing.

"Yi!" Chen Li suddenly looked at the screen in bewilderment.

qi kaiyou was also attracted to it.

In the video, white-fin dolphins appeared on the surface of the sea one after another, and their numbers kept increasing.

At the center of the river, the rescue team was already dumbfounded.

Because more and more white-fin dolphins appeared around them. The number was astonishing, and they couldn't even count how many words they had.

"how can there be so many?" A lifeguard exclaimed as he looked at the densely packed white-fin dolphins.

Fortunately, it was a white-fin Dolphin, and he still had the mood to touch the few that were close. If it was a shark, the consequences would be unimaginable.

"Are these really extinct fish?" The other lifeguard couldn't believe it either.

What kind of extinct fish could appear in such a group?

It seemed like this was the first time these white-fin dolphins had seen such a vast River, and it was their first time seeing such a boundless scenery. They were also very excited, and their cries resounded.

there were even some white-fin dolphins that formed groups and started to fish across the river surface, forming a rainbow-like arc in the air before falling back into the water.

And the group of white-fin dolphins seemed to have really become a rainbow, so dazzling, so shocking.

The lifeguards on the boat and in the water all watched this scene quietly with their mouths wide open.

On the shore in the distance, Qi Kaiyou and Chen Li saw this scene through the footage taken by the rescue team. Even though they were only watching the video from the equipment, they were still shocked.

"why are there so many?" Chen Li muttered.

" it must have come from the underground river. after the climate change in you city, the ones that came out before should be near the connection point. now, these are coming from other places in the underground river. let's go and take a look. " Qi Kaiyou's face was filled with excitement. His guess could be said to have been completely confirmed.

he hurried to the boat on the shore and urged, " "Quickly take me to the center of the river."

After Chen Li had also boarded the ship, the ship also quickly sailed toward the river.

However, before they could travel far, Qi Kaiyou and Chen Li realized that the ship had stopped.

This was because many white-fin dolphins had surrounded them. Their heads poked out of the water, and their round eyes were staring at them.

qi kaiyou was completely excited when he saw these white-fin dolphins.

As an expert in this field, he had a natural love for these extinct animals. Otherwise, he wouldn't have been working on the protection of rare animals for his entire life.

Seeing the White-fin dolphins, which had been extinct for more than 30 years, appear in such large numbers, he could not help but take off his clothes and jump into the water.

Immediately, a white-fin Dolphin swam up. It obviously thought that someone had fallen into the water and carried Qi Kaiyou up.

"Good girl, hahaha!" Qi Kaiyou happily touched the White-fin Dolphin.

the white-fin dolphin also called out affectionately, as if in response. then, it happily wagged its tail.

Since the White-fin Dolphin was close to humans, as long as humans had a kind heart, they would be in perfect harmony with nature.

When Chen Li saw this scene, he wanted to try riding on the White-scaled pufferfish.

this thought made him realize that he had to apply to sun county to strengthen the security of the nature reserve.

Not to mention other things, after he got this position, his self-control was still very strong.

at this moment, seeing this harmonious and happy scene, even they had such thoughts. it was needless to say that ordinary people might want to deliberately go into the water and ride these white-fin dolphins.

It would be fine if they didn't have bad intentions, but if they had bad intentions, it would be very troublesome.

Moreover, if they didn't strengthen the defenses, there would be a second, a third, and countless others. That would definitely be a big problem.

It was also at this moment that a cry of surprise rang out again, "

" there's still a lot of them underwater. it's atlantic sturgeons! "

these are atlantic sturgeons! "

"There's a lot of Atlantic sturgeons too."

"....."

As expected, many more figures emerged from the water. They were still white figures with long, sharp beaks. What else could they be if not Atlantic sturgeons?

Moreover, the number of these Atlantic sturgeons was no less than that of the White-fin dolphins.

The two national treasure fish were intertwined together, forming the most beautiful and spectacular scenery.

on the ship, the rescue commander looked at the dense group of new atlantic sturgeons and fell into deep thought again.

he remembered that these atlantic sturgeons would save people too.

as he thought about it, he jumped into the water. in that instant, he saw the white-fin dolphins and white sturgeons all around him swimming towards him.

After the closest one picked him up, the others stopped and swam around the boat again.

The rescue commander looked at the remaining Bai Xun and was even more determined. The min River Rescue team in you city definitely had no future.

chen li did not go into the water, but his mind was already filled with thoughts about the nature reserve.

Even if Min river's you city tributary became a protected area, the number of white-fin dolphins and Atlantic sturgeons would always be limited.

After all, it was too little for the entire you city Min River Branch. Even if they came to the nature reserve, they might not be able to see it.

There was one place that could be seen, and that was the viewing area of Linlin villa's pontoon.

However, that was only possible when they entered Linlin villa. The number of visitors that Linlin villa's floating bridge viewing area could receive was limited.

Therefore, without these fish, the attraction of the nature reserve for tourism was limited.

But now that there were so many sturgeons and white-fin dolphins, it was different.

one had to know that these were only the ones that appeared on the surface of the river. who knew how many more there were in the river?

Therefore, even if you were driving on the road, you would be able to see the White-fin dolphin jumping from time to time through the window, right?

How beautiful would that be?

As Chen Li was thinking about the beautiful scene, the White-fin dolphins and Atlantic sturgeons also slowly dispersed in all directions.

Ma da Lin was also brought to the shore by the lifeguards.

With the diving suit's obstruction, he was fine. He was just knocked out by a few white-fin dolphins.

After waking up, he could still jump around without his diving suit.

To be on the safe side, Chen Li arranged for someone to take him to you City Hospital for an examination. He was only relieved after confirming that he was indeed fine.

the appearance of such a large number of atlantic sturgeons and atlantic pufferfish was a pleasant surprise, and at the same time, qi kaiyou was even more certain that that was the location where min river connected to the underground river.

therefore, the exploration had to continue. they had to find out what the underground river was like.

The next day.

Thus, Qi Kaiyou reorganized his team to carry out the exploration.

Ma da Lin was still in charge of diving. After all, this kind of exploration required professional knowledge in addition to diving.

after a day of rest, ma da lin was also fine.

He couldn't possibly be knocked unconscious by a group of white-fin dolphins again today, right?

When they reached the center of the river again, there were still many Atlantic sturgeons and Atlantic pufferfish swimming around. When the ship arrived, they swam over. Their human-friendly nature made them simple-minded, and they were not afraid that the ship was carrying bad people.

After MA Dalin had made all the necessary preparations, he jumped into the water and dived down.

On the shore, Qi Kaiyou and Chen Li were still watching through the images transmitted by their equipment.

however, before ma dalin could dive too deep, a few alabaster pufferfish and atlantic sturgeons swam towards him.

these guys felt like they were coming in full force.

A moment later, a white-fin Dolphin appeared below him and carried him to the surface of the water.

" ? ? ? "MA Dalin was stunned.

he wanted to go down, not up!

[Chapter 1260 566-Sent Back Again! Thoroughly Investigated! 1](#)

A moment later, ma da Lin's figure appeared on the surface of the water.

The White-fin Dolphin he was riding on even let out a cheerful cry, as if it was greeting him.

"Thank you, Wanwan, thank you!" MA Dalin awkwardly touched the White-fin Dolphin's head.

The others also looked at this scene in shock.

qi kaiyou and chen li looked at each other as they watched the scene through the equipment screen.

this was awkward!

MA Dalin jumped into the water from the White-fin Dolphin and went back into the water. He sank to the bottom of the river and continued to complete his task.

But this time, he still didn't dive too deep before a few more white-fin dolphins swam towards him.

He seemed to have realized what they were doing, and he quickly dove down with all his might.

Don't let them catch up to you, or you'll be sent up again.

However, he had forgotten that he was in the water.

How could his speed be faster than a big fellow like the White-fin Dolphin?

He felt a wave of water and his body rose to the surface again.

Another white-fin Dolphin appeared beneath him.

After a while, MA Darlin appeared on the surface of the water again. The White-fin Dolphin was still happily calling out, its tail wagging in the water.

They had an affinity with humans, and this act of saving people was clearly their pleasure.

This was what Ma da Lin had to suffer for.

Diving required a lot of effort. If he kept doing this, how was he going to complete the mission?

as ma da lin was feeling vexed, he was also observing the few atlantic sturgeons and atlantic pufferfish around him. while they were not paying attention, he dove into the water again and quickly dove down.

The White-fin dolphins and the Sturgeon above did not notice him this time.

This made him happy.

However, the next moment, he saw a few white-fin dolphins swimming up from below. After discovering him, they quickly swam towards him.

"f * ck, f * ck, f * ck, don't come over!" ma da lin immediately wailed.

however, sometimes, screaming was useless. the more you screamed, the more excited you became.

the few white-fin dolphins were like that. they swam even faster, and after a while, ma dalin's body was once again carried to the surface of the water.

After being 'rescued' once again, MA Dalin was completely disheveled. He sat on the White-fin Dolphin and did not want to move.

"Mr. Qi, Chen Xian, we can't do this anymore." ma da lin sighed as he reported.

"Bi an" Qi Kaiyou.

"Bi an" Chen Li.

On the shore, the two of them looked at the scene in silence.

Who would have thought that such a scene would happen?

"What do we do now?" Someone asked.

Qi Kaiyou remained silent.

yeah.

What should he do now?

With these white-fin dolphins and Atlantic sturgeons here, their plan to enter the underground river through this place would not work.

If they went down, they would be sent back up, and they couldn't do anything to these Atlantic sturgeons and Atlantic pufferfish.

"ai." Qi Kaiyou sighed heavily and said, "Let's find another place, there's no way around here."

Chen Li was only in charge of leading the rescue team to assist.

He didn't need to worry about finding a new place to enter the underground river.

therefore, when qi kaiyou and the others left to find the connection to the underground river again, he also called some people from the county.

These people drove two cars. After they got down, they moved some equipment and began to assemble them.

these were naturally the equipment for the live broadcast.

Many cities were now using live broadcasts to promote themselves.

He was thinking if he could use this as a reference.

He planned to get a set of live broadcast equipment to broadcast extinct fish such as the whitefin Dolphin and Atlantic sturgeon to promote the nature reserve, which would be a great help for future nature Reserve tourism.

In the past, there had been very few Atlantic sturgeons and Atlantic pufferfish, but it was different now. There were so many of them, and if anyone went on the live broadcast, many Atlantic pufferfish and Atlantic pufferfish would crowd around. The live broadcast would definitely be very effective.

He even wondered if there was a way to leave some of the sturgeons and white-fin dolphins in one place, and then build a pontoon bridge like Linlin Manor, or some other ornamental bridge.

This way, tourists would have a fixed place to admire these national treasures.

naturally, in this case, many things had to be very important and very detailed.

i don't want anything to happen to these atlantic sturgeons and atlantic pufferfish.

Since he was in charge of this matter, he had to do everything he could.

After the live broadcast equipment was set up, Chen Li got someone to open the official account of a certain yinyou city.

Nowadays, many cities or government departments had an official account in Songshan. One had to admit that Songshan was the best platform for some departments to publicize land acquisition. It was also the best platform for many cities to publicize themselves.

Chen Li also got someone to change the title of the live broadcast room to: "You Cheng will show you the National treasure!"

you city's official account had a lot of fans.

Ever since Chen Li's first livestream of bringing goods, the goods he prepared were instantly hit the hot search with a dumbfounded look on his face. You city's official account had received a lot of attention.

Back then, Chen Li was still the director of the tourism Bureau. He had also been popular for a period of time.

In particular, Chen Li's dumbfounded expression when he shouted that the goods on the shelf were all sold out had become an expression package for a while and would occasionally appear on the internet now.

After that, Linlin villa's publicity would always carry the words " you Cheng. in addition, you Cheng's traffic problems had been criticized by netizens time and time again, so the number of followers on the official account had also been increasing.

there were at least tens of millions of fans.

In addition, in order for mouyin to stand on the right side, as long as these official livestreams didn't violate any rules, the traffic would be increased.

Therefore, after you city's official account started its live broadcast, it started to be pushed.
