

## The Game 1261

### [Chapter 1261 566-Sent Back Again And Again! Thoroughly Investigated](#)

min province.

In the center of the Cultural Center, two girls with good figures walked out in tight yoga suits after working out.

Because she had a good figure, she attracted the attention of many men.

especially when they were drenched in sweat, the position of their \*\*\* was displayed. it was really awkward.

This was also the reason why it was said that women who wore yoga suits to climb the mountain were not to be accepted. They did not care about showing their \*\*\*\* in such a way, so they were probably very open.

Naturally, no one knew if this was absolute. How could a person be judged only by the way they dressed?

was it a crime for a woman to wear skimpily?

The two girls enjoyed this kind of attention. After all, women looked for the one they liked.

they trained so hard every day, wasn't it to make men more lustful when they were doing it?

The two girls entered a milk tea shop, ordered some food, sat down, and took out their phones to watch the live broadcast.

Nowadays Short Video were an indispensable part of everyone's life.

this was especially true when there was a lot of data traffic. the system would recommend whatever video you liked to watch.

Therefore, there was a saying that if you took out a person's phone and scrolled through 10 videos, you would roughly know who the person was.

If all 10 videos were about food, then this person must be a foodie.

if most of the 10 videos were learning videos, it meant that he was a studious and knowledgeable person.

if these 10 videos were all about young ladies wearing skimpily, then there was no doubt that this person was definitely not right.

After a girl watched a few fitness videos, she saw a live broadcast facing the river.

"you're so annoying. why do you keep pushing me fishing videos?" the girl was a little annoyed.

She liked to watch videos of successful young people, okay?

She was catching a Golden Turtle, not a fish.

Just as she was about to delete the video, she suddenly stopped and looked at the title of the live broadcast room in surprise: "You Cheng will show you the National treasure!"

what was going on?

she knew you cheng.

because she had been to you city, mainly to linlin villa many times, and more importantly, the first time she went to linlin villa, her boyfriend ate okra and was wonderful.

therefore, every time she had a boyfriend, she would ask him to eat the okra at linlin manor.

She also thought of something when she saw the National treasure.

those were the atlantic sturgeon and the alabaster pufferfish.

She remembered that the climate change in you city had attracted extinct Atlantic sturgeons and Atlantic pufferfish from some underground river.

she had also seen the relevant videos.

this piqued her interest and she said to her best friend, " xiaoxiao, come and watch you cheng's live broadcast. they seem to be broadcasting the atlantic sturgeon and atlantic dolphin. "

The woman called Xiaoxiao immediately came over and looked at it.

She also knew about the Atlantic sturgeon and the Atlantic dolphin.

there were still many people who went to you city to see the sturgeon and white-fin dolphin.

However, the number of these extinct national treasures was very small and rare.

there was even a small internet celebrity who was camping at the minjiang you city tributary for a live broadcast, but he did not see a single atlantic sturgeon or atlantic pufferfish for a long time.

After all, Min river's you city tributary was too big.

He didn't know how long it would take for you city's official livestream to see the Atlantic sturgeons and Atlantic pufferfish.

Just as the two women had this thought, they were surprised to see an incredible scene.

In the live broadcast, as the ship moved forward, Atlantic sturgeons and Atlantic pufferfish emerged from the water one after another, and the numbers were shocking.

The two besties subconsciously started counting.

"One, two, three crickets"

"31、 32、 35....."

" i can't count it. there are too many. "

the two women were shocked. didn't they say that you city didn't have many national treasure fish?

This was not much?

the other viewers in the live broadcast room were also surprised.

they had all seen the news video of the atlantic sturgeon and the alabaster pufferfish, but this was also the first time they had seen such a large number of them.

at this moment, the livestream cut in. a hand reached out to one of the white-fin dolphins, but the white-fin dolphin quickly swam over as if it had been summoned. it even took the initiative to rub its head against the palm of the hand.

furthermore, that camera even specially gave a close-up of this bai xun's rolling eyes.

That cute look was very cute, and it was as if she was acting coquettishly.

This was due to the White-fin Dolphin's +2 attribute of acting cute.

That scene was so cute that it could melt anyone's heart.

The two women, Xiao-Xiao, even shouted, "

" it's so cute. it's a national treasure indeed! "

" yes, they're so intelligent. xiaoxiao, let's go to you city to see them, okay? "

okay, hurry and buy a ticket. I can't take it anymore. A fish is so good at acting cute. Are all national treasures acting cute? "

I think this fish is even cuter than a Panda. It's so cute that it's directly in my heart.

while the two women were discussing in surprise, they looked at the live broadcast room and their eyes suddenly widened.

A shocking scene appeared on the live broadcast screen.

Suddenly, a dense flock of white-fin dolphins emerged from the surface of the water. They left the water and rose high into the air, then drew an arc in the air and gracefully fell into the water.

It was impossible to tell how many white-fin dolphins there were, but there were probably dozens of them.

how shocking was the scene of dozens of two-meter-long white-fin dolphins jumping on the water's surface?

the two women opened their mouths in a daze.

they had never seen such a shocking scene.

He had never seen such a thing before, not even in television or movies.

Not only the two women, but many viewers in the live stream were also shocked by this scene.

[Chapter 1262 566-Sent Back Again Again! Thoroughly Investigated! 3](#)

f \* ck, that's awesome. I felt like they were flying at that moment!

there's a f \* cking Dragon Gate here, and that's a group of people jumping through the Dragon Gate. I can only say that it's too shocking.

not only can these white-fin dolphins act cute, but they can also create such a shocking scene. I feel that this scene can be one of the world's miracles.

I've decided to go to you city. I'll be more shocked to see it with my own eyes.

"Go, I'll also buy a ticket to you city immediately."

"....."

You city.

chen li had been watching the livestream and saw the comments saying that they wanted to come to you city. he smiled, which showed that the livestream was very effective.

Sure enough, from the next day, tourists who came specifically for the Atlantic sturgeon and the Alabaster pufferfish arrived at you city.

The first thing these tourists did when they arrived was not to go to the famous Linlin Mountain Villa or Linlin Manor, but to drive along the you city highway. Then, they found a place to park the car by the side of the road and began to squat and observe the Atlantic sturgeon and the Atlantic dolphin.

Moreover, as more and more Atlantic sturgeons and Atlantic pufferfish emerged from the underground river, most of the tourists could find them anywhere.

therefore, you city's road was a wonder every day. along the way, cars lined up like a long dragon, and people with mobile phones, cameras, and video cameras were everywhere.

if they were lucky enough to see the white-fin dolphins swimming in groups, they would let out a burst of enthusiastic cheers.

this situation continued for a week and finally became normal.

during this period, there were also many tourists who accidentally fell into the water. it was unknown whether they really fell into the water or not, but these people were all rescued by the atlantic sturgeons and atlantic pufferfish.

The video of the White-fin Dolphin and the White-sturgebeest saving the others also went viral on the internet. In just a short month, the status of the White-fin Dolphin and the White-sturgebeest in you city had completely surpassed that of the giant panda.

However, the Atlantic sturgeons and Atlantic pufferfish's habit of saving people was a pain in the ass for Qi Kaiyou and MA Dalin, especially MA Dalin. Every time Qi Kaiyou and the other experts found a new point of contact, there would be many Atlantic pufferfish and Atlantic pufferfish nearby.

as soon as he entered the water, these atlantic sturgeons and atlantic pufferfish would send him back. they would send him back into the water again and again. repeating this process was really tiring.

In another remote area of the min river's you City branch, Qi Kaiyou and the others frowned as they looked at the river.

in a moment, ma dalin appeared on the surface of the river, carried by a white-fin dolphin.

"how are they? how many are there?" ma dalin climbed onto a boat weakly.

qi kaiyou immediately looked at the person beside him. that person immediately said, " "There are 35 of them."

" yes. " qi kaiyou nodded and immediately ordered, " follow the plan. everyone, move out. "

Then, one person called out to 35 people and shouted, " "All of you, jump down."

These people also jumped into the river in unison. At that moment, the Atlantic sturgeon and Atlantic pufferfish in the river swam towards these people one after another. Everyone was carried up by One Atlantic pufferfish and Atlantic pufferfish.

ma da lin did not hesitate. in that instant, he suddenly dove into the water and quickly dove to the bottom of the river.

this was their last resort. as long as these atlantic sturgeons and atlantic pufferfish were carrying people, they wouldn't be looking for him.

This time, there was finally no longer any Atlantic sturgeon or Atlantic dolphin to send him back.

Very quickly, MA Dalin had reached the bottom of the river. He saw a crack. This was the passage that connected to the underground river. At this moment, MA Dalin felt movement behind him. He saw a white-fin dolphin swimming towards him.

"F \* ck!" The motor was so shocked that it quickly drilled into the crack and swam quickly.

However, after entering the rift, he felt that there was a force that was pushing him to swim.

It was the White-fin Dolphin.

shua shua. ma da Lin opened his mouth. Furthermore, this white-fin Dolphin was moving too quickly in the water, and he was about to lose his sight.

After an unknown amount of time, he felt himself being sent out of the water with a splash.

but this time, it was obviously different.

" oh my god! " ma da lin exclaimed as he looked around.

With the help of the searchlight equipment, a huge winding riverbed appeared in front of him. It was a sealed space with rock structures all around and at the top.

He finally understood. This was an underground river.

At this moment, he heard Qi Kaiyou's excited voice, " " i found it. i've finally found the underground river. "

The other party had been looking at the images captured by the equipment on ma da Lin's body.

Finding the underground river also meant that their guess was completely correct.

You city did have an underground river. The White sturgeons and white-fin pufferfish lived here. Due to the atmospheric influence of the meteorite and the climate change caused by the purification grass, these white-fin pufferfish and white-fin pufferfish were attracted to you city's min River.

everything now made sense.

The reason was finally clear.

Qi Kaiyou immediately urged again. quick, quickly find an entrance that leads outside. We have to enter as soon as possible to take photos and collect evidence. Then, we'll send out this conclusion and share this good news with everyone.

Very quickly, ma da Lin found an entrance that led to the outside. It was a very thin crack in the mountain.

qi kaiyou brought the experts into the underground river immediately and explored the area along the river.

In the next half a month, they found all the entrances, including the cave that Qin Lin had entered. Then, they drew a map of the underground river.

What shocked them was that the underground river of you city was very wide and had many branches. It covered most of you city's River Basin. It could be said to be very large.

However, what puzzled Qi Kaiyou and the others was why the people from you city's water benefits Bureau had never discovered such a large underground river.

he could only say that you city was good as a whole, but some departments were useless.

such a large underground river would be very beneficial to the overall environment of you city.

as long as the people from the water resources bureau paid a little attention, they would be able to find the underground river even with their eyes closed. he should tell you city about this.

After all, the Atlantic sturgeon, Atlantic dolphin, and those extinct fish were all in you city's River Basin. This Department was useless. How could he be at ease?

Naturally, after Qi Kaiyou drew the river Meridian of you city's underground river, he also summarized the conclusion as quickly as possible. He wanted everyone to know the reason for the appearance of the Atlantic sturgeon and the Atlantic dolphin.

In other words, all of this had nothing to do with Qin Lin, and no one would think that a cheat had taken these national treasures out of the game.

this was because the truth had already been thoroughly investigated by experts like qi kaiyou.

[Chapter 1263 Science Fiction Story Of You City's Miracle! Li Kai's Big Pot From The Sky! 1](#)

in the office.

Qin Lin had just completed his daily mission in the game when Li Kai arrived. As soon as he entered, he said, "Brother Qin, Qi Kaiyou and the other experts are going to hold a public announcement meeting today, right?"

"Right?" Qin Lin said with a smile.

Qi Kaiyou and the other experts had already investigated the matter thoroughly and had even made a preliminary written announcement.

Now, the changes in you city would basically have nothing to do with him.

this was the result he wanted to see.

as for the public announcement, it was a normal process after the results of the research were out.

Qi Kaiyou and the other experts would be stationed in you city to study the Atlantic sturgeon and the White-fin Dolphin. Therefore, the public announcement would be held in you city.

...

You city.

Chen Li had long since arrived at sun Xian's office.

Both of them were frowning as they waited for someone.

The other party was the person in charge of you city's water conservancy.

At this stage, you city's national treasure fish Nature Reserve was their top priority, and they had put most of their power in this area.

with the discovery of the underground river, more and more atlantic sturgeons and atlantic pufferfish would appear. the nature reserve would have a greater impact on you city, and it would bring more and more benefits.

this could be seen from the current grand situation of the highway at the min river tributary of you city.

At the very least, in addition to Linlin villa and Linlin Ranch, you city could have one more classic scenic spot that belonged to the government.

However, after Qi Kaiyou and the other experts had conducted a series of investigations into the underground river, the information they had been given and the things they had described made them very unhappy. They even felt embarrassed and ashamed.

a moment later.

A middle-aged man walked in dejectedly, "Sun Xian, Chen Xian!"

he was the person in charge of you city's water conservancy.

he had never thought that big trouble would suddenly befall him, and he was completely caught off guard.

Most importantly, he was the person in charge of the irrigation project this year. The previous person in charge had retired, and he had little to do with the previous events.

this was f \* cking painful.

it was as if he had been thrown into a pot by someone.

Chen Li asked directly, "have you all figured out what happened?" It's been so many years. With such a large underground river network, the rivers and the min River branches of you city should have changed frequently. Why haven't we found anything about the irrigation system?"

The middle-aged man's expression was unsightly. I went back and checked the past records. The irrigation Department did a test in this area, but through the records, there was no discovery at all. This is very strange.

"Is it very wrong, or are the people in the water conservancy Bureau all useless? or maybe he didn't do it at all, and just jotted down notes to deal with people?"

those experts discovered the underground river not long after they arrived. You guys didn't even notice it in your own place.

" even if you guys did something, you city would have discovered this underground river long ago. there might already be extinct national treasures like the atlantic sturgeon and atlantic dolphin. "

Chen Li agreed with this statement.

If they had discovered it earlier, their you city would have already had extinct national treasures like the Atlantic sturgeon and Atlantic dolphin.

You city could take off and develop earlier. With boss Qin's appearance, the situation would definitely be better than it was now.

In that case, all aspects of you city's construction would go up a level.

However, the key was that the people in you city's Irrigation Department were not good at human affairs. Who knew how many of them were just wasting their time.

chen li thought about it and said to the middle-aged man, the nature reserve is the most important place in you city now. Go back and organize it immediately. Take care of those who don't do anything. Don't cause any more problems in the nature reserve. We can't afford to lose face.

The middle-aged man didn't dare to say anything in the face of the anger of the two leaders and left in a hurry.

He was purely taking the blame for his predecessor. It was simply an extreme injustice, and his subordinates would not have an easy time either.

He had just gone to the irrigation Department, while the others had been there the whole time. There was no reason for him to be the scapegoat.

if the leader said to reorganize, then they would do it well.

After the middle-aged man left, County sun asked, " the experts 'public announcement is about to start. Let's go!

"En!" Chen Li nodded.

You city's climate change, the appearance of the White-fin Dolphin and Atlantic sturgeon, the discovery of the underground river, these series of events were all very shocking and naturally had to be made public.

firstly, it was to tell everyone the truth, and secondly, it was the time for these experts to show their contributions and abilities to the public.

Qi Kaiyou and the other experts had already published their preliminary written descriptions of the results online.

However, the written description was naturally less formal than the public announcement and live broadcast. Moreover, the preliminary description was only a general idea and the detailed results were not shown.

The public announcement was held in a banquet hall of the Zhong min hotel, arranged by you city.

In addition to you Cheng's official account, Linlin Manor's official account was also broadcasting this public live broadcast, and they didn't restrict other media to broadcast it.

When Qi Kaiyou went to Linlin villa, Lin Lanzi asked Qin Lin about it.

Qin Lin naturally agreed without a second thought.

how could he not agree when someone was helping him to push the blame away perfectly?

Only a fool would not agree!

many people had already gathered in the banquet hall of the zhong min hotel. not only were there self-media bloggers, but there were also official media reporters.

They were all here for the results of Qi Kaiyou's investigation.

he looked at the title of the public announcement, 'miracle you city' public announcement.

[Chapter 1264 Science Fiction Story Of You City's Miracle! Li Kai's Big Pot From The Sky! 2](#)

That's right, it was miracle you Cheng.

the series of events that happened in you city could be said to be a miracle.

If such a miracle had happened in ancient times, it might have been regarded as a miracle. With climate change and the extinction of national treasures, it was difficult not to attract attention.

however, they knew that there were scientific reasons for this.

Now, after the experts 'investigation, they could use scientific reasons to tell them why.

The livestream had already started. Before the experts like Qi Kaiyou came out, the number of viewers in the various media's livestream rooms was already very high.

Finally, Qi Kaiyou, dressed in a formal suit, walked out with a few experts, looking pleased with himself.

With such a major discovery in the investigation, it was hard for them to not be happy.

The series of miraculous changes in you city would definitely be written in the books on climate, water, underwater life, the extinction of fish, and many other things.

And this kind of related records would not be able to avoid people like them who had found out the truth.

In ancient times, this would have left a mark in history.

Qi Kaiyou was the person in charge and also the one who made the public announcement this time.

He solemnly walked to the report desk, looked at the cameras, and began to speak, " thank you, everyone, for participating in today's public announcement. I'm sure you've all been curious about the reasons for the series of changes in you city.

in most people's minds, you city's changes seem to only exist in science fiction movies because it's too sci-fi. Today, we're going to use science to tell everyone why.

"first of all, let's talk about the atlantic sturgeons and atlantic pufferfish. there were no records of the existence of these fish in the min river region, and these extinct fish also have migration habits.

according to the current deduction, these fish actually lived in the min river basin during the undeveloped period of science. later, due to environmental changes, they migrated into the underground river of you city to live better.

Hence, in the era of advanced science, these fish disappeared from Min River."

at this point, qi kaiyou paused for a moment before he continued, " " now, everyone should be curious about the fish's reappearance in you city. this is really a science fiction story. it's a science fiction story that involves the right time, place, and people.

"That's from a long time ago. A meteorite fell in you city a long time ago.

Meteorites fall from outer space, pass through the atmosphere, and crash into the ground. This process will cause climate changes to the Environment and Climate of that area."

"Then someone might want to ask, what does the meteorites from a long time ago have to do with the present? the effects were already there, you city's weather wouldn't have waited until now."

Indeed, after hearing Qi Kaiyou's words, not only were the people present confused, even the people watching the live broadcast were confused.

The expert named Qi Kaiyou probably said that everything that happened in you city was related to the meteorite.

But it had been so long, why?

qi kaiyou continued, " the reason is very simple. it's true that the meteorite fell a long time ago, but it doesn't necessarily cause a climate change when it hits. or, it might not completely cause a climate

change. if it was an incomplete climate change, it wouldn't have reached the critical point, and such a climate change wouldn't have occurred! "

that's why you city's atmosphere, environment, and climate have been affected by the meteorite all this time. We've found out that the weather and climate of you city have always been good, at least better than places like min province and Ming city.

"this is the" right time "in science fiction."

" next, we'll talk about the geographical advantage in this science fiction story. the geographical advantage is that underground river. as mentioned before, because of this underground river, the atlantic sturgeons and atlantic pufferfish can continue to exist. it's this underground river that protects these extinct national treasures. "

I'm sure everyone is even more confused now. Meteorites, underground rivers, the extinction of national treasures, and the climate change in you city, how can they be connected? "

This was another question.

It could be seen that Qi Kaiyou was very good at public speeches. When he stopped here, everyone's curiosity was piqued.

The viewers in the live broadcast room couldn't help but start to complain.

what's the difference between this and some heartless novel authors who stop writing and some tv series that will be seen next week?

'I know that everyone is curious, so why don't you just tell us quickly? what's with the suspense?'

After keeping everyone in suspense, Qi Kaiyou smiled and continued, " " the reason for linking all these together is also very simple. it's people. "

"everyone knows that you city has a linlin laboratory, and there's also a professor li kai in linlin laboratory. everyone calls him a real aristocratic child and everyone sees him as an idol.

He was even infatuated with the daughter of his beloved by researching an ingredient for the Sima drug, which made countless women infatuated with him. He was known as the ideal husband.

Recently, professor Li Kai also developed a new type of rice called the Linlin rice. This new rice has also achieved our goal of 'he Xia's cool dream'. "

"the person who caused the series of miraculous changes in you city is professor li kai. that's related to the purification grass he developed."

" i'm sure everyone knows about the purification grass. moreover, many people who have bought the purification grass know more about the magic of this thing. i believe that with the promotion, the purification grass will become an indispensable thing for all humans. "

you city is the first city to be transformed with purification grass in large quantities. Everyone knows the changes in you city's air quality.

it's precisely because the purification grass purifies the air and increases the oxygen content in the air. Over time, it has stimulated the atmosphere and changed the climate of you city, resulting in the current you city climate.

it's also because of the climate change in you city that extinct national treasures such as the Atlantic sturgeon and the Alabaster pufferfish were discovered in the underground river and began to migrate again. That's why you city's min River Branch is so prosperous now, and the miracle of you city today.

so, this person is professor Li Kai. We can't do without him. You Cheng's miracle can't be replicated. It's a combination of time, location, and people.

This time, the conclusion was out, and everyone understood.

It probably meant that the miracle in you city was caused by coincidences.

They also realized that professor Li Kai was the one who catalyzed all this.

The netizens immediately went into a heated discussion.

"I see. I didn't expect professor Li Kai to be the cause of the climate change in you city."

"so you're saying that without professor li kai, you city wouldn't exist?"

I've never felt like someone was amazing, but I feel like professor Li Kai is amazing.

do you think professor Li Kai already knew about this, so he specially cultivated the purification grass? otherwise, how could it be so coincidental? "

the person above has opened his mind, but why do I feel that this is also a possibility? "

"....."

for a moment, it was as if professor li kai had known everything and had specially cultivated the purification grass, causing you cheng to become like this.

people always liked to talk about amazing people who spread magical colors, especially when they were talking about people they admired and respected.

this might make professor li kai even more impressive.

Linlin Manor.

Qin Lin and Li Kai were making tea at the coffee table in the office. They were also watching Qi Kaiyou's public announcement live.

Li Kai was purely curious about the specific reason.

Qin Lin knew the reason, so he wanted to see how Qi Kaiyou would help him.

However, when he saw that old brother li was involved in the you city miracle, he was shocked.

He looked at Li Kai in a daze, wondering if this old brother li had taken the blame so much that he had the attribute of a scapegoat.

How could he be blamed for half of this?

As the person who knew everything behind the scenes, he didn't even know what to say.

Li Kai stood up in shock and anger, "What does this Gu have to do with me? How is it my fault? Can't you be more reasonable?"

He had never thought that he would be able to pay attention to himself after paying attention to this matter.

What the hell was this?

what was the difference between that and eating a melon?

### [Chapter 1265 There's A Big Problem! It Might Go Extinct Again \\_1](#)

The next day.

qin lin stopped paying attention to this matter after he realized that he would no longer be involved with the pot.

When he got up early in the morning and went to his office, li yueqiong came to report, "Chairman Qin, those female sea cucumbers have all laid eggs.

Previously, when he had brought out the special female sea cucumber during its spawning period from the game, li yueqiong had been scouted by Yang Dong. She was in charge of the sea cucumbers, and she had done a good job.

"they've all laid eggs?" When Qin Lin heard the news, he immediately followed li yueqiong out of the office.

When he arrived at the aquarium in the manor's Hall, he saw the eggs laid by the female sea cucumbers.

they were exactly the same as the eggs in the game, and there were many of them.

qin lin took the opportunity to touch the sea cucumber eggs in his hand, planning to bring them into the game to see the remarks.

"Chairman Qin, what should we do next?" there are so many sea cucumber eggs now, " li yueqiong said. this aquarium is far from enough.

she was obviously looking forward to it.

after all, yang dong, the manager, had told her that if there was a sea cucumber cultivation project, she would be in charge.

the person in charge of a project in linlin manor was definitely very promising. in terms of salary alone, he far exceeded the managers of those big international corporations.

"Go and get Yang Dong. We'll come to my office together later," Qin Lin said after some thought.

"Alright, Chairman Qin." li yueqiong's face immediately revealed a happy expression.

There were some things that did not need to be explained. She understood and immediately went to contact Yang Dong.

Qin Lin had the idea of cultivating the sea cucumber from the beginning.

after all, the sea cucumber had many attributes. putting aside the attributes of increasing physical strength, just the additional attributes of protein +2, concentrated sugar +2, kidney and essence enhancement +2, and yang-dream healing +2 were definitely a good product.

Moreover, it was at least beneficial to most of his male comrades.

This was especially true for the +2 attribute of healing yang dream \*.

This could save her male comrades 'happiness.

after all, according to relevant medical statistics, there were 140 million men in the country who might be sexually active.

this data was naturally the comprehensive statistics of the purchase records of various drugs in andrology departments of hospitals in various regions.

even if these 140 million men weren't yang, there was still something wrong.

So, what was the use of the sea cucumber?

Then, he returned to his office and brought the sea cucumber eggs into the game. He saw the note:

[ special sea cucumber egg: Grade 2 ]

[ this is a special type of sea cucumber egg that can be used to breed special sea cucumbers! ]

Qin Lin was relieved to see the note. It was no different from the previous one.

Not long after, Yang Dong and Li yueqiong arrived.

"Chairman Qin." Yang Dong greeted him respectfully the moment he arrived.

"chairman qin." Li yueqiong.

"Everyone, sit." Qin Lin stretched out his hand.

The two of them immediately took a chair each and sat down, quietly waiting for Qin Lin to speak.

Before coming to the office, Yang Dong had already talked to li yueqiong, and he had a rough idea that his boss was going to talk about the special sea cucumber project.

qin lin went straight to the point. " the eggs of those special sea cucumbers have all been laid. i'm planning to cultivate them on a large scale. yang dong, you're in charge of the breeding, so you'll be in charge of this. tell me, do you have any suggestions? "

Yang Dong was already prepared for this and immediately said, " Mr. Qin, I've already made preparations for the cultivation of sea cucumbers. I've researched a lot and made a plan. Shall I show you the plan first? "

He had the intention to take credit for this.

After all, when he first got li yueqiong to be in charge of the sea cucumber, he knew that there would be sea cucumbers to cultivate and had prepared the plan long ago.

Qin Lin was a little surprised to hear Yang Dong's words.

The other party had actually prepared the proposal so early.

As the boss, this was something to be happy about. This meant that Yang Dong had improved a lot. He had foresight and his ability had become stronger.

"Let's take a look," Qin Lin nodded.

"I'll send the proposal to President Qin's back end from the resort APP," Yang Dong said immediately.

Qin Lin nodded and logged into the Linlin Manor app. After a while, he saw an email from Yang Dong.

he opened it and saw that it was about the cultivation plan for sea cucumbers.

Marine cultivation required special water quality. The water quality of the Inland lakes was not good, and special seawater needed to be mixed.

Therefore, it was impossible to cultivate sea cucumbers in the reservoir.

Yang Dong chose a place with a thin River beside fairy tale mountain.

This River was a small tributary of the river that was flowing, and it was also the contracted area of Linlin Manor.

linlin villa had a lot of capital now. in case of an emergency, after contracting fairy tale mountain, they also contracted a very wide area around it.

the shape of the sea cucumber could be used to gather the water in this thin river and then mixed into special seawater.

yang dong's plan was very detailed.

Even if Qin Lin was not familiar with this aspect, he could easily understand it.

It also meant that this plan was not bad and was perfect.

This further proved that Yang Dong's ability had really improved.

After Qin Lin finished reading the plan, he nodded and said, " "Yang Dong, your plan is not bad. Let's do it according to your plan!"

"Alright, Chairman Qin." Yang Dong immediately nodded. He was naturally very happy to have been acknowledged. After that, he left with li yueqiong.

li yueqiong was just as excited. she knew that yang dong's promise was about to come true.

after the two of them left.

qin lin took out his phone and browsed the news.

the internet was extremely lively. news about you city was endless, and professor li kai was the most mentioned.

## [Chapter 1266 There's A Big Problem! It Might Go Extinct Again 2](#)

Anyway, more and more news videos were saying that professor Li Kai was the cause of the climate change in you city.

The headline party was like this.

Li Kai had also arrived at Linlin's laboratory early in the morning.

As soon as he arrived at the hall, he saw many researchers watching the news on a screen. They were in a heated discussion.

"I didn't expect professor Li Kai to be the cause of you city's climate change."

"do you think professor li kai really knew everything from the start, and that's why he cultivated the purification grass? "

"maybe it's possible? Professor Li Kai is so amazing."

"Yup!"

"....."

there was no lack of admiration for li kai in his words.

Li Kai heard the researchers' conversation and glared at the news on the TV. He wanted to express a quintessence of Chinese culture.

What the f \* ck, he really knew how to make up stories.

he walked silently to his laboratory and decided to go into seclusion to avoid any more blame.

He hoped that this matter would pass quickly.

Just as he was about to go through the security check and put his phone in the unified storage cabinet outside the laboratory, his phone rang. It was an unknown number.

This made him frown.

he really didn't want to answer the unknown number, but he was afraid that it might be someone with something important.

many research institutes had asked for his phone number and called him to ask him some questions.

Li Kai thought for a moment and answered.

A chuckling voice immediately came from the other side, "professor li kai? i'm the director, feng dagang. i'd like to adapt your story and make a movie.

Especially about the changes in you city, we will make it more like a science fiction movie. You already know that there was a meteorite in you city, and the climate characteristics of you city were discovered, hehe."

"Get lost!" When Li Kai heard director Feng's words, his face darkened to the extreme. He cursed and hung up the phone.

What the f \* ck!

for a director to have ideas about this matter, it clearly showed that the popularity of this matter had reached the extreme.

that was indeed the case.

Over the next few days, the internet was getting more and more heated about Li Kai, you city, and the underground river.

at the same time, countless people were attracted to you city.

this time, it wasn't because of the linlin manor or linlin ranch, but you city's own attraction.

However, with the addition of tourists from Linlin villa and Linlin Ranch, you city's traffic had collapsed again.

you city.

When Chen Li received the news that the traffic was on the verge of collapse, he immediately went to sun Xian's office. Then, the two of them looked at each other in dismay.

"Do we need to build another Ring Road?" sun Xian asked subconsciously.

" yes. " chen li nodded his head in confirmation. " it seems necessary for now, in case of emergency. "

"We're just a small county, but we've already built three outer rings," sun Xian said helplessly.

"Tsk." Chen Li was unable to answer.

Wasn't this a record that you Cheng had created?

in the following time, you city became the focus of the entire country, and qi kai, you, and the others also became famous.

The content of these experts could be seen in many programs and videos.

However, Qi Kaiyou and the others were really qualified to be called experts.

After the press conference, they once again devoted themselves to the research of the Atlantic sturgeon and Atlantic pufferfish, completely ignoring the praise on the internet.

They had directly transferred the most advanced equipment from Beijing to monitor the fish in various ways, such as locating, tracking, and categorizing them.

Not only did he have to observe the movements of extinct fish such as the Atlantic sturgeon and the Alabaster pufferfish, but he also had to record the overall ecological state of Min river's water and the water quality.

Countless tourists were attracted to you city. When they came to the shore to watch, they would see the busy figures of these experts from time to time.

However, more than a month later, Qi Kaiyou and those experts were sitting in a multimedia classroom with serious expressions, watching the videos being played one by one.

This video was taken by the equipment they had transferred from Beijing. It was recorded every day, and it recorded every situation in the min river's you city tributary.

However, with the monitoring of these instruments, they discovered a very serious and terrible situation.

Moreover, this situation might cause the Atlantic sturgeons and Atlantic pufferfish to go extinct again.

An expert said, " as everyone can see, starting from half a month ago, in the images taken by various instruments and equipment, the number of ordinary fish in Min River has decreased. It is especially so for the small fish schools. The number and species have both decreased.

These words made Qi Kaiyou and the other experts 'faces turn grave.

They knew the reason for this. It was because the Atlantic sturgeons, Atlantic pufferfish, and other extinct fish would eat other small fish.

The sudden influx of so many Atlantic sturgeons, Atlantic pufferfish, and those extinct fish had affected the ecology of the min River tributary.

The underwater ecosystem was so fragile. Otherwise, they would not be so afraid of the invasion of foreign species.

Now, the fish in the min River tributary had either been eaten or were threatened, and they had migrated instinctively.

This meant that the underwater ecosystem had been destroyed. They had not expected such a problem to occur. They had thought that the underground river's ecosystem and the min river's tributary's ecosystem would merge perfectly.

After all, the underground river could satisfy the survival needs of these Atlantic sturgeons, Atlantic pufferfish, and the other extinct fish.

even if you city had been releasing all sorts of seedlings, it would take time for them to grow.

It seemed like the young fish would become a delicious meal for the larger fish as soon as they were poured in.

This situation had to be resolved.

Otherwise, there wouldn't be any major problems in the short term, but it would be terrible in the long run. They had to make long-term preparations and plans.

West of Linlin Manor.

Qin Lin stopped the car. He could see that a large lake had been excavated here, and the lake was connected to a River.

The water in the lake was also formed by the flowing water of the river.

Around the lake and in the center, there were many special high-tech devices.

these devices could use a special method to convert the water in the lake into seawater, and the degree of the conversion could be adjusted.

many aquatic breeding industries already needed such equipment.

This was the place where sea cucumbers were cultivated.

Since he had started this project, and it was a special sea cucumber that he had taken out from the game, he naturally had to come and take a look.

When Yang Dong saw Qin Lin, he went up to him. "Chairman Qin, you're here."

Lee yueqiong was the first to follow. President Qin, the sea cucumber farm is almost done. In a few days, we will test the water quality. Once it meets the standard, we can put the sea cucumber eggs in for cultivation.

"En!" Qin Lin nodded and followed Lee yueqiong and Yang Dong to observe the entire farm. After spending some time to understand the equipment and the entire farm, they returned to the manor.

as soon as she arrived at the manor, she saw gao yaoyao running over in a hurry. she said anxiously, "boss, it's not good. there's a problem with the cucumbers you planted. many of the cucumbers that bear fruit are rotten."

"Let's go and take a look!" Qin Lin immediately understood that the Kappa's sacrificial cucumber had ripened.

When he had planted the cucumber, he had left the daily care to Gao Yaoyao.

Now, it was obvious that the Kappa number sacrificial cucumber had ripened, and it was not rotten as Gao Yaoyao had said.

That was because the cucumber was originally like that. It had an attribute of growth speed +1, so the cucumber grew faster than expected.

Qin Lin brought Gao Yaoyao to the place where they planted the Kappa tsahik cucumber. As expected, the Kappa tsahik was already covered with cucumbers. Unlike in the game, the cucumbers harvested in the game were all mature, so every one of them looked rotten.

In the real world, the Kappa worshipping cucumber was still hard before it ripened, but it would become soft after it ripened, as if it had rotted.

the moment gao yaoyao arrived, she grabbed a ripe cucumber and broke it in front of qin lin. "Boss, look, it's all rotten inside."

Qin Lin saw the cucumber's condition. It was exactly the same as in the game.

This was the only way the cucumber would be useful.

But how could he explain to Gao Yaoyao that the cucumber wasn't rotten, and that this was the only way to make the fish eat it?

"Shall we go to the man-made spring to take a look?" Qin Lin said.

Gao Yaoyao followed.

There were also two cucumber vines by the man-made spring.

Qin Lin went to the man-made spring. There were also many cucumbers growing on the two cucumber vines.

Looking at the ripe cucumbers, all he had to do was pick one naturally and throw it into the artificial spring for the ornamental fish to eat. Then, he would be surprised to find out the use of the cucumbers.

### [Chapter 1267 Cucumber Specially Made For Fish! Saint Mountain Goblin Gloves!](#)

When they arrived at the man-made spring, Gao Yaoyao also went to the two kappa sacrificial cucumbers.

She plucked one of the ripe cucumbers and pinched it. It was soft again.

She broke the cucumber again. The inside was still sticky, as if it had rotted.

"Boss, the cucumbers here are also rotten." Gao Yaoyao said immediately.

Qin Lin looked at the broken cucumber, thought for a moment, and said, "Yaoyao, this cucumber isn't rotten. This is the effect I wanted. Try throwing it into the man-made spring."

He was about to directly tell them the function of the cucumber.

With his current reputation, he was a plant geneticist. What was wrong with cultivating a special cucumber?

When he saw the Atlantic sturgeons and Atlantic pufferfish, he was the one who had specially cultivated these cucumbers. In the future, he would provide them to the viewing area of the pontoon and sell them to the tourists as food.

Isn't that reasonable?

Hearing her boss's words, Gao Yaoyao immediately looked confused.

Did the boss specialize in cultivating these rotten cucumbers?

How was he supposed to eat a rotten cucumber?

However, Gao Yaoyao still followed her boss's instructions and threw half a cucumber into the man-made spring.

because the cucumber was so sticky that it looked like it had rotted, it spread out and floated on the water's surface the moment it was thrown into the water.

A moment later, Gao Yaoyao saw a shocking scene.

The ornamental fish in the artificial spring seemed to be attracted by the delicious food. They all swam over and started to eat the half cucumber.

The cucumber had an attribute that aquatic creatures liked, and the ornamental fish were attracted to it. To them, the cucumber was the most delicious thing.

Gao Yaoyao was dumbfounded.

this was the first time she had seen fish eating cucumbers.

more importantly, these fish were actually eating so happily.

"Boss, are you specially cultivating this cucumber to feed the fish? is it for the viewing area on the floating bridge?" gao yaoyao immediately thought of something and said, "

"En!" Qin Lin saw that this girl was also thinking in this direction and immediately nodded to admit it.

This meant that Gao Yaoyao had also grown a lot. Once she knew the use of the cucumber, she immediately thought of the viewing area on the floating bridge.

As a manager, this was very important.

gao yaoyao, on the other hand, was full of admiration. " "Boss, you're amazing. You can even cultivate this cucumber into fish food."

She really admired her boss to the extreme.

She had been working at Linlin villa since the beginning. She had been here even before the boss auctioned the villa.

at that time, the villa was very small. she had watched the boss develop the villa step by step to its current scale.

Moreover, the boss was a genius as described on the internet. He could always come up with new and novel things from time to time. These things were not available in the outside world, or they were directly better than the same kind of things outside.

After a while, the whole cucumber was finished by the ornamental fish in the artificial spring.

Seeing this, Gao Yaoyao threw the remaining cucumber into the artificial spring as well.

In an instant, the ornamental fish swam over like crazy. They enjoyed the delicious food and continued to eat the cucumber.

boss, " Gao Yaoyao said joyfully, " they seem to like this kind of cucumber very much.

it's good that they like it. After all, it's a cucumber specially cultivated for fish. Yaoyao, " Qin Lin instructed with a smile, " help me look after these cucumbers. I'm going to keep the seeds and then cultivate them on a large scale.

"Okay, boss!" Gao Yaoyao nodded in response. Then, she asked expectantly, " "Boss, can I take a video of the cucumber? The scene of fish eating cucumber is so amazing."

She also had her own mouyin account, which was called Linlin villa-Yaoyao.

She had this account when the official account of the mountain villa was created, and she had attracted a lot of fans, close to two million.

He also shared his work at Linlin villa, livestreamed from time to time, and sold things from Linlin company. He did not just get a manager's salary.

In the eyes of countless ordinary people, she was actually a little rich woman.

At the same time, Lin Lanzi also had her own voice number, which also attracted a lot of fans. After all, she was a beautiful woman, and in a place like Linlin villa, she was naturally attractive.

The only difference was that Lin Lanzi had more fans. After all, she had a good figure and was pretty. In addition, she was now the General Manager of Linlin Manor. This position naturally had an additional attraction.

"Yes." Qin Lin didn't refuse this.

in any case, compared to the purification grass, plague medicine, and mutated rice, a cucumber specially made for fish was nothing.

"Thank you, boss!" Gao Yaoyao immediately thanked him.

Qin Lin also entered the hall and went back to his office.

Gao Yaoyao, on the other hand, took out her phone excitedly to take pictures of the cucumbers. She even plucked a new one and broke it open, revealing the rotten inside.

Gao Yaoyao continued, " "Today, I'm going to share with you guys something that little Qin cultivated."

...

after qin lin returned to his office, he locked the door and controlled his game character to go to the mountain path of the goddess mountain. then, he entered the game with a thought.

Since he was free today, he planned to continue exploring the goddess mountain.

Before this, he couldn't even get out of the ranch. If he wanted something, he could only trigger a plot quest or get something new by leveling up his character.

However, since he was able to leave the ranches and enter Mount goddesses, he had another way to obtain what he wanted.

[Chapter 1268 Cucumber Specially Made For Fish! Saint Mountain Goblin Gloves! 2](#)

He had obtained more than one item from the dwarf Valley.

During his exploration of the mountain, he had also found something like the temperature-maintaining grass.

He was even thinking that one day, he would be able to enter ore town and directly bring those processing machines into the real world. At that time, he would shock the world and create a new era, and cross over to another era!

and if they could enter ore town, could they buy a boat ticket like the gourmet and go outside?

The TV shopping was obviously from other cities, and there were even other versions of the story of the farm.

If he could find a manufacturer and directly buy the technology for the tear-resistant stockings, it would be a blessing to all men.

Qin Lin entered the game and once again felt the refreshing feeling of nature.

He took out the mithril axe from his backpack.

Previously, the dwarf ah ni had used two Mithril farm tools to exchange for the greenhouse tree design. Other than the hoe, he had also used this axe.

[ mithril axe: special ]

[ this is a special tool made by the dwarf craftsmen. it is very sharp and more efficient to cut down trees! ]

Qin Lin entered the forest and started exploring in a different direction.

When they saw bushes blocking their way, they waved their Mithril axes and cut the grass in front of them into two, revealing a path.

this time, qin lin did not discover anything special even after walking for half a day. this forest seemed to be different from the other directions he had explored before.

In the directions they had explored before, even the dwarf Valley, the forest was very tall and dense.

However, when he came over, he found that the trees around him were obviously shorter and slimmer than the trees in other directions. They even looked a little malnourished compared to the trees in other places.

perhaps it was because this place was against the sun, the trees there were shorter and weaker than those in the sun.

Qin Lin looked at the time and felt that half a day was almost up. He was about to go back the way he came when he heard movement in the grass.

He immediately looked over, trying to figure out where this animal came from.

This was not the first time he had seen such a scene.

But when he looked over, he was stunned.

Because a small figure had appeared from the grass.

Dwarves?

Qin Lin immediately denied this thought.

the dwarf's skin wasn't green, and he didn't have sharp ears.

"Ah, ah, ah, ah." The little figure actually let out a shriek when it saw him. It was so frightened that it immediately turned around and ran away. Moreover, its speed was extremely fast. It disappeared in the blink of an eye.

Qin Lin was stunned for a moment. He rushed forward, but the little figure was already gone.

this was surprising.

"Yi!" Qin Lin was surprised to find something on the ground. It seemed to be left behind by the little figure.

It looked like a glove with five fingers, but the fingers were very slender. It didn't look like it was used by humans or dwarves.

Qin Lin squatted down and picked up the gloves. He saw the remark:

[ Goblin's toy gloves: ice and snow fantasy! ]

[ this is a special glove. It is a fantasy toy created by the Goblin race with Goblin technology for Goblin children to play with. There is a small button on it. You can try to press it and it will create a surprising scene. ]

Qin Lin looked at the note in surprise.

Goblin?

He didn't expect this thing to appear.

Just like the dwarves, some versions of the story of ranches also had special creatures, such as the earth elves of Olive Town and the elves of the wind Valley.

This Goblin was also a dark-type creature from the story of the farm.

In the version he was playing, there was no goblin setting, right? This was due to an unforeseen system change. After entering the goddess mountain, he actually saw traces of gnomes.

Qin Lin looked at the remark and tried to press the small button on the glove. The next moment, to his surprise, a cold air shot out from the back of the glove and turned into a mist that quickly spread.

The spray spread out in a radius of more than ten meters.

Moreover, it was moving at a speed visible to the naked eye. After the mist spread out, a cold feeling appeared in the surroundings.

as the mist sprayed, snowflakes condensed in the air and fell like snowflakes.

Qin Lin was shocked to see this. It was like magic.

This was because the scene was too beautiful and attractive.

He was sure that not only children would like it, but girls would also like it very much.

If it was made into a toy, it would be very popular.

Perhaps there would be children wearing gloves and shouting at the sky, "Descend, power of ice and snow!"

Just thinking about it was enough to create a picture.

Qin Lin looked around again, but he did not find any trace of the Goblin. He returned to the mountain path in the game and logged out of the game with a thought.

He immediately took the Goblin's toy gloves and returned to the inner area, entering the workshop.

There was no blueprint for the Goblin glove, and he did not have the corresponding technology in the game, so he could not make it directly.

Therefore, he could only use the cracking method.

However, he was really not good at this. He could only take off the gloves and see what was going on.

The outer layer of the gloves did not require much technical skill. It was just used to cover the gloves. On the back of the gloves, there was a small tube connected to it. This was the channel for spraying mist.

There were several parts below, which were mainly embedded in the back of the hand and the wrist.

There was obviously a vacuum inside the wrist, and there was obviously some kind of liquid inside. The magical spray of snowflakes should be related to this liquid.

The structure of the parts had all been removed, but there were some things that he understood and some that he didn't. A few parts had nothing to do with plant genes, so he couldn't understand them at all.

However, he didn't have to figure it out himself. There were plenty of people in Linlin's laboratory.

If these internal parts were taken to the researchers to crack, the researchers would not think much about it, let alone know what they were used for.

Moreover, it was just a Goblin's toy. It didn't make sense that the researchers in Linlin's laboratory couldn't crack it.

Then, these people could all resign.

With that thought in mind, Qin Lin left the glove cover that might be exposed, then called Deng Guang. He took a few internal parts and left for Linlin's laboratory.

Deng Guang was already waiting for him when he arrived at the laboratory.

Nowadays, Linlin's laboratory's research Department covered a lot of scientific research. In addition to the research related to plant genes, many experts also had their own relevant research projects being carried out.

The internal structure of the Goblin glove must have involved some kind of technology. Therefore, Qin Lin asked Deng Guang to take him to the relevant research Laboratory as soon as he saw him.

When they arrived at a laboratory, Deng Guang made a phone call and more than ten researchers came in one after another.

"Chairman Qin, CEO Deng!"

"chairman qin wanwan"

"Chairman Qin Wanwan"

"....."

Qin Lin had never seen these researchers before, but obviously, they could recognize their boss, Qin Lin. After all, their boss was so famous.

"chairman qin, they're here. what can i do for you?" deng guang chimed in.

Qin Lin took out a few parts of the Goblin glove and said, " "i asked you guys to come over to help me crack these things."

After saying that, he placed the few items on the table and added, " "You guys just focus on cracking it. As for what this thing is, don't ask too much."

Deng Guang immediately understood what was going on. This must be a research product from another laboratory. He didn't know how Chairman Qin got it and now he was trying to crack it.

This kind of thing was very common between laboratories. As long as there was no patent and no success, once the laboratory's research was leaked, they could only suffer losses in secret.

Therefore, this was the importance of the laboratory's security.

Since Mr. Qin was able to crack this thing, there must be some kind of technology or material that he could use for experiments without patents or results.

He immediately ordered the researchers, " "professor wang, you can lead everyone to crack these things!"

Professor Wang and the others looked at each other and nodded.

### [Chapter 1269 This Cucumber Can Solve The Predicament](#)

Early in the morning, the sun rose and began to shine on the earth. It was a new day, full of vitality.

Lu Chengdong had woken up early in the morning.

As a college student, he was still very self-disciplined. Every morning, he would stay in bed for a while and watch some Short Video.

"yao yao just uploaded a new video." lu chengdong clicked on beicheng and received a notification to follow the update.

He immediately clicked on it.

As a Young University student, he had enough fantasies about women.

It was a pity that he was not handsome and his family was poor. It was still difficult for him to find a decent girlfriend in school.

in today's society, it was said that pure love was impossible even in high school. it could only be done in junior high.

Therefore, he often went out of school and saw some female students resolutely walking to the top of a car with mineral water, Wanglaoji, and red Bull. He felt that there was no hope in this world.

He even saw a female classmate he had pursued get on the bus with a bottle of Red Bull.

This female classmate would rather do that than be his girlfriend.

He was disappointed in reality, so he placed his focus on the internet. No matter how fake the internet was, sometimes it couldn't fool reality.

therefore, he paid attention to many female internet celebrities and often watched videos of different female internet celebrities entering the toilet. this was like choosing a concubine for him.

lin lin mountain villa's gao yaoyao was one of the people he paid attention to.

the moment he opened the video, he saw that sister yaoyao was picking cucumbers at the beginning.

Seeing such a frighteningly beautiful girl picking cucumbers, he began to feel a little dirty.

In the video, a voice sounded, "today, Yaoyao is going to share with everyone a good thing that little Qin cultivated. It's this cucumber."

These words attracted Lu Chengdong's attention.

he naturally knew little qin. there were not many people in the younger generation who did not know him. this person was not obvious, but he was more famous than many celebrities. he and professor li kai were known as the two heroes of linlin laboratory.

"Don't tell me that the thing that little Qin cultivated is this cucumber?" Lu Chengdong subconsciously thought, 'but other than eating, applying a mask, and using it for women's \*\*, what other special effects could it have?'

It was also at this moment that he saw sister Yaoyao breaking the cucumber in the video. The inside was sticky and it was obviously rotten.

"Did the car flip?" Lu Chengdong muttered to himself.

After all, the cucumber had already rotted to such an extent that it was impossible to eat it. It was also impossible to apply it on the face, and it was even more impossible to give it to a woman.

The next moment, the cucumber was thrown into the man-made hot spring.

Something that Lu Chengdong didn't expect happened. After the cucumber was thrown into the artificial hot spring, the fish inside actually rushed up and began to gnaw at the cucumber as if they were snatching something delicious.

the video started again. " everyone can see that this is the cucumber that little qin cultivated. it's specially made for fish. fish love to eat it. the key is that little qin just made it casually. after planting it, little qin didn't care about it anymore. "

Obviously, this was Gao Yaoyao's way of praising her boss, even though it was a fact.

Lu Chengdong was very surprised to see this.

He had a fish farm at home, so he knew about feeding the fish with cucumbers. The cucumbers had to be chopped into powder and added with some ingredients to make fish food.

Otherwise, he might not even be able to eat the cucumber and fish alone.

Moreover, that would be very troublesome and waste manpower.

The scene of him directly throwing the entire thing into the water, and the fish frantically swimming around to fight for food, was simply too incredible.

Indeed, such a scene was unbelievable to anyone who had raised fish before.

" f \* ck, little qin's casual cooking has made the fish like cucumbers. "

if I'm not mistaken, these fish are cucumber salad. Little Qin's cucumber salad is a little awesome.

" to cultivate cucumbers as fish food, little qin is really whimsical. "

"....."

Obviously, those who saw Gao Yaoyao's video were full of admiration and surprise.

however, an inharmonious voice soon appeared, "

there's a problem now. It's useless for fish to like to eat. If you want to raise the fish big and fat, you need a lot of the necessary nutrients.

that's right. Without enough nutrition, no matter how much fish likes to eat, it'll be like a child's gluttony of snacks. That will cause problems.

" yeah, raising fish like this will cause problems instead. "

These comments were actually all doubts.

this was interesting.

it seemed that someone was deliberately guiding them to let everyone know that the cucumbers were not nutritious and that the losses would be greater than the gains if they were fed to the fish.

.....

You city.

In a Multimedia Conference room.

Qi Kaiyou and the other experts had a grave expression on their faces.

The multimedia screen was still playing the surveillance images taken by high-tech equipment.

The situation of Min river's you City branch was even worse than before.

our guess is right. Something is going to happen, and it will happen faster than we thought.

none of us expected that there would be so many other extinct fish in the underground river. There were also groups of grass carps and black carp, each of which weighed more than 15 kilograms!

now I know why Linlin villa got those big Wild fish. They must have come from the underground river.

"What we should be thinking about now is how to solve this problem!" Qi Kaiyou sighed.

### [Chapter 1270 This Cucumber Can Solve A Predicament 2](#)

The other experts fell silent.

The ecosystem of the underground river and the tributary of the min River had not been integrated and replenished. Instead, the ecosystem had collapsed. This was a very small probability.

However, even the smallest of chances had happened.

They had to find a way to solve it.

It was just that after several of the plans they proposed were deduced, they found that they had no effect at all.

The only effective way was to pour enough fish food into Min River to reduce the situation of the big fish eating the small fish.

However, this could only delay the effects. After all, it would take a long time for the min river's tributary and the underground river's ecosystem to recover completely.

Moreover, in order to satisfy the needs of fish such as the Atlantic sturgeon and the Alabaster pufferfish, the quality of the fish food must not be low.

In the long run, this would require a terrifying amount of funds that he couldn't afford to spend.

therefore, this was a tricky problem.

The key was that everyone knew about you city's national treasure fish Nature Reserve, even abroad.

They had just had a public announcement and countless people on the internet were praising them.

If this ecosystem collapse completely broke out, the Atlantic sturgeons, Atlantic pufferfish, and the extinct fish species would be in trouble again. This would not be their honor, but a stain on their reputation.

The foreigners would probably mock and ridicule him.

At that time, they would probably be too ashamed to continue in this industry.  
at this moment.

An expert suddenly said, " I saw a piece of news on the internet today. It seems that little Qin from Linlin Manor has cultivated a kind of cucumber for fish. These cucumbers seem to be very popular with fish. Those ornamental fish are fighting to eat them. Maybe we can ask him about the situation.

Qi Kaiyou and the other experts looked over and understood what the expert meant.

If the cucumbers were popular with fish and the cost wasn't high, wouldn't they be able to solve their current predicament?

"Hurry up and show me the video!" Qi Kaiyou immediately said.

The expert nodded and projected his phone onto the multimedia screen.

The video was the one that Gao Yaoyao had posted.

The video started with her picking cucumbers.

When Qi Kaiyou and the other experts saw the ornamental fish rush up like crazy after the cucumber was thrown into the water, they knew something was wrong.

In that state, the fish seemed to have been hungry for many days, afraid that they would not be able to eat if they were slow.

The fish were obviously ornamental. In a place like Linlin Manor, it was impossible to starve these ornamental fish, let alone starve them for a few days just to shoot a video.

This was a very degrading thing for a place like Linlin Manor.

What's more, the thing that little Qin was researching, even if it was just a casual training and no longer cared about, was definitely not simple.

However, after watching the video, a few experts frowned.

someone on the internet seems to be leading negative comments about the cucumber's nutritional problems!

well, it should be the companies that sell fish food. They are afraid that the cucumber will affect them.

"After all, it's something that little Qin cultivated."

unfortunately, these tricks are too laughable. You can't steal things from Linlin's laboratory in this way.

"It seems that I have to pay a visit to Linlin Manor." Qi Kaiyou nodded and said.

he also knew that this kind of guidance was very ridiculous. as for whether the cucumber was effective or not, once linlin's laboratory made an announcement, who do you think the netizens would believe?

Therefore, the person who did this kind of thing was a little like a clown.

...

In the depths of the forest on Mount goddesses.

Qin Lin returned to the place where he found the Goblin.

He went up a tree and squatted there.

the goblin's discovery and the goblin's lost goblin gloves made him look forward to it.

In the version of the story of the farm, which had dark winds, these gnomes had some very useful things.

It was just like the toy gloves, which had such an amazing ice and snow effect.

Therefore, he was planning to wait for the rabbit to come out of the tree stump.

There was movement in a Bush.

Qin Lin immediately looked at the grass and jumped down.

In the next moment, a wild fox suddenly shot out of the grass and ran away in a panic.

Seeing this, Qin Lin sighed.

this time, it was clear that he would not gain anything.

After waiting for a while, he saw that waiting for an opportunity was useless, so he went back the same way he came. When he reached the mountain path in the game, he exited the game with a thought.

He was lucky to have met the gnomes last time, and it seemed like he would need luck to meet them again.

He exited the game and opened the office door.

as soon as qin lin walked into the living room, he saw chen li and qi kaiyou, the expert, walking into the manor.

"Boss Qin, sorry to disturb you again." Chen Li entered the main hall and spoke as soon as they met.

"Boss Qin," Qi Kaiyou also smiled and greeted him.

He had specifically asked Chen Li to come with him. The ecology of Min river's tributary was also closely related to you city.

Now that there was a problem, if they came to boss Qin to ask about the situation, you city's people would definitely have to help.

Otherwise, it would be really awkward for him to come here alone.

"Xian Chen," Qin Lin said with a smile, "I assume there's a reason why you've come here together?"

Chen Li nodded and went straight to the point. boss Qin, we do have something that we need your help with. Something has happened to the min river's you city tributary. We might need your help.

He was obviously very anxious.

min river's you city branch's atlantic sturgeon, atlantic dolphin, and other extinct fish were extremely beneficial to you city.

It could even greatly increase you city's status in the country. After all, you city was the only place that had these national treasures.
