

## The Game 1271

### [Chapter 1271 This Cucumber Can Solve The Predicament](#)

However, who knew that he would suddenly hear bad news from experts like Qi Kaiyou that the National treasure fish in you city might face extinction again.

"What's wrong?" qin lin immediately asked. seeing chen li's serious expression, he subconsciously felt that it might be related to the atlantic sturgeon and the atlantic dolphin.

boss Qin, there's a problem with the ecosystem in Min river's you city tributary. It's because extinct fish such as the Atlantic sturgeon and the Alabaster pufferfish have appeared. The big fish eats the small fish, causing the aquatic ecosystem to have problems, " Chen Li immediately explained and told Qin Lin everything.

"Ran ran." Qin Lin suddenly fell silent.

He was probably the cause of this.

He seemed to have made a wrong prediction.

he had thought that the ecosystem of the underground river could last for a while. when new ecosystem was born, it would be fine.

"But now, it should be the Atlantic sturgeons, Atlantic pufferfish, and other extinct fish that have come out at once, affecting the ecological environment of Min river's you City branch.

This situation immediately made him think of the Kappa sacrificial cucumber.

Because of the +1 attribute of being liked by underwater creatures and maintaining the ecology of fish, if he bred them in large quantities and threw them into the river to feed the Atlantic sturgeons and Atlantic pufferfish, as long as he had enough time, their ecology would recover.

Moreover, it had the attribute of fish nutrition requirement +1 and fish growth requirement +1, so it could also feed them until they were white and fat.

At this moment, Qi Kaiyou also said, " boss Qin, we saw a video on the internet that you cultivated a kind of cucumber that can be fed to the fish. We wanted to ask you about this cucumber. What's the growth cycle of the cucumber? " How's the production? What about the cost? how's the nutritional requirement for the fish?"

" the growth cycle of the cucumber is very short, and the yield is also very high, far higher than the production of normal cucumbers, " qin lin said. " therefore, the cost is also lower than that of normal cucumbers. as for its nutritional value to fish, i haven't tested it yet. "

With the growth speed +1, the growth speed of the cucumber was needless to say.

Because he had processed these seeds in the processing machine in ore town, the production was also very high.

As for the problem of nutrition, although he was very clear about it, he did not say it out loud. He did not want to be too absolute.

However, Qi Kaiyou's eyes lit up. that means that if the test results are sufficient for the fish's nutritional content, the cucumber's yield will be large and it will grow quickly. This problem can be completely solved.

"Boss Qin, shall we go and take a look at the cucumber?" Chen Li said immediately after hearing this.

"Yes, Chen Xian, this way please." qin lin nodded and brought chen li and qi kaiyou to the two kappa sacrificial cucumbers next to the man-made hot spring.

Qi Kaiyou and Chen Li immediately ran forward.

Qi Kaiyou immediately plucked a ripe cucumber. As expected, it felt very soft. When he broke it, he could see that the inside was as sticky as if it had rotted. However, through Gao Yaoyao's video, he knew that it wasn't rotted. It had been like that to begin with.

Qi Kaiyou threw a section of the cucumber into the artificial spring, and the next moment, one after another, ornamental fish rushed over and began to eat the cucumber.

"It really will be like that." Qi Kaiyou's face revealed a happy expression.

Looking at the scene in front of him, he knew how attractive the cucumber was to fish.

After that, Qi Kaiyou threw in the other cucumber as well, and a school of ornamental fish also rushed over to eat it.

boss Qin, we'll take two of these cucumbers back to test their nutritional value, " Qi Kai said to Qin Lin in unison. if the cucumbers are nutritious enough for fish, they'll definitely solve our current problem.

"En!" Qin Lin nodded.

after qi kaiyou received permission, he picked two kappa sacrificial cucumbers without hesitation and left linlin manor with chen li.

he wanted to test the nutritional content of the cucumber immediately.

Now, he only hoped that the cucumbers had the nutritional value that fish needed, and that they didn't need to have a high nutritional value. Even if they didn't reach the level of normal fish food, they could make up for it with their production, fast growth, and low cost.

### [Chapter 1272 571-Amazing Materials!](#)

Qi Kaiyou took two cucumbers and left Linlin Manor. After separating from Chen Li, he went to the office that you city had prepared for them as fast as he could.

the other experts also came over to ask qi kaiyou for more information.

"professor qi, how is it?"

that cucumber will be helpful to our current predicament? "

"..."

Qi Kaiyou took out two cucumbers and said, " according to what they said, the cucumbers grow very fast, and the yield is high. The cost is even lower.

the point is that fish like this cucumber very much. Now, it's all about the nutritional value of this cucumber. Even if it's only half of ordinary fish food, it'll be fine.

we have to test these two cucumbers immediately. Who can handle them? "

Although Qi Kaiyou and the others were fish experts and not botanicism experts, as long as they did not do in-depth research, some of them could still do tests.

After all, many of them actually had double degrees.

"I'll do it!" an expert said hurriedly.

Qi Kaiyou nodded and gave the two cucumbers to the expert.

the expert also brought the cucumber to the equipment room.

All the equipment inside had been transferred from Beijing.

Although most of them were fish-related, there were also equipment to detect plants.

After all, it could be used to detect aquatic plants and algae.

The expert turned on several pieces of equipment and began to test the two cucumbers after a simple debugging process.

The testing process took a long time, and the results were only out after two days.

however, when he received the results, he took the test report excitedly and called qi kaiyou and the other experts over.

"What was the result?" Qi Kaiyou asked immediately.

The expert said in disbelief, " professor Qi, you can't imagine how magical these cucumbers are. I can only say that little Qin is too amazing. He could cultivate such a simple cucumber to such an extent. Also, it seems that little Qin made these cucumbers casually and left them alone after planting them.

These words piqued the curiosity of Qi Kaiyou and other professors.

one of the experts immediately urged, " "Don't keep me in suspense, what's the result?"

the expert started explaining, " this cucumber is indeed incredible. The test data is amazing. The genetic enzymes are much higher than ordinary cucumbers, and the carbon dioxide concentration is also much higher. This means that the cucumber grows very quickly. It will probably mature in about a month.

" in addition, the gene value of taocole-b5 is more than twice that of ordinary cucumbers. this is the gene value that affects the production, which means that the production of this cucumber is more than twice that of ordinary cucumbers. "

naturally, the most important thing is the nutrients in the cucumber. As everyone knows, the original components of the cucumber are water, calories, protein, fat, carbohydrates, cellulose, calcium, magnesium, potassium, vitamin C, and so on.

however, these ingredients are extremely scarce in this cucumber. On the contrary, there are many more nutrients that fish need, and many nutrients that are beneficial to the growth of fish.

it can be said that the nutrients required by fish are very comprehensive. Originally, we only asked for the nutrients in this cucumber to be half of that of ordinary fish food.

but the truth is, even the most nutritious fish food can only reach half the value of this cucumber.

" i'm afraid that this cucumber will completely replace the role and position of fish food in the future. that's why i said that little qin is very amazing. the cucumber he casually made seems to have transformed the original nutrients of the cucumber into the nutrients required by fish, and it's even magnified several times. "

even if more than a dozen of the most famous plant geneticists were to work together to do this, i'm afraid they wouldn't be able to do it. Even if they could, it would cost a lot of money and time.

no laboratory would waste this money, and no expert would do this kind of research. After all, they're not stupid.

Of course, little Qin was not stupid in cultivating this cucumber. On the contrary, these experts felt that little Qin was even more impressive.

Other experts wouldn't be stupid to do it, and other laboratories wouldn't be stupid to spend money on cultivation, but little Qin had done it so easily.

Now they finally knew why Linlin's laboratory had become so famous in such a short time and why they could produce so many results.

If little Qin was already so powerful, there was still professor Li Kai.

When Qi Kaiyou got the results, he said anxiously, " quickly inform you city of this news. This magical cucumber can completely solve our predicament. We must discuss the future with them.

The other experts nodded.

qi kaiyou also took out his phone and called chen li.

you city.

Sun Xian and Chen Li had also been waiting for news from Qi Kaiyou for the past two days.

The sudden collapse of the ecology of the min River tributary had also worried them, but they had no other choice and could only count on the experts.

Now that they knew that boss Qin's cucumber cultivation could solve the problem, they naturally wanted to get the news immediately.

However, the result was not something that could be decided just by saying it.

They also had to wait for news from those experts.

Chen Li's phone rang. When he saw that it was Qi Kaiyou's number, he immediately answered the call and asked, " "professor qi, is there any news?"

qi kaiyou was also a little anxious. " county chen, we've got the results. the cucumbers are amazing. not only can they solve our current ecological problems, but the nutritional value they contain is also far higher than the most nutritious fish food on the market. "

#### [Chapter 1273 571-Amazing Materials!](#)

"really?" Chen Li's face instantly revealed a happy expression when he heard this."Professor Qi, let's go and talk to boss Qin about the cucumber."

"Alright, I'll listen to you, Chen Xian." Qi Kai and you naturally had no objections. They were not familiar with the Linlin Manor, so it was best to let you Cheng handle the negotiations.

After Chen Li hung up the phone, he reported to sun Xian with a face full of joy, sun Xian, good news. The cucumber cultivated by boss Qin can really solve this problem.

"That's great." when sun xian heard this, he also stood up with a smile. " "We still have to rely on boss Qin. The problem that so many experts couldn't solve was solved by boss Qin with a cucumber."

"Sun Xian, you have to discuss this with boss Qin as soon as possible. I'll go deal with this first." Chen Li left to look for Qi Kaiyou after saying his goodbyes.

Boss Qin's cucumber salad could solve this problem, but it was up to these experts to do the actual work.

.....

Linlin Manor.

Qin Lin was playing with the outer leather of the Goblin Gloves in his office.

Previously, he had only paid attention to the internal parts and had not noticed the outer shell.

after all, it was just a toy, and only the internal parts could create the ice and snow image, the outer leather was ignored.

He had taken it out and studied it for the past two days, and found that the outer skin of the Goblin Gloves was also a very magical fabric material.

First of all, this cloth had great endurance and was very firm.

he had eaten two fruits of the tree of power, but he couldn't tear it apart at all. even with his strength, he had to use some strength to cut it with scissors.

With this kind of endurance, if it were not for the gap that had been sutured earlier, it would have taken him some effort to open it.

qin lin took the lighter that was used to light the incense and lit it on the leather of the gloves.

However, after half a day, he realized that the glove was not even ignited. Only the burnt part was black, and the entire leather was not rolled up at all.

He was shocked.

The melting point and fire resistance were simply amazing.

He didn't notice it before because he really treated the Goblin Gloves as a toy.

But even if it was a toy, it was not an ordinary toy in a game that was supported by the system.

Moreover, it was a toy made by a special creature that had a sci-fi feel to it, the Goblin.

thinking about it, how useful could a cloth that had great endurance, was difficult to tear and cut, and had such strong fire resistance be?

Just as he was thinking about this, there was a knock on the office door.

Qin Lin put the Goblin glove's outer skin into the drawer.

he opened the door.

Chen Li and Qi Kaiyou were outside.

when he saw the two of them, he knew their purpose. it must be about the kappa's sacrificial cucumber.

boss Qin, sorry to disturb you again. This time, the county is asking you for help. Chen Li said in a humble manner as soon as he entered.

This was an attitude of begging.

even though he was representing the county, after all, no matter how generous boss qin was before, the county could not take it for granted.

Qi Kaiyou couldn't help but exclaim, " Mr. Qin, that cucumber is really amazing. Once it's promoted on a large scale, I'm afraid it will directly change the entire market of fish farming. But you just cultivated it casually. It's really shocking.

"Ran ran." Qin Lin didn't dare to respond.

it was all yao yao's fault for bragging to him.

What did he mean by casually training her? was he that powerful? This was a mission in the game. It was taken out from the game, okay?

However, it was impossible to talk about this kind of thing.

He could now understand the helplessness of old brother li.

" boss qin, " chen li said with a request, " professor qi and i came here this time because we have something to ask you. i wonder if you can cooperate with the county for the cucumber? " min river's current ecosystem needs this cucumber."

Qin Lin knew that this was the purpose of the county, so he also smiled and said, " " that's not a problem, xian chen. i'm also going to promote the cultivation of these cucumbers, but i need to cultivate and collect the seeds for the time being. i can't provide a large number of cucumbers in a short time. "

he had to agree even if he didn't want to.

Firstly, there was no conflict of interest. The cucumbers were planted for use, and there was no difference who they were provided to.

Secondly, this was the cause that he had planted himself, so he had to fill in the karma no matter what.

don't worry, boss Qin, " Qi Kaiyou said immediately. it can be maintained for a short time, but it will take a long time to restore the ecosystem.

"that's good." qin lin nodded.

chen li heaved a sigh of relief when he saw that qin lin had agreed. he immediately added, boss Qin, the county can allocate a special area for planting this special cucumber. The land contract will be handled by the county. We'll send someone to contact Linlin villa.

After the main thing was settled, the other things were actually very simple. After all, there was the cooperation between you city's officials and Linlin villa. There would be no problem in contracting the land. Everything would be smooth.

Moreover, in you city, whatever Linlin Manor wanted to do, they could easily do it without the official support of you city.

The people of you city knew that if they followed Linlin company to plant things, they would definitely make money.

after chen li and qi kaiyou received an answer from qin lin, they left together and returned to you city.

They were the most anxious about this matter.

After Chen Li and Qi Kaiyou left, Qin Lin put on a cut piece of the outer leather of the Goblin glove and left the office, heading to Linlin's laboratory.

When Qin Lin walked into a laboratory, professor Wang was working hard with the researchers. They were studying and cracking the internal parts of the Goblin Gloves that he had brought in before.

A researcher saw him and immediately reminded professor Wang.

"Chairman Qin." Professor Wang immediately stopped what he was doing.

"Professor Wang, how's the progress with the decoding of those parts?" Qin Lin asked.

" chairman qin, " professor wang said with a frown, " we have a rough understanding of the principles of these parts, but the materials used are very different from the molecular combinations of similar materials that we currently know. "

especially the liquid in the hollow part. The physical and chemical components contained in it are amazing. I can only say that the researcher who made this liquid is a genius. It will take some time to crack it.

qin lin nodded.

After discovering the difference in the Goblin Gloves 'leather, he knew that he had been too naive. The Goblin Gloves were not like toys that could be cracked easily.

as he was thinking, he handed the outer leather of the goblin glove to professor wang and said, "Professor Wang, you're also in charge of inspecting this leather material. Try to crack it."

"Alright, Chairman Qin." Professor Wang took the leather. The moment he touched it, he knew that it must be some kind of high-tech fabric made of fiber.

Therefore, after Qin Lin, the boss, left, he also took the leather material and began to examine it.

To crack this fabric, one had to first detect the composition of the leather.

However, as he examined it, he was more and more shocked. The leather was heat-resistant, resilient, and had a melting point. It was simply amazing.

Moreover, the data from the test was so high that even the official fabric materials could not compare to it.

Where did Chairman Qin get this thing?

Could it be an official gift for boss Qin?

On the other side.

You city also released news about the special cucumbers very quickly. They would be planting the special cucumbers cultivated by little Qin on a large scale.

Qi Kaiyou and the other experts also posted the test data of the Kappa sacrificial cucumber on the internet.

After the Kappa worshipping cucumber came out, the guidance that led to the nutritional problems of the Kappa worshipping cucumber still existed.

When the test results came out, these guilds had completely become clowns.

after all, qi kaiyou and the other experts represented the government. the official information would definitely be more convincing than the information released by the villain.

Similarly, after the examination report of the Kappa sacrificial cucumber was released, some people who could read the report began to explain it.

to put it simply, the cucumbers that little qin cultivated grew quickly and produced a high yield. the original nutrients in the cucumbers were perfectly converted into the nutrients that fish needed.

This ability was something that even plant geneticists at the current stage could not achieve.

Naturally, professor Li Kai was an exception.

so, how could it not be shocking?

#### [Chapter 1274 The Body-Increasing Medicinal Liquid's First Display Of Power!](#)

Time flew by, and the summer vacation soon passed.

Qin Lin drove into you city.

he went back to his hometown, mainly because an old man had died in the village. the village stipulated that the family had to go to a man's banquet and help deal with some things at the same time.

In fact, he hated this kind of occasion now, not because someone had passed away, but because there were too many flattering and noisy voices at the funeral of someone who had passed away.

People always had the heart to take an inch for a yard.

Previously, because of little Qin Feng's entry into the family genealogy, he chose to let go of some things and did not let his resentment continue to the next generation. Thus, he did not argue with some people. However, this did not mean that the matter was already in the past, and it also did not mean that he could treat these people with the same attitude as he did to uncle Dashan, uncle shuigen, and the others.

It was just that some people really didn't know their own limitations, or rather, it wasn't that they didn't know their limitations, but that they had some expectations in their hearts.

Unfortunately, that was just wishful thinking.

After entering you city, Qin Lin turned into a Huancheng Road.

You city's 3rd Ring Road had already been repaired. For a big County, One Ring Road repair was enough to ensure smooth traffic.

You city, on the other hand, was a little special. The 3rd Ring Road had been opened, but the 4th and 5th ring roads were still under construction.

You city was now a famous tourist city. The tourists attracted by Linlin villa, the climate of you city for vacation, and the tourists attracted by the National treasure Nature Reserve, the number of tourists received in you city had long exceeded 10000 people a day.

For a County city to host ten thousand people a day, the number was terrifying.

through the 3rd ring road, they entered the minjiang you city tributary national highway section. this section could now lead directly to the reservoir section and reach the linlin scenic area.

The National Highway section was completely different from before. The original width of the National Highway was eight meters, but after the you city Nature Reserve was built, the width of the National Highway was increased by six meters.

This six-meter area was separated from the original National Highway, and he could see that the area was full of cars.

The entire section of the road had a special style of viewing pavilions. Tourists gathered there and looked at the Min River tributary. Some people even held binoculars.

They were all admiring the Atlantic sturgeons and Atlantic pufferfish.

After the sturgeons and pufferfish swam out of the underground river, their terrifying numbers could be seen everywhere on the surface of the river, even if they spread out in the You City tributary of Min River.

Whenever a white-fin Dolphin jumped on the water, it would cause a cheer. If it was a group of white-fin dolphins jumping, it would be an even louder cheer.

Naturally, this was only the outer viewing area, and it was free of charge.

You City had also built a special viewing area for the Atlantic sturgeons and Atlantic pufferfish, and like Linlin Manor, they had built several floating bridges on the river.

Tourists who spent money could enter to look at the Atlantic sturgeons and Atlantic pufferfish up close, and even have the opportunity to interact with the Atlantic pufferfish and take pictures.

This project was the most popular one in You City besides Linlin Villa and Linlin Ranch, and it was also the most popular one among tourists.

Interacting with those Atlantic sturgeons and Atlantic pufferfish could really move people into their hearts.

Qin Lin drove out of the National Highway and saw a few transport vehicles parked at a small parking lot in the reservoir area.

This port was specially built by You City, and there were already several official ships parked below. They were transportation tools used to feed the Atlantic sturgeons and Atlantic pufferfish.

A group of people in the reserve's uniform was carrying a large water bucket from the car.

Qin Lin knew what it was. After parking the car, he walked to the side of the car to have a look. It was indeed a Kappa sacrificial cucumber, but it now had a new name, Linlin-fish melon.

A few days ago, the first batch of watermelons had been produced and they had started to feed the Minjiang You City tributary.

Because the Kappa sacrificial cucumber was very soft and the inside was in a sticky state, there was no way to transport it with cloth bags or bamboo baskets, so they could only use such buckets.

There were also special blinders on those boats, which were just in time to mix the contents in the buckets when they were poured into the river.

The staff recognized Qin Lin and greeted him.

"Little Qin!"

"Little Qin!"

"....."

They didn't find it strange that little Qin would stop. After all, little Qin was the one who raised these fish melons. It was normal for him to stop and take a look when he saw them carrying melons.

qin lin quickly got into the car, started the engine, and drove to linlin manor.

When they passed by Linlin villa, they could see a banner outside the villa: I wish the athletes of the national team a good result in the Olympic Games.

The Olympic Games, which had been held four years ago, had begun again. It was going to be held in Cuba this year.

Moreover, this year's Olympic Games were obviously more publicized than in previous years. It even had some special meaning. It seemed that the National athletes would definitely get very good results this year.

this was a huge confidence.

Qin Lin knew the reason.

This had a lot to do with the body-increasing medicinal liquid.

after all, the higher-ups had organized special training for the relevant athletes and soldiers after obtaining the body-strengthening medicine.

There was no need to talk about the soldiers. There was no war now, and they could not show it.

Athletes were different. The Olympics was their battlefield.

This time, the national team's athletes were destined to be famous on this battlefield.

After parking the car in the manor's parking lot, Qin Lin went to a corner of the manor. In the flower pot there, the stalks of Turtle Back bamboo were growing healthily.

There was also a sign next to it that said " Turtle Back bamboo experimental area. it was Gao Yaoyao's sign. From what she knew, these were the turtle Back bamboo, which her boss had cultivated.

#### [Chapter 1275 The Body-Increasing Medicinal Liquid's First Display Of Power!](#)

She naturally didn't know that these were actually called constant temperature grass and had very special effects.

Qin Lin squatted down and examined the everlasting temperature grass. They were almost fully grown, but most of their leaves were still green. Only a few of them were turning blue and red.

As such, the temperature-maintaining grass had no effect.

It would probably take until their leaves completely turned blue and red before the properties of the everlasting warmth grass would be activated.

After confirming the growth of the everlasting warmth grass, Qin Lin walked towards the main hall and found that Yu Shui and Lin Lanzi were already waiting for him there.

"Chairman Qin!"

When Lin Lanzi and Yu Shui saw him, they greeted him in unison.

The two of them had already made an appointment with him to report the planting status of fairy tale mountain.

Lin Lanzi took out a tablet and handed it to Qin Lin. Mr. Qin, this is the planting area of fairy tale vine and fairy tale Night Queen. The simulation effect has been made into a 3D video with special effects.

Qin Lin took the tablet.

After a series of cultivation, the mutated space vine and the mutated Night Queen had been planted in various areas of fairy tale mountain.

Some of them had already grown into fully grown plants, and their attributes had even been stimulated, allowing them to emit fluorescent light. Some of them were still seeds.

In order not to expose the fact that fairy tale mountain had been built, the matured plants that had their attributes activated would be surrounded by a special curtain at night.

Qin Feng clicked on the video on his tablet. At the beginning of the video, a mountain appeared. As the sky darkened, a very beautiful fluorescent light began to slowly appear in the mountain.

Gradually, as night fell, the entire mountain was completely immersed in a beautiful fluorescent light, as if it had become an indescribable fairy tale world.

The shocking scene could not be described with words.

This was the fairy tale mountain.

The fluorescent light was from the mutated space vine and the night Queen. Naturally, the video was only the result of the 3D modeling, which was fake.

However, the modeling targets were the night Queen and the mutated space vines that had already activated their attributes.

Therefore, the situation in the video would probably be like this when fairy tale mountain was completely formed in the future.

"It's very shocking and beautiful!" Qin Lin couldn't help but praise him.

Just from the scene in the video modeling, he could tell that when fairy tale mountain was formed and opened, it would attract countless people. He was looking forward to it.

However, the video modeling could not be compared to the fluorescent light emitted by the real night queen and the mutated space vine.

Because the mutated space vine and the night Queen still had those game attributes, under those game attributes, the shocking effect would far exceed the 3D modeling video.

Qin Lin returned the tablet to Lin Lanzi, expressing his satisfaction.

Lin Lanzi and Yu Shui also left Linlin Manor after reporting some other things about fairy tale mountain.

At this time, Qin Lin also saw a big family member carrying a child and climbing in.

the child was little qin feng. he was lying on xiao yang's back, sticking close to him. it seemed that this had become one of his daily activities.

on the other hand, assistant yang was very gentle and very protective of his little master. he crawled very slowly.

The most important thing was its size, it had actually surpassed wangcai. Its wide back was a comfortable bed for little Qin Feng.

however, despite its size, this fellow was still extremely cowardly. the red hair that was not even the size of one of his legs could still show off in front of it.

"Daddy, Daddy!" When little Qin Feng saw Qin Lin, he called out happily. His voice was childish and they were connected by blood. This made the little guy very close to his father.

qin lin picked qin feng up in his arms. at this time, a call came in. it was from minister lu.

he immediately answered the call.

minister li's voice was heard. " president qin, the olympic opening ceremony has ended. the official event is about to begin. the main force going this time has all been training for so long with the body enhancement liquid. it will surprise the athletes from the western countries. this is all thanks to you. "

Minister Lu, I only cracked one drug. I don't dare to claim credit for the rest. Qin Lin immediately said with a smile.

To be honest, he was also looking forward to it. After all, he was the one who made the body-strengthening medicinal liquid.

As long as those athletes could win, it would be considered a contribution.

After hanging up the phone, Qin Lin carried little Qin Feng back to his office, followed by little yang, who was grunting.

This fellow was like a loyal Mount that was following them.

When they entered the office, Qin Lin carried little Qin Feng to the sofa and turned on the TV. Meanwhile, Xiao Yang was lying quietly on the sofa.

The Olympic Games was one of the biggest international events. It received a lot of attention from all over the world, and it was the same in China.

Over the years, many Chinese people had even competed with countries like the United States. As long as the National athletes could get one more medal, it would be a great encouragement.

Of course, this mentality also produced many fools, idiots, and idiots.

these people could flatter athletes when they won gold medals, but they would not allow the athletes to get sick, injured, or have private space to run around.

If the athlete that these people held in high regard fell sick, got injured, and could not compete, or did not get a good ranking, then it would be unforgivable and would not be able to live up to their support.

then, the more he praised her before, the more he would step on her now.

Take soaring for example. He had won so many gold medals, but when he injured his Achilles tendon at the start of the race, everyone forgot about his contribution and scolded him as badly as they could.

#### [Chapter 1276 The Body-Increasing Medicinal Liquid's First Display Of Power!](#)

This kind of person was disgusting to the audience who really supported Jian er.

However, there should be fewer of these people in the future, because after obtaining the body enhancing medicinal liquid, they would not have much room to display their abilities.

When the country could train top athletes in batches, the cost of training and athletes would be reduced, and it would be easy to replace them.

There wouldn't be a situation where there would be a lack of successors for some projects and the old generals would be needed to support them.

to be honest, if there had been a successor in the hurdling event, soaring heaven wouldn't have needed to struggle at that age.

Many people even said that he was taking up the spot and not giving the young people a chance.

What these idiots didn't know was that even if he wanted to give up his spot, no young athlete could get a spot in this event.

This was the cruel reality.

During the Olympics period, the sports channels had already started broadcasting the Olympics live.

When Qin Lin turned on the TV, two hosts were already introducing the competition in the main live broadcast room.

"Wanwan, everyone's enthusiasm this year is clearly different. It's very high, so I'm sure everyone wants the Olympic athletes to get good results, Wanwan."

the first match on Yingluo's side is about to begin. Let's look forward to Yingluo's match.

Seeing this, Qin Lin also hugged little Qin Feng and said, "dad will bring you to watch the olympics. let's see how our athletes win."

He didn't care if little Qin Feng understood him or not. Sometimes, when it came to children, parents were mostly talking to themselves.

In the live broadcast room.

At this time, a streamer said again, "there's news from the other side. The first live broadcast of the competition will be coming soon. I hope we can have a good start!!!!!!

as the host spoke, his words sounded a little off. this was because the live broadcast had switched over to a football field. this was obviously the olympic football qualifiers.

" ? ? ? ? "Even Qin Lin was stunned by this scene. The first live broadcast was football?

What's the point of killing?

After the host's initial feelings, he immediately said, " I didn't expect the first match to be broadcast in the preliminaries of the football Group. I'm sure it's a pleasant surprise for the countless fans who have always supported the national football team.

according to the news we received, the national football team has also carried out secret training before the Olympic Games. I hope this secret training will allow them to achieve 'good results' in the qualifiers.

the host's voice was getting softer and softer, and he was getting less and less confident.

in the live broadcast, the players from the two soccer teams had already started to go on stage.

seeing this, qin lin could only look forward to the national football team. after all, minister lu had said that the national football team athletes also participated in the training program of the body-increasing potion.

it couldn't be that the body-strengthening potion had no effect on the national football team, right? After all, this medicinal liquid was much more powerful than the sea cucumber.

the game began soon, and the chinese players seemed to be full of confidence. they were full of desire to attack from the beginning, which seemed to put a lot of pressure on their opponents.

in addition, the speed and confrontation of each athlete were obviously better than before.

This situation made everyone's eyes light up. It seemed that the body-increasing medicinal liquid had some effect.

The audience in the live broadcast room found it unbelievable.

"this year's national football team seems to be a little different."

a little. He has a strong desire to attack!

"There might really be a surprise."

" ....."

just as everyone believed and discussed it enthusiastically, the situation suddenly took a sharp turn for the worse.

in the 10th minute, the other side intercepted the ball. then, with exquisite cooperation, the ball directly entered the national football goal. everything was different.

In the next game, the Chinese football team's desire to attack suddenly decreased, and their defense became very passive.

soon, the second goal was scored again.

at this time, some people in the national football team had already begun to stroll around the game, and it seemed that the familiar scene had returned.

this also made the entire live broadcast room start to curse crazily. it seemed that because there were too many languages, the poor sports priest had to turn off the comments during the live broadcast.

Qin Lin couldn't help but shake his head.

From the start, the increase in the liquid medicine did have some effect on the national football team.

However, it was clear that in a competition, spirit and will, as well as being able to withstand pressure, were very important.

And the national football team was lacking this.

Because their spirit and will were not strong enough, the body-increasing medicinal liquid only had a little effect on them.

Because he didn't have enough ability to withstand pressure, he made a quick turn and headed straight down after a mistake.

After that, the third and fourth goals were scored in succession.

until the fifth ball, little qin feng could not help but say, " "Stupid" stupid "stupid"

Qin Lin smiled wryly. He didn't know where the little guy had learned to write so stupidly.

However, he also understood that you could have expectations for anyone, but not for the national football team.

however, he did not have high hopes for the national football team. the next match was the time to witness the effect of the body-increasing medicinal liquid.

Obviously, the audience watching the live broadcast on the internet also understood this principle and began to comfort themselves.

"Don't be angry, don't be angry. It's expected. Let's look forward to the next game."

"the other athletes are called athletes, but the national football team is called \*\*\*\*\*."

"Cheer up the next athletes. Don't let the national football team affect your mood."

"..."

clearly, everyone was consoling themselves.

However, they would never have thought that the next Olympics would bring them so much shock and surprise.

[Chapter 1277 This Is Only The Beginning](#)

the liba olympic stadium was located at the famous nasai river stadium.

After the end of the opening ceremony, the first game also received a lot of attention, especially since the first game was a football qualifier.

on the international stage, competitive football was one of the biggest games.

However, as the first team of the Olympic Games, the result seemed to be one-sided. The team participating was from the eastern country, which was also one of the worst teams in the world.

this caused the audience to lose interest for a moment.

At the venue of the Olympic Games, director Yan was in a special area for the conference on the football field. His face was extremely gloomy.

a person from the football association who was accompanying him could even feel the dark clouds gathering over director yan. " director kuang, they've already tried their best. our football level has always been inferior to that of foreign countries. there aren't even proper football fields in various places. "

Without another word, director Yan glared at the man.

in the past, when the people from the football association said that they had done their best and that they had played the football field, he would not have expressed anything.

But now, she was still telling him that she had done her best?

These people from the Football Association did not know about the body-strengthening potion. If they did, would they still have the face to say such things?

he was in charge of sports, so he knew everything about the training of athletes using body-enhancing liquid.

He was also very clear about the results of the athletes in the other events.

It could be said that as long as one wasn't nervous and didn't make any mistakes, one could win a medal in other sports at the worst.

but why was it that when it came to the men's soccer team, even a magical thing like the body-strengthening potion couldn't save them?

what else could be useful to this kind of rotten fish?

Suddenly, a commentator from another country shouted crazily, "

Oh, another goal. That Eastern country has been defeated 0-5. They're playing a walk-through game again. Bobby, calm down, calm down. You know, I've heard that there's no odds for the bets in the eastern countries.

This was the host of a Western country, and there was obviously some unscrupulous ridicule in his words.

Chief physician Yan frowned, but he could do nothing about it.

their country wouldn't say something like that in a broadcast like the olympics.

However, the National conditions of other countries were different. The foreign media could even attack the government, so it was not a big deal to criticize the football teams of other countries.

Moreover, if he didn't live up to expectations, how could he blame others for it?

Internationally, this was their impression of men's football.

on the other side, the mocking voice grew louder.

0-6, this is what a qualifier should be like. It's hard to imagine that a country's soccer team could be so bad.

"I remember that there are 1.4 billion people in that Eastern country. Why can't they pick a qualified football team? The population of the opposite country seems to be only 20 million."

"Haha, you still don't know? it's because you can cheat in other sports, but football is a 12-man sport. it's useless to cheat alone, because teamwork, awareness, and technical support can't be obtained by cheating."

" indeed. in the last asian games, the eastern countries cheated with a drink and got a very good result. "

it's Linlin leisure tea. It's been banned. Did they think they were powerful at that time? "

won't they reveal their true colors at the Olympics this time? "

"Haven't you revealed your true colors now? It's already 0-6."

"Hahaha, that's true!"

It was a host from an American football media, and his words were even more piercing to director Yan and the others.

However, this was only temporary.

it was just the men's soccer team.

They would only be a disgrace to football, not their country. In other events, their athletes could wash away this shame.

Moreover, did these guys really think that they wouldn't be able to get good results without the Linlin leisure tea?

The following score of the football qualifier was fixed at 0-6.

the men's football team had very few chances to control the ball, and after getting the chance to control the ball, it was difficult to play half the game.

The opponent seemed to be afraid of something, and did not attack again. It was as if he was playing with the men's soccer team, leaving enough face.

The whistle that signaled the end of the match rang out, and director Kuang left expressionlessly to head to the rest area for both teams.

He really wanted to ask these men's football players, are they all pigs?

Very soon, director Yan arrived at the men's soccer team's resting area.

At this time, the men's soccer players had also returned to the rest area and were excitedly discussing something.

When he heard the conversation coming from inside, director Yan stopped in his tracks.

"I told you, that secret training wasn't as effective as our original training."

"that's right. and that body-strengthening potion. it has no effect at all. it's simply a waste of my time. i haven't seen my girlfriend for so long. "

those people at the top only know how to make decisions. They're hindering our results.

we got into the men's football team through our own hard work and training, not drugs. Why don't the people at the top and the fans in China understand? "

"....."

These words were obviously full of complaints, and none of them paid attention to their own questions.

Department Director Yan's face was extremely dark.

He had never thought that even though it was already 0-6, these people did not reflect at all. They were even full of complaints and shirking responsibility.

Most importantly, these people were still complaining about the body-increasing medicinal liquid. Did they know how many people wanted the body-increasing medicinal liquid? however, the number of people who could use it for training was limited?

#### [Chapter 1278 Shocking Everyone! This Is Just The Beginning \\_ 2](#)

Really, he suddenly felt that using the body-increasing medicinal liquid on a pig would be better than using it on these people.

"He's incurable." Department Director Yan snorted, turned around, and left.

Perhaps not even the gods could save the men's soccer team now.

After leaving the football field, director Kuang went to another competition venue and then entered a special lounge.

This was the preliminaries for the 100m sprint.

The preliminary stage of the hundred-meter team was about to begin.

when director hao entered the resting room, su ye and a few other 100m sprinters were already getting ready.

su ye was the center of attention, and there were many foreign reporters taking photos of him around him.

after all, su ye had a time of 9.69 seconds in the gold sprinting competition, and he had become the new flying man.

although many people in the world were not convinced that he had cheated, su ye was still the most popular candidate for the 100m sprint.

There were a few other participants who were also very young.

However, no one paid attention to them, because in the past, even if they were qualified for the Olympic Games, they would always be at the bottom of the qualifiers.

It could even be said that he wouldn't even get a shot.

No one in the country knew about these players who participated in the first round of the qualifiers.

However, this time, the contestants looked eager to try. They were eager to start the competition and show the world the results of their hard training for the past year.

When director Kuang arrived, everyone, including su ye and the other contestants, gathered around him and greeted him.

"Director Kuang!"

"director kuang!"

"....."

"Prepare well, don't be nervous. You know your current strength." department director yan said with a smile. actually, he was also talking nonsense.

These athletes had all taken the body strengthening elixir, and its effects were very terrifying. It was completely different from the ones in the men's football team.

The only thing these athletes lacked now was experience. They were afraid that they would perform badly due to nervousness.

Fortunately, there was time for them to adapt. After all, it was only the preliminaries.

If they still couldn't adjust their mentality in the semi-finals and finals, it would mean that they were not suitable for the Olympic Games.

Next time, he would have to change the person.

After all, it would be easy for them to train another person with high resistance to pressure using the body-increasing medicinal liquid.

Very soon, the 100m qualifying round began.

It was not su ye's turn in this group. The one who went up was a young athlete named li chuanjia.

At this moment.

The domestic live broadcast had also switched to the sprints.

The domestic audience was also full of anticipation. After all, su ye was the fastest person in the world. Even when they saw su ye in the camera, many people recalled the excitement he brought to them in the gold sprinting competition.

At that time, no one thought that this outrageously young general would be able to get a ranking. At most, he would be able to accompany them for a round.

However, a miracle happened at that time. Su ye became the world's number one, the new flying man. On the 100-meter track, he proved to everyone that the Chinese could also do it.

they had just eaten a whole lump of sh \* t at the men's soccer club, so they naturally hoped that su ye would give them a sweet one to vent their anger.

In the past, there were very few live broadcasts of the 100-meter race. Because they couldn't afford to lose face, they couldn't enter the preliminaries one by one. They only switched to the live broadcast when God su was in a race.

This time, it was different. The sports channel had miraculously started broadcasting from the start of the qualifiers.

Everyone subconsciously thought that it was probably because of su ye.

Unfortunately, su ye was not the first one to go on stage. No one knew li chuanjia, and no one thought that he would be able to get a good ranking.

li chuanjia was not happy with the items, but not sad about himself.

The fact that he could be here meant that he was the most outstanding one. Even if there were countless spectators around, they couldn't affect him.

Therefore, he walked onto his race track No. 5 calmly.

When the domestic audience saw that the camera was aimed at li chuanjia, they started a heated discussion, because the person next to him was actually Andrea degraz.

The domestic audience was naturally very familiar with this person.

He had won the third place in the previous Olympic Games, and more importantly, he had lost to su ye in the gold sprinting competition.

At that time, the other party's race track was also next to su ye's.

The scene in front of him seemed somewhat familiar.

At the same time, in a luxurious office of the organizer at the venue of the Olympic Games in Cuba, the organizer of the Olympic Games was also paying attention to the situation of the 100m sprint.

The reason was simple. It was because of su ye.

They were very reluctant to let su ye, a man from the eastern country, become the world's fastest man, but they could do nothing about his strength.

Mr. Robert, the contestant from the eastern country is a newcomer called chuanjia li. There's nothing worth paying attention to! Will said to a middle-aged white man respectfully.

Will was the person in charge of the last gold sprinting event, but an international event like the Olympic Games was not something he could take charge of. He could only help as an assistant.

Lu Bu te was the person in charge of the Olympic Games and the Vice President of the International Olympic Committee. He was involved in many international events.

Moreover, he was a white man. Even in an event like the Olympic Games, which was said to be absolutely fair to the outside world, he still had a special prejudice.

If it weren't for the prejudice of these higher-ups, no one would be able to win the championship with the help of the referee after making a mistake of crossing the Pacific Ocean with one foot.

### [Chapter 1279 Shocking Everyone! This Is Just The Beginning! 3](#)

"En!" Hearing will's words, Robert nodded. that Eastern country was lucky to have su ye. The other 100m sprinters are not worth paying attention to.

" there's no cheating with the linlin leisure tea. you can see what it is by looking at their 0-6 score in the football qualifiers. however, the investigation on them should also be increased. they must not be allowed to have the opportunity to bring in the linlin leisure tea. "

Will smiled. don't worry, Mr. Robert. We've strengthened the checks. There were a few contestants who seemed to have asthma, and there were more disputes.

obviously, participating in the competition with asthma was also a joke that was spreading all over the world.

After all, the United States had a few strong-willed contestants who insisted on taking medicine even when they had asthma.

our international competition is the most official one. It's a competition with the best sportsmanship. He's still competing despite having asthma. Isn't that the spirit of sportsmanship we want to promote? "

"I understand, Mr. Robert." Will said with a smile.

the first round of the qualifiers was about to begin on the 100-meter race track.

Glass of Andrea could not help but look at li chuanjia. kid from the eastern countries, your country's Su ye is very powerful, but there is only one su ye. This race track does not belong to you.

Obviously, he was not convinced that he had lost to su ye last time. He was naturally hostile to li chuanjia.

Li chuanjia didn't want to pay any attention to glass. He knew who he was and he would use his strength to slap him in the face.

This made Andre Dracula even more displeased. He felt that he had been ignored by a nobody. The people of the eastern countries were really arrogant.

He would teach the other side a lesson in the first round of the qualifiers.

finally, the starting gun of the race was fired. at that moment, everyone was bound to be shocked because li chuanjia had almost turned into a shadow as he dashed out. he was in a good mood and was not affected at all. he started off perfectly.

At the same time, Andre Dracula also rushed out. He was shocked to find that li chuanjia had run ahead of him.

At that moment, he widened his eyes in shock. How could it be so fast?

He seemed to see su ye's figure vaguely.

when he crossed the finish line, he looked at li chuanjia's result in a daze.

it was 9.76 seconds!

This was even better than su ye's semi-final result, which was 9.80 seconds, which even black people would find difficult to break.

Why? The other party was just an Asian.

"Impossible!" In the conference room of the organizer, will also exclaimed when he saw the game screen.

robert also subconsciously stood up and stood there in a daze, as if he had seen the most unbelievable thing.

why was it that other than su ye, the eastern country could produce another athlete with such strength in the 100m sprint?

When the results came out, the International audience around them were all dumbfounded. The young man from the eastern country had won first place in the group with such a result.

Minister Lu, who was watching from the side, clenched his fists in excitement.

This was only the beginning.

In China.

The audience watching the live broadcast was silent for a short while. There was a sudden break in the comments, and it was frighteningly quiet.

Immediately after, a dense and excited comment appeared:

" 666, that's unbelievable. "

" i see another su ye. no wonder the sports channel is broadcasting the 100m sprint qualifiers live this time. "

it's really in my lifetime. I didn't expect to see su ye and Li chuanjia alive.

"Who said that the 100-meter race is the home field of black people? We yellow-skinned people can do it too."

so beautiful! I was so excited that I even jumped up from the toilet just now. Now, I'm so excited!

upstairs, you're fine. I'm hugging my girlfriend and watching the competition. I f \* cked myself just now, haha!

"....."

But obviously, no one knew that this was only the beginning. Something even more shocking was about to happen.

#### [Chapter 1280 Record After Record! Is It Cheating To Be Better Than You?](#)

Li chuanjia's result of 9.76 seconds in the preliminary group shocked everyone.

everyone thought that there was only one su ye in that eastern country.

Who would have thought that such a terrifying young man would appear?

Andrea degraz looked at li chuanjia in shock. He did not expect to lose again.

He felt embarrassed when he thought of his mockery just now, and his face was a little hot.

Li chuanjia didn't even look at Andrea degraz.

This kind of disregard was the greatest retaliation and the greatest insult.

seeing this, andres degraz's mind collapsed.

Even if he had lost, he was not a small fry that could be ignored, right?

Li chuanjia returned to the rest area.

"well done. have a good rest and prepare for the upcoming competition," director kuang said immediately.

"okay, director." li chuanjia nodded immediately.

The second group of qualifiers for the 100m preliminaries was about to begin.

This time, there were no domestic players participating.

The third group had another contestant from China.

There were only three places for each country to participate in the 100m sprint.

the young man named lu shengfeng was also the third 100m sprinter after qi chuanjia and su ye. the other three were in the 200m.

Unlike Qi chuanjia, Lu Shengfeng's appearance attracted a lot of attention.

It was not because he was famous, but because of li chuanjia's achievements.

Of the three participants in the 100-meter race, su ye was the world champion and a flying man.

Li chuanjia ran to 9.76 seconds in the preliminaries.

The third person's strength would definitely arouse people's curiosity.

Lu Shengfeng was still in a good mood.

He had always been a careless person.

He started to prepare like li chuanjia.

With the sound of the gunshot, he also rushed out like an arrow.

The people who were watching him widened their eyes at that moment.

This was because his speed was just as terrifying.

When they saw him cross the finish line, something even more shocking happened.

It was 9.75 seconds.

lu shengfeng had also reached 9.80 seconds in the preliminary round, which was a big figure even for black people.

this time, no one could remain calm, especially the athletes and coaches from the western countries.

What kind of joke was this?

The three 100m sprinters from the eastern country are all so terrifying?

It should be impossible.

Such a situation had never happened in any country before, not even in beautiful countries or countries with black people.

Moreover, the opposing team's soccer players were obviously so bad that it was enough to show the weakness of the yellow race in sports competition. How could the other side play such a terrifying power in the 100-meter race?

Before this, the 100-meter race was a forbidden zone for Asians.

While everyone was still in shock, another group of athletes came on stage.

This time, su ye finally went on stage.

Su ye's appearance on the stage had obviously attracted a lot of attention, causing the shocked people to return to their senses and look at him.

All the athletes in the same group felt a huge pressure.

compared to li chuanjia, su ye had already won the gold medal of the maya sprinting competition. he was the world champion and the new flying man.

As soon as su ye got on the stage, the cameras from all countries focused on him. They wanted to see if the flying man could maintain his previous results in the Golden Sprint competition.

In China.

When su ye appeared on the race track, the audience who had been paying attention to the 100-meter race were looking forward to it.

God su, I've finally waited!

I still can't forget the passion that God su brought to me in the 100m race. He created the 100m race for Chinese.

God su, you can do it! If you win the championship, I'll make babies with you. I have two younger sisters who can also make babies with you!

the lady upstairs, please post a photo. I'll help God su check!

"....."

the domestic audience who paid attention to the 100-meter race had high expectations for su ye.

At the competition venue, su ye and the other athletes in the same group started to prepare.

at that moment, everyone who was watching the scene held their breath. it could be said that they were all attracted by su ye at that moment.

Anyone who could become the world's number one would be the focus of attention.

Finally ...

A gunshot!

Su ye took a step forward instantly, as if he had turned into a shadow and darted out quickly. Those who were paying attention to su ye only felt that their eyes could not keep up with his speed at that moment.

"So fast!" A reporter said in a daze.

The others all stopped breathing.

They had never seen anyone run so fast before. At least, they had never felt it before.

Indeed, su ye ran very fast this time.

He was different from li chuanjia and Lu Shengfeng. He had used the body-increasing medicinal liquid for a longer time than the two of them. He had basically relied on the body-increasing medicinal liquid to train himself to the peak and extreme.

Therefore, he was even faster this time.

However, when he crossed the finish line, the whole world seemed to have gone silent.

The originally noisy crowd suddenly became as quiet as a mosquito. Everyone looked at the data on the display screen in a daze.

One of the judges even knocked on the screen subconsciously, as if he thought something was wrong.

"Oh my God, is this result real?"

"how did he do it?"

"Is he really yellow?"

"....."

The scene became noisy again, and countless exclamations resounded.

Even the athletes in su ye's group looked as if they had seen a ghost.

It was 9.54 seconds.

This was su ye's result in the preliminaries.

however, the result shocked everyone because the world record set by the top flying man, bolt, was only 9.58 seconds.
