

The Game 1301

[Chapter 1301 581-Stealing A Beam And Replacing It With A Pillar! The Scapegoat Delivered To The Door! 3](#)

When he saw this scene, he even thought of some special strategic uses.

If this thing could be cultivated and used as a material for some other things, it would be extremely terrifying.

...

linlin manor.

Qin Lin entered the workshop and went to the flower pot where the soaked grass was planted.

he was also surprised to find that the bubble grass had already sprouted.

The growth speed +1 attribute was indeed very fast.

He didn't hesitate. He lifted the flower pot and left the workshop.

He knew about the magic of the kimchi, and he planned to move to the manor Hall to let Minister Lu see them grow with his own eyes.

Since he was going to push the blame, he had to push it completely.

After leaving the inner area, Qin Lin carried the flower pot to the hall and saw Minister Lu waiting there.

As soon as he arrived, the other party immediately stepped forward. "Boss Qin, I have good news for you. Professor Li Kai's side has successfully cultivated it. A seed has sprouted."

Qin Lin was a little surprised to hear this.

"Is old brother li that lucky?"

Are there any seeds that can be planted alive?

The key was that it had sprouted.

Wasn't his speed a little too fast?

One must know that these bubble grass had only just sprouted even though they had the attribute of +1 growth speed.

This was a little fantasizing.

"boss qin, are these the seeds you're responsible for cultivating?" Minister Lu also noticed the flower pot in Qin Lin's hand and said in surprise, "three of them have sprouted?"

This time, he was even more surprised.

it was already good news that professor li kai's seed had sprouted.

at the same time, three of boss Qin's seeds had sprouted. they were indeed the two heroes of Linlin laboratory.

after all, the plant geneticists in the Chinese Academy had no confidence in the cultivation of these seeds at all after testing. they couldn't even come up with a plan.

Now that he had handed it over to boss Qin and professor Li Kai, they had successfully trained it in a short time.

This was also why they had brought the seed to the two of them for cultivation, not for the experts in the hospital to think of a solution.

It was just that the experts in the hospital were not as good as these two.

Now, the facts had also proven that the two of them had taken over the seeds at the same time, planted the seeds at the same time, and the seeds sprouted at the same time. This was really a magical coincidence. It was as if the heavens had foretold the relationship between the two.

It was said that since Yu was born, why would she be bright? however, there was no such problem when it came to the two of them. They were both equally dazzling.

Although professor Li Kai's seed had only survived and boss Qin's three, it didn't mean that professor Li Kai's seed was worse. After all, only one of professor Li Kai's seeds could survive.

but no matter what, this was definitely a good thing.

seeing Qin Lin move the soaked grass to a good spot in the hall, Minister Lu thought of something and immediately called Li Kai, "Professor Li Kai, three of boss Qin's seeds have sprouted."

"The one that old Brother Qin nurtured has also sprouted?" Li Kai was also a little surprised. Then, he thought that he could use the special soil from Linlin's laboratory. Brother Qin also had special soil, so it was not strange for the same special soil to germinate at the same time.

Minister Lu continued, " professor Li Kai, boss Qin has already moved the seedlings to the main hall of Linlin Manor. If there's no problem on your side, can you move them over and put them together? perhaps you can make a comparison and discuss it.

"Yes, there's no problem." Li Kai looked at the sprout and shook his head. What problem could there be? It could sprout without any water or nutrient solution.

Minister Lu was obviously very happy to get Li Kai's answer. now, he could personally see the growth of these two space plants. the original plan was to stay for ten days to half a month and then go back.

Now that he knew that the training was a success, he had to report to the leader and stay longer at Linlin Manor.

as he thought about it, Minister Lu took out his phone and called his leader. obviously, he had no idea how much shock these two so-called space plants would bring him.

[Chapter 1302 The Magical Color-Changing Ability And Color-Changing Material](#)

minister lu took out his phone and dialed an encrypted number. when the call was connected, he said with a face full of joy, " "leader, i have good news to report to you!"

In an office in Beijing.

after the leader received the call from minister lu, he immediately asked, " "Little Lu, are there any results from the two seeds?"

The higher-ups had always paid the most attention to the rocket project of academician Hao and academician Zhu, especially the return of the space Seed.

However, for the two seeds, the botanist experts had no further information after the preliminary examination.

in fact, even though they knew that this seed might be the only one, no expert dared to try it out for fear of failure and responsibility.

at that time, they were very distressed and even held a special meeting for this.

In the end, the two people who suggested giving the seed to Linlin's laboratory agreed.

Minister Lu immediately reported, " leader, there is news. You might not believe me, but when I arrived at Linlin Manor, boss Qin and professor Li Kai not only made the same request, but they also produced the nutrient soil at the same time. They also planted the seeds at the same time, and the seeds sprouted at the same time.

"Such a coincidence?" The leader was surprised.

Then, he focused on the fact that both seeds had sprouted.

Mr. Qin and professor Li Kai have cultivated two types of space seeds?

But it was too fast.

After all, this was a Space Seed that even the experts in the Chinese hospital were helpless against.

if the experts were to do it, they would probably still be under observation and wouldn't even be able to come up with a rough plan.

as expected of the two heroes of gao lin laboratory.

in the country, or even the entire world, no one could compare to these two in the field of plant gene cultivation.

It could be said that the country was extremely fortunate to have these two talents.

...

Linlin Manor.

Qin Lin put down the sprouted bubble grass seeds.

Minister Lu had just hung up the phone. Ma Shan came forward curiously and squatted down to watch it carefully.

It was as if he was looking at a peerless treasure.

"Boss Qin, what do you think this thing could be?" Minister Lu could not help but ask.

Qin Lin naturally knew that it was the soaked grass, but he would not say it out loud. Instead, he put on an act and said, Minister Lu, this is my first time seeing these seeds. We can only know what they are after they have grown.

"that's true." minister lu completely believed qin lin's words.

Wasn't that so?

This seed was brought back from outer space.

Who would know what they looked like?

not long after.

a scientific escort vehicle with the logo of the qianlin laboratory on it drove into the parking lot of the linlin manor, with security guards escorting it.

It was Li Kai who had brought over another type of sprouted seed.

The security guards moved a cultivation pot down and sent it to the hall before leaving.

When Li Kai saw Qin Lin and Minister Lu, he couldn't wait and said, " "Brother Qin, Minister Lu, you can't imagine how magical this plant is. Come and take a look."

Li Kai even pulled Qin Lin to the front of the cultivation pot, causing him to smile bitterly. Brother li was acting like a child who was eager to show off his toys.

moreover, no matter how amazing it was, could it be more amazing than the things he brought out of the game?

Minister Lu was attracted and immediately came to the cultivation pot to take a look. However, he didn't see anything special about the gray-green seedlings.

"Professor Li Kai, this plant seems to be very normal." Minister Lu looked at the seedlings in the cultivation pot with doubt.

"minister lu, don't worry." Li Kai immediately stepped forward, picked up the cultivation pot, and walked under the sun.

In a short while, the gray-green sprout quickly turned into a bright red.

then, li kai moved the breeding plate under a shadow. the sprouts inside had also turned into an ink-black color that was close to the shadow.

"This Tao Wu!" Minister Lu was finally shocked.

He was in charge of scientific research, so he naturally knew what this scene meant. He also knew what this thing could be used for if it could be made into materials.

Qin Lin was just as surprised.

Why did this sprout look like a chameleon?

The key was that even a chameleon's color change was not as fast as this one's, and there was no way to change its color so thoroughly.

Minister Lu couldn't take it anymore. He took out his phone again and made a call.

Hua Hospital.

Yang Duanhe was the head of a materials research team.

He was looking at some information in distress.

He was already very old this year and would be retiring in a few years.

However, he really wanted to develop a material before he retired.

It was the invisibility material.

Invisibility materials had always been a project that countries around the world invested a lot in.

This material could be used in many ways, even on the strategic coating of many weapons.

Naturally, it was impossible for real invisible materials to be completely invisible like in science fiction movies.

It was not something that could be completed with the current stage of technology. It would probably take another 50 years for such technology to be first developed.

Therefore, what they were researching now was basically a color-changing material.

As long as the color-changing material could change its color to suit the environment, it would be considered a success. For this, they also borrowed the color-changing theory of chameleons.

However, this kind of color change still had its flaws. First, the color change was slow. Second, the color change was not complete. Sometimes, the color change was too hide. If the color change was not complete, the sudden color would become more conspicuous.

[Chapter 1303 The Magical Color-Changing Ability And Color-Changing Material](#)

Wouldn't that be equivalent to exposing himself?

No country had made any substantial breakthroughs in this technology, so he naturally wanted to take the lead in completing this technology and lead the world.

"Academician Yang, you have a call." An assistant hurriedly handed him a phone. "It's Minister Lu!"

Yang Duanhe knew that Minister Lu would not call him unless it was something important, so he immediately answered.

When he heard the news from Minister Lu on the phone, he said excitedly, "Minister Lu, are you serious? Was there really such a thing? The color will change immediately, and the color will be close? Alright, alright, I'll be there immediately."

Linlin Manor.

after hanging up the phone, minister lu immediately said to qin lin, "It's for boss Qin, I'll have to trouble you to prepare another room. An academician will be here soon."

Qin Lin nodded. He called Gao Yaoyao over and asked her to make arrangements.

.....

The next day.

Qin ran woke up, looked at Zhao mochen next to her, and shook her.

"hubby, what's wrong?" zhao mochen opened his eyes and asked drowsily.

"Our son is sleeping like a log in the morning. Come with me to the bathroom!" Qin Lin whispered in her ear.

"Bah, it's so early in the morning!" Zhao mochen glared at him, then tiptoed up and looked at the position of the cubicle. Little Qin Feng was still asleep.

She glanced at Qin Lin and walked to the bathroom.

Qin Lin smiled evilly and followed her in.

After that, there was naturally an indescribable sound.

having been satisfied early in the morning, qin lin also had an even more delicious breakfast.

After leaving the inner area, he looked at the screen in his mind with a good mood as soon as he reached the office and began his daily task for the day.

Perhaps his good mood today had also made his luck better.

He had obtained a lot of quality 2 wood when he went to cut trees. When he went to the mountain goods area to take a look, he also found that Tieguanyin tea had been refreshed.

As for the other gains, there was nothing else.

Qin Lin had just finished his daily tasks when the academician arranged by Minister Lu arrived.

When the other party arrived, he personally went out to the hall to greet them out of courtesy.

If it was someone else, no matter how rich or powerful he was, he would not be like this.

However, he really admired these academicians who were silently contributing to the country.

"boss qin, let me introduce you. this is academician yang duanhe. he's in charge of the research of several types of special materials." Minister Lu immediately introduced yang duanhe to Qin Lin when he saw him.

When yang duanhe saw Qin Lin, he immediately complimented him, "Boss Qin, I've heard a lot about you."

If it was any other young man, he wouldn't have been so polite. But this young man was different. His contribution to the cultivation of plant genes alone was enough to make him admire him from the bottom of his heart.

It could be said that all the old guys in the courtyard were in awe of this young man's achievements.

"Academician yang, you're too kind ..." Qin Lin shook yang duanhe's hand helplessly. To be honest, he really didn't dare to accept the compliments of these academicians.

These seniors relied on their abilities, while he relied on the game.

Yang duanhe didn't forget why he was here. After greeting him, he asked Minister Lu, "Minister Lu, where's the plant you were talking about?"

Minister Lu immediately led yang duanhe to the sprout that Li Kai was cultivating and then demonstrated the scene that Yang Kai had just demonstrated.

when he saw the sapling rapidly changing its color under the sun, in the shadows, and under other lights, yang duanhe was completely shocked.

The speed at which it changed its color and the way it changed its color was so much faster than a chameleon.

if this could be cultivated into a material, it would be unimaginable.

"Minister Lu, are these the seeds you brought back from space?" yang duanhe asked in surprise.

in the department, the two seeds had been brought back and were brought by minister lu to boss qin and professor li kai. many people in the information department knew about this.

yes. Minister Lu nodded. it's one of them. Professor Li Kai has cultivated it.

Speak of the Devil.

at this moment, li kai also walked in from outside.

He was also called over by Minister Lu.

Yang duanhe clearly recognized Li Kai. After all, he had seen a lot of news online.

Therefore, he immediately walked towards Li Kai and said impatiently, " professor Li Kai, you have to successfully cultivate that plant. It's too amazing. It might become an indispensable material for us.

Li Kai had never seen yang duanhe before and was a little confused.

" professor li kai, " minister lu immediately introduced. " this is an academician in the materials category. the seedling you cultivated may be used to make some special strategic materials after it matures. "

"So it's academician yang!" Only then did Li Kai know the identity of the person in front of him, but he was not surprised that he would come.

This was the first time he had seen the miraculous function of the sapling. He also thought that this thing could be used as many strategic materials after it had fully grown.

After that, yang duanhe pulled Li Kai to the cultivation plate and asked about the sprout like a curious baby.

in the following days, yang duanhe also stayed. every day, he paid more attention to the growth of the space plant than minister lu.

Naturally, he only paid attention to the color-changing tree that Li Kai was cultivating.

The color-changing tree was also chosen by him, Minister Lu, and Li Kai after discussion.

as for why it was a tree and not grass?

As a plant genetics expert, Li Kai would naturally know. He could distinguish it within a few days of germination.

To Qin Lin's surprise, the color-changing tree grew very fast, as if its growth acceleration attribute was even faster than the bubble grass he had brought from the game.

[Chapter 1304 The Magical Color-Changing Ability And Color-Changing Material](#)

Half a month passed just like that.

Early in the morning, yang duanhe got up again and went downstairs to have breakfast with Minister Lu.

After breakfast, he said to Minister Lu, "Minister Lu, let's go and see if the color-changing tree has changed today. I'll bring some leaves back later."

"let's go," he said. Minister Lu nodded.

Right now, the color-changing tree had become the main target of his and yang duanhe's observation.

In the past half a month, as the color-changing tree grew, its color-changing ability became stronger and stronger.

On the other hand, the three plants that boss Qin had successfully cultivated did not have any special problems.

The two of them arrived in front of the color-changing tree. The tree had already grown to half a meter and had grown a lot of leaves.

the colors were naturally spectacular. there were different colors on a tree.

There was one color when there was a little sunlight, one color when there was a back to the sun, another color when there was a little stronger light on the left, and another color when there was a little less light on the right.

To be able to completely change the color of the environment with just a slight change, the ability to blend in was too terrifying.

After that, Minister Lu called Li Kai and picked some leaves from the color-changing tree. He left Linlin Manor with the leaves and returned to Beijing.

Not long after.

Yang duanhe returned to the Chinese Academy. The first thing he did was return to the materials Group he was in charge of and gather all the members of the group.

"Academician yang, you're finally back." One of the team members immediately said in surprise.

that's right. We haven't made any progress at all. We need your leadership! Another team member said.

" since there's no progress, " yang duanhe said with a smile, " let's sort out our previous experimental data. we'll change our direction and start over again. "

His words stunned the entire group.

Although the progress was slow, they were still making progress in this direction, which meant that they were heading in the right direction.

Since the direction was correct, wouldn't academician Yang's sudden change of direction be equivalent to wasting all the previous efforts?

Yang duanhe had clearly seen through the thoughts of these group members.

Without waiting for the team members to speak, he took out the leaves he had brought back. " first, test the color-changing mechanism of these leaves, and then extract the components as materials. then you'll understand. "

Although the group members were confused, yang duanhe was the person in charge and knew that he had his reasons for making this decision.

one by one, the team members took the leaves and started testing them.

for the researchers of the chinese academy of sciences, if there was an object in front of them for them to examine, they would be able to quickly examine it without cracking it.

So, it didn't take long for the researchers to be shocked.

" academician yang, the color-changing mechanism of the leaves is incredible. "

that's right. Chameleons can't do this at all. Where did this thing come from? "

"If this can be made into a material, I don't even know how to describe it."

"....."

Yang duanhe naturally knew this and immediately urged, "Let's extract the color-changing components of these leaves and see if we can dye a small piece of cloth."

"Alright!"

"Everyone, work overtime tonight and work hard through the night."

For these researchers, they were the most excited when their research was making progress. They were more willing to work harder than anyone else.

moreover, with the previous experience of soaking and dyeing the special chameleon-like materials synthesized by the chameleon's chameleon's chameleon mechanism, it would not be difficult to extract the ready-made chameleon material this time.

With the hard work of the researchers, a small piece of cloth was soon soaked with the color-changing component extracted from the leaf.

The color-changing ability of this piece of cloth shocked everyone.

[Chapter 1305 This Color Change Is The Same As Invisibility!](#)

Hua hospital.

In the laboratory of the color-changing materials Research team, a handkerchief-sized piece of cloth was already placed in front of yang duanhe.

Half of the cloth was placed on the stainless steel experiment table, and the other half was suspended in the air.

One could see that half of them had turned white under the illumination of the incandescent lamp, while the other half, which was attached to the stainless steel, had completely turned the silver-white of the stainless steel.

Just this effect alone had far exceeded the several levels of research he had done before.

"let's go outside and find a place to try it out." yang duanhe said directly. he picked up the cloth and led his men out of the research room to the courtyard where their group was allocated.

They arrived at the courtyard.

yang duanhe placed the cloth under the shadow of a tree. in an instant, the cloth changed color to the same color as the shadow.

The approaching color was actually unnoticeable. If they had not known that there was a piece of cloth there, they would not have known at all.

yang duanhe picked up the cloth again and placed it on the lawn in the courtyard.

In a short while, the color of the cloth quickly turned green again, and even a part of the withered grass had changed color.

More importantly, the color-changing composition was a gorgeous crimson red under the sun alone.

however, on the lawn, when the sun shone on it, it gave off a green luster, no different from the sun shining on the grass.

it could be said that the piece of cloth had completely become a part of the lawn.

It was the same logic. It couldn't be that if they knew there was a piece of cloth there, no one would find it, right?

Yang duanhe even got someone to find a few high-tech military cameras to shoot the cloth, but it was also difficult to find it in the picture.

The researchers at the side looked at this scene in disbelief.

academician yang, this color changing ability is really too powerful. If it's used on the battlefield, then it's a very powerful hiding ability.

" that's right. dye a ghillie suit and let the soldiers wear it. even if they lie in front of us, the enemy will not be able to find them. "

Yang duanhe nodded.

The seed that academician Hao and his team brought back from the rocket project was amazing. It helped their team.

the key was that professor li kai had successfully cultivated the seed. otherwise, everything would have been in vain.

"I'll make a request to the leader and ask him to contact two Special Forces soldiers. Let them play a game of finding something." Yang duanhe smiled and went back to the laboratory. He picked up the phone and contacted them.

Not long after.

A leader brought two Special Forces soldiers into the courtyard.

When the leader saw yang duanhe, he immediately asked, " "Academician yang, I've brought them to you. Tell me, how do you want them to cooperate with you?"

"Leader, let these two warriors help us find a piece of cloth in this courtyard!" Yang duanhe immediately said.

The leader was stunned when he heard this.

However, when he thought about how yang Duan and his team would immediately understand the project, he ordered two Special Forces soldiers to find the cloth.

the two special forces soldiers were a little dumbfounded.

They had no idea what was going on.

They were the most elite special Forces, and they were asked to find paper?

However, they also understood that if a leader in this field had asked them to come over, then the search for cloth should not be just a simple search for cloth.

If they couldn't find bu, it would be a little awkward and embarrassing.

At the thought of this, the two Special Forces soldiers also looked into the yard seriously.

In their minds, no matter what kind of cloth it was, with their observation skills, they would be able to find it.

The two of them walked into the courtyard and observed their surroundings inch by inch. However, after observing the entire courtyard once, their expressions became serious.

Because he didn't find any cloth.

The yard was only so big. If there was a piece of cloth, they should have found it very quickly.

The two of them searched again. This time, they were even more careful. They searched every corner and every crack, but they still found nothing.

This also made the two of them start to sweat.

It wasn't that they weren't observant enough, but that they couldn't find anything out of the ordinary. They didn't even know where the piece of cloth was.

now, they might understand why the leaders here had specifically called them over.

The cloth that the other party was talking about was definitely not simple.

Time passed.

The leader also noticed the abnormality and asked yang duanhe, "Is there any progress in the color-changing material?"

"Yes, it's all thanks to professor Li Kai's help in cultivating the living space Seed;" yang duanhe said with a nod;

As he spoke, he walked in front of the two Special Forces soldiers and grabbed a piece of gray-green cloth in the corner of the wall in front of them.

However, that piece of cloth was definitely not of that color. It was as if it had been pulled out of thin air.

This scene made the two Special Forces soldiers' eyes turn serious.

They had looked at that position no less than five times, but they really didn't find anything.

What was even more incredible was that there were three eggs under the cloth.

This was a little shocking.

there were three eggs in front of them, but they didn't notice them even after looking at them several times. what if the three eggs were bombs?

That was simply unimaginable.

The leader was completely shocked by this scene. Then, his eyes revealed a burning light.

he naturally knew how much strategic significance this technology had.

If it was made into a combat uniform, onto a tank, onto an airplane, or even an aircraft carrier?

That was simply unimaginable.

[Chapter 1306 This Color Change Is The Same As Invisibility! The Plants Have Bubbles?](#)

...

Linlin Manor Office.

Qin Lin completed his daily mission again.

However, today was another unlucky day. He didn't even get any tea leaves or wood.

Just as Qin Lin recovered from the game in his mind, he heard a knock on his office door.

Zhao mochen walked in from outside and said with a trace of anxiety, "Honey, go and take a look. Something seems to be wrong with yang."

"What's wrong with this guy?" Qin Lin was puzzled.

although yang's crocodile was weak, it was actually the strongest and most powerful animal in the manor, so it was the least likely to have any problems.

However, when he saw the anxiety on Zhao Moyu's face, he did not dare to be careless and immediately left the office with Zhao Moyu.

When they arrived at the man-made spring, they saw assistant yang lying there and moaning non-stop. It sounded like he was taking a dump, but he couldn't.

however, yang's condition was indeed abnormal.

He immediately went up to yang and patted his head.

Yang would even rub his head against his palm.

This meant that yang was fine.

Then, he noticed something unusual.

The skin on Yang's back was covered in dense cracks, as if it had been split open.

"So it's you who wants to change your clothes." Qin Lin immediately understood what was going on.

yang was shedding.

Previously, he had checked the information of crocodiles and knew that crocodiles could shed their skin. Some would shed once, and some would even shed three times. This kind of shedding happened during their infancy. Once they reached adulthood, they would no longer shed their skin.

Moreover, every time a crocodile shed its skin, it would quickly eat the skin it shed, and it was difficult for ordinary people to find the crocodile skin.

Only experts would have videos of crocodiles shedding their skin.

Little yang had kun's blood and his body grew very fast. He was now a size bigger than wangcai, so he almost forgot that he was still in his infancy.

After knowing the reason, he was not worried anymore. He said to Zhao Moyu, "It's fine. Yang just shed his skin. It's normal."

"Crocodiles can shed their skin?" Zhao mochen was a little surprised. This was the first time she had heard of such a thing.

qin lin nodded. " yes, crocodiles do shed their skin. the more they shed, the fiercer they become. every time they shed their skin, the skin on their body will become stronger and their defense will be higher. "

Zhao mochen nodded. This could be considered as adding a useless point of knowledge.

however, after knowing that yang would be fine, she was completely relieved.

Since these animals had been adopted, she treated them as family in the manor. Naturally, she did not want anything to happen to them.

Qin Lin stayed with yang for a while longer and patted his head. No matter what, it was hard for a crocodile to shed its skin.

Half an hour later, he saw a piece of skin on Yang's back completely split open. The shedding should start from there.

However, at this time, yang was in even more pain, and he even wanted to help him.

However, he couldn't help them with this kind of thing. Shedding was always done when the animal could shed, otherwise it would easily damage the new skin and cause tearing injuries.

Therefore, he could only watch.

After a while.

minister lu's surprised voice was heard, " "Boss Qin, good news, great news."

Minister Lu came running in a hurry with a video in his hand. He handed it to Qin Lin and said, " take a look at this video. It's a piece of cloth made by academician yang and his team using the color-changing ingredients extracted from the color-changing tree leaves.

Qin Lin took the video.

the video was of yang duan and the others experimenting with the cloth.

After he saw the video, his face revealed a look of disbelief.

He had learned from Minister Lu that if the color-changing ability of the color-changing tree was applied to some materials and equipment, it would be very heaven-defying.

seeing the heaven-defying effect of that piece of cloth, perhaps this thing could be used in batches. one day in the future, it would give some countries that needed a beating or unfilial sons that needed a beating an unexpected surprise.

"Boss Qin, what do you think?" Minister Lu could not help but ask.

"It's very shocking," Qin Lin answered honestly.

boss Qin, " Minister Lu requested again, " the higher-ups have asked me to discuss something with you. This color-changing tree is too significant. The higher-ups plan to list this tree as a top secret and won't publicize it.

"So, it's impossible to cultivate and promote the color-changing tree to the outside world."

Minister Lu, what's there to discuss? we'll fully cooperate. Besides, this color-changing tree is yours, so there's no need to discuss it with us. Qin Lin was not someone who did not look at the big picture. He would only think of cultivating this color-changing tree if he was stupid.

This thing wasn't taken out of the game, so there were no restrictions. Others could steal it.

He would only be looking for trouble if he cultivated this thing. Once people from other countries found out, they would definitely come and steal it.

Not only would he be causing trouble for himself, but he would also be causing trouble for the country.

Minister Lu continued, " also, professor Li Kai's credit and honor for cultivating this color-changing tree can not be given to him openly. We can only give him a reward in private. Please talk to professor Li Kai about it.

Qin Lin laughed even more when he heard this.

Why would old brother li care about this?

He knew the truth. Old brother li had been the scapegoat for too many times. He couldn't wait for a new scapegoat and didn't want others to know about this.

Therefore, he called Li Kai in front of Minister Lu.

as soon as the call went through, li kai's voice could be heard, " "Old Brother Qin, what's the matter?"

Qin Lin went straight to the point. brother li, Minister Lu said that there must be some confidential measures taken on the color-changing tree. So, we can't announce your credit and honor to the public. I hope you can understand.

Li Kai's voice was urgent. what's there to understand? I don't want to ruin my reputation. Brother Qin, please tell Minister Lu that I'll fully cooperate with the higher-ups and not mention the color-changing tree.

qin lin laughed when he heard this. he knew brother li very well.

After he hung up, he showed Minister Lu his phone. "See, Minister Lu, I told you old brother li didn't care."

Minister Lu nodded his head. His respect for the two of them grew even more. Truly, it was rare to see such selfless people who did not care about personal gains and losses.

But what he didn't know was that in Linlin's laboratory, Li Kai couldn't help but laugh after hanging up the phone.

He was worried that after the color-changing tree was released, another big pot would come.

They didn't even f * cking water it or use nutrient fluids, yet it could still grow.

Just now, old Brother Qin had really brought him a piece of great news.

It was a pleasant surprise.

This kind of surprise really should come a few more times.

Linlin Manor.

After getting the answer, Minister Lu couldn't help but run to the color-changing tree. He looked at it carefully as if he was admiring a peerless beauty.

He was in charge of scientific research. To him, these major results were more attractive than 100 beautiful women.

He looked at the color-changing tree and then at the other side. There were three more plants, the three alien plants that boss Qin had grown.

He didn't have to pay attention to these three plants before. He could only blame professor Li Kai's color-changing tree for being too terrifying and obvious. Their attention was all on the color-changing tree.

now that the color-changing tree had been confirmed, he was in the mood to take a look at the three plants that boss qin had cultivated.

They were both seeds from outer space and from the same barren planet. It couldn't be that the difference was so great, that one had such magical effects and the other had no special effects at all, right?

Wouldn't it be a waste to ask boss Qin to help this time?

minister lu walked to the three plants. although they didn't grow as fast as the color-changing tree, they were still half a meter long.

"Yi!" what? " Minister Lu asked in surprise. He suddenly looked at the three plants in surprise.

Because he saw a magical scene.

There were actually quite a few bubbles growing on the three plants.

Plants growing bubbles?

what the hell?

[Chapter 1307 584-Little Yang's Skin Offering! Is This Really Not An Oxygen Supply?](#)

Minister Lu was surprised when he saw the bubbles on the three plants.

It was rare to see a plant with bubbles, just like the color-changing tree.

perhaps the three plants that boss qin had cultivated were also very special.

Thinking of this, he went to find Qin Lin, who was with yang, and asked in surprise, "Boss Qin, come with me. The three plants you're cultivating are also abnormal."

Minister Lu pulled Qin Lin to the three plants.

"Boss Qin, what's so special about these three plants?" Minister Lu asked in surprise.

Qin Lin could tell at a glance that the soaked grass had already grown bubbles.

It was within his expectations.

Minister Lu and the others didn't pay attention to the bubble grass when it didn't grow bubbles. Now that it had grown bubbles, they were definitely attracted.

So, he acted again and said with a face full of surprise, "Minister Lu, there seems to be bubbles growing on this plant."

"Yeah, I just discovered it." Minister Lu laughed and said, "it's amazing, isn't it?" Perhaps the three plants you've cultivated have some special effects."

Qin Lin laughed in his heart.

That was for sure.

The effects of the special bubbles would make one's jaw drop.

therefore, he had to cooperate with minister lu's performance.

"It should be," qin lin nodded very seriously.

in the following time, minister lu observed the whole process of soaking grass.

The bubbles that grew on the kimchi grass would grow bigger almost every other day.

the speed was extremely fast.

...

The next day.

Qin Lin pulled Zhao mochen to a room in the inner area. "honey, what do you think of this room?"

"Hubby, what's wrong?" Zhao Moyu asked, puzzled.

qin lin explained, " you see, little qin feng is almost one year old. shouldn't we give him a separate room? let's renovate this room and make a doll bed for mom to look after. she really likes to spend time with her grandson. "

"Ah!" "isn't that too fast? he's still young." zhao moyu was shocked.

"You're not young anymore, you can ride little yang around and play." qin lin said with a smile. normal children were indeed small.

However, little Qin Feng was not young because of his fertility genes. The key was that this guy affected his parents 'sexual happiness.

It just so happened that his mother liked to take care of her grandson, so he had mentioned this to satisfy her wishes.

His mother's exact words were that he could have another child so that the house would be more lively.
so, huhu

Zhao Moyu looked at Qin Lin with a scrutinizing look. "hubby, do you have other motives?"

"Where?" Qin Lin immediately denied it with an embarrassed expression.

Zhao Mo smiled and said with a hint, "No? I'll give you a chance, and I might be able to satisfy you."

"That's because there's Qianqian." Qin Lin didn't stand on ceremony. He directly stepped forward and carried Zhao moqian into the room.

"i knew it." zhao moyin coldly snorted.

He didn't know how long had passed.

Qin Lin walked in from outside and heard Yang's grunting.

He saw it run over and throw something in front of him.

Yang's color was a lot lighter than before.

That was because he had just shed his skin, and the new skin was still a little fragile. It would take a long time for it to completely grow back.

Qin Lin looked at what yang had left behind and was a little shocked.

It was just crocodile skin.

He understood that this was Yang's body.

Normally, after a crocodile shed its skin, it would directly eat the skin.

It was also very nutritious for crocodiles.

"Yup yup yup!" However, assistant yang was desperately calling out to him.

qin lin couldn't help but be surprised.

he understood what yang meant.

The crocodile skin was for him.

He subconsciously thought of crocodile leather shoes, crocodile belt, and so on.

This was real crocodile skin.

Squeak!

The voice of the little fellow redhair rang out.

It jumped down from the side and scuttled to the front of the crocodile skin to smell it. Suddenly, it made a look of retching, very disgusted.

how could a newly shed skin taste good?

"Yup yup yup!" Little yang was obviously dissatisfied with red hair's behavior and barked at him.

Instead, red hair raised his claws at little yang and started squeaking.

It really didn't know that yang could slap it to the ground with one grab.

The key was that in the face of this little guy's fierce yells, little yang suddenly backed off a few steps.

This was a disgrace to the Gator clan.

Seeing this, red hair seemed to be very proud.

at the next moment, wang cai's wuwuwu cries sounded.

Wang Cai came in with snowy, and Chi Mao was so shocked that he ran back to the top of a cabinet.

It was a typical case of bullying the good and scolding the evil.

Qin Lin smiled and picked up the crocodile skin that Xiao Yang had taken off. He took it inside and washed it.

although yang's shed skin might not be used to make crocodile leather shoes or crocodile skin belts, it would be good to keep it in the display cabinet.

qin lin left the inner area and went to the office. after finishing his daily tasks for the day, he also left the hall.

Minister Lu stopped him again. boss Qin, look at these bubbles. They're getting bigger and bigger. The outer layer of the bubbles has strong resistance and won't break easily.

Qin Lin went over and saw that the bubble had begun to condense a crystal-like substance, which meant that it was about to mature.

boss Qin, " Minister Lu pointed at the bubbles, " don't you think these look like dandelions? dandelions are just floating catkins, while these are bubbles.

[Chapter 1308 This Isn't An Oxygen Supply? 2](#)

"It really does look like it." Qin Lin knew this, but he still acted.

"Boss Qin, it's time to give this plant a name." Minister Lu suddenly said.

this kind of unknown crop was usually named by the breeder. even in special circumstances, the hua academy would discuss it with the breeder.

"Since it can grow bubbles, I'll call it bubble grass!" Qin Yang said.

What name?

He could have just used the game's name.

"Alright, then I'll call it bubble grass." minister lu naturally nodded.

A few days later.

The soaked grass had completely ripened.

However, Minister Lu kept walking around the herb and didn't know what it was for.

"Boss Qin," Minister Lu frowned and asked, "do you think the soaked grass should be mature? What's so special about that?"

Qin Lin knew.

However, he couldn't just say that he could put the bubble grass on his head and turn the carbon dioxide he breathed into Qi, right?

Minister Lu, why don't you take off one of the bubbles and let me test it? " Qin Lin could only say this.

"Then I'll have to trouble boss Qin." minister lu said immediately. he couldn't wait for boss qin to take action. after all, this was trained by boss qin, so it was good for boss qin to test it himself.

Qin Lin also put on an act and removed a bubble. Then, he looked at the nodules in surprise. "Eh, these are seeds?"

it was indeed a seed. how could he not know that he had taken it himself?

However, in front of Minister Lu, his acting skills were always up to standard.

"Eh?" Minister Lu was surprised, "why are these soaked grass seeds growing here?" It's so amazing. It's different from the growth of seeds on earth."

"Minister Lu, the color and size of this thing seems to be different from the one you brought," Qin Lin asked again.

"Isn't that normal, boss Qin?" Minister Lu laughed when he heard this. The seeds I brought aren't new, and they're wrapped in that Amber-like substance. Who knows how much time has passed, so the color must be different."

"you're right, minister lu." qin lin admitted with a smile.

This was good.

There were indeed some differences between the herbal seeds and the ones that Minister Lu brought, especially in color. Since Minister Lu said so, then it was true.

This was a good explanation.

Qin Lin returned to the workshop in the inner area with the bubble. He locked the door and entered the game with a thought. He saw the remark of the bubble in his hand:

[special isolation protective bubble: special!]

[this is a bubble that grows from a special plant. If you don't pick it yourself, it's hard to imagine that nature will grow such a strange thing. After wearing it, it has a special effect. As people breathe in

carbon dioxide, it can produce a special reaction with the crystal inside, releasing the Qi needed by the human body. It is harmless: [oxygen supply time: one day, hazardous substance filtration +2, endurance quality +2!]

Clearly, this bubble had already completely matured.

The attributes did not change, which meant that it would not deteriorate after planting.

Since he was going to test the bubbles, he couldn't go out and tell Minister Lu that the test was done and he knew the effects of the bubbles.

So, he went to the warehouse where the wood was stored and found a few Chinese medical plants. Then, he entered the house on the farm and started a fire.

After that, he went to the pond where the fish were stored and took out an Atlantic sturgeon to process it.

the sturgeons 'meat quality was very good, especially in the lower abdomen area. it was very fresh and delicious. if he added his fish cooking skills, the fish meat he made would be indescribable.

In addition, the Chinese anymore seemed to add a special flavor to the fish.

Not long after, a pot of white sturgeon soup was ready.

Qin Lin filled a bowl and ate it happily.

In the hall of the Linlin Manor, Minister Lu was walking back and forth in front of the bubble grass, waiting for Qin Lin's news.

In the game, Qin Lin ate and drank to his heart's content. He looked at the pot of white sturgeon soup and the big bowl of soup that was filled out of the game. Then, he took it out of the work room and brought it to the dining room.

When he saw Zhao mochen and Lin Fen, who was carrying little Qin Feng, come in, he said, mom, Mo Mo, I've just made a fish soup. Come and try it.

Even though this thing needed to be sewn by the sewing machine after eating it, no one could recognize the meat that he had brought out from the game since there were no special and obvious parts.

He had to share this kind of thing with his wife and mother.

Even if his wife and mother didn't know what it was.

Zhao moyin and Lin Fen loved Qin Lin's fish soup very much. They both knew Qin Lin's cooking skills.

sure enough, after the two of them ate the fish soup, they couldn't stop praising it.

"honey, what fish is this? The meat is delicious."

"Yes, this fish soup is much better than the previous ones."

The two girls ate with great relish.

in the manor.

Minister Lu was still observing the three soaked grass, waiting for Qin Lin's test.

although he knew that the testing would not be so fast, he had discovered the abnormality of the bubble grass. as the person in charge of the research, it was inevitable that he was looking forward to it.

qin lin's 'examination' was indeed not that fast.

He spent three days eating, drinking, and having fun before he brought the cup to Minister Lu again.

Minister Lu immediately asked, " "boss qin, how's the test? What's the use of this bubble? or rather, what's the use of the grass's branches?"

"Minister Lu, this bubble is very useful. Come with me!" Qin Lin said mysteriously.

Minister Lu was puzzled. Seeing Qin Lin walking out, he followed him directly.

however, he did not expect qin lin to bring him to the swimming pool.

qin lin called gao yaoyao over and ordered, " "Yao Yao, get Minister Lu a pair of swimming trunks."

"boss qin, what do you need swimming trunks for?" Minister Lu was even more confused.

Qin Lin smiled and said nothing, still mysterious. "minister lu, you'll know later."

chief lu was even more curious now. after gao yaoyao brought the swimming trunks over, he reluctantly went into the changing room to change into them under qin lin's urging.

"Boss Qin, what's going on?" Minister Lu asked again.

qin lin walked up to minister lu, pulled the bubble open in front of him, and put it on his head.

Minister Lu was dumbfounded. What was he doing?

However, not long after he put on the helmet, he noticed something unusual.

Because he did not feel any difficulty in breathing.

this was not right.

With this thing on his head, the oxygen inside would be depleted in no time, and he would be a man of carbon dioxide.

This would gradually make it difficult to breathe.

If you don't believe me, you can try putting a plastic bag over your head.

now that the bubbles were on his head, he didn't feel that way at all. instead, he felt like he was filled with oxygen.

"Minister Lu, do you feel different now?" Qin Lin asked with a smile.

"Yes!" Minister Lu immediately nodded.

"Minister Lu, go into the pool and try diving," Qin Lin said.

Minister Lu was confused, but he had to follow Qin Lin's words.

He also jumped into the pool.

After pouring the water into his mouth, Minister Lu subconsciously closed his eyes. This was also a habitual action, otherwise, the water would get into his eyes.

but the next moment, minister lu came to his senses. there were still bubbles on his head. how could water enter his head?

But when he opened his eyes, he was stunned.

In the water, the bubble was not deformed by the water pressure. Instead, he could breathe smoothly in the water with the bubble. No one entered the bubble.

This was amazing.

He subconsciously squatted at the bottom of the pool, wanting to do further experiments.

as time passed, the shock on his face grew.

he didn't know how much time had passed, but it must have been a long time. his breathing was still smooth, and he didn't feel any difficulty at all.

this bubble seemed to be able to continuously extract oxygen.

It was too magical.

It was just something that grew out of a plant, not some oxygen supply equipment made by modern technology.

[Chapter 1309 Is This A Helmet And Protective Suit?](#)

minister lu was really shocked. he stayed in the water for a while and finally couldn't help but jump out of the water.

After he got out of the pool, he couldn't wait to remove the bubble from his head and asked Qin Lin, "Minister Lu, this bubble seems to be able to provide constant oxygen.

Qin Lin smiled and explained, "Minister Lu, isn't it amazing?" It's all thanks to the crystal that grew inside the bubble. The crystal can absorb the air that people breathe, and then react to produce oxygen."

the most important thing is that when I tested it, I found that this bubble also has the ability to filter harmful gases. It's amazing.

"It can filter harmful gases." Minister Lu murmured. His eyes were very bright. It could provide oxygen and filter harmful gases. He could already imagine what this thing could be used for.

"Boss Qin, how long can the bubbles provide oxygen?" he asked immediately.

"According to my analysis of the crystal, it can be used by a person for about a day," Qin Lin explained.

"A Gu is a day!" Minister Lu was shocked.

this was a little heaven-defying.

for example.

Firefighters.

Most of the time, they needed to carry an oxygen tank on their back when they went to put out fires. If they were saved for a long time, the oxygen supply of the oxygen tank for ten hours was not enough, and they had to change it.

For example, the oxygen tanks on the firefighters weighed dozens of pounds.

When fighting a fire, this weight would be a huge burden on his back.

If he had this bubble, it would be easier. A day's oxygen supply could simply throw away the burden of dozens of kilograms.

More importantly, the bubbles could filter out harmful substances, which would be a great weapon in the fire field.

compared to the color-changing tree, the effect of the soaked grass was greater to a certain extent.

This thing could even be used for large-scale promotion, and everyone could use it.

Putting everything else aside, every family would plant one or two of them so that they could wear them immediately when there was a fire.

Even if some families' children liked to play in the water, how many tragedies could be avoided with this thing?

For some large places, they also had to add some fire control. After all, they had to plant bubble grass.

The other departments were the infectious diseases and Respiratory Medicine departments. These things could definitely replace the original expensive equipment.

in general, this thing could be used in all aspects of society.

"Boss Qin, how sturdy is the bubble?" Minister Lu asked.

there's no problem with this, of course. It's very sturdy. Qin Lin replied with a smile. Although he didn't test the data, he knew that his endurance attribute was +2.

After knowing the function of this bubble, Minister Lu couldn't help but say to Qin ran, "Boss Qin, the space plant that you've cultivated is just as amazing and amazing."

Minister Lu went to the side excitedly and called his leader. He also wanted to report the good news.

The moment the call went through, the leader's voice could be heard, little Lu, academician yang has tested the color-changing material again. He concluded that if there are enough materials, the color-changing effect can be refined and become stronger.

"For the sake of secrecy, bring the color-changing tree back as soon as possible. We must protect it closely."

"Leader, I will bring the color-changing tree back immediately." Minister Lu continued, " " leader, there's one more thing i need to report to you. we've found out about the special effects of the three space plants that boss qin cultivated. it's been confirmed that they're just as amazing. "

"What's its function?" The leader was attracted by her words and immediately asked.

There were two types of space seeds, one of which had produced a magical thing like the color-changing tree. It was hard not to look forward to the other.

minister lu reported, " leader, you can't believe it. the plant can actually grow bubbles. the bubbles can provide oxygen for a day and even filter out harmful substances. "

I even experimented with it myself. I stayed in the water for a long time with the bubble, and I could still breathe smoothly.

"Bubbles? What?" the leader was obviously a little confused when he heard minister lu's words.

It was hard to imagine what it was just by listening to the description over the phone.

Minister Lu also knew this, so he immediately said, " "Leader, I'll bring the things back immediately. You'll know when the time comes."

After hanging up the phone, Minister Lu said to Qin ran, " boss Qin, the higher-ups have ordered that this color-changing tree must be brought back to the capital for strict protection. Also, I plan to pluck all these bubbles and bring them back.

as for the bubble grass and seeds, I'll leave them in Linlin Manor. I'll lead the mystical with the higher-ups, and when the time comes, the higher-ups will share the technology with Linlin's laboratory.

This could be considered returning the favor.

If it weren't for the two from Linlin's laboratory, they wouldn't have been able to cultivate these two magical space plants.

Since bubble grass could be promoted on a large scale, sharing the technology with Linlin's laboratory could be considered a form of repayment.

Qin Lin naturally had no objections to this.

To be honest, with the game around, it didn't make a difference if there was one more or one less item.

he already had enough money now, and any more would just be a number.

Therefore, he didn't mind donating 10% of the assets donated by those people to the cancer treatment experiment to the war fund.

After the discussion between Minister Lu and Qin Lin, they also began to pick the bubbles. There were a few bubbles growing from the three stalks.

[Chapter 1310 Is This A Helmet And Protective Suit?](#)

at the same time, he also told ma hong and the others to get ready and send someone to escort him back. he also asked linlin laboratory to arrange an escort vehicle for him.

Soon, Minister Lu returned to the capital with the things.

the first thing he did was to send the color-changing tree to academician yang's group at the chinese academy of sciences.

At the same time, he brought the two bubbles to the leader.

leader, this is the bubble that was grown by the space plant. As soon as Minister Lu saw the leader, he began to report and handed the leader Pao Pao.

When the leader saw the bubble and thought of the functions that Minister Lu had mentioned, he was naturally shocked.

One must know that it would take a lot of money for scientific equipment to create a protective shield with such a function. Ordinary people couldn't even afford it.

Now, a plant could actually grow bubbles with such a function. How amazing was this?

The leader sighed. it's really hard to imagine. There's no interference. How can a plant grow something like this? wait, human interference? "

the leader's brows furrowed, and his expression seemed to turn serious. he asked minister lu, " "Xiao Lu, look at this bubble and think of the color changing tree. Combine these two things, what do you think of?"

When Minister Lu heard this, he thought for a moment and was stunned. protective headcovers and protective suits? "

"en!" The leader nodded solemnly.

With the effect of the color-changing tree, they also thought of using it on cloth to make the color-changing material.

The effect was also very obvious. This color change was almost the same as a hidden color.

If the color-changing tree was used on the protective suit, what about the bubble? wasn't it just a protective helmet?

It seemed to be a special set material that could be used to make a set of items.

If it was just a coincidence, then it was still possible that it was the magic of nature that created these two things.

However, if it was not a coincidence and something was interfering, or if this thing was cultivated to have such a use, then the situation would be serious.

This seemed to indicate something.

Minister Lu and Minister Zhou certainly didn't know that these two things had nothing to do with each other. It couldn't even be considered a coincidence. It was just a fake.

Qin Lin would never have thought that his own sneaky trick would have such a coincidental combination with another kind of seed, which made Minister Lu and Minister Lu think so.

no matter what, we have to test the effects of this bubble first. Let's send it to the fire department in the capital! in the end, the leader still instructed minister lu first.

Minister Lu nodded.

There was no way to prove those conjectures now.

Now, he could test the effects of this bubble first. This was the most important thing.

...

The fire department had always been the most important Department in the capital.

especially in a crowded international city like beijing, once a fire broke out, it would be a disaster.

Therefore, fire fighting was of utmost importance, and each fire station was well equipped.

In the Central Fire Station, the equipment department had received a new batch of equipment. Zhang Ke had called some firefighters to check the new equipment today.

A firefighter took the equipment and put it on. The equipment was actually protective clothing and an oxygen tank.

The firefighters picked up the oxygen tanks, weighed them in their hands, and complained, "

"I wonder when the oxygen equipment can be improved."

"Yeah, carrying 100 pounds is really exhausting."

hey, these oxygen tanks seem to have gotten heavier. Did I sense it wrong? "

"....."

zhang ke was distributing equipment to a few firefighters. when he heard their complaints, he nodded helplessly. he couldn't do anything about this, because it was purchased by the higher-ups.

At this moment.

However, he saw the director suddenly come in with a man carrying a very tight box.

the bureau chief entered and waved at zhang ke, "Zhang Ke, come here for a moment. Find someone to test out the effects of the things in this box."

"Chief, What is this?" Zhang Ke doubtfully stepped forward and asked.

the director explained, " i'm not sure. the leader of the chinese hospital sent it over and asked us to experiment. he said it's some protective bubble. there's an instruction manual in it on how to use it. "

Zhang Ke nodded and opened the box, revealing a few strange bubbles.

At first glance, it should be a Hood-type function.

Zhang Ke picked up a bubble and looked at it. He was a little confused. It didn't seem to be made of high-tech materials. Instead, it looked like a plant and had a special smell.

This was a little strange.

Next, Zhang Ke picked up a manual from the box.

Looking at the contents of the instruction manual, Zhang Ke was stunned. When he finished reading the entire content of the instruction manual, his face was filled with disbelief.

Did this thing really grow out of a plant?

More importantly, it was unbelievable that something that grew from a plant could have such a magical effect.

However, if this thing was really that magical, then it was too heaven-defying.

Didn't the firefighters just complain about the oxygen tank? This could be perfectly resolved.

Moreover, the soldiers released the oxygen tanks, which made it more efficient to put out the fire. They could do more things, and it was safer.

After all, the weight of the oxygen tank would really affect his movement.

Thinking up to this point, Zhang Ke picked it up and said to the firefighters, "Put down the oxygen tanks and try out this new device."

the soldiers were carrying the oxygen tanks on their backs. they were puzzled when they heard bubbles's words, but they still put the oxygen tanks down and walked to the box. they looked at bubbles in confusion.

"What is this?"

"It's like a hood."

"What's this new equipment for?"

"....."

the few warriors expressed their doubts.

Zhang Ke took it and explained, " this thing can be opened and put on. This thing can replace oxygen equipment. It's a new thing that the Chinese People's Hospital made.

The firefighters were overjoyed when they heard that this thing could replace fire-fighting equipment. Coupled with the reputation of the Chinese hospital, they were eager to try.

Very quickly, the firefighters put on the bubbles in the box.

zhang ke looked at it in surprise. the gap in the bubble was actually tightly fitted to the soldier's neck. however, the bubble and the protective suit were a little lacking.

This was not a problem. If the bubbles really had the effect described in the instruction manual, then the relevant departments would naturally redesign the protective clothing and use the bubbles strictly.

After the firefighters put on the bubbles, their faces began to show incredulity. They often used oxygen equipment during their training, so they could naturally feel the difference.

Even if it was an oxygen equipment, it would still be a little uncomfortable to breathe normally. After all, the oxygen and the carbon dioxide exhaled would be a little mixed.

However, it was different with this bubble. He didn't feel that way and his breathing was very smooth.

after a few minutes, they were completely convinced that this thing could provide oxygen.

"How is it?" Zhang Ke also asked curiously.

"it's better than an oxygen tank!" one of the firefighters replied.

The other firefighters nodded in agreement.

this made zhang ke even more surprised. he immediately asked his men to open up the training ground and let a few firefighters bring bubbles for actual combat training.

The training ground was a place that simulated a fire field. There were obstacles, thick smoke, and Dummies inside. The soldiers needed to put on all the fire-fighting equipment and then pass through the obstacles to bring out the dummies.

The training ground began soon, and the firefighters rushed into the training ground after the timer began.

zhang ke and the leader were waiting outside. as time passed, the firefighters who had rushed into the training ground came out with dummies. this meant that the training was completed.

As soon as they came out, they also praised, "

"This thing is too easy to use."

" that's right. it's the first time i've felt that training is so easy. "

"....."

"how's the result?" the director asked immediately.

yes! the person who was keeping track of the time immediately reported, " the time for the rescue to be successful has been shortened by nearly two-thirds!

This result shocked both the director and Zhang Ke.

They knew what it meant to save so much time!
