

The Game 1331

[Chapter 1331 Beggar's Chicken, A New Glowing Food](#)

There were many facilities in the greenhouse Tree Community. In addition to the toilet of each greenhouse tree, there was a large public toilet outside.

In addition, there were restaurants and shops.

However, in order to not affect the overall beauty of the greenhouse Tree Community, these facilities were also built with wood. The color style was similar to the overall color of the greenhouse trees. They were also covered with mutated space vines.

Therefore, the mutated space vines glowed at night, which was no worse than the greenhouse trees.

Qin Lin brought Li Kai to walk around the greenhouse Tree Community. Compared to when they first came up, the greenhouse Tree Community had given Qin Lin a completely different feeling after it opened.

Behind the two of them, the manager of the greenhouse Tree Community had been quietly following them for a long time, waiting for instructions.

Outsiders didn't know little Qin's identity, but as the attraction's manager, she knew very well that this was the boss.

Li Kai had always been in Linlin's laboratory, and this was his first time coming to the greenhouse district. He was obviously attracted by the +2 eye-catching and +2 beauty attributes.

"Brother Qin, I've also seen the videos of your flower greenhouse District. It's fine that it's so beautiful at night, but there's actually such a strong sense of appreciation during the day. I really have nothing to say. The projects you've created in this Scenic Area can't be compared to other places."

The manager of the service staff agreed with this.

Their Linlin Scenic Area was definitely the best in the country, and this was also publicly recognized.

Obviously, she was very proud of this. After all, she was one of the supervisors of the Linlin Scenic Area.

"Clean up the room for us first!" Qin Lin ordered her.

"Alright, Chairman Qin." The head of the service staff immediately nodded and turned around to personally make the arrangements.

The greenhouse area was the same as the nuptial area, with reserved rooms.

However, the rooms reserved in the greenhouse Tree Community were in another area, not connected to the entire greenhouse Tree Community.

There weren't many greenhouse trees there either, only a dozen or so, but the location was better and the decoration was more exquisite.

After all, the Linlin Scenic Area was so big. Putting aside Qin Lin and Zhao Moyin, there were several senior managers, as well as the senior management of the Linlin company and Linlin laboratory.

if their families wanted to visit the scenic area, they could ask the scenic area to arrange their accommodation. they also had the right to use their connections or rights to arrange for them to stay in reserved rooms.

the nuptial area, the tent area, and the greenhouse tree area were all the same.

For example, it was not a problem to arrange for a family of three to live in a greenhouse tree. Even if there were more people, they would only be able to arrange two or three greenhouse trees.

This was also human nature.

When one was in the top management, they would have special rights no matter which company they were in. To put it in a more elegant way, it was called extra treatment.

the greenhouse tree community was still lively today.

Compared to the grand opening, it was even harder to book the rooms in the greenhouse Tree Community.

After the promotion of the beautiful scenery of the greenhouse Tree Community, more people poured into the reservation page, and the probability of getting a reservation also decreased.

Qin Lin and Li Kai passed by a small street and saw a few tourists gathered there discussing.

I felt that there was no problem with sitting in the palanquin before. Now, what do you think? "

that's right. Those goddesses on the internet should all be banned. They think they're so righteous after destroying other people's jobs.

"It's not embarrassing to earn money by working hard. The palanquin is also a kind of service."

"....."

Qin Lin laughed when he heard this, indicating that his plan had worked.

This was good.

"Brother Qin, I only found out after watching the video just now that this is the purpose of you bringing me to the palanquin, right?" Li Kai said with a smile.

"Yes, that's my purpose," Qin Lin said with a smile.

"Since I've helped you for free, shouldn't you reward me? Do you want to cook?" Li Kai also took the opportunity to extort.

"Let's talk again!" Qin Lin smiled and refused.

"Brother Qin, you can't just pull up your pants and not pay me!" Li Kai was anxious.

Qin Lin was speechless. brother li, mind your words. I have a wife.

The situation on the internet had indeed completely reversed. From online violence, it had turned into a denouncement of those goddess-like B * stars, denouncement of those self-righteous messengers of justice.

Who knew how many people were in a hurry to delete their videos or comments.

Naturally, this also made the tourists have a strong rebellious mentality towards sitting in the palanquin. Previously, they didn't dare to sit for fear of being exposed on the internet, but now they were very happy to sit.

One could see that on the mountain path, there were sedan carriers carrying tourists up the mountain.

The sky gradually darkened.

Fairy Tale Mountain once again opened up its nightlife.

The porters on Fairy Tale Mountain were all drenched in sweat, and their clothes were basically wet.

But they were all smiling.

This smile was the satisfaction of obtaining something.

Many tourists took a close-up of them and posted them online.

This kind of smile was infectious and made people think more deeply.

Therefore, on the internet, one should never impose one's own thoughts and what one believed to be justice on others.

Because you don't know the reason, you don't know the truth of the matter, and your casual opinion may cause the greatest disaster to others.

The porters were indeed happy.

This was because they had earned more than 500 today. Some of the tourists who were good at talking would even tip them and earn more.

They only hated their lack of physical strength. Even if they had been drinking Linlin Leisure Tea to replenish their strength, how could recovery be faster than consumption?

This was undoubtedly a very high income for them.

They were full of hope for the future.

The Greenhouse Tree Community.

[Chapter 1332 Beggar's Chicken, A New Glowing Food](#)

Qin Lin and Li Kai also arrived at the reserved greenhouse area.

This was considered an independent area.

If the area outside was a residential area, this place was more like a Manor villa. Other than the independent swing, tables, chairs, and Pavilion, there was also an independent sunrise viewing platform.

Since he had brought Old Brother Li up here, he also planned to watch the sunrise, although it was strange to watch it with a man like Old Brother Li.

But he was already here.

He was the one who suggested the sunrise viewing project in the greenhouse Tree Community, but he had never seen what a sunrise looked like, so he didn't know how it would compare to the sunrise on goddess mountain.

Li kai, on the other hand, was uninterested in this. how could a researcher be in the mood to watch the sunrise? he even directly expressed that he would definitely not get up unless a big meal was served.

Qin Lin was helpless about this.

This old brother Li thought she was a beautiful woman, but he had to beg her to watch the sunrise.

Delicious food?

he said directly, " old brother Li, i'm not interested in making any delicious food on this mountaintop. isn't this just looking for something to do? isn't this stupid? "

As soon as he said this, Qin Lin looked at the screen in his mind in surprise.

A familiar figure suddenly appeared at the entrance of the farm.

It was the gourmet again.

The frequency of this guy's appearance was a little high now.

When he triggered the gourmet plot mission, he was rewarded with a secret recipe for making glowing beef, which allowed him to make a quality 4 beef delicacy.

I wonder what this guy is up to this time?

Qin Lin immediately controlled his game character to go to the entrance of the farm and clicked on the gourmet.

the gourmet's voice came in.

[it's great to see you. I want to ask you for a favor. I'll pay you!]

The gourmet's words were direct and direct. He was clearly in a hurry.

Qin Lin controlled the game and clicked on it, and the conversation appeared again.

[there's a new special ingredient store in ore town, and rare high-quality ingredients will be refreshed from time to time. However, I have limited funds on me. If I spend the money on this, I won't have the money to buy a ticket for the next trip. Can you help me buy some rare ingredients?]

"Ran ran." Qin Lin wanted to complain when he saw the task.

How could a gourmet have no money to buy a ticket?

Are you kidding me?

Think about the gourmets invited by the Linlin Ranch to the food Festival, which one of them wasn't rich?

many of those gourmets were big bosses themselves.

Did the game producers have some misunderstanding about the gourmets?

How could a gourmet reach this level? This was a bug-like gourmet who knew all kinds of magical cooking skills.

qin lin didn't bother to argue about this.

It was a good thing to have a mission anyway.

Who cares if the lousy game producers misunderstood the gourmet?

since there was a mission, no matter what the reward was, it would be good for him.

He accepted the mission, and the gourmet thanked him.

[thank you so much. I'm really glad to have you as a friend in ore town!]

After the conversation ended, Qin Lin controlled his game character and headed to ore town.

After walking around ore town, he finally saw the newly opened food store next to the seed mixer the gourmet had mentioned.

He controlled his character to enter the shop and clicked on the employee. A prompt appeared:

[due to the economic development of ore town, our store has opened a branch in ore town. Not only will we buy all kinds of products, but we will also occasionally sell rare food ingredients!]

Through the detailed remarks below the prompt, Qin Lin found that if it wasn't too troublesome, the products from the ranch could be directly moved to the newly opened shop to sell one by one. This way, they could get a higher price than selling the products from the ranch.

But obviously, Qin Lin didn't have the time to do so, and he didn't want to waste it.

there were a lot of gold coins saved from selling fish and mountain products in the game every day.

He was curious about the rare ingredients the gourmet had mentioned.

So, he immediately controlled his game character to click on the shop assistant to open the item list:

[white radish: quality 2]

[cauliflower: quality 2]

[black carp: quality]

...

[cucumber: quality 2]

[mitten crab: quality 2]

...

Qin Lin looked at the list of items for sale in the store. One by one, the items appeared, and all of them were quality 2 ingredients.

This made him a little disappointed.

If it was only these ingredients, his farm had them too.

He turned to the next page, and it was still a quality 2 ingredient. However, some ingredients were world-famous, and the game seed store could not buy the seeds.

However, when he flipped to the last page, he was pleasantly surprised.

[special ingredient chicken: quality 3(X2)]

qin lin was surprised.

Was this the rare ingredient the gourmet had been talking about?

Qin Lin suddenly felt that his drooling speed up.

He was used to eating high-end food, so he had very high requirements for food.

To him, a quality 2 ingredient was no different from a normal ingredient. Now that he could buy a quality 3 ingredient in this ingredient store, it was definitely a huge blessing for him.

There were two portions of chicken meat, a special ingredient of Grade 3.

Qin Lin immediately controlled his game character to buy the two quality 3 ingredients. After clicking to exit the page, he immediately clicked to enter the refresh.

This time, he didn't find any quality 3 ingredients.

He tapped a few more times in a row, but it was still the same.

This meant that even quality 3 ingredients needed to be refreshed by luck.

Then, he controlled his character to return to the farm, where he saw the gourmet still standing at the entrance.

He thought for a moment, then controlled the game character to go to the storage room and put one of the chicken pieces there.

He was afraid that once he handed in the mission, the two portions of chicken with a quality of 3 would be taken away. Wouldn't that be a joke?

Qin Lin put down a piece of Level 3 muscle, then controlled his character to go to the gourmet and submit the task.

the gourmet's voice reappeared.

[this chicken ingredient is perfect. You really bought it. Thank you so much. Since you bought the chicken, I'll give you something related to the chicken, right? [this is for you. I've carefully researched this.]

Then, a scroll appeared in the game character's hand, along with a notification:

[congratulations, you've obtained the secret recipe of beggar's chicken, which the gourmet has carefully researched!]

Beggar's chicken?

This was a dish that he was very familiar with. It had even appeared in many movies and television shows.

The gourmet had actually given them the recipe for this dish.

He wondered if the gourmet had become stingy.

After all, he used to cook either fish or crustacean-type dishes.

Now, he could only make beef or beggar's chicken. The restrictions were quite big.

"Old Brother Qin, why are you suddenly in a daze again?" Li Kai's voice rang in Qin Lin's ears.

Li Kai looked at Qin Lin and shook his head. He didn't know what this Qin Lin was thinking, but he realized that he was really prone to being dazed.

qin lin returned to his senses and smiled awkwardly at li kai. " "Old brother li, do you want to eat some good food?"

"Brother Qin, didn't you say that you don't cook on the mountaintop?" Li Kai asked, stunned. Only an idiot would do it?"

"Ran ran." When Qin Lin heard this, he looked at Li Kai with black lines in his head. "Old brother li, do you want some?"

"Eat!" li kai said decisively.

then go find the manager of The Flower House and Tree Community to prepare the food. I'll go to the kitchen to get the ingredients. Qin Lin naturally wanted to send brother li away. Otherwise, how could he enter the game and take out the ingredients?

Li Kai had already pouted, so he didn't hesitate and immediately went to find the manager of the greenhouse tree District.

After Li Kai left, Qin Lin entered the greenhouse he had stayed in for the night and locked the door from the inside.

other than the entrance and the surrounding surveillance cameras, there were no other surveillance cameras in this area. therefore, he did not need to worry about being discovered.

with a thought, he entered the game and saw the note of the beggar's chicken recipe:

[special beggar's chicken recipe: special cooking skills!]

[this is a cooking technique created by the gourmet. it can make a special beggar's chicken.

Deliciousness +1, texture +1, fragrance +1! [special rice ingredient: light +1]

"Glowing again?" Qin Lin suddenly realized that it wasn't the gourmet's stinginess.

the gourmet's secret recipe was becoming more and more limited, but it seemed to have special effects.

[Chapter 1333 Today's Lucky Day! Heaven-Defying Luck! 1](#)

after qin lin read the remarks of the beggar's chicken recipe, he immediately chose to learn and use it.

The recipe scroll instantly turned into specks of light and entered his body.

His mind received all the information about the beggar's chicken's Secret recipe, including the cooking method and the special secret ingredients.

at the same time, the muscle memory given by the system made him feel as if he had made beggar's chicken countless times.

however, qin lin was very familiar with the special ingredients.

Wasn't this the recipe ingredient that he had used for beef cooking?

It was also because of these ingredients and the system's characteristics that the beef made would shine.

Now, the beggar's chicken also had the same recipe. It was almost exactly the same, but it needed a few less ingredients than the beef cooking.

After learning the secret recipe of the beggar's chicken, Qin Lin hurried to the storage room and found the chicken, a special ingredient of Level 3.

This chicken wasn't small. It could even be said to be very large, twice the size of a normal chicken.

[special ingredient chicken: quality 3]

[this is the meat of a domestic chicken that is specially cultivated for consumption. It can be used to make a very delicious chicken dish. Effect: Taste +3, deliciousness +3, fragrance +3, appetite +3, nutrition +2, protein +2!]

Qin Lin looked at the remarks of this special ingredient, chicken, and understood why it was said to be specially cultivated domestic chicken meat.

Taste +3, deliciousness +3, fragrance +3. With these three attributes alone, any chef could show the strength of a God of Cooking as long as their cooking skills were not too bad and they could fry the ingredients until they were black.

Also, the +3 appetite attribute would make people salivate faster. Even an anorexic person would become a glutton.

Not to mention the +2 nutrition and +2 protein attributes.

why did people have to eat chicken? Wasn't it to replenish his nutrients?

Although these two attributes were only +2, they were simply awesome, okay?

More importantly, the gourmet had also given him a beggar's chicken recipe, which also gave him +1 deliciousness,+1 taste,+1 fragrance.

Didn't that mean he could make +4 delicacies again?

Qin Lin immediately exited the game with the grade 3 zombie chicken and returned to the greenhouse tree.

He opened the locked door and saw that old brother Li hadn't returned yet. He was relieved and hung the quality 3 chicken on the side.

After a while, Li Kai came back with the manager of the flower greenhouse community and a few waiters carrying all kinds of cooking props.

The flower greenhouse Tree Community did not have any self-service barbecue services. These were all backup props from the kitchen of the flower greenhouse Tree Community.

If the boss wanted to use it, he would naturally bring it over immediately. Most importantly, the kitchen was also at ease. After all, they all knew that their boss was the master chef.

"Old Brother Qin, I've brought all the cooking utensils." Li Kai stepped forward and asked for credit.

Qin Lin looked at the cooking tools with a helpless expression on his face. He didn't know the gourmet had given him the secret recipe of the beggar's chicken.

Most of these cooking utensils would not be used to make the beggar's chicken.

After the manager of the greenhouse Tree Community had the things put down, he also respectfully asked Qin Lin, "Chairman Qin, do you have any other instructions?"

Qin Lin shook his head. You guys go do your own things. I'll call you if there's anything.

"Alright, Chairman Qin." The manager of the greenhouse tree District nodded and immediately led the people out.

However, she didn't leave. Instead, she waited outside with her men.

After all, the boss was inside, and she could get him to give her any orders immediately.

Li Kai also saw the chicken at the side and immediately asked, "Brother Qin, are you going to cook chicken tonight? This chicken is a Little Big."

Qin Lin nodded, and at the same time, he took out his phone and called Zhao Moyin.

Since he could make quality 4 dishes, how could he miss out on his wife and mother?

He made a phone call to Zhao Moyi to bring his mother up. In addition, he also called old brother Li's wife, Dr. Tang, to taste it together.

He would just treat it as a midnight snack.

In addition, he also asked Zhao Mo to bring some things up, which were the special ingredients.

When he was cooking the beef, he had bought a lot of the ingredients and stored them in the kitchen of the manor's dining hall. He could just take them out and bring them upstairs.

at that time, he just needed to pick out the few ingredients that were not needed to make the beggar's chicken.

In addition, he had to bring some other ingredients. He had to go with some other things.

Not long after, Zhao mochen came up with little Qin Feng.

Next to her was Tang xiuwan, who was also holding her daughter.

Behind them was Lin Fen, who was happily chatting with an old woman. The other party was Tang xiuwan's mother, and she was holding a little girl's hand.

Li Kai had researched the main ingredients of the Sima drug for this little girl.

However, Li Kai didn't lose out. After all, it was a buy one get one free deal.

Behind Zhao Moyu were Three Waiters carrying things, including the recipe and ingredients that Qin Lin needed, as well as other ingredients.

When they arrived, the two elders took over the children.

Zhao moyin walked towards Qin Lin and asked curiously, "Hubby, why did you suddenly think of cooking on this?"

Qin Lin made up an excuse. the greenhouse Tree Community has just opened, and the environment here is really good. With the current climate of you city, it's a very rare enjoyment to have a late-night snack here. Plus, brother li is free today, so our two families can get together.

Zhao mochen nodded and did not suspect anything.

the environment of the reserved area was indeed very good. it was indeed a kind of enjoyment to have supper here. in addition, qin lin said that the two families could get together, which made more sense.

After Qin Lin took the recipe, he picked out a few ingredients that he didn't need to make the beggar's chicken.

With these ingredients, the beggar's chicken recipe's attributes could be displayed and it could shine.

Of course, if he only had the recipe ingredients and didn't have the secret recipe of beggar's chicken given by the system, he wouldn't be able to display the effect.

After Qin Lin divided the other ingredients, he began to mix the sauce, which was to be spread on the whole chicken.

The preparation of the sauce also needed to be done according to the order. Moreover, the proportion of the ingredients needed to be added was also different, so it had to be done according to the proportion in the secret recipe.

fortunately, the information of the system's secret recipe was imprinted in his mind.

muscle memory also made him very familiar with the ingredients.

After the sauce was ready, he took off the special edible chicken hanging on the side and began to cut small holes so that the muscles could better absorb the sauce.

the beggar's chicken had actually been around for a long time. there were different ways of cooking it in china and even abroad.

However, the cooking method was more or less the same. They both brushed the ingredients on the processed chicken first, then wrapped it with lotus leaves, lard, and yellow soil, and then stewed it in the fire.

The only difference was the ingredients.

when the dried mud chicken was cooked, the mud shell and outer lotus leaves were removed, revealing the delicious cooked chicken.

Qin Lin quickly began to spread the sauce on the whole chicken. This process required extreme attention to control the thickness of the sauce.

Otherwise, it would also greatly affect the taste and texture of the beggar's chicken.

At the same time, he also instructed Li Kai, " old brother li, don't just sit around. Dig up some soil to make up for the mud. We'll need to use it later. There are no lotus leaves here, so we'll have to replace it with harmless barbecue paper.

Li Kai had always been looking forward to Qin Lin's food. He didn't hesitate when he heard Qin Lin's words. He immediately found a small hoe and left the reserved area to start digging.

He dug out a small bag of soil and returned to the greenhouse tree. He found another basin and poured water into it to mix the mud.

"Giggle!" When little Qin Feng saw Li Kai kneading the mud, he chuckled and reached out his hand, as if he wanted to play with the mud too.

Regardless of how fast he was developing due to his fetus-beneficial gene score, he could not avoid the stage where he liked to play with mud.

Lin Fen naturally wouldn't let the little guy have his way, so she hugged him tightly.

After a short while.

Qin Lin had already covered the whole chicken with the sauce and wrapped the whole chicken with barbecue paper instead of lotus leaves. Then, he tied it with a special rope.

Li Kai immediately brought the mud over. "Brother Qin, I'll help you stick the mud, so you don't have to dirty your hands anymore. There's no technical requirement for this mud, right?"

"the technical requirements are still very large." Qin Lin said with a smile.

"Uh, you need skills to do this?" Li Kai immediately revealed an embarrassed expression and tactfully moved aside.

Qin Lin took the soil and began to work.

He wasn't joking. The recipe for the beggar's chicken given by the system was just like that. There were requirements when applying the paint, and there were also requirements for the thickness of the mud.

If it was thicker, the heat receiving layer would be smaller, and if it was thinner, the heat receiving layer would be bigger, which would all be affected.

therefore, even if it was a simple beggar's chicken, it was not easy to make. after all, it was a quality 4 beggar's chicken.

after everything was done, qin lin started a fire and placed the beggar's chicken on it.

Even at this level, the heat control still needed to be controlled. However, with the special small stove controlling the fire, he could spend less energy in this area.

Therefore, he also started to prepare the other ingredients.

These were all ingredients with a quality of 2. Without the corresponding cooking skills, he could only achieve the level of deliciousness +2 and texture +2.

Fortunately, these things were used to match the beggar's chicken.

After Qin Lin made all these ingredients into delicious food, he put them on the table next to him.

When Li Kai saw this scene, he immediately walked to the table and said with a smile, "Old Brother Qin, let me help you taste the food first."

qin lin shook his head. he could have just said it if he was hungry, but he had to make it sound so nice.

then, he turned back and continued to pay attention to the beggar's chicken.

however, at this time, he was surprised to turn his attention to the game in his mind screen.

Another figure had appeared at the entrance of the ranch. It was the mayor, Thomas.

Was another plot mission triggered?

qin lin couldn't help but look surprised.

It was the first time that he had triggered two plot quests in one day.

did he become a european king today? was his luck heaven-defying?

[Chapter 1334 A Beggar's Chicken Can Also Glow? The First Goblin Mission](#)

Qin Lin looked at Thomas in the game and suddenly felt a sense of familiarity.

who would be unhappy to suddenly become a european king?

He'd just gotten a beggar's chicken recipe from the gourmet. Although it wasn't very useful, it was enough to satisfy his appetite occasionally.

Now that Thomas was here again, it wouldn't make sense if he didn't give him a surprise, right?

since he wanted him to be the european king, he would be more european.

Just as Qin Lin was thinking about it, the beggar's chicken in front of him made a slight cracking sound. It was the soil that had been roasted hard and had slightly cracked.

This also meant that the beggar's chicken was almost ready.

He immediately came back to his senses.

He could do it after the mission, but he had to finish the beggar's chicken first.

When the soil of the beggar's chicken was broken, he had to control the fire again. He had to turn the fire down a little.

This scene attracted the attention of Zhao mochen and Tang xiuwan.

As women, they knew how to cook too. After all, in most people's eyes, women had to know how to cook in order to have a happy family.

Those women who didn't know how to cook were either from rich families or married rich husbands. If they didn't have either of these, then problems would slowly arise in their lives.

It was precisely because they knew how to cook that they were surprised.

They didn't expect that there would be so many details to make a beggar's chicken. They even had to keep an eye on the control of the fire.

However, it had to be said that a man who was serious about cooking was very handsome and attractive.

Tang xiuwan couldn't help but be envious. Motian, I'm so envious of you. Chairman Qin has such good cooking skills.

Li Kai seemed to have heard his wife complimenting someone else, so he immediately went up to her and said, " Junior Sister, although I don't know how to cook, I know how to taste good food. You saw that old Brother Qin was studying beggar's chicken, so you asked me to taste it. Otherwise, how could I have such a late-night snack? "

as he said this, he didn't forget to shout to qin lin, "Old Brother Qin, don't you think so?"

In fact, when he asked this question, he was already giving a hint.

Qin Lin had a good EQ, so he immediately smiled and said, " "yeah, brother li is right."

Li Kai immediately turned to Tang xiuwan and said, " "Junior Sister, don't you think so?"

tang xiuwan rolled her eyes at him.

His senior brother was clearly a famous researcher, but sometimes he acted like a fool.

Finally ...

It was time for the beggar's chicken, so Qin Lin turned off the fire on the small stove.

At this time, the soil on the surface of the beggar's chicken was very hot, so he could only use tools to bring the beggar's chicken to the table. Otherwise, if he waited for the soil to cool before taking it, the chicken inside would lose its most delicious taste.

After placing the beggar's chicken on the table with the tools, Li Kai immediately surrounded it.

Zhao moqian and Tang xiuwan also stepped forward curiously.

they knew qin lin's cooking skills. after the food festival, it was no problem to say that he was the best chef in the world.

They were naturally curious about what the beggar's chicken Qin Lin made looked like.

Even the manager and waiters of the flower greenhouse Tree Community who were on standby outside looked in curiously. These people also knew how good their boss 'cooking skills were.

the boss had been cooking for a long time, and the beggar's chicken was obviously the main dish. one of the waiters couldn't help but take out his phone to take a picture.

Qin Lin had already taken a small hammer and began to hit the soil on the surface of the beggar's chicken. He smashed all the dry and hard soil and then Cut the Rope with a pair of scissors.

When the last layer of barbecue paper was opened, a layer of steam floated out along with a strong fragrance.

Then, something that surprised everyone happened.

The moment the steam emerged, a blinding light flashed and entered everyone's eyes.

"It's glowing again." A waiter's exclamation came from outside.

The manager of the flower greenhouse tree District glared at the waitress, but her face was also filled with shock.

Zhao moqian and Tang xiuwan were the same.

They all knew that Qin Lin's cooking skills were very good, and he had also made glowing food before.

It could be said that after that Food Festival, most of the people in the country knew that little Qin could make glowing food. That kind of scene that only existed in movies and animation was real.

Because of those gourmets, even many people who liked good food abroad knew that there was a master chef in that Eastern country. His food was better than any other chef's.

However, the beef was cooked in a pot.

zhao mochen and the others really didn't expect that qin lin's beggar's chicken, which was wrapped in layers of soil, could actually shine.

this was even more unbelievable than the beef he had cooked last time.

Moreover, after the beggar's chicken was opened, they smelled a strong fragrance spreading out, making them unable to stop.

That was caused by the fragrance +4 attribute.

It could be said that this alluring meat fragrance quickly spread out, and even the manager of the greenhouse Tree Community and the waiters outside could smell it.

Moreover, the +4 attribute did not stop there. The fragrance seemed to be condensed and did not dissipate. Even a few tourists who were taking a stroll not far away could smell it.

Logically speaking, it was impossible for even the fragrance of food to travel so far.

However, as the tourists walked, they smelled an alluring fragrance.

it smells so good. Is someone making some food? "

"it should be how meaty!"

"It's coming from that side!"

"....."

the visitors followed his gaze and saw the reserved area inside the greenhouse tree. they also saw the manager and the staff of the greenhouse tree community waiting for service.

[Chapter 1335 A Beggar's Chicken Can Also Shine? The First Goblin Mission \(2\)](#)

A few visitors had wanted to find out what was going on, but they gave up after seeing this scene. It was obvious that he was not an ordinary person, so they did not want to get themselves into trouble.

however, under this fragrance, their saliva secretion accelerated inexplicably, and they even felt a little hungry.

"I suddenly feel like eating barbecued meat."

"yeah, i've only been full for a short while, but i'm already feeling a little hungry."

"Let's go to the cafeteria and order some barbeque!"

Obviously, this was the effect of the special chicken meat's +3 appetite attribute.

Similarly, the manager of the greenhouse and the waiters were also affected by this attribute. They felt like their stomachs were growling, and they were inexplicably hungry.

However, as a worker, he could only stay here and keep reminding himself to finish eating.

Zhao moyin and Tang xiuwan were different. With the +3 appetite attribute, they wanted to taste the beggar's chicken as soon as possible.

"Chairman Qin, even the chicken you made is so attractive." I can't believe it! Tang xiuwan couldn't help but praise him. I can't imagine how you can make food so delicious.

"brother qin, hurry up and cut it open. just the aroma alone is enough to make people unable to resist," li kai urged.

qin lin smiled. he took a knife and started to cut the chicken. he gave everyone a portion and even gave tang xiuwan's daughter a chicken leg.

As for the meaty part of the chicken breast, it was given to Lin Fen and the others. The meat quality here was good, and the old people's teeth were not as good as the young people's. The meat here was most suitable for the elderly.

Li Kai couldn't wait to eat the meat as soon as he got it. However, with just one bite, the +4 deliciousness and +4 texture attributes made his face full of disbelief. brother li, it's so delicious. You really hid it well. You cook chicken so well. We've known each other for so long, but you didn't even let me try it.

Mr. Qin's cooking skills are amazing, " Tang xiuwan complimented. I almost bit my tongue.

Even Zhao moyin had only eaten A +4 delicacy once.

It was the beef that Qin Lin had specially made for her during the food Festival.

that was when she found out that her husband could actually make food glow.

that was also the first time she had eaten something so delicious.

Now that she was eating the beggar's chicken, she really felt that it was not inferior to the beef at all. In fact, because of the delicate texture of the chicken and the food, it even surpassed the beef from before.

For some reason, she felt very proud to have a husband who could cook such delicious food.

Even Qin Lin himself couldn't resist the taste of a 4 grade delicacy. He cut off a wing and ate it.

After that, Li Kai even took out his own knife.

To Qin Lin's surprise, he directly cut off the chicken butt and put it in his mouth.

"why does old brother li still like this place?"

As they ate, Qin Lin realized something. The other food had been made for nothing. No one was eating anymore. They were all focused on eating the beggar's chicken.

even though the beggar's chicken had already been killed, he had no intention of finding other quality 2 items.

In the end, he could only let the manager of the greenhouse Tree Community take some people to deal with those things and bring those simple kitchenware back.

At the same time.

It was impossible for Lin Fen and the others to go down the mountain again. They had to get people to clean up two more greenhouse trees.

Naturally, Zhao Moyu and Qin Lin lived together.

Little Qin Feng would definitely be left to his grandmother Lin Fen to take care of.

After the meal, they chatted.

It was mainly Zhao mochen and Tang xiuwan, and Lin Fen and Tang xiuwan's mother. Women of the same generation would always have a lot to talk about when they met.

Li Kai clutched his satisfied stomach. He wanted to chat with Qin Lin, but he found that Qin Lin was in a daze again.

This made him feel bored. Old Brother Qin was good at everything, but he was always in a daze from time to time.

qin lin naturally focused his attention on the game in his mind's screen. he controlled his game character to go to the entrance of the ranch and clicked on thomas, the mayor.

He had been focused on the beggar's chicken just now, but now that he had finished eating, he had to finish the plot quest first.

After clicking it, Thomas's conversation appeared:

[that's great. You're at the ranch. I heard that you often go to Mount goddesses. I have something to ask of you. Something big has happened in town. Several cars have driven into the river and leaked oil.

now that the oil has seeped into the river, it has seriously affected the water quality. This will have a huge impact on our ore town, so we have to find a way to solve it.

I've heard from a dwarf that I know that there are gnomes in Mount Saint Mary, and their underground Wells once had oil seeping.

However, they found a special kind of willow leaf floating duckweed and solved the problem. I heard that you often go to the goddess mountain, so you should be very familiar with it. I hope you can help me find the gnomes there and ask for help!

If you're willing to help us, I can provide you with a map to help you find the places where goblins might be!]

Qin Lin looked at this task and thought of the gnomes he had encountered when he entered the game.

After that, he had entered the game several times and never met any gnomes again. He didn't expect Thomas to give him such a plot quest.

moreover, the mission mentioned something that he was familiar with. it was the willow leaf floating duckweed.

this was one of the things he had brought out of the game before.

the floaters in the floating bridges viewing area were the willow leaf floaters. it was precisely because of the willow leaf floaters that the floating bridges viewing area was so popular and popular.

This was because the Willow leaf duckweed had the attributes of photosynthesis +1, purifying Water and Environment +1, beauty +1, photogenic +1, and attraction +1.

Photosynthesis +1 made the air in the viewing area of the floating bridge even better.

The +1 water purification attribute also made the water quality of the floating bridge viewing area very good. As for the other three attributes, they directly affected the tourists' senses.

Thomas's mission also reminded him of the +1 attribute of the Willow leaf floating duckweed for purifying Water and Environment.

However, to cure the pollution caused by oil seeping into the water, it was obviously not something that could be solved with the +1 attribute of purifying water.

That kind of pollution was serious. It was not an ordinary water pollution. Even a willow leaf would not survive in it.

just imagine how serious the oil leakage pollution was in mauritius.

Therefore, the special willow leaf duckweed mentioned in Thomas's plot mission was not the one he had taken out.

If it was, he could sell it at the seed shop in the town, and Thomas, as the mayor, didn't need to look for him.

Qin Lin immediately accepted the mission when he saw the notification.

it would be stupid not to accept it.

Although Thomas's mission couldn't have any rewards because he provided the map and accepted it, as long as he could get the special willow leaf floating duckweed, he could keep some.

If this thing could even treat the water seepage of oil, how big of a problem would it be in reality?

it could be said that most of the areas where humans lived in the world had water problems, which was another reason for the increasing extinction of fish.

Even in the United States, 65% of the water basin was polluted by processed food waste, metal, fertilizer, and pesticides.

Out of the 55 rivers in Europe, only five of them had usable water.

It was barely usable, and it might not work.

If this thing could be brought into the real world, how envious would the Western countries be? He must really want it, right?

However, if they wanted it, it would be useless. They would not let them use it.

He wanted to exchange for it with something.

Just thinking about it made him proud.

After Qin Lin controlled his game character to accept the mission, he couldn't help but smile at the thought of it.

When Li Kai saw this, he couldn't help but ridicule, " "old brother qin, if you're in a daze, then so be it. what are you laughing at? Are you thinking of something indecent?"

a map appeared in his character's backpack. there were several red dots on it, and it was obvious that he had to look for them one by one.

If they were lucky, they might find it in one place, but if they were unlucky, they might have to find it in four places.

[do you wish to use the map to open up a new path to the goddess mountain?]

Qin Lin saw the notification and decisively chose "yes."

A moment later, he received another game notification.

[some new roads have appeared on mount saint missus. let's go and take a look!]

Qin Lin controlled his game character and opened the map to take a look. He found that there were indeed new mountain paths on the goddess mountain.

However, the prompt said that it appeared temporarily, so it should only appear in this mission state. After the mission ended, it would immediately disappear.

at this thought, qin lin no longer hesitated and immediately controlled his game character to go to the goddess mountain.

[Chapter 1336 Meeting The Gnomes Again! Toy For Toy \(1\)](#)

Qin Lin controlled his game character to leave the farm and headed to the goddess mountain according to the newly-appeared temporary map.

After entering the mountain path of Mount goddess, he found that it was indeed a little different from before. There were a few more forks.

These forks were the paths shown on the map given by Thomas. There were four more in total, and only one led to the place where the gnomes lived.

Moreover, the four paths led to four different directions.

seeing this, qin lin decisively chose one of the paths.

was there a need to choose?

it wasn't a multiple choice question at all, it was a free point question, okay?

This was because the direction of this road was the direction where he had met the Goblin.

Was there a need to choose?

today, he was the european king, and the answer to the multiple choice question was directly in front of him.

He controlled his game character to follow the path. At the end of the path, he saw a small green-skinned man with an exclamation mark on his head.

Qin Lin thought to himself.

how could the luck of a lucky person be wrong?

He immediately controlled his game character to move forward and click on the green-skinned Goblin.

Under normal circumstances, a conversation should have appeared after clicking it.

But this time, a row of question marks appeared above the Goblin's head.

【 ? ? ? ? ? ? 】

Qin Lin was stunned.

What did that mean?

didn't thomas accept the mission after finding the goblin?

Did he need any props?

That shouldn't be the case. Even if she needed a prop, she should have told him directly.

Now, he was given a row of question marks. What should he do?

If she really needed any props, she should have told him.

Then, Qin Lin suddenly remembered that this scene seemed familiar.

The same thing had happened to the dwarf, ah ni, before.

This was a bug, and he had to personally enter the game. However, the dwarf ah ni had only encountered this situation before.

Qin Lin suddenly remembered the Goblin who had thrown the Goblin glove away.

It can't be, right?

This Goblin was the Goblin from before?

Whether this was true or not, he would only know after he entered the game.

However, this was not the time to enter the game. Zhao mochen and the others were there, so he could only wait.

"Hubby, what are you thinking about?" Zhao Moyu saw him in a daze and asked.

"I was thinking about something." Qin Lin made up a sentence.

After they finished eating, the next step was to chat.

Zhao moqian and Tang xiuwan suggested that they watch the sunrise together the next morning.

Under such circumstances, no matter how unwilling Li Kai was, he could only helplessly agree to wake up early the next morning.

Qin Lin didn't have any objections. In his mind, watching the sunrise with his wife was a husband's responsibility, and it was also a very romantic thing.

Since they were going to watch the sunrise, they had to sleep early.

Zhao Moyu set the alarm and brought Qin Lin into the greenhouse.

Qin Lin had wanted to enter the game at night to see if the Goblin's abnormality was a BUG.

However, after being pulled into the greenhouse by Zhao Moyu, Zhao Moyu had been sleeping on his arm, so he didn't have the chance to get up and secretly enter the game.

After Zhao Moyu fell asleep, he did not want to wake her up, so he could only dream with her.

the next day, the alarm clock rang before the sun had risen.

Zhao moyin and Qin Lin also woke up to the alarm.

The two of them left the greenhouse. Tang xiuwan pulled the still-dazed Li Kai out of the greenhouse.

they didn't need to go to the sunrise viewing platform. they could see the sunrise directly in the reserved area. moreover, the location was even better than the platform.

not long after, the sun appeared again in the mountains, slowly shining down on the earth.

It was Qin Lin's first time seeing the sunrise in the greenhouse Tree Community. To be honest, he was very disappointed.

After all, he had seen the sunrise on the peak of Mount goddesses.

Compared to the shocking and spectacular sunrise on Mount goddesses, the sunrise in front of him was not just one or two levels lower, but many levels lower.

Naturally, this was only for him.

After all, he was someone who had seen high-end scenery. For Zhao moyin and Tang xiuwan, the sunrise was still very beautiful.

It was a great experience for everyone to watch the sunrise together.

after the sunrise, the few of them went back to the greenhouse to catch up on sleep. in order to experience this short period of beauty, what came after was fatigue.

Qin Lin and Zhao Moxi slept until it was almost noon before they woke up again. Then, they had lunch together at the restaurant in the greenhouse.

because he had just eaten a quality 4 beggar's chicken last night, the food at the greenhouse tree restaurant was really hard to swallow.

It wasn't that the chef didn't do a good job. To be honest, the food made by the restaurant chef was definitely better than the food made by the restaurants in the scenic Area.

It was just that things were afraid of comparison. Once there was a comparison, the good and bad would immediately be revealed.

If the restaurant's food was compared to the food in the outside world, it would definitely be very good. However, when compared to Qin Lin's four-quality beggar's chicken, it was no different from pig feed.

So, after eating a little, Qin Lin and the others took the cable car down fairy tale mountain.

As soon as he returned to the manor, Qin Lin went straight to the office, locked the door, and looked at the game screen in his mind.

He controlled his character to click on the Goblin, but a row of question marks still appeared in the Goblin's mind.

therefore, he entered the game with a single thought and saw the goblin at first sight.

As expected, it was the one he saw last time.

When the Goblin saw Qin Lin, he looked anxious and unhappy. He shouted, " "It's you. You stole my father's gift, you thief."

Qin Lin's face twitched when he heard the Goblin's words. He immediately thought of the Goblin Gloves.

however, he had picked up the gloves, not stolen them.

The other party had wronged him.

More importantly, the Goblin seemed to be a child.

Moreover, he had a mission, so he could only say awkwardly, " "Well, I only found your gloves, I didn't steal it!"

The Goblin kid shouted angrily, " "I don't care. You stole my toy. Give it back!"

qin lin immediately sighed.

It was a little difficult to handle.

he had torn the goblin gloves into pieces and handed them to linlin's laboratory for research. even the outer layer of the leather had been cut open.

How was he going to return this to the other party?

However, Thomas's mission had to be completed.

Remembering that the other party was a Goblin Child, he had an idea and asked, " "I don't know where I lost the glove, but I can compensate you for the other toys, okay? Many, many toys!"

The Goblin kid's eyes lit up when he heard that. "Really? a lot of toys?"

Seeing that the other party had taken the bait, Qin Lin immediately nodded and said, " "Yes, as long as it can offset that glove of yours."

"Then bring the toy over first." The Goblin Child took the bait, but it didn't seem to be completely hooked.

Qin Lin didn't hesitate when he heard this. He immediately logged out of the game and returned to his office. Then, he immediately left the manor, put on a mask and a hat to hide his identity, and went straight to the eastern commercial square.

There was a special area for selling toys.

Of course, he removed all the plush toys and the like. He thought that the goblins would not like this. He directly aimed at all kinds of sophisticated designs and cool-looking robots, such as big white and Transformers. Moreover, he chose the larger ones.

A bigger body should be more shocking to the gnomes.

instead, he pushed the cart and put more and more toys into it. they accumulated like a small mountain and attracted everyone's attention.

Naturally, the toy seller was very happy and wished that Qin Lin would buy more. However, he was wearing a mask and a hat, so no one recognized him as little Qin. Otherwise, he would have been surrounded by people.

in the end, they bought too many toys and qin lin had to ask the shop assistant to help them carry the toys out, filling the trunk, back seat, and passenger seat of the car to the brim.

Moreover, he remembered that the Goblin's toys were all so advanced, and these toys seemed to be no match for them. So, he specially bought a tablet and downloaded anime and movies such as da Bai and Transformers.

At the very least, the Goblin Child could see it and increase the value of these toys.

This should be able to offset the glove, right?

He didn't drive back to Linlin Manor. If he bought so many toys for little Qin Feng, and then these toys suddenly disappeared, he couldn't explain it.

so, he went straight to the warehouse in the suburbs.

He had bought the storage unit and locked it from the inside. No one knew what was going on inside.

When they arrived at the warehouse, Qin Lin took out the toys and put them in a specially prepared big sack. Then, he brought his thoughts into the game.

He saw the Goblin Child again.

As soon as he appeared, the Goblin Child immediately came over and looked at the sack in his hand.

Qin Lin didn't hesitate. He handed the sack to the Goblin kid and opened it.

"Are these all toys?" The Goblin Child looked at the cool toys inside and was obviously tempted.

These toys couldn't be compared to the Goblin toys in terms of functions, but they were definitely cool and first-class.

Qin Lin immediately took out his tablet and turned it on. He played anime and movies such as da Bai and Transformers for the Goblin kid and said, " do you see that? these toys are all their models. They're very cool.

The Goblin Child took the tablet and looked at it with great interest.

Clearly, in two different worlds, children's likes for some things were the same.

after a while, the goblin child said to qin yang with a very good attitude, " "I'm Abair. Are these all for me? What can I help you with?"

Qin Lin really wanted to praise Elba when he heard this. Elba was good at making friends and knew how to return the favor. He had actually asked directly without Qin Lin having to rack his brain to speak.

Therefore, he told Elba his purpose: I'm from a small town at the foot of Mount goddesses. A car fell into the river in our town, and the gasoline leaked into the river. The river water has been contaminated, so we need the special willow leaf duckweed in the hands of you goblins to help purify the contaminated water.

"I see!" After Elba knew what was going on, he immediately said, " "My father seems to have a lot of special willow leaf floating duckweed seeds. I'll go steal some for you."

As he said that, he hurriedly ran towards the direction of the forest.

Not long after, Elba came out with a small bag and handed it to Qin Lin. "These are the special willow leaf floating duckweed seeds. You should need them!"

Qin Lin took the seeds and was about to thank Elba when he saw that Elba had already run off in a hurry with the sack of toys, mumbling, " "These toys are not good enough. I want father to improve them and make them better!"

[Chapter 1337 This Thing Is The Savior Of Earth's Water Quality](#)

Watching Elba's figure disappear, Qin Lin had no choice but to swallow his words of gratitude. He then looked at the bag of seeds in his hand.

[special willow leaf duckweed seed: Grade 3]

[this is a special crop seed modified by willow leaf duckweed. The Willow leaf duckweed produced from the seed has a special effect: Water pollution purification +3, decomposition and absorption of water pollution substances +3, growth speed +2!]

Qin Lin now knew why the special willow leaf floating duckweed could clean the river water contaminated by gasoline leakage.

This special willow leaf floating duckweed didn't have the attributes of a willow leaf floating duckweed at all. It only had the attributes of purifying water pollution and decomposing and absorbing water pollution substances. Moreover, they were both +3.

It would be strange if the water remained clear after breaking it down and absorbing it.

However, he didn't know if the +2 growth speed attribute would have any negative effects.

after all, this thing was not something that existed in the real world. it was considered an invasive species.

If it grew too fast, there might be some trouble.

However, this was only a guess. After all, the gnomes 'planting of this thing in the game did not cause any trouble in treating polluted water.

Qin Lin remembered that this special willow leaf floating duckweed seed was stolen by Elba to exchange with his toy. He hurriedly logged out of the game and controlled his game character to go back to the farm.

if elba's father came looking for him, he might be in trouble.

This also reminded him of when he was young, when the village came to sell candy, many people would secretly exchange their house slippers and the like for candy.

After all, he would inevitably have his pants pulled off and his butt spanked.

He wondered if Elba's ass would be in trouble if he was found out for stealing the seeds.

Of course, this was not something he could control. After all, he could not return the seeds that he had obtained. After all, he had used those toys to exchange for them.

he controlled his character to return to the farm. thomas was still there with an exclamation mark above his head, which meant that he could submit the mission.

qin lin wasn't that stupid. he would definitely take away all the seeds after submitting them.

After controlling his game character to return to the farm, he entered the game with a thought. He took out the bag of special willow leaf floating duckweed seeds and walked to the storage room.

He had to take out a portion of the seeds first.

He took the bag and poured all the seeds on a storage platform. Then, he picked up another one from the storage platform and put it into the bag.

after thinking for a while, he picked up two more and put them in.

three pills were enough.

Thomas clearly didn't want to give any rewards for this mission.

He had exchanged these seeds with those toys, so he couldn't let this guy get them for nothing.

After leaving the storage room, Qin Lin exited the game with a thought. Then, he controlled the game character to click on Thomas to submit the mission.

[that's great! These are the special seeds of the Willow leaf duckweed. They can save the river in our ore town. As a token of gratitude, I'll give this to you!]

Thomas said as he took out a scroll and gave it to his character.

Qin Lin was stunned for a moment.

Thomas didn't win for nothing this time? There was a mission reward?

This made him feel a little embarrassed. After all, he had only submitted three special Willow duckweed seeds to the mission.

He should have given Thomas More seeds.

however, thomas could only blame himself. after all, the other party had cheated him before.

Therefore, the story of 'here comes the wolf' had a profound meaning.

Qin Lin was curious about what Thomas had given him. He entered the game with another thought and saw the note on the scroll:

[bone-strengthening wine for the elderly recipe: Grade 2]

[a type of medicinal wine specially prepared for the elderly to strengthen their bones. It has a special effect: bone strengthening +2 (no effect when restored to a healthy state!) Treatment of osteoporosis +2 (no effect if recovered to a healthy state)!]

[upon use, you will obtain the specific secret ingredients and brewing steps!]

Qin Lin was surprised to see the scroll's remarks.

It turned out to be a secret medicinal wine recipe.

He had a lot of medicinal wine, and if he took out the wine in the wine cellar, he was afraid that the outside world would go crazy.

However, they were all made from mountain products and special bones dug out from the mountains. There was no real secret recipe for the medicinal wine.

Moreover, this secret medicinal wine was specially made for the elderly, and it only had the attributes of strengthening the body and treating osteoporosis +2.

Different from the previous attributes, these two attributes had additional stakes in brackets behind them: There was no effect when restored to a healthy state.

It was easy for people to get all kinds of diseases when they got old, especially bone problems, especially osteoporosis. Sometimes, a light fall could cause problems.

This was also the reason why there were so many health care products for the elderly on the market.

At the same time, it was precisely because of this large market that there were many health care products schemes and scams, which caused countless elderly people to be deceived.

With A +2 quality, it could be said that these two attributes were definitely very powerful.

However, it was also targeted at the problem of the bone. Only when there was a problem with the bone and osteoporosis, this medicinal wine would be effective. Moreover, it would only restore the patient's health.

Once he recovered to a healthy state, the medicinal wine would no longer have any effect.

It was like medicine in a game. If you were injured, you could use medicine to quickly recover your HP, but if your HP was 100%, then the medicine would have no effect no matter how much you used it.

The bone-strengthening wine for the elderly had such a limitation.

All in all, Thomas had given him a good thing. He would find time to make this wine and promote it.

[Chapter 1338 This Thing Is The Savior Of Earth's Water](#)

With this medicinal wine, it could probably reduce the number of elderly people who would be tricked and deceived by health care products.

Qin Lin chose to use this bone-strengthening secret recipe. In an instant, the medicinal wine secret recipe scroll turned into spots of light and burrowed into his body.

He had also received the detailed information and brewing technique of the medicinal wine's Secret recipe.

However, he was more concerned about the special willow leaf duckweed.

If this thing were to be made, it would definitely cause a sensation.

The disaster caused by the 4000 tons of oil leakage in Mauritius had not been solved yet. The special willow leaf duckweed should be able to solve the pollution problem easily.

Then wouldn't they come begging?

To put it selfishly, the cultivation of this thing could really make Linlin's laboratory a lot of money. In modern society, water pollution was basically needed all over the country.

To put it in a selfless way, with this thing, every country would definitely need it, especially the countries with developed industries in the West. The beautiful countries were the first to bear the brunt, followed by the European countries.

At that time, the higher-ups would definitely have a way to control these countries with this special willow leaf floating duckweed.

This could be considered a great contribution to the country.

To put it in a righteous way, the Earth's environment and the health of our bodies are threatened by water pollution caused by industrial sewage and so on.

After water pollution, the pollutants would enter the human body through the drinking water or food chain, causing acute or chronic poisoning. Arsenic, chromium, potassium, and other substances could also cause cancer.

Water contaminated by parasites, viruses, or other bacteria could also cause a variety of infectious and parasitic diseases, which would then affect the human body. It was like a vicious cycle.

In addition, there was water contaminated with heavy metal, which was also harmful to human health. Consumption of water contaminated with cadmium would cause kidney and bone damage. Ingesting 20 grams of cadmate acid would cause death, and lead water could even cause poisoning, causing anemia, and mental disorder.

...

There were countless types of water pollution.

it could be said that with this special willow leaf floating duckweed, it could save the global water quality ecological problem, and also save the health of the entire human race.

At that time, all of humanity would remember his good deeds.

If the Nobel Prize didn't give him a few awards, it would lose credibility.

Naturally, he would still refuse to accept the award when it was presented to him. At that time, he would have to see if the Nobel Prize wanted credibility or face.

In any case, he wasn't the problem.

Qin Lin went to the storage room and divided the special willow leaf duckweed into two parts. He took one of them and logged out of the game.

the story of ranches 'game mechanics were quite old-fashioned at times. if he didn't do this, the game character would probably plant all the special willow leaves in one go.

the key was to plant it in the game. there was no way to harvest the special willow leaf floating duckweed seeds. under the game's mechanism, once they matured, the dwarves would take the initiative to harvest them.

then, he controlled his character to put the other one in the storage room into his bag, and went directly to the paddy field of the ranch to plant the willow leaf duckweed.

After the planting, Qin Lin began to study the secret recipe of the bone-strengthening wine for the old man. Then, he wrote down the ingredients and steps on the secret recipe one by one.

Qin Lin studied it for a while and found that there was no need to brew the medicinal wine alone. First of all, he didn't need the wine for the elderly.

Even if her mother's health was not good at the beginning, she had become very healthy with the help of various medicinal foods. She did not have these old age diseases at all.

Secondly, the preparation of the medicinal wine required several steps. The medicinal herbs could not be put into the wine at once. They had to be put into the wine step by step.

moreover, each step still required some time for the fermentation before the second medicinal material could be put in.

If he wanted to bring it into the game, he would have to calculate the time.

Qin Lin didn't think that he had so much free time, so he decided to just mass-produce the wine at the Linlin winery.

Qin Lin picked up his phone and called master Zhang, who was in charge of the winery.

Linlin wine factory had been upgraded to the Linlin wine industry since it could use the Linlin rice to brew Linlin wine.

Although the production was nothing compared to those large-scale wine industries, it was already on a very large scale.

Moreover, the Linlin wine brewed from the Linlin rice was the most high-end product. It was now the most famous and highest quality wine in the country.

During the new year, it was no longer Maotai that brought out gifts. At least, it was more prestigious to send the Linlin reception.

However, the production of Linlin wine was small, and it was much more difficult to buy than Maotai.

Mr. Zhang was very happy to receive Qin Lin's call. He was inspecting a wine cellar. When he saw Qin Lin's call, he immediately picked up the phone.

He was grateful to the boss, not only because he was now the head of the winery, but also because of his high salary. It was because Chairman Qin had really saved the winery.

this winery had been around since he was a teenager. he had worked here for his entire life and relied on this winery to get married and have children. no one could understand the feelings he and his old buddies had for this winery.

Back then, the winery was messed up by the people in the county. It was gloomy and almost went bankrupt. At that time, the winery could not even recruit an apprentice, and they were all dead.

Later, it was Chairman Qin who saved the winery, which was equivalent to saving the hearts of him and his old buddies. They were only grateful to the boss.

Therefore, when he received Qin Lin's call, he rushed to the Linlin Manor as soon as possible and went to Qin Lin's office.

When he saw Qin Lin, he asked respectfully, "Chairman Qin, what instructions do you have for me today?"

Qin Lin immediately smiled and welcomed master Zhang to the tea table. "There's something I need you to keep an eye on today, master Zhang."

Although master Zhang didn't have a high position in the Linlin company, he was old. Moreover, when he first bought the winery, he wasn't greedy at all for the 30 or 40-year-old wines. He was worthy of respect.

Otherwise, if the other party secretly took the wine away, no one would know that the wine was enough to make the other party a rich man.

Master Zhang heard Qin Lin's words and immediately said, "Chairman Qin, what instructions do you have? I'll definitely supervise everything well."

Qin Lin smiled and explained, "I've been researching a new type of medicinal wine recently. I'm going to Mass-brew it at the winery. Master Zhang, can you help me prepare a wine cellar to keep some Linlin wine? also, help me buy some medicinal herbs from the winery."

As he spoke, Qin Lin handed master Zhang a piece of paper filled with the names of the herbs. "It's the medicine on this."

Master Zhang took it and looked at the herbs. He immediately promised, " " don't worry, chairman qin. i'll go back and deal with this personally. "

Qin Lin and master Zhang talked about Linlin's wine business for a while before master Zhang left.

After that, Qin Lin also went online to check the news. The internet was still full of news about Lin Lin's fairy tale mountain and the sedan bearer.

Moreover, there was a particularly interesting piece of news, which was that a 250-pound fatty didn't want to climb the mountain and sit in a palanquin.

If this had happened before, this fatty would have definitely been flamed by people. He might even have been condemned by the Holy Mother of the internet, Richard.

But this time, no one said anything about him, because he directly paid 5000 Yuan and six porters took turns carrying him up the mountain.

This meant that each of the porters could earn nearly 1000 Yuan.

Every single one of the porters was all smiles when they received the money, and the netizens were mostly envious of the 250-pound fatty.

They didn't want to spend a month's salary for most people just to climb the mountain.

At most, there were some people who were a little jealous and said that this fatty was indeed a lucky person.

In addition, some tourists also expressed that the sunrise was not worthy of the beautiful scenery of the greenhouse Tree Community.

Qin Lin couldn't do anything about it. He couldn't control the sunrise. How could he make it as spectacular and shocking as the sunrise on the top of the goddess mountain?

All in all, fairy tale mountain was on the right track.

A few hours later, Qin Lin was also surprised to see the game on the screen in his mind. A prompt appeared:

[the special willow leaf duckweed has matured and can be harvested!]

Qin Lin didn't need to do anything. The dwarves had already started to harvest in the game.

The appearance of this special willow leaf floating duckweed, something that could save the Earth's water, was bound to cause a sensation.

[Chapter 1339 Chairman Qin Has Another Research Result? 1](#)

Qin Lin returned to the workshop in the inner area and locked the door.

When he entered the game, the dwarves had already harvested all the special willow leaves and put them in the storage room.

He immediately went to the storage room and arrived in front of a pool, which was already filled with a dense collection of special willow leaf duckweed.

[special willow leaf duckweed: Grade 3]

[this is a special willow leaf floating duckweed with a special effect: Water pollution purification +3, decomposition and absorption of water pollution substances +3, growth speed +2!]

The remarks were simpler than the seeds, but the attributes remained the same.

he immediately found a water bucket and placed the special willow leaf duckweed into the bucket. with a thought, he took the bucket out of the game.

after leaving the inner area, qin lin went to the swimming pool and poured all the willow leaves in the bucket into the water.

In an instant, the special willow leaf duckweed that was originally rolled together slowly unfurled and began to float densely on the surface of the pool.

This special willow leaf floating duckweed was used to purify water pollution and to decompose and absorb water pollution substances.

If he wanted to know the effects of the Willow leaf floating duckweed, he would have to do some water pollution experiments.

Qin Lin took out his phone and dialed Shen Li's number. He still needed help from Lin Lin's laboratory. linlin's laboratory.

In a conference room, Shen Li was having a meeting with the research leaders in the laboratory.

He was only in charge of the company's operations, not the experimental side.

however, as the person in charge of the laboratory, he was in charge of the experimental funds, experimental approval, experimental prospects review, and other things.

Other than Li Kai, who was a shareholder and part of the head of the Laboratory, the heads of other experimental projects had to report to the laboratory meeting at the stipulated time unless the experiment really reached a critical moment.

While the meeting was going on, Shen Li's phone started to ring. It was usually muted during meetings, and he wouldn't pick up unless it was an important call.

However, when he saw that the caller was Chairman Qin, he immediately picked up the phone. "Chairman Qin, do you have any orders?"

The person-in-charge of the experimental project also looked at Shen Li.

as the person in charge of an experimental project, he had been in linlin laboratory for a long time. he naturally knew who chairman qin was, not only the boss, but also the talented little qin.

In terms of research, they were probably no match for Chairman Qin.

they also admired chairman qin very much. not only was he able to build a great foundation, but he also had a research ability that made them ashamed by self-study.

But that was probably why the atmosphere in Linlin's laboratory was so good.

Qin Lin's voice also came from the phone. Mr. Shen, can you help me find some contaminated water sources? it's best if it's factory waste water. The higher the level of pollution, the better. Bring it to Linlin Manor and the equipment to test the water quality. Also, help me find more people for things like oil that can severely pollute water sources. I need to do an experiment.

"Chairman Qin, do you need the help of a water plant researcher?" Shen Li asked immediately.

From what Chairman Qin said, he could guess what kind of experiment Chairman Qin was going to do. Plus, Chairman Qin was good at plant research, so he must have cultivated some kind of plant that could solve the water quality problem.

He had to admit that Chairman Qin was really productive.

Even if other people brought a whole group of researchers, they might not produce any results for several years. It was already a very good team to be able to produce one result.

However, Chairman Qin was only one person and could always come up with good things one after another. The key was that even those very powerful teams couldn't come up with these things.

"Alright, bring a few people over too." qin lin didn't reject shen li's suggestion. after all, he wasn't good at these things, and he had never done any tests before.

"Alright, Chairman Qin." After Shen Li hung up the phone, he turned to someone in the laboratory and said, " professor Liu from the water Plant Research Institute, take your team members and follow me. Chairman Qin needs help. The rest of you can go back and do your research. That's all for today's meeting.

Professor Liu, whose name was called, immediately got up in surprise and followed Shen Li out of the conference room.

From the moment President Shen received Chairman Qin's call, everyone in the meeting room guessed that Chairman Qin must have made some new research results.

He didn't expect it to be related to water and plants.

he was now very curious about what chairman qin had researched.

If it was another magical result like before, it would be an honor to be able to help.

in the meeting room, the other project leaders immediately started discussing curiously.

"What magical results do you think Chairman Qin has come up with this time?"

it shouldn't be simple, or rather, neither of the research results of chairman qin and professor li kai are simple. "

" that's true. chairman qin's talent and research inspiration are really enviable and admirable. "

"....."

...

Linlin Manor.

Qin Lin returned to the workshop in the inner area, entered the game, and carried out two special buckets of willow leaves. He filled the swimming pool in the manor.

Zhao moqian, Tang xiuwan, and Lin Liu all carried their children and walked over.

The only difference was that there was a huge Chinese alligator following behind Zhao Moyu.

After the shedding, little Yang's body had grown a little bigger and had completely surpassed Wang Cai.

[Chapter 1340 Chairman Qin Has Another Research Result? 2](#)

When the women saw Qin Lin busy working by the pool, they all came over curiously.

It seemed to know that its master would not pay attention to it, so it followed its little master completely. Wherever its little master went, it would follow.

"Hubby, are these willow leaves?" "It's different from the ones in the floating bridge viewing area. They're not as pretty as those," Zhao moyin asked.

As frequent visitors of Linlin Manor, Tang xiuwan and Lin Liu naturally knew about the Willow leaves and duckweed in the viewing area of the pontoon.

However, they could also tell that the Willow leaves in the swimming pool were not as good as the ones in the pontoon viewing area. Or rather, they were far from it.

The Willow leaf duckweed in the floating bridge viewing area was very attractive at first glance, and it had a natural beauty to it.

There were no willow leaf duckweeds at all, and they even looked ugly when rolled together.

Qin Lin naturally knew the reason. He explained with a smile, "These willow leaf duckweeds aren't for display. They have a special use, and this use is not something those willow leaf duckweeds in the viewing area of the floating bridge can compare to."

While they were chatting, Shen Li arrived with professor Liu's water plant research team and the other staff from Linlin's laboratory.

These people were either carrying equipment or buckets of murky, pitch-black water.

When the women saw this, they guessed that it was for the Willow leaf floating duckweed in the pool. They were also more curious about what the Willow leaf floating duckweed was used for.

Shen Li immediately brought professor Liu to Qin Lin and introduced, "chairman qin, this is professor liu, the person in charge of the water plant research in the laboratory."

"chairman qin, please give me your orders. i'll bring my men to cooperate with you." Professor Liu was quite respectful in front of Qin Lin.

although he was much older than qin lin, age was not the most important thing in scientific research.

Qin Lin didn't see many researchers from Linlin's laboratory, and this was his first time meeting professor Liu. He nodded at him and said, " we're going to experiment with these willow leaves in the pool. They can purify water pollution and break down and absorb water pollution substances. I want to know their specific effects!

Shen Li and professor Liu both looked at the pool.

When they came in, they saw these willow leaves and guessed that this experiment should be related to these.

They also knew about the Willow leaf duckweed in the viewing area.

Those floating duckweeds had some effect on water purification. In the long run, the water quality in the viewing area of the pontoon was indeed better than that in other places of the reservoir.

It was likely that Chairman Qin had improved the Willow leaf floating duckweed in the floating bridge viewing area and obtained these.

However, if he wanted to test the purification effect of water plants on water pollution, it would not be possible in one or two days. It would take a long time to monitor.

Chairman Qin definitely didn't have the time to monitor the situation every day. In the following period of time, they would have to monitor the effect of the purification.

Under professor Liu's command, the Linlin laboratory staff lifted the barrels of seriously polluted water.

The water was found from the abandoned water of the factories in you city's industrial area, and almost every one of them was severely polluted.

Professor li immediately ordered his team members, " let's test the quality of the sewage and record it down.

The researchers immediately picked up special equipment to test the sewage.

There was a special water quality detector for testing water quality. The spectroscope of the detector could be put into the sewage for some time, and then the TD value would appear.

There was a standard for the quality of water. Generally, the lower the TD value, the better the water quality.

[TD value (PPM) 0 - 9, water quality: pure water

[TD value (PPM): 10 - 60, water quality: Mountain spring water, mineral water

[td value (PPM): 60 - 100, water quality: Purifying water

[TD value (PPM): 100 - 300, water quality: tap water

[TD value (PPM): above 300, water quality: Contaminated water

The higher the value, the more serious the water pollution was.

When the researcher put the spectrometer into the first bucket of contaminated water, he saw that the TD value began to increase rapidly.

In a short time, the first bucket of water had a TD value that exceeded 300, then 500, and soon it exceeded 1000.

This was definitely a serious case of excessive pollution. After all, it was factory waste water.

The researchers immediately tested the second and third barrels of bi 'an water. In the end, they found that almost every barrel had a pollution level of more than 1000, which was extremely serious.

However, this was a problem for professor Liu and Shen Li. Perhaps they had gone too far in finding polluted water. It seemed that it was difficult for plants to survive in such serious pollution, even if they were plants that specialized in water quality research.

"Chairman Qin, do you want to dilute the dirty water first?" Professor Liu immediately asked.

Shen Li also nodded.

This was actually his mistake. He had asked the laboratory staff to find the wastewater from the factory in you city industrial zone. After all, it was Chairman Qin's request, but he didn't expect the TD data to be so high.

Qin Lin understood what they meant. He shook his head and said, " "Let's put down these willow leaves and go take a look."

the td in the sewage was indeed seriously over the standard, which made it difficult for plants to survive. however, the special willow leaf floating duckweed and the other two were not.

It would be a little disappointing if the +3 anti-pollution attribute couldn't survive in such water.

after all, it was a +3 item.

Professor Liu and Shen Li looked at each other when they heard Qin Lin's words. They ordered people to start fishing the special willow leaf duckweed from the swimming pool, then evenly distributed them into the buckets of contaminated water.

Tang xiuwan and Lin Liu were also curious. They could tell that boss Qin was going to use the Willow leaves to purify the dirty water.

Was that even possible? this kind of sewage didn't require any technology, but only relied on willow leaves?

under normal circumstances, this was absolutely impossible.

professor liu and shen li also thought so. under normal circumstances, it would be very impressive if the willow leaf floating duckweed could live a little longer in this kind of water. even if chairman qin's research was very successful, it would be very impressive.

&Nbsp; after the special willow leaf duckweed was placed into the buckets, they floated on top of the dirty water.

Professor Liu also told the researchers, " "From now on, you will take turns to monitor the condition of these willow leaves."

He had even thought about how to arrange the shifts for these researchers. No matter how long these willow leaves could live or how effective they were in purifying the sewage, it was not something that could be done in a short time.

however, not long after, chen li looked at the special willow leaf duckweed in the bucket and let out a surprised voice: "chairman qin, is there a problem with these willow leaves?"
