

## The Game 1361

### [Chapter 1361 The Air Conditioning Industry Is Finished](#)

The tourists thought of Huaxin's air conditioner taking advantage of the popularity and suddenly gloated.

This also made them very emotional.

This was probably the style of a genius who had mastered advanced knowledge.

You disgust me, so I'll just use my crushing knowledge to create something to destroy you.

Before that, I can't even be bothered with you and let you jump around.

That was true.

Before this, Linlin villa had really ignored Huaxin air conditioner company. Even now, they had not made a sound.

But silently, Linlin villa had already used this constant temperature grass to organize an event.

it could be said that this rank was extremely high.

Then, the tourists took out their phones and started taking pictures of the introduction of the constant temperature grass.

They knew that once this news was spread online, it would immediately go viral.

The waiter also walked forward and asked the tourists around him, "Dear visitors, I'm sure you all know the uses of the constant temperature grass. Now, you can choose to buy the grass or give up and come to me to register and pay."

"Also, the number of items that can be purchased for each slot can not exceed five, and five constant temperature grass is enough to transform a three-bedroom apartment"

Following the waiter's words, Tian Shan and the tourists all gathered around.

What kind of joke was this? the constant temperature grass was so magical. Even if he didn't need it, he still had to buy it. Moreover, this thing was obviously useful.

Since there was a limit of 5 stalks, he would naturally buy 5 stalks.

Did this even need to be said?

Naturally, these tourists were also concerned about the price of the constant temperature grass.

The constant temperature grass had an absolute advantage over the air conditioner, so the price of these five stalks would definitely not be lower than the air conditioner, right? it might even be much higher, right?

On the market, some decent air conditioners cost 4000 to 5000 Yuan, and the better ones cost tens of thousands.

These five pure natural plants were harmless and didn't need electricity, so the price couldn't be low, right?

However, when they saw the price of the constant temperature grass, they were shocked. One stalk of constant temperature grass was only 600 Yuan, and five stalks were only 3000 Yuan.

This was only about the price of some basic garbage air conditioners.

The key was that these constant-temperature herbs didn't cost electricity. They only needed to be watered, as long as they didn't die.

Seeing the price, Tian Shan knew that those air conditioner companies were really done for.

He didn't hesitate at all and immediately registered his purchase with the attendant. Then, he carefully selected the five stalks of constant temperature grass he wanted and filled in the harvest address.

Almost as soon as he paid the bill, he saw the people from Linlin villa packing up the warming grass he had bought and sending it out.

linlin villa's actions were swift and decisive.

If he mailed it out today, the temperature-maintaining grass would reach his house in two days.

Tian Shan was no longer in the mood to play. He discussed with his wife and went home directly.

The husband and wife wanted to obtain the constant temperature grass as soon as possible and use it to change the temperature of the house. They couldn't wait to experience it.

Therefore, after buying the constant temperature grass, Tian Shan and his wife left Linlin villa and went home.

It didn't take long for the warming grass to become a hot topic as the first batch of tourists uploaded the video online.

Linlin's laboratory has produced another incredible plant. The herb of constant temperature, as its name suggests!

" you will never imagine how awesome the temperature-maintaining grass is. they can really maintain a constant temperature! "

" if the appearance of the willow leaf floating duckweed had shocked you before, then now that you know of the existence of everlasting warmth grass, please continue to be shocked! "

In these videos, the visitors had personally described the effects of the constant temperature grass. They had also recorded videos to prove that they had personally experienced it and knew the magic of the constant temperature grass.

due to the popularity of the willow leaf duckweed, the eternium was pushed out by linlin villa for an event, and it also went viral on the internet.

This time, when they saw the contents of the videos on the hot search, they exploded.

the healing ability of the willow leaf floating duckweed was already amazing.

Who would've thought that Linlin's laboratory would come up with a new herb so quickly? furthermore, the effects of this herb were no less shocking than the Willow duckweed.

Moreover, not everyone could use the Willow leaf floating duckweed. According to the video, the constant temperature grass could replace air conditioning.

This was something that anyone could use, and the degree of shock was even more intense to a certain extent.

Along with these Hot Searches, there was another hot search that caught people's attention:

[ Huaxin air conditioner: I was just trying to scam you. You actually came up with such a thing to target me? ]

This hot search video was interesting. It seemed to have awakened some of the netizens 'memories and reminded them of the incident where Huaxin air conditioner extorted porcelain from Linlin villa.

Moreover, many people also realized that the blogger of this video was the one who had previously ridiculed Huaxin air conditioner and said that he was not afraid that Linlin's laboratory would develop a product to target air conditioners.

All of a sudden, the video was pushed to the top three of the hot search list, and the comments were like a tide:

"The blogger is a prophet!"

"the prophet is dead!"

the blogger's f \* cking awesome, directly predicting what's going to happen so long later!

haha, it's true. Huaxin air conditioner is only the first in sales, right? "

I suddenly thought of the word 'great ups and downs'. I'm afraid Huaxin air conditioner will be kicked to the foot of the mountain as soon as it stands on the top of the mountain.

Huaxin air conditioner: ???????!

"....."

...

Huaxin air conditioner company.

at this time, Luo Sheng was having a celebration party with his employees.

Luo Sheng was in a good mood because Huaxin air-conditioner was the number one unit in sales. He smiled at his employees and said, " everyone did well this month, so the company won't be stingy. Everyone's bonus will be doubled this month.

Everyone was in a good mood. After all, they could get double the bonus, so who would be in a bad mood?

The person in the best mood was naturally Luo Sheng.

He had played so many tricks and put in so much effort to finally make his company the number one in the industry. How could he not be happy?

But, after the meeting ended and Luo Sheng returned to his office, his assistant rushed in, " boss, we seem to be in trouble. Quick, take a look at the latest news about everlasting warm grass in Linlin Manor.

Luo Sheng frowned.

She was in a good mood, so she was a little dissatisfied when she saw the assistant's flustered look.

What trouble could there be?

However, he still took out his phone and went online to check the news and videos about Linlin Manor and the everlasting warm grass.

The first video was already very interesting, and he was stunned.

" with the emergence of the constant temperature grass in linlin villa, huaxin air conditioner is going to lift a stone and smash its own foot! "

" ? ? ? "Luo Sheng suddenly realized something was wrong, so he immediately checked the news, "

"when huaxin air conditioner company tried to extort linlin manor, someone asked if the owner of linlin manor would be dissatisfied and ask the linlin laboratory to develop a product for air conditioning."

now, I can tell everyone clearly that they definitely will. That's why the temperature-maintaining grass is out. It can be said that Huaxin company has provoked Linlin villa. This time, they're going to drag the entire air conditioning industry down.

Luo Sheng furrowed his brows at this scene.

Temperature-maintaining grass?

He didn't take the constant temperature grass to heart before. After all, he didn't think that plants could have anything to do with air conditioning.

What was going on with this constant temperature grass?

He immediately searched for information regarding the constant temperature grass.

when he saw the related functions and effects of the constant temperature grass, his face changed.

"How could a plant have such an effect? It's definitely fake." Luo Sheng couldn't believe it as he anxiously asked his assistant, " "Can you confirm that the effect of this thing is real?"

I can't be sure for now, " the assistant hurriedly said. but I've already sent someone to Linlin villa to check.

"If it's possible, no matter what price you have to pay, you have to get some warm grass," Luo Sheng said anxiously.

At this time, Luo Sheng was no longer in the mood for a meeting. He even wondered if he should keep his promise of the double bonus. So, he hurriedly left the office with his assistant and returned to his own office.

This caused the people from Huaxin air conditioner company to start a discussion.

They all heard the words "Linlin villa" and "everlasting warm grass." One by one, they took out their phones to check the news.

soon after, these people also found out about the constant temperature grass.

Their expressions turned ugly.

The people that Luo Sheng had gathered here for a meeting were all the management and elites of Huaxin air conditioner company, so they naturally understood the situation.

If Huaxin air conditioner became the number one air conditioner in the industry, their business would go up another level.

Although they were both managers, the manager of the air conditioner company was obviously far less important than the manager of the first air conditioner company.

However, they had never expected that Linlin villa would actually produce something like temperature-maintaining grass.

if the effect of this thing was real, then they knew very well what the company was going to face. they were afraid that they would soon lose their jobs. if they didn't lose their jobs, then the same management positions would become worthless.

one of them immediately took out his phone and opened a file. it was a resume.

Smart people should first find a way out for themselves.

It wasn't just this person, there were a few others who were the same.

The company was on the rise, and they could do their best for the company.

However, if the company was going to be destroyed soon, they had to make plans for themselves. After all, they had families to support.

What's more, this trouble was caused by the boss. If the boss hadn't tried to extort Linlin villa, there wouldn't have been this constant temperature grass.

It was even more impossible for such a disaster to happen.

It was not just Huaxin air conditioner.

In the chairman's office at the GRI air conditioner headquarters, Ms. Dong was also looking at the news on the everlasting warm grass on her phone with a very ugly expression.

when she saw the effects of the constant temperature grass, she gritted her teeth and cursed, "There's something wrong with Huaxin company."

It was not just the Gerri air-conditioner. At the same time, many other air-conditioner owners were also gritting their teeth at Huaxin air-conditioner.

This Huaxin company had touched Linlin villa's porcelain vase and destroyed their entire air conditioning industry.

#### [Chapter 1362 612-It's Over! I'm Really Regretting It! 1](#)

it wasn't just the internet and the air conditioner industry that was shocked.

hua hospital.

minister lu had been paying attention to the willow leaf duckweed all this time.

This was because too many countries had come to ask for help in treating water quality.

He was the one who understood the function of the Willow leaf floating duckweed the best.

Therefore, he had been accompanying the leaders to introduce the Willow leaf duckweed to the representatives of the countries who came to visit.

After putting the documents about the Willow leaf floating duckweed into the drawer, his Secretary rushed in and handed him a tablet. Minister Lu, quickly look at the news on the internet. The temperature-maintaining grass at Linlin villa is incredible.

"Temperature-maintaining grass?" Minister Lu remembered that the current event at Linlin villa was about everlasting warm grass.

He had been focusing on the Willow leaf floating duckweed all this time, and he had left the matter of the everlasting warm grass to his Secretary.

He looked at the tablet and saw that it was filled with news and videos about Linlin Manor and the everlasting warm grass.

When he finished watching the video, he stood up in shock, his face full of disbelief.

The Willow leaf floating duckweed was already a shocking plant, even somewhat sci-fi.

at least, the academicians at the chinese academy of sciences who studied water control said that this was definitely not something that could be cultivated with the current stage of plant technology. it could only be said that boss qin's talent was too monstrous, and he had already surpassed all the relevant researchers at the current stage.

However, he had never expected that boss Qin, who had just made the Willow leaf floating duckweed, would make something as shocking as the temperature-maintaining grass in the blink of an eye.

Did boss Qin's ability and talent have no end?

If it were any other researcher, the research on the Willow leaf floating duckweed would be enough to feed them for a lifetime. In the next ten years or so, their inspiration and talent might dry up. They could only continue to deepen their research on the Willow leaf floating duckweed, and there was no way they could research another kind of equally shocking result.

This was a common phenomenon.

Countless researchers could not escape this law.

Moreover, he could figure out the function of the herb as soon as he saw its effect. Replacing air conditioning was only the most basic function. This thing could be used in many advanced fields and advanced scientific research experiments.

One had to know that maintaining a constant temperature had always been very difficult to control perfectly.

The control of this constant temperature grass was even more perfect than those equipment.

Moreover, with the constant temperature grass, once they no longer used air conditioning on a large scale, it would obviously have a very strong effect on energy saving and energy reduction.

This would save a lot of electricity and reduce the use of coal and oil. The price of coal and oil would keep falling, which was great for their country.

this was because their country was the world's largest oil exporter, and all of this would affect the price of related oil.

This was a virtuous cycle for them.

Minister Lu couldn't help but sigh. boss Qin is really amazing. To a certain extent, this constant warmth grass is even more amazing than the Willow leaf floating duckweed. He has actually managed to produce such results in succession.

The Secretary quickly explained, " we have to thank Huaxin air conditioner company. It seems that Huaxin air conditioner company is trying to scam Linlin villa. It's the netizens who urged boss Qin and academician Li Kai to come up with a research result on air conditioners.

" ? ? ? It can be done like this?" Minister Lu was a little stunned when he heard the news.

He had never thought that boss Qin's reason for growing the constant temperature grass was actually this.

If other companies tried to scam Linlin villa and the netizens called for it, would boss Qin be able to cultivate more related things?

Minister Lu was actually a little eager to try.

After all, this was a way for boss Qin to gain results.

To describe it in a more trendy way, it seemed to be a game BUG.

however, he still suppressed this thought, because the method was not mainstream, and it was not very good either emotionally or logically.

At this moment.

minister lu's phone rang. it was a call from an academician who studied fungi.

The academician's voice came through the phone, " "Minister Lu, did you hear about academician Qin's research on everlasting warm grass?"

"I just heard about it," Minister Lu immediately replied.

The academician quickly said, " Minister Lu, I'm doing a fungus experiment that requires a constant temperature environment, but this fungus is affected by electromagnetism. The constant temperature created by equipment is always unsatisfactory. Can you help us get some warming grass to try? "

"Alright!" minister lu replied with a smile.

Now, there was an experimental project that could use this constant temperature grass.

He also immediately said to his Secretary, " "Help me prepare a ticket to Ming city."

Not long after.

minister lu left beijing and got off the plane from ming city.

This was actually a little troublesome.

Because you city didn't have an airport, he had to change trains to go to you city or contact Ming city to prepare a car.

If there was an airport that led directly to you city, he could fly directly to you city every time, and it would be more convenient to go to Linlin Manor to find boss Qin.

Minister Lu thought about it and felt that it was time to talk to you city.

With you city's current development and climate, as well as many other favorable conditions, as long as Ming city gave a little support, you city could definitely build an airport.

When Minister Lu arrived at the Linlin Scenic Area, he could clearly feel that there was more traffic than before. The constant temperature grass had obviously attracted many tourists.

Especially after they found out that the effects of the constant temperature grass could replace air conditioning, the attention and anticipation were even stronger.

Countless people wanted to buy the constant temperature grass.

Minister Lu soon saw Qin Lin and said, " "Boss Qin, you should know why I'm here, right?"

[Chapter 1363 612! It's Over!! 'M Really Regretful](#)

"Everlasting temperature grass," qin lin said with a smile.

boss Qin, you're amazing, " Minister Lu said with emotion. I haven't even recovered from the Willow leaf floating duckweed. When I heard about the everlasting warmth grass, I immediately rushed over.

"Minister Lu, shall we go and take a look at the temperature-maintaining grass?" Qin Lin knew Minister Lu's purpose, so he also sent out an invitation.

"That's for the best. I can use this constant temperature grass for a project in the Chinese Academy of Martial Arts." yes! Minister Lu immediately replied. He was here for this matter.

When they arrived at Linlin's laboratory, Qin Lin took Minister Lu to the test site of the warming grass. As soon as they arrived, he felt the difference in the temperature around them.

"Boss Qin, can I borrow a thermometer?" Minister Lu asked.

Qin Lin called Linlin's lab staff over and gave Minister Lu a precise thermometer.

Minister Lu could tell that it was an experimental thermometer. However, he was completely shocked when he tested it in the area.

The test temperature was all 22 degrees Celsius. It was the same even in places with sunlight and shade. The temperature difference was less than 0.1 degrees Celsius.

Even the best temperature control equipment in the Hua \* Yuan hospital couldn't achieve such a terrifying effect.

In other words, the virtuous cycle that he had expected would definitely appear.

This was a good thing for the entire country.

After Minister Lu confirmed the effects of the constant temperature grass, he decisively took a few stalks of constant temperature grass back to the capital and sent them to the fungi laboratory.

The academician in charge of the fungi laboratory was surnamed Chu.

When academician Chu saw the arrival of Minister Lu, he immediately went forward to welcome him, "Minister Lu, these are the constant temperature grass?"

yes, " Minister Lu nodded. this is the constant temperature grass. Academician Chu, you can try to create a constant temperature environment with this constant temperature grass.

"Quickly move these herbs into the greenhouse." Academician Chu also immediately ordered a researcher beside him.

His fungus experiment was just lacking a constant temperature environment that would not affect the growth of fungi.

No matter how weak the electromagnetic influence of the equipment's constant temperature was, it could never be perfect. When he knew about the constant temperature grass in Linlin villa, he had already been watching it.

Now that the item had arrived, he naturally wanted to put it to use immediately.

A few researchers immediately came forward and moved the homeothermal grass into an experimental room.

this was the temperature-maintaining experiment room. he could see that there were several pieces of equipment placed inside. these equipment were precisely the temperature-maintaining equipment.

However, the equipment had been stopped.

The temperature-maintaining equipment was the most advanced, but there were still some electromagnetic waves that affected the fungi they were experimenting with. He had no choice but to stop the equipment and find another way.

Now, the constant temperature grass in Linlin villa was an opportunity for him. The temperature they controlled was 25 degrees Celsius, which was within the range of the constant temperature grass.

"Minister Lu, can we just leave it here?" After entering the experiment room, academician Chu asked Minister Lu.

Minister Lu nodded. that's right. The temperature-maintaining grass can automatically adjust the temperature. The specific temperature can be adjusted by increasing or decreasing the temperature of the grass.

"this is really amazing," said academician chu in amazement.

It was indeed amazing. After a while, a researcher reported, " "Academician Chu, the temperature has started to drop. It has reached 25 degrees Celsius."

This was the temperature they wanted.

However, the temperature continued to drop and soon reached 22 degrees Celsius.

"Move the rest of the temperature-maintaining grass out and control the temperature," Minister Lu said.

Immediately, the researchers did as they were told and carried the constant temperature grass out. In a moment, the temperature in the room rose. After carrying four stalks of constant temperature grass, the temperature was fixed at 25 degrees Celsius.

Academician Chu and the other researchers were all surprised. They immediately took out a precise thermometer to measure the temperature of the whole greenhouse and found that the temperature of every area was the same.

quick, put our fungus in and try to experiment. After academician Chu tested the temperature, he immediately said to the researcher beside him.

The researchers were also curious about the constant temperature environment created by the constant temperature grass. They immediately took out the experimental fungi from the sealed glass box and began to put them into the constant temperature room.

Following that, academician Chu led his team to observe the condition of the fungi.

As time passed, their faces gradually revealed a happy expression.

academician Chu, the fungus wasn't affected at all this time.

it's perfect. The constant temperature environment this time is better than the previous equipment.

" this time, the fungus's fermentation can reach a perfect state. "

" ....."

Academician Chu was also pleasantly surprised.

The temperature-maintaining grass really achieved a precise temperature-maintaining effect. The key point was that it really didn't have any effect on the fungus they were experimenting with.

If they had not seen it with their own eyes, who would have believed it?

this plant was even better than the most advanced temperature control equipment in the hua hospital.

"Minister Lu, I'm afraid this constant temperature grass can replace a lot of constant temperature equipment in scientific experiments," said academician Chu with emotion.

Minister Lu nodded. He naturally understood this. Moreover, he was more concerned about the constant temperature grass's replacement for air conditioning. It could produce a series of benefits under energy conservation and reduction of energy. Moreover, it would benefit the country and the people.

...

Hu city.

After Tian Shan received the call, he hurriedly ran out of the community. The express delivery had arrived, which was the five stalks of constant temperature grass he had bought at Linlin villa.

### [Chapter 1364 612-It's Over! I Really Regret It! 3](#)

The delivery man quickly brought down the five strains of constant temperature grass, then carried them and Tian Shan into the community.

A normal courier would not be able to provide such thoughtful service, but Linlin villa paid extra for the tourists, so they had to deliver the food to their homes.

Tian Shan led the delivery man into the neighborhood. The five constant temperature grass he was carrying was very eye-catching.

"Tian Shan, what kind of green plant did you buy?" a familiar receptionist asked.

tian shan did not hide anything and explained with a smile,"Everlasting temperature grass,"

"Temperature-maintaining grass?" The neighbor exclaimed, " "The temperature-maintaining grass from Linlin villa?"

Many residents in the surroundings looked over and even subconsciously followed to check on the situation.

because the constant temperature grass was too popular now, it was impossible for people who knew how to surf the internet to not know about it. those Short Video platforms basically could see the news about the constant temperature grass as soon as they logged in.

The most important thing was the effects of the everlasting temperature grass. It could directly replace air conditioners. Countless people had long wanted to buy this everlasting temperature grass, but they couldn't buy it even if they wanted to.

When the neighbors came over and saw Tian Shan's constant temperature grass, they couldn't help but discuss,

"It's really the constant temperature grass!"

"I can't believe someone in our District is so lucky to have bought the constant temperature grass."

it's really the constant temperature grass. It's exactly the same as the one in the video.

"Tian Shan, aren't you too lucky? You can actually buy this thing."

"....."

All of a sudden, the neighbors shamelessly followed Tian Shan and did not intend to leave even when they were outside his house.

This was because they wanted to see the effects of this constant temperature grass, and whether it was as amazing as the internet was boasting about.

After Tian Shan asked the courier to move the five strains of constant temperature grass into the house, he placed them all over the house, including one in the bedroom.

these five strains of constant temperature grass acted at the same time and could control the temperature of the three-bedroom house.

Not long after the herbs were put in, Tian Shan and the other servants felt the change in temperature. Finally, they took out the thermometer and found that it was set at 24 degrees.

This was because the house of the Tayama family was relatively large, and the five constant temperature grass alone could not lower the temperature.

However, this also shocked everyone. There was no air conditioning. A temperature of 24 degrees Celsius was very comfortable.

after seeing this scene with their own eyes, these people finally believed that the news on the internet was true. there really was such a magical plant.

Tuan Shan was not the only one. In a meeting room of Huaxin air conditioner company, there were already stalks of constant temperature grass.

These temperature-maintaining grass had been bought at a high price by them and the lucky winners of the Linlin villa.

However, when they saw the temperature measured, Luo Shan and the people from Huaxin company's faces turned extremely ugly.

it was really at a constant temperature. he could really control the temperature.

Even if they were in the business of air conditioning, they had to admit that this constant temperature grass was better than air conditioning. It was all natural and harmless.

how did you manage to research and cultivate such a thing? " Luo Shan mumbled to himself with an unsightly expression. An indescribable regret welled up in his heart.

It was because he had scammed Linlin villa and Linlin laboratory that his company had gained popularity and become the number one seller of air conditioners.

But if he had known that this would lead to Linlin company developing something like warming grass, he would rather not have gotten first place in sales.

Even if it was the second, third, or fourth place, there would still be a chance. But now, there was nothing.

#### [Chapter 1365 613-What Kind Of Opportunity Is This?](#)

The emergence of the constant temperature grass made all the air conditioner companies feel that winter was coming.

Not only Huaxin air conditioner company, but also meidi and GRI air conditioner companies had also bought constant temperature grass at a high price and knew its effects.

However, they also knew the effects of the constant temperature grass. They also knew that the air conditioning industry was going to be finished.

It was hard to imagine. Once the constant temperature grass was promoted by Linlin's laboratory, would anyone still buy their air conditioner?

It was certain that everyone would give up on the air conditioner and choose to buy the constant temperature grass.

That would be the moment they were finished.

At the headquarters of the Gerri air conditioner.

Ms. Dong's brows were furrowed to the extreme, which made the wrinkles on her face more prominent.

She was a big celebrity in the air conditioner industry and was also a well-known female helmsman in the country. She could face anything with ease.

But now, her face was full of worry.

At the side.

One of the higher-ups said with an ugly expression, " miss Dong, the situation is a little bad. Once the constant temperature grass is promoted on a large scale, our air conditioner will not be a match for it.

Of course, Ms. Dong knew about this problem.

Besides, she had been in the business world for so long, but this was the first time she felt so powerless.

For something like temperature-maintaining grass, it wasn't something that could be solved by business tactics, strategies, or promotion.

Even in the face of Huaxin air-conditioner's approach, she had follow-up means and was not anxious at all.

Now, facing the constant temperature grass, which was so effective that it completely suppressed the air conditioner, she was completely helpless.

This was a dimension reduction attack.

When Madam Dong was sighing, the Secretary said in a hurry, "Miss Dong, Linlin laboratory has sent me an invitation to cooperate with them!

"??? "Ms. Dong was stunned. She looked at the Secretary in confusion, then quickly went to the Secretary and checked.

Linlin manor.

Shen Li had also arrived in front of Qin Lin and reported, "Chairman Qin, we've sent the invitation to all the air conditioner companies except Huaxin air conditioner.

"Yes. President Shen, you will be fully responsible for the matter of the constant temperature grass." Qin Lin also nodded.

After that, all that was left was to promote the constant temperature grass.

He didn't need to get involved in the details.

The only thing he had to pay attention to was the promotion of the constant temperature grass.

The reason why he invited those air conditioner companies was also to promote cooperation.

Many people would think that their products were good enough to destroy an industry. Why would they cooperate with others to promote this thing?

He would earn his own money and take all the profits.

But sometimes, that wasn't the case.

To society as a whole, no matter how good one's product was, it would sometimes be affected by all aspects of society.

The emergence of the constant temperature grass would definitely destroy the air conditioning industry. However, there was a problem. If the jobs you created were similar to the jobs you destroyed, then let nature take its course and there would be no social problems.

Otherwise, the entire market would not be able to withstand such an impact.

If there were too many unemployed people, it would also cause serious social problems.

There were even some extreme people who, after losing their jobs and not being able to find a job, gathered those who were also unemployed to protest. It was also a big problem for them to target Linlin company.

It was also possible that, like in the movie, he would bring a gas tank to Linlin Manor, which would be another big news.

Although this kind of thing was melodramatic, it could happen in reality.

Money was really just a number to him.

He didn't even pay attention to the money made by the various companies.

He still didn't know how to spend the 43 billion that the higher-ups had transferred to him.

If it wasn't for the pressure from the higher-ups, Linlin's company assets would probably shock him on the rich list.

Therefore, there was no need to care too much about some things. It was fine as long as he could take control.

For example, now that the constant temperature grass had replaced the air conditioner, Linlin's laboratory chose to cooperate with the air conditioner company, and the air conditioner company could also cooperate with Linlin's laboratory while switching to other specialized equipment.

in this way, although the market would still be affected, at least the change in the job position would not be too big, and not many people would be affected.

Moreover, the warming herbs were under the control of Linlin's laboratory, which meant that Linlin's laboratory was in control of these transformed air conditioning companies.

"chairman qin, we've already sent out the cooperation invitation. now we're just waiting for those air conditioner companies to come and cooperate," shen li added.

The news of Linlin's laboratory's invitation to cooperate with air conditioning companies for the constant temperature grass quickly became a hot search.

All the air conditioner companies received the invitation and fell into silence.

However, while they were silent, they had to think about this cooperation invitation.

Although it looked like they were being incorporated, they already knew the power of the constant temperature grass. It could completely replace their air conditioner.

From the side, this could be considered a change of direction to give them a way out.

Huaxin Corporation.

Luo Sheng had naturally seen the news about Linlin laboratory's invitation to cooperate with the air conditioner company.

the first thing he did when he received the news was to tell his assistant in a hurry, " quick, send an email to Linlin laboratory. Tell them that Huaxin Corporation is willing to cooperate with them.

Luo Sheng was good at currying favor. After he found out about the effects of the constant temperature grass, he knew that the only way for the company to survive was to join the Linlin laboratory.

Otherwise, when the temperature-maintaining grass was promoted, they would be dead and he would have nothing.

When the assistant heard Luo Sheng's words, he immediately sat down in front of his computer and logged into Linlin laboratory's official website.

After the news of the Linlin laboratory came out, the official page also announced the relevant cooperation procedures and application conditions.

The assistant opened it and after a while, he looked at Luo Sheng with an ugly expression, "boss, Linlin laboratory has also announced the list of partner companies. All the other air conditioner companies are on the list except for our Huaxin company. Linlin laboratory doesn't want to give us a chance to cooperate!

"What?" Luo Sheng's face turned ugly, and he asked, "How can our company not be here?"

The assistant looked at his boss with a frown.

why was there a need to say?

Luo Sheng obviously understood that it was because of the incident with the scamming incident.

His face immediately revealed a vexed expression.

back then, he had gone to do some pengci for the company's development. who knew that he would come across the everlasting warm grass?

If they offended Linlin villa, the company would not even have a chance to survive.

Linlin's laboratory wanted to cooperate with all the air conditioner companies except them.

In the end, Luo Sheng sat back down on his chair.

.....

the emergence of the constant temperature grass had not only shocked the country, but also the world.

because of the willow leaf floating duckweed incident, all the countries in the world had their eyes on china, especially those who came to china to ask for help in water quality control. some big countries had been attracted.

Therefore, while they were paying attention to the Willow leaf floating duckweed, the appearance of the temperature-maintaining grass naturally attracted attention as well.

After knowing the effects of the constant temperature grass, the people of these countries were naturally shocked.

Especially in some countries where it was cold all year round, this thing could save their lives and prevent them from shivering in the deadly cold.

America.

In the laboratory, adoxi was still focused on the purification grass.

At the same time, he was holding a thick document and reading it carefully. However, the more he read, the deeper his frown became.

This was the test data on the Willow leaf floating duckweed.

The big boss wanted this thing.

therefore, he had to investigate and find a way.

He couldn't get the purification grass, but maybe he could get his hands on the Willow leaf duckweed.

the willow leaf duckweed was naturally obtained from Mauritius. after learning of the willow leaf duckweed's power, the international environment organization had secretly kept some.

It was a pity that they were all sterilized. Otherwise, he could steal them and cultivate them.

When he finished reading the information on the Willow leaves, he was a little dumbfounded.

to a certain extent, the willow leaf floating duckweed was even more powerful than the purification grass.

Moreover, he had also asked the researchers in the laboratory to try to crack it, but the result was the same as the situation with the purification grass at the beginning. There was no way to crack it at all.

That kind of genetic division didn't seem to be something from this era.

This was awkward.

in this case, as long as the other party's protection was good and the country imposed restrictions, they would not be able to get it, just like the purification grass, okay?

Just as he was thinking about it, his phone rang. It was that Big Boss again.

Did this person come to ask for results again?

How long has it been?

However, he needed the support of this capital boss, so he hurriedly picked up the call.

The voice of the capital boss came over, " ADOS, there's another document for you. Take it. This is also a chance for you. Don't miss it.

"....."

Now, when adoxi heard the word "opportunity," he felt a headache.

Previously, the Willow leaf duckweed had also said that it was giving him an opportunity, but in the end, how was that an opportunity?

there was no chance at all.

he walked to the computer and found a document sent by the big boss.

He immediately opened the file. It was about another plant called constant temperature grass.

"What is this?" adoxi opened the information on the everlasting temperature grass. however, the more he read, the deeper his frown became.

The eastern countries actually had another plant that could replace air conditioning.

Furthermore, the description of this constant temperature grass was clearly a mystical plant similar to the Willow leaf floating duckweed. Who would believe that a plant could actually control temperature and create a constant temperature region?

The eastern countries would definitely have control over such things as well.

More importantly, he was surprised to find out that the person who developed the constant temperature grass was the same as the Willow leaf floating duckweed, it was that fellow named Qin.

this ... adoxi looked at the information and fell into a daze.

It was the same researcher again. According to the description of the everlasting temperature grass, this might be a plant that couldn't be solved, just like the Willow leaf floating duckweed.

Thinking of this, adoxi felt a little hopeless.

If this was the only chance he had, he would give it up.

he just lay down and didn't want to use the power of that big boss, okay?

He couldn't even handle one purification grass, and now there were more willow leaf floating duckweed and everlasting warmth grass. What a joke, right?

#### [Chapter 1366 614-Xiao Wu Laying Eggs!](#)

Linlin Manor.

It was rare for Qin Lin to carry little Qin Feng to the hall.

As soon as he came in, he saw the little guy reaching out his hand to yang, obviously wanting to ride the crocodile.

perhaps it was because of the fetus-beneficial factor, little qin feng grew up very quickly. now, he no longer liked to be carried by others. he preferred to crawl on the ground and walk on his own.

This was also a stage that children had to go through.

Naturally, Yang's back was the little guy's favorite spot.

After the crocodile shed its skin, Xiao Yang's body had grown a lot bigger. His broad back was wide enough for little Qin Feng to lie flat.

"Daddy! Daddy! Daddy! Daddy!" Little Qin Feng was riding on little Yang's back, but he didn't forget to reach out to him and call out happily.

Qin Lin squatted down and played with little Qin Feng. Suddenly, he saw Xiao Wu flapping her wings and flying over, landing on a table on the side.

"Master, come with me, master, come with me!" It continued to call out.

As it called out, it was still jumping around, looking very anxious.

When Qin Lin saw this scene, he knew that this guy had something to do. He also called a waiter to look at little Qin Feng and then got up.

Seeing this, Xiao Wu immediately flapped her wings and flew up, still not forgetting to call out: "Follow me, come with me!"

Qin Lin immediately followed behind him. When they reached the playground of the manor, he saw Xiao Bao standing in front of a bunch of green Dogtooth grass.

He looked very alert, as if he was guarding something.

Seeing Xiao Wu fly down, it also happily called out: "It's coming, it's coming!"

this fellow's intelligence wasn't as high as xiao wu's, and it wasn't as fluent in the human language as xiao wu. it flew in front of qin lin, pointing its wing at the dogtooth grass. "Master 'na"

Qin Lin stepped forward to check the situation inside the dog tooth grass and was surprised to find two parrot eggs lying inside.

After Xiao Wu landed, she stood next to the two eggs and called out: "Master, pick it up, pick it up, baby, baby!"

Little treasure flapped his wings.

The two parrots were obviously very happy.

Because this was the fruit of love.

Qin Lin stepped forward and picked up the two parrot eggs. He looked at them through the sunlight and found that both eggs had been fertilized.

In this case, both eggs could hatch into little parrots.

No wonder the two parrots were so happy.

Thinking of this, Qin Lin brought the two eggs back to his office. He brought his thoughts into the game and immediately saw the remarks of the two eggs:

[ special mount goddesses 'parrot egg: special (X2) ]

[ this is the egg laid by a special family of parrots on Mount goddesses. It has already been fertilized and can hatch into a young parrot. ]

Qin Lin also logged out of the game after seeing the note. He then called Yang Dong and asked him to bring an incubator from the duck house.

The duck house often had youthful duck eggs to hatch, so an incubator was necessary. This incubator could also be used to incubate parrots.

Yang Dong quickly brought a small incubator to the manor, and then they finished debugging the incubator in the corner of the hall.

"Put these two parrot eggs inside to hatch. These are Xiao Wu's eggs." qin lin also handed the two fertilized parrot eggs to yang dong.

yang dong immediately and carefully took the two eggs.

Xiao Wu was Linlin villa's internet celebrity parrot.

Everyone knew how smart it was, so he didn't dare to neglect it. After taking the two eggs, he carefully put them into the incubator.

Finally, he closed the hatch and opened the air vent.

After Yang Dong was done, he reported, " " boss, it's done. i'll just come over every day to check it. "

Qin Lin nodded.

After Yang Dong left, Xiao Wu and Xiao Bao flapped their wings and flew to the incubator.

Wuwuwu!

Wang Cai's voice was heard and it ran into the hall with snowy, the Fox.

it approached the incubator slightly, and xiao wu became excited: "Damn dog, go away, go away!"

The voice was sharp and it was a warning.

Beside him, little treasure even extended his sharp claws.

as soon as the eggs were put into the incubator, the two parrots seemed to start to protect their babies.

Gou 'Zi looked at the two parrots suspiciously, as if they had gone crazy. He wanted to call out, but when he saw little treasure's sharp claws, he decisively looked ahead and left with little snow.

Qin Lin smiled when he saw this scene.

in fact, he could bring the incubator into the game. in that case, the little parrot should be able to hatch soon, but after thinking about it, he gave up the idea.

Since the eggs were laid in the real world, he would just let them be born normally in the real world.

Then, he went back to take care of little Qin Feng and waited for Lin Fen to come and take little Qin Feng away. Only then did he return to the office to complete his daily tasks for the day.

After cutting down trees and fishing.

Qin Lin had just returned to the farm with his game character when he saw a figure.

It was the mayor of ore town, Thomas.

There was another plot quest.

suddenly, it also made people feel a little conflicted.

He didn't know if Thomas's mission would give him a reward.

He had been licked by Thomas before, and when he felt that Thomas wanted to be licked again, he was given a cooking skill.

In the end, Qin Lin clicked on Thomas to accept the plot mission.

Thomas's conversation immediately jumped out.

[ great, you're back. There's something I need your help with. The annual goddess sunrise sacrificial event is about to begin. This time, it's your Ranch's turn to host it. What you need to do next is:

1. Prepare enough tents on Mount goddesses!
2. We must invite enough residents to Mount goddess to watch the sunrise!
3. move the statue of the goddess to the top of the mountain with the participating residents!
4. Collecting beautiful wildflowers and preparing delicious fruits seems to increase the desire of the townspeople to participate in the sacrifice and help you carry the goddess sculpture. ]

Thomas left after finishing the mission. He didn't say anything about the reward. It seemed like he was going to get nothing again.

However, Qin Lin still decided to complete the task.

In the original game, there was a story about watching the sunrise on the goddess mountain.

However, in the original version, watching the sunrise was a real-time plot, and there were no missions or rewards.

He had read some guides on the internet about the sunrise on Mount goddesses of the new version. It seemed that he would receive the blessing of the goddess and a reward after completing it.

Qin Lin had completed so many plot tasks, but the rewards of the Kappa and the goddess were the most magical. So, how could he let go of the opportunity to get the goddess 'reward'?

This sunrise sacrifice mission was obviously a bit cumbersome.

The first step wasn't difficult because there was a shop selling tents in ore town, so he could buy them directly.

He controlled his game character to go to the ore town shop to buy tents. Because of the limited space in his backpack, he had to transport the tents several times before he could get them to the platform on the top of Mount goddesses to watch the sunrise. Then, he set up all the tents.

The first step of the mission was also completed.

The second step wasn't difficult. He controlled the game character to go to various parts of Mount goddesses and pick the wildflowers in the mountain. Then, he brought the wildflowers to ore town and clicked on the residents of ore town.

Among these residents, some of them would not talk to each other, but some of them would.

[ what beautiful wildflowers. Are you going to let me participate in the sunrise sacrifice? ]

[ are you going to give this flower to me? I will participate in the sunrise sacrifice! ]

[ I can participate in the sunrise worship, but you have to let me help you carry the goddess statue. You have to prepare some melon fruits for me as a reward! ]

【.....】

Qin Lin knew that these residents were his targets when he saw the conversation.

Those who participated in the sunrise sacrifice should be given wildflowers, but those who helped carry the goddess statue should also be given fruits.

he took note of these npc residents, then controlled his game character to go to the seed store, bought two kinds of fruit seeds, and began to plant them.

When the two fruits ripened, he took them to the residents and gave them to them.

When there were enough residents who gave out the fruits, the game screen changed to an animation.

The game characters and some residents came to the goddess spring and lifted the statue of the goddess up to the peak of Mount goddesses.

When the scene came to Mount goddesses, the residents of ore town could be seen on the vast platform, among the tents.

in the middle was a bonfire, and the residents were dancing.

this scene was also different from the original version. in the original version, there was no bonfire and no residents dancing.

However, because it was an anime scene, time also flew by quickly. Very soon, the time jumped to 10 minutes after midnight.

The statue of the goddess was placed in the most obvious position on the platform.

the moment the sun rose from the top of the goddess mountain, the first ray of sunlight would shine on the statue of the goddess.

This was also a sense of ceremony for a sacrifice.

Qin Lin had personally entered the goddess mountain to see the sunrise. The shock he felt was indescribable. At this time, the sunrise in the anime was much more ordinary.

As the sun slowly rose, its rays covered the land. The game characters and the residents of ore town were all shrouded in the light.

Immediately after, the anime scene ended and the game returned to normal.

The difference was that the game character had run from the ore town to the platform on the top of Mount goddesses.

The residents of ore town who were participating in the sunrise ceremony also dispersed, leaving the peak of Mount goddesses.

Even the statue of the goddess that was lifted up in the comic had disappeared.

At the same time, a system notification appeared.

[ congratulations, you've received a gift from the goddess. There will be a surprise inside! ]

Seeing the goddess Gift bag as a reward, Qin Lin immediately controlled the game character to open the gift bag. A moment later, a crystal stone appeared in the game character's bag.

[ congratulations, you have obtained a goddess stone-glorious sunrise! ]

The goddess stone?

Qin Lin was surprised.

In the story of the farm, the final gifts of the goddesses and Kappas were the goddess stone and the Kappas 'Jade.

However, these two items were extremely rare.

He didn't expect to receive a goddess stone as a reward for the sunrise sacrifice.

However, the goddess stone had a suffix and seemed to be divided into different categories.

There was no such setting in the original game.

But what did the radiance of the sunrise mean?

Qin Lin immediately locked the office door and entered the game with a single thought. When he saw the remark, his face was full of surprise.

As expected of the goddess stone.

#### [Chapter 1367 The Weather Can Change, So Can The Sunrise? 1](#)

Qin Lin was looking forward to the sunrise from the goddess Gift bag, but he was surprised when he entered the game and saw the remarks.

[ goddess sunrise radiance: special! ]

[ this is the reward that the goddess will give during the sunrise sacrifice. It can transform the sunrise of an area and has magical effects: Stunning sunrise +2, beautiful scenery +2, special concept +2, soothing spirit +2, advanced level shock +2! ]

[ usage restriction: can only be used at sunrise! ]

Qin Lin did not expect the sunrise Goddess stone to be able to transform the sunrise of an entire area.

Furthermore, with the +2 stunning sunrise, +2 beautiful scenery, and +2 special intent, which sunrise in any place would not be super stunning with this transformation?

Especially the +2 mental comfort attribute.

although it was romantic to watch the sunrise early in the morning, and the sunrise was beautiful, it would definitely be dispirited to watch the sunrise. it would take a lot of sleep, and it would greatly affect the next day's fun.

however, with this +2 soothing spirit attribute, it would definitely allow people to be in high spirits even after watching the sunrise. it was simply an attribute that couldn't be more awesome, okay?

The first thing he thought of was the sunrise viewing project in The Flower House tree Community on Mount goddesses.

The greenhouse tree District was very stunning and beautiful.

However, the sunrise here was really not satisfactory. Now that there was such a reward, if he could renovate the sunrise view of the greenhouse Tree Community, would this shortcoming be made up for?

By then, the greenhouse Tree Community would be perfect.

With this in mind, Qin Lin held the goddess stone and logged out of the game with a thought.

Back in the office, he logged into the Linlin Manor management APP and sent a message to the management of fairy tale mountain, asking them to prepare a reserved greenhouse for the evening.

When the management of fairy tale mountain received the message from their boss, they naturally began to make arrangements at the first moment.

At night, Qin Lin also went up fairy tale mountain and lived in the greenhouse arranged by someone. Then, he set the alarm.

He had no choice. The goddess 'sunrise brilliance had to be used at sunrise, so he had to get up early in the morning.

Fortunately, the reserved area was unoccupied, so it was easy for him to get up and deal with it.

Time passed.

The flower greenhouse community was even more lively at night because it was the most beautiful time at night.

Therefore, those who lived in the greenhouse Tree Community would inevitably be full of energy at night. However, if they played too late, they might miss the sunrise the next day.

Those who wanted to watch the sunrise would also go to bed earlier, set their alarm clock, and wait for the sunrise the next morning.

wu feifei loved the sunrise. she even joined many wechat groups to watch the sunrise and watched others share the sunrise they saw.

she was a romantic girl and had always wanted to see the sunrise with her boyfriend.

It was a very romantic thing for her.

so, she came this time, even though her boyfriend had already run away with her best friend.

After setting the alarm, she went to sleep. As time passed, the alarm rang, and she stood up abruptly, rubbing her dazed eyes.

Then, she remembered that she had to watch the sunrise today, so she hurriedly got up to change her clothes. After that, she left the greenhouse tree without putting on any makeup.

The person she liked had already cheated on her, so it didn't matter to her whether she put on makeup or not. After all, makeup was always to attract the opposite sex, and she didn't want to attract any of them.

Wu Feifei soon arrived at the sunrise viewing platform not far from the greenhouse Tree Community.

It was early in the morning, and the sky was still dark, but there were already many people here. She found that many women, like her, did not have makeup on at all.

But these women were different from her, because they had people by their side.

She, on the other hand, seemed a little lonely.

Wu Feifei found a swing and sat down, waiting for the sunrise. The others did the same.

it didn't take long for the sun to shine from the mountain in the distance.

The bright sunlight shone on the ground. Miraculously, after the sunlight appeared, the fairy tale vines and fairy tale Night Queen's fluorescent light disappeared at the same time.

This was even more wondrous than being controlled by intelligence.

Qin Lin also walked out of the greenhouse in the reserved area.

He was still holding the crystal-clear goddess stone in his hand as he looked at the sunrise in the distance.

This sunrise the second time he had seen sunrise, but it couldn't be compared to what he had seen on the peak of the goddess mountain.

Fortunately, he had obtained the goddess sunrise brilliance this time, which could make up for the sunrise in the greenhouse Tree Community.

He believed that after today, everyone would be attracted by the sunrise on fairy tale mountain.

this was because the sunrise on fairy tale mountain after today would be very shocking. the beautiful scenery would not lose to that of the greenhouse tree community.

qin lin looked at the corner of the sun's brilliance that was revealed and silently used the goddess stone in his hand.

The next moment, the goddess stone started to scatter into countless light spots.

...

As the sunrise rose, the tourists' gazes were also attracted.

the sunrise was very beautiful. for tourists who had never seen a sunrise, even if the sunrise was not as beautiful as the greenhouse and tree community, it was still good.

However, Wu Feifei was a little disappointed.

She had seen too many sunrise videos in the sunrise viewing WeChat group. Many of them were taken by God photographers, and they were very shocking and beautiful.

The one in front of him was much worse. No wonder the internet said that the sunrise on fairy tale mountain was not worthy of the beauty of the greenhouse Tree Community, and it felt like a flower stuck in cow dung.

#### [Chapter 1368 The Weather Can Change, So Can The Sunrise? 2](#)

Although it was a bit of an exaggeration to say this, the difference was indeed huge.

Wu Feifei couldn't help but feel a little disappointed. She had been cheated on by her boyfriend and best friend, so she wanted to comfort herself by watching the sunrise, but the sunrise didn't meet her requirements.

However, just as she was feeling disappointed, she looked at the sunrise in the distance and suddenly widened her eyes, revealing a look of disbelief.

All of a sudden, she realized that the sunrise was different.

The light seemed to have a magical color, making it extremely beautiful.

Just this alone was something that all the sunrise she had seen in the group couldn't compare to.

She didn't understand what had happened. Everything had changed at sunrise.

Soon after, not only did she see the sunrise, but she also realized that the sunrise in front of her seemed to have become very shocking.

That kind of shock rushed straight to the heart, and he couldn't be lost in thought for a long time.

furthermore, she could feel herself falling into an indescribable state as she looked at the sunrise. it was as if her entire soul had been healed.

For a moment, all she could think of was the beautiful sunrise in front of her, and she forgot about the affair between her best friend and boyfriend.

in the surroundings, there were also exclamations, "

"Have you noticed that the sunrise is a little different?"

it's not just a little. It's completely different all of a sudden. How can it give me such a shocking feeling? "

it's not just shocking. There's also a special artistic conception that reminds me of two lines from an ancient poem!

"Who said that the sunrise on fairy tale mountain is not good? Isn't this very good?"

"....."

in an instant, all the tourists who were watching the sunrise were shocked. their eyes were filled with disbelief and they couldn't look away.

They all thought that what was said on the internet wasn't true, or perhaps it wasn't the truth. Only when they saw it with their own eyes did they know that the sunrise on fairy tale mountain was so beautiful.

In the reserved inner area, Qin Lin also saw the sunrise after the renovation. Just like that, the renovation was done quietly and quietly.

As expected of the goddess stone.

He was also shocked by the new sunrise.

The sunrise on fairy tale mountain after being transformed by the goddess stone was even more shocking than watching the sunrise in the game.

He could hear the exclamations of the tourists on the sunrise viewing platform on the other side. They were obviously shocked.

This was good.

the last flaw of fairy tale mountain had been fixed.

at this moment.

The tourists were indeed completely shocked. One by one, they took out their phones and started to take pictures of the sunrise.

How could such a stunning scene not be recorded?

Wu Feifei felt the same way. She couldn't help but take out her phone and take a picture of the sunrise.

She was not a professional photographer.

However, when she recorded the sunrise on her phone, she was shocked by the video. Did she really capture the shocking sunrise in the video herself?

It was too unbelievable.

This was naturally the effect of the advanced +2 attribute.

Wu Feifei couldn't help but open a WeChat group to watch the sunrise and said, " " the sunrise on fairy tale mountain is so beautiful and unbelievable. i'll share it with you. "

This message caused the group to become lively, but there were many ridicules:

"The sunrise on fairy tale mountain is beautiful too? It seemed to be ordinary! I've been there!"

there are also videos of sunrise on fairy tale mountain on the internet. Although it's not bad, it's not too spectacular.

"Yeah, this girl has never seen a truly spectacular sunrise."

"....."

Wu Feifei was a little displeased when she heard this.

What did these people know?

She immediately sent the video she had just taken to the group.

Since there was a video, the people in the group would naturally click on it.

with this click, everyone was stunned. as the video played, they were shocked by the sunrise in the video and were unable to turn their eyes away.

It was too shocking and too beautiful.

the members of the group were all sunrise lovers, but they were sure that they had never seen such a beautiful sunrise before.

He had never even seen any video that could capture such a beautiful sunrise.

This was naturally caused by his +2 entry attribute.

In an instant, the group was boiling with excitement.

is this really the sunrise on fairy tale mountain? "

the sunrise I saw at The Flower House tree community's viewing platform last time was obviously not like this. It was not so spectacular!

"Didn't they say on the internet that the sunrise on fairy tale mountain is not good? But why is the situation like this in the video?"

" f \* ck, i want to go and see it after watching the video. i've been to 17 famous mountains to see the sunrise before, but none of them can compare to this video. "

"....."

Wu Feifei couldn't help but smile when she saw the shock in the group.

She was dumbfounded now that these people were teasing her, right?

There was a time limit to watching the sunrise. When the sun completely rose, the surroundings would be bright, and the view of the sunrise would lose meaning.

However, at this moment, everyone realized that after they had recovered from the shock, they did not feel tired at all. Instead, they were in high spirits.

They felt that they were full of motivation to start today's fun.

this was clearly the effect of the +2 mental relaxation attribute.

It didn't take long for the internet to be shocked.

Because of the +2 entry attribute, even if those tourists didn't know how to record videos, the videos would still be hard to look away.

No one would have thought that the sunrise could be so spectacular, right?

The sunrise lovers were especially attracted to it and expressed their desire to come to fairy tale mountain to watch the sunrise.

Naturally, there were also many people who questioned, "

"Can I say that the video is fake? I've seen the sunrise on fairy tale mountain with my own eyes."

it's fake. Otherwise, it's the one I saw last time. It's on holiday.

I might have seen the sunrise on fairy tale mountain once too. It wasn't as spectacular as this one.

"....."

At this time, a blogger suddenly posted a video. In the video, there was a comparison between the two videos. One of the videos was the sunrise in fairy tale mountain video posted by netizens today.

The other video was also a sunrise video on fairy tale mountain, but it had been posted on the internet before.

everyone, take a look. They're both sunrise on fairy tale mountain. The difference between the two videos is so huge, so the video this time is obviously fake. I've never seen a sunrise so spectacular before!

The comparison between the two videos was very obvious and clear!

Everyone could also see it clearly. It was indeed fairy tale mountain, but the sunrise in the video was really too different.

this had indeed puzzled many people.

someone came out to question this blogger. " "That's because your shooting skills are terrible and you can't compare to them!"

However, the blogger quickly showed him his photography Association member Certificate and first-level Photography Certificate,

All of a sudden, all the doubters were shocked.

With these two certificates, who would dare to say that the blogger's skills were bad? Could it be that the difference was really that great?

Not long after, another person posted the same comparison video, all of which was a comparison between the new video and the previous video.

it's impossible for the sunrise in the same place to be so different. I've decided to go to fairy tale mountain to see the sunrise there!

it wasn't just one person who had this idea. many tourists who had seen the sunrise on fairy tale mountain had the same idea.

These tourists had made a special trip to fairy tale mountain for this reason, and then these people were also shocked by the sunrise.

When the tourists who had experienced it twice also posted videos online, saying that the sunrise on fairy tale mountain was even more shocking than in the video, it really blew up.

So, the video from before wasn't fake, and the sunrise on fairy tale mountain had really suddenly become so beautiful and shocking?

This attracted even more attention.

forget about the climate change in you city, it could even change the sunrise? Was it really that magical?

of course, some people in you city had other thoughts, such as liu hua. he had gone to the reservoir to catch a white yellow tiger to sell. although he hadn't caught any fish, at least he had done a good job in his fish farming business.

after the national treasure fish came out, he couldn't raise any more fish. although he got compensation, he couldn't find a new project.

However, when he saw the news about fairy tale mountain in the Linlin Scenic Area today, he suddenly realized that he had found another project.

The sunrise on fairy tale mountain was so beautiful and shocking, but you city was filled with mountains. Not only could one watch the sunrise from fairy tale mountain, but there was also a limit to the number of tourists that fairy tale mountain could entertain.

However, there were many tourists who liked to watch the sunrise.

This was the way to make money!

#### [Chapter 1369 Is This Really The Same Sunrise? 1](#)

After the sunrise on fairy tale mountain had been modified, it had indeed shocked everyone.

The popularity on the internet was at its peak.

Even Zhao moyin could not help but go up fairy tale mountain to watch the sunrise again.

she had seen the sunrise on fairy tale mountain before, so she knew what it looked like.

There were more and more videos online that showed that the sunrise on fairy tale mountain had really changed. How could she not be curious?

After watching the sunrise on fairy tale mountain again, she was also completely shocked.

In you City County.

Chen Li and sun Xian were also paying attention to the news of the sunrise on fairy tale mountain.

The two of them were very happy to see this kind of popularity. After all, the sunrise on fairy tale mountain was also the sunrise of you city, so they would bring their you city along.

this could also increase his popularity.

However, the two of them were also extremely curious. Why did the sunrise change?

As the two of them were chatting, a person in charge of mountain forest contracting ran over. " sun county, chen county, there are a few barren mountains that no one has visited today that have been contracted. and there is more than one person who has contracted them. "

When sun Xian and Chen Li heard this, they were both stunned.

There were many barren mountains in your city. Except for Fairy Tale Mountain, which was contracted by the Linlin Scenic Area, the other barren mountains were not visited by anyone.

Now that someone had suddenly come to contract these panicked mountains, they immediately knew why.

It must be because of sunrise changes in Fairy Tale Mountain.

After all, Fairy Tale Mountain was not the only place where one could see the sunrise. As long as the mountain was high enough, one could see it from any other mountain.

Therefore, someone had set their eyes on these mountains, or rather, on the sunrise.

Chen Li thought for a while and said to the person in charge, if someone wants to contract it, then just do it. However, it must be clearly stated in the contract that no damage to the environment is allowed. Otherwise, the county has the right to stop the contract at any time.

"Alright, Chen Xian!" the person-in-charge nodded and immediately left, returning to the forestry department.

The forestry Department was actually a very idle Department. There were usually very few people, but today, there were many people gathered in the hall.

Hua Liu was one of them.

He was also glad that he had come early. Otherwise, if he had been late by a day, he would not have been able to drink the soup.

He glared at the others like a tiger watching its prey.

He knew that someone had the same thought as him.

He could tell from the conversations of some people.

But no matter what, he had to contract a mountain and develop a sunrise viewing project on it.

As long as that kind of sunrise was developed well, it would definitely be more popular than Fairy Tale Mountain.

After all, Fairy Tale Mountain had a limit on the number of people who could view it.

Fortunately, he was also the first in the queue, so no one could snatch his number.

The person in charge of forestry walked in and gave an order to a person in the hall. The hall began to receive them and quickly began to call out numbers.

Hua Liu immediately went to a window and started to fill in the form and related information.

After going through a series of procedures and signing the contract, he finally got a contract for a mountain. It cost him all the money he had earned from raising fish at the reservoir and all the compensation.

Liu Hua left the forestry Department excitedly and drove to the mountain.

He couldn't wait to see his own territory, or his money tree.

This mountain was not far from fairy tale mountain, so he could see fairy tale mountain clearly from here.

It was just that this mountain was barren and had not been developed at all. They could not even find a way up the mountain.

However, after soaking in the reservoir for so long, Hua Liu's skin was also thick, so he didn't care about this. He squeezed out a path and walked up the mountain.

Soon, Hua Liu reached the top of the mountain. From here, he could see the whole picture of fairy tale mountain. He also found the best spot to watch the sunrise.

This side was facing the mountains in the distance, so he could see it clearly when the sun rose from the top of the mountain.

However, it was still early. There was still a long time before they could watch the sunrise.

Liu Hua began to explore the mountain and began to think of a development plan.

Since he had contracted the mountain, he had to do well in making money. Furthermore, he wanted to maximize the benefits of this sunrise.

liu hua quickly went down the mountain and returned to you city. in the evening, he moved the tents and other things to the foot of the mountain and then moved them up the mountain.

He then used a hatchet to cut down all the wood in that area and made an open space. Then, he set up his tent and took out some food, quietly waiting for the night to fall.

As the sky turned dark, the glow of fairy tale mountain reappeared, and the entire mountain began to look like a fairy tale world.

Hua Liu looked at fairy tale mountain from afar and was attracted to it.

From this place, one could see the entire fairy tale mountain. It was really a different viewing angle.

he couldn't help but take out his phone and take a picture of fairy tale mountain, then uploaded it to his Short Video account.

Although she didn't have many fans, she still couldn't help but post it.

He had to admit that the man surnamed Qin was very powerful to be able to develop a barren mountain into such a beautiful, spectacular, and beautiful place.

However, the sunrise wasn't unique to him.

he was going to cut off this part.

Thinking of this, he couldn't help but smile.

hua liu set an alarm in the tent and went to sleep early. he entered the land of dreams with anticipation for the beautiful future.

## [Chapter 1370 Is This Really The Same Sunrise? 2](#)

Hua Liu woke up immediately when he heard the alarm and ran out in a hurry.

At this time, the sky was still bright with a moon and few stars. The surroundings were dark and he could not see anything clearly.

Hua Liu, on the other hand, used his flashlight to light up the front and came to the spot he thought was the best place to watch the sunrise.

He was filled with anticipation when he saw a flash of light appear from the mountains in the distance. At this moment, his anticipation had reached its peak.

However, when the sun rose above the mountain, he was dumbfounded.

Gradually, his expression became even more dazed.

This was because the sunrise in front of them was very ordinary. It was not as spectacular as in the videos online, and it was not as shocking.

This wasn't right, it shouldn't be.

"Why is it like this?" Hua Liu didn't understand at all. He hurriedly took out his phone and took a picture of the sunrise in the distance.

The scene in the video was also not as spectacular as it was described on the internet.

liu hua didn't believe it and took a few more videos, but the result was the same.

He was even more dumbfounded.

It was the same sunrise, but why was it so different here and on fairy tale mountain?

Isn't this too unfair?

A sunrise like this was not attractive at all.

however, didn't this mean that his expenses on contracting the mountain would be completely gone?

At the thought of this, he felt a wave of powerlessness and fell to the ground.

At that moment, not only Liu Hua, but a few others were also watching the sunrise from the top of a mountain.

Some even brought their friends, relatives, and wives. Before this, they had bragged about the sunrise viewing project, saying that they wanted to enjoy the benefits of the Linlin Scenic Area.

But when they saw the sunrise, they were all dumbfounded.

This sunrise was completely different from the one on fairy tale mountain. No matter how much the video was shot, it was not as shocking as the one on the internet.

For a moment, there were even people crying for their mothers.

Because they had put in a lot of effort, they had been in a hurry to contract the land, afraid that others would contract the good spots first. They had not stayed there to watch the sunrise at all.

moreover, the same sun, the same sunrise in the same place. they didn't expect it to be like this.

On the mountain peak.

Liu Hua stood up again after a long time. He got up weakly and entered the tent. He started snoring the moment he laid down.

He was already listless when he woke up early in the morning, and now that he had suffered the blow of all his money going to waste, he was in despair and just wanted to sleep.

After an unknown period of time, Hua Liu got up weakly. He looked outside and saw that it was already noon.

But his heart was dark.

his savings from raising fish in the reservoir for so long, as well as the compensation from the officials, were all for nothing this time.

He really wanted to point at the heavens and ask them why they were so unfair.

Hua Liu had no choice but to go down the mountain. He didn't even bother to clean up his tent. After taking a shower at home, he forced himself to be alert.

He spent the money to contract the mountain. Even if the sunrise Project didn't work, he had to think about developing it.

After sitting down and eating something, he picked up his phone and opened a Short Video only to be shocked.

a series of notifications about likes, comments, and favorites appeared.

Hua Liu opened the video in confusion. He was even more shocked to find that the video he had filmed on fairy tale mountain yesterday had gone viral.

He had more than 1.4 million likes.

this was enough to show how many people were paying attention to it.

The comment section was even more lively:

it's so beautiful. I can't believe I can look at fairy tale mountain like this. May I know where this is? "

looking at fairy tale mountain from this direction, it really has a different kind of artistic conception.

I'm at the Linlin Scenic Area right now. Please tell me where this is!

"I'm also seeking this position!"

"....."

Hua Liu was stunned when he saw this.

This works too?

he had only taken a video and uploaded it.

A thought inexplicably floated through his mind.

it really felt like a ray of light at the end of the tunnel.

Since the project had failed, how about he develop a project to view fairy tale mountain?

He immediately sat in front of the computer and began to plan.

This was what he had to do.

However, the internet was in an uproar.

Because other than Liu Hua, there were other people who contracted the mountain. These people posted videos on the internet to criticize, "

the fairy tale mountain in Linlin Scenic Area is false publicity. The sunrise in you city was not applied for at all!

the sunrise you see with your own eyes is like this. It's not what the internet says at all. Linlin Scenic Area is a liar!

rejecting such false publicity, I've been screwed over by Linlin Scenic Area!

Such a title was very sharp and full of contradictions, and it became a hot search in an instant.

In a room in you city, a man was looking at the computer with a gloomy face.

"It's already trending!" Someone beside him said.

the man nodded. " that's a must. otherwise, our money will go to waste. at least, we have to make it popular. maybe we can make you city refund the contract. "

not everyone was like hua liu. although the sunrise project failed, he accidentally discovered a new project. others were completely lost. that was why some people thought of such an extreme method.

This hot search video naturally attracted more and more attention from netizens.

Then, the tourists who had seen the video of fairy tale mountain came out to clarify, saying that this was smearing the reputation of Linlin Scenic Area.

the two sides actually started a war of words.

The next day, this situation seemed to have become a public opinion.

In you city.

Chen Li and sun Xian had already noticed this matter.

the two of them were also a little confused. they didn't understand why such a different scene would happen.

The same sunrise should be the same in you city.

A Secretary walked into Chen Li's office. Xian Chen, there's a climate professor from the top. He said it's an inspection and needs our cooperation.

When Chen Li heard this, he immediately went out with his Secretary to welcome them.

It was obvious that it was for the day on fairy tale mountain. With such a huge public opinion on the internet, the higher-ups naturally wanted to take photos of the relevant experts to understand and clarify the facts.

Chen Li quickly met the professor in the area of climate. His name was Zhu Qing.

After introducing themselves, Zhu Qing said to Chen Li, " " chen xian, please help me make some arrangements. i plan to go to fairy tale mountain in the linlin scenic area to check out the sunrise situation first, and then pick a random mountain for the sunrise situation! "

Chen Li nodded and asked his Secretary to make the arrangements.

He didn't even need to go through Qin Lin for this kind of thing. He could just ask his Secretary to contact the Linlin Manor's ticketing Department.

therefore, that night, zhu qing went to fairy tale mountain to watch the sunrise with chen li accompanying him.

When they got up the next day, the two were completely shocked by the beautiful sunrise on fairy tale mountain. Even if Zhu Qing was an expert in this field and had done a lot of research on sunrise, he could not hide the shock of seeing it with his own eyes.

after another day, zhu qing followed chen li and some people who accompanied him from the county to another mountain.

When they reached the top of the mountain, they found that there were still people there. They were in a tent and seemed to be planning something.

Liu Hua looked at Chen Li's group with a puzzled expression. He even recognized Chen Li.

"sir, this should be the best place to watch the sunrise, right?" chen li asked liu hua.

When Liu Hua heard Chen Li's words, he said,"County Chen, if you want to come here to see the sunrise, I advise you not to waste your time. You will be very disappointed."

It wasn't strange for Chen Li to be recognized. After all, he had been live-streaming many times and often appeared in public. Many people in you city should know him.

Liu Hua's suggestion made Chen Li frown. He understood what Liu Hua was trying to say. The sunrise here could not be compared to fairy tale mountain.

However, they still wanted to see it for themselves.

Time passed, and it was already ten O 'clock in the sunrise the next day. Chen Li, Zhu Qing, and the accompanying you city people got up early and waited for the sunrise.

However, when they saw the sunrise on this mountain, Chen Li and Zhu Qing were both stunned.

The sunrise was so ordinary. Was it really the same as the sunrise on fairy tale mountain?

In other words, what the internet said was true.

The same sunrise on the other mountains was not as shocking as fairy tale mountain.

"professor zhu, what's going on?" Chen Li could not help but ask Zhu Qing.

zhu qing was equally shocked and couldn't answer for a moment. this was the first time he had seen such a scene. he could only frown and think for a moment before saying, perhaps this has something to do with the meteorite that fell into fairy tale mountain, because the meteorite has brought about changes in the climate layer, "

As he made up the story, he seemed to be unable to continue. This should not be the reason.
