

The Game 1371

[Chapter 1371 Another Academician At Linlin Laboratory?](#)

Fairy tale mountain and you city's popularity rose again, receiving more attention. The reason was naturally because of the sunrise.

After Zhu Qing and Chen Li had personally inspected fairy tale mountain and another mountain peak, they had already confirmed that the sunrise on fairy tale mountain was more shocking and spectacular than the sunrise in other places.

They were all in you city, but the other peaks couldn't compare to fairy tale mountain!

This was absolutely inconceivable and even shocking.

Zhu Qing, the expert, couldn't explain it for a while. He could only speculate that it should be related to the meteorite that had fallen on fairy tale mountain.

However, whether that was the case or not, he could only slowly investigate it later.

It was precisely because of this that this scene was a miracle to most people.

Some people even regarded this scene as one of the miraculous sights.

Because of this magical scene, many tourists came to fairy tale mountain to watch the sunrise, and then went to other peaks to watch the sunrise for comparison, which attracted another wave of tourists to you city.

qin lin didn't pay any more attention to this matter. he had entered the game and headed to the depths of mount saint missus, to the wet forest where he had met the goblin child, abair.

The Goblin Gloves and the special willow leaf duckweed that he had obtained from the Goblin were all good stuff.

Linlin's laboratory hadn't cracked the Goblin glove yet.

however, this time around, he did not see the goblin abair even after searching for a long time in the damp forest. instead, he did see something unusual in the damp forest.

There were many huge Footprints in the Forest.

These footprints were clearly not human. They were squarish and looked a little like mechanical footprints.

Qin Lin didn't know what these footprints were. After not seeing the Goblin for a long time, he decided to go back the way he came. He returned to the mountain path in the game and logged out of the game with a thought.

Back in the office, he checked the management APP to understand the situation of each company. Then, he looked at the screen in his mind and controlled the game character to run around.

at this moment, his phone rang.

He took out his phone and saw that it was from professor Wang. Previously, he had handed over the research and cracking of the Goblin Gloves to professor Wang, so he must have gained something.

He pressed the answer button and heard professor Wang's voice, " Chairman Qin, we've made some progress with the research on those parts. These parts can actually be assembled to use the Pixiu.

Qin Lin's eyes lit up when he heard this. He hung up the phone and went straight to Linlin's laboratory.

He knew that professor Wang was talking about the Goblin Gloves.

those parts could indeed be assembled. after all, they were originally a whole.

Professor Wang had brought people to conduct research, so it was not surprising that they could find out that it was a whole.

after leaving linlin manor, he went straight to linlin's laboratory. after two rounds of inspection, he entered the inner area and went to the laboratory where professor wang and the others were in charge of the goblin gloves.

Professor Wang was already waiting for him. When he saw him, he stepped forward and said, " Chairman Qin, you're here. We've already made a replica.

Qin Lin followed professor Wang to an experimental platform.

There was indeed a replica of the equipment placed on it, and it was much more exquisite than the Goblin Gloves that had been dismantled.

Moreover, professor Wang had obviously made some modifications to it.

The goblins 'products were indeed magical, but they were obviously cruder.

"Chairman Qin, this thing is really too magical." as professor wang spoke, he picked up the part that he had made and handed it to qin lin.

A button was added to the part.

"President Qin, press that button and try it!" Professor Wang said, as if he was trying to take credit.

Qin Lin nodded and pressed the button. Then, a spray quickly spread out, covering half of the laboratory.

a cold feeling quickly appeared, and it condensed into snowflakes.

it had the exact same function as the goblin glove from before. it was a perfect copy.

"Professor Wang, well done." Qin Lin was not stingy with his praise. He then asked,"what's the production cost of this setup now?"

Qin Lin was thinking about how to make this into a toy. It should be very popular, so the cost would be very important.

If the cost was high, then it was not something that ordinary people could afford.

professor wang immediately explained, " chairman qin, there's no way to control the cost at the moment. it would cost 20000 yuan to make one. also, i've discovered that if this thing can be modified to expand the size and spray range, it will have a greater effect. if the power of this thing can be improved, i'm afraid it can be used as a weapon directly! "

Qin Lin frowned slightly when he heard the cost. If the cost was so high, there was no way to make a toy.

very few people were willing to buy such a high-cost toy, let alone for children to play with.

However, professor Wang's words made him look impressed.

it was good that he could think of improving this thing.

Furthermore, just like what professor Wang had said, if it could spread to a large area, then it could directly hit a mountain and instantly cover the entire mountain with ice. How shocking would that be?

For example, fairy tale mountain was already beautiful now, but no matter how beautiful things were, one would still get a little tired of it if they looked at it too many times.

If he attacked fairy tale mountain directly, the entire mountain would turn into a frosty white. What kind of fantasy and beauty would it be when the fluorescent light bloomed in this Crystal White world?

[Chapter 1372 A Huge Footprint! Linlin Laboratory Has Another Academician? 2](#)

It would definitely be more of a fairytale world than a fairytale world.

When he thought of this, he began to look forward to it.

As for the weapon mentioned by professor Wang, he also had some thoughts about it. In the Marvel TV series, there was something like a freeze gun.

If professor Wang could enhance the Goblin Gloves 'power, wouldn't he be awesome?

However, this kind of thing was not easy to get. It should not be that simple.

So, Qin Lin also said to professor Wang, " professor Wang, try to expand the range of this thing. The bigger the better. It would be best if it could cover a mountain.

" chairman qin, " professor wang explained, " i'm actually already doing research in this area. there should be results soon. it's just that it'll cost a lot of money to achieve that kind of scene. "

"Money is not a problem!" Qin Lin said directly.

He just wanted to see the scenario he had in mind. As for money, he had 43 billion in his card and he didn't know how to spend it.

when professor wang heard this, he was stunned. he felt as if he had said nonsense. how could his own boss be short of money?

This year's rich and powerful list was out. Although his boss's name wasn't on it, everyone knew that with the current momentum of Linlin companies, especially Linlin laboratory, his boss should be in the top 20, and he might even be the richest.

Moreover, his boss's wealth wasn't calculated purely based on market value like those rich people. It was more realistic, and the cash flow of each company was definitely terrifying.

It was really insensible to talk about money with such a person.

don't worry, Chairman Qin, " professor Wang promised. I'll get this done as soon as possible.

"you've worked hard." Qin Lin nodded and praised.

He had been paying attention to the Goblin Gloves and knew that professor Wang had not slacked off at all. If he really succeeded, he would have to give him a reward.

Actually, professor Wang didn't care about the reward at all. All he wanted was an opportunity.

Chairman Qin was giving him a chance to crack this thing.

Even though he didn't know which laboratory Chairman Qin got this from, he knew that if he could crack it and write a thesis that could be used, he didn't know whose work this would be in the future.

This was a common occurrence in laboratories all over the world.

in fact, many countries would steal experimental data from other countries and then conduct their own research. they would be the first to develop this thing, publish it, and register a patent. then, this thing would belong to them.

Naturally, this was only one of the possibilities. There were other possibilities that were hard to determine.

However, he felt that the thing he was cracking now was one of those situations.

The principles contained in this thing were very complicated and unbelievable, and no one had released it yet.

Professor Wang hurriedly took out another paper and handed it to Qin Lin. "chairman qin, please take a look at this thesis!"

Qin Lin took the paper and glanced at it.

'research on special ice laws' "

This was obviously professor Wang's thesis on this facility. He understood what professor Wang meant.

It was just as well. Professor Wang was the one who cracked the code, and since he wanted to take the blame, he would let him take the blame.

qin lin said, " professor wang, i don't know much about the papers in this area. i'll take them back and ask the academicians at the chinese academy of sciences to help me read them. as for the source of this thing, remember not to tell anyone. if there are any results, it's you who led the research. "

Professor Wang's eyes lit up when he heard this. He quickly promised, " "Chairman Qin, I understand the unspoken rules in this area. Thank you, Chairman Qin."

He felt that he had guessed correctly. Furthermore, the origin of this thing might be related to the Hua Yuan.

This immediately made him look forward to it, and he became nervous.

If the Chinese People's Hospital confirmed that there was no problem with his paper, then after the paper was published, it would be his work.

Although this result was not worthy, the honor was in front of them. Who could resist the temptation?

This made him look at Qin Lin with even more gratitude. He secretly decided that he would work hard for Chairman Qin and Lin Lin's laboratory in the future. After all, Chairman Qin could have looked for anyone but him to crack this thing. This was a favor, a show of respect for him, and a chance for him.

" ? ? ? "Qin Lin was dumbfounded. He didn't understand what professor Wang was saying. Why was there another unspoken rule?

Why didn't he know about this?

However, this was no longer important. It was fine as long as there was someone to take the blame.

qin lin left qin lin's laboratory with professor wang's thesis. as soon as he returned to the manor office, he sent professor wang's thesis to minister lu's email.

At the same time, he called Minister Lu.

After all, this was a way to crack the Goblin's technology in the game. He felt that he had to personally tell Minister Lu. Otherwise, if he suddenly sent a document over, Minister Lu might be a little confused.

Minister Lu had just returned to his office when he received Qin Lin's call. He was a little surprised.

He knew that boss Qin wouldn't call him for no reason. Once he did, something must have happened.

He immediately answered the call and said, " "boss qin, your call came in as soon as i got to the office."

Qin Lin also went straight to the point. Minister Lu, I sent you a paper to your email. It was researched by a professor in our laboratory. I want to ask your academican to take a look at it. Brother li and I are not good at this.

Minister Lu was a little surprised to hear this. After chatting with Qin Lin for a while, he hung up the phone and hurried to his computer to open his email.

Boss Qin wouldn't send them a paper for no reason. Once it was sent, it meant that the paper wasn't simple.

Minister Lu quickly read professor Wang's paper. It was obviously a research on the principle of launch and freezing.

Even though he was in charge of this, he didn't know much about this. He immediately called a few academicians to check it out.

the academicians immediately started reading the thesis.

After reading the thesis, the academicians looked surprised.

"This paper is very in-depth. It seems to have a new breakthrough on the conservation of Ice Energy!"

indeed. Although it's only a thesis and not the core of the technology, I can tell that the finished product is not simple.

indeed. At this level, I'm afraid even we might not be able to research it.

Minister Lu was surprised and asked, "Fellow academicians, is this thesis very good?"

an academician nodded and said, "it's indeed very impressive. it's very in-depth. we might not be able to come up with a paper like this with the same research."

Another fellow chimed in. the key is that this is also a new direction. If a researcher can come up with a new direction of research and even produce results, that's the most amazing thing.

A third fellow also said: "this might not even be the result of a single fellow's research. Which fellow's research was this?"

These academicians were very surprised, but they obviously didn't know that this was the result of a professor from the Linlin laboratory cracking the Goblin glove. It wasn't his own research at all.

Minister Lu was surprised when he heard this. does that mean Linlin laboratory has another researcher with the ability of an academician?"

He was truly shocked.

Linlin's laboratory was giving more and more surprises.

the academicians were just as surprised. everyone knew that linlin laboratory had academicians little qin and li kai.

There was no doubt about the abilities of these two!

He didn't expect that Linlin laboratory would produce such an amazing researcher.

"It seems that the research atmosphere in Linlin's laboratory is really good." Minister Lu couldn't help but say emotionally.

The secrets of Linlin's laboratory would not be leaked, but some insignificant things were still known to the outside world.

For example, many researchers in Linlin laboratory would talk about the experimental atmosphere in Linlin laboratory to their classmates, former supervisors, and colleagues.

They all said that Linlin's laboratory had the best atmosphere they had ever been in.

academician li kai was very willing to give other researchers opportunities. he would even share his research results with them and make everyone who participated appear on the research list.

There was no need to be afraid that if they worked hard, they wouldn't even be able to get on the second-tier list.

Therefore, the researchers in the entire laboratory were very enthusiastic about their research. It could be said that their enthusiasm for research had been twisted into a force.

This also gave academician Li Kai a very good reputation in the industry. Everyone gave him a thumbs up for his selflessness.

Now, it was clearly proven that such an experimental atmosphere was really good for scientific research.

In addition to boss Qin and academician Li Kai, Linlin laboratory had another amazing researcher.

[Chapter 1373 618-Mutated Land! Starlight Fireflies! 1](#)

The next day.

Qin Lin got up and had some breakfast. When he arrived at the manor Office, he received a call from Minister Lu.

He knew that it must be related to professor Wang's thesis yesterday, so he immediately answered the call.

Minister Lu's voice was immediately heard, " boss Qin, congratulations. Your laboratory has another amazing researcher. Professor Wang's thesis amazed even a few academicians.

we're looking forward to professor Wang's results. You can ask professor Wang to post the thesis on the science website and we'll officially accept it.

qin lin wasn't surprised at all. after all, the goblin gloves 'effects were so special. at least, it wasn't something that similar products could do.

after hanging up, qin lin immediately called professor wang.

As soon as the phone was connected, professor Wang's surprised voice came through, " "Chairman Qin!"

He naturally knew what the call was about, and his voice was full of anticipation.

professor Wang, " Qin Lin said to professor Wang, " you can publish your paper on the science website. The Chinese Academy of Sciences will include your paper.

Professor Wang heard Qin Lin's words and immediately said excitedly, " "Thank you, Chairman Qin. I'll do my best in the future."

In Linlin's laboratory, professor Wang clenched his fists after hanging up the phone. His face was full of excitement. Since Chairman Qin said so, it meant that the Chinese Academy of Medicine had approved his paper.

This was of great significance to him.

...

after qin lin finished his call with professor wang, he looked at the game in his mind's light screen and once again controlled his game character to start doing his daily tasks.

He didn't get anything from today's daily mission. The fish were all regular fish, the tree was also a regular tree, and the mountain products were also the peach tree and the Golden Cherry.

The game's storage room must have stored a large amount of these two things.

As soon as he finished his task, Qin Lin's phone rang. It was Minister Lu.

puzzled, he answered the call. minister lu had just made a call. why was he calling again?

As soon as the call was connected, Minister Lu's anxious voice came through, " "Boss Qin, I'm sorry to disturb you again so quickly. I really need your help now."

qin lin heard minister lu's anxious voice and immediately said, " " minister lu, what's the matter? please tell me. i'll definitely handle it if i can. "

Minister Lu immediately said, " boss Qin, we've run into an accident in an experiment. The arm of a soldier who was assisting the experiment was almost cut off. We need the special Yufei cream that you've made before. Do you have any more of that special Yufei cream? "

Yes, Minister Lu. I'll ask Ma Hong to send it over! Qin Lin said immediately.

Minister Lu was talking about the grade 3 Yufei ointment. Only a Grade 3 Yufei ointment could cure broken hands and feet.

Although Minister Lu didn't say it clearly, the experiment needed the help of soldiers, so it must have something to do with weapons.

therefore, he had to help if he could.

He immediately went to the inner area and took out some quality 3 Yufei ointment from his workshop. Then, he went to the hall and called Ma Hong.

Ma Hong rushed over to him immediately. director Qin, Minister Lu has already told me. Please give me the thing!

Qin Lin nodded and handed the cream to Ma Hong. Ma Hong took the cream and left the manor.

His identity was special, and he had a special transportation channel that could help him return to the capital as quickly as possible.

Sometimes, these special channels were faster than many special officials.

Beijing.

In a Research Hospital under the Chinese People's Hospital, Minister Lu also accompanied a group of people from the Chinese People's Hospital to the emergency Center.

A soldier was lying on a mobile hospital bed, covered in blood. One of his arms was wrapped in a bandage, and blood was flowing out.

From his ferocious expression, one could tell that he was experiencing abnormal pain.

The director of the emergency Center had already received the news and was waiting. It was a hospital under Hua hospital. If something happened to the people from Hua hospital, and they even called for help, they would definitely treat them immediately.

When the head of the emergency department saw the soldier's broken limb, he immediately shouted to the nurse beside him, "Quick, get someone to prepare the Jade consort cream."

After Linlin's laboratory released the Yufei cream and defeated the HKR drug in America, the first batch of Yufei cream was released. All the large hospitals in the country had basically popularized Yufei cream.

It could be said that this Jade consort cream had a huge auxiliary effect on the treatment of external injuries and the recovery of such injuries in all hospitals. It could also save doctors a lot of trouble.

Soon, the soldier was pushed into the emergency room. The first thing the emergency director did was to untie the bandage around the soldier's arm. When he saw that the soldier's arm was almost completely broken, his face turned ugly.

Even the Jade consort cream couldn't do anything about such a wound.

The director of the emergency department didn't dare to hesitate. He immediately went out and said to Minister Lu, "Minister Lu, this warrior's arm is too badly injured. I'm afraid that even our Jade consort cream won't be effective for this kind of injury!"

Minister Lu naturally knew this and immediately ordered, "Director Lin, use the current Jade consort cream to maintain his condition for a while. A special Jade consort cream will be sent over soon. When the time comes, we'll use the Jade consort cream that has been sent over to treat him."

"Special Jade consort cream?" Director Lin was stunned when he heard that.

He knew how powerful the Jade consort cream was. Furthermore, this level of Jade consort cream was already unbelievable to him.

[Chapter 1374 618-Mutated Land! Starlight Fireflies! 2](#)

Now, Minister Lu was saying that there was a higher grade Jade consort cream that could even heal such a broken injury?

Only Qin Lin and Minister Lu knew about the effect of the grade 3 Jade consort cream. The outside world didn't know about it at all. So, it was easy to imagine how shocked the director of the emergency department was when he heard the news.

"Hurry up and go!" Minister Lu urged.

Director Lin nodded. He didn't dare to delay and immediately started treating the soldier with the Jade consort cream he had.

Although this level of Jade consort cream could not completely heal the soldier's broken arm, it could at least maintain the vitality of the soldier's arm, which was very important.

Time passed.

Ma Hong finally arrived at the hospital in a hurry. He brought a box with a quality 3 Jade consort cream and handed it to director Lu. Director Lu immediately called the head of emergency care and gave the box to him.

the emergency department director knew what was in the box, and he opened it immediately out of curiosity.

He saw the Jade consort cream inside. Just from the appearance, he couldn't see any difference from the previous Jade consort cream.

However, he knew that Minister Lu and the others wouldn't joke around, so he immediately used the grade 3 Jade consort cream to treat the one-armed warrior again.

in fact, waiting for this special jade consort cream was a very torturous process for the warrior. after all, he had to keep his arm from being completely healed, so as to not affect the subsequent treatment.

This time, he used a Grade 3 Jade consort cream to completely treat the warrior's arm and bandage the wound.

After the operation, the soldier was sent to the ward.

Minister Lu heaved a sigh of relief. He knew the effect of boss Qin's special Yufei cream. The soldier's hand would be safe.

Director Lin was different. After the surgery, he had been curious about the effects of the Jade consort cream. However, he also knew that the Jade consort cream needed time to take effect, and the effects could not be seen for the time being.

However, the next day, he rushed to the ward to examine the soldier's arm.

When he finished examining the warrior, he was completely shocked. The warrior's fingers had returned to normal and could move. This was incredible.

Was this the effect of the special Jade consort cream?

He couldn't help but untie the bandage on the soldier's arm. When he saw the scene under the bandage, his face was completely uncomposed.

he had personally performed the surgery, so he knew the situation very well.

However, the recovery speed of the wound had completely shocked him.

After a while, director Lin took out his phone and opened a group of medical experts. The group was filled with the best medical experts in Beijing and other places in the country.

he directly sent a message inside: "Do you guys believe that there's medicine for regrowing severed arms now?"

These words caused a lot of discussion in the group.

These people were all medical experts and had a lot of discussion about this.

I don't think we have that medicine for now. The most powerful one should be the Jade consort cream released by Linlin's laboratory.

" the yufei cream is indeed useful. i just used it in an operation before, but it's still a long way from regrowing my limbs. "

"Indeed, if the Jade consort cream is studied in depth, it's really possible to regrow a severed arm!"

"....."

The discussion in the group was very intense, but director Lin suddenly felt that everyone was drunk, but he was the only one awake. He had just seen with his own eyes the medicine that could regrow broken limbs. It was the Jade consort cream ...

However, it wasn't the Jade consort cream that the people in the group knew about. It was the more magical Jade consort cream.

but the outside world didn't know about the jade consort cream, and it was from the hua * yuan. he didn't know the situation, and he couldn't tell anyone.

.....

The time of the day was in the morning, this saying was absolutely correct.

Therefore, after little Qin Feng had his own room and asked his mother, Lin Fen, to help him, he couldn't help but have morning exercise with Zhao mochen. The time of the day is in the morning, isn't it?

After the morning, Qin Lin and Zhao moyin also washed up together. When they went out, little Qin Feng was already riding on little Yang's back and playing. Lin Fen had also prepared breakfast.

Qin Lin ate some breakfast and left the inner area. He went to the office and started his daily task again.

However, today, after completing the daily mission, a system notification suddenly appeared.

[game character leveled up!]

Qin Lin's eyes lit up when he received the game prompt after completing the daily task.

After such a long time, there was no movement from the game character. He didn't expect it to suddenly level up again.

This meant that there was something new to be released.

Qin Lin immediately controlled the game character to check the functions that had been unlocked after the upgrade.

After his character leveled up this time, he had two more pieces of land that could be upgraded to Level 4. However, Level 4 land wasn't of much use to him.

The paddy field could also be modified, but similarly, he wasn't really playing the game, so this extra paddy field wouldn't be of much use to him.

One more piece of land could be developed, but there were no new seeds in the space, so there was no difference.

To Qin Lin's surprise, there was a new piece of special land that could be transformed.

[mutated soil!]

[transformation conditions are lacking!]

Mutated land. This land had never appeared before. Also, just like the space land, it lacked the conditions for transformation.

Previously, the outer space had only been modified after they had obtained a special meteorite from ah ni.

What did he need to transform this mutated land?

There wasn't such land in the game, right? At the very least, he had not seen any players talking about this land in the forum.

moreover, it lacked the conditions for modification. it was obvious that it needed special things to be modified, just like the space ground.

He just didn't know what this thing was.

Thinking of the mutated space vine and the mutated Night Queen, he immediately controlled his game character to try and see if he could level up this mutated land.

According to the rules of the game, the more developed the land was, the more advanced it would be, and the better the things would be.

however, after he controlled the game character to try it out, he found that it was the same as the space ground at the beginning. there was no way to modify it, and it always lacked the conditions for modification.

In the end, Qin Lin could only give up. He controlled the game character to go to the farm to see what new buildings had been opened after the upgrade.

This time, the ranch only opened one building, but when he saw the name of the building, he was stunned.

[Starlight Firefly nest, build?]

Firefly?

Can this pasture even raise fireflies?

Moreover, from the name, it was obvious that they were not ordinary fireflies.

Speaking of fireflies, Qin Lin was no stranger to them. They were a kind of bug that was very beautiful at night and had been praised since ancient times.

In ancient times, there was a saying, "the night breath is as empty as a jar, who lights it, a small river lamp." A hundred billion final lights, a soft flute sound. The plain glaze turned into sand with the wind, who broke into pieces, the sky full of stars. Blow out the color of my soul, light and green." Such ancient poems were used to describe fireflies.

Qin Lin couldn't help but think of some meetings. When he was young, he often saw fireflies in his hometown. His favorite thing to do was to catch those fireflies with Qin Ren and put them into empty bottles to use as fluorescent lights.

the next day, when all the fireflies died, he and qin ren would be sad for a long time.

It was just that he didn't know when it started, but he had never seen fireflies again.

It was as if the creature had suddenly disappeared from the world.

As he recalled, Qin Lin did not hesitate to build the Starlight Firefly nest, no matter what it could bring him.

It was worth it to see the fireflies again. After all, they were childhood memories!

[Starlight Firefly's nest is being built, cricket]

[congratulations, the starlight firefly nest has been completed!]

[Chapter 1375 Optimus Prime, Megatron? 1](#)

A moment later, the Starlight Firefly nest was completed.

Qin Lin controlled his character to check it out.

The Starlight Firefly nest was like a big box with holes on it, which made it look like a beehive.

However, the Starlight Firefly nest in the pasture was very large.

[Firefly eggs are available in the ranch store. You can go and buy them!]

Qin Lin saw the prompt and immediately controlled the game character to go to the ranch store. He clicked buy, and a list of items appeared. Sure enough, he saw the option to buy Firefly eggs.

Click to buy immediately!

[congratulations on your successful purchase of the Starlight Firefly egg. The Starlight Firefly egg has been sent to the farm!]

Seeing this, Qin Lin controlled his game character to go back to the farm.

He went to the front of the Starlight Firefly's nest and found that there were indeed 200 Firefly eggs inside.

Apparently, the Starlight fireflies grew very fast. Qin Lin stared at the game screen from time to time and found that in less than half a day, fireflies had already broken out of their eggs and flew out of the nest, floating around the surroundings.

When the game screen turned dark, the fireflies began to glow like shining stars.

Qin Lin immediately entered the game and saw the fireflies more realistically.

Floating in the dark night, it was completely impossible to see their specific figures, only the bright fluorescent light of their tails.

It was as if they were surrounded by a Galaxy, which was very romantic and magical.

Qin Lin reached out to grab it, and a Firefly immediately appeared in his palm.

Fireflies' reactions were a little slow. That was why they could catch fireflies so easily when they were young.

Of course, don't use too much force, because it will cause the death of the fireflies.

Most of the time, the moment people tried to catch fireflies was the moment they died. They were beautiful, but they were also very fragile.

[Starlight Firefly: special!]

[this is a special kind of Firefly. Its tail can emit a fluorescent light like a star. It is harmless. When there are enough of them, they will have a special attribute: Romantic atmosphere +2, beauty +2, entry +2, attraction +2, shock +2, memory +2!]

[restrictions: high requirements for the environment. Can only adapt to the environment once. After adapting to the environment, once the environment changes, you will die quickly!]

After Qin Lin saw the remarks of the Starlight Firefly, he let go of the Firefly in his hand and let it fly away.

it had to be said that the attributes of these fireflies were completely in line with the linlin scenic area.

The aesthetic, advanced, and attention-attracting attributes were already common.

The romantic atmosphere and shock went without saying.

Even if they were ordinary fireflies, once there were enough of them, they would also give people a kind of shock, and it would also give people a romantic feeling.

Moreover, he had the game's attribute bonus, so the shock would definitely be stronger.

on the other hand, the memory attribute should be a little impressive.

It must be able to make people recall their childhood, right?

After all, for most people, they had only seen fireflies in their childhood. They probably had not seen them after they grew up.

Moreover, there was a saying that the best concept right now was memory kill. Therefore, many variety shows had also begun to use memory kill.

And how many of the past stars had been recruited, only to become famous again because of the memory kill?

If this Firefly could make people recall their childhood, it would be amazing.

Naturally, there was a prerequisite for these attributes, and that was that there had to be enough of them.

This number should not be possible with just a few hundred fireflies. After all, there were 200 of them in front of him. He did not notice that the attributes of these fireflies had been activated.

It didn't take long for the Starlight fireflies to mature, and a dwarf came over to harvest them. The Starlight fireflies were locked in a special box.

This kind of box obviously wouldn't affect the fireflies' movement inside, unlike him and Qin Ren who used to keep the fireflies in bottles and suffocate them to death.

Qin Lin then controlled his game character to go to the ranch store and continue to buy Starlight fireflies.

he planned to transport the firefly out of the real world and put it in the linlin villa and linlin ranch.

When the time came, the scenic Area would be filled with fireflies. It would be very magical and beautiful, and it would even add a layer of ornamental value to Linlin villa and Linlin Ranch. It would not be like the night scene of fairy tale mountain.

A Scenic Area had to be constantly upgraded to give tourists a new experience.

However, he needed enough fireflies.

Moreover, the Starlight fireflies had high requirements for their environment. Even if they were transported out, they would have adapted to the environment of Linlin villa and Linlin pasture, and no one could steal them.

they were exclusive to linlin scenic area.

for the rest of the day, qin lin bought starry firefly eggs every day and then raised the fireflies to maturity. in a full month, the number of fireflies stored in the storage room had exceeded 6000.

However, 6000 fireflies were still too few for the entire Linlin Ranch and Linlin villa. They still needed to continue breeding them.

...

Qin Lin controlled the game character to go to the ranch Shop and bought the Starlight Firefly eggs again. Then, he controlled the game character to complete the daily tasks.

his luck today was still not good.

After completing his daily mission, he controlled his game character to head towards the mountain path of Mount goddess. He then entered the game again with a thought and appeared on the mountain path of Mount goddess.

[Chapter 1376 Optimus Prime, Megatron? 2](#)

Then, he went deep into the mountains again and headed to the damp forest where he had met Abril.

When he saw the huge Footprints in the Forest, he had some guesses and wanted to find out what it was.

Although the story of goblins didn't have much of a description of goblins, in many games and even movies, Goblin technology was basically black technology.

This time, as soon as Qin Lin approached the damp forest, he heard a violent collision sound.

The impact was very strong, and there was the sound of metal colliding. It was very clear.

When Qin Lin heard this, he immediately quickened his pace and walked forward. When he was near the wet forest, he was shocked.

They saw two huge figures colliding and fighting each other.

One of the figures was Optimus Prime, who he was familiar with, and the other was Wei zhentian.

these were two mechanical lives from the movies. now, they had appeared in front of him and were in an intense battle.

Most importantly, Optimus Prime and Wei zhentian's movements were smooth and did not slow down at all. It was an incredible sight.

Of course, these were not the real Optimus Prime and Megatron, because their eyes did not have any light or fire. They were just two lifeless mechanical bodies.

Then, Qin Lin looked to the side and saw Albar standing there, waving his arms and twisting his body. There was a Goblin Child beside him.

The most important thing was that the two gnomes were also wearing some special equipment.

When he saw this, he understood that those were probably sensors. The two gnomes were controlling Optimus Prime to fight Megatron.

At this moment, he finally understood what the giant footprints were all about.

In fact, there were such sensory devices in the real world. There were also robot technology, and there were also such sensory devices that could be used in conjunction with robots.

In this aspect, America's technology was the most advanced in the world.

However, compared to this, the most advanced technology in America seemed to be nothing.

Not to mention the fact that America's most advanced robot technology could not produce such flexible robots, the smoothness of the induction alone was far better than the United States.

One could only say that the gnomes were really powerful.

after all, he had only sent those animated movies to elba. who knew that these gnomes would create such a thing?

"I'm too tired, let's take a break!" Elba's voice rang.

The other Goblin also spoke in a clear voice, " "Alright," he said.

it was a little goblin girl. if she didn't say so, qin lin wouldn't have known.

Goblins had strange appearances, and it was really difficult to distinguish them.

it seemed that elba had a new toy and was sharing it with his female friends. it seemed that not only the small butts in real life matured early, but the goblin children in the game were the same.

"It's you!" elba asked in surprise when he saw qin lin.

qin lin smiled as he walked forward. he couldn't help but observe optimus prime and wei zhentian. "elba, we meet again. it seems like you have a new toy. "

Elba couldn't help but say proudly, " this is also a toy my father made for me. My father is the best craftsman and producer among the goblins. He made these toys for me after watching those videos.

Obviously, Elba was very proud of his father.

Qin Lin's eyes brightened a little when he heard the identity of Elba's father. The most powerful craftsman and producer of the gnomes. That was great.

As for why it was good, wasn't it obvious?

At this moment, Elba asked Qin Lin, " "Do you still have such animations and movies? I also want one, especially one that's suitable for girls!"

Qin Lin subconsciously looked at the little goblin girl when he heard this, as if he immediately understood Elba's purpose.

of course, " he immediately said with a smile, " but it's hard to find these animations and movies.

This was a hint that he wanted some benefits.

Moreover, there were many mechas that girls liked. For example, things like concept battle armor. Girls could also like mechas, and they would not be weaker than men. They would even be cooler.

Elba seemed to understand the meaning of Qin Yang's words and immediately asked, " "Then, can I give you Optimus Prime and Megatron? I can also ask Dad to make two new ones for you."

Qin Lin looked at Optimus Prime and Wei zhentian, but he didn't seem to be interested. Elba, these two guys are too big for me to take with me. How about you give me their designs? "

He was very clear on whether he wanted an egg or a hen.

elba was obviously a little conflicted when he heard this, but after taking a look at the goblin girl, he immediately said, " "I can steal Yingluo's design and trade it with you, but you have to help me find the anime and movie!"

don't worry, we'll hand over the design plan while we video chat. Qin Lin laughed at once. After talking to Elba, he went back the way he came. After returning to the mountain path, he logged out of the game with a thought.

He found another tablet and connected it to the computer. He downloaded concept battle armor and then downloaded several battle armor videos that were popular with girls on the internet.

After that, he brought the tablet back into the game.

When he returned to the damp forest again, he saw Elba running up sneakily, as if he was afraid of doing something bad and being discovered.

"Did you bring the thing?" Elba immediately asked Qin Lin.

"here." Qin Lin handed the tablet to Elba, who took it and hurriedly ran to the little goblin girl, clicking on the video on the tablet to show her.

After the Goblin girl took a look, she was attracted by the pink female mecha in concept mecha. She cheered happily, " "Elba, this mech is so beautiful!"

Elba was obviously very happy to see the Goblin girl's excitement, and he showed a silly smile.

Qin Lin noticed that he seemed to have forgotten something and immediately reminded him, " "Elba, don't forget our deal!"

Naturally, Elba remembered it. He immediately went to Qin Lin, looked around, and took out a scroll of design from behind a stone, handing it to Qin Lin. this is for you. My dad said that you can make even more powerful toys. If there's a chance, we can make a deal!

With that, Elba took the Goblin girl and controlled Optimus Prime and Megatron to run away.

Qin Lin laughed when he saw this. He could roughly guess that Elba had stolen the design again.

Children loved to steal slippers from home to exchange for candy.

Qin Lin didn't waste any time after he got the design. He immediately returned to the mountain path of Mount goddess and logged out of the game with a thought.

When he returned to his office, he sat down and began to look through Optimus Prime and Megatron's designs.

Although Qin Lin had never learned about mechanical design, he could tell that it was not the Goblin's steam technology as he had imagined. It was just normal mechanical technology and sensory technology.

this kind of technology seemed to be able to be realized in reality, but it seemed to be much more powerful than the technology in reality.

It was actually quite unbelievable. This was the mechanical technology created by the gnomes.

But thinking about it, it seemed normal. If the gnomes could make things like steam machinery, would it be difficult to make ordinary mechanical technology?

elba also said that his father could make even more powerful toys, which might be steam goblin technology.

He was really looking forward to it.

Then, he immediately put away the design and drove out of the manor to Linlin's laboratory.

If these two big guys were placed in Linlin Manor, it would probably be very shocking, right?

Moreover, in reality, this thing could probably not only be used for viewing or as a toy. It could be used in many other aspects.

of course, he did not think that far ahead. he just wanted to place two of them at the entrance of linlin villa and choose two smart people to control them. he was afraid that it would shock all the tourists.

He didn't have the skills in this area, so he could only ask professor Wang and his people to do it. He just didn't know if professor Wang could get away with the Goblin Gloves.

[Chapter 1377 What If Optimus Prime Was Equipped With A Weapon? Miniature CloudRain Stone!](#)

In the Linlin laboratory, professor Wang was in a good mood. His thesis had been published on the science website and had been accepted by the Chinese Academy of Sciences.

His reputation in the entire scientific community had risen to the extreme.

He didn't know how many people were still studying his thesis. This was a very high honor.

However, he also knew that this was an opportunity given to him by Chairman Qin.

hurry up and solve the experiment on the spread of ice and snow as soon as possible. Professor Wang thought about it and urged the researchers. Now, he naturally had to do what Chairman Qin asked him to do.

At this moment.

His phone rang. Seeing that it was Qin Lin, he immediately answered, " Chairman Qin, you're already in the laboratory. Okay, I'll be right there.

Professor Wang hung up the phone and left in a hurry. He went to a conference room to see Qin Lin.

"Chairman Qin, do you have any orders?" Professor Wang immediately asked Qin Lin.

Qin Lin passed the design he got from the Goblin Abril to professor Wang. "Professor Wang, take a look at this design."

Professor Wang immediately took the design. When he saw the shape on the design, he was stunned."Chairman Qin, are these Optimus Prime and Megatron?"

The reason he knew this was because his son liked these two mechanical toys. He had specially checked and bought the relevant toys.

Although it was a foreign product, children liked it and didn't care about those things. They couldn't be so angry that they said that foreign things were not used, right?

Qin Lin nodded. yes, that's true. Take a look at the design first!

professor wang nodded. he knew that his boss had a reason for letting him see the design. but after a while, he was shocked. the mechanical power, long-range sensing, and mechanical bone armor design are amazing. They're incredible.

Professor Wang was completely shocked, especially the principles of the mechanical bone armor's design. It simply made him feel like he was a God.

Every country had the technology to create robots, but everyone knew what the finished product looked like.

It could be said that the robots at this stage were very slow, even clumsy, and the most basic reason was the problem with the mechanical bone armor.

None of the countries had made any major breakthroughs in this technology. Therefore, they could not produce robots that could move easily like the ones in the movie, let alone mechanical life forms like Optimus Prime and Megatron.

However, in this design, the technology for the mechanical bone armor was definitely not something that could be obtained at the current stage. It was incredible.

When he saw the mechanical bone armor technology, he knew that the design was not simple.

"Chairman Qin, did you draw this design?" Professor Wang could not help but ask.

If it was someone else, professor Wang would naturally not ask this question. How could a person who studied plants possibly draw such a mechanical principle design?

But Chairman Qin was different. He was a demonic genius. His research on plant genes was done halfway through. Moreover, Chairman Qin's research on animal genes seemed to be very good as well. He had cultivated a strange vegetarian crocodile.

this was a hot topic in the laboratory.

So, now that Chairman Qin was interested, it was not surprising that he had some achievements in mechanical design.

The key was that Chairman Qin's design was really amazing. From the design, Optimus Prime and Megatron didn't seem to have anything to do with each other.

However, if this thing could be made of special materials or strategic steel, how terrifying would the mechanical body that was made be?

If he followed the blueprint, he should be able to move freely. If he had high mobility, even if he ran and waved his fists, it would be terrifying.

What if it could be equipped with weapons?

Although the design didn't include a weapon, it shouldn't be a problem to add a weapon, right?

The more professor Wang thought about it, the more shocked he became. He knew that his boss's design was not simple.

Qin Lin thought about professor Wang's question and said, " professor Wang, you can think of this design as such. However, I don't have time to deal with the big and small details, the production, and the thesis. So, I would like professor Wang to be in charge of the follow-up matters, especially to see if you can produce this thing.

The origin of Optimus Prime and Megatron's designs was not easy to fool, so he simply admitted it in the end.

"Don't worry, Chairman Qin. I'll definitely complete the task." Professor Wang's eyes lit up and his face was filled with excitement.

Chairman Qin was giving him another chance.

Chairman Qin had even drawn out the design. How could he not solve the follow-up problems and the principle? can't you write a research paper?

that was impossible.

Therefore, it could only be said that Chairman Qin really didn't care about this. Just like academician Li Kai, he gave others a chance.

And he was one of the very lucky ones, being favored by Chairman Qin twice in a row.

This also made him determined to perform well and do this well.

If he couldn't even do this well, he would be letting down Chairman Qin's trust and the opportunity he had given him.

"It won't affect the research of the ice and snow launcher, right?" Qin Lin asked again. He did not want to leave the Goblin glove research behind.

Professor Wang immediately said, " don't worry, Chairman Qin. The researchers can continue, but I still need a lot of assistants for this machine creation. Also, the current experimental rooms are not enough to create this thing. I hope to leave one of the experimental buildings that are not open to the public. In particular, we need to open up some experimental rooms.

[Chapter 1378 What If Optimus Prime Was Equipped With A Weapon? Miniature Cloudrain Stone!](#)

"okay, i'll talk to president shen about this." Qin Lin nodded.

Linlin laboratory had a lot of laboratory buildings. With the expansion, there were more than ten. Even though the scale of the researchers had been increasing, only four of the laboratory buildings had been used, and the remaining six were empty.

With the development of the laboratory, it was only a matter of time before these vacant laboratory buildings were filled up.

After that, Qin Lin gave Shen Li a call and asked him to make arrangements for professor Wang.

After that, Linlin went back to the Linlin Manor.

as soon as he arrived at the manor, he received a call from master zhang of the winery. after he answered the call, master zhang's voice came in, " "Chairman Qin, we've already brewed 30000 pounds of bone-strengthening wine for the elderly, do we still need to continue?"

Qin Lin smiled when he heard this. master Zhang, you can brew as much of this medicinal wine as you can. 30000 pounds is nothing. It's far from enough.

When master Zhang heard this, he said worriedly, " " chairman qin, this medicinal wine hasn't been sold to the public yet. i'm worried that it might not be popular on the market. "

qin lin smiled and comforted him. " don't worry, master zhang. just go ahead and brew. if this wine doesn't get popular on the market, it has nothing to do with the winery. it's all my fault. "

he wasn't worried about this at all. after all, he knew the remarks of the bone-strengthening wine for the elderly and its effects.

He was only worried about whether this wine would be sold like crazy after it hit the market. He was never worried that this wine would not sell.

"Alright, Chairman Qin." when master zhang heard qin lin's words, he didn't say anything even though he was worried.

After Qin Lin hung up the phone, he called Yang Dong. Yang Dong's cultivation Department was still cultivating special sea cucumbers.

after yang dong reported that the special sea cucumber cultivation was progressing well, he was relieved. then, he looked at the screen in his mind again and controlled his game character to try to upgrade the mutated land.

unfortunately, even after half a day, he still couldn't find out what the conditions were for upgrading this mutated land.

As such, he had no choice but to control his character to head to the spring Mine and continue mining.

After his character leveled up again, the spring Mine should have opened up to a new level.

After Qin Lin controlled his character to reach the spring Mine, he directly controlled his character to go deep into the spring Mine. As expected, he went all the way to the 60th floor.

Previously, they had been unable to dig any further after reaching the 60th floor. This time, after reaching the 60th floor, they were still unimpeded and entered the 61st floor.

after his character leveled up, the spring mine was opened again.

After Qin Lin controlled his character to enter the 61st floor, he continued to dig. This time, after his character was upgraded and released, he seemed to be unlucky.

because they had excavated three layers in a row, other than the gold, silver, and copper ores, they still did not find anything.

He continued to excavate the fourth layer, but he still didn't find anything.

he continued to excavate the fifth layer, but he still didn't gain anything.

this made qin ran feel that today's luck was really not suitable for her to continue digging, so she wanted to stop today.

However, after the last bit of digging, Qin Lin's eyes lit up, and a statue popped up on the game screen.

the statue stunned him for a moment. it was doraemon.

He had seen Doraemon's statue in another scene, and it seemed like the frequency of her appearance was increasing.

However, the statue shattered immediately after it appeared, leaving behind a crystal-clear stone in the shape of A water drop.

The system prompt immediately followed.

[congratulations, you have excavated a special mini cloud rain stone!]

qin lin was really surprised when he saw the notification.

This was because the miniature cloud rain stone was not something that could be found in the normal version of the story of the farm. It was something that could only be found in the version of Doraemon.

In that version, da Xiong, Fat Tiger, Doraemon, and the others had transmigrated to ore town. Everyone had to do various missions in ore town, and da Xiong had to help the main character in ore town.

During this period, da Xiong and the others also caused a lot of ridiculous scenes.

This version was also crazy, because the opening animation of this version was very long, almost as long as the animation of Nozomi and Doraemon, which was A normal level one animation. It would make people collapse.

Of course, the props in this version were much more magical than the normal version. Some of the things were more similar to what had appeared in dream and Nobita's animation series.

He had been seeing Doraemon's statue all this time, so he had guessed that there would be an item from that version in the future. He didn't expect that this time A when his character leveled up, he would actually be able to dig out something like a mini rain cloud stone from the spring Mine. Qin Lin immediately controlled his game character to go back to the farm, then locked the office door and entered the game with a thought. He saw the remark of the mini cloud rain stone:

[mini cloud rain stone: special!]

[this is a special stone. It seems to have been left behind by a special existence. It's a special item exchanged from the goddess. If it's placed in the goddess 'spring, it will have the effect of making a small drizzle for two minutes.

[mini cloud rain effect: 1/1]

Qin Lin was really surprised to see the effect of this miniature cloud rain stone.

In ancient times, there was a saying that Immortals could summon the wind and rain.

the effect of this miniature cloud rain stone should be able to pass off as a celestial being in ancient times, right?

although the area of this miniature cloud rain was very small, with only a two-minute effect.

Moreover, Qin Lin was really eager to try.

After all, the effect of this thing was really too magical.

qin lin didn't want to attract attention, so he didn't want to use it in linlin's scenic area. who knew if there would be any special circumstances?

He left Linlin Manor and went directly to a mountain near fairy tale mountain. Seeing that there was no one around, he was about to use the miniature cloud rain stone when he heard an intimate conversation from the grass next to him.

"Baby, do you want some candy?"

"Yes, you feed me, with your mouth!"

"Eat my candy, and you're mine!"

"Haven't I already become yours?"

"Baby, after having you, I feel like I have a superpower!"

"What?"

"I really like you!"

"....."

Qin Lin was stunned when he heard this conversation.

What the hell was this?

There was still a couple at this table who came here to date. Seriously.

More importantly, how many years ago was it that such cheesy love lines were popular?

however, these cheesy love lines seemed to be very effective when used by this man. this was probably the truth. as long as someone was interested in you, even if you farted, they would feel that it was fragrant. as long as it was someone who was not interested in you, then these cheesy love words were really tacky.

qin lin had no choice but to change to another place. he went to a place higher up and used the wechat cloud rain stone.

In an instant, he saw the miniature cloud rain stone in his hand light up, and then there was no movement.

Qin Lin thought it was ineffective, but after a while, he found that there was a drizzle falling from the sky.

This was very magical.

After all, the sky was originally clear and there were no clouds in the sky.

It was as if the drizzle had appeared all of a sudden.

Moreover, he could see that the sky was clear for thousands of miles in the surrounding area, and only a small area near him had drizzled.

this situation made people in the rain very magical.

That couple was like that.

the two of them were very surprised that it had suddenly started raining. the two of them could see that there was no rain around them. only a small area near them had raindrops, and the most important thing was that it was drizzling.

Usually, when it rained, everyone would avoid it. However, this drizzling rain was different, because it represented romance.

When the two of them saw this scene, they felt that it was a blessing from the heavens.

Otherwise, why would there be drizzling rain around their date? wouldn't that add to the romantic atmosphere?

The man couldn't help but say, "wifey, it's raining. It seems like the heavens are making it rain." &Nbsp;

The woman nodded. yes, this drizzling rain is so romantic. And it only falls here!

"honey, it's only one kiss to be romantic!"

"Hubby, where do you want to kiss?"

"What do you think? Honey, you're wet."

[Chapter 1379 Earth Spring Water-11,5 Types Of Quality 3 Crops](#)

Qin Lin, who was in the drizzling rain, looked around. If he were to describe it in terms of fantasy, the drizzling rain was like a rain cage that suddenly covered the entire area.

The two-minute effect quickly passed, and the drizzle effect of the miniature cloud rain stone also ended.

Qin Lin immediately looked at the teardrop-shaped crystal in his hand.

The miniature cloud rain stone didn't disappear.

The previous remark was [mini raincloud effect: 1/1]

It also seemed to have the effect of allowing a small drizzle to fall within a small area for two minutes if placed in the goddess spring.

In other words, the effect of this miniature cloud rain stone could be used repeatedly.

Thinking of this, Qin Lin immediately took the miniature cloud rain stone down the mountain and soon arrived near the couple.

However, he was stunned to hear a very strange sound coming from the grass.

"Ran ran," Qin Lin.

Weren't these two afraid of snakes in the grass?

It was very immoral to eavesdrop on others, so he quickly left and returned to Linlin Manor.

Back in the Linlin Manor Office, Qin Lin brought the mini shower stone into the game as soon as possible. He saw the remark of the mini shower stone again:

[mini cloud rain stone: special!]

[this is a special stone. It seems to have been left behind by a special existence. It is a special item exchanged from the goddess. When placed in the goddess 'spring, it can produce a small drizzle for two minutes!

[mini shower effect: 0/1 (please soak in the goddess 'spring to recover!)]

As expected.

seeing this, qin lin also exited the game again. then, he controlled the game character to go to the goddess spring and threw the mini cloud rain stone into the goddess spring.

After doing all this, Qin Lin controlled the game character and continued to dig in the spring Mine.

In a few days, he had excavated the levels of the spring Mine that were open to the public. He had excavated a total of 85 levels.

Other than the special soil and the spring water of the earth, they did not find anything else.

It was as if his luck had been completely used up after excavating the miniature cloud rain stone.

...

Early in the morning.

The Linlin Manor was peaceful. Red hair was leading a group of squirrels in the bamboo forest.

There were many squirrels in Linlin villa now. Some appeared in the triangular plum blossom sea, while others stayed in the squirrel garden.

The squirrel Park was the area where the villa's self-service barbecue began.

with the expansion of the villa, there were new restaurants and barbecue buffet areas, and the area was transformed.

As for the first few squirrels, perhaps because they were familiar with red hair, or because they were more courageous, they dared to follow red hair around the scenic Area and enter the manor from time to time.

On the other side of the track, the little lion was also wagging its tail and eating the Dogtooth grass with its head lowered. After being brought to the manor, the little lion seemed to know the way and often ran from the horse track to the manor.

Old Ma's knowledge of the way was not without scientific evidence.

Moreover, the fence of the racecourse could stop other horses, but it couldn't stop the little lion. It was running in the scenic Area and didn't hurt anyone. The staff also knew whose horse it was, so they didn't dare to stop it.

Next to the lion cub was the dumb crocodile, yang. He was also eating the dog Fang grass, and he was even more happy than the lion cub.

Its body size could already crush the dog.

As for the young paparazzo and Xiaoxue the Fox, he did not know where they had run off to. These two fellows were always moving around the scenic Area.

qin lin walked from the inner area to the living room and saw xiao wu and xiao bao flapping their wings on the incubator.

this time, the two guys were obviously a little anxious, and they called out anxiously when they saw him.

"Master, baby!"

"Baby!"

"master!"

Qin Lin heard the cries of the two little ones and came closer to take a look. He found that the eggshell of the parrot's egg had indeed broken.

seeing this, he immediately called yang dong's phone.

"Yang Dong, the parrot that hatched in the incubator has hatched," he said as soon as the call went through.

yang dong's voice came immediately. " chairman qin, i have to go over today. i didn't expect you to call me first. i'll be there right away. "

Yang Dong soon arrived with a person from the cultivation Department. He went to the cultivation box and opened it.

the two of them operated for a while.

A moment later, the two eggs were cut in half, revealing the inside. Inside each egg was a sticky little parrot curled up.

The man yang Dong had brought was dripping some nutrient solution into the little parrot's mouth.

Xiao Wu and Xiao Bao stood to the side, sticking their heads inside, as if they were very nervous about the situation inside.

the incubator was closed again.

after dealing with the parrot's egg, qin lin received a call from shen li.

shen li was the person in charge of linlin's laboratory. he usually wouldn't disturb him if there was nothing important. once he called, it meant that there was something important.

When the call connected, Shen Li's report came through,"qin lin, the first promotion of the willow leaf floating lotus in the country is about to begin. do you want to come and take a look?"

Qin Lin didn't refuse when he heard this. "Yes, I'll go over now."

although the willow leaf floating lotus had been displayed once in Mauritius for a management bid, it had not been used to the public yet. during this period of time, it had been in the stage of crazy cultivation.

[Chapter 1380 Earth Spring Water-11,5 Quality 3 Crops](#)

at least, before it was promoted to the public, there had to be a sufficient number of them. those promoted to the public also had to undergo large-scale sterilization.

qin lin arrived at lin lin's laboratory. shen li was already waiting for him. he brought him to the multimedia room, where a live broadcast was already being played. it was a lake that was about to be treated.

qin lin soon learned about the lake's condition. it was a very famous lake in ming city because a very delicious fish could be cultivated in it.

this was an official breeding project, and it was also next to a large official tourist park.

However, because of a series of car accidents, a few cars drove into the lake and caused a gasoline leak. Now, the water quality problem was very serious, and many of the fish cultivated in the lake had died.

People in Ming city knew that Linlin's laboratory had a kind of Willow duckweed that could treat water quality. After all, it was too popular in the past and they had come to ask for it.

linlin's laboratory was also about to start promoting the willow duckweed to the outside world. therefore, when ming city came to ask for help, they immediately agreed.

Ming city.

many people had already gathered around the black lake. most of them were officials. the officials of ming city naturally had to accompany the people from linlin's laboratory to treat the water.

the person in charge of the water quality was yang da.

Previously, when there was a gasoline leak, he had personally led someone to test the water quality. The situation was very bad, and in the end, he could only ask the higher-ups for help from Linlin's laboratory.

Naturally, there were also reporters.

the willow leaf floating duckweed was so popular in the past. now that it was the first time it was governing outside, it was hard not to attract attention.

"Professor Cheng, when will we start governing this place?" yang da asked politely to a professor from linlin's laboratory.

He knew the relationship between the Linlin laboratory's academician Li Kai and the big boss li in the city.

There were rumors that Mr. Li would soon go to the province and even have the opportunity to enter the capital.

"You can start now." Professor Cheng said with a smile.

In fact, they could have started a long time ago, but President Shen had to ask if Chairman Qin wanted to watch it, so they had been waiting.

by now, the instructions from the earpiece had already indicated that they could start.

There wasn't much skill involved in the management of the duckweed. All they had to do was pour the duckweed into the black Lake, and then wait.

Soon, the Willow duckweed in a large transport box was transported over. When it was opened, the dense Willow duckweed inside was poured into the black Lake.

there were also some boats waiting in black lake. after the duckweed was poured in, the people on the boats took out bamboo poles and spread the duckweed.

Very quickly, the Willow leaves and duckweeds had covered the entire surface of the Black Lake. The reporters were also taking pictures like crazy.

The Willow leaf duckweed's effect was very terrifying.

The next day, when the Willow leaf duckweed on the lake surface had completely turned black and was fished up, yang da immediately brought people to the lake to test the water quality.

Not long after, yang da and the others let out a cry of surprise, "

the water quality has been restored in one night. The Willow duckweed in Linlin's laboratory is amazing.

" it's not that it's recovered. the water quality is even better than before! "

indeed, the data I've collected also shows that the water quality has improved.

"....."

The official test results of yang da and the others naturally attracted the reporters to interview and take pictures again.

The enthusiasm of these reporters was also at the peak.

Therefore, not long after, the internet was filled with news about the Willow leaf floating duckweed:

the Willow leaves floating duckweed's first domestic governance has amazing effects!

" gasoline leak, willow leaves and floating duckweed being dealt with overnight! "

a miracle happened overnight. With the Willow duckweed in Linlin's laboratory, is the water quality still a problem? "

The results of the Black Lake's management were quickly spread online.

this time, not only did the willow leafed duckweed clean up the pollution in black lake, but it also made the water quality better.

They wanted you to score 100 points, but you scored 120 points.

In an instant, Linlin's laboratory's external phone calls exploded. Officials from all over the world and countless companies wanted to ask about the management of the Willow leaf duckweed.

Qin Lin didn't pay attention to this matter again.

Early in the morning, he went to his office and sat down. Then, he started controlling his game character to mine.

the spring mine had already been excavated, but the lake mine had not. they had only excavated to the 48th floor.

After the character leveled up, the lake mine also opened up to a new level.

Sometimes, luck could not be stopped, and some unexpected gains could even catch you off guard.

Qin Lin controlled his game character to enter the 49th floor. After the first excavation, a notification appeared.

[congratulations, you've obtained the earth Spring-11]

In the game, there was also an anime scene. The land that the game character had dug had spring water sprayed out and then it was poured into a bucket.

this was really a pleasant surprise.

There were many types of spring water of the earth, and their effects were different. This fountain-11 was clearly different from the previous one, as it had a new effect.

qin lin's curiosity was piqued. he immediately controlled his character to return to the farm, locked the office door, and entered the game with a thought.

[earth spring water-11: special]

[this is a special type of underground spring water. It seems to have been affected by some kind of power and has a special effect. It can modify the genes of some plant seeds. Modified genetic attributes +3 unknown

[restriction: only Grade 1 crop seeds can be modified. The number of modified seeds is 5/5!]

Qin Lin was surprised to see the attributes of the spring water of the earth. The topic of genetics had always been a key topic of human research.

even if it was plant genes.

With the development of society, mankind's progress in the study of plant genes was also getting greater and greater. However, it was still far from being able to completely master plant genes. They had not even crossed the threshold.

However, this Earth Spring water could directly change the genes of a seed, creating a new genetically mutated plant. How could this not be amazing?

even if there was a limit to it, and it could only modify a grade 1 plant seed, it was still difficult to control with the current technology.

The key was that the modified seeds could actually obtain +3 attributes, which did not mean that they were crops with a grade of 3. This was amazing.

It must be known that among all the crops he had, it was difficult for him to even get a Grade 3 crop.

qin lin logged out of the game and immediately went to the seed store in ore town to buy seeds. since there was a restriction, grade 2 and special seeds could not use the spring water of the earth, so he could only buy grade 1 seeds.

After buying five seeds, he controlled his character to take out the earth fountain-11 and modify the five seeds.

[congratulations, you have successfully used earth fountain-11 to transform a normal pumpkin seed!]

[congratulations, ran ran]

[congratulations, ran ran]

...

After modifying all five seeds in a row, Qin Lin entered the game with a thought and saw the five seeds.

[mutated pumpkin seed: grade 1]

[this seems to be a seed that has undergone a special mutation. Mutated attributes +3 unknown!]

Qin Lin looked at the five seeds in a row. Each of them had an additional mutated attribute, and all of them were mutated attributes +3 unknown.

This was obviously something that could only be known after planting it.

After all, it was A +3 attribute, and he was looking forward to it. He planned to plant it in the game immediately.

Qin Lin took out some seeds from five bags and brought them out of the game.

Because of the game's mechanics, once the seeds were planted, the bag would be full. The key thing was that when the things in the game matured, there would be no seeds left, so they would be harvested by the dwarves.

Therefore, he had to leave some seeds to be planted and cultivated in the real world.

qin lin took the seeds out of the game. as soon as he returned to the office, he planted all the modified seeds on the farm.

After that, he didn't continue controlling his character to mine the remaining Lake mine.

The previous incident at the spring Mine field had taught him a big lesson. After digging for something, it was easy to dig empty if he continued to dig.

Qin Lin decided to save the remaining levels of the lake mine for later!

The next day, Qin Lin got up and had just finished his breakfast when he received the notification that the five modified crops had matured!

He immediately looked at the game screen, and when he saw the mature crops, he was shocked.
