

The Game 1381

[Chapter 1381 622! Giant Crop! The Shocking Firefly](#)

Qin Lin was surprised to see the game screen.

Because every piece of land was covered by a large mature crop.

For example, there was only one pumpkin in that field, and it was much bigger than the ripe fruits of other crops.

It was the same with the eggplant.

he had planted eggplants before, and they had grown to normal sizes. now, each eggplant occupied the size of the entire field, and the volume was much larger.

This seemed to be due to the earth fountain-11. Therefore, the game program set the planting display to be different.

Seeing that the dwarves had come to harvest, he immediately entered the game with a thought. In reality, the scene in front of him was even more shocking.

On the land in front of him, on top of pumpkin vines, huge pumpkins were standing on the ground. They were more than 1.5 meters in diameter.

And that eggplant, it was about two meters long.

More importantly, he walked in front of a sunflower. The huge sunflower was almost the size of a car. The seed he had picked from it was almost the size of two fingers.

After peeling off the shell, the melon seeds inside were also very full.

A scene from the movie " ten brothers " inexplicably appeared in Qin Lin's mind. Wasn't the land where the beads of the ten brothers were buried able to grow such a giant crop?

however, the scene in front of him was much more shocking than the scenes in the old movies from more than a decade ago.

at the same time, qin lin also saw the attributes of the sunflower seeds.

The attributes were no different from a Grade 1 sunflower seed. The only difference was that it had an additional +3 volume attribute, which made it a Grade 3 crop.

He immediately looked at the other four crops. The pumpkin and eggplant were the same. Their attributes were no different from the quality 1 crops. They also had A +3 physique attribute, which became the quality 3 attribute.

These five seeds, which had been modified with Earth Spring water-11, had an attribute increase of +3.

&Nbsp; in truth, these stats didn't really affect the crops.

The taste and texture were still +1, and the other nutritional attributes were also +1.

In essence, there was no change.

However, sometimes, the appearance of this +3 in size attribute would make things completely different.

After all, Linlin Mountain Villa was a scenic spot.

think about it, if there was a special piece of land to grow such a giant crop, how tempting would it be for tourists?

after all, there were no such large crops in the real world. such large crops should only appear in movies and fairy tales, right?

Even if one saw such a large crop from afar, one would normally want to take photos and videos to post on their WeChat moments.

If they could get close to such crops, or even buy them to bring home, they would be popular with many tourists. By then, the line of tourists who wanted to take photos would probably be long.

This could be another upgrade to the Linlin Scenic Area.

thinking of this, qin lin logged out of the game, took out the seeds of the five crops he had brought out before, and then called yu shui.

As the person in charge of the plantation Department, Yu Shui was completely at ease to leave this to him.

after yu shui received qin lin's call, she put down everything she was doing and went to qin lin's office as soon as possible.

Qin Lin gave the seeds of the five crops to Yu Shui and said, " manager Yu, you can choose a plot of land to plant these seeds. These seeds are a little special. When you plant them, make the space between each seed a little longer. It's best to plant them in a place where most tourists can see them.

"Alright, Chairman Qin." Yu Shui nodded in response and didn't ask any more questions.

he only knew that he had to do as chairman qin instructed.

Since Chairman Qin had specifically mentioned this seed, it must be something special. It must be a new product cultivated by Chairman Qin.

after yu shui returned to the plantation department, the first thing she did was to call a few of her capable subordinates and start making arrangements.

When he came back, he had already thought about Chairman Qin's request and thought of where to plant these seeds.

...

with the passage of time, it was always difficult for things to control themselves, and they would either wither or revive with time.

after all, time was the most invincible existence.

You Cheng's 5th ring was finally fixed.

When the fifth ring was open to traffic, Qin Lin deliberately drove around the fifth ring.

You city could be proud of the fact that a County had opened the 5th Ring Road.

moreover, the fifth ring road was very long. it not only included the Laocheng District of you city, but also the linlin scenic area, the new area that had already been opened, and the new area that was already planned to be built.

It was certain that after the opening of the 4th and 5th ring roads, you city would no longer have traffic jams.

Qin Lin returned to the Linlin Manor and parked his car in the parking lot. Then, he went straight to the inner area and arrived at the rooftop of the manor villa.

After the entrance was locked, no one could enter.

There was an equipment room upstairs, and no one knew what he was doing inside.

Therefore, after he entered, he entered the game with a single thought.

Qin Lin went straight to the farm. When he reached the storage area, he saw stacked boxes.

inside were flying fireflies, densely packed.

These were all Starlight fireflies that he had been breeding and storing here.

Now, he naturally wanted to bring these fireflies out, because the number of fireflies had reached a certain scale.

[Chapter 1382 622-Giant Crops! Shocking Fireflies!](#)

Carrying the two boxes, Qin Lin logged out of the game.

He carried the two boxes to the rooftop and went back in. His mind returned to the game and he brought out two more boxes.

Qin Lin repeated this process and took out all the storage boxes from the game one by one.

Then, he opened the boxes one by one to release the fireflies.

However, only a few fireflies flew out of the box, and most of them were still in the box.

Fireflies didn't like places that were too bright, especially during the day. They would hide and only choose to move out at night.

Therefore, they would rather stay in those boxes than come out in broad daylight.

This was not a problem for Qin Lin. He entered the game again and came out with a broken horn in his hand.

[mysterious broken horn: mysterious]

[this is the broken horn of some mysterious King of the ocean in the depths of the ocean. It has been stored in the mine for too long and has developed a special power. As long as you blow the broken horn, you can make the animals understand your intentions through your thoughts and give them orders!]

The effect of this mysterious broken horn was very magical. It was not Qin Lin's first time using this thing.

He had once controlled the Ducks in the floating bridge viewing area in public and made them charge like an Army. For this reason, people on the internet even said that he was a Super Beast Tamer.

Qin Lin immediately blew the horn and communicated with the starry fireflies with his mind. In an instant, he could see all the fireflies flying out of the boxes and circling around him.

Then, as he blew on the mysterious broken horn, he willed the fireflies to fly out of the manor and toward Linlin Ranch.

Because the number of fireflies was limited and could not satisfy the entire Linlin Scenic Area, he planned to let these star fireflies go to the comprehensive sea of flowers first.

This was because the integrated sea of flowers could be the best hiding place for these fireflies during the day.

In addition, although the Linlin Scenic Area had a comprehensive sea of flowers project and the National flowers of beautiful countries to attract tourists, the overall attraction of the sea of flowers was still limited and was not as good as the other projects.

if there were these starlight fireflies at night, and the light of these fireflies enveloped the sea of flowers, it would be different. it would definitely be a very romantic scene, and it would not belong to fairy tale mountain.

the starlight fireflies were affected by the broken horn and quickly flew in the direction of the integrated sea of flowers.

He was looking forward to the night.

These Starlight fireflies would surely surprise many tourists and bring back childhood memories.

at the same time, he gave chen dabei a call.

Chen dabei was in the middle of inspecting the scenic Area. When he received the call from his boss, he answered immediately, "What's the matter, boss?"

"Tonight, you'll take some people to the comprehensive sea of flowers and watch over it," Qin Lin said directly.

He was sure that at night, after these fireflies glowed, they would definitely cause a sensation. At that time, there might be tourists who would go to investigate.

Chen dabei and his men would be there to prevent any problems.

after chen dabei hung up the phone, he was a little curious and confused. why did chairman qin ask him to bring some people to the integrated sea of flowers?

It shouldn't be because they were afraid of people stealing the Duke's roses. There were special guardhouses and special security guards on duty.

besides, there were surveillance cameras everywhere in the Linlin scenic area. who could steal the flowers? the other party was discovered by the surveillance cameras as soon as they moved.

However, since the boss had instructed him, he did not dare to neglect and immediately picked the people personally.

Time was sometimes short.

The sun quickly set in the West, and the sky slowly darkened.

After Liu Yang had dinner at the glass open-air restaurant in the tent area of Linlin Ranch, he brought his girlfriend to the tent he had reserved.

He had originally wanted to book the greenhouse tree in the greenhouse Tree Community, but it was too difficult to book the greenhouse tree there. He was not single, so he really could not book it.

it's such a pity that I didn't manage to get a reservation at the greenhouse Tree Community. The ranch at night is so much worse than fairy tale mountain. the girlfriend looked in the direction of fairy tale mountain, her words filled with pity.

"Try to make a reservation tomorrow and see if you can get one." Liu Yang nodded.

"Huh? what's that?" His girlfriend's cry of surprise suddenly rang out. She looked in one direction.

Liu Yang also looked in that direction. When he saw the scene in the distance, his face also revealed a look of surprise.

"Look, what's that?" someone shouted from the side.

Soon, all the tourists around were attracted, and the other tourists also came out of their tents and looked in one direction.

Then, everyone was stunned.

No one had expected to see such a shocking scene.

"That place looks like an all-around sea of flowers. I just went there today to take a look."

At this moment, the multi-purpose flower field was actually glowing with a kind of fluorescent light, as if stars were falling, and the sea of stars covered the entire place.

"What are those?" Another tourist asked.

it's just like fairy tale mountain, " someone else said. no, it's also different from fairy tale mountain. This Starlight world seems more romantic.

"there's another road over there, let's go take a look!" liu yang couldn't help but pull his girlfriend's hand and run over.

Many tourists could not help but run to the integrated sea of flowers out of curiosity.

not only the linlin ranch, but the tourists in the nuptial area of linlin villa could also see the comprehensive sea of flowers.

Because there were enough Starlight fireflies, the +2 attraction and +2 beauty attributes were also in effect, attracting all the tourists.

Chen dabeai and his men were already waiting in the sea of flowers.

At first, he did not know the reason, but when he saw the countless stars in the night sky, he seemed to understand.

The scene in front of him was too beautiful, too shocking, and too beautiful.

The boss obviously knew in advance that this would happen, so he asked him to guard the comprehensive sea of flowers with people?

"Manager, these things seem to be flying." A security guard said in surprise.

yes, " Chen dabeai said, nodding. these are fireflies.

At his age, he had lived in the village when he was young. At that time, there were many fireflies in the village. There were no cars or tall buildings at that time, only wooden houses in the village.

At that time, he was still young, and his father was still alive. At that time, his favorite thing was to chase after fireflies.

For some reason, Chen dabeai found himself lost in his memories.

The fireflies in front of him had indeed evoked his memories, making the corners of his eyes moist. Moreover, these fireflies in front of him were obviously more beautiful than the ones he had chased when he was young.

Apparently, there were enough Starlight fireflies, and they had the memory +2 attribute.

A cacophony of voices rang out.

" they're so beautiful. are these fireflies? "

they're really fireflies. I saw them when I was young.

"Are these fireflies? it's the first time i've seen such a beautiful woman!"

obviously, some people were pitiful because they had never seen a firefly in their lives. those who had never seen a firefly also meant that their childhood was no longer pure.

It seemed to be a rule of fate. After seeing Firefly's childhood, she was really carefree and without worries. There was only simple childlike fun.

It seemed that after the fireflies disappeared, the new children were less carefree. Instead, there was a kind of competition. They compared what kind of car their father drove, who was richer at home, and they began to get addicted to mobile phones. They played games and even compared skins.

It was a very strange phenomenon.

"This is too unexpected." Liu Yang looked at the scene in front of him and also muttered to himself.

"Hubby, let's go in for a walk?" His girlfriend suggested immediately.

Liu Yang nodded and immediately took his girlfriend's hand and walked into the integrated sea of flowers.

He didn't know why, but he felt an inexplicable sense of happiness at the moment. It was as if he wanted to hold his girlfriend's hand and not let go. He even wanted to kiss her in public.

Obviously, this was the effect of the +2 romantic atmosphere attribute.

More and more tourists were attracted here.

Many tourists also took out their mobile phones to take pictures of the beautiful scenery in front of them. When the fireflies entered the video, the tourists were also shocked.

Because of the +2 entry attribute, the shock, beauty, and romance of these fireflies in the video were really indescribable.

No one had expected to encounter such a beautiful scene that night. Many of them were still brooding over the fact that they did not manage to book tickets to fairy tale mountain.

But now, looking at the scene in front of them, they inexplicably felt relieved.

[Chapter 1383 Is This Really The Linlin Scenic Area? Has It Never Appeared Before? 1](#)

How could he not let it go?

Fairy tale mountain was indeed beautiful, but the scene in front of him was just as beautiful. The dense flying fireflies were as beautiful and dazzling as the Galaxy.

Liu Yang brought his girlfriend to shop around in the comprehensive sea of flowers. The two of them had originally seen a video of this comprehensive sea of flowers on the internet. To be honest, it wasn't too amazing.

If it wasn't for the beautiful national flower, Duke Wang rose, it would have been difficult to attract many tourists, because there were many places where such a sea of flowers could be seen.

For Linlin Scenic Area, this sea of flowers should be at the bottom.

But now, the two of them were in the midst of the fluorescent lights that filled the sky. They felt that this was nothing more than a fairytale.

That kind of romance, that kind of beauty, that kind of beauty, definitely needed to redefine this comprehensive sea of flowers.

This place was definitely not inferior to fairy tale mountain.

liu yang couldn't help but kiss his girlfriend.

it was because this romantic atmosphere was really irresistible.

He could even feel his girlfriend's breathing becoming a little rushed.

if this place wasn't outside, yingluo

After Liu Yang kissed his girlfriend, he remembered something and immediately took a video of the surroundings, especially of the fireflies.

After he was done, he immediately posted on his moments: this scene alone was enough to make this trip romantic.

Because of the +2 entry attribute, there was nothing to say about the video.

Liu Yang was also a social butterfly, so he had many friends, and even more so on WeChat. When he posted on his moments, many people saw it.

Those who saw it were all attracted by the fairy-tale beauty and would leave a comment:

"F * ck, brother yang, where is this? She's so pretty?"

"These are fireflies?"

"brother yang, who did you get to do the special effects for the video? Give me a WeChat!"

"....."

Liu Yang saw the comments on his moments and wasn't in the mood to comment on them one by one. Instead, he replied in unison: this isn't a special effect. It's another beautiful scenery in Linlin Scenic Area. The comprehensive sea of flowers at night is too beautiful. It's even more beautiful than fairy tale mountain to a certain extent.

Linlin Scenic Area, comprehensive sea of flowers?

This attracted everyone's attention again. Everyone felt that it was unbelievable. It seemed that Linlin Scenic Area was always full of such shocking Fairyland-like beauty.

at the same time, liu yang was not the only one doing this. other tourists who had rushed over were also doing this.

They couldn't help but take videos and upload them to their WeChat moments or the internet.

for a time, the night view of the comprehensive sea of flowers and fireflies in linlin scenic area was quickly spread. even many tourists who came with them and did not manage to book a room in linlin scenic area also came from you city overnight.

This kind of scenic spot could only be seen at night, so they had to rush over no matter how late it was. Otherwise, they wouldn't be able to see it tomorrow.

On fairy tale mountain, a couple had already moved into the greenhouse tree.

The man laughed. our luck is better than Liu Yang's team. We managed to book the greenhouse trees on fairy tale mountain, but they only managed to book the tent area on the ranch. They can't enjoy the beautiful scenery of fairy tale mountain with us.

The man was obviously with Liu Yang. As he spoke, his tone was a little emotional.

As their vacation was limited and they had to go back the next day, it meant that Liu Yang and the others had missed the beautiful scenery of fairy tale mountain and had come for nothing.

At this moment, his girlfriend exclaimed, "hubby, look at Liu Yang's moments. He's so pretty.

the man was confused. he found liu yang's moments and saw the video of the firefly.

After watching the video, the man was attracted by the shocking and romantic scene in the video.

"There's such a beautiful view on the other side of the ranch?" The man cried out in alarm. He suddenly lost his calm and his emotions were difficult to describe.

People always envied things that they didn't have. For example, he thought he was luckier than Liu Yang when he was on fairy tale mountain. Now that he suddenly saw that Liu Yang's place had beautiful scenery that was no less beautiful than fairy tale mountain, he inexplicably felt that he had lost something.

Even the beautiful scenery of the dancing fireflies was more lively and romantic than the dead things on fairy tale mountain to a certain extent.

Time passed.

it wasn't just the tourists' wechat moments. those who uploaded the video on the internet were even more popular.

Early in the morning, in the editorial department of a music company, the managing editor, who had been scolded by his boss for discussing a contract with a female internet celebrity because of the sedan-bearer incident, arrived at the office early in the morning. One of his subordinates reported, "chief editor, Linlin villa has filled our platform's traffic pool again.

"Al!" The managing editor sighed.

This was also normal. When the traffic pool was filled to the brim, it meant that it was the most searched.

In fact, this kind of hot search usually only appeared under their own guidance.

Without their own guidance, it would be impossible to achieve it by relying on an incident or an internet celebrity.

this was also the reason why they could control the internet celebrity.

linlin's scenic area and linlin's company were not under their control.

news related to linlin's company could always cause a sensation from time to time.

After what had happened last time, they knew that Linlin's company could not be touched.

the key point was that if linlin company went to other platforms, it would definitely take away a lot of traffic.

Even without the attitude of the higher-ups, they didn't seem to dare to move. This was an existence that had transcended.

The internet had indeed exploded, and the comprehensive sea of flowers in Linlin Scenic Area was the most popular search.

[Chapter 1384 623-Is This Really The Linlin Scenic Area? Has It Never Appeared Before?](#)

The video was not just a video, it also had an entry +2 attribute, no one could resist it.

it's really unbelievable. This is a beautiful scene that can't even be created with special effects, right? "

it's hard to imagine that there's such a shocking night view of fireflies in China.

fireflies are already rare. There are many scenic spots in the country that have fireflies at night, but most of the time, you can't even see fireflies. It's very embarrassing. Linlin Scenic Area is indeed shocking.

it seems that all the good things are taken by Linlin Scenic Area. The sudden appearance of these fireflies seems to be a miracle.

it's not enough to just watch the video. I've decided to go to Linlin Scenic Area immediately. There are fireflies there!

yes, those are fireflies. Those are my childhood memories. I want to go too.

"....."

At the same time that the internet exploded, countless people started to head to you city.

This was because fireflies were indeed a memory that many people had sealed in the depths of their memories.

Those memories were the purest, most beautiful, and purest. They were the most inseparable and sincere feelings he had for his family when he was young.

People who had never experienced this would not understand.

However, for those who were over 30 years old, this feeling was very, very deep.

That kind of sincere feeling made them want to go to you city and see the night view of fireflies.

This had nothing to do with how beautiful the scenery was, but with the support of memories and sincere feelings, the attraction was stronger than any beautiful scenery.

All of a sudden, the not-so-popular comprehensive sea of flowers project became the most popular project.

in just one day, the number of customers in you city had increased significantly.

Of course, the Linlin Scenic Area was the most directly affected, because the entire Linlin Scenic Area was starting to get congested again. Many people couldn't help but walk towards the comprehensive sea of flowers area.

Lin Lanzi had no choice but to ask Chen dabei to bring his men to shut down the integrated sea of flowers.

She didn't expect that there would be so many fireflies in the scenic Area. She was completely unprepared.

However, the situation had already happened. If they didn't do anything, the crowd would not only be bad for the fireflies, but something might even happen.

After Chen Li received the latest city report, the first thing he did was to look for sun Xian."Sun Xian, take a look at this report."

Sun Xian took the report and looked at it. He was stunned and could not help but stand up and walk back and forth.

why did you fix five points and almost have a problem? " Sun Xian said, a little puzzled. The previous investigation report clearly said that there would be no problems.

"It's caused by the comprehensive sea of flowers in Linlin Scenic Area ..." Chen Li sighed.

"A comprehensive sea of flowers?" Sun Xian was stunned. He quickly took out a data report from the drawer.

The data report was about the popularity of the various projects in Linlin Scenic Area, among which the comprehensive sea of flowers was the least popular.

If it wasn't for the Duke's roses and the Linlin Scenic area's huge number of tourists, there wouldn't be many tourists.

This was because there were also many such flower seas in other places. In fact, the area of the flower seas would be even larger, and there would be more varieties.

"A comprehensive sea of flowers shouldn't be so attractive." Sun Xian asked doubtfully.

Chen Li explained, " it's true that the integrated-type sea of flowers doesn't have such an attraction. However, the integrated-type sea of flowers has an additional batch of fireflies. It was caused by them. Sun Xian, take a look at the online video!

As Chen Li spoke, he searched for the video on the internet and handed it to sun Xian.

After sun Xian watched the news video, he finally understood why.

The shock and romance of the fireflies in the video had even attracted him, and he even recalled his childhood.

He was not from the countryside, but his parents were educated youths. At that time, he had stayed in the countryside and seen the fireflies all over the mountain.

Those memories were truly wondrous, making one sigh with the passing of time.

"No wonder!" sun xian sighed. " but this kind of firefly almost caused a traffic jam in our newly built fifth ring road. should we consider building more roads? "

when chen li heard this, he fell silent. it seemed like it was time for a meeting to discuss this.

At first, he thought that the problem had been alleviated when he repaired his first ring, but it was still blocked in the end. He thought that it was enough when he repaired his third ring, but it was still blocked.

This time, he had gotten five points and thought that he could use it, but it was still crowded today.

Sun Xian was a little curious, "Xian Chen, why do you think such beautiful fireflies appeared in Linlin Scenic Area?" You city hasn't seen fireflies for a long time, right?"

sun Xian, " Chen Li said immediately, " experts have already analyzed it online. Many of them say that this is probably due to the climate change in you city.

fireflies themselves are insects that have very high requirements for their environment. Therefore, with the development of modernization, fireflies are basically invisible in the eyes of people.

" they've all run into the remote mountains and forests. the climate of you city is changing, especially since the meteorite fell near linlin scenic area, which has the best climate. so, the fireflies are attracted here. "

Chen Li wasn't speaking blindly. There were indeed many 'experts' on the internet who had analyzed the situation in this way.

These experts analyzed the situation as if everything had something to do with you city's climate change.

The key was that the netizens all believed this explanation.

under the videos of these experts were countless comments from the netizens.

Therefore, it seemed to be a fact. After all, if everyone believed it, it would be true.

Naturally, there were also real experts who went to Linlin Manor.

professor qu was a very famous insectoid expert, and he was also an expert in fireflies.

His laboratory had the most abundant research materials about fireflies.

He was also very curious about the sudden appearance of fireflies in Linlin Scenic Area, so he contacted the Linlin Scenic Area and wanted to come over to investigate.

lin lanzi also agreed after investigating professor yan's information, because this professor yan was indeed a true expert professor.

She also wanted to know more about the fireflies.

To be honest, as the person-in-charge of the scenic Area, she was embarrassed that she didn't even know about the fireflies that appeared in the scenic Area.

after professor yan arrived at linlin manor with his assistant and equipment, lin lanzi personally arranged everything for him and asked a supervisor to lead him to the comprehensive sea of flowers.

lin lanzi had decided to close the comprehensive sea of flowers area temporarily. without special arrangements, outsiders could not enter at all.

Professor qu was a little old man with half of his hair white, but he looked very energetic. This kind of real scholar and researcher generally had such a face and temperament.

after entering the comprehensive sea of flowers, professor yan tested the surrounding environment, temperature, climate, and other data.

it could be said that this place was indeed very suitable for the survival of most insects.

at night, professor yan also saw the fireflies start to move out. they were like a river of stars that filled the entire sea of flowers.

At this moment, countless tourists also turned their eyes to the integrated sea of flowers. Because the integrated sea of flowers had been shut down by Lin Lanzi, there were security guards everywhere. The tourists could only watch from afar, but this obviously did not affect the tourists' enthusiasm at all.

It had +2 attraction, +2 beauty, +2 memory, +2 shock, +2 romantic atmosphere, and +2 entry attribute. Even if they looked at it from afar, all the tourists were deeply attracted and intoxicated by the memories.

at the same time, the video that was shot was also very shocking and shocking.

Exclamations of shock rose and fell.

In the comprehensive sea of flowers, professor Yan and his assistant had caught two Starlight fireflies and observed them on a special luminous device.

this equipment was also specially used to observe fireflies at night.

There was a special facility in the equipment that allowed them to clearly observe the fireflies at night.

however, as he observed, professor yan was shocked. "How is this possible?"

"Professor, what's wrong?" the assistant asked, puzzled.

"the wings of these fireflies are a little different," professor qu said in shock. "they don't seem to be the firefly-winged insects that have appeared before."

[Chapter 1385 The Firefly Was Stolen! Fighting With Linlin Scenic Area?](#)

Professor Forster was surprised when he saw the two fireflies.

Although he could tell that these fireflies were different from each other by the glow they emitted, and he had also guessed what kind of fireflies they belonged to, he had never thought that he had never seen them before.

The assistant next to him was very puzzled, "professor Yan, if these fireflies have never been seen before, how did they appear?" it shouldn't be possible."

Professor Forster immediately replied, "it's not completely new. Some of its characteristics are still in line with some of the fireflies we've studied in the past. It's just that many things are different. It should be a mutation. It can be considered a new species. This is amazing.

The assistant understood a little after hearing this.

Many insects would mutate. Since ancient times, many insects had actually undergone many mutations. Some were internal changes, some were changes in appearance.

All of this was due to the needs of the living environment, and changes had to be made.

Some of them were still the same after mutation, while some became a new species after mutation. Therefore, many insects that modern people saw might be different from the past.

This was the case for the fireflies. Because of the mutation, they had become a new species of fireflies.

Obviously, they didn't know that this wasn't a mutation, but a cheat that had been brought out of the game.

"We'll stay up all night to study it and confirm this." professor yan immediately ordered.

The assistant naturally had no objections. After all, the leader had said so.

overnight, the comprehensive sea of flowers area was crowded with tourists. almost all the tourists who visited the entire scenic area during the day had gathered here to watch the stars and fireflies.

Most of the tourists were holding their mobile phones and taking pictures of the fireflies.

So, the next day, all the Short Video platforms on the internet were full of videos of Linlin Scenic Area and fireflies.

At that level, almost every three videos that a user scrolled through would definitely have a related video. Some people even scrolled through three videos and all three videos were related content.

However, the people who saw the video were not annoyed. Instead, they were attracted by the video. More and more people saw the video of fireflies in Linlin Scenic Area, and more and more people sighed and were shocked.

More importantly, everyone realized that the fireflies in the Linlin Scenic Area would be so shocking and attractive.

there were also several firefly-themed scenic spots in china, but their fireflies were ordinary and were completely different from the fireflies in linlin.

at this moment, professor yan's announcement attracted everyone's attention. " i've taken some people to study the fireflies in linlin scenic area and share a piece of news with you. these fireflies are actually a new species of mutated fireflies. "

The announcement was reposted by the official account of Linlin Scenic Area, so it quickly became a hot search and attracted a lot of attention.

Those who saw the video investigated professor Yan's identity and found that he was indeed a very famous old professor who was dedicated to research. Those who saw the video were shocked.

In other words, the reason why the fireflies in Linlin Scenic Area were so spectacular was that these fireflies were a new species of mutated fireflies?

So, this made sense.

obviously, professor yan's words made sense.

at this moment, everyone couldn't help but sigh.

the Linlin Scenic Area seems to be blessed by the heavens. There are actually fireflies here. It has turned the originally ordinary comprehensive sea of flowers into a Fairyland.

"It's hard to imagine how lucky Linlin Scenic Area is this time."

"The boss of the Linlin Scenic Area must be laughing his head off now."

"....."

Naturally, these fireflies not only attracted the attention of countless netizens on the internet, but also the attention of some special people.

Huayang Scenic Area was also a Scenic Area that had just been built in the past two years.

However, after taking a closer look at the scenic Area, some people would be surprised to find that there was also a triangular sea of plum flowers, a floating bridge, a Duck House, a Ranch, and a comprehensive sea of flowers.

That's right, this was a knockoff scenic spot that copied Linlin's.

The boss's name was Lin Huayang, and he narcissistically named the scenic Area after himself.

At the beginning, when the triangular plum blossom in Linlin Manor was very popular, he wanted to ride on the wave of popularity, so he imitated the sea of triangular plum blossoms.

he had also graduated from a tourism major from the best school. from the beginning, he was very confident and thought that he could build a better triangular plum sea.

He even thought of cutting off Linlin villa's popularity.

Unfortunately, the final result was barely satisfactory. His sea of triangular plum blossoms did not cause any waves.

After that, Linlin villa had set up a floating bridge Scenic Area and he had followed suit. However, when the tourists came, they all said that what he had learned was nondescript.

Really, if this Scenic Area didn't improve, the start-up capital his family gave him would all be spent on this. By then, he would be completely trampled under the feet of his two brothers. Even if he went home, he could only get an insignificant position.

So, when he could no longer see the fireflies in Linlin Scenic Area, his eyes lit up.

Those fireflies were a mutated new species. If he could get them, he could cultivate them in large quantities. Moreover, he had a good friend who graduated with an insect major.

[Chapter 1386 624-Fireflies Stolen! Fighting With Linlin Scenic Area?](#)

He had asked the other party, and the growth cycle of fireflies was actually not long, and they could be cultivated.

therefore, as long as he could get the fireflies from linlin scenic area, he would have a way to ask a friend to cultivate them. it was difficult to replicate the other projects, but if he cultivated the fireflies as they were, he could at least replicate the stunning and beautiful night scene, right?

Thinking of this, Lin Huayang's eyes became brighter and brighter. He knew that this was his chance to turn the tables.

He immediately took out his phone and made a call.

a voice immediately came from the other side, " "Young master Lin, what's the game today? or do you have any trouble that you need me to help you?"

" big tiger, " lin huayang immediately explained, " i do need your help. did you see the news about linlin scenic area on the internet today? "

big tiger was a member of society who specialized in taking advantage of the underworld. the reason he knew him was naturally because he had money. he often spent some money and the other party could help him solve some problems.

da hu's voice was heard. " of course i've seen it. the internet is full of news about that firefly. young master lin, why are you asking this out of the blue? "

" big tiger, i need those fireflies, " lin huayang said directly. " as long as you can help me get a few fireflies from linlin scenic area, money is not a problem. "

There was a moment of silence on the other end of the phone before da Hu said, " young master Lin, that's stealing at the Linlin Scenic Area. I can go, but if it's done, I'll take a million!

lin huayang frowned slightly when he heard the figure of one million. this was obviously an outrageous demand. but thinking that he was going to rely on this firefly to turn the tables, he also said into the phone, " "Alright, one million it is."

on the other side, a strong man also hung up the phone with a smile.

He was da Hu.

He had always known that Lin Huayang was a sucker. Many times, he would let people he knew find trouble with the other party in the nightclub. Then, he would ask the other party to call him to solve the problem. He would collect the benefits and then split it with the people he knew.

How difficult was it to steal a few fireflies?

He had caught many fireflies when he was a child, and one million was a lion's mouth. He thought that the other party would negotiate the price, but who knew that they would agree just like that? what a fool.

"You two, come with me!" Big tiger shouted to his two subordinates.

The two men followed the Tiger and asked curiously, "

"brother hu, where are we going?"

"Yeah, where are we going?"

"We're going on a trip!" Big tiger smiled.

...

not long after, da hu arrived at the linlin scenic area with his two little brothers. their first thought was that it was too crowded and there were too many tourists.

Most people weren't even this crowded during the National Day holiday, right?

However, big tiger also knew his purpose. He wasn't really here for a vacation. He was just here to catch a few fireflies. What did it have to do with him whether it was crowded or not?

"brother hu, what do we do now?"

"Yeah, how do we do it?"

The two lackeys asked.

"Of course it's tonight." Brother Tiger said.

The three of them strolled around the Linlin Scenic Area, trying to find out where the comprehensive sea of flowers was.

finally, when night fell, the three of them headed in the direction of the integrated sea of flowers.

however, when they got closer, the three of them were a little dumbfounded. because the integrated sea of flowers had not opened, there were security guards everywhere. they could not enter at all and could only watch the firefly sea from the outside.

How were they going to steal it?

if he rushed in, he would probably be wearing a silver bracelet.

"Brother Hu, what should we do?" One of his underlings asked.

"Let's squeeze to the front first." as da hu spoke, he led his people to squeeze forward. the tourists who were squeezed away were very unhappy, but when they saw the three people's fierce looks, they could only swallow their anger.

The three of them finally squeezed to the front, where they could see the fireflies in the sea of flowers better, but they still couldn't steal fireflies here.

The three of them could only wait.

Just like that, he waited until late into the night.

At this moment, big Tiger's eyes suddenly lit up, because three more fireflies flew over and landed on the green plant next to him.

"Quick, cover me." Da Hu immediately whispered.

The two underlings also saw the three fireflies and cooperated to block the surrounding view.

this was not the first time they had done this, and their cooperation was excellent.

Big tiger took out a bottle that he had prepared in advance as fast as he could, and then grabbed the three fireflies into the bottle.

his movements were as smooth as floating clouds and flowing water, and no one noticed him.

After getting what he wanted, big tiger left with his two underlings as fast as he could. Everything was quiet, and no one knew that someone had stolen the three fireflies with a skill that ordinary people could not understand.

Da Hu and the other two were stealing things in Linlin's Scenic Area. Even if they were just three fireflies, they were very afraid and immediately took the train to run inside.

the next day, big tiger brought his men to huayang scenic area and found lin huayang's office. " young master Lin, I'm glad I didn't fail you. I've already gotten the fireflies.

Lin Huayang was overjoyed when he heard this, " "really? Where's the thing?"

Big tiger also immediately took out the special bottle and handed it to Lin Huayang.

Lin Huayang took the bottle almost immediately, then closed the office curtains, turned off the lights, and blocked all the light. Then the Firefly in the bottle lit up.

there were indeed fireflies inside.

But Lin Huayang didn't pay immediately. Instead, he took out a video from the internet and used a magnifying glass to compare the fireflies in the bottle.

the announcement that professor forster had made earlier had detailed photos and videos of fireflies, which could be used as a good comparison.

after the comparison, lin huayang was sure that the fireflies in the bottle were indeed the mutated fireflies from linlin manor.

"big tiger, well done!" Lin Huayang couldn't help but say. At this time, he wasn't stingy and immediately transferred 1 million to big tiger.

Although his family didn't give him much capital to start a business, he could still afford to pay one million Yuan. If he were to pay more, he would hesitate and feel the pain.

Big tiger was naturally very happy to receive a million Yuan. After complimenting Lin Huayang, he left.

Lin Huayang looked at the fireflies in the bottle, but his face was full of smiles. " now that he has the firefly in his hands, it's time to show off his skills. after cultivating this firefly, he wants to make his own scenic spot a night-time scenic spot with special fireflies. "

He believed that with the help of his friend, the cultivation speed would not be slower than Linlin Scenic Area. After all, this Firefly had just appeared in Linlin Scenic Area.

at that time, they would definitely be able to compete with the tourists of linlin scenic area in this project. even if they could not completely crush the other party, they could at least compete with linlin scenic area.

He immediately contacted his friend and asked him to make a list of fireflies.

After that, Lin Huayang didn't hesitate at all. He started to download the items on the list and bought them crazily. Not long after, the deposit alone had reached more than 2 million. When the items arrived, the full payment was a few million.

Of course, the equipment for breeding fireflies did not cost that much money, but he bought the best, all-imported ones.

This had completely exhausted the start-up capital that his family had given him.

However, it was all worth it.

Next, he had to think about how to cultivate fireflies to compete with Linlin Scenic Area. The size and tourists of Linlin Scenic Area were not comparable to his Scenic Area. He had to think of some ways.

He also had a way, which was nothing more than to take advantage of the popularity to make trouble. As long as he took orders from Linlin Manor, there would be attention. As long as people paid attention to his new mutated Firefly, it would attract people.

As he thought about it, Lin Huayang laughed.

however, he did not know that starlight fireflies had a special attribute. after adapting to the environment once, it would be difficult to produce them in other environments.

huayang scenic area did not have the environment of linlin scenic area.

soon, lin huayang received a phone call. it was that friend of his. he went out to welcome him immediately and soon saw the friend, " "Da ping, I've already gotten the Firefly. I'll really have to trouble you this time."

"Have you ordered the things I told you to? The man named da ping was obviously very interested. He had reached a bottleneck in his research and breeding of insects and needed to breed new things.

it's done. It'll be here soon. This is my chance to make a comeback. I'm more anxious than you. Lin Huayang said with a smile. When he brought da ping back to the scenic Area, he was even more excited.

He immediately brought da ping to his office and took out the bottle with the fireflies.

However, when the two of them saw the scene in the bottle, they were both stunned. The fireflies inside were already motionless.

Da ping hurriedly went forward to check, and after a moment, his expression turned ugly, " "He's dead!"

"how did this happen?" Lin Huayang's face turned extremely ugly when he heard this.

[Chapter 1387 625-A Mysterious Area! The Amazing Effects Of The Medicinal Wine!](#)

in the plantation department of linlin manor, yu shui was sitting in her manager's office, reading the news on her phone.

He was naturally focused on the news about Linlin Scenic Area.

As the manager of a Department in the scenic Area, he knew that he had to understand some of the things that happened in the scenic Area. It might be related to the plantation Department.

It would also allow him to deal with it immediately.

He had been a manager for a long time, and his thinking was different from when he first started as a plantation employee.

In the past month, their Scenic Area had indeed been very lively, and the reason was naturally because of the fireflies.

in the past month, the news about fireflies in linlin mountain villa had never stopped. the main reason was that those who saw the news about fireflies were attracted, and tourists came to linlin scenic area one after another.

Even at the peak of its popularity, you city's 5th Ring Road was stuck in traffic.

moreover, in the past month, fireflies had not only appeared in the comprehensive sea of flowers in linlin scenic area, but also in other places of linlin villa.

In particular, there were more Linlin ranches, which were no less than the comprehensive sea of flowers.

Now, they could see the stunning and beautiful scene from the ranch. Moreover, on the ranch side, many tourists just lay down on the grass. The fireflies lingered around them, as if they were looking at a Galaxy.

However, no one knew where these fireflies came from.

Professor Forster had been studying the fireflies for a long time, trying to find the source of them, but he still had no clues. It was as if these fireflies had appeared out of thin air.

Another shocking thing was that professor Yan had discovered that the fireflies in Linlin Scenic Area had very strong environmental requirements.

The fireflies were further away from the Linlin Scenic Area, so they would die soon.

it was as if the fireflies were born for linlin scenic area.

this discovery made many scenic spots even more envious. in the past, many scenic spots had their eyes on these fireflies. after all, these fireflies could really be replicated after they were cultivated.

However, no one had expected that this Firefly would be so in love with a scenic spot. Would she not live after leaving Linlin scenic spot?

There were even commenters who had begun to write love stories about fireflies and Linlin Scenic Area.

Yu Shui was watching the news when an employee walked in. " manager yu, the crops in that area have grown taller again. the curtains we put up earlier might not be enough to cover them anymore. "

Yu Shui stood up immediately and followed the employee out of the plantation Department. They finally came to a piece of land between Linlin Ranch and fairy tale mountain.

it could be seen that this piece of land was surrounded by curtains, and the inside could not be seen from the outside.

The seeds planted in this land were naturally the ones that Chairman Qin had given him personally.

At first, he thought that even if these seeds were different, they would at least look similar to ordinary ones.

However, what shocked him was that these crops were fundamentally different from the ones in the past. After they sprouted, these crops grew wildly.

At first, he thought that the crops were growing fast, but he soon rejected this idea. It was not that the crops were growing fast, but that they were large in size.

It seemed that the fast growth was due to the large volume ratio. In the same time, a crop that could grow to two meters would definitely grow taller than a crop that could only grow to 20 centimeters.

The plants of these crops far exceeded those of normal crops.

If outsiders saw this, they would definitely be shocked.

However, this was a new product of his boss's research. Before it bore fruit, he couldn't let the outside world know unless his boss instructed him to.

Therefore, he could only find a curtain and surround the entire area, isolating it from the outside world.

Yu Shui went in and looked at the crops that were already taller than him. He sighed with emotion. What kind of eggplant plant could grow so tall?

"Find a new curtain and cover it again." yu shui immediately ordered her staff.

The staff member nodded, his face full of shock.

he was also a dry farmer, and this was the first time he had seen such an amazing crop. compared to normal crops, this was simply a giant.

The staff of the plantation Department quickly brought higher and wider curtains and surrounded the land again.

The operations of the plantation Department had actually attracted the attention of many passing tourists.

After all, it was rare to see any part of the Linlin Scenic Area being surrounded so mysteriously.

when yu shui led the staff of the plantation department around the curtain, a few tourists stopped their discussion.

"What's inside? Yesterday, when I came over, I saw that they were all surrounded, and now they're even higher."

"It must be a new project, so Linlin doesn't want anyone to know about it for the time being."

"It should be!"

as for the new project of the linlin scenic area, tourists and fans must be very concerned, because the projects of the linlin scenic area had never disappointed people.

The more mysterious it was, the more curious the tourists were.

These visitors couldn't help but take out their mobile phones to take a picture and then post it on their WeChat moments and upload the video.

In fact, it was not only one tourist who had done this. There were even some videos on the hot search of this land on the internet.

it was just that with the curtains around, they were not sure of the situation inside, so the heat was not very high.

Yu Shui took some time to put on a new curtain so that even if the crops inside grew taller, they could still be covered.

[Chapter 1388 625-A Mysterious Area! The Medicinal Wine's Amazing Effects](#)

On the other side, Qin Lin had already driven to the winery with Li Qing.

Li Qing really knew how to grasp the timing, and he came at the right time.

At the winery, master Zhang was planning to open a jar of bone-strengthening medicinal wine for the elderly today. After Qin Lin gave him the secret recipe, the winery had been brewing a lot of bone-strengthening medicinal wine.

Although the first batch of wine that he brewed personally had not yet been fully released, the medicinal wine was different from ordinary wine. The taste and taste were affected by the medicinal herbs, so it was not too important.

Moreover, the medicinal wine was particular about its efficacy, so it didn't matter even if the taste was a little bad.

Now, the winery naturally had to send some wine to the selected medicinal wine seller.

Those in the wine business could taste the wine and knew that it would be perfect after being left in the wine for a while. As long as the medicinal effect was strong, it would not affect anything.

The reason why master Zhang did this was because he wasn't confident in this wine. Even if it was a secret recipe given by Chairman Qin, it was still his first time making it.

Of course, if they let the official account of Linlin Manor advertise, the effect would be better.

However, the production of this wine was limited, so there was no need to advertise it for the time being. Moreover, ordinary people could not tell the quality of this wine if they were not wine sellers.

When all the distributors had approved of this wine, Linlin Manor's official account could then advertise it and directly raise the price.

Li Qing had rushed over after hearing the news. After all, he had personally participated in the brewing of this batch of wine.

The car stopped and Mr. Zhang was waiting for them as usual.

after qin lin arrived, he welcomed him into the wine cellar.

One of the barrels of wine had already been lifted out, and the two old masters were already fiddling with it. They removed the mud on the seal and untied it.

The smell of medicinal herbs and wine wafted out.

Li Qing immediately leaned in and sniffed. To be honest, this wine fragrance didn't meet his standards for good wine at all.

However, he remembered that it was a medicinal wine, so he asked curiously, "Qin Lin, what's the effect of this wine? For you to specially create a secret recipe to brew it, it shouldn't be simple, right?"

"This wine is for the elderly. It can be used to strengthen the bones and treat osteoporosis!" Qin Lin explained with a smile.

"How's the effect?" Li Qing immediately asked.

Due to his grandfather's advanced age, his bone density was already over 2.1 SD, and he often felt pain in his waist and joints.

His family had been treating his grandfather for a long time and had found a lot of medicinal herbs, but this kind of old age illness was very difficult to cure.

"the effect of this medicinal wine is much better than that of the same type of wine and herbs in the market," qin lin explained with a smile.

He was very confident when he said this. After all, this wine had the attributes of strengthening bones and treating osteoporosis.

This was also the second product he could directly make with a quality of 2 other than the ketchup.

in reality, items that could reach +2 quality were extremely rare. even if there were, they would be rare treasures that could only be used in the homes of super-rich people.

His wine had two +2 attributes, and it was needless to say that it would definitely crush the market.

Li Qing's eyes lit up when he heard this. "Qin Lin, you have to give me some of this wine. My Grandpa will definitely need it."

"Master Zhang," Qin Lin instructed with a smile, "please prepare some for Li Qing."

don't worry, Mr. Qin, " master Zhang nodded. I'll help Mr. Li pack it up.

the external packaging of the bone-strengthening wine for the elderly had long been prepared by the winery. after opening this barrel of wine, master zhang had started to fill it with his men.

Not long after, the bottles of wine were all packed and sealed.

Master Zhang personally took a few bottles and gave them to Li Qing. At the same time, he also ordered people to send those wines to the selected medicinal wine sellers.

Qin Lin also asked master Zhang to fill two bottles of wine for him. He wanted to take them back to check the attributes of the wine.

After leaving the winery with Li Qing, Li Qing returned to Ming city. He obviously came here for the wine.

This guy's passion for wine was no less than his passion for his wife.

After Qin Lin returned to his office, he locked the door and entered the game with a thought. He saw the remark of the wine he brought back:

[Linlin-bone-strengthening wine for the elderly: quality 2]

[a type of bone-strengthening medicinal wine specially prepared for the elderly. It has a special effect: Bone strengthening +2 (has no effect when restored to a healthy state), osteoporosis treatment +2 (has no effect when restored to a healthy state)!]

As it was a medicinal wine brewed from a new wine, it did not have the attributes of taste and aroma.

however, qin lin was completely relieved when he saw the note. there was no problem with the brewing. in the future, the winery would just have to follow the secret recipe to brew the wine.

He just needed to pay more attention to the security of the winery.

after all, if this medicinal wine were to be promoted, there would definitely be many people who would covet it.

Fortunately, Linlin's company's security force was still good. After all, there were many retired soldiers and people like Ma Hong.

Chen dabeai knew that Ma Hong and the others were not simple people, so he was not stupid enough to make use of them. He took turns to capture Ma Hong and the others to train them as security guards.

...

After Li Qing returned to Ming city, he went to the Ming city compound immediately and went to the Li family's Villa.

Even though Li Qing didn't take the road back home, the people in the compound, regardless of their positions, greeted him when they saw him.

After all, the Li family was now at the peak of its power. Even if this young master Li didn't do anything, he would still be a Big Buddha.

When Li Qing entered the Li family villa, the first thing he saw was old master Li with his legs hanging down.

Old master Li had previously undergone a dangerous major operation. Although he had survived the operation with the help of the essence Qi wine given by Qin Lin, it was true that the body of an elderly person would be weak after major surgery, especially elderly diseases like osteoporosis, which could not be controlled.

This was the natural law of old people.

Therefore, Grandpa Sheng's legs were often painful and numb due to osteoporosis.

There was a saying that living too old was not necessarily a good thing, and it was referring to these elderly diseases that could appear at any time.

"Xiao Qing, why are you free to come back today?" Old master Li was surprised to see his grandson.

In the past, he had been very disdainful of his grandson, who only knew how to play with wine, and his youngest son, Li Kai, who was devoted to some research.

In his opinion, it would be a complete waste of his family's resources if he didn't follow the path of his family. However, he was relieved now. Li Kai's son was now very famous. He was already an academician, which added a lot of reputation to the Li family.

It was thanks to his younger son that his eldest son was able to take a step forward. After taking this step, he would have the opportunity to take another two steps.

On the other hand, this grandson of his was still not promising at all. However, it had already been generations, so he would not force it.

Li Qing, on the other hand, stepped forward with a smile, put down the bag in his hand, and took out bottles of wine from it. "Grandpa, I've brought you something good,"

Old master Li's eyes lit up when he saw the wine. "Linlin medicinal wine again? So many this time?"

Li Qing explained, "Grandpa, this isn't an ordinary wine. It's for the elderly. It can strengthen bones and treat osteoporosis. Qin Lin said it's very effective.

"Really? Then I'll try." Old master Li's eyes lit up. He was very familiar with boss Qin. If he said that something was very good, it must be very good.

He immediately took a bottle of wine and opened it, then poured himself a glass and slowly sipped it.

The medicinal wine with the fastest efficacy that he had ever drunk was the Linlin medicinal wine.

However, this time, he found that the bone-strengthening wine's effect was no slower than the Linlin medicinal wine.

His originally sore leg seemed to have a warm current flowing through it very quickly. That warm feeling seemed to heat up his entire thigh, making him feel very comfortable.

this effect is amazing. old man Li was really surprised. He couldn't help but get up and walk. When his bones were loose and sore, it was difficult to walk. Now, he didn't feel that at all.

It was indeed boss Qin. If the other party said that the effect was very good, then the effect was shockingly good.

[Chapter 1389 Buying The Copyright! What Kind Of Optimus Prime And Megatron?](#)

Old master Li felt the effect on his leg and immediately became interested in the bone-strengthening wine. He began to put bottles of it into his cabinet.

The absence of pain and numbness was truly a wonderful feeling.

In the evening, old man Li drank another cup of bone-strengthening wine. For the elderly, this medicinal wine was really a treasure!

The next day, when Grandpa Li woke up, he could clearly feel the difference.

Early in the morning, he actually walked around the courtyard a few times and did not feel uncomfortable at all.

Usually, people with osteoporosis could not even walk a few steps.

This further proved that boss Qin's bone-strengthening wine was truly miraculous.

Old master Li couldn't help but ask the driver to take him to the hospital for a check-up. He wondered if his osteoporosis had improved.

When they arrived at the hospital, old master Li found a familiar chief physician.

With the old master's status, he really didn't need to line up.

Some people might feel that it was unfair and that he was abusing his power, but it should be known that the chief physicians who treated people like the old master usually did not treat ordinary people.

This had no effect on ordinary people at all.

"Elder Li, it's not the day for your follow-up examination yet. How come you have time to come over?" the chief physician asked anxiously.

"Doctor Chu, I drank a type of medicinal wine yesterday. I feel that my osteoporosis has improved a lot, so I want to do a follow-up," old master Li said hurriedly.

"Ah?" When doctor Chu heard this, he was stunned.

they felt that this wasn't something someone like old Li could say. the medicinal wine on the market boasted of its effects, but the medical world knew its true effects.

It was just something driven by the power of capital.

So, wasn't old man Li's claim that his osteoporosis was much better today after drinking a type of medicinal wine the day before ridiculous?

It was like those ignorant old people who bought health products made of flour. What difference did they think that flour could cure their diseases?

However, those old people were uncultured and at the bottom of society, so they were easy to deceive. However, old man Li was not that kind of person. How did he also have such an influence?

However, in front of old man Li, he couldn't just say that he had been deceived, right?

If the other party felt that he had lost face, he would be in deep trouble.

he didn't dare to offend this person, so he could only say, "Elder Li, I'll get ready. I'll give you an X-ray scan and a blood calcium test later."

X-rays were an important method to check for osteoporosis nowadays. In addition to a blood calcium test, they could generally determine a person's condition.

Old master Li was brought to the examination room, where the doctors were already adjusting the equipment.

Doctor Chu also found old master Li's medical report.

Under normal circumstances, this kind of osteoporosis examination would take a long time to come to a conclusion. However, for people like old man Li, the results were obvious.

The results came out very quickly.

A doctor quickly handed the report to doctor Chu. doctor Chu, this is old master Li's examination report.

When he saw old master Li's report, doctor Chu's face gradually lost its calm.

After the checkup, old master Li's osteoporosis had really improved, and his bone condition was also much better than before.

"? ? ?" Doctor Chu couldn't believe it and thought of old master Li's words.

Was there really a medicinal wine that could have such an effect after one night?

it must be known that this type of medicine on the market, even the most advanced and most effective one, could not have such an effect.

What kind of medicinal wine did old man Li drink?

...

On the other side, there were soon other people who were stunned by the effects of this bone building wine.

Qing city had the biggest market for medicinal wine.

it could be said that the market for medicinal wine here was the largest in the entire country.

Peijing was one of the largest wine sellers in the wine market. Every day, many wineries and wine cellars would bring their own wine to his channel.

After all, it was an era where channels were King.

The Secretary walked into the office and reported, "Chairman Chu, the medicinal wine manufacturers have arrived. They've all been invited to the meeting room."

"Let's go!" Peijing nodded. He left the office and headed straight for the conference room.

There were already a few people waiting anxiously in the meeting room.

When they saw him, they hurriedly got up one by one.

"Chairman Chu, I've long heard of your name!"

"Chairman Chu, our medicinal wine, Zhenzhen"

"President Chu, please."

It was obvious that these people were eager to introduce their medicinal wine.

Peijing actually didn't have much hope for their medicinal wine. The medicinal wine on the market now was mostly the same. To be honest, the effects were all the same.

He could let the medicinal wine go through his channels, but he also had to see how much these people could offer.

Naturally, he would only choose one or two of these people.

"Everyone, please take a seat!" Gong Xinchao and the others sat down first. However, as soon as he sat down, he received a call from the courier.

He put him in the security room. Peijing didn't notice at first, but he suddenly thought of something and immediately said, "Is the delivery wine? I'll come down immediately to get it!"

After saying that, he left the wine merchants, who were still in a daze, and ran out.

He only had one express delivery today, and it was a medicinal wine called bone-strengthening wine from Linlin Winery.

That was Linlin Winery's wine.

Everyone on the market knew that the Linlin wine was the best wine in the country, and the Linlin medicinal wine was also the best in the country.

[Chapter 1390 Buying The Copyright! What Kind Of Optimus Prime And Megatron? 2](#)

The wine merchants in the meeting room had asked for access to his channels, but when it came to Linlin Winery, he wanted to ask them to use his channels.

Although he didn't know what effect the wine from Linlin Winery had, he was sure that it wouldn't produce any bad wine with its reputation.

He had to check this bone-strengthening wine immediately.

peijing went downstairs and received the parcel immediately. he couldn't wait to open it and see the two bottles of medicinal wine wrapped in foam. there was also a note about the effects of the medicinal wine.

" linlin-bone strengthening wine. it's a new wine made by linlin winery. it's called zhuanzhu, and it's very effective in strengthening bones and treating osteoporosis. "

Peijing's eyes lit up when he saw the effects of the introduction.

This was because he really needed this kind of effect. He had rheumatism and bone pain, and the main reason was that his shoulder had been injured before.

Recently, it had been acting up faintly and he felt a little sore. In the past, he had only used medicinal wine to maintain it. However, the effect of the medicinal wine was not very strong. It was only a little stronger than the medicine in the hospital.

Now that the wine from Linlin wine factory had the effect of strengthening his bones, he could use it.

thinking of the reputation of linlin medicinal wine in the past, he rushed back to his office, opened one of the bottles, and poured himself some.

not long after, peijing experienced the same feeling as old man li. his injured shoulder, which had been tormented by rheumatism and bone pain, suddenly felt a warm current.

Wrapped in this warm current, he experienced a comfortable feeling that he had never experienced before, and he couldn't help but let out a murmur.

"It's too unbelievable." Peijing was shocked.

Although he knew that the wine produced by Linlin wine factory would definitely have strong medicinal effects, wasn't it a little too strong?

Then, he realized something.

This medicinal wine was going to sell like crazy and sweep the market.

however, he only knew that the medicinal wine's medicinal effects were miraculous. he didn't even know the price, the quantity, and other things.

Peijing immediately picked up his phone and dialed Linlin winery's number.

he had to clarify this first. if possible, he had to place the order immediately.

Almost at the same time, not only in peijing, but many sellers of Linlin winery's wine also did the same. In a short time, Linlin winery's phone was exploding with calls.

...

Linlin Manor.

Qin Lin walked out of his office, got into his car in the parking lot, and headed straight for Linlin's laboratory.

He arrived at the laboratory and went through some checks before arriving at a newly opened laboratory building.

The laboratory building had been specially modified for professor Wang and the others to produce Optimus Prime and Megatron.

He was here today because professor Wang had informed him of new progress.

This was a very fast speed.

In fact, it was normal. After all, there was no need for professor Wang and the others to crack it. They only needed to make it according to the design plan at the beginning, so it was not difficult.

As long as they had enough manpower and materials, the speed would definitely be fast.

Linlin's laboratory didn't lack these.

As soon as Qin Lin arrived, professor Wang went up to him immediately. Chairman Qin, you're here. Take a look at our latest progress.

As he spoke, he led Qin Lin to a special instrument.

A metal arm could be seen hanging from the instrument.

Professor Wang took out a long-distance sensor device and put it on Qin Lin's arm. He said, "Chairman Qin, try operating your arm."

qin lin naturally knew what was going on. he immediately clenched his fist. then, he saw that the metal arm also clenched its fist at the same time. when its fingers tapped, the fingers of the metal arm also started tapping.

He stretched his arm forward, and the metal arm actually followed.

If this scene was seen by outsiders, they would definitely find it unbelievable.

This was because even the most advanced induction technology in the world could not achieve such synchronization and smoothness.

Professor Wang personally led his men to build the metal arm and the sensor. He was equally amazed. Chairman Qin, this level of sensitivity and synchronization, I really admire you. You actually came up with such a simple design.

you must know that the best sensor technology is in the United States. Their most advanced technology is still far behind yours, not to mention the robot. It can crush them.

Qin Lin knew that he didn't design it himself. It was just a game. So, he didn't dare to accept professor Wang's compliment. He could only change the subject and ask, "How long will it take to complete Optimus Prime and Megatron?"

professor wang explained, " chairman qin, your design is very detailed. if you want to complete optimus prime and megatron, you just have to complete the parts and technology in the design. it's only a matter of time. however, there's a problem. we don't have the copyright to use the appearance of

optimus prime and megatron. if we want to build them like this, we have to buy the copyright first. otherwise, we'll have to redesign them. "

"I'll handle this." Qin Lin immediately said, " are you kidding me? who's going to redesign it? " The ratio of these parts to the mechanical bone armor was made by Elba's father, the master craftsman. This was Goblin technology.

How could he have the ability to redesign it? He might as well buy the copyright directly.

The copyrights of Optimus Prime and Megatron were owned by Universal Pictures. They were open to the use of Optimus Prime and Megatron's appearance all over the world, and they could be bought with money.

Toy companies around the world or even more film and television companies had such copyrights, and it didn't cost much.

"The copyright has been bought, so there's no problem." Professor Wang nodded and then said to Qin Lin, " Chairman Qin, let's go and take a look at the ice and snow launcher. It's almost done.

Qin Lin nodded.

The Goblin Gloves were the first Goblin technology he had obtained. Now, he had instructed professor Wang to expand the scope, preferably to freeze a mountain at the same time.

In fact, there were similar technologies now, such as equipment for making artificial snow. Many ski resorts had such equipment.

However, it was very difficult for such equipment to cover an entire mountain with ice and snow. It would take a long time and a lot of effort to cover it inch by inch.

however, if the goblin glove's effect could be expanded, it would be able to instantly freeze fairy tale mountain. that would be very shocking.

To a certain extent, it wouldn't be too much to say that this was magic power, right?

It even reminded him of the mini rain cloud stone that was still soaking in the goddess 'spring. If the Goblin glove's effect was amplified, it would actually be more powerful than the mini rain cloud stone.

Once this technique was completed, he could totally show everyone a real magic trick or immortal art.

Qin Lin and professor Wang arrived at the laboratory that specialized in Goblin Gloves. They could see that the researchers were installing equipment inside.

These devices had a launch port, which was about half a meter long.

Professor Wang explained, " Chairman Qin, this is the modified and expanded range of the launcher. It can spray frost to the maximum range. It's not enough. With the current technology, it's impossible to cover the entire Mount Tonghua with one. It needs many more simultaneous launches.

"En!" Qin Lin naturally understood this point. Nothing could be achieved overnight. Even if he could achieve professor Wang's level, it was already very good.

After that, Qin Lin handed the matter over to professor Wang and returned to the Linlin Manor. At the same time, he asked Lin Lanzi to purchase the rights to use Optimus Prime and Megatron's appearance from Universal Pictures's local branch.

Although Lin Lanzi was puzzled about what the boss was going to do, she still did as he said. She could roughly guess that the boss was going to place such things in the scenic Area.

After all, there were many scenic spots. Wasn't there a scenic spot where Wei zhentian scolded people and made it to the hot search?

It was just that she felt that the idea of putting this kind of thing out was too lousy. However, if her boss wanted to do this, he must have a plan, right?

lin lanzi quickly contacted universal film's local branch and discussed the purchase of the rights to use the appearance of optimus prime and megatron.

the person in charge of global's domestic copyright branch was called dagis.

Dagis was very surprised when he received the invitation to buy the place. As the person in charge of the country, he naturally knew the reputation of the Linlin Scenic Area in the country.

At that time, if the Linlin Scenic Area were to display Optimus Prime and Megatron, it would definitely cause a great sensation. Then, he could use them for publicity again and definitely gain a lot of popularity.

He was just very curious about what kind of Optimus Prime and Megatron Linlin Scenic Area was going to put out!
