

The Game 1391

[Chapter 1391 Linlin Scenic Area Is Going To Make A Big Move](#)

linlin manor office.

Master Zhang had come over from the winery early in the morning. He reported excitedly, " Chairman Qin, the secret recipe you gave us is amazing. All the sellers of the wine have called us. They all want to order our wine. They are all anxious.

besides, I've also personally tested the wine with my old friends. The effect of the medicinal wine is really very good, or rather, it's incredible.

Chairman Qin, your secret recipe is really amazing. I can rest assured now. We can continue to expand the wine brewing business and let the winery consider the price.

In fact, when a product was launched, the first thing to do was to set the price. Like Linlin winery, before the price was set, the product was sent to the seller first. It was rare for the seller to urgently ask.

However, this had something to do with Linlin winery's casual management system.

linlin winery was under linlin villa, and because the production scale of wine was not large, it was also a high-quality wine.

After he produced the Linlin wine and Linlin-bone strengthening wine made from Linlin rice, he would have to pay more attention to everything.

Master Zhang left after he finished reporting.

However, today seemed to be a very busy day. Lin Lanzi came shortly after and also came to report, " Chairman Qin, the copyright for Optimus Prime and Megatron's exterior appearance has been bought. The other party heard that we might be placing Optimus Prime and Megatron mechanical sculptures in Linlin Scenic Area and immediately sold the copyright to us.

Qin Lin smiled.

He was not worried about this.

a large part of universal pictures 'income came from movie merchandise, and the appearance of these movie characters was one of the major sources.

This was the money that they earned.

However, he wondered if Universal Pictures would regret their decision after Optimus Prime and weizhentian were released.

Qin Lin thought of the winery and said, " Mr. Lin, the winery is under the villa's name. Now, the winery is about to start developing. There's a new type of medicinal wine recently, so you should promote someone capable to the winery to take care of it. It's best if they have a certain understanding of wine. If not, arrange for them to learn first.

"Alright, Chairman Qin!" Lin Lanzi nodded.

she knew that the winery was under the villa's name, but she didn't know much about wine, so she didn't care about the things there.

Now that the boss had said so, she had no choice but to go to the winery to inspect it.

After Lin Lanzi left, Qin Lin also looked at the game screen in his mind and began to control the game character to complete the daily tasks for the day.

Unfortunately, he was not lucky today and did not gain anything.

He didn't know if it was because of the character's level, or because the fishing, tree cutting, and mountain products were restricted, but it had been a long time since any new items appeared.

Qin Lin then controlled his character to go to the lake mine and started mining.

Unfortunately, after digging two layers, he only found gold, silver, copper, and special soil.

There were no other unexpected gains.

Seeing this, Qin Lin once again decisively gave up on digging.

How was this a farming game? this was clearly a game of luck. When he was lucky, he got good things continuously. When he was unlucky, he got nothing.

...

in the following time, the linlin scenic area was carried out in an orderly manner. at night, some busybodies from the finance and economics department talked about various companies in the linlin department, including linlin food company, linlin pet food company, linlin laboratory, and linlin pharmaceutical.

these financial figures had analyzed the economy, products, channels, and so on of these companies, and had come to the conclusion that all the companies in linlin had the opportunity to enter the top 100 in the country, as long as they had the intention of going public.

And even if it wasn't listed, the boss of the Linlin company could be frighteningly rich, because according to the outside world, most of the shares of Linlin company were held by this boss.

However, everyone only knew that the boss of the Linlin Department was a middle-aged man in his forties. This was also publicly acknowledged on the internet, with encyclopedic and photo evidence.

However, no one had ever seen boss Lin Lin in person. He was very mysterious, and even the internet seemed to have a special power to suppress news about him.

However, the analysis of these financial figures had attracted the attention of countless netizens on the internet.

Although no one had ever ranked Linlin company's wealth on the internet, and Linlin company didn't even have any plans to go public, everyone thought that Linlin company was already a company that could compete with a super company like Penguin.

After all, the products produced by Linlin company were almost all the best in the industry. As long as Linlin company wanted to produce a product, the company in the industry would either be incorporated or be finished.

the air conditioner companies were the best examples.

Huaxin air conditioner had offended Linlin company and was basically done for. The other air conditioner companies were slowly reshuffling. There was even news that those air conditioner companies had already contracted land and were about to start cultivating warming grass on a large scale.

it was obvious that they had already reached an agreement with linlin laboratory.

The Quan Jin law firm was also aware of the news, and they even held a special meeting to discuss it.

The reason why they paid so much attention to it was because Linlin's legal business was in their office.

However, he had only been able to get the business deal previously because of Chu Feng's relationship with Chairman Qin. Moreover, the level of the business deal he had signed before was completely different from the current one.

[Chapter 1392 Linlin Scenic Area Is Going To Make A Big Move \(2\)](#)

With the development of Linlin's company, the volume of business had increased by many times.

It could be said that the importance of Linlin company now was equivalent to that of a company like Penguin.

therefore, linlin's legal business should be under the watch of many law firms. they had an advantage because of their relationship with chu feng, but they still had to pay full attention to it.

The head of the law firm, Robin, personally presided over the meeting. As soon as he sat down, he said, " "Mr. Chu, Li Na and I will be bringing the best Lawyers in Linlin with us."

"Okay, director." Chu Feng nodded. He was now a business partner of the law firm and knew what director Robin meant.

Linlin's legal business was indeed being watched by many people. Director Luo Bin wanted to show off the power of Quan Jin law firm so that Junior Brother Qin could trust him.

Moreover, director Robin was the number one business lawyer in Asia. He had a lot of power. Although he rarely made a move, it was hard for him to lose once he made a move.

Soon, an alluring woman with a very good figure walked in. She was Li Na, who was in charge of the staff and logistics of the entire law firm.

She put down some documents and said, " I've already booked the plane tickets. It's better to discuss Linlin's legal business as soon as possible. The other law firms don't know how long we've signed the contract with Linlin's company. Otherwise, they would have already contacted Linlin's company.

this received chu feng and robin's approval. after that, chu feng set off with robin, li na, and a few top lawyers.

...

Linlin Manor's main hall.

Qin Lin was holding a bag of nutritious hatchling insect food in his hand. He was putting one of the insect food into the mouth of a little parrot in the incubator.

"Master, Er Bao, Er Bao also wants it!" Xiao Wu, this damned parrot's voice rose from the side.

He picked up another piece of insect food and put it in the mouth of another little parrot.

The two little parrots ate happily, Xiao Wu was also very satisfied, happily flapping her wings.

Qin Lin was the only one who was unhappy. He felt that he had become the parrot's full-time nanny.

Xiao Wu and Xiao Bao, these two parrots, didn't allow anyone else to approach their children. Only he, their master, could approach them.

He didn't know if he should be honored or unlucky.

"Master, Da Bao and Er Bao still want more." Xiao Wu saw the two little parrots open their mouths again, and immediately called out again.

Qin Lin had no choice but to continue being a nanny.

Da Bao and Er Bao were the names of these two little parrots. Xiao Wu, this guy, gave them their own names. There was no other way, who asked this parrot to have such high intelligence?

Qin Lin was feeding the parrot when he received a call from brother Chu. He immediately answered, "Senior brother Chu, you're here? Alright, I'll get someone to bring you in ..."

After Qin Lin hung up the phone, he called Gao Yaoyao over and asked her to go out and welcome the guests. She had already informed them that senior brother Chu was coming over.

However, in Linlin Manor, there were no internal work cards, or people like Li Qing and Chen Shengfei who had their identity information recorded. The security guards would let them in and let people in.

Qin Lin put down the insect food and went back to his office.

Outside the Linlin Manor, Chu Feng hung up the phone and said to Robin, Li Na, and the top lawyers beside him, "Someone will bring us in immediately. This is the rule of their Linlin Manor."

"We'll wait." Robin nodded.

He knew some things about Linlin Manor. It was rumored that academicians often recuperated here, so it was normal to have more rules.

Gao Yaoyao came out quickly. She recognized Chu Feng and said, "Mr. Chu, my boss asked me to bring you in."

"I'm sorry to trouble you," Chu Feng immediately said.

Robin, Li Na, and the others followed behind and entered Linlin Manor.

the group was very curious about this manor. there were many legends about this manor on the internet, but only the official videos were released. it was very mysterious.

however, just the ones displayed by the officials were very attractive, beautiful, and shocking.

in short, the more mysterious something was, the more curious one would be.

Naturally, they were not qualified to enter the Linlin Manor for a vacation. They had actually filled in an application, but there was no news at all.

after entering the manor, robin, li na, and the others were immediately attracted by the beautiful scenery.

The entire Manor was very shocking and more attractive than he had imagined.

for a moment, they all wanted to take a good walk around the manor. unfortunately, now that they were brought in, they did not have the right to do so, so they could only follow.

Soon, Robin and the rest arrived at Qin Lin's office.

They had been well-prepared when they saw Qin Lin. After all, Linlin's company's business was in their hands. Naturally, they had learned from Chu Feng about the background of the boss of Linlin-that little Qin.

However, no matter how well-prepared she was, she couldn't control the waves in her heart when she saw this overly young face.

This young man was already a figure who could be as famous as that Big Boss Ma.

however, big boss ma was definitely not as good as this young man.

His identity as an academician and the research he had done were like a mountain of knowledge that people could only look up to.

brother Chu, we meet again. Everyone, take a seat. Qin Lin was naturally very happy to see Chu Feng.

"Qin Lin, let me introduce you. This is our law firm's director Luo Bin, manager Li Na, and a few other top lawyers in the industry."

"So it's lawyer Robin, I've long heard of your great name!" Qin Lin also smiled and shook hands with the lawyer, Robin, who was wearing a suit and had his hair meticulously combed.

He did know her. Quan Jin, the lawyer who had given brother Chu her lawyer's work, had read the information about the firm.

This was Robin, the lawyer for Asia's first business.

Mr. Qin, sorry to bother you this time, " Luo Bin said humbly. our law firm has written a special report on legal business. We hope that we can serve Linlin company better in the future.

"Lawyer Luo, regarding the legal business, I'll call the Linlin Scenic Area, the Linlin laboratory, and the people in charge of the various companies in Linlin. The scope of the legal business of each company

should be different. You can hold a meeting and study it by yourself. I'm usually not in charge of these things." Qin Lin actually knew why these people were here.

To be honest, he had a good relationship with the Quan Jin law firm, and with his relationship with brother Chu, he didn't mind leaving his legal business to them.

However, each company was making a lot of money, and each person-in-charge had their own thoughts and considerations. He didn't want to interfere in this kind of thing.

Even if he had a good relationship with brother Chu, it was only between him and brother Chu, not the entire Quan Jin law firm. So, the only thing he could do was to meet up with the people-in-charge of each company and let them persuade Shen Li, Deng Guang, and the others.

"Then I'll have to trouble you, Chairman Qin." Upon hearing this, Robin immediately expressed his thanks, because in his eyes, this was a chance for them.

With this opportunity, their chances of getting Linlin company's legal business would be even higher.

While Qin Lin was receiving Robin and the others, many tourists on Lin Lin's fairy tale mountain noticed that some people had appeared in many places and were starting to install something.

Those things seemed to be some kind of special launch device, very high-tech.

However, they had no idea what these things were.

therefore, they could only take out their mobile phones to record and upload the video to the internet.

fairy tale mountain was the most beautiful and popular scenic spot in the country. once these videos were uploaded online, it naturally received a lot of attention.

After all, fairy tale mountain was perfectly fine. It was hard not to be curious when someone suddenly installed these transmitter-like things everywhere.

There must be a purpose for such a big flag, right?

Thinking of the past actions of Linlin Scenic Area, everyone had an inexplicable feeling that Linlin Scenic Area was about to do something big.

[Chapter 1393 Is This Magic? It Covered The Entire Mountain In! Short Time](#)

In a female dormitory of a University, Chen Xue returned to the dormitory with the three-colored watermelon that she had just bought. She saw a few of her sisters running over to ask.

"Chen Xue, do you know if there's any new movement on fairy tale mountain?"

"Yeah, what are they installing?"

"There should be another surprise, right?"

Chen Xue was a little confused by the question. She was from you city and worked at the Linlin Scenic Area during the winter and summer breaks. She also knew some of the management of the Linlin Scenic Area.

In the two years that she had been studying, many of the waiters in Linlin Scenic Area who had worked with her during the winter and summer holidays had been promoted to Foreman, supervisor, and even Deputy Manager.

Therefore, whenever there was any trouble in Linlin Scenic Area, these sisters would come to ask her.

Of course, the main reason was that both fireflies and fairy tale mountain had been too attractive recently. These sisters had been paying attention to them. They planned to go back to you city with her during the holiday and play all of them.

Moreover, this was not the first time such a thing had happened.

Chen Xue leaned over and watched the videos on her sisters' phones. Sure enough, she saw the videos taken by the tourists. They were all images of people installing special facilities all over fairy tale mountain.

Chen Xue was a little curious when she saw this scene. She immediately took out her phone and WeChat to ask the people she knew from Linlin villa about the situation.

"Little Xue, I haven't seen Yingluo for a long time. I'm not sure!"

Xiaoxue, are you still working part-time this year? I've also asked the people from fairy tale mountain, but they don't know either!"

"I don't know. I also want someone to tell me!"

Chen Xue had asked many people, but no one knew what was going on. She could only helplessly say to her sisters, "I didn't manage to find out. It seems like the people at Linlin Scenic Area don't even know."

This made the girls even more curious.

It wasn't just them. The netizens who had seen the videos posted by the tourists were also curious.

Regardless of whether they had been to fairy tale mountain before or not, the beautiful scenery of fairy tale mountain had attracted countless people when it was popular.

Now that he had seen such a scene, it was hard not to be curious.

however, the most important thing was that they had no idea what these were. they could only guess and inquire, but they could not get any information. they did not know what was going on, so they became more and more curious.

In fact, after these videos were uploaded to the internet and made it to the hot search, even the people at Linlin Scenic Area were very curious. Many people had already asked about them in work group chats.

However, no one knew.

Some of the management couldn't help but ask Lin Lanzi.

Lin Lanzi knew the reason. When Linlin's laboratory people entered fairy tale mountain to install those transmitters, she was the one in charge of the handover and the signing of approval for the installation.

The current popularity on the internet was also intentional by her. She did not explain or announce it, letting the netizens guess and inquire on their own. She maintained this sense of mystery and increased the popularity step by step.

After working in Linlin Scenic Area for so long and becoming the General Manager, she didn't even need to personally arrange for people to do anything to hype up the show.

When Lin Lanzi saw that the manager of fairy tale mountain had also come to inquire, she instructed, fairy tale mountain will be cleared for the next two days and will not be accepting any tourists. Once you've confirmed it, the official account of the manor will also make an announcement immediately.

The manager of fairy tale mountain was stunned.

After all, fairy tale mountain was in the midst of its popularity, so there was no reason for it to suddenly clear the area. However, since boss Lin had given such an order, it should be related to the launch devices that had been installed.

These managers could only carry out the tasks with curiosity and doubt. They immediately announced the news in the fairy tale mountain group chat and asked people to close the passage for ticket reservations.

Those who had already made reservations were called back to reply, changing the time for those who had made reservations and apologizing.

after this series of actions, the news of fairy tale mountain's clearance was once again spread online, and it caused an uproar.

it wasn't until the official account of linlin manor released an announcement to confirm this matter that the curiosity on the internet reached its peak.

all eyes were on fairy tale mountain. many reporters even appeared and began to inquire about the situation on fairy tale mountain.

Every time something happened at Linlin Scenic Area, it would be a big deal. It would definitely be the hottest news, and everyone wanted to get first-hand information.

But obviously, these reporters couldn't get first-hand information.

This undoubtedly intensified the curiosity. It swept through the entire internet, and everyone's curiosity reached a higher level.

at this time, the official account of linlin scenic area released another announcement. there was only one sentence:

Do you want to see a magic show? "That mountain is right there. Tomorrow, I'll bring you to experience the power of magic!"

This sentence touched everyone.

Magic was magical, not something that existed in reality.

now that linlin scenic area was being described in such a way, it was definitely not simple.

But thinking about it, the magical night view of fairy tale mountain, when it changed from day to night, was like magic.

Even though it was such a beautiful scene, there was no magic used to promote or describe the Linlin Scenic Area.

This time, the Linlin Scenic Area used this word, which meant that it was definitely not simple.

Therefore, Linlin Scenic Area was definitely going to do something big tomorrow.

The next day.

The tourists from other places of the Linlin Scenic Area had been paying attention to fairy tale mountain since early on.

It was the same for the reporters. They had arrived outside fairy tale mountain early.

[Chapter 1394 Is This Magic? It Covered The Entire Mountain In! Short Time](#)

Many tourists even came here of their own accord and waited here, wanting to know what would happen on fairy tale mountain at the first moment.

At this moment.

By then, Qin Lin had already driven to Linlin's laboratory, which was a multimedia room.

professor wang and lin lanzi were already waiting inside.

The two of them were looking at an image on the screen. It was the scene of fairy tale mountain captured by a drone.

When they saw him, the two of them immediately went up to greet him.

"What's the situation?" Qin Lin asked.

He was naturally asking about the installations on fairy tale mountain. Those were all modified from the Goblin Gloves. Now that so many were installed on fairy tale mountain, it was to turn it into a frosty Fairyland. When the time came, under the fluorescent light at night, fairy tale mountain would look even more fairy-like, even more magical, and even more shocking.

Professor Wang explained, " Chairman Qin, it's all ready. We're just waiting for you. You just have to press this button later, and all the devices will start at the same time and launch the frost. Now, we're just waiting for you to press this button.

qin lin saw the button.

in fact, he felt that there was no need to do this. professor wang and the others could do it themselves. there was no need to wait for him.

However, he could understand professor Wang and Lin Lanzi's thoughts, so he did not say anything and pressed the button directly.

Almost at the same time, professor Wang and Lin Lanzi fixed their eyes on the image on the screen.

On fairy tale mountain, as soon as Qin Lin pressed a button, the launch devices were activated almost at the same time. Frost erupted and spread rapidly in all directions. Almost all the areas that it passed through were rendered into a frosty white.

This situation was happening all over fairy tale mountain.

Professor Wang saw this scene through the drone. He was excited. After all, this was his rhythm.

Lin Lanzi saw this scene. Even though she had heard about it from professor Wang, her eyes still widened in shock when she saw the frost spreading.

the two of them were already in such a state despite being prepared, let alone those who were not prepared, especially the reporters and tourists gathered outside fairy tale mountain.

In just a moment, someone exclaimed, " "My God, look at fairy tale mountain!"

In fact, the others had also seen it. Everyone watched helplessly as the entire fairy tale mountain was quickly covered by a layer of white snow.

Everyone was dumbfounded. This scene was indescribable, as if it were a special effect from a movie.

It was as if there was really a magician casting a spell to seal the entire mountain in ice.

Now, they seemed to know what magic the official account of Linlin Scenic Area meant.

On the mountain opposite fairy tale mountain, Liu Hua was directing the construction workers. He was surprised to find that he could observe fairy tale mountain from another angle on the mountain he had contracted, so he immediately got people to start the construction.

If he could not take fairy tale mountain, then he would take advantage of the mountain's benefits.

hua liu was directing the workers when he turned to look at fairy tale mountain. he was shocked.

From his position, he could see it even more clearly. He could see with his naked eyes that the White snow had appeared and its range was expanding rapidly.

In a short period of time, he watched helplessly as fairy tale mountain was completely covered in frost and white.

He was so shocked that he couldn't react."This bi an ..."

In front of fairy tale mountain, the onlookers had also come to their senses. The reporters hurriedly checked their cameras and the pictures they had taken. However, every time they saw it, they were shocked.

The tourists were also crazily taking pictures with their mobile phones. They all knew that this would definitely be the most eye-catching thing.

at the same time, tourists from other places of the linlin scenic area also saw this scene. they looked at the fairy tale mountain that had turned white in the distance and were all shocked.

Was this the reason why fairy tale mountain had been cleared?

Then, there was only one sentence in their minds: linlin scenic area was indeed up to something.

Who would believe that this was happening in real life?

Since when could such a thing be done in reality? if it was a movie, where a grand mage was casting a freezing spell, it would be understandable.

However, this was reality. Where did this great mage come from?

It was just that this magic was so real, it happened in front of everyone.

In a university classroom, Chen Xue and a few of her close friends immediately gathered together after a cry of surprise.

They had been paying attention to the fairy tale mountain for a long time. Now that they had seen the latest video of fairy tale mountain on the internet, all of their pretty faces were filled with shock and disbelief.

Very quickly, the students at the side were all attracted over. When they saw the videos, their eyes were also filled with shock.

It could be said that fairy tale mountain was like a " magic " that instantly bombarded the entire internet, attracting all eyes and becoming the only focus.

Not only on the internet, but in the Chinese hospital, Minister Lu had also been paying attention to this matter.

It could be said that Minister Lu had been paying attention to this matter ever since the official announcement of the Linlin Scenic Area.

He couldn't ignore it. After all, if boss Qin caused trouble, something shocking might appear.

The purification grass, Willow duckweed, body-enhancing medicinal liquid, and so on were enough to explain everything.

when minister lu saw that fairy tale mountain had been frozen in a short time and turned into snow white frost, he stood up in shock.

because it was too unbelievable.

As the person-in-charge of the Chinese Academy of Sciences, he naturally knew about some of the techniques that the Chinese Academy of Sciences had. They had the techniques to create snow, but they could not do such a thing.

It was impossible to freeze a mountain at this speed, but Linlin's laboratory had done it?

"Is this professor Wang's technology?" Minister Lu remembered professor Wang's thesis.

A few academicians said that professor Wang had the ability of an academician, and many academicians might not even be as capable as professor Wang.

Moreover, everyone was also curious about what professor Wang's research results were.

He seemed to know now.

It was simply unbelievable that a mountain could be frozen at such a speed.

He even thought that if this ice seal was further studied and turned into an even more powerful freezing power, would it become a very powerful weapon?

Even at this level, it seemed like it could be used in many ways.

For example, bubble grass could be used for fire protection now. What if this freezing power was matched with bubble grass? It was a godly weapon for firefighters.

The key point was that he had studied how to deepen the freeze and turn it into a weapon. He felt that he had to go to boss Qin's place.

as he thought about it, he immediately said to his secretary, " "Arrange a ticket to Ming city for me."

"Okay!" The Secretary immediately nodded.

...

Linlin fairy tale mountain.

More and more reporters and tourists were waiting for them. They all wanted to enter fairy tale mountain to see what was going on.

After a long wait, fairy tale mountain finally reopened.

It was already evening, and tourists and reporters were all rushing into fairy tale mountain.

because the launcher had just fired the frost, the entire mountain was still a little cold, but these tourists didn't care about that at all.

after entering fairy tale mountain, they were completely shocked. the entire mountain was really covered in frost. the trees and grass were all covered in a layer of white.

It was a magical feeling. In the South, this kind of frost would only appear during special seasons, and it would not last for a long time.

The current state of fairy tale mountain was just right. Since all the plants were covered in a layer of frost, it did not hurt them at all.

This was too unbelievable.

the scene in front of them was already so perfect and shocking. but at night, the tourists in fairy tale mountain were even more shocked.

Fairy tale mountain was originally covered in fluorescent light at night, so it should have been very beautiful.

Now, fairy tale mountain was covered in a layer of frost. Under the refraction of the frost, the fluorescent light actually reflected other colors. Especially when it passed through the frost, it became even more fantasizing and perfect, as if it were a real Fairyland.

this scene made all the tourists who were standing in the middle of it stare in a daze. they could only take out their mobile phones mechanically to take pictures of everything in front of them.

[Chapter 1395 Ice-Sealed Weapon + Special Armor? 1](#)

The next day.

The video of fairy tale mountain's transformation was quickly uploaded to the internet by the tourists and reporters. It became a hot search at an incredible speed and spread.

Countless netizens had seen and witnessed the shocking scene on fairy tale mountain.

This shocked all the netizens who saw it.

I didn't expect that Linlin Scenic Area would really perform magic after we talked about it!

when I first saw the video, I thought I was watching a video with special effects. I only confirmed that it was Linlin fairy tale mountain after a few times.

" i can only say that it's amazing. other than the linlin scenic area, there shouldn't be any other place that can do this. "

"....."

The netizens who saw the frozen fairy tale mountain and the fluorescent refraction of the beautiful scenery under the ice at night were all shocked.

This scene was unbelievable to anyone.

More and more tourists were attracted to you city, and the result was that you city's 5th Ring Road was finally blocked.

Minister Lu was sitting in a car. He was stuck in traffic for a long time, and he walked less than 100 meters in five minutes.

Countless people had been attracted by what had happened on fairy tale mountain. They all wanted to see the mountain that had been frozen in such a short time.

On the road, the people on duty were also sweating profusely.

They hated this kind of situation the most.

Once you city was stuck in traffic, it meant that they had to work overtime, and it would take a long time.

After two hours, Minister Lu's car left you city and headed for Linlin Manor.

Fortunately, there was a special passage to the Linlin Manor, so there would be no traffic jam. Otherwise, the road to the Linlin Scenic Area would still be blocked.

Along the way, Minister Lu soon saw the frozen fairy tale mountain.

Thinking of the video he had seen on the internet, he couldn't help but take a few more glances at fairy tale mountain.

After arriving at the parking lot, Minister Lu got out of the car with two old men. The two old men were both academicians in weapon research.

since he guessed that professor wang's ice-sealing technology could be further studied in the direction of weapons, he naturally had to bring two weapons experts.

Minister Lu immediately led his men to Qin Lin's office.

At the same time, in the office.

Qin Lin was controlling his character to enter the lake mine and start digging.

[congratulations, you have excavated a special soil.]

[congratulations, you have excavated a special soil.]

【.....】

A series of notifications appeared.

He was unlucky? however, this excavation kept producing special soil.

Was he lucky? He really didn't need too much special soil now.

qin lin finished excavating the first floor. when he was considering whether to continue excavating, there was a knock on the office door. minister lu hurriedly came in with two people.

"Minister Lu!" When Qin Lin saw Minister Lu, he seemed to understand his intention and asked, "You're here for professor Wang's ice-sealing technique?"

This transmitter was very magical.

When he first saw it, he guessed that it could be used to make weapons.

Think about it, as long as the power was strong enough, it could instantly freeze people. If there was such a range, what strategic significance would it have after in-depth research?

That was simply unimaginable.

If he could think of it, it was impossible for Minister Lu and the others to not think of it.

minister lu didn't deny it. he said, " yes, i brought two academicians with me. they want to see the specific situation of professor wang's technology. perhaps, after in-depth research on this technology, it can become a weapon research direction. "

" okay, let's go to the laboratory to find professor wang. " Qin Lin nodded and led Minister Lu and the others out of the office. They got into the car in the parking lot and went straight to Linlin's laboratory.

At the same time, he also contacted professor Wang.

Soon, he brought Minister Lu to the lab where professor Wang and his team were studying the Goblin Gloves.

When professor Wang saw Qin Lin and his group, he immediately went forward to greet them.
"President Qin, Minister Lu, and two academicians!"

Of course, he recognized Minister Lu. After all, he was the person in charge of the Chinese Academy of Sciences. How could he not know who was doing research?

As for the two academicians, they were also very famous. They were experts in weapons, so he knew them.

when minister lu saw professor wang, he immediately complimented him, " professor Wang, I've heard a lot about you. Your thesis has amazed a few academicians at the Chinese Academy of Sciences. This time, your technology has completely shocked us.

when professor wang heard this compliment, he suddenly felt a little guilty. after all, he knew what the thesis and technology were about. it was ready-made technology, and he was just cracking it.

The key was to be praised by Minister Lu. It was too easy for a researcher like him to be excited by the other party's status.

However, he also felt that something was wrong.

Previously, he had guessed that the technology might be related to the Chinese Academy of Sciences, but now, after hearing what Minister Lu said, it seemed to have nothing to do with the Chinese Academy.

this filled his mind with curiosity.

However, he wasn't stupid enough to ask such questions.

" professor wang, " qin lin said, " show the two academicians the details of the frozen launch technology. "

Professor Wang nodded and went to the side to find a stack of relevant information.

This kind of research data was usually not shown to others. After all, it was experimental data and had to be kept confidential.

However, since the boss, Chairman Qin, was here and had personally ordered it, it was nothing.

Minister Lu took the documents and handed them to the two academicians.

The two academicians immediately found a place to sit down and began to watch the movie.

[Chapter 1396 Ice-Sealing Weapon + Special Armor? 2](#)

Time passed.

After a while, the two academicians were getting more and more excited.

Before he finished reading the whole content, one of them reported to Minister Lu, " it's entirely possible to further research in the direction of weapons. However, it's not a large-scale launch like professor Wang's. It still needs to be condensed at the beginning. For example, a frozen weapon the size of a palm can be further studied in this situation.

Qin Lin couldn't help but be surprised.

This fellow was quite impressive. He thought that the Goblin Gloves were only the size of a palm, which was the most primitive state.

It might be the best way to deepen his research in this situation.

another academician also echoed, " if the preliminary weapon research is successful, it might be possible to research a weapon that can freeze a large area.

Minister Lu didn't hesitate to say to Qin ran, " "Boss Qin, I wonder if you can share this technology with the Chinese hospital."

Minister Lu was a little embarrassed when he said this. However, weapons research was related to the strength of a country. This was very important, so he had to be thick-skinned.

that's not a problem. Qin Lin nodded decisively. Minister Lu, you can make a copy of the information and go back.

Qin Lin knew that he couldn't refuse this kind of thing, and he didn't have to.

After all, no private laboratory in the country had the ability to research weapons.

It was the same for the qianlin laboratory. Therefore, since they couldn't research weapons, they just kept the current basic technology. They would leave it to the higher-ups to deepen their research on weapons.

Minister Lu was relieved to see Qin Lin agree so decisively. He immediately said, "Boss Qin, don't worry. I'll report this to the higher-ups. They won't compensate Linlin's laboratory."

this was also necessary.

The higher-ups knew that they couldn't just take things from a laboratory like Linlin laboratory, which had made great contributions. Otherwise, it would only suppress their enthusiasm.

While the two sides were having a good conversation, a researcher suddenly ran over and reported, " professor Wang, the analysis of the special fabric has been completed. It can be reassembled.

Professor Wang's eyes lit up and he immediately said, " "Let me see!"

The researcher immediately handed over a research report. Professor Wang took it and looked at it. The data on it shocked him. this data is too unbelievable!

Qin Lin guessed that the fabric fiber must have been cracked from the Goblin Gloves 'outer skin.

In addition to the internal firing components, the Goblin glove's outer skin was also very tough. Even with the strength he had gained from eating two fruits of the tree of power, he could not cut it open with scissors.

moreover, judging from professor wang's shocked expression, he knew that the test data must be incredible.

minister lu and the two academicians were attracted by professor wang's appearance.

After all, in the eyes of the three of them, even if professor Wang had the ability of an academician, if something could shock him, they would probably be shocked too.

that meant that this thing wasn't simple.

The two academicians looked at the data of the special fabric fiber and were in disbelief.

"This is unbelievable."

"Is this data real?"

Although they were academicians in the field of weapons research, sometimes combat suits and weapons were inseparable, so they could still understand the research on fabric fiber.

the fabric in professor wang's hands was five times better than the fabric made with the best technology in the chinese academy of sciences.

after all, the chinese academy could directly make all kinds of combat uniforms with this kind of fabric.

Then what did it mean for all the data to be five times higher?

Originally, the combat uniform could be cut open by sharp blades. Now that its toughness had increased by 5 times, even a sharp blade would only be able to leave a scratch on it. Unless one had great strength, they could only cut through the cloth.

However, it was obvious that no matter how much training an ordinary person received, even if they had reached the level of a Special Forces soldier, they would not be able to do this.

minister lu's eyes immediately lit up. " is this a complete set of weapons and combat uniforms? " And their skills were all so magical?

Right, there was also the body-increasing medicinal liquid that could train special soldiers.

What would happen if the soldiers trained by the body-increasing medicinal liquid were to use these weapons and combat uniforms again?

Minister Lu was a little excited when he thought about it. Could this be considered a super soldier in the movies?

"boss qin, professor wang," he quickly asked, "is there any technology to make finished fabric with this special fabric fiber?"

"The fabric fibers can already be reassembled," professor Wang immediately explained, "making cloth is no problem."

boss Qin, " Minister Lu said, " one more thing. The Hua hospital wants to buy Linlin's special fabric fiber technology.

This seemed to be within Qin Lin's expectations.

he smiled. " that's not a problem, minister lu. after all, this technology doesn't seem to be very useful in linlin's laboratory. "

After discussing the two technologies with Qin Lin, Minister Lu hurriedly went back with his men.

The plan for special freezing weapons and special combat suits was not just a thought.

After returning to the Chinese courtyard, Minister Lu arranged the two plans as quickly as possible.

at the same time, he also instructed his men to start making professor wang's ice and snow launcher.

These transmitters were all used in fairy tale mountain.

After seeing this technology, Minister Lu thought of a use for it, which was to use it for fire control.

After all, with the help of the grass, firefighters could abandon the need for heavy oxygen tanks in some fire sites and could better complete their tasks.

If there were ice and snow launchers, as long as they were fired in the fire field, could they easily put out the fire?

This was also what Minister Lu was looking forward to.

With the power of the Hua hospital and the ready-made technology, they could make several launchers very quickly, and then they were also arranged to be sent to the first fire station in Jing.

This was because there was the largest fire training ground here.

He had tested the bubbles that grew from the bubble grass here, and they had been very effective.

In the training ground of the fire station, several firefighters were obviously training in a different way from normal training because they abandoned the oxygen equipment and only chose to wear a bubble on their head. Moreover, they were wearing a specially newly designed fire suit, which matched the bubble perfectly.

Currently, the production of bubble grass was limited, so there were not many bubbles assigned to them. They could only specially train a team of elites.

Just as the team of elites picked up the fire extinguisher and was about to enter the fire field, an escort vehicle drove in, accompanied by the equipment department's chief.

This scene made everyone stop.

The chief of the equipment department immediately shouted to the firefighters with bubbles, " come quickly to collect the new equipment and learn how to assemble it.

That equipment was the ice and snow launcher made by the Chinese Academy.

The firefighters didn't dare to hesitate and immediately went to get the launcher. Then, under the guidance of the people sent by the Hua Academy, they learned how to assemble the launcher.

After that, the firefighters carried the launchers into the experimental fire field and assembled them.

When the launchers were assembled, they pressed a button in their hands at the same time.

In an instant, they saw a layer of white mist being sprayed out from the launcher they had installed. The mist quickly turned into frost and spread.

They were the first to bear the brunt. They only felt that everything in front of them was white, and their entire field of vision had turned into frost.

Outside, the other firefighters and the equipment department's chief looked at the situation in the training ground. Their eyes were wide open in shock. They only felt a white blur quickly pass by, and then they saw the moving flames quickly go out. The entire training ground was covered in white.

this ... the equipment department director's eyes widened in shock.

He immediately recalled the case of the fairy tale mountain in the Linlin Scenic Area being frozen. The situation in front of him was obviously the same.

He was wondering what kind of technology the Chinese Academy of Sciences would give him, but he didn't expect it to be this.

[Chapter 1397 The Linlin Laboratory Should Be Renamed To The Chinese Academy Of Sciences](#)

Beijing.

Minister Lu had been waiting for the news since he sent the ice-sealing launcher to the first fire station.

Not long after, his Secretary rushed in and handed him a video. the fire department sent over the test video of the ice-sealing launcher.

Minister Lu immediately took the video and watched it.

The video started with firefighters wearing the latest bubble Fire Fighting Suit assembling a launcher.

as the video continued, the launchers were sent to the training ground.

Then, something shocking happened.

a layer of snow white frost appeared on the flame and the flame was extinguished.

Minister Lu was shocked by the scene.

How easy would it be to put out fires in the country in the future?

Moreover, building a house not only required a fire hydrant, but also an ice-sealing launcher.

Some of the fire sites did not even need the fire trucks to go to them. They only needed one firefighter to start the ice-sealing launcher.

"Pass down the order to speed up the production of the ice-sealing launcher." minister lu instructed his secretary and then began to write the report.

He hadn't even reported to his superior about the technology he had obtained from Linlin's laboratory.

The next day.

Minister Lu had just finished writing the report. During this period, he even changed and polished it a few times. Then, he printed it out and went to the office of a leader.

Xiao Lu, when I saw the information you brought, I guessed that you must have developed some new technology. The leader saw Minister Lu and said with a smile.

He knew the functions of the Chinese Academy of Medicine. The other party would not usually disturb the leaders, especially his side. Once they came, there would definitely be a surprise.

"Leader, please take a look at the information first." Minister Lu handed over the information with a smile.

The leader took a look at the documents and realized that there were three more.

The first one was about the frozen launch technology. It said that the technology had matured and could be used in the fire industry.

is there a video of the icebound launch technology? " The leader asked.

Minister Lu nodded and immediately took out his mobile phone to show the leader two videos, which were the picture of fairy tale mountain freezing and the fire station freezing and extinguishing the fire.

The leader was shocked after watching the two videos. Then, he immediately asked, " "This technology is really amazing, but is there any way to research this technology into weapons?"

Obviously, anyone could see this. Sometimes, the cold was the worst enemy on the battlefield. If one could create their own cold, or even have enough cold to freeze people, it would be unimaginable.

"leader, you can take a look at the information at the back," chief lu and ma shan said.

The leader, Ma Shan, flipped to the information at the back. The next piece of information was about the deepening of weapon research on the ice-sealing technology.

After seeing the information and the research plan, the leader immediately said, " put in more effort into this research!

"Alright!" Minister Lu nodded.

Then, the leader saw the last piece of information, which was the research plan for the special fiber combat suit. He was shocked again."It's 5 times better than the best battle uniform we have right now?"

The leader was so shocked that he stood up from the table.

He knew what this meant and exclaimed, " "Xiao Lu, the Chinese People's Hospital is really something. This kind of technology has appeared one after another. If these ice weapons and combat uniforms were to be released, it would probably be the greatest achievement for individual weapons in recent years."

leader, " Minister Lu immediately explained, " this technology actually comes from Linlin laboratory. I just came back from there and got the technology from boss Qin.

"What?" The leader was surprised again. He wouldn't be surprised if these skills were an achievement of the Chinese People's Hospital.

After all, the Chinese Academy of Sciences was their most powerful Research Center.

But now, these two technologies were from Linlin's laboratory?

One had to know how much technology Linlin's experiment had produced in this period of time.

In the past, it was only research on plants. Now, there were other scientific results.

this speed was even more like a brothel than a brothel.

The leader subconsciously asked, "could this be the research results of that boss Qin and academician Li Kai?"

these two were also on it by name. such powerful researchers were treasures in any country, a huge treasure.

The two special academician positions were approved by another leader.

minister lu quickly shook his head. " this isn't the work of boss qin and academician li kai. it's the work of a professor wang. this professor wang might be more capable than most of the academicians in our institute. "

"Another professor Wang?" This leader really couldn't stay calm anymore.

Why were there so many people in Linlin's laboratory?

For a private laboratory like this, it was already rare to have someone like academician Li Kai, and now there was boss Qin.

This was another professor Wang.

if there were two more professor li and professor zheng, then linlin laboratory would be even more prestigious than the chinese academy of sciences in some aspects.

However, this kind of thing should be very rare, right?

There was no reason for any talent to go to Linlin's laboratory, right?

.....

Time passed.

fairy tale mountain was still popular and full of tourists.

As it was not winter, the frost on fairy tale mountain would dissipate. Therefore, the transmitter was activated twice during this period. At least, it would be repeated during the period when the temperature and popularity were the highest.

But this was hard for you city's traffic police. The Fifth Ring Road could still be blocked, and it was blocked more than once or twice, and the time was very long. Who could they find to reason with?

You city.

In a meeting room.

Sun Xian helplessly said to the crowd, " as everyone knows, the Fifth Ring Road has just been completed. But now, it's blocked again. So, the purpose of today's meeting is to solve the road problem.

I've discussed it with Chen Xian and a few others. We'll continue to build two outer rings. So, let's discuss how to build them.

Everyone in the meeting room fell silent.

They were just a County.

Have you ever seen a County that has passed the fifth ring? Not to mention the traffic jam after passing the Fifth Ring Road?

However, for a city, this was something to be proud of.

" why don't we build the outer ring directly from guanglin village this time? " someone suggested. " guanglin village is the closest village to you city. "

I think it's possible, " another person said. Guanglin village is also within the demolition scope of the new district next year. This is good. The two newly built outer rings can also be next to the new district.

Someone else said, " but if that's the case, the outer ring will be away from Linlin Scenic Area. The biggest reason for the traffic jam now is the tourists in Linlin Scenic Area. If that's the case, it'll take even more effort to trim the outer ring to get closer to Linlin Scenic Area.

For a time, the meeting room was in a lively discussion.

Linlin Manor.

Another person came into Qin Lin's office. It was Minister Lu.

while making tea, minister lu said, boss Qin, your laboratory has decided to mass-produce the icebound launch technology. It will be used for fire protection first. You may not know how powerful the icebound launch technology is for fire protection. It's simply a heaven-defying weapon.

I believe that with this, our nation's overall ability to fight fire will be able to reach a higher level. In the future, there will be fewer firefighters who will be sacrificed.

also, the ice-sealing technology is in the process of in-depth research into weapons. In addition, we've already begun trying to make combat uniforms with special fibers.

Minister Lu's words sounded like a report, but it wasn't a report. Since he had obtained the technology from boss Qin, he had to share the progress of the technology.

This kind of information was generally not allowed to be spread to the outside world, and was even strictly confidential.

however, the other party was boss qin, so it didn't matter.

"Then I wish you all the best." qin lin said with a smile and poured another glass of water for minister lu.

Minister Lu took a sip of tea and suddenly asked, "Boss Qin, it's actually best for the research to have the research and development team participating. I wonder if it's possible for professor Wang to come to our Chinese Academy for a while and help us lead these projects?"

Qin Lin was stunned.

They were trying to poach him.

However, he really didn't care about professor Wang.

Even without professor Wang, he still had professor Li, professor Wu, and professor Lin.

At the very least, going to the Chinese Academy of Sciences was a good thing for professor Wang. He could have a better future.

He could just get another professor to take care of Optimus Prime and Wei zhentian.

Therefore, he called professor Wang in front of Minister Lu.

After the call went through, professor Wang's respectful voice came through, "Chairman Qin, do you have any orders?"

"Professor Wang," Qin Lin said into the phone, "Minister Lu is with me right now. He wants you to go to the Hua hospital for a walk."

"I'm not going. I'm at Linlin's laboratory!" professor Wang didn't wait for Qin Lin to finish his sentence and immediately said.

His rejection was very decisive.

Even Minister Lu was dumbfounded.

He felt like professor Wang was disdainful of Dao Hua hospital.

This made him feel very helpless. Professor Wang was so devoted to Linlin laboratory. It seemed that the research atmosphere in Linlin laboratory was really as good as the outside world said.

That was why a truly capable person like professor Wang was so willing to stay in Linlin's laboratory for research.

In Linlin's laboratory, professor Wang hung up the phone and immediately breathed a sigh of relief.

Are you kidding me?

He knew what he was capable of. Wouldn't he be exposed if he went to the Hua hospital?

His research was based on the things that Chairman Qin had given him. It was not his true strength at all.

But this made him even more suspicious. The things that Chairman Qin gave seemed to have nothing to do with the Hua Academy. Otherwise, they wouldn't have invited him.

Just as Qin Lin put down his phone, it suddenly rang. It was a call from Shen Li.

Qin Lin answered the phone and said to Minister Lu, " " minister lu, president shen has made the arrangements. we can go now. "

"Yes, let's go!" Minister Lu nodded his head.

He naturally had a purpose for coming here.

[Chapter 1398 Optimus Prime Vs Megatron 1](#)

After Qin Lin and Minister Lu left Linlin Manor, they got into the car and went straight to a test site in Linlin's laboratory.

The purpose of Minister Lu's visit today was that the first batch of Linlin rice was almost ripe. After this batch of seeds was harvested, they could promote the Linlin rice on a large scale.

Therefore, 'he Xia's cool dream' was about to be realized all over the country.

It must be known that the cold dream under the grain was their country's ultimate dream for rice. Since it was related to Linlin rice, he naturally had to pay attention.

The car quickly arrived at an empty simple parking lot. The security guards of Linlin's laboratory were already waiting.

There were many cars parked in the parking lot because there were many people.

"Chairman Qin!" The security guard in charge immediately greeted Qin Lin when he saw him.

Qin Lin nodded and walked in with Minister Lu. They had just turned a corner when a shocking scene appeared in front of them.

A special forest appeared before his eyes, with trees crisscrossing the area.

those were linlin rice, and each stalk was much taller than a human.

Shen Li had already brought the people from the laboratory to investigate.

If one were to walk in, one would probably be completely submerged in it.

there were also people taking videos at the side. from the logo on the recording equipment, it was the official news channel.

This was also arranged by Minister Lu.

"He Xia's cool dream!" To their country, this was not only a great achievement and glory, but also a motivation.

therefore, recording a piece of news was a great motivation for the entire nation.

The reporters' cameras were already pointed in one direction, where Li Kai could be seen in a cooperative pose.

He was a little helpless. He really didn't want to participate in this kind of TV show.

However, this was the official news channel. The higher-ups had given him special instructions, so he had no choice but to cooperate.

After he got into position, Li Kai heard another news producer say, " "professor li kai, can you please send another group of photos of the daily inspection of the ears of rice?"

Li Kai sighed deeply when he heard this, but he also cooperated helplessly.

qin lin and minister lu walked to the rice field. to be honest, the field in front of them could not be called a rice field anymore. they could only feel the shock when they got close to the tall rice, especially when the fields were connected together and the scene was endless.

Qin Lin accompanied Minister Lu to check for a long time before returning to the manor. He asked Master Lin to make a medicinal meal for Minister Lu.

after that, minister lu also left with the people from the official news channel and returned to the capital.

Not long after, the official news channel was broadcasting news about Lin linmi.

When the news came out, it shocked everyone, especially the image taken by the drone in the sky. It was truly shocking. People really looked very small under the rice.

Naturally, she felt touched and reminiscing, even sad.

"He Xia's cool dream" was something countless people had heard of and talked about. There were even countless people who knew that this was the old man's lifelong obsession.

The old man had been studying rice so that everyone in the country could eat rice. However, the old man's only regret was that he had not fulfilled his 'dream of enjoying the cool breeze under the grain'.

now that someone had completed it for the old man, the old man would definitely be very happy. naturally, many netizens also thanked li kai.

thank you, academician Li Kai. He helped the old man and everyone achieve this dream!

academician Li Kai will be my only idol from now on!

"....."

This news inevitably made it to the hot search and even dominated the hot topic of the day. No celebrity or internet celebrity could stand out.

In fact, a certain music platform had already come to a conclusion, and that was to avoid news about Linlin's company. Once Linlin's company stirred up trouble, everyone's popularity would drop.

Unless, at this time, news of another Linlin's company appeared, and only news of Linlin's company could emerge in the heat of the news.

Moreover, a piece of news about 'Linlin-bone strengthening wine' also made it to the hot search.

Price-9999.

This price for a bottle of medicinal wine was something that many people would not even dare to imagine. It was almost a sky-high price.

In fact, most people would not even look at the medicinal wine that appeared on the market.

However, the name of this wine was Linlin-bone-strengthening wine, a product of Linlin company. That was a different story.

This was because Linlin company's products were absolutely worth the money. The price determined the quality.

Therefore, Linlin-bone strengthening wine was selling like crazy, especially after people knew that this wine had the effect of strengthening bones and treating osteoporosis.

Elderly people were most afraid of osteoporosis and problems with their bones.

Once the elderly had a problem in this area, it was no longer a problem of 9999 Yuan. Long-term nutrition supplements would exceed this amount.

If anything happened to the old man and he was injured, the cost would be even greater, and he might even have to bleed a lot.

Now that Linlin's company said that the wine had such an effect, it must be true. He must buy it.

moreover, linlin company didn't disappoint. those who bought the linlin-bone strengthening wine all felt the effect of the wine.

Everyone who had taken the wine felt it. Some people even went to the hospital to check the data and confirm the effect.

Therefore, the effects of the Linlin-bone strengthening wine were quickly spread on the internet.

[Chapter 1399 Optimus Prime Vs Megatron \(2!](#)

When the netizens saw these videos, they felt that it was a little fake. Her osteoporosis had improved in one night after drinking this medicinal wine?

This was a little heaven-defying.

however, since it was produced by linlin company, it didn't seem impossible for her to be qianqian.

In a short time, the whole internet knew the effect of Linlin-bone strengthening wine.

in the orthopedics department of the first hospital of ming city, department director chu was suddenly enlightened when he saw the news.

When he had examined old master Li, he had been curious about what kind of medicinal wine old master Li had drunk that could loosen his bones and heal them so quickly overnight.

Now he knew that it was because of this Linlin-bone strengthening wine.

Moreover, he felt that Ying Gao should have thought of this long ago. After all, academician Li Kai was in you city. The Linlin wine factory's Linlin medicinal wine was very famous. What else could the medicinal wine that old master Li drank be other than the wine from Linlin company?

ming city.

As a city under you city's jurisdiction and the nearest big city to you city, Ming city would usually be the first to enjoy the new products of Linlin company, other than you city.

Linlin-bone strengthening wine was the same. With the distributors, the medicinal wine quickly entered the market. However, the medicinal wine was still limited and difficult to buy.

Chi Cheng and his girlfriend, Zhu Min, visited several markets before they finally bought two bottles of Linlin-bone strengthening wine.

after buying the two bottles of wine, the two sips were relieved.

"I've finally bought it. I've got the gift for your visit this time," Chi Cheng said with a face full of surprise.

His girlfriend nodded happily. okay. Let's go back and prepare. Then, we'll set off!

Her father had never liked her as a boyfriend, mainly because her boyfriend's family was poor and he had just graduated and had no future.

His father had been injured in the past and suffered from rheumatism and bone pain in several places. Moreover, it was frequent rheumatism and bone spurs.

what is frequent rheumatism and bone pain? Even on hot days, it would act up for no reason. It was definitely a huge torture.

this wine from linlin winery was very useful to his father. his father's colleague's old master had used this wine and his severe osteoporosis had improved.

Chi Cheng and his girlfriend went back to their place to prepare, then headed to his girlfriend's house.

The person who opened the door was his future mother-in-law. She was a very nice person and treated him well, even though he was only her daughter's boyfriend.

His future mother-in-law had said that even if he couldn't afford a house now, as long as he treated his girlfriend well, the other party's family would help him with the down payment.

He knew that his girlfriend's family didn't lack money, but his future father-in-law's attitude was bad and he looked down on her from time to time. It really made him feel bad.

Sure enough, as soon as he entered the door, his future father-in-law was angry.

Chi Cheng could only sit down awkwardly.

However, as soon as he sat down, his future father-in-law said, " "I say, Chicheng, you're so silly."

But at this moment, his girlfriend took out two bottles of Linlin-bone strengthening wine from the box and placed them on the table.

Chi Cheng saw his future father-in-law suddenly stop talking when he saw the wine. His eyes were fixed on Linlin-bone strengthening wine.

Because he had been thinking about this wine for two days.

he had drunk a cup of it at his colleague's place before. the other party had bought it for his grandpa to treat his osteoporosis.

He knew the effect of the wine from that one glass because his frequent rheumatism and bone pain had acted up.

Therefore, he wanted to buy a bottle even more. Unfortunately, he had been to all the medicinal wine markets he was familiar with, and he couldn't buy a single bottle.

He didn't expect his daughter to take out two bottles.

at this time, chi cheng also received his girlfriend's signal and immediately made up a story, " uncle, i ran all over ming city to find this wine. i know it's good for your rheumatism and bone pain. "

His future father-in-law frowned when he heard this. He was obviously in an extreme dilemma.

He really wanted this wine, but he was really not satisfied with this future son-in-law.

what was good?

In the end, he sighed and said, "pour me a glass of wine to try." &Nbsp;

Hearing this, Chi Cheng's face lit up. He immediately opened a bottle of Linlin-bone strengthening wine and poured it for his future father-in-law.

In the following time, the whole internet was full of praise for the sweet and sour rice and Li Kai, or more and more netizens said that after buying Linlin-bone strengthening for the elderly in their families, the effect of the medicinal wine was too strong.

Therefore, many elderly people's request for their children was to buy Linlin-bone strengthening medicinal wine for themselves.

...

Linlin Manor's main hall.

The sound of squeaking rang out.

He saw Xiao Wu carefully walking there, little treasure was guarding at the side, and under Xiao Wu's feet, two little parrots trembled as they walked.

The two little parrots could already get out of the breeding box. They flapped their little wings and were obviously very happy.

Qin Lin just watched from the side.

He didn't understand what was going on with Xiao Wu and Xiao Bao, but under normal circumstances, parrots 'attitude towards their Cubs was definitely not the same as these two.

however, these two weren't parrots in the real world. they had such high intelligence that it would be strange if they were like ordinary parrots.

After all, feelings originated from intelligence.

after playing for a while, the two little parrots were tired. qin lin immediately went forward, picked up the two parrots, and put them into the incubator.

After washing his hands at the sink, Qin Lin went to the parking lot and got into his car, heading to Linlin's laboratory.

In the new laboratory, Qin Lin had just arrived when professor Wang came out to welcome him. Naturally, he had come today because Optimus Prime and Megatron had made new progress.

qin lin followed professor wang to a transparent glass window.

Through the glass window, he could see that it was a very large open space.

Professor Wang pressed a button and the space inside lit up.

On the ground, two thin steel skeletons stood up!

The steel skeleton had all four limbs. It was Optimus Prime and Megatron. However, the exoskeleton was made of ordinary plastic, so it looked very thin.

Professor Wang took out two sets of sensor equipment.

Qin Lin put on one of the sensors and moved it slightly. Optimus Prime moved along with him.

She waved, kicked, squatted down, and walked around.

Optimus Prime, who was inside, also did the same action, almost in sync.

Professor Wang's creation of the sensor device was obviously perfect to the extreme.

Qin Lin controlled the Optimus Prime again, then remembered the day he saw Elba playing with the Goblin girl in the game Forest.

"Professor Wang, you should also bring a sensor," he said to professor Wang.

Professor Wang nodded. He immediately put on the other set of equipment after hearing Qin Lin's words.

He also tried to move his hands and feet, and Wei zhentian also began to move.

It was also a 100% reaction!

Professor Wang was very satisfied with this. After all, he had completed Chairman Qin's task.

"professor wang, control megatron and attack optimus prime!" qin lin continued.

professor wang was confused, but he still nodded and stepped back, putting some distance between him and qin lin.

Then, he waved his hand forward.

Wei zhentian was also under control and began to attack Optimus Prime.

Seeing this, Qin Lin immediately retreated. Optimus Prime also retreated under his control, avoiding Wei zhentian's attack.

This, on the other hand, stunned professor Wang. He was not used to fighting, especially when he was controlling a mechanical body, especially when his attack missed!

"continue!" Qin Lin shouted.

hearing that, professor wang could only continue to control optimus prime's attack. qin lin continued to retreat and naturally dodged the attack quickly.

Suddenly, Qin Lin moved. He moved forward and made a grabbing motion.

Inside, Optimus Prime also charged forward and grabbed Wei zhentian's arm.

This scene stunned professor Wang.

However, Qin Lin pulled Wei zhentian forward, and Wei zhentian's body was pulled forward, causing him to lose his balance.

qin lin reached out again and made a hugging gesture, and optimus prime also hugged wei zhentian's head.

Qin Lin used the combat technique he had learned from Ma Hong. He bent down and then fiercely kneeled up.

At the same time, Optimus Prime did the same thing. He grabbed Wei zhentian's head and twisted it forward, his knee slamming forward fiercely.

in that instant, optimus prime's knee and megatron's head collided violently, and then the parts of his body were torn apart.

at the same time, professor wang was so shocked that he subconsciously held his head, as if he was the one who was hit in the head.

Qin Lin stopped and looked thoughtfully at Wei zhentian, whose head was already deformed.

this technology might be very interesting in the future.

[Chapter 1400 So Many People In Linlin Company? Their Wish Is To See The Snow?](#)

Time was the most unbearable.

Soon, it was the end of the year again.

this year, to the people of you city, it was different. in the past, when it was winter, they would wear thick coats. however, this year, the weather in you city had changed. no one felt that winter was coming, but in the blink of an eye, a year had passed.

At this time, companies all over the country began to calculate their business for the year and then began to prepare for the company Annual Meeting.

It was the same for Linlin company, especially with regards to the preparations for the annual meeting.

Generally, large companies, especially the leading ones, would contact their partner companies, especially the product sellers, and invite them to attend the company's Annual Meeting.

if these people were really small in size, or if they were ordinary bosses who had to rely on the leading company for a living, they would participate in person. even if the company was bigger, they would send the company's senior executives to participate and bring one or a few red packets as a lucky draw gift at the annual meeting.

Linlin's company's statistics on these red packets this year were enough to make the finance department work overtime.

when the red packets from various companies were gathered at zhao moyin's table, she and qin lin were both surprised by the number.

Linlin pet food company, which was founded the latest, had received 10 red packets for 20000 Yuan, 30 red packets for 10000 Yuan, 70 red packets for 5000 Yuan, and 120 red packets for 5000 Yuan and below.

These were all provided by agents all over the country.

Because Linlin pet food had already swept the country, these distributors had to rely on this product to make a living.

At first, Linlin's Annual Meeting only invited those regional agents and above, not the small agents. But those agents wanted to show off, so they all gave red packets to the invited big agents.

There was no reason for the invited agents not to do something like this to save face.

Linlin pharmaceutical company, Linlin food company, and Linlin laboratory had even more products. After all, these companies had more products and more agents than just one product.

Moreover, many of these products were more expensive, and the agents were richer. The key point was that Linlin's products were so popular that they didn't need to waste too much money on promoting them.

They had saved a lot of money this year, so they weren't stingy at all when they offered red packets for the lucky draw.

In particular, the glasses company and the air conditioner company that chose to cooperate expressed their goodwill.

finally, after some calculations, the highest number of red packets was 40 for 100000, 80 for 50000, 120 for 30000, and 240 for 10000.

The red packet alone was worth 14 million.

This was definitely not a small sum.

There was no need to mention the other small red packets. If he had to draw one by one like before, he would probably have to draw from dawn to dusk, and from dusk to dawn.

Therefore, Zhao Moyu had no choice but to make a plan.

a red packet of more than 1000 yuan might have been the first prize at many company annual parties. at linlin's joint annual party, it was only a consolation prize. dozens of red packets might have to be drawn at the same time to not waste time.

naturally, in addition to the red packets brought by the agents and partner companies, the other companies were also fighting to perform well this year.

For example, Linlin pet food company wanted to bring 10 cars for a lucky draw, each car worth 150000 Yuan, and there were other big and small prizes.

with a wave of his hand, linlin food company's deng guang decided to send 30 sedans.

Then, Linlin medicine company would directly offer two properties and 30 cars.

When Shen Li saw this, he immediately bought four suites and 50 cars.

All of a sudden, 120 cars and 6 suites were blocked by the prizes.

Compared to these, the other prizes were nothing.

Naturally, the money spent was the special funds of each company. It was used for such occasions. It could be said that the better and bigger the company developed, the more special funds there would be.

A company with a lot of specialized funds like this would definitely be a very large company.

Linlin Manor Office.

Qin Lin was sitting at the boss's table, looking at the red packet statistics. Zhao moyin and Lin Lanzi were sitting opposite him.

Zhao Moyu was still in charge of the finance department, so she was responsible for the red packets in the end. Lin Lanzi was responsible for the planning of the Joint Annual Meeting.

Qin Lin returned the red packet statistics to Zhao Moyu and looked at other information. The one that caught his attention the most was the number of employees who attended the annual meeting.

He had never paid attention to the development of each company. He only knew that with the development of each company, the expansion of the factories, and the recruitment of more and more employees.

The final statistics showed that more than 78000 employees attended the annual meeting.

This was definitely a number that he had not expected.

You city's latest statistics on the permanent population were only a few. That was around 600000.

Linlin company had more than one-tenth of its employees. The key was that Linlin's various companies were still developing rapidly, and the factories were still being transplanted and expanded.

Although many of the products were very popular, they had not been fully released to the entire country yet. In the time to come, Linlin's various companies would have a big development.

This was directly provided by Linlin's company, not directly or indirectly affected.

For example, people in the you City Tourism industry or the you city farming industry.

This was probably why industry was more valued by the state, because industry could really benefit more people and create more jobs.

For example, Penguin's market value was four times that of Huawei's, but Huawei could provide five times the number of jobs that Penguin could provide. Therefore, the higher-ups must pay more attention to Huawei than Penguin.
