

The Game 1411

[Chapter 1411 637-A Battle Between Real Transformers!](#)

At this moment, one could see on the screen that the fallen Wei zhentian was placing the workers on Special Transportation Equipment and carrying them out.

When Qin Ren and Qin Long saw this, they did not think much of it and thought that it was a normal game scene.

In Linlin's laboratory, as Wei zhentian was carried to another workshop, several people from Linlin's laboratory immediately went up to check.

It was especially aimed at Wei zhentian's face where he had been elbowed.

one of them finished checking and immediately said to the others, " the face has caved in. The backup plane will be used first. This one will have its face changed and repainted.

Professor Wang rushed to the laboratory and received the exact news. It could be said that this fight would probably cost more than ten thousand Yuan to replace Wei zhentian's damaged face.

Therefore, Chairman Qin wasn't playing for fun or games. He was playing for money.

On the other side, a brand new Wei zhentian had already been transported out.

At the same time, professor Wang immediately operated a computer and connected the security guard's sensor to the new Megatron.

In Linlin Manor.

Qin Ren had also put on his equipment.

Qin Lin asked Qin Ren to familiarize himself with the sensor.

Qin Ren waved his arm, and Optimus Prime on the screen followed his movements.

This was rather surprising to Qin Ren as he had never played such a game in his life. Qin Long was also watching with curiosity.

Qin Ren didn't do anything, but Optimus Prime followed suit. The two of them couldn't help but praise him.

which company made this game? it's so awesome.

"Yes, Qin Ren, let me play a round after you're done."

"....."

as qin long spoke, he even took out his phone and started taking pictures.

he would be letting himself down if he didn't post this game on his moments to show off.

At this moment, a new Megatron was transported into the room and stood up.

this was the scene from linlin's laboratory, but qin ren and qin long still thought it was a real game scene.

Wei zhentian moved and gestured to Qin Ren.

Qin Ren also made a gesture. It was just a game, and sometimes it was self-taught.

However, in the next moment, Wei zhentian made his move. He simply sent out a straight punch to test the waters, and it went straight for Optimus Prime.

Qin Ren retreated subconsciously and dodged the punch.

This made him very excited.

However, before he could even get excited, Wei zhentian had already closed in on him. He punched Optimus Prime's chest heavily, followed by a series of consecutive attacks. In the end, Optimus Prime fell to the ground.

qin ren was stunned.

On the other side, the security guard who was controlling Megatron was also a little confused.

It was because Mr. Qin was so powerful that he couldn't even fight back in the end. Why did he suddenly become so weak that he couldn't even resist for a moment?

...

"It's over?" Qin Ren asked in surprise.

"en!" Qin Lin nodded.

This was because he had asked professor Wang to set a hit value. Once the hit value reached a certain point, the sensor would be disconnected.

This was also to avoid too much damage.

He felt that this could be used to relieve his boredom, but there was no need to do it just for the sake of damaging the mechanical body. That would be a waste of money, and it was simply shameful.

When Qin Long saw that Qin Ren had failed, he also went forward and said, " "Qin Ren, quick, let me try!"

Qin Ren had no choice but to remove the sensor.

He had seen Qin Lin play the game so well just now. After experiencing it himself, he realized that it was so difficult. Perhaps it was because it was his first time playing the game. If he played it a few more times, he might become better.

When Qin Long and Qin Ren were changing their sensors, Optimus Prime was also transported down from the screen. This made the two of them feel like they were in a game.

As long as he failed, this would happen.

What the game probably wanted to express was that after the failure, the player-controlled machine would need to be repaired before it could play again.

After Qin Long put on the good impression device, the new Optimus Prime was sent up. Following professor Wang's operation, the induction device on Qin Long's body was also connected to the new Optimus Prime.

"Qin Lin, can I choose a new role? Optimus Prime is my only choice?" Qin Long suddenly asked.

Qin Lin was stunned. They really couldn't be changed because there were only two models.

unless it was optimus prime against optimus prime or megatron.

However, that would take time to readjust the condition of the sensor equipment.

Qin Ren said, " this must be a new beta game. It's obvious that the equipment isn't cheap. Most people probably can't even get their hands on it. It's not strange that there are only two models now. There might be more in the future.

seeing qin ren's imagination running wild and qin long's agreement, qin lin did not say anything more.

Following that, Qin Long began to control the Optimus Prime skillfully. Then, under Wei zhentian's signal, the battle officially began.

qin ren also took out his phone and started taking pictures.

He was sure that the game had not been officially promoted to the outside world yet, so it would definitely attract attention.

Qin Long had just seen Qin Ren control Megatron, so he had secretly gained some experience. The main thing was that his body's condition and flexibility were definitely better than Qin Ren's. Therefore, when faced with Megatron's attacks, he was able to Dodge Optimus Prime's attacks several times in a row, and he could clearly last longer than Qin Ren.

But in the end, he still couldn't avoid the fate of being KO 'ed, and Optimus Prime was smashed to the ground again.

Qin Long sighed and said with a helpless expression, " this game is really difficult. I've tried my best to avoid it, but I still can't hold on for long. Megatron is too strong. Qin Lin, why don't you do it? you're the one who's truly stunning when you play it. It's really pleasing to the eye.

Qin Lin smiled, took the sensor device, and began to put it on himself.

The two of them were really treating this as a game.

After Qin Lin put on the sensor equipment, a new Optimus Prime was transported out from the screen. The damaged parts of the first Optimus Prime had been replaced and repainted.

Soon, the security guard of the laboratory gestured to Qin Lin again.

After Qin Lin's reply, the fight started again.

this time, qin lin took the lead and started with a heavy knee.

Wei zhentian immediately pressed down with both hands on this knee.

Immediately after, he pushed himself off the ground with both palms, flipped out, and performed a side kick, attacking Optimus Prime like a whip.

Seeing this, Qin Lin reacted immediately and did a backflip to avoid Wei zhentian's attack. On the screen, Optimus Prime also did a backflip and dodged Wei zhentian's attack.

This scene made Qin Ren and Qin Long's liver hurt.

Does one need to learn how to do backflips to play this game?

The game was so difficult.

It could be said that at their age and physical condition, a backflip was simply impossible.

the two of them suddenly felt that if this game was released, would they have no chance to play it?

A f * cking player like Qin Lin would definitely torture them to death!

Qin Lin controlled Optimus Prime and Wei zhentian to exchange blows. His attacks were unusually smooth and fast, dazzling the eyes of the onlookers.

Just as Qin Ren and Qin Long had said, under his control, the battle between Optimus Prime and Megatron was very enjoyable to watch. It could even be said that the game scene on the screen, the real scene, the friction between the metals, and the sparks that shot out were not inferior to the special effects in movies.

After three minutes of continuous battle, Qin Lin's Optimus Prime had defeated Megatron once again.

The security guard's skills were still far from Qin Lin's.

Qin Ren held the phone that was recording the video and sighed with emotion. "Qin Lin, you're amazing." After complimenting him, he asked, " "i've taken a video. can i post it online?"

Qin Lin's eyes lit up when he heard this. He had wanted to put Optimus Prime and Megatron in the scenic Area, but for safety reasons, there were still many technologies that professor Wang had not perfected.

Now, he could put the news on the internet first.

If Qin Ren posted the game on the internet, it would definitely cause a sensation. But what would happen when everyone suddenly realized that it wasn't a game?

Qin Ren was naturally excited when he got Qin Lin's reply. The game screen could really help his private account to attract a wave of traffic and a lot of fans.

Other than the advertising company's account, his private account: Young master Qin also had many fans.

Many people also knew that he was a good brother of academician Qin.

Therefore, after Qin Ren left the manor, he went back to his advertising company and asked the company's staff to help edit the video. Then, he posted the video on his mouyin private account as soon as possible.

The video had only been uploaded to the internet for a short while, but it caused a sensation very quickly. Especially when some gaming fans saw the video, they were immediately shocked and attracted infinite interest.

[Chapter 1412 638-Is This Game Awesome? Copyright Infringement Warning? 1](#)

On the internet, games had always been a very large section. Many people paid attention to this section, and some game fans would even follow video-related videos every day.

Therefore, Short Video platforms would also recommend some game videos to these people according to their personal preferences.

Cheng Dongdong was such a person.

every day, he would pay attention to the game videos on the internet. when he saw games that he was interested in and found fun, he would especially download one to play.

as usual, cheng dongdong walked to the computer after his meal, intending to turn it on to play some games. when he turned it on, he took out his phone and scrolled through Short Video.

In today's society, with a phone in hand, every second was precious. Even when going to the toilet, one had to scroll through the video.

If he saw the videos of two girls who were really ***, he might be able to do some pleasurable things directly.

Cheng Dongdong scrolled through two videos that he was not interested in at all. Suddenly, one of them caught his attention.

this game is too real and too unbelievable!

Cheng Dongdong clicked on it curiously when he saw the word 'game'.

what kind of game was this?

he even took a look at the blogger who posted the video: young master qin!

Looking at the content of young master Qin's video, he was suddenly disappointed. Young master Qin had a lot of fans, but he was not a video game blogger. Instead, he was the boss of an advertising company.

The content posted by this private account was also very complicated. It was probably about daily life, but the daily life of an advertising company's boss could make ordinary people feel immersed in it, so it could attract a lot of attention.

However, he still clicked on the video in the end.

He clicked on it and saw a person with some unknown equipment waving his fists and dodging.

if qin ren was here, he would definitely recognize that it was him.

He had edited the video of Qin Long filming him into the video.

Cheng Dongdong's eyes widened as he stared at the screen in disbelief.

On the screen, Optimus Prime seemed to be doing the same thing as the other person.

however, in the next moment, optimus prime had been defeated by wei zhentian, so he could not be sure.

then, the person in the video changed.

Naturally, it was Qin Long's turn to play.

after putting on the sensor, he began to control optimus prime.

this time, cheng dongdong could see it more clearly. under the control of the second person, optimus prime really did the same thing.

It was truly possible for players to control Optimus Prime's character in such a way.

Moreover, the second person's technique was clearly better than the first person's.

However, it was only slightly better.

in just a short while, optimus prime, which was controlled by this person, was also defeated by wei zhentian.

"What kind of lousy technique is this? You can't even beat a computer?" Cheng Dongdong could not help but curse.

He had a rough idea of what kind of battle game this was.

in this game, players could control their game characters through the sensors they carried with them, and then they could fight. it was as if the players were personally fighting megatron.

Following that, the third player in the video went up, and Cheng Dongdong was stunned when he saw him.

He wasn't the only one. Many people who had seen the video of the game were stunned, and the comments section exploded.

"It's little Qin!"

"The person upstairs, be more polite. It's academician Qin junior!"

"little qin's knight!"

"Little Qin is a Beast Tamer!"

"Little Chef God Qin!"

Qin Lin's name was being commented on one by one.

initially, no one paid much attention to this young master qin. however, they suddenly discovered that this young man was actually playing with little qin. therefore, they definitely had to pay attention to him.

All of this had indirectly increased the number of fans in Qin Ren's private account.

This was Qin Lin's influence on the internet.

Little Qin was just like the name Boss Ma. Even if he didn't have a social account and didn't post anything on the internet, as long as he was there, it was fame.

but very quickly, the people on the internet were also attracted by the following scene in the video.

They watched as little Qin put on the device and began to control Optimus Prime on the screen.

Everyone was also starting to get curious about little Qin's skills.

The following scene shocked everyone.

Right from the start, little Qin did a backflip. Almost at the same time, Optimus Prime on the screen did a backflip to avoid Wei zhentian's attack.

Following that, little Qin displayed all sorts of combat techniques, and Optimus Prime also displayed the same techniques as they fought back and forth with Wei zhentian.

The battle between the two sides was very enjoyable to watch. In particular, there was a special cut that put little Qin's and Optimus Prime's movements in slow motion. It was almost synchronized, making it extremely shocking.

It could be said that the battle between Optimus Prime and Megatron on the screen would not lose out to the scene in the movie, especially when the sparks flew from the collision of metal.

Finally, Wei zhentian was directly knocked to the ground by Optimus Prime.

the video ended there.

However, the gaming fans on the internet were in an uproar. Countless gaming fans began to forward the video, @ others, or leave messages on Qin Ren's account, asking what game it was.

However, Qin Ren did not reply to anyone.

What game?

He didn't know what game it was, and Qin Lin didn't tell him.

However, this undoubtedly increased the mystery of the game.

By the time Cheng Dongdong finished watching the video, the computer had already turned on, but he was in no mood to play games at all. His mind was full of games like the one in the video.

He could tell that this game had a high degree of freedom. Not only could the players control Optimus Prime, but everyone could also tell that little Qin was using various fighting techniques to control Optimus Prime.

In that case, even Muay Thai, wrestling, and karate techniques could be used in the game to control.

This would definitely be the most popular battle game in the future.

At this stage, even Penguin Corporation couldn't make this game.

well, it was a mistake to use penguin as an example. penguin had no creativity in games and would only destroy the creativity of others.

However, the truth was that there was no such technology in the world.

As he was thinking, he immediately opened a group chat, wanting to ask about the game's details.

This was because this group had the most gaming fans, and there were even many gaming gods and vloggers in China. Some bosses of small gaming companies were also in it.

If there was any movement in the gaming world, someone in this group would know.

Especially the group leader, who was the most well-informed in the gaming world.

however, when he opened the group, he was shocked to find that everyone was asking about the game.

"who knows what kind of game this is?"

"That's right, I've never even heard of this game."

"I've never heard of it, nor have I inquired about it."

"....."

no one in the group knew about it, not even the most well-informed group owner.

Cheng Dongdong was confused.

What kind of game was so mysterious?

On the internet, countless people were also curious.

Who had ever seen such a realistic game?

Just seeing the cool and realistic image of little Qin operating Optimus Prime was enough to make people unable to stop.

He thought about what would happen if he could control his own body and play the game.

Therefore, countless netizens went around asking about the game.

who can tell me the name of the game that controls Optimus Prime and Megatron? "

" i want to know what game that young master qin is playing. tell him that there will be a special thanks!
"

"Asking for a Pixiu"

unfortunately, no one could ask what the game was, as if there was no game at all.

this popularity continued for a week.

This was because people had been asking about the game since a week ago. Some people had even posted a reward for information.

Everyone also thought that this was a game that had not been released yet, and little Qin and the others had obviously obtained the qualification for the closed beta.

Naturally, there were also people who wondered if this was a game created by Linlin company.

Unfortunately, this didn't make any sense, because Linlin company's business and products were completely unrelated to games.

On the other hand, Universal Pictures 'copyright company in China also received the news.

Dagis was also frantically looking for contracts that had been signed by the company.

The popularity of Optimus Prime and Megatron's games had brought them a lot of exposure.

However, to Universal Pictures, that wasn't important. What was important was whether the other party had paid the copyright fees for the game.

Dagis looked through all the contracts he had signed in the past and took out all the contracts from the game companies that he had authorized.

then, he organized his men to call the gaming companies one by one to ask about the situation.

however, the end result was that the companies that had obtained the game license had never developed the game.

In other words, the game company didn't even get their company's authorization. This was copyright infringement.

Dagis laughed when he heard this. Universal wasn't afraid of other people's copyright infringement. What they were afraid of was that the company of the instigator wasn't big enough and the capital wasn't high enough.

That would be meaningless.

this game must have been developed by a company that had spent a lot of money because there was no such game technology in the world.

However, the other party was willing to pay such a huge price to research such a game and was not willing to pay them endorsement fees. This was very good.

Dagis immediately invited the person in charge of the company's legal department and instructed, " release an announcement immediately, saying that we are determined to defend our copyright rights. For any unauthorized infringement of copyright, we invite the other game company to immediately come and discuss it.

also, " he added, " send a warning to Linlin Scenic Area about the rights to the game. Tell them that our rights can only be used for external purposes. They can't be used in games or other aspects.

He had investigated little Qin. He was from Linlin's company, so it was very likely that Linlin's company was developing this game. However, there was no evidence, so he could only warn them.

If so, the other party would have to compensate a large sum of money.

universal pictures 'announcement was quickly posted online, which surprised many people.

The game that everyone was asking about didn't get the authorization from Universal Pictures. It was really unexpected.

After all, a company that could make such a game must be very powerful. There was no reason for them to be reluctant to pay the copyright fees, right?

Now that Universal Pictures had made such an announcement, it was obvious that they wanted to extort money.

after all, the compensation for copyright infringement was much higher than the copyright fees.

If worldwide insisted on this matter, the game wouldn't even be released on the market unless they changed the appearance of Optimus Prime and Megatron.

it could be said that universal pictures 'announcement had caused a huge uproar, making the players who were waiting for news of the game anxious.

However, everyone knew that what was about to happen would make everyone's jaws drop. How was that a game?

[Chapter 1413 639! Shocking Plan](#)

Linlin Manor.

After Qin Lin finished his daily tasks, he picked up his phone and saw the announcement issued by Universal Pictures.

They were really treating the video that Qin Ren posted as a game.

At this moment, Lin Lanzi's call came in. He picked up the call, and Lin Lanzi's anxious voice came through, " President Qin, global just sent us an inquiry, asking if we're studying that game on the internet. It's a warning.

qin lin laughed when he heard the news. he didn't care and said,"Don't worry about him, it's fine."

Lin Lanzi was relieved to hear her boss's words.

After hanging up the phone, Qin Lin left the office and went to the plantation Department.

"Chairman Qin!" Yu Shui immediately went up to him.

"Let's go and take a look!" Qin Lin nodded.

Yu Shui immediately led the way. They walked out of the plantation Department and arrived at a piece of land covered by curtains.

The curtains covering this piece of land were already very high, almost three meters high.

Qin Lin knew what was being grown here. It was a giant crop that had been transformed with earth fountain-11.

After entering, Qin Lin saw a giant pumpkin field. Each of the pumpkins was over 1.5 meters tall.

Moreover, seeing these pumpkins in real life was obviously more shocking than in the game.

This might be a psychological feeling. After all, when had there ever been such a huge pumpkin in reality?

After passing through the pumpkin field, they came to an eggplant field. The eggplant plants were very lush, almost like a small tree, but the hanging eggplants were nearly two meters tall.

It would be very delicious if it was used to make grilled eggplants, because apart from size, the eggplants also had the attributes of +1 taste and +1 texture.

yu shui couldn't help but praise him. " chairman qin, the crops you've cultivated are really amazing. each of them is huge, and their growth rate is faster than ordinary crops. i've checked them before. counting the days, they should be mature soon. "

"Good job." Qin Lin would never be stingy with his compliments to his subordinates as long as they did a good job.

"Chairman Qin, do we need to keep all these giant crops for future use?" Yu Shui asked again.

Qin Lin looked at the giant crops on the land, thought for a while, and said, " use half of it to keep the seeds. The other half will be used for activities in the scenic Area, or open to tourists to take pictures.

These seeds were not in the state he wanted. He still wanted to take the seeds to the seed processing machine in ore town to process them.

"Alright, Chairman Qin!" Yu Shui nodded.

Qin Lin and Yu Shui walked around the giant crop field before they left and returned to the manor.

When he arrived at the manor, he received a call from professor Wang.

He picked up.

Professor Wang's voice came through. Chairman Qin, the details of Optimus Prime and Megatron have been handled. They can be used in the scenic Area very soon. However, the scenic Area will still need to send two people to familiarize themselves with the operation.

"En, I know." Qin Lin hung up the phone and called Lin Lanzi.

Optimus Prime and Megatron were going to be placed in the scenic Area, so he still had to discuss with Lin Lanzi, the person-in-charge, how they should proceed.

Lin Lanzi had just finished handling the matters at Universal Pictures.

After all, the other party had sent a copyright infringement letter to inquire, so she naturally had to respond to the other party. There was no copyright infringement, and she had not made games in this area.

The other party didn't ask any more questions, only saying that they would definitely find the company that made the game, or they would never release the game.

When she received a call from her boss, she answered it immediately.

"mr. lin, you and manager chen can pick two retired soldiers with good figures to go to linlin's lab with me," qin lin said.

"Alright, Chairman Qin." Although Lin Lanzi didn't understand Qin Lin's motive, she understood her boss.

Although the boss was a man of his word, a personal order would never be a small matter.

She had to get things done on her side.

Lin Lanzi also contacted Chen dabei immediately.

...

Linlin Manor.

Qin Lin looked at the game in his mind again and controlled his character to go to the lake mine to mine.

This time, he had dug two layers in a row, but his luck was not good. He did not gain anything from these two layers, so he could only give up digging in the end.

Once the game character leveled up, not many mines would be opened.

he had already spent all his time at the spring mine, so he naturally had to treasure the lake mine. if he wasn't lucky, he shouldn't waste his time. maybe one day, he would step on wangcai's sh * t and get something good when he was lucky.

after that, qin lin controlled his game character to go to ore town. unfortunately, the plot quests in ore town were getting harder and harder to trigger.

the game npcs did not come to find him, and it seemed that there was no way to trigger the plot mission.

not long after, lin lanzi and chen dabei arrived.

There were two burly young men behind Chen dabei.

The two young men walked with straight backs and masculine faces. One look and you could tell they were from the military.

"President Qin, manager Chen has brought her here." Lin Lanzi reported as soon as she entered the door.

Mr. Qin, these two are Lin thirteen and Huang Yuan. They are retired Special Forces soldiers and are the reserve team leaders of our Security Department. They are the best in our Security Department. Of course, Ma Hong and the others are not counted.

[Chapter 1414 A Shocking Plan \(2\)](#)

It wasn't strange for a scenic spot to have retired Special Forces soldiers as security guards. Even Special Forces soldiers had to face the problem of retirement, and only a few of them would switch careers.

many of these retired special forces soldiers would actually join some specialized security companies, or continue to live a life of blood through special channels.

Some people were so used to killing that they might even suffer from some side effects, making it difficult for them to integrate into society. Only the world of blood and bullets belonged to them.

Naturally, there were some retired Special Forces soldiers who had the means to find high-paying jobs.

These retired Special Forces soldiers were naturally comrades introduced by the security guards at the laboratory.

The security of the laboratory was top-notch. It was 100% a retired Special Forces soldier. Because there was no need for people there for the time being, it was arranged to be in Linlin Scenic Area.

Moreover, the Linlin Scenic area's security guards had very high salaries and bonuses. Most importantly, there were stable benefits. Even retired Special Forces soldiers were willing to work as security guards here.

The two security guards naturally knew that Xiao Qin was the company's boss, but they had never met him in person.

When he saw Qin Lin, he quickly greeted him respectfully, "

"chairman qin!"

"Chairman Qin!"

"Okay, let's go to the laboratory together!" chairman qin nodded and led a group of people to the laboratory.

Professor Wang was already waiting at the entrance of the new laboratory. There was a man in the laboratory security uniform standing beside him.

qin lin immediately knew that the security guard was the one who had been controlling wei zhentian.

"Chairman Qin!" Professor Wang came forward and said, " leave the two security guards of the scenic Area to this person. He's Captain Lu of the laboratory's security Department. He can lead them to do the quantity as soon as possible.

"Let's go in and take a look!" Qin Lin nodded.

Professor Wang also brought a group of people into the laboratory.

lin lanzi and chen dabei followed behind with faces full of confusion. the matter seemed very serious, but they had no idea what their boss was up to.

Soon, the group was brought to the window. Through the window, they could see the vast space inside. Optimus Prime and Megatron were standing in the vast space.

The screen in Qin Lin's office was sharing the scene in this window.

In other words, this window was already a high-tech product.

Lin Lanzi and Chen dabeai looked through the window at Optimus Prime and Megatron, and their faces were filled with shock.

Lin Lanzi immediately realized what was going on with the game video on the internet.

How was that a video game?

The Optimus Prime and Megatron in the video were real. The metallic texture and metallic luster were too shocking.

Didn't that mean that Chairman Qin and the others weren't playing a game, but were controlling the real Optimus Prime?

this was too unbelievable.

the people on the internet actually thought that it was a game.

The people from Universal Pictures even wanted to find out the rights of the game company.

if they knew what was going on, their jaws would drop, right?

At this time, Qin Lin also turned to the two retired Special Forces soldiers, Lin thirteen and Huang Yuan, and said, " later on, you can learn how to control Optimus Prime and Megatron from Captain Lu in the laboratory.

Lin thirteen and Huang Yuan were equally shocked.

Naturally, they had seen the video on the internet. When they were selected by manager Chen, they were curious about what it was about. After all, they heard that it was the boss's personal order and President Lin was so serious.

However, they did not expect it to be related to Optimus Prime and Megatron. They were also in charge of controlling these two big guys.

The two of them were immediately interested.

Captain Lu also stepped forward and began to explain to the two of them about controlling these two big guys. After that, he also gave the two of them sensors.

Lin thirteen and Huang Yuan were very curious. After putting on the sensor equipment, they tried to control Optimus Prime and Megatron.

As expected, Optimus Prime and Wei zhentian responded to their actions and did the same.

Qin Lin had also brought professor Wang, Lin Lanzi, and Chen dabeai to the side.

After they were all seated, Qin Lin asked, President Lin, can we think about where to place these Optimus Prime and Megatron now? "

Lin Lanzi said almost immediately, "Chairman Qin, there are actually many places for this to be placed. The entrance of the scenic Area can be used as a security function. There's also the newly built Plaza. Previously, other than the constant temperature grass, there was no use for the Plaza."

if we put Optimus Prime and Megatron there, we can definitely control them to perform some performances. Even if we can make them coordinate with the audio and let Lin thirteen and Huang Yuan control the two big guys to curse at each other, it will still attract the attention of countless tourists.

qin lin nodded at her words.

it was mainly because optimus prime and megatron were too realistic. moreover, at this stage, there was no technology in the world that could create such flexible optimus prime and megatron.

It could be said that other than the mechanical Tinder and lack of life in the movies, Optimus Prime and Megatron were not much different from the real thing.

after hearing lin lanzi's account, qin lin also said, then we'll place two security guards at the entrance of the villa and two at the new square for the performance. Manager Chen, you just need to go back and find two more operators.

"Okay, boss!" chen dabei immediately nodded.

seeing that qin lin agreed with her statement, lin lanzi immediately added, Chairman Qin, we can actually make things a little more sensational. Since we can control Optimus Prime and Megatron to walk around freely, why can't we control them to walk from the laboratory to the scenic Area by themselves? "

imagine, on the city Road, if there was a mecha life form in the movie moving, running, and talking freely, how shocking would that be? "

"This isn't a gimmick prop, but a technology that can pass off as the real thing!"

Qin Lin was stunned when he heard this.

To be honest, Optimus Prime and Megatron, which were created by Goblin technology, could be passed off as real. If they were equipped with weapons, they could really destroy cities, and their destructive power was shocking.

Hence, he could imagine how shocking Lin Lanzi's suggestion would be.

The people on the road would probably be dumbfounded.

he turned to professor wang and asked, " "Is there any way to achieve it?"

professor wang immediately said, " it's impossible for the operator to walk on flat ground. after all, optimus prime and megatron have been moving forward all this time. it would require a very long space for the operator to walk. "

Lin Lanzi, on the other hand, said, "professor Wang, have you ever watched the movie" number one player "? the players in the movie have a device that can solve this problem, which is a device similar to a treadmill under the players "feet."

Professor Wang had never watched number one player before, but he immediately understood what Lin Lanzi meant. He said, " i know. that shouldn't be difficult. i'll get people to make it as soon as possible. "

Qin Lin nodded and said to Lin Lanzi, " president lin, we still need to contact you city. otherwise, it wouldn't be good if two big guys get into a traffic accident. "

lin lanzi nodded. this was indeed the case. optimus prime and weizhentian's bodies were so big that they would really cause problems.

Naturally, he would be shocked when the time came!

[Chapter 1415 I Can Still Transform! Why Is The Road Cordoned Off?](#)

online, the discussion about optimus prime and megatron was still in full swing.

The main reason was that the gamers were attracted to the game.

It would be a waste if he didn't become the first batch of players in this game.

You city.

Chen Li took the application form for the Linlin Scenic Area and went to sun Xian in a daze."Sun Xian, take a look at this application!"

Sun Xian took it and saw that it was an application for Linlin Scenic Area. He immediately looked at it seriously.

When he saw that Linlin Scenic Area was planning to apply for a period of curfew at a specific time, he asked curiously, " "did linlin scenic area say when and what their purpose is?"

Chen Li shook his head. I'm not sure yet. We just need the road from the Linlin laboratory to the Linlin Scenic Area. Linlin's laboratory must have come up with something to transport over, but they want to keep it a secret.

When sun Xian heard this, he nodded. then cooperate with them. There's no need to ask about anything else. If it's not an important situation, boss Qin won't apply for this.

"I'll make the arrangements. We'll wait for the notice from Linlin Scenic Area." chen li nodded. however, he was also a little curious about the purpose of linlin scenic area.

This was the first time Linlin Scenic Area had such a requirement.

...

Linlin Manor.

Qin Lin had already completed his daily tasks in the office. Then, he controlled his game character to go to the lake mine to mine.

After digging a layer and still not finding anything, he gave up on mining and controlled his game character to return to the farm.

After thinking about Optimus Prime and Wei zhentian, he controlled his character to head to goddess mountain.

He stopped at the mountain path of Mount goddess, locked the office door, and entered the mountain path with a thought.

He naturally thought of the Goblin Child Elba, and followed a direction into the forest.

It had been a while since he had seen the Goblin Child.

According to the time in the game, it was even longer ...

qin lin soon arrived at the damp forest where the gnomes had disappeared.

as soon as he arrived, he heard some movement inside. he was pleasantly surprised and immediately went forward. sure enough, he saw elba playing with the goblin girl again.

The two girls still had two big guys beside them.

It was a muscle truck and a Titan Tank.

Qin Lin was surprised to see this scene because these two cars were the prototypes of Optimus Prime and Megatron in the third movie of " Transformers ".

When Elba saw Qin Lin, he happily greeted him. "Human friend, you're here again."

clearly, elba was now calling him a friend.

This was a good sign.

Qin Lin pointed to the front of the two cars and asked, "elba, what's up with these two?"

When Elba heard this, he said smugly, " "This one? This is a toy that my dad has improved. It can transform just like the one in the video you gave me. "

as he spoke, elba pressed a button on the sensor device as if he was showing it.

The next moment, the muscle truck and the Titan Tank truck began to move.

then, the two heads of the cars started to change shape, revealing legs and arms. they turned into upright bodies, and finally turned into optimus prime and megatron.

Moreover, this time, they had weapons on their backs-Optimus Prime's greatsword and Wei zhentian's giant axe.

this scene made qin lin reveal a shocked expression.

Previously, he had felt that Optimus Prime and Megatron, which were produced in the laboratory, were still lacking something. It was just that he had not been able to think of anything at the moment.

Now, he understood that it was a transformation.

A real transformer could transform. Optimus Prime and Megatron, which were previously produced in the laboratory, could not transform.

He didn't expect that the gnomes had already made up for all this and made the latest toy.

Elba, "Qin Lin asked subconsciously, "your toy has become even more powerful. Can you give me the new design?"

When Elba heard this, he looked straight at Qin Lin and asked, "then can you use other videos to exchange with me? My father is the best craftsman in the gnomes. He can make anything, but he always lacks creativity and can't make his own things."

"After he made this toy robot, he wanted to make a cute, stupid robot that could be used to accompany my 9th mother, but his brain isn't working well and he couldn't come up with anything. I wanted to trade a video for him."

"Eh!" Qin Lin was stunned.

The best craftsman had no creativity and could make anything, but not his own original creation?

It was probably like this?

Wasn't this a master of piracy?

In reality, there were many such people. They could pass off anything they pirated as the real thing, but they just couldn't become famous because they seemed to have some kind of talent taken away by the heavens and couldn't produce any original works.

Sometimes, an original work required inspiration and comprehension.

They lacked such things, but as long as someone could make it, they could imitate it 100% with just one look.

He didn't know if this talent was good or bad.

Elba's father must have been such a goblin. After all, he had no inspiration, but he could imitate Optimus Prime and Megatron just by watching the video.

More importantly, what did Elba say? The other party's father was going to give a silly, cute, and accompanying robot to 9th mother?

Jiu's mother?

Nine mothers?

Elba's father seemed to be quite the big shot.

[Chapter 1416 I Can Still Transform! Why Are The Roads Cordoned Off?](#)

He was simply a role model for men.

Qin Lin seemed to have thought of something after hearing Elba's words. He returned to the mountain path and logged out of the game. He turned on the computer in his office and searched for movies about Da Bai.

in the movie, big white was a silly, cute robot that was created to accompany elba's father, which completely fit the requirements of elba's father.

Qin Lin found a tablet and downloaded the movie. Then, he entered the game again.

When he saw Elba again, he gave him the tablet and played the movie about big white.

as elba watched the video, he was attracted by the interaction between great white and the main character. " that's amazing. My dad probably wanted to make a robot like this.

qin lin heaved a sigh of relief when he saw elba's satisfaction. he wondered if he would be able to scam the technical drawings if the number one goblin craftsman was able to make big white.

If da Bai could get an interview, even if it didn't have any intelligence, it would be more shocking than any other robot of its kind.

Elba was obviously a man of his word. After getting the video of big white, he ran back to the huge rock he had been hiding in the last time and took out a long scroll of drawings, which he handed to Qin Lin."human friend, this is the design you need."

Qin Lin took the drawing and subconsciously looked at the Boulder.

It seemed that Elba had taken things from there several times.

Could it be that there was something special behind that huge rock?

After Elba gave him the blueprint, he left with the tablet.

Seeing this, Qin Lin subconsciously ran to the back of the Boulder, only to find that it was empty and there was nothing special about it.

He could only give up and take the new map back to the mountain path and leave the game.

Back in the office, Qin Lin spread out the new design drawings, then took out the previous ones and began to compare them.

many of the new design's components and components were no different from the previous one. however, there were some areas that were vastly different.

In fact, in order to create Optimus Prime and Megatron that could transform, he would need to make a lot of new parts.

However, with a ready-made design plan, there was no need to re-examine the size. He could just design according to the blueprint.

with the current power of linlin's laboratory, it was very easy to do this.

Qin Lin put away the design and left the manor.

when he arrived at linlin's laboratory, he saw professor wang again. he was with a researcher and explaining a design plan. it was a device with tracks, like a treadmill.

It was something that could assist control, something similar to the one in the movie number one player.

The advantage of this device was that even if the operator controlled Optimus Prime and Megatron to run for 108000 miles, they could still run in place.

If they had the strength to run 108000 miles.

Chairman Qin, " professor Wang said to Qin ran, " it will take some time to make this thing. You'll have to control it when the time comes.

"Professor Wang, I believe in your ability!" Qin Lin also took out a new design and handed it to professor Wang."Take a look at this design first. I've made some improvements to Optimus Prime and Megatron."

Professor Wang took the design and opened it.

He could tell that these were the designs of Optimus Prime and Megatron, but he immediately realized that something was different. He exclaimed in surprise, " Chairman Qin, the original Optimus Prime and Megatron are already amazing enough. After some improvements, you can make them transform just like in the movies. Moreover, the transformation mechanism and voice-changing machine are too amazing.

Professor Wang couldn't help but be impressed.

This should have been done by Chairman Qin, right?

Otherwise, the new design would have been given to him a long time ago, and he would not have had to go through the trouble of making a non-transformation equipment.

Perhaps Chairman Qin had a sudden idea after returning from his place.

But this speed was too fast.

Moreover, the components and the principle of the transformation process involved in this process were definitely not simple to design.

Yet, Chairman Qin managed to do it so easily in such a short time.

Then, professor Wang started to look at the design plan seriously.

Because of this new plan, Optimus Prime and Megatron would have to be remade.

this was undoubtedly delaying the time again.

After Qin Lin handed the design to professor Wang, he went back to the Linlin Scenic Area to find Lin Lanzi.

lin lanzi also passed a proposal to qin lin. Chairman Qin, take a look. This is the proposal for Optimus Prime and Megatron.

I've asked the people in the multimedia department to watch the related movies. They've written some dialogue that Optimus Prime and Megatron would probably say. Megatron would probably say something like 'destroy the earth'.

when the time comes, as long as professor Wang has installed a sound device in Optimus Prime and Megatron's heads, I'll get the multimedia staff to simulate their voices in the movie.

This was probably a complete act ...

Qin Lin didn't raise any objections after reading the plan.

Since Lin Lanzi had shown him this proposal, it meant that this was the final plan for the Linlin Scenic Area.

he didn't think that his own thoughts would be better than lin lanzi and the other management of the scenic area. if he couldn't see any problems, he would just let the other party follow this plan.

"Have Optimus Prime and Megatron's routes in the Linlin Scenic Area been planned?" Qin Lin asked Lin Lanzi.

When Optimus Prime and Megatron entered the scenic Area, they would definitely attract the attention of all the tourists. At that time, they would have to plan the route and ask Chen dabei and the security guards to set up a curfew.

[Chapter 1417 You Can Still Transform! Why Are You Cordoning Off The Road?](#)

"it's already planned." Lin Lanzi nodded.

"let's take a look at the new plaza." Qin Lin said as he led Lin Lanzi to the new plaza.

The new square was built in a simple and ancient style.

This did not seem to match the style of technological products like Optimus Prime and Megatron.

Qin Lin turned to Lin Lanzi and asked,"President Lin, do you think we should open up another science fiction scenic spot?" After all, Optimus Prime and Megatron are sci-fi products."

he was more concerned about the father of the number one goblin craftsman in elbana.

What if he made da Bai again after that?

He still had a Brachiosaurus skeleton to extract the genes from. However, he had not been able to obtain the mysterious stone tablet, so he was unable to obtain any research knowledge on animal genes.

Otherwise, he could have researched the Brachiosaurus gene and possibly bred dinosaurs as well.

Opening up a science fiction scenic spot would also be a demand in the future.

when lin lanzi heard her boss say this, she knew that her boss had a plan in mind. she also said,"Chairman Qin, I'm afraid we'll need to contract another piece of land with you city."

Qin Lin nodded. let's do it. We're not short of money now!

"Tsk." Lin Lanzi.

qin lin and lin lanzi strolled around the scenic area and finally decided on a new land to be contracted. it was probably in the south, which could be perfectly connected.

however, if they wanted to contract a large enough land, they would have to include a barren mountain.
this was something that could not be helped.

There were many mountains in min province, and you city was surrounded by mountains. Naturally, as long as it was developed well, one more mountain was nothing.

Lin Lanzi had to discuss the details with you city.

...

Time passed.

After professor Wang confirmed Optimus Prime and Megatron's plans, he had been working overtime with his people.

After he had set up the auxiliary equipment, it took him another half a month to bring people to produce the new Optimus Prime and Megatron.

He had also informed Qin Lin as soon as possible.

when qin lin heard the news, he immediately went to linlin's laboratory. he came to the window again and looked inside.

There were still two domineering big guys inside. They were not Optimus Prime and Megatron, but in their vehicle form.

To be honest, compared to what he saw at Elba's shop, professor Wang's products were more visually appealing and had a more delicate appearance.

The Goblin technology was powerful, but it was still a bit crude.

After professor Wang pressed the button on the sensor, the two vehicles inside began to transform.

The transformation scene was almost exactly the same as in the movie, because the first Goblin artisan could simulate the movie scene 100%.

A moment later, Optimus Prime and Megatron had successfully transformed. Professor Wang pressed another button, and the weapons on Optimus Prime and Megatron's bodies appeared.

He pulled it out and held it in his hand.

The scene was very domineering.

After that, Qin Lin immediately put on the sensor equipment and began to operate the two big guys. The sense of operation was no different from before.

After confirming it, Qin Lin also confirmed the settings of the auxiliary operation. After there were no problems, he called Lin Lanzi's phone and asked her to contact you city to find a time to cordon off the road tomorrow.

Lin Lanzi naturally contacted Chen Li at the first moment.

Chen Li immediately found someone to hold a meeting and made arrangements.

Soon, a temporary warning sign was set up all over the street of you city, attracting the attention and curiosity of countless tourists.

[Chapter 1418 641-They Are 1](#)

You city, the 3rd Ring Road and the National Highway were the closest road from Linlin laboratory to Linlin Scenic Area.

In the evening, the tourists and you city residents who passed by this road were surprised to find that there were traffic police on duty on the entire road.

It seemed like something big had happened. Otherwise, why would there be such a huge commotion?

It didn't take long for someone to realize that the traffic police were only putting up temporary signs.

This kind of temporary license plate could be understood by people with cars. It was used when the road was temporarily closed, and it would also show the time period of the ban notice.

Zhuang xingrui was from the provincial capital of min province because he had his own car, the latest Panamera.

therefore, he often liked to drive around.

It wasn't his first time in you city. He had even experienced a traffic jam in you city. A 10-minute journey had taken two hours.

At that time, the traffic was so bad that it made him break down. If it wasn't for the attraction of the Linlin Scenic Area, if it wasn't for his previous girlfriend's carefreeness, which helped him to get rid of his frustration, he would have started cursing.

This time, it was naturally because he had a new girlfriend.

The other party wanted to see the fireflies in the Linlin Scenic Area, so he brought her here.

he was walking on the path of the third ring.

when he saw that the road would be closed from 2 p.m. tomorrow, he began to complain, "Doesn't this you Cheng know what he's doing? Don't you know the situation of your own traffic? Forbidden?"

Seeing him like this, his new girlfriend couldn't help but laugh. "Why do you have such a big problem with you city's traffic?"

Zhuang xingrui looked at his new girlfriend and explained, "sometimes, the traffic is so bad. A 10-minute journey is blocked for two hours, and they're still playing with a no-go? are they crazy? "

His new girlfriend said, "could it be that there's a new situation, so he's banned?" You city and Linlin Scenic Area seem to have a lot of problems, and they always attract people."

When he thought about it from another perspective, Zhuang xingrui actually felt that it was very reasonable. He actually started to look forward to it for some reason.

Not only Zhuang xingrui, but all the tourists and residents of you city also saw this situation, and they were all curious.

Especially the residents of you city, it was the first time they were banned from traveling since the opening of the 3rd ring.

this scene was naturally filmed by some tourists and uploaded to the internet, causing quite a stir.

However, for some people, they did not care about this at all. This was because they were still looking for news about Optimus Prime and Megatron games.

For a gaming fan, no one could understand this kind of stubbornness.

It was even more impossible for others to understand the faith they had for a few months just for a piece of equipment.

Cheng Dongdong was such a person.

after he saw the game where optimus prime and wei zhentian fought, he had been asking around about the game.

However, there was still no news about the game after so long. Even after Universal Pictures 'copyright infringement notice was released, there was still no response from the company.

Many gaming fans even wondered if this was the reason why the game company had suddenly shut down their plans. This made many gaming fans frustrated.

Now that such a magical game had been released, if you wanted to promote it, why don't you give me some concrete news?

for this reason, many game fans even went to the official account of linlin scenic area or qin ren's private account to leave comments, asking what game it was.

some gaming fans even threatened qin ren that if he didn't tell them his game name and company, they would hack his computer and phone.

Because of this, Qin Ren was also very helpless.

Compared to this group of game fans, the other netizens were definitely attracted when they saw you city's sudden curfew.

The netizens who followed Linlin Scenic Area and you city all knew that you city was used to traffic jams. It was good enough that they didn't build new roads, but they actually banned traffic?

This was definitely not right.

...

Chinese Academy of Sciences.

Minister Lu had already entered a top-secret special laboratory.

The level of top-secret meant that the experiments in this laboratory were definitely not simple. No one without permission could enter this place.

Therefore, even Minister Lu had to enter with fingerprints, iris scans, and passwords.

After entering the laboratory, he found an academician and was taken to a place.

this laboratory was the research center of the body-increasing medicinal liquid.

The body-increasing medicinal liquid was definitely a medicinal liquid that could improve a human's physique and even allow a human's physique to break through.

It was just that the current medicinal liquid could only be used by specialized people, and it was impossible for most ordinary people to have any effect.

Therefore, he could only do in-depth research.

as long as they could one day develop a body-strengthening potion that was effective even for ordinary people, their entire race would be able to make a leap forward and completely surpass other races.

In other words, they were above the other races.

In the next few hundred years, their descendants could even use this medicinal liquid to develop some science-fiction medicinal liquid in movies. That would be even more unimaginable.

however, that was a very distant matter, and he could only think about it in his mind.

No one knew what the future would hold.

When they arrived at a special training room, Minister Lu saw a special soldier who had already put on a special combat suit.

As the soldier walked down, several knife-wielding men stepped forward and attacked him wildly.

During the fight, the blades in the hands of those people kept slashing at the soldier's body.

A miraculous scene happened. The knife glowed with a cold light. It was clearly very sharp, but it didn't leave a mark on the combat uniform.

[Chapter 1419 641-They Are Pi Xiu 2](#)

" this special fabric is five times more durable than normal fabric, " the academician beside him explained. " we can use this to make a combat suit with five times the toughness and defense. "

after that, we used fiber compression technology and discovered that the data could be increased. Then, we created this combat suit.

Minister Lu nodded. Just this point alone, if it was given to a soldier who had used the medicinal liquid, how terrifying would their combat power be?

In the country, without firearms, one such soldier could solve any crisis.

At this moment, a man with a spear appeared. He raised his hand and fired a few shots at the soldier's chest. The huge impact caused the soldier to roll on the ground.

Under such an impact, even if the bullet didn't hit a vital point, the internal organs of an ordinary person would be damaged by the impact, and they might die immediately.

However, a moment later, the soldier in the special combat uniform suddenly stood up and patted the spot where he was shot.

This was because he was not an ordinary person. He was a warrior who had used the body-strengthening potion to break through his physique.

The bullet was still in his combat uniform, but it fell to the ground with a pat.

The academician also said to Minister Lu, "The combat suit is made of a special fiber material that is compressed. Coupled with the special production method of the bulletproof vest, and the physical breakthrough of a soldier, as long as it is not hit in the head by heavy weapons, the combat suit will be of great use."

Minister Lu nodded.

He had seen it with his own eyes. Even without the academician's introduction, he knew how powerful the combat uniform was.

It could be said that all that was left was a breakthrough in the research of the ice-sealing technology. If this technology made any more progress, the Super soldier project in the movie might be possible.

No country in the world knew about this.

Minister Lu suddenly felt a little emotional.

The Western countries had always boasted that they were better than them in all aspects of technology, but they had no idea that they already had this technology and had far surpassed them.

The key was that these technologies came from Linlin Laboratory.

The body-increasing medicinal liquid was deciphered by Boss Qin through ancient Chinese medicine recipes, and the fiber technology and freezing technology were developed by Professor Wang.

I'm afraid I'll have to apply for the position of an academician for Professor Wang again tomorrow.

Otherwise, if the people who developed these two technologies couldn't get an academician position, then who would be qualified to get an academician position?

After Minister Lu learned the details, he left the laboratory and returned to his office.

The first thing he did was call Qin Lin.

After all, he had obtained the technology from others, and he should share his progress.

In the Linlin Manor, Qin Lin picked up Minister Lu's call immediately. "Hello, Minister Lu!"

"Boss Qin, we have good news from the Chinese Academy of Sciences. The fiber technology that Professor Wang used has produced a combat suit. It's very effective," Minister Lu said in a good mood.

Minister Lu, then I really have to congratulate you. Qin Lin was naturally happy because he knew how great it would be for the whole country if the combat uniform was made and even popularized.

Minister Lu, " he shared, " professor Wang has developed a new novel toy. It will be exhibited in the scenic Area tomorrow.

Minister Lu wasn't interested in the small things displayed in the scenic Area.

However, after hanging up the phone, he thought of boss Qin's occasional troublemaking. A small thing might not be a small thing, so he said to his Secretary, " "Has boss Qin made any moves recently?"

Under his orders, paying attention to boss Qin's news had become one of his Secretary's daily tasks.

" no big news, " the secretary replied immediately. " it's just that a street in you city will be closed for a while tomorrow. "

"No vehicles allowed?" Minister Lu subconsciously felt that this matter was related to the little thing that boss Qin had mentioned.

However, why was it forbidden to pass through the streets?

He couldn't help but be curious.

.....

The next day came.

At noon, some bored people found a place where they could observe the third ring.

Some tourists even deliberately drove here and parked their cars on the open space by the roadside, not leaving.

There were even foreign tourists among them.

this was enough to show how famous linlin scenic area was now.

In you city, Chen Li and sun Xian were also curious.

therefore, the two of them set off after lunch and brought their men to the entrance of the third ring road.

Because it was a restricted area, traffic police were already on duty.

The two of them knew more about the internal affairs than the others. The Linlin Scenic Area had already reported the incident to them, and later, two big guys from the movie would pass by here and be transported to Linlin Scenic Area.

The two of them were looking forward to seeing the two big guys.

They had even gone to watch a movie last night. It was hard to imagine that Linlin's laboratory had actually made that kind of thing.

Even if it was impossible to create the real Optimus Prime and Megatron in the movie, it would be very advanced technology to be able to walk freely.

It was definitely great news that such high-tech technology had appeared in you city.

Hua hospital.

Even Minister Lu had started to pay attention to the news on the internet.

He knew very well that once boss Qin made a move, it would definitely be on the internet's hot search, and he would know about it.

Linlin's laboratory.

Qin Lin, Lin Lanzi, and professor Wang were already standing in front of a screen.

The real image on the screen was from a different perspective, which was different from a normal display.

This image was seen from Optimus Prime and Megatron. For the sake of realism, or for the operator's better long-distance operation, professor Wang had installed camera lenses in the eyes of both Megatron and Optimus Prime, so that the operator could see them.

In front of the three of them, Lin thirteen and Huang Yuan were already standing on two special auxiliary operating platforms. They were also looking at a screen in front of them.

They were Optimus Prime and Megatron's vision.

They were not used to such a field of vision at first, but after they got used to it, with the adaptability of humans, they would naturally be able to get used to it very quickly.

"We can set off now!" qin lin said.

Lin thirteen and Huang Yuan also pressed down on the sensor equipment on their hands. The next moment, a special control device extended out.

The two of them also held onto the special equipment.

This was a special control device for Optimus Prime and Megatron when they were in a car.

A moment later, the muscle truck and the Titan Tank started up and drove out.

they looked like cars on the outside, but they weren't. their internal structure had nothing to do with ordinary cars.

However, they were extremely fast, even faster than most cars.

The door of Linlin's laboratory had already been opened. The security guards had been informed of the situation, so they were not surprised. They watched the two large vehicles drive out.

in the laboratory, lin thirteen and huang yuan became nervous as well. they were fully focused on the operation.

The two large vehicles were driving quickly towards the entrance of the third ring Road.

In the meantime, some passing cars saw the two front cars, but they were all shocked.

a couple was chatting in the car when the wife exclaimed, " "Honey, look, there's no one driving those two cars!"

When the husband looked over, the two cars had already driven to the front. However, when he saw the two big cars, he was also surprised. "Why do these two vehicles look so familiar?"

The muscle truck and the Titan Tank moved forward quickly, and they soon arrived at the entrance of the third ring Road.

This attracted the attention of the tourists who were waiting here. After all, the two cars were too loud and huge. Ordinary cars seemed small in front of them.

Therefore, it was not difficult for the tourists to not be attracted.

"There's something wrong with the speed of these two cars." A tourist said.

"Eh, there doesn't seem to be a driver in the car!" Another tourist said.

At this moment, the other visitors also noticed.

"It's true, there's no driver in the car!"

"They are walking on their own."

"It won't go out of control, right?"

"....."

Suddenly, another foreign tourist shouted in disbelief, " Oh my God, muscle truck, Titan Tank truck, they're Optimus Prime and Megatron? "

[Chapter 1420 Optimus Prime And Megatron In The Battle Between Cities](#)

Optimus Prime?

Wei zhentian?

many people had watched the movie 'transformers'. naturally, some of them could tell that the muscle truck and the titan tanker were the original forms of optimus prime and megatron.

It was just that no one would really think in the direction of Optimus Prime and Megatron.

After all, this was reality.

However, discussions were inevitable.

there's really no one driving these two cars. They won't transform later, will they? "

f * ck! It'll be fun if they really transform into Optimus Prime and Megatron.

"Haha, are you kidding me? Is the transformer here to destroy the earth?"

in reality, this car can transform. I'll eat them! Eat! Eat! Eat!

While the man was talking, the two cars had already entered the forbidden Third Ring Road. At that moment, the two cars began to change and twist.

Everyone's eyes widened at that moment. They watched as the two cars revealed their legs and mechanical hands. They stood up and became two huge figures.

Weren't those figures Optimus Prime and Wei zhentian from the movie?

It really changed shape?

everyone who saw this scene was shocked.

"The real phoenix has really changed!"

it's impossible not to be terrified. Is there really such a thing? "

"Am I dreaming? Is there really such a technique?"

"....."

At this moment, other than being surprised, the people who saw it thought that this was some kind of technology. They sighed with emotion that to be able to do this, the technology was really amazing.

The people who had taken pictures of the two cars couldn't help but upload the videos to their WeChat moments and the Internet.

Optimus Prime and Megatron could be seen everywhere. Many shops would even buy one for their opening to attract attention.

However, everyone knew what was going on with those sky-supporting pillars and Wei zhentian.

It wasn't that those things couldn't move. It was just that people wore plastic models and relied on people to carry them.

Compared to what was in front of them, those things were no different from children's toys.

Moreover, around the world, even Universal Pictures, the company that produced " Transformers ", did not have the technology to turn a car into a pillar of support.

They relied on special effects.

Just when everyone thought that Optimus Prime and Megatron were just products of technology, Megatron said, " "Optimus Prime, you've already chased me through several galaxies. This time, I'm definitely going to destroy this planet. This planet is hell."

no matter how many times you try, " Optimus Prime said, " I'll stop you. Megatron, you soulless fellow.

Wei zhentian seemed to be angry, and he retorted, " " that's why i'm fearless. optimus prime, you're finished today. "

" ? ? ? "

" ? ? ? "

" ? ? ? "

Everyone was stunned. There was such a scene?

However, at that moment, there was a metallic movement on Wei zhentian's back, and a huge double-edged axe appeared. Wei zhentian grabbed the double-edged axe and pulled it out.

Optimus Prime did not want to be outdone. The metal on his body moved, and a long sword appeared.

It drew its longsword and glared at Wei zhentian like a tiger watching its prey.

These two weapons were the standard weapons in the movie.

As soon as the two weapons appeared, Optimus Prime swung his longsword at Megatron.

wei zhentian was equally fearless as he brandished his great axe and met optimus prime.

The axe and the long sword collided, and a violent sound of metal clashing instantly rang out, as well as a violent spark.

Immediately after, Optimus Prime and Wei zhentian retreated at the same time before they launched a fierce attack.

the two sides exchanged blows.

Optimus Prime leaped up and slashed down at Wei zhentian with his sword in both hands.

awe-inspiring world lifted his axe to block. after forcing optimus prime back, he did a cool backflip and returned fire with his axe.

This battle had shocked everyone who saw it.

Those who were filming with their phones were also dumbfounded.

Was this engine really a product of technology?

It was understandable that they could talk.

However, was such a battle really possible with the current technology?

In fact, why was the battle between Optimus Prime and weizhentian even more realistic and interesting than the special effects in the movies?

In fact, some of the more imaginative ones were already making connections.

"F * ck, are they really Optimus Prime and Megatron?"

"Is there really such a thing in the real world?"

"have we been deceived by some lies all this time? This is the real world we live in?"

"....."

You city's friends on duty were a little flustered. Because they were so close, the sparks from Optimus Prime and Wei zhentian's battle could reach them.

One of them could even feel the heat of the sparks on the back of his hand.

Wasn't this scary?

they almost thought that this battle was real.

Chen Li and you Cheng's people were also shocked.

He had already been informed of this, but he was still shocked to see it in person.

It was exactly the same as the movie.

This was no longer just a high-tech skill.

It must be known that this thing originated from the comics and movies of the United States, but even the United States couldn't produce this thing themselves, right?

Seeing that the traffic police were a little uneasy, he immediately made a hand gesture to calm them down.

if the traffic police were so shocked, one could imagine what the tourists were like.

It was also at this moment that Wei zhentian, who seemed to be at a disadvantage in the battle, shouted at Optimus Prime, " "Optimus Prime, you're a traitor to planet CyberTAN!"
