

The Game 1421

[Chapter 1421 Optimus Prime And Megatron In The Battle Between Cities \(2\)](#)

After saying that, he quickly transformed back into the appearance of a Titan Tank and drove toward the third ring.

Seeing this, Optimus Prime also decisively transformed back into the front of a muscle truck and drove into the third ring at top speed, giving chase.

It was only after Optimus Prime and Wei zhentian had walked far away that the tourists at the entrance finally reacted. A few foreign tourists, in particular, were so scared that their faces turned pale. They covered their mouths.

they really are Optimus Prime and Megatron. They really exist in this world!

Universal Pictures lied to us. The Transformers movie is real. We're done for. Megatron is going to destroy the earth.

hurry up and support me. I'm leaving this place. A battle between Transformers is about to happen here.

"....."

These foreign tourists were shouting like crazy, which shocked the other domestic tourists.

However, the tourists in China could not stay calm either.

Who could remain calm when Optimus Prime and Wei zhentian appeared in front of them and fought in such a realistic manner?

Very quickly, the scene that had just happened was spread online.

Because it involved you Cheng and Optimus Prime and weizhentian's games were already very popular online, the videos of these tourists quickly became the hot search and caused a sensation.

Cheng Dongdong had been unwilling to give up and wanted to find out about the game, so he left a message in young master Qin's private account to ask again.

When he was done, he picked up his WeChat and saw that the game WeChat group was already bustling with discussion.

everyone, don't look for that game anymore. You city has the real Optimus Prime and Megatron!

"are you kidding me? they really are optimus prime and megatron."

" it seems to be true. there's already a lot of news on the internet. there's even news of optimus prime and megatron's transformation. "

"....."

Cheng Dongdong was confused when he saw the message in the group.

They had been looking for games related to Optimus Prime and Megatron, and someone had actually told him that they really existed in real life?

Was this a joke?

He immediately took out his phone and searched for news about Optimus Prime and Megatron on the internet. The first thing he saw was a video of a muscle truck and a Titan Tank truck driving at high speed.

cheng dongdong had been obsessed with investigating optimus prime and megatron's games for the past few days, so he naturally knew that these were their prototypes.

Then, Optimus Prime and Megatron's cars in the video began to deform. In a short while, two tall Optimus Prime and Megatron appeared.

These two fellows were worthy of being old enemies. As soon as they appeared, they began to bicker and at the same time, they took out their weapons and began to fight.

The battle was very intense. Weapons collided, sparks flew, and the somersaults were smooth and cool.

Which movie was this scene from?

cheng dongdong thought to himself subconsciously.

He had watched a series of movies about Transformers, but he had no impression of this video. However, when he saw the end of the video, he exclaimed, " " impossible! did this happen in reality? "

the second half of the video showed the visitors and their shocked voices.

In other words, this was a scene that happened in you city, not a movie.

Then, Cheng Dongdong suddenly thought of something, and his face revealed a look of disbelief.

This Kasaya

In a university classroom.

Chen Xue and a few of her close friends were gathered together and gossiping. What was there to gossip about between girls?

It was nothing more than what happened between who and who.

She had a good relationship with her best friend because they had the experience of traveling to Linlin Scenic Area twice a year.

During the winter break before the new year, a few of her close friends followed her to you city and stayed at her house.

Other tourists needed to book hotels and all kinds of tickets, but they only needed to go to her house. Even if they had to squeeze in the same bed or sleep on the floor, it was still a happy and harmonious time.

at this moment, they saw a male student run into the classroom. he went straight to the multimedia screen and started to operate on the computer.

At the same time, the male student also said, " everyone, come and take a look at the breaking news. Optimus Prime and Megatron have appeared in you city.

this topic attracted the attention of chen xue and a few of her close friends. they had just visited the linlin scenic area during the winter break last year.

an image immediately appeared on the multimedia screen. it was the image of optimus prime and megatron transforming after entering you city's 3rd ring road and then fighting.

The exciting scenes and the cool battle attracted everyone's attention.

"This is you city's 3rd ring?" Chen Xue's voice sounded.

She was from you city and had passed by the third ring Road more than once on her way back to you city, so she could naturally recognize the third ring Road.

Her words immediately caught the attention of all the students.

"So that means that the video really happened in you city?"

how is this possible? this kind of transformation, this kind of battle ... There's no such technique at the current stage.

that's right. The countries can't even make robots that can walk upright like humans. How can they make such a thing? "

"Could it have been produced by Linlin's laboratory?"

that's impossible. Linlin's laboratory is good at plant research. This isn't even in the same direction, right? "

" but it did happen in you city. the internet is in chaos. many videos taken by tourists have gone viral. "

"....."

no one could refute this because they knew that the video was from you city. many people had checked it online and it was indeed the case.

But why would Optimus Prime and Megatron exist in reality?

Some of the smarter ones had already guessed what was going on, but most of them could not make the connection. Many people even thought that this was the real Optimus Prime and Megatron, and that the tyrannical sky Tiger was about to come and destroy humanity.

[who can tell me what I should prepare to survive after the battle with the Transformers? Where can i hide so that I won't be hurt?"

Someone had actually sent such a video for help.

However, these news videos were definitely good news for the tourists and residents of you city, because they were the first people to find out what was going on.

Or rather, at the entrance of the third ring Road, after someone uploaded the video to their circle of friends for the first time, the news about Optimus Prime and Megatron had already spread in you city.

Therefore, there were many people waiting for the third ring Road.

if optimus prime and megatron's vehicles passed by, they would be the first to see them.

Optimus Prime and Megatron even transformed and fought in several places. Another group of people took videos and uploaded them to the internet.

The National Highway connecting the 3rd Ring Road had been widened because of the National treasure fish such as the White-fin Dolphin. In addition to the road for driving, there was also a large area for people to walk and admire.

Many people had been waiting here for a long time. They were all watching the video on their phones and discussing it.

Just as they were discussing, the sound of a car engine could be heard. As expected, Optimus Prime and Megatron's car prototypes appeared.

everyone looked over and found something strange.

"It's just like what the internet said, no one is driving it!"

"That's right, it's exactly the same as the front of a car in the movie!"

"He's here, he's really here, Yingluo."

The people gathered here seemed to have attracted Wei zhentian's attention. As he drove, his body was deformed, and he shouted, " "There are so many humans gathered here. Are they looking down on me, Wei zhentian? Then destroy them all!"

As he spoke, Wei zhentian actually raised his huge axe and was about to slash down at those people.

the giant axe was sharp, and when it swept across, it brought with it a terrifying wind.

the people gathered here instantly felt the aura of death envelop them, and fear appeared in their eyes.

"Wei zhentian, assistant!" Optimus Prime's voice rang out at this moment. He swung his longsword and struck the giant axe in Wei zhentian's hand. The giant axe was knocked to the other side, saving the people.

Naturally, Lin thirteen and Huang Yuan's Optimus Prime and Megatron were just joking.

But those people were all dumbfounded.

was this 'heaven shaking' real? The other party had almost taken their lives.

At that moment, their brains were not enough to process the information.

then, they watched as optimus prime chased after wei zhentian and left in the direction of the linlin scenic area.

[Chapter 1422 Optimus Prime And Megatron Want To Be Security Guards](#)

As the video of Optimus Prime and Wei zhentian's battle continued to spread online, it became even more popular.

Hua hospital.

Minister Lu had also seen the video of Optimus Prime and Megatron.

when he saw optimus prime and megatron transform and take out their weapons to fight, he was so shocked that he stood up.

This was the little thing that boss Qin was talking about?

What the f * ck, this is a small thing?

This was the revolution of mechanical technology, okay?

Did boss Qin know what kind of difficulties the research of machines in various countries was facing?

In particular, the technology of the mechanical bone armor was facing serious problems.

There were actually many robots in the market now, but everyone knew what type of robots they were.

Even the humanoids that America bragged about were extremely clumsy. They couldn't run, squat, jump, and even fall due to their unstable center of gravity.

from the appearance, it was not even as good as the beauty robot that the plaster country had bragged about. it really had artificial skin, could open its mouth, blink, make sounds, and could make all kinds of poses.

Unfortunately, these robots all had a fatal technical problem, and that was the mechanical bone armor technology. It was necessary to create a set of feasible mechanical bone armor technology to allow the robots to move, run, jump, and do all kinds of actions like humans.

This type of mechanical bone armor technology was something that no country could achieve. Even the most basic core problem could not be solved.

The other thing was kinetic energy. It required enough kinetic energy to make the machine move.

This was something that the technology of the various countries could not achieve at the current stage.

What was he seeing now?

Boss Qin's little trick had completely completed this technology.

This was quite a blow.

This was because this kind of technology was considered a small thing to boss Qin.

To hell with this little thing.

"Why isn't professor Wang from the Chinese Academy of Sciences?" minister lu had an indescribable feeling. he rushed out of the office and went to the mechanical research department.

Aside from researching various mechanical technologies, the mechanical research Department also researched robots.

Minister Lu immediately found an academician in charge of mechanical research.

The academician also seemed to have something to do. He reported to Minister Lu, " Minister Lu, I have good news for you. We have already cracked the joint technology released by the United States. If we continue to study this technology, it is indeed possible to solve the core problem of the mechanical bone armor technology.

"Academician Fang, America's joint venture technology isn't important at all!" Minister Lu immediately took out his phone and showed a video to academician Fang, " "Watch this video first."

Academician Fang took the phone and was stunned when he saw the video. "Minister Lu, this is the movie 'Transformers', right? My grandson loves watching this movie, but to create this kind of mechanical body is not something that we can do with our current technology. With the current robot technology in the world, it may not be possible to create such a perfect mechanical body in the next 30 years. After all, this is only a science fiction product in the movie."

Minister Lu immediately said, " " academician fang, take a closer look at this video. it's not a movie. it's a real scene in you city. "

"Impossible!" Academician Fang immediately started to watch the video again. However, as he watched, he realized that there was something wrong with the video. It really didn't look like a movie.

he subconsciously asked, 'this isn't a special effect? it's not editing?'"

no, " Minister Lu shook his head. boss Qin said it himself. It's a little toy that professor Wang made.

"A small thing? The thing that the world might not be able to make in the next 30 years is a small thing?" Academician Fang was very excited.

If this was a small thing, what was the point of them not being able to make a small thing?

But then, academician Fang realized the main point. Minister Lu, we have to make a trip to you city. This technology must be closely protected. With this kind of mechanical technology, it can be used in the battlefield to replace soldiers. It can even replace all kinds of dangerous work.

"Didn't academician Jin and his team already reverse-plant the space Seed for their rocket project? If the seeds can be planted on that planet, then we'll be able to use the plantation as the center to explore the surroundings. At that time, we'll be able to use this technology."

Minister Lu naturally knew about this and immediately comforted him, " academician Fang, don't worry, I already sent a message to my Secretary. We'll be there soon.

He naturally understood what this technology represented.

optimus prime and megatron could be said to be epoch-making to a certain extent.

At the same time.

The internet was even more lively.

Especially the tourists of Linlin Scenic Area, many of them were already paying attention to the entrance of the scenic Area.

Through the latest news on WeChat and the Internet, everyone knew that Optimus Prime and Megatron were heading toward the Linlin Scenic Area.

these two big guys were still fighting as they rushed to the linlin scenic area.

very quickly.

as expected, the roar of a car could be heard.

The huge muscle truck and the Titan Tank truck were driving toward the scenic Area at high speed.

At this moment, who still did not know that these were Optimus Prime and Megatron?

In the scenic Area, there were drones flying in many places. These were the tools that the tourists had brought. Many tourists liked to take videos, especially wide view videos.

they would buy a drone to film.

Moreover, he had to admit that beautiful scenery videos captured by drones were sometimes even more shocking.

Through the drones, the tourists could also see the two speeding cars more clearly. It was Optimus Prime's muscle truck and Megatron's Titan can.

Optimus Prime and Megatron also seemed to be attracted by the Linlin Scenic Area. When they reached the entrance, they began to transform.

There were still some tourists at the entrance.

When the tourists saw this scene, they all ran in other directions in a panic.

in the trending video that had just appeared, wei zhentian had actually wanted to kill people. if optimus prime had not blocked that axe, those people would have been cut in half.

Who knew if Wei zhentian would go crazy here and kill someone?

If Optimus Prime failed to block the attack, wouldn't they be the unlucky ones?

How could he not run?

It was clear that these people could run because they had taken Optimus Prime and Megatron seriously. Otherwise, they would not have such a psychological effect.

however, at the same time, optimus prime and megatron had appeared in the linlin scenic area. for some reason, everyone was curious about what would happen next.

After all, this was the Linlin Scenic Area, and the attention and popularity were extremely high.

This time, it was obviously different.

After Optimus Prime and Wei zhentian arrived at the Linlin Scenic Area, they did not fight like before.

Ever since the entrance of the forbidden Third Ring Road, the two of them had fought more than once. Now that it was deformed, he actually stopped fighting.

Wei zhentian even walked forward and stood at the entrance of the Linlin Scenic Area. Then, he looked inside and actually sighed with emotion. what a beautiful place. This hell-like planet actually has such a paradise!

optimus prime also stepped forward. " really? this is the first time i've seen such a beautiful place. wei zhentian, are you willing to destroy such a beautiful place? "

wei zhentian actually shook his head in a mystical manner. " if this place is destroyed by anyone, I will destroy this hellish planet.

"Megatron, let's protect this place together!" Optimus Prime seemed to be trying to persuade him.

Wei zhentian was even more miraculously persuaded. Optimus Prime, this is the first time I've agreed with you. I want to be the security guard here. Who's the manager here? get the hell out.

as he said that, wei zhentian immediately started clamoring.

When they heard that Wei zhentian was going to be a security guard at Linlin Scenic Area, all the tourists who saw this scene almost lost their balance and fell.

Did they hear it right?

Wei zhentian, who had always wanted to destroy the earth, said that he wanted to be the security guard of Linlin Scenic Area?

The beautiful scenery of Linlin's Scenic Area had moved the seed villain?

Naturally, this was only for the tourists who reacted slowly.

The quick-witted ones guessed that these two big guys must have been created by Linlin's laboratory. This was a special event in Linlin's Scenic Area, right?

But this was too awesome.

the security guards seemed to have been briefed long ago. they immediately became dramatic and reported in a panic, "

Captain, bad news! Optimus Prime and Megatron have arrived at our Scenic Area!

"Manager Chen, they want to see President Lin."

[optimus prime and wei zhentian said they wanted to be linlin scenic area's security guards!]

"they said they wanted to protect the linlin scenic area!"

"....."

Around them, the tourists were all stunned. Many people who were filming with their mobile phones could not believe their ears. They took out their mobile phones and replayed the videos they had recorded.

After listening to the voice again, they were sure that Wei zhentian really wanted to be a security guard at Linlin Scenic Area.

Not long after.

Lin Lanzi rushed over in her car from outside.

She was from the laboratory, so she naturally knew that she had a part to play. She even had two contracts in her hands.

when the security guards saw that she had arrived, an actor came forward and reported, " "Lin Qi, chief Lin, they said they want to be the security guards of the Linlin Scenic Area."

Lin Lanzi directly walked to Optimus Prime and Wei zhentian and asked, " "Are you really going to be the security guards of our Scenic Area?"

" human woman, " wei zhentian said, " don't waste my time, or i'll kill you. "

Madam, " Optimus Prime said gently, " we've decided to protect this Scenic Area. Please let us be the security guards.

Lin Lanzi directly raised the two contracts and said,"You have to sign a contract to be a security guard in our Linlin Scenic Area. You have to sign a security contract first."

how troublesome, human woman. I really want to kill you. Wei zhentian said, extremely dissatisfied.

"Wei zhentian, since you want to protect this place, you should put away your violent temper," Optimus Prime immediately said.

"Damn it, Optimus Prime, do you want to control me?" Wei zhentian said in an extremely unhappy tone, but what made people feel like fainting was that he actually squatted down and looked at the contract.

" ? ? ? ? "Tourist (1)

" ? ? ? ? "Tourist (2)

" ? ? ? ? "Tourist (3)

At this time, even the stupidest person could understand a little, but that was even more shocking, okay?

It was not just the tourists. Soon, the scene that happened in Linlin Scenic Area was uploaded to the internet.

While the entire internet was focused on Optimus Prime and Megatron, the scene that happened in Linlin Scenic Area caused a sensation on the internet.

In the University.

After Chen Xue and her classmates found out that Optimus Prime and Megatron were in you city, they had been paying attention to the news on the internet.

This time, a female student stood up and said in surprise, "everyone, look at the latest news! Optimus Prime and weizhentian are going to be Linlin Scenic area's security guards!

This attracted the attention of everyone in the classroom. They immediately went online and saw the latest video. It was the funny scene of Optimus Prime and Wei zhentian looking at the contract as security guards.

Optimus Prime and awe-inspiring heaven went to Linlin Scenic Area. Everyone was guessing what would happen in the end, but who would have thought that these two were going to find jobs!

At this moment, even the stupidest person could guess that this was a scene directed by Linlin company.

In other words, Optimus Prime and weizhentian were made by Linlin's laboratory?

So powerful?

"Then, when I go to the scenic Area for my internship, will I be colleagues with Optimus Prime and Megatron?" Chen Xue asked in surprise.

[Chapter 1423 644! Security Work, Reported](#)

It wasn't just Chen Xue and her classmates.

The people who were paying attention to this matter on the internet also saw the video of Wei zhentian becoming a security guard.

In the video, Wei zhentian and Optimus Prime were shouting that they wanted to be security guards. They even squatted down and looked at the contract seriously. This really made everyone stunned.

By now, everyone knew that Optimus Prime and Megatron were probably made by Linlin's laboratory.

After all, the real Megatron wouldn't go to a Scenic Area to be a security guard. It would only want to destroy the earth.

Moreover, that was a movie character, after all. There was no real Megatron in the real world.

In addition, Linlin's laboratory was always able to produce magical things.

this time, there shouldn't be any problems with creating a technological mechanical body, right?

It was just that this was too shocking.

As soon as the video was released, it attracted countless people.

One had to know that some people had initially thought that they were really Optimus Prime and Megatron.

If they were fighting, smashing, and causing destruction in the city, people might really take them for real ...

Who had ever seen such a real Optimus Prime and Wei zhentian?

it was as if they had been directly moved out of the movie.

How could he suppress his shock and curiosity if he did not go to the Linlin Scenic Area to take a look at Optimus Prime and Megatron?

Linlin Scenic Area.

under the watchful eyes of all the visitors, Optimus Prime and Megatron actually used their fingers to grab the pen, which was extremely small to them, and signed their names on the contract.

This also meant that from today onwards, they would be the security guards of the Linlin Scenic Area.

What shocked all the tourists even more was that Optimus Prime and Wei Zhentian were also standing guard at the entrance of the scenic Area as if they were very professional.

this attracted countless people to take photos.

When Chen Li arrived with you city's people, he also looked curiously at the Optimus Prime and Megatron at the entrance of the scenic Area.

These two big guys were now the most loyal security guards of the scenic Area.

The operation at Linlin Scenic Area was really shocking.

If even a person like him was so shocked that he could hardly come back to his senses, it would be even more so for the other ordinary tourists, right?

"Hurry up and go back to the county to inform the traffic Department." When Chen Li thought of the popularity of the internet, he hurriedly said to the person beside him.

The Linlin Scenic area's operation was indeed shocking, but with such a terrifying popularity, he could imagine how many tourists it would attract.

By then, there would probably be traffic problems.

The fifth ring had just been released, and the sixth ring was still under repair. He couldn't embarrass you city so quickly.

Chen Li left in a hurry and returned to the county to make arrangements.

Time passed.

the Linlin scenic area was destined to be popular today because the enthusiasm of the tourists was difficult to calm down. even in the middle of the night, there were still countless tourists taking photos of Optimus Prime and Megatron.

In the middle of the night, another Optimus Prime and Wei Zhentian also sneaked into the scenic Area and arrived at the square.

They were different from Optimus Prime and Megatron at the entrance. These two Optimus Prime and Megatron were specially used for performing in the square.

...

The next day.

Even though Chen Li had made arrangements with the traffic Department in advance, he was still dumbfounded. It was because even after he had made the arrangements, there was still a traffic jam.

Therefore, sometimes human strength couldn't go against traffic problems. The more roads were built, the more traffic would be blocked.

Chen Li was speechless when he received the report.

Naturally, the internet couldn't help but be filled with curses again. The traffic jam in your city became a display of the incompetence of your city's officials, which really made Chen Li and Sun Xian feel wronged.

Could they really be blamed for this?

The internet was already scolding him, so naturally, the people in the traffic jam were even more angry.

Zhang Shiju was cursing in the car.

He was also a movie lover and had watched all the movies in the 'Transformers' series.

Hence, he was naturally familiar with Optimus Prime and Megatron.

The Optimus Prime and Megatron produced by Linlin Company had shocked him, alright?

It was so realistic. Whether it was the shape, transformation, or battle, it was exactly the same as the game.

He had never thought that such a thing would really appear in reality, so he naturally could not help but come to take a look.

He even thought that if Optimus Prime and Megatron really had souls, how magical would that be? Perhaps the world would be different then.

He didn't know how long the traffic was, but the two cars he was in finally entered the third ring Road.

Zhang Shiju immediately recognized that the entrance was where the video had started.

The intersection point was too easy to recognize.

Finally, the car stopped at the Linlin Scenic Area's parking lot.

After Zhang Shiju got out of the car, he heard tourists heading towards the entrance of the Linlin Scenic Area one by one as he walked out of the parking lot.

They were clearly here for Optimus Prime and Megatron.

Zhang Shiju also strode in and saw two tall figures in the distance. They were none other than Optimus Prime and Wei Zhentian.

What surprised him was that Optimus Prime and Wei Zhentian each had a large security epaulet on their shoulders. There was even the Linlin Scenic Area's logo on it.

More importantly, the two big guys were walking around with a loudspeaker and shouting, "

Optimus Prime: " everyone, line up and enter the scenic Area in an orderly manner. Please take care of the environment. No stepping, picking, folding, or throwing rubbish!

Wei zhentian, "I'll kill whoever dares to cause trouble."

Optimus Prime: " Wei zhentian, watch your attitude. The tourists are God!

"optimus prime, i'll kill you as well if you continue to talk nonsense!" wei zhentian said.

Zhang Shiju unconsciously walked closer to them. The quarrel between the two really made people feel like they were in a movie and in the scene.

[Chapter 1424 644-Security Work! Reported! 2](#)

Optimus Prime and Wei zhentian were too real.

If they weren't really Optimus Prime and Megatron, they must be under the control of Linlin Scenic Area.

All the tourists were surprised by Optimus Prime and Megatron. They wanted to know how Linlin villa had created such real Optimus Prime and Megatron, and how Linlin Scenic Area had controlled them.

it was a pity that linlin scenic area didn't disclose this information at all, so it was obviously very mysterious.

But the more mysterious it was, the more curious it was.

At this moment.

In a specially renovated office in Linlin villa's work area, Lin thirteen and Huang Yuan were carrying out various activities with the sensor equipment.

Optimus Prime and Megatron sensed their control and did the same.

More and more tourists had arrived at the scenic Area, but they were all blocked at the entrance, listening to Optimus Prime and Wei zhentian's repeated conversation.

Zhang Shiju couldn't help but take out his phone and take pictures of Optimus Prime and Megatron. It seemed that all tourists were no exception.

However, there were always exceptions. A slightly chubby woman with a thick layer of Foundation expressed her dissatisfaction and even scolded the child beside her, " "Look, why do you have to watch Transformers? what's there to see? you're full of vulgarities, and you even killed humans. i really don't know what this linlin scenic area is thinking, fighting and killing, teaching the children bad things!"

When Zhang Shiju heard this, he looked at the woman, speechless.

what the hell was this?

He didn't think there was anything wrong with this conversation. How did he teach the child the wrong way?

among the tourists, there were quite a number of optimus prime and megatron fans. someone was unhappy and retorted, "

"Big sis, didn't you hear what Wei zhentian said about causing destruction?"

that's right. They're just having fun. Do you really want to cause trouble in this Scenic Area? "

it's really true that ugly people do many strange things. Anything twisted in the heart is bad!

perhaps it was this sentence that stung the fat woman and made her fly into a rage, " society is developing and morality is falling. People have already said that they want to kill humans. This is a threat. This is a twisted value!

these words made the surrounding tourists even more speechless. the world was really full of strange things, and there were even more strange things.

The fat woman looked around and was even angrier. She pulled the child away and shouted, " just wait and see. I'm going to report them. You don't know what my husband does for a living.

As she spoke, the woman went back to the parking lot and took out her phone to make a call.

When she reached the parking lot, she called him and said, " help me publish a news video to report the Linlin Scenic area's Optimus Prime and weizhentian. They have improper values, Qianqian. Don't care if my husband knows or not. If you don't do as I say, I'll go back and ask my husband to fire you, Qianqian.

At the entrance of the scenic Area, the tourists did not take the fat woman's words to heart.

Zhang Shiju was the same.

At this moment.

another security guard walked up to optimus prime and megatron with a megaphone in his hand. " everyone, please don't block the entrance. We want to watch Optimus Prime and Megatron's battle performance. There's even a battle performance of Optimus Prime and Megatron in the square.

these words piqued everyone's curiosity.

Zhang Shiju was also the first to enter the scenic Area, and then he found a guide.

One of the signs in the scenic Area pointed to the sci-fi Plaza, and Optimus Prime and Megatron's portraits were printed on it.

As long as one's brain was normal, they would definitely know the meaning of this signboard. It was the Plaza where Optimus Prime and Megatron's performances were held.

Zhang Shiju soon arrived at the square. He could see that the square had been surrounded by a fence, and outside the fence were many tourists who had been attracted to the square like him.

Behind the fence, two tall cars could be seen. They were the muscle truck and the Titan can. They were Optimus Prime and the prototype.

Was this another Optimus Prime and Megatron?

How many Optimus Prime and Megatron did Linlin Scenic Area get?

Perhaps it was because they saw that most of the tourists had gathered around them, Optimus Prime and Megatron inside the fence began to change shape.

The transformation process was just as cool and dazzling as the movie.

There were two other people who were watching Optimus Prime and Megatron's transformation. They were Minister Lu and academician Fang.

The two of them had arrived at the manor without informing Qin Lin because they wanted to see Optimus Prime and Wei zhentian with their own eyes.

at the entrance, the two of them had already seen optimus prime and megatron's magic.

academician fang was in the field of robotics, so he knew how amazing it was for optimus prime and megatron to be able to perform those actions so smoothly and so naturally.

That technology was definitely not something that the Chinese Academy of Sciences and related research laboratories around the world could produce.

But now, professor Wang had produced it in Linlin's laboratory. How terrifying was his ability?

After Optimus Prime and Megatron successfully transformed, they began to curse at each other.

Wei zhentian, I'll definitely stop you and destroy you today!

"Optimus Prime, just you? Stop talking big. Today, I'm going to break you!"

Wei zhentian, don't even think about making any mistakes in this Scenic Area. Don't even think about causing any damage. I'll be watching you.

"Optimus Prime, the mistake in your eyes is justice in my eyes."

"Wei zhentian, is your justice like your exhaust?"

" optimus prime, your exhaust gas is also over the limit. how did you enter you city's third ring road and come here? "

As soon as this conversation came out, people around them burst into laughter.

At first, the conversation was normal. It was like the dialogue between Optimus Prime and Megatron in the movies.

However, the last two sentences were obviously self-created jokes.

Optimus Prime and Megatron were actually spewing exhaust gas at each other. They really wanted to have exhaust gas when they were in car form.

It was just that no one had expected them to trash talk about this.

At this moment, Optimus Prime unsheathed the longsword on his back and slashed at Wei zhentian.

Wei zhentian also drew his giant axe.

Just like that, the two big guys started fighting.

the battle was very exciting, and it was all kinds of fighting moves. to a certain extent, it was better than the movie.

After all, the battle between Optimus Prime and Megatron in the movie could only be designed with a few moves and then carried out with special effects.

Now, it was completely two retired Special Forces soldiers using modern Combat to control the two guys to fight, so it was naturally more enjoyable to watch.

academician fang and minister lu were thinking further.

The fact that Linlin Scenic Area had already produced two Optimus Prime and two megatons meant that this technology could be used to mass-produce them.

looking at the battle scene, if the metal used was strong enough, it would be impossible to destroy them without anti-strategic weapons.

If that was the case, just the long swords and giant axes in their hands could cause terrible damage.

Think about it. If there were 100 Optimus Prime and Megatron charging at the same time, what would the battlefield look like?

He didn't dare to imagine it.

The battle between Optimus Prime and Megatron was indeed exciting. When the battle ended, Optimus Prime and Megatron stopped and continued to spout rubbish.

Optimus Prime, you're lucky. I'm almost out of gas now. I'll take a rest!

"wei zhentian, you should be glad that i'm out of gas too!"

After saying that, the two of them transformed back into the original appearances of a muscle truck and a Titan Tank truck.

Obviously, this meant that the performance was over, the visitors could leave, and the next batch of visitors would come in.

Zhang Shiju understood what he meant, so he left the square, still somewhat unsatisfied.

however, this trip to the linlin scenic area made him feel that it was worth it.

It was true.

If they didn't already know that Optimus Prime and Megatron had been produced by Linlin's laboratory, no one would have thought that these two were fake.

It was almost exactly the same as the movie. One could only sigh at the technology of Linlin's laboratory.

After leaving the square, Zhang Shiju logged into mouyin and wanted to upload the video he had just taken to the internet and share it. However, when he opened mouyin, the first video that popped up made him stunned.

Optimus Prime and Wei zhentian had been reported? And he was reported by a very famous news media.

What the hell was this?

[Chapter 1425 645-It's Impossible To Take All The Blame](#)

Director Zhang had not expected that the pillar of the Linlin Scenic Area and Wei zhentian would be reported.

The well-known news media reported and criticized Wei zhentian for being anti-human, saying that Wei zhentian's three views were wrong when he opened his mouth to kill humans.

linlin scenic area, optimus prime, and megatron were at the peak of their popularity. the sudden report swept through the hot search and was seen by countless people.

Looking at the news video, Zhang Shiju immediately thought of the fat woman from before.

Did this woman really report him?

before the other party left, she was still talking about what kind of person her husband was. she didn't expect him to have some power. in a short time, this well-known news media had published reports and criticisms.

To be honest, what was he most afraid of now? It was this kind of media that reported without distinguishing between right and wrong. In the end, it would cause public opinion, and that would be terrible.

not only zhang shiju, but many tourists who saw the report also thought of the fat woman.

They were all present at the time, and some people even recorded the process.

They were already unhappy with the woman, and now that they saw the video, they were even more unhappy.

Soon, people began to upload videos of the scene to the internet.

It could be said that there was no problem with Wei zhentian's words at Linlin Scenic Area, but the fat woman was indeed a weirdo.

Some of the live videos were quickly posted on the internet. They had to clear the air for the Linlin Scenic Area, Optimus Prime, and Megatron.

On the other side.

The fat woman returned to quanshi with her child.

Quan city was not far from Ming city and not far from the Linlin Scenic Area. When she reached home, the first thing she did was to take out her mobile phone to check on the things she had instructed.

Her husband was the boss of Quan city's new media company. Her husband had been in this industry for more than 20 years, and the media company was also very famous in the industry.

in addition, there was enough credibility, so even the current Short Video accounts on new media had a lot of fans.

That was why she had asked her husband's company to report Optimus Prime and Wei zhentian.

She couldn't be bothered to argue with those tourists who didn't have the right values. If this matter continued to spread, when Optimus Prime and Megatron got to see it, they would have to rectify it.

After going online, she realized that the news of Wei zhentian being reported had already become a hot topic. The entire internet was discussing this matter, and the media account that reported it was the official account of her husband's company.

This kind of popularity would also attract a lot of attention to her husband's company's official account and bring in a lot of traffic, right?

She had helped her husband.

as he was thinking, the door opened and a slightly bald man walked in. seeing his wife smiling, he asked curiously, " I just came out of a business trip and saw you so happy. What good news? "

"hubby, you'll know when you get to the office. i've got you a big gift," the fat woman said immediately.

Guo qitao didn't ask much after hearing his wife's words, but he was thinking about what kind of gift it would be.

...

Linlin Scenic Area.

Minister Lu brought academician Fang to Linlin Manor.

the security guards knew who minister lu was, so they didn't stop them and let them in.

"Minister Lu, the scenery of this Linlin Manor is really beautiful." The moment academician Fang entered the manor, he said in surprise, " no wonder those academicians are all fighting to come here for a vacation.

"after you understand optimus prime and megatron's technology, you might have to stay here for a while," minister lu said with a smile.

academician fang was curious.

Now, he was most looking forward to Optimus Prime and Megatron's technology.

minister lu brought academician fang to qin lin's office.

The office door wasn't closed. As soon as they entered the office, they saw Qin Lin frowning at his phone.

"Boss Qin, what's going on?" Minister Lu stepped forward in confusion and saw the video on the phone.

Linlin Scenic Area, Optimus Prime, and Megatron have been reported, and they still have bad values?

" ? ? ? "Minister Lu was very confused.

He and academician Fang walked in and saw Optimus Prime and Megatron, but they didn't find anything wrong with their values.

"Minister Lu, what are you doing here? For Optimus Prime and Megatron?" Qin Lin came back to his senses and immediately greeted Minister Lu when he saw him.

Minister Lu took out his phone and checked the internet.

he also wanted to know what was going on with the news report on linlin scenic area.

After checking, he knew what was going on. The internet was abuzz with this matter.

It was a company called new media that had reported Linlin Scenic Area, Optimus Prime, and Megatron.

It was because of what Wei zhentian had said, 'if humans dare to cause trouble here, I'll kill them'.

Minister Lu frowned. There was nothing wrong with what he said. He probably just wanted people to remember that they should not cause any destruction in the scenic Area.

The appearance of such a form of conversation actually gave him a sense of humor, and there was no need to go overboard.

He looked at the videos sent by the two visitors and had a rough idea of what was going on. It was probably the fat woman's doing.

this was really ...

The news media nowadays really thought that they could do whatever they wanted just because they had the right to speak and some fans, regardless of the consequences.

Minister Lu also picked up his phone and made a call. He said, " Minister Hu, that's right. Some facts can't be distorted. Optimus Prime and Megatron didn't do anything wrong. We can't lose face in front of the robots.

He hung up the phone.

boss Qin, " Minister Lu said to Qin ran, " those things on the internet are just small things. There's no problem.

[Chapter 1426 645-It's Impossible To Take All The Blame](#)

qin lin nodded with a smile. he knew that the issue on the internet had been resolved after minister lu made the call.

"Minister Lu, you're here for Optimus Prime and Megatron's technology, right?" he said with a smile.

Minister Lu didn't deny it. yeah, it's hard to believe that we already have such incredible technology. Oh yeah, this is academician Fang, an expert in robot research. He wants to discuss it with professor Wang.

Hearing this request, Qin Lin also called professor Wang and asked him to come to the manor and bring the technical drawings.

When professor Wang received Qin Lin's call, he naturally left the laboratory as soon as possible.

He was now so impressed by Chairman Qin that he followed his every order.

At this moment, the situation on the internet changed.

This was because the most authoritative official news channel had just released a news video: don't embarrass yourself in front of the robot @ new new media company.

this was the most direct conclusion from the official media, and they even tagged new new media.

One had to know that videos of new media companies criticizing Optimus Prime and Megatron had gone viral on the internet. The amount of attention they received was terrifying.

Now that the official media had spoken, they had directly come to a conclusion.

How could he be polite?

Many people felt that there was something wrong with the video that reported Optimus Prime and weizhentian for no reason. Now that the officials had spoken and endorsed it, why would they be polite? He immediately started scolding the account of the new media company.

On the other side.

guo qitao took a break and got ready to go to the company.

When the fat woman saw this, she said proudly, "Hubby, when we get to the company later, if you're satisfied with the gift I've given you, you have to give me a gift too."

"I know." Guo qitao nodded. Since his wife had said so, she must have put in a lot of thought into this gift. He would just buy her some jewelry when the time came.

with that in mind, guo qitao drove to the company.

When he arrived at the office, he was even more curious about the gift that his wife had mentioned. However, his Secretary ran up to him in a hurry. "director guo, it's bad. something has happened. our company's media account has been criticized by the official news channel. also, the entire internet is scolding us. "

moreover, after those advertising partners found out that we were named by the official news channel, they wanted to terminate their contracts with us. They even said that it was because of us that they were affected and wanted us to compensate them!

"What?" Guo qitao was stunned when he heard that. He had no idea what was going on and quickly asked, "What's going on?"

it's manager Qi's order to release the news, " the Secretary replied hurriedly. it's to report the Jinlin Scenic area's Optimus Prime and Wei zhentian!

as he spoke, the secretary handed a mobile phone to guo qitao and played the relevant video.

Guo qitao was furious after watching the news video.

What was wrong with Optimus Prime and Megatron in the video?

There's no problem at all, okay?

Wei zhentian's words about killing humans could be used to create hype under special circumstances. However, the other party was Linlin Scenic Area, and they had to consider whether it was worth it.

Now, his company's manager, who was in charge of this section, had released this kind of news without permission. Wasn't he looking for trouble?

"Get manager Qi here." Guo qitao said angrily.

The Secretary did not hesitate and immediately called manager Qi over.

Once manager Qi arrived, Guo qitao said angrily, "Manager Qi, do you still have a brain? Was the news report about Linlin Scenic Area something that could be casually posted? Do you know the consequences?"

"I know!" Manager Qi said directly.

guo qitao was even angrier when he heard that. You deserve to die."

Manager Qi, on the other hand, took out a resignation letter with a smile and handed it to Guo qitao, "director Guo, you should watch more videos and you'll know the reason. Your wife asked me to publish the news. She said that if I don't publish it, you can fire me. Anyone can take my position.

so, this is my resignation letter. In fact, your old rival, Wanxiang media, has been trying to poach me. I remember that I didn't agree to President Guo's promotion, but this time I agreed. This news is my gift to Wanxiang media.

"what?" Guo qitao was stunned when she heard this.

He didn't expect that the news was sent by his wife. He immediately picked up his phone and checked the internet. As expected, he soon saw a video about his wife.

It was a video of tourists criticizing his wife at Linlin Scenic Area. The video comments section was basically full of abuse against his wife.

"This is the gift?" guo qitao was so angry that he almost vomited blood.

If he was named by the official news channel and his advertising partner wanted compensation, he would be directly killed.

However, manager Qi did not care about that. After handing over the resignation letter, he turned around and left.

Guo Qiqi leaned against the wall and instructed the female secretary, get lawyer li for me and ask him to draft the divorce agreement. Didn't she want a gift as a reward? I'll give it to her.

Guo qitao got the divorce agreement very quickly, then left the company with a face full of resentment and went home.

The fat woman was surprised to see her husband. "Honey, why are you back so soon? Did he drop something?"

"I didn't leave anything behind. I've specially come to give you a gift." Guo qitao said coldly.

The fat woman didn't seem to sense the strange atmosphere and asked, "Hubby, did you buy me a present? you should have seen the gift i prepared for you, right?"

upon hearing this, guo qitao's anger could not be suppressed. he threw the divorce agreement at the fat woman and left without looking back.

The fat woman subconsciously caught the divorce agreement. When she saw it clearly, her face instantly turned pale.

.....

linlin manor.

Professor Wang was also the first to arrive. He greeted Minister Lu, "Minister Lu, we meet again."

Minister Lu was full of admiration for professor Wang. He said with respect, "yeah, we meet again. This time, we'll have to bother professor Wang for some time.

He was a person who loved talent.

Professor Wang had not only developed the ice-sealing technique, but he had also developed the special fiber. These were all heavyweight techniques.

Now, they had actually researched and created technology that transcended the times like Optimus Prime and Megatron. This was simply amazing.

professor Wang, this is academician Fang, " he said immediately. he has a lot of robot technology to consult you on, especially Optimus Prime and Megatron.

"Professor Wang, I've heard so much about you. I'll have to learn from you this time," said fellow Fang.

"Academician Fang?" Professor Wang was also surprised.

He knew academician Fang, but the other party didn't know him.

He was a top expert in the machine field. Last year, Lu Zhou was very happy to get a ticket to one of his lectures.

The professor's lecture also benefited him a lot.

He didn't expect an academician to come and learn from him. He was flattered, but he also felt guilty.

because he knew what his skills were all about.

He could still maintain a good attitude when facing others, but when facing people like academician Fang and Minister Lu, his guilty conscience would be magnified.

minister lu and academician fang started to praise him, "

"I didn't expect there to be such a capable person like professor Wang in China."

that's right. I'm afraid that the jaws of the Western countries will drop from shock this time.

"professor wang's technology can be considered to have crossed an era in the research of robots."

"Yeah, professor Wang, when are you going to give a lecture at the Chinese Academy of Medicine?"

qin lin watched all of this in silence. this was the benefit of having someone being made the scapegoat. it didn't matter to him.

when professor wang heard their praise, he felt more and more guilty. he couldn't help but say, " Minister Lu, academician Fang, you're flattering me. Actually, the biggest credit for Optimus Prime and Megatron isn't mine, it's Chairman Qin. He drew the design of Optimus Prime and Megatron, and I only completed it according to the design.

Both Minister Lu and academician Fang subconsciously looked at Qin Lin.

" ? ? ? ?"Qin Lin was a little confused.

[Chapter 1427 Can You Believe That This Is Just A Toy?](#)

Qin Lin was really confused.

why was professor wang's mental fortitude a little weak? he had not even said a few words before he was implicated.

He looked at Minister Lu and academician Fang, and he said, " well, I just had an occasional inspiration and drew a design.

Seeing Qin Lin admit it, Minister Lu was even more amazed."Boss Qin, you're really too shocking. You've made such great achievements in plant genetics and animal genetics, but I didn't expect you to also make such achievements in mechanical research in such a short time."

Qin Lin immediately made up a story. Minister Lu, I've actually been thinking about Optimus Prime and Megatron for a long time. I really like these two characters. I actually spent a long time on them.

Academician Fang immediately said, " boss Qin, no matter how much time you spend, it's enough to prove your capabilities. You should know that all the countries in the world are working hard in this direction, and there aren't many results. You've already created such an amazing thing on your own. You're truly a genius. No wonder so many academicians in the Academy admire you.

Minister Lu also said,"academician Fang, am I right?" Boss Qin's talent is something that everyone can't help but admire."

Academician Fang nodded. that's true. He's amazing. It's a once-in-a-century event.

Qin Lin noticed that something was wrong. Why was he being treated the same way as professor Wang? he immediately said, Minister Lu, academician Fang, I drew the design, but it was professor Wang who implemented it. I don't know the details. Many of the problems were discovered and suggested by professor Wang and then improved.

you can talk to professor Wang about this. He knows better than I do. If it wasn't for professor Wang's help, Optimus Prime and Megatron wouldn't have appeared.

Are you kidding me?

He didn't know anything about this. No one knew the origin of this design better than him. It was better to kick the ball back to professor Wang first.

Professor Wang was touched by Qin Lin's words.

He was so guilty that he didn't even dare to accept the honor. Who knew that Chairman Qin would still take care of him? his decision to come to Linlin laboratory was the best decision he had ever made in his life.

Minister Lu and academician Fang didn't doubt Qin Lin's words. After all, professor Wang had developed the ice-sealing technology and the special fiber technology.

Moreover, he knew Qin Lin's personality. He was lazy and would not be happy to talk to him about this. He might as well talk to professor Wang directly.

the person who had personally created optimus prime and megatron would definitely have a better understanding of the technique than the drawing. in fact, he might even have a better understanding of the details.

" professor wang, i'll have to trouble you for the rest of the time, " minister lu said to professor wang. " as you know, there is a competition in robotics all over the world. you and boss qin are now our leaders. "

Seeing that they had successfully changed their target, Qin Lin also said, " "Minister Lu, how about this, I'll get someone to arrange a room for academician Fang. Oh yeah, professor Wang will be staying here for a while, you guys can have a good discussion."

"Then I'll have to trouble boss Qin." Minister Lu said immediately.

Qin Lin didn't stand on ceremony. He quickly got up and slipped away. The next topic was not something he could participate in. He didn't know anything. It would be embarrassing if he was asked.

qin lin left the office and went to find gao yaoyao. he asked her to arrange rooms for academician fang and professor wang.

After that, he didn't return to the office. Instead, he strolled around the manor. It was better for him to stay away from the discussions of professionals.

"Yes, yes, yes!"

yang's voice sounded.

qin lin looked over and saw little yang barking at him with a handful of grass in his mouth.

To this guy, the dog's tooth grass was the most delicious. All the dog's tooth grass in the field was the snack he enjoyed.

Yang's body grew even bigger. Perhaps it was because of Yu's genes, but he no longer looked like a crocodile.

One must know that Leviathan was an animal recorded in the Classic of Mountains and Seas.

He wondered how big this guy would grow in the future.

With Yang's current size, he could even sit on his own, let alone Qin Feng.

Little yang made his way to Qin Lin's side. Qin Lin looked at the crocodile, thought for a moment, and sat cross-legged on its back. He wanted to experience little Qin Feng's crocodile-riding experience.

Up to this point, he had never ridden this guy even after it had grown in size.

Assistant yang barked happily when he saw his master's actions. He carried Qin Lin on his back and walked around the manor.

It seemed to have long wanted its master to be this close to it.

However, not long after, a hissing sound was heard, followed by the hurried sound of horse hooves!

It was the little lion. Since the first time he had brought it to the manor, it had been running to the manor most of the time.

Everyone knew who its owner was, and no one stopped it. Even the security guards who saw it from afar knew to open the door for it immediately.

It was staring at Qin Lin from the side. There seemed to be something wrong with its gaze, and it even made people feel a sense of grievance.

this was the most frustrating thing about intelligent animals.

Why did she feel wronged?

qin lin seemed to realize something when the little lion stared at him. he got down from yang's back, feeling a little embarrassed.

Was the horse jealous of him riding the crocodile?

Seeing him get off little Yang's back, the little lion immediately leaned its head towards him affectionately.

[Chapter 1428 Can You Believe That This Is Just A Toy?](#)

Qin Lin also patted the little lion's head.

However, the little lion didn't seem to be satisfied with that. It even tilted its head and looked at its back, its meaning obvious.

qin lin laughed and climbed onto the back of the little lion.

The horse wanted to be ridden by her because it was jealous of yang, the crocodile.

Little yang seemed to be dissatisfied. It was rare for its master to ride it, and it was happy, but it was disturbed. It actually mustered up the courage to bark at little yang.

The lion cub did not want to be outdone. It turned around and barked at little yang, but this time, little yang immediately cowered and went back to eating grass.

Obviously, although this crocodile was one of the most ferocious animals, it was also one of the most cowardly animals.

In the evening, Qin Lin returned to the office and found that the discussion was still going on.

Professor Wang and academician Fang were looking at the design drawings of Optimus Prime and Megatron. They were in a serious discussion.

Seeing Qin Lin come in, Minister Lu handed him a piece of paper and said, " professor Wang and academician Fang talked for the whole afternoon and concluded a few very useful technologies. The first is the mechanical skeleton technology, the second is the gravity center technology, the third is the power system, and the fourth is the induction device technology.

even if these technologies are separated, they're still ahead of modern technology. Now, boss Qin has designed them one by one and professor Wang has put them into practice.

"I can only say that it's amazing. Boss Qin, how did you do it? I'm really curious about what you're thinking."

When Qin Lin heard this, he could only change the topic. Minister Lu, if I told you that Optimus Prime and Megatron were actually just toys that my father had come up with on a whim, would you believe me? "

Wasn't that so? It was a toy that his father had specially made for him.

minister lu was stunned and immediately said, " boss Qin, of course, I believe you. It's just that this toy is too big for little Qin Feng. However, it's also because little Qin Feng has a father who loves him that he wants to make a toy. In the end, he overmade it and produced such shocking technology. This story can be written in related textbooks in the future.

"Ran ran." Qin Lin didn't want to talk anymore.

Minister Lu requested again. boss Qin, after seeing this technology, I would like to ask you not to disclose the technology of Optimus Prime and Megatron to anyone else other than the scenic Area. Otherwise, I'm afraid that someone else will get their hands on it and cause trouble.

qin lin nodded.

He naturally understood this principle. He had known this since Optimus Prime and Megatron had been created.

At the same time.

While Optimus Prime and Megatron were on fire in China, there were already related videos circulating overseas.

After all, there were many foreign tourists who had seen Optimus Prime and Megatron, so they would definitely want to show off.

Stanford was one of the most famous universities in the country. Every year, it would send a lot of talents to the country and the world.

The robot research technology here was also the most advanced in the world, and it had made a huge contribution to the robot research in America.

At this time, a blonde old man was giving a lecture. This blonde old man was also the famous professor Lu Weisi in America. He was also the first academician of Stanford's robot science.

Lucas's lectures had always been casual. Even if he had a sudden idea, he would get someone to inform him and start the class.

Today was exactly like this, the class started late at night.

However, whenever he lectured, Stanford's Master's and PhD students in mechanical research would come as soon as possible. Even university students could come because his class did not have these restrictions.

In this class, Lu Weisi would be explaining the latest robot research technology that his team had developed.

the robots we're researching can already achieve initial center of gravity control, " said Lucas. next, we just need to solve the problem of the mechanical bone armor and we can take our robot technology to the next level.

it can be said that in this area of research, we are at least ten years ahead of the world. Even in a big country that claims to be very good at robot research, the robots they developed are still walking on wheels.

if they put the same intelligent program into a small cylinder and make it look cute, they will be called robots. That's ridiculous. Right, they will also give these 'robots' cute names such as Xiao du, Xiao Yi, aiyou Pixiu, etc.

This caused the entire class to burst into laughter. Many students knew which country Revis was talking about.

In fact, that country's robot research was the best after America.

It was a pity that other people didn't have the right to look down on them, but Lu Weisi did.

This was because Lu Weisi was the best in this area.

Her words also caused dissatisfaction. An international student stood up and said, " professor Lu Weisi, I don't think you're right. You might have misunderstood something because technology has been improving and changing all the time. Maybe the country you're looking down on already has robot technology that you can't catch up with.

Everyone looked at the International student. Seeing his black hair and yellow skin, everyone booed.

Who didn't know which country he was from? he was from the country professor Levis was talking about.

Obviously, Lucas also knew about it, so he teased, " "This student, it seems that you don't know much about the research of Machine Science. Or, do you think that your country has the most advanced robot

technology? Then I should ask you to read more information, because the most advanced robot technology is here, in the laboratory of the school you are studying in."

The International student frowned. Without saying anything, he picked up a laptop and started working.

Everyone looked at him in confusion.

A moment later, a video appeared on the multimedia screen behind Lucas. It seemed to be controlled by the International student.

However, after the video was played, Lucas and the students were all attracted by the image.

A truck with a can of oil and chicken appeared and drove quickly on the road.

The moment the two cars appeared, most of the beautiful students in the classroom knew that they were the prototypes of Optimus Prime and Megatron.

After all, Optimus Prime and Megatron were the products of their country.

Sure enough, Optimus Prime and Megatron began to transform a moment later. The cool transformation process attracted the attention of all the students.

which Transformers movie is this? " someone exclaimed. I don't seem to have any impression of it.

I don't have any impression of it either. I think they cut out some parts or forgot about it.

haha, this yellow-skinned student is playing the video of the Transformers. Does he think that Optimus Prime and Megatron are made by his country? "

"He can't be that stupid, right? those are just characters in movies, and they're from our comics."

indeed. If they say that Optimus Prime and Megatron are robots made by their country, I would feel that he should see a doctor. Yes, a neurologist!

"....."

in the video, optimus prime and wei zhentian had also begun fighting. the battle was intense and exciting.

The sparks from the collision were even more dazzling.

It seemed that only movie special effects could create such a scene.

Lurtz paused the video when he heard the discussion around him. He then smiled at the International student and said, " this student, you seem to have played the wrong video. When you want to prove that the robots in your country are better than others, you should play a video of your country's robot research, not a movie.

if we just play a movie and say that our country's robot technology is better than the world's, then if we play a movie from big white, does that mean we can announce to the public that we have a healing robot like big white? "

or rather, if we play Iron Man's movie, does that mean we can also say that we have developed the magical Iron Man armor? "

his words made all the students in the classroom burst into laughter.

Because this was indeed the case.

[Chapter 1429 647-Sending Himself To The Door!](#)

Lu Feng heard the laughter of the students around him, but he frowned.

These arrogant people didn't even want to watch the video.

Optimus Prime and Megatron were indeed beautiful products, but their country's laboratories had perfectly restored these two things.

It was almost exactly the same.

"Alright, let's just treat this as a humorous joke!" Obviously, Lucas didn't want to get entangled in this matter. As the leader, as someone who stood at the top, he also felt that the other party wasn't worthy.

Lu Feng operated the laptop again and the video on the screen started playing.

professor Lu Weisi, " he said again, " please watch this video!

Revis seemed to be annoyed by the entanglement.

However, the next moment, he was stunned by the Chinese words of the people around him.

Following that, he could see signs in Chinese characters on the road.

This seemed to be some place in the eastern country.

professor Lu Weisi, this is our country's machinery technology, " Lu Feng said with a smile. Optimus Prime and Megatron are good products of your comics, but our country's laboratories have replicated them.

"Impossible!" Said Lucas directly.

He didn't believe that such a movie product could be replicated by someone. This kind of ability was something that even they, who had the best robot research technology, couldn't do.

The surrounding students were also in an uproar.

"Is he joking?"

"Optimus Prime and Megatron aren't things that can be made with current technology."

this video should have been edited. With the current mechanical technology, it's indeed impossible to make robots fight as smoothly and cool as human bodies.

"....."

No one would believe that this was true.

After all, Stanford's Robotics Laboratory was the most technologically advanced one. If it couldn't be done here, it would be impossible to do it anywhere else.

Lu Feng didn't argue. He operated his laptop again, and another video played. It was the video of Optimus Prime and Megatron on the domestic internet.

There was even a comical video of Wei zhentian squatting down and reading a contract as a security guard at the Linlin Scenic Area.

The videos completely shocked Lurtz and all the students in the classroom.

The students couldn't help but make a ruckus.

"This Gu seems to be real!"

"How did they do it? This is just like the real Optimus Prime and Megatron!"

I can't believe it. I really can't believe it.

"....."

at this moment, lucas's heart was in turmoil.

He was the most powerful robot research expert, and he firmly believed that no one had the technology to create such a mechanical body.

However, the videos in front of him seemed to be the most real scenes, and they did not seem to be video clips.

Hello, fellow student. Lu Weisi immediately wanted to ask Lu Feng for details, but Lu Feng was nowhere to be seen.

Lu Feng had already walked out of the classroom with a smile on his face.

This was how these arrogant people should be shocked.

he had actually come here today on purpose because he knew about this class in advance.

He had decided to return to China. After studying and studying for so many years, he had to put the knowledge he had learned to good use. Linlin laboratory was the place he yearned to go.

In the classroom, Lu Weisi couldn't wait any longer. As an expert in this field, how could he remain calm when such shocking news was suddenly placed in front of him?

He was so anxious that it felt like there were tens of thousands of ants crawling in his heart. He wanted to know if this was true or not.

Lucas rushed out of the classroom and went to an office. He found a teacher who was good at the language of that Eastern country and asked him to climb over the wall and access the country's internet to check the news.

Very quickly, he received the exact news.

That country had really produced Optimus Prime and Megatron, and they were almost exactly the same as the ones in the movie.

Now, almost everyone in that country knew about this.

However, he couldn't figure it out at all. The eastern country's technology in this area had always been very backward. According to the information he received, the other party was still cracking the technology he had developed before.

Now, he was actually telling him that the other party already had such technology? He was caught off guard, as if the world had changed.

It wasn't just him. Many people in America knew about Optimus Prime and Megatron. The news media, in particular, reported it without restraint. Soon, almost the entire country knew about it.

Most of the beautiful Chinese people didn't believe it. After all, it was something created by their country. Their country couldn't produce it, but it was produced by another country. It was very difficult to accept.

In a laboratory.

When he arrived, a researcher in the laboratory reported to him, "Mr. ADOS, the genetic structure of the purification grass and the Willow leaf duckweed is too complicated. We still have no clue. We need more time."

"I know." Adoxi answered in a daze.

He had now recognized the reality. Whether it was the purification grass or the Willow leaf floating duckweed, it seemed that he could not get his hands on them at all.

Whether he used official power or private power, what was the point of struggling? If the big boss of the capital wanted to give him such a difficult problem, he would just lie down.

Whether there were results or not depended on whether God would give him luck. If he waited for an opportunity without results, then the big shots of the capital would have to wait as well.

[Chapter 1430 647-Sending Himself To The Door!](#)

Just as he was thinking about it, adoxi's phone rang.

It was that Big Boss again.

He frowned and immediately felt that this person was going to ask him to do something that he couldn't handle.

Pressing the answer button, the voice of the big boss came over, "ADOS, I'll give you one more chance. Watch the video I sent you and think of a way to get this technology. I'll also fully support you in your promotion.

In the past, when Adolphus had heard this news, he would have been very excited. One more chance was always good. Now, he understood that a chance was actually no chance.

After hanging up the phone, he opened the video sent by the big boss.

He clicked on it and saw a video of Optimus Prime and Megatron. He subconsciously thought that it was a movie.

"What's the meaning of this? You want me to film a movie?" that was what Adolf was thinking, but when he saw the video, he immediately felt that something was wrong.

This was not a movie video at all.

The more he read, the more he felt that something was amiss. In the end, he understood that Optimus Prime and Megatron were actually created by that Eastern country.

They actually had such technology?

What made him even more surprised was that this technology seemed to have been developed by Linlin's laboratory.

This Kasaya

This kind of technology was very difficult to obtain.

He knew very well that any country would protect this kind of mechanical technology.

Moreover, it was Linlin Laboratory.

The fact that there was no news from the people he had sent explained everything.

This was an impossible task.

"Chance? It's better to go and beg God." Adoxi sneered and turned off the video. Then, he leaned back in his chair and took out his phone to play games.

He would let whoever thought this was an opportunity go. He didn't want to waste his time.

He didn't think that your city had that kind of tight defense, so he had a chance.

Of course, this was because Adolphus clearly understood this. Some people didn't think so, but felt that they had the chance to get this opportunity.

That was Dags from Universal Pictures. After Dags found out about Optimus Prime and Megatron's background, he rushed to your city as soon as possible.

The other party had used the copyright of their Optimus Prime and Megatron, so he had always wanted to see if he could get a chance from Linlin company.

Dags immediately arranged to meet Lin Lanzi. He was only qualified to meet her.

Lin Lanzi was a little suspicious when she saw the person-in-charge of global copyright company. Linlin Scenic Area only cooperated with them on the exterior copyright of Optimus Prime and Megatron.

It wasn't worth the other party's trip.

When dagis saw Lin Lanzi, he understood. Before he came, he had already investigated the Linlin Scenic Area and knew that the person in charge of the Linlin Scenic Area was this Oriental Beauty in front of him.

However, women were always at a disadvantage in business. Hence, he was very confident that he could benefit from Lin Lanzi.

Therefore, when dagis saw Lin Lanzi, he said, " MA 'am, our global has a partnership with your Scenic Area in terms of appearance, and it's been a pleasure working with you. Therefore, we hope to have further cooperation with you. After all, we're the best at the operation of Optimus Prime and Megatron.

lin lanzi knew the other party's purpose after dagis spoke. they were obviously here for optimus prime and megatron's technology.

Unfortunately, he couldn't make the decision on the technical aspect. That was something that belonged to the laboratory.

Therefore, she immediately interrupted dagis, " " mr. dagis, i'm really sorry. i've received news that our boss has decided to give up on using the appearance of optimus prime and megatron. he plans to use other appearances. you know, optimus prime and megatron are very popular now. it can be said that there are no exceptions. our boss doesn't want to help others promote them for free. "

"Ah!" Dagis was stunned.

He knew about Optimus Prime and Megatron's popularity. This popularity was also a huge benefit for worldwide because every country in the world knew about this.

And Optimus Prime and Megatron's copyrights were both theirs.

he had originally thought that he could take advantage of the copyright cooperation, but who knew that the other party would not use optimus prime and megatron's appearance?

Moreover, it made sense when he thought about it. If he had the technology to create popularity at any time, why would he help others advertise for free?

It would definitely be a bid, and the highest bidder would win.

With this technology, anyone's appearance would be popular.

Dagis realized how stupid he had been.

He quickly added, " Mr. Lin, you see, we've had a good time working together. You don't have to use other appearances. It's also very troublesome to modify it, isn't it? " Universal Corporation can give you the rights to all the designs of the Transformers. We're even willing to pay you an advertising fee as long as you continue to use our Transformers in the future."

" mr. dagis, i can talk about the price. in the end, we'll still have to see if anyone can offer a higher price than worldwide. " Lin Lanzi pretended to be thinking, but her heart was full of smiles.

This was really an unexpected surprise.

after that, dagis was completely led by the nose. lin lanzi drafted a contract. simply put, worldwide would also license the other exterior copyrights of the transformers for free, and they would also have to pay them a copyright fee regularly.

After dagis signed the contract, he also left dejectedly.

Lin Lanzi, on the other hand, took the contract to Linlin Manor, found Qin Lin, and handed him the contract.

Qin Lin took the contract and was a little stunned when he saw the contents. He had been thinking about Universal's copyright issue before because he had only given Elba movies.

What if Elba's father made another transformer for him, such as Bumblebee? that would be even cooler and more popular.

Copyright would be a problem then.

He didn't expect worldwide to come knocking on his door.

This was really unexpected.

After Qin Lin finished reading the contract, Lin Lanzi also left. He walked to the hall and saw professor Wang and academician Fang rushing in from outside with a stack of documents in their hands.

The information was naturally about Optimus Prime and Megatron's technology.

The two of them immediately greeted Qin Lin when they saw him.

"Boss Qin!" academician fang.

"Chairman Qin!" Professor Wang.

professor wang looked at qin lin bitterly. he had clearly pushed out the credit that didn't belong to him, but who knew that in the end, he still had to bear all the responsibility.

"Academician Fang, how's your research going?" Qin Lin asked.

" boss qin, " academician fang said guiltily, " i'm a little ashamed. with such a complete and detailed design, we still can't solve the problem. "

"Academician Fang, with your abilities, I believe you'll be able to solve it soon!" qin lin said with a smile.

Academician Fang was following Minister Lu's instructions to extend the range of use of the sensor.

this was because even though the current sensors were very sensitive to controlling Megatron and Optimus Prime, the range of control was not long enough.

If he really wanted to use it, for example, to replace some manual work or to put it into the battlefield, the sensing distance was not enough. It would be completely within the enemy's attack range.

Therefore, he had to increase the range of the sensor equipment, which would increase the connection with the satellite signal, but this was a difficult problem.

At least, in the short term, academician Fang couldn't solve it, not even with professor Wang.

The two of them chatted with Qin Lin for a while before returning to their rooms upstairs. They didn't want to waste any more time.

Qin Lin also returned to the inner area and went to the workshop. He took out an incubator with several seeds in it. They were the seeds that he had tried to cultivate before and were soaked in a special liquid.

Now that it was almost time, he directly entered the game with the seed.

Other people had to cultivate seeds to grow them, but he just had to enter the game to appraise them after he had cultivated them.

When he entered the game, he immediately saw the remarks of the planting:

[cultivated normal seed: normal]

[this is a seed that has been cultivated. Because the person who cultivated it is an unreliable fellow, it doesn't have too special attributes!]
