

## The Game 1431

### [Chapter 1431 648-How Is It Not Reliable? The Giant Pumpkin And Horse](#)

Qin Lin was speechless when he saw the remarks and information of the seeds he had cultivated.

The meaning of the note was very clear, but it was useless.

Qin Lin sighed. He also understood the truth that words on paper were always shallow, but practice would produce true knowledge.

Even though he had obtained knowledge related to plant genes through the mysterious stone tablet, and even though his knowledge could crush those professional professors, he still lacked practical experience.

He had never done such cultivation before, so it was difficult to cultivate any amazing seeds immediately.

However, Qin Lin was not a discouraged person. The more he acted this way, the more interested he became.

Therefore, after he exited the game, he returned to his workshop and began to prepare the potion to cultivate the seeds.

Using special potions to stimulate the genetic mutation of seeds was also a common method of seed cultivation in the modern world.

However, the medicinal liquid used to cultivate the seeds was not something that could be cultivated easily. It required careful preparation of the medicinal liquid, and the special medicinal liquid used was also different.

Qin Lin cultivated another medicinal liquid and soaked the seeds in it. Now, he just had to wait for enough time to make another medicinal liquid and add it in.

It would take some time.

Experimental breeding was indeed time-consuming, especially when it came to plant genes.

However, he quickly remembered something, and that was the time mechanism of the game. As long as he placed the cultivated seed into the game, the waiting time would be shorter.

As he thought about it, he entered the game with a single thought. After calculating the time, he took it out and added the medicinal liquid.

As such, the seed was cultivated very quickly.

In the game, he also saw the remarks of the seed:

" cultivated normal seed: normal "

These are the seeds that have been cultivated. Because the person who cultivated them is more reliable, the production of the seeds has increased.

Qin Lin saw the note and felt a little comforted.

Although there was not much progress, there was still some improvement.

This also made him understand that what he had learned from books had to be put into practice.

The knowledge he learned from the mysterious stone tablet was far inferior to the knowledge of the academicians in the relevant fields. However, he couldn't really exert much of his strength in this practice.

Naturally, this also explained that plant gene breeding wasn't that simple.

Sometimes, Qin Lin was a little stubborn, but not exactly stubborn. He would finish everything he was interested in.

For example, he was now very interested in the cultivation of this seed.

He immediately thought of the moonstone.

The moonstone had the attribute of triggering enlightenment and inspiration. As long as the water of the goddess 'spring was poured in, it would take effect. However, it had been a long time since the moonstone had been activated.

this time, he could use it to assist him. after all, he had suddenly become interested in cultivating seeds.

Thinking of this, he controlled his game character to go to the goddess 'spring and then entered the game with a bucket.

Then, he filled the bucket with the water from the goddess's spring and brought it out of the game.

He took the spring water out of the inner area and poured it into the man-made spring where the moonstone was.

Then, he looked at the remark:

[ Moonstone: special! ]

[ Yingluo, this is a special stone that has been watered with the spring water of the goddess. It can trigger a special effect! ]

As soon as night fell, the moonstone began to emit a faint light, which enveloped the surroundings, including the pavilion.

The light of the moonstone was also a special feature of the yellow pear Pavilion.

However, without the goddess 'spring, the light did not have any special effects. With the water of the goddess' spring, the effect was activated.

Therefore, as soon as Qin Lin walked into the pavilion with a pen and paper, he felt a special feeling. It was a very comfortable feeling, and his whole mind became clear.

He immediately sat down in the pavilion and began to think about cultivating seeds.

Sure enough, after a short while, Qin Lin felt that his mind became clear, and then a special inspiration emerged.

This inspiration was also about how to prepare seeds.

He hurriedly took a pen to record these inspirations, in case he couldn't remember them when he left later.

It was also at this moment that two voices were heard.

they were professor wang and academician fang.

"Academician Fang, let's go to the pavilion!" Professor Wang said.

Academician Fang nodded. yes, I've heard about it. The environment at Linlin Manor is very good. It can make one's mind clear and is very helpful for thinking. Academician Lin and the others have been thinking quietly here, and they've gained something.

Professor Wang was surprised. this is the first time I've heard of this. It's also my first time staying in this Manor.

The two of them walked into the pavilion and saw Qin Lin sitting at the other side of the pavilion, writing something.

Academician Fang was surprised. it's boss Qin. He seems to be writing something. He must have some inspiration. Let's go to the side and not disturb him.

"Okay," professor Wang nodded.

The two of them walked to the side and sat down. This place was also shrouded in the light of the moonstone.

Once they sat down, the two of them also felt a sense of clarity.

This surprised the two of them.

what surprised them even more was that when they talked about the distance of the sensor, academician fang had an idea. " professor Wang, do you think we can try to change the response of the sensor to the waves? "

Professor Wang was also affected by the moonstone's light, so he immediately understood what academician Fang meant. He nodded and said, " indeed, this seems to be a solution. Academician Fang, let's try to write some formulas.

#### [Chapter 1432 648-How Is It Not Reliable? The Giant Pumpkin And Horse](#)

They didn't have a pen and paper, so they started to write on the ground like academician Hao and the others.

All of a sudden, the difficult problem that had been troubling them seemed to have been solved!

They had never thought that it would be so easy to solve the problem. They suddenly felt that they had been a little stupid before.

It was a very strange feeling. People who did not understand the problem at all would always be extremely troubled, but once they stood at the end and looked back, the feeling was completely different.

The two of them were bursting with inspiration as they immersed themselves in the breakthrough of difficult problems!

Qin Lin quickly recovered from the inspiration. The paper was already densely filled with the preparation method of a seed cultivation medicinal liquid.

Miraculously, once he figured out this method, he also withdrew from the immersion of inspiration.

Qin Lin got up and saw academician Fang and professor Wang in a serious discussion.

It didn't take much thought to know that the two of them were affected by the moonstone and triggered inspiration.

It could only be said that the two of them were very lucky.

Qin Lin didn't want to disturb the two. He left and went to the workshop. He looked at the materials of the incubator liquid on the paper and called Shen Li, who was in the laboratory.

He didn't have those materials right now, so he needed Shen Li's help to prepare them and send them over.

they would have to wait until the next day.

Shen Li's actions were also very fast. The next morning, he had already sent all the materials over!

After Qin Lin got the materials, he immediately prepared the cultivation potion and took out some seeds from the workshop.

He had prepared a lot of seeds, but he didn't know what they were. However, it didn't matter. After all, he could cultivate any kind of seeds.

He placed the seed into the cultivation liquid he had prepared and brought it into the game.

This time, the nurturing of the medicinal liquid was still divided into several steps to nurture the seeds.

Therefore, he had to calculate the time.

When the time was up, he entered the game and took out the seed, then proceeded to the second step.

After that, the third step.

he spent a day cultivating the seed using the game's time mechanism. he saw the note:

" specially cultivated okra seed: grade 2 "

Qin Lin didn't expect to cultivate okra seeds this time.

For convenience's sake, he had bought many seeds. He did not split them up or make any notes.

Moreover, he was excited to see the grade 2 seed he had cultivated.

Because these okra seeds were from the real world, they were all normal grade seeds. Now, they had become Grade 2 seeds.

Wasn't this enough to show how awesome he was?

Qin Lin immediately looked at the specific remarks of the okra seed.

[ this is a seed cultivated by an unreliable researcher. After it matures, it will have a special effect: Lower breast regulation +1, drenching flow +1, kidney essence replenishing-2! ]

" ? ? ? "Qin Lin was dumbfounded after reading the remarks.

It was understandable that lower breast regulation +1 and lymph clearing +1 were added, because they had these attributes.

But what was 'enter the kidney and replenish essence-2'?

Shouldn't it be +2?

-2 couldn't have died directly, right?

qin lin looked at the evaluation of 'an unreliable researcher' again and felt a little ashamed.

Damn it, this seed incubator liquid was made by relying on the attribute effect of the moonstone, but with this help, it actually produced A-2 attribute thing.

This was extremely embarrassing.

he was starting to wonder if he was suitable for research.

after looking at the attributes of the remarks, he immediately destroyed the okra seeds. if these okra seeds were to be leaked, who knew how many people's sexual happiness would be destroyed?

That would really be a great sin.

Qin Lin left the office and went back to his office. He saw academician Fang and professor Wang rushing in.

when academician fang saw him, he said, " "boss qin, professor wang and i made a breakthrough in long-distance sensing technology last night. we would like to use some of the equipment in linlin's laboratory for experiments. please let them know."

Professor Wang, who was standing at the side, was also very happy.

He came up with this technology with academician Fang last night, and he felt a sense of accomplishment to be able to have the same thoughts and inspiration as academician Fang.

This was different from the sense of accomplishment he felt when he got something from Chairman Qin and cracked it, but was misunderstood as his own research.

Qin Lin nodded and contacted Shen Li immediately.

He had nurtured a weirdo with a quality 2. He hoped that after academician Fang and professor Wang triggered the moonstone's attributes, they wouldn't be as unlucky as him.

After he said his goodbyes, academician Fang and professor Wang went to Linlin laboratory.

Qin Lin, on the other hand, left the manor, put on a hat and mask, and went for a walk around Linlin villa.

The first was the entrance and exit.

Optimus Prime and Megatron were still faithfully carrying out their security duties. They held loudspeakers and kept admonishing tourists, reminding them of the things to pay attention to.

naturally, the tourists all took out their phones to take pictures, and there was already a long line of tourists who wanted to take pictures.

The popularity of Optimus Prime and Megatron had reached its peak. Not only was there a long queue at Linlin Scenic Area, but there was also a long queue at you city due to the traffic jam.

Qin Lin then went to the new square.

When he arrived, Optimus Prime and Megatron were in the middle of a battle performance. The violent beauty of the collision of machines made the tourists around them exclaim in surprise.

It could be said that Optimus Prime's might had really added a major feature to the Linlin Scenic Area. Moreover, this thing was really unique to the scenic Area. If other places wanted it, they wouldn't be able to get it no matter how much money they had.

So, as long as Abair's father was willing to work hard enough, and now that the land had been contracted, the sci-fi Scenic Area Department would be able to develop it sooner or later.

time passed, and in the blink of an eye, a week had passed.

Qin Lin received a call from Yu Shui when he arrived at the office early in the morning.

"Really?" he asked in surprise.

"Yes, President Lin is here too. He's thinking about opening the shop to the public," Yu Shui said.

"Okay, I'll be right there." Qin Lin hung up the phone and went to the land where giant crops were grown.

Yu Shui had called to tell him that the giant crops had matured and could be harvested.

Now, Lin Lanzi had already brought people there to think about opening up the giant crop area.

he knew very well that lin lanzi was definitely going to create another explosive news. this woman was much more capable than him. at least, in terms of organizing events and hyping up new projects, she was far ahead of him.

Therefore, it was not wrong to let Lin Lanzi take over after Zhao Moyu stepped down from the position of the person-in-charge.

With a capable employee, the boss could be very relaxed.

Qin Lin soon arrived at the area where the giant crops were planted.

this place was still surrounded by curtains, and people outside could not see it.

This piece of land was still quite popular on the internet. After all, everyone was curious about what was going on inside, but after waiting for so long, it had not been opened.

Even if they were to develop something, it should have been completed by now, right?

"It's little Qin!"

"He's gone in,"

"It's indeed him!"

Qin Lin entered the giant crop planting area and was seen by some tourists, which made them even more curious. Everyone knew that little Qin was an academician in plant genetics. He suddenly came here, so maybe he was really researching something.

Therefore, the tourists took videos even more crazily and uploaded them on the internet in the hope of attracting attention.

qin lin entered and saw yu shui and lin lanzi.

Lin Lanzi was looking after two batches of horses with some people, and the horse tamer was comforting the horses.

On the side, Yu Shui and her team were working on a huge pumpkin.

No wonder it was so big. It was already over two meters, almost 2.5 meters.

Normally, giant pumpkins weren't this big, but reality wasn't a game. The pumpkins that were planted couldn't be of the same size as the game. There would definitely be some sizes, so it wasn't strange for even bigger ones to appear.

They seemed to have dug out all the meat inside and even made a few holes in the pumpkin, as if they were doors and windows.

qin lin was a little confused when he saw this.

What was he doing?

[Chapter 1433 Cinderella's Pumpkin Carriage? This Crop Is Awesome! 1](#)

"Chairman Qin!" When Lin Lanzi saw Qin Lin, she immediately went up and greeted him.

"mr. lin, what are they doing?" qin lin asked, puzzled.

Lin Lanzi looked at Qin Lin in astonishment."Chairman Qin, pumpkin, carriage, don't you know this story?"

"is there any backstory to this?" qin lin asked, puzzled.

Lin Lanzi explained,"Chairman Qin, don't you know the story of Cinderella?" Cinderella's pumpkin carriage!"

Qin Lin naturally knew the story of Cinderella.

There should be no one who didn't know about this. The story was too famous.

However, he really didn't know about Cinderella's pumpkin carriage.

After all, who would remember such details if they didn't specifically remember it?

Qin Lin watched as Yu Shui and her men dug out all the meat from the giant pumpkin. There were even people taking videos.

When all the pumpkin meat was dug out, one of the employees even used a special roasting tool to roast the inside of the pumpkin.

He didn't want to roast the pumpkin, but to let the meat inside solidify and harden, and then spray the interior paint.

There would naturally be formaldehyde, so there were a few pots of purification grass next to the giant pumpkin.

At that time, he could directly use the purification grass to purify the formaldehyde in the pumpkin.

The last step was to bear the shaft.

to be honest, the linlin scenic area was really full of talents. there were many tricks to the simple bearing of the shaft. then, two horses were tied with saddles and ropes, which were even connected to the bearing shaft.

Finally, a pumpkin carriage appeared in front of everyone.

Naturally, this was not the final product. The carriage outside still needed to be decorated.

not long after, gao yaoyao brought some people over with a lot of things.

moreover, gao yaoyao went to a simple dressing room that had been built and changed into a cinderella dress that was popular overseas, as well as a headdress.

At first glance, her pure and innocent appearance really looked like Cinderella.

There was also a security guard who had changed into a coachman's suit and even put on makeup.

Cinderella's coachman was a mouse, so his face was particularly obvious.

It was becoming more and more decent.

Especially after the pumpkin carriage was decorated.

When people found out that the pumpkin was real, they would definitely be shocked.

At this moment.

the internet was already quite lively, mainly because many people were curious about the linlin scenic area, which was surrounded by curtains. it was also quite popular on the internet.

Now, someone had posted a video and saw little Qin enter that place. Little Qin had its own traffic on the internet, so it naturally triggered the traffic pool to become a hot search, causing many people to discuss it.

I've long known that there's such a place in Linlin Scenic Area. It's always been surrounded and very mysterious.

"I passed by that place when I was going to Linlin Scenic Area. I was warned by the security when I tried to get close. It's really very mysterious!"

if little Qin entered there, it means that it's definitely not simple inside. Maybe it's cultivating some kind of magical thing.

"....."

As they talked about little Qin, it became more and more lively.

After little Qin became an academician, more and more people knew about the magical things he had developed.

therefore, if academician qin was researching something, it would be hard not to be curious.

It was at this moment that someone suddenly posted a video. The video showed little Qin entering the area and a strange carriage driving out.

This made people puzzled.

Not just online.

when qin lin entered the giant crop area, there were more and more tourists around him.

The tourists were all curious about what little Qin was doing in this area.

As little Qin entered, this area seemed to become even more mysterious. Everyone wanted to know first-hand news.

However, while the tourists were waiting, they saw a special carriage drive out from inside.

the carriage was pulled by two horses and a coachman with strange makeup. the carriage at the back was even more peculiar. it looked like a huge pumpkin with all kinds of decorations sitting on it.

Everyone was curious about what was going on.

At this moment, the window of the pumpkin carriage suddenly opened. Then, a pure and beautiful woman stuck her head out of the window, looking at the outside world with curiosity.

One of the visitors recognized Gao Yaoyao.

After all, Gao Yaoyao and Lin Lanzi were both internet celebrities in Linlin Scenic Area. Lin Lanzi was a mature, charming, and elegant female president, while Gao Yaoyao was famous for her innocence.

However, her current outfit was a little strange.

Naturally, there were some people who were more experienced or had more useless knowledge, so they recognized what the carriage was.

"This looks like Cinderella and the pumpkin carriage? Do you want to play a skit?" Someone said.

This caused everyone to be stunned.

"The coachman is the rat coachman?" someone asked.

this was why it felt strange.

The Linlin Scenic Area had been surrounding this area for so long, which had attracted the curiosity of countless people. Was it just for a skit?

This should not be the case.

The Linlin Scenic Area was making such a big scene, it couldn't be that simple, right?

these videos were quickly uploaded to the internet.

Gao Yaoyao's Cinderella and pumpkin carriage had indeed amazed many people, but at the same time, everyone was curious.

"I have to say, sister Yaoyao is really pretty!"

"indeed, but little qin is so mysterious. it can't be just that, right?"

"Linlin's Scenic Area can't be all talk and no action."

"....."

At this moment, many similar comments suddenly appeared in some comment sections:

[Chapter 1434 649-Cinderella's Pumpkin Carriage? This Crop Is Awesome!](#)

"Hurry up and look at the official account of the Linlin Scenic Area!"

"The official account of Linlin Scenic Area has a surprise!"

"Hurry up and look at the official account of the Linlin Scenic Area."

"....."

These comments also attracted a lot of people to the official account of the Linlin Scenic Area.

At this moment.

The video posted by the official account of Linlin Scenic Area had also become a hot search.

The video posted by the official account had already become a hot search. After all, the official account of Linlin Scenic Area had so many fans.

The video released by the official account of Linlin Scenic Area was a video of the production of the pumpkin carriage.

When they saw the video, everyone was shocked.

Because a huge pumpkin had appeared in the video at the beginning, and then the Linlin Scenic Area staff began to dig up the pumpkin.

The meat of the pumpkin was dug out piece by piece.

This was shocking.

That was because the pumpkin meat was actually real. It didn't seem to be fake.

In the video, the process of digging up the melon meat was very fast. Soon, it was the process of installing the shaft and connecting the horse.

A pumpkin carriage appeared in front of everyone.

in other words, the pumpkin carriage was actually made from a real pumpkin?

But wasn't this pumpkin a little too big?

It was definitely more than two meters in size.

This kind of pumpkin could be said to be rare in a lifetime.

In an instant, the video caused a sensation!

"Tell me, is the pumpkin real?"

"perhaps this is the truth, ran ran."

such a huge pumpkin, it's unbelievable. Did little Qin specially research this kind of giant pumpkin? "

"....."

Countless people were attracted and extremely curious.

but at this time, linlin scenic area didn't explain much, and everyone's curiosity was in their throats.

More and more people were attracted to it online.

It could be said that in a short period of time, the pumpkin carriage, little Qin, and the giant pumpkin party had become the hottest topics on the internet.

This was also Lin Lanzi's special intention to keep him in suspense.

It was similar to hunger marketing.

It was because of this mentality that more and more people could not help but pay attention to it.

Under this premise, more and more tourists came to the Linlin Scenic Area, where the giant crops were growing.

There were already so many people on the internet who were curious.

These tourists were in the Linlin Scenic Area, so they naturally went there in person out of curiosity.

However, the area had been cordoned off by security guards, so there was no way for tourists to get close.

Nowadays, society paid attention to quality, and no tourists barged in. It was embarrassing. Once it was spread online, the people around them would feel ashamed.

Other than those who weren't afraid of losing face in front of everyone, there shouldn't be anyone who would be so brainless.

Therefore, the only thing the tourists could do was to take photos of the curtain with their mobile phones.

just as the situation reached its peak, the linlin scenic area staff began to remove the curtains.

This completely attracted everyone's attention.

The efficiency of the staff was very high, and the curtains were removed very quickly.

However, what happened next shocked everyone.

just as everyone had guessed, there were indeed giant pumpkins. the entire area was filled with giant pumpkins, and each of them was at least two meters long.

Little Qin had really developed it.

However, what was truly shocking wasn't the pumpkins. Beside the pumpkin field, there were many eggplants. The eggplants were very large. Just by looking at them, they were taller than a person.

who had ever seen such an eggplant?

And the sunflowers at the side?

But who had ever seen a sunflower that looked like a tree? In front of the sunflowers, the previously shocking Linlin rice and wheat forest didn't seem as shocking.

so, this was all little qin's research?

One could only say that little Qin was too awesome.

The tourists couldn't hold it in anymore. They began to take photos of the giant crops in that area and uploaded them to the internet.

In a short time, when these videos spread on the internet, the internet was shocked again.

Even though many people had guessed that little Qin had indeed developed a giant plant, they had seen it with their own eyes and confirmed that there was more than one. Looking at the scene in that area, they couldn't help but feel shocked.

"666, I knew that little Qin wouldn't let us down."

"Such a big pumpkin, such a big eggplant, and that sunflower. It's the size of a palm right? Is this going to kill the glutton?"

I just want to know how these giant crops taste.

upstairs, don't worry about the taste. Even if it's the same as ordinary ones, it'll make our country have more idle people who have nothing to do.

"Who are you implying?"

"....."

It could be said that the giant crops had caused a sensation on the internet.

In Linlin's laboratory.

Academician Fang and professor Wang were resting after an experiment when they saw a few researchers in the resting area talking on their phones.

"chairman qin is really amazing."

"yeah, every one of his results will cause a sensation!"

"....."

Academician Fang and professor Wang also saw the news about the giant plant.

The two of them were also very emotional.

"Boss Qin's research on plant genes is unparalleled," academician Fang said.

Professor Wang nodded. that's right. Chairman Qin is the person I admire the most.

Hua hospital.

Minister Lu also saw the news and called Qin Lin. boss Qin, congratulations. You've researched another five good things. Moreover, the five crops are all focused on genetic mutation. I'm afraid you're the only one in the world who can do this. As long as you're here, you'll be able to suppress all the researchers in this field.

Qin Lin was speechless after hearing this. He really wanted to throw the kidney-energy-replenishing okra to Minister Lu and see if he would still say the same thing after eating it.

It was also at this moment.

Lin Lanzi had also asked someone to post another notice at the Linlin Scenic Area that a giant crop field was open for sightseeing. In addition, for the first week, lucky audience members would be selected every day to taste the giant crops, and they would be the first batch of people to taste them.

The internet was in an uproar again.

Under Lin Lanzi's hype, countless netizens picked up their phones and started to book tickets to you city.

No matter what it was, as long as it involved the first place, people would rush like ducks.

The fact that the giant crop was now very popular was what attracted the most people. Now that the giant crop had just appeared, whoever was late would be the first to eat it, which was a special meaning.

This special meaning made countless people willing to try it. As long as they could eat it, it would be something they could brag about. In the future, when this giant plant spread, they would be able to confidently tell people that they were the first people to taste it when it first came out.

However, with the announcement of Lin Lanzi's event, you city's Traffic Department was frightened. The person-in-charge's forehead was covered in sweat. He had obviously thought about the situation they were about to face.

### [Chapter 1435 Fairy Tales Are Not Lies! 1](#)

The reason why people were called the spirit of all living things was because they were persistent in certain things, persistent in being number one.

they would even be obsessed with the first opportunity to taste a crop that had never been seen before.

lin lanzi had grasped this mentality and organized an event for lucky tourists to taste giant crops.

However, with the appearance of a post on the internet, this kind of persistence became even more intense.

Even though they knew that only a small number of the lucky tourists would be able to get the food, there were only a few people who won 5 million. Who would not buy it?

The post read, " the appearance of this giant plant will obviously be recorded in the book. The first batch of people who tried it might also be famous in the book.

Therefore, even more people were attracted to it.

The next day, you city's traffic was as good as it had been.

When Chen Li received the report, the first thing he did was to go to Sun County.

Sun Xian was also browsing the news on his phone. When he saw Chen Li, he asked, "it's all blocked?"

Chen Li nodded. they're all blocked. It's very serious. Who knew that boss Qin would make people so crazy just by cultivating a few giant crops? "

"Sigh," sun Xian sighed, "at this rate, I don't think six points will be enough."

"But we're only in a County. Which ring are there in Beijing?" Chen Li was stunned.

Of course, Beijing was different from them. The area and length of each ring in Beijing far surpassed theirs, but they were the first to have such a small County's outer ring built.

While the two of them were talking, the tourists were having a hard time. It could be said that except for the first few tourists, the rest of the tourists were basically blocked.

Chen Yan was one of them.

She did makeup and loved good food with her best friend.

She had already wanted to come to Linlin Scenic Area to play.

this time, after seeing this giant plant's activity, he was determined to leave.

She couldn't book a ticket to you city. All the high-speed rail, bullet train, and train tickets, whether they were directly to you city or passing through you City Station, were all sold out.

It could only be said to be crazy.

She had no choice but to take turns driving with her best friend and come here on a self-driving tour.

However, when they arrived here, she and her best friend were really dumbfounded. They were stuck in a traffic jam before they even entered you city.

It wasn't until noon that they entered the you City area and drove to the Linlin Scenic Area, but this was only the beginning.

The back was still blocked.

Xiao Yan, I can't hold it anymore. Is there a toilet here? " Her best friend said anxiously.

chen yan looked at the blocked road. how would she know what to do?

He had seen the news on the internet about you Cheng dragging down Linlin Scenic Area and the road being blocked. Now, he finally had a deep understanding.

he should also post a thread to criticize you cheng when he got back.

With such a popular Scenic Area like Linlin Scenic Area, can't you fix the road a little? he couldn't just take advantage of linlin scenic area and do nothing, right?

Wasn't this a disgusting tourist?

Just as the two of them were about to lose their patience, they saw some men walking out of the surrounding cars. Their hands were full of drink bottles as they walked toward the trash can at the side.

These people seemed to have understood each other. They smiled at each other and tacitly threw the drink bottles in their hands into the trash can.

Chen Yan seemed to have understood. She silently picked up an empty drink bottle and handed it to her best friend.

"xiao yan, why are you giving me an empty bottle?" her best friend asked in confusion.

chen yanjue fell and could only demonstrate to his best friend first, pulling open his \*\*\*.

Her best friend's eyes widened when she saw this.

This works too?

not long after.

chen yan also took the drink bottle and left the car. she walked to the trash can with an awkward expression. other men also came over with drink bottles.

When they saw Chen Yan, they couldn't help but be slightly surprised.

They clearly didn't understand how the woman had done it, but they couldn't help but give her a thumbs up.

Chen Yan felt very embarrassed. After throwing her things, she immediately ran back to the car and continued to block the road.

The jam lasted until evening.

In other words, her first day in your city had been wasted. It was equivalent to spending a day in the car.

But when they reached Linlin Scenic Area, they had to go in. They couldn't just turn back after a day of traffic and come out again tomorrow to be stuck in traffic again, right?

After parking the car, Chen Yan got out of the car with her best friend.

As soon as they arrived at the entrance of the scenic area, they saw Optimus Prime and Megatron, who had gone viral on the internet.

Optimus Prime and Megatron were each holding a megaphone and shouting at the tourists, "

"There's a special event in the scenic area today. Tourists can draw a lucky draw with their ID cards! "As long as you win the prize, you'll have the chance to taste our scenic area's latest giant crop," Optimus Prime said loudly. You're also the first lucky ones to taste it.

Wei Zhentian interrupted at an untimely moment, "Remember, everyone only has one chance. Don't waste everyone's time by repeatedly registering, and don't cut the queue. Otherwise, even as a robot, I, Wei Zhentian, will look down on you.

With Optimus Prime and Megatron leading the way, the tourists around them were also very surprised. They could even hear their movements and the sound of metal colliding and rubbing when they turned their bodies.

Chen Yan was also very surprised. She felt a kind of unexpected surprise.

Such a scene could not be seen in other places.

The two girls also saw a sign below, which indicated the direction of the lottery.

Following the sign, they would reach the lottery area.

Chen Yan brought her best friend there and soon arrived at a special hall. There were a few platforms marked with the words "lucky draw".

### [Chapter 1436 Fairy Tales Aren't Lies! 2](#)

There were already a lot of tourists lining up to register their identity and then draw the lottery.

It was a pity that almost all the tourists looked depressed. Obviously, none of them won the prize.

Chen Yan also took out her identity card and brought her best friend to the back of the line.

At this moment.

The two girls heard a cry of surprise. YES, I hit the jackpot. Haha, I knew I would be lucky today.

it was a fat man, and he seemed to be very excited about winning the lottery.

This also made Chen Yan and her best friend look forward to it.

they also hoped that they would win the prize.

After all, they had been stuck on the road for the whole day. They should at least have some comfort, right?

After waiting in line for a while, Chen Yan and her best friend realized that it was finally their turn.

They immediately went forward and handed their ID cards to the registration attendant.

beauty, you can scan the QR code for a lucky draw. There will be a notification if you win. The waiter immediately took out a QR code and gave it to Chen Yan to scan.

Chen Yan followed the instructions and took out her phone to scan the QR code.

a moment later, something that surprised her happened. after scanning the code on her phone, a notification appeared:

congratulations on becoming a lucky audience. You can taste our giant crops. You can also bring your friends and family!

upon seeing this, chen yan exclaimed in surprise, " "I hit the jackpot!"

Her best friend was pleasantly surprised.

the surrounding tourists all looked over with envy!

After waiting in line for so long, everyone knew how low the chances of winning were.

After that, Chen Yan also asked her best friend to register, but she didn't win any prizes after registering.

Fortunately, she could bring people with her, and she could just bring her best friend.

...

Night fell!

The Linlin Scenic Area also began to turn into a fantasy. Fireflies began to appear one after another, and the number of fireflies increased and became more and more concentrated!

These fireflies were also a special feature of Linlin Scenic Area.

Moreover, the fireflies in Linlin Scenic Area gave people a special feeling, beauty, and fantasy, which the fireflies in other places did not have. Even the scenic areas that mainly focused on fireflies were crushed.

Chen Yan and her best friend were immediately attracted by these fireflies.

they had seen the news about fireflies in linlin scenic area before. this time, they had to watch the fireflies, optimus prime, and megatron.

not long after, chen yan and her best friend were brought to the barbeque area by a waiter in charge of the event.

there were also some tourists who had won the lottery today.

These tourists all had looks of anticipation on their faces.

They were really the first batch of tourists to eat these giant crops.

while they were waiting, a waiter came out with a cart.

Usually, when one went to a restaurant to eat, they would first serve some peanuts and melon seeds for the guests to crack.

While the tourists were waiting, the waiter served them melon seeds.

What was different from usual was that when these melon seeds were delivered to the tourists, each of them only had one melon seed. However, when they saw this one melon seed, all the tourists started to make a commotion.

Because every single melon seed was the size of a palm.

Everyone also thought of the huge sunflower trees. They were real trees. Previously, everyone had wondered what the sunflower seeds would look like.

Now, everyone knew.

some of the tourists had already started to take pictures of the melon seeds with their mobile phones.

he definitely had to share it with his friends and upload it online to get some traffic.

however, some of the tourists had already picked up the melon seeds and were considering how to eat them.

Some people tried to put it in their mouths, but they couldn't put it down.

He tried to knock on it and found that the shell was quite hard.

"How do we eat this?" Someone sent out a soul interrogation.

The waiter beside him immediately said, "these melon seeds are special melon seeds from our Scenic Area. Our Scenic Area has a special shell opener." &Nbsp;

As he spoke, the waiter picked up a special hook knife from the table and showed it to the visitor.

At this point, the other visitors also understood.

But soon, they looked at the melon seeds inside and felt a little distressed, especially girls like Chen Yan and the others.

He would probably be full after eating one melon seed.

however, in the face of such melon seeds, every visitor could not help but want to try them. even so, they had to break the melon seeds apart before they could put them into their mouths piece by piece.

After tasting the melon seeds, the visitors 'eyes lit up. This was because the melon seeds had the attributes of +1 taste and +1 beauty, which made them much more delicious than ordinary melon seeds.

"these melon seeds are delicious!"

"Yeah, it's even more delicious than the melon seeds I usually eat."

not only is it bigger, but it also tastes better. Little Qin is too amazing.

"....."

Soon, several eggplants were served, each of which was about two meters long.

Of course, the eggplant could not be eaten by a single person. It was enough for many tourists.

the chef of linlin villa had set up a very large grill, cut the eggplant, and put it on the grill. then he began to roast it and spread the sauce.

Everyone had eaten grilled eggplant before. For many people who liked to eat barbecue, grilled eggplant should be a must. It tasted really good.

However, it was definitely the first time he had experienced such a big grilled eggplant. It was the first time he had seen it in his life.

At the same time, the tourists also took out their mobile phones to film again.

After a short while, the rich aroma of grilled eggplant wafted through the air. Especially after the garlic was sprinkled on top, it made people drool.

### [Chapter 1437 Fairy Tales Aren't Lies! 3](#)

when it was about time, the chef signaled the waiter to let the tourists come up to get the grilled eggplants. such big eggplants, even if they were to help themselves, it would be impressive if they could finish them.

Similarly, the eggplant also had a deliciousness +1 texture +1 attribute.

After the tourists ate it, their eyes also lit up.

Moreover, this special experience would undoubtedly enhance the taste and texture, especially for the first batch of people who ate it. Their hearts would be different.

Even an eggplant with A +2 texture and +2 deliciousness wouldn't be as delicious as this one.

It was a very strange mentality.

Therefore, after they finished eating the eggplant, they couldn't help but exclaim, "

"This eggplant is just as delicious!"

that's right. Not only does little Qin's food look amazing, but it also tastes amazing.

I've never had a more delicious eggplant. I really hope little Qin can cultivate more of such crops.

I suddenly realized that it's really blissful to be able to live in a country with little Qin.

I don't know when this eggplant will be promoted. It's my favorite.

"....."

Soon, the pumpkins were served. However, the tourists were shocked to find that they were almost full after eating the melon seeds and the first grilled eggplant.

What were they going to do after this?

It could be said that this was an indescribable experience for the audience who won the lucky draw.

None of the five crops disappointed them.

Moreover, every crop had been photographed by the tourists and uploaded online. It caused a huge sensation.

whether it was the palm-sized melon seeds, the tourist who was eating the grilled eggplant with great relish, or the huge pumpkin, it was really over two meters tall.

Looking at the videos posted by the lucky tourists and the exaggerated reviews, the crops that were already popular became even more attractive.

After Chen Yan and her best friend had tasted the crops, they also strolled around the scenic Area to watch fireflies.

They found a greenhouse tree and rested in a Pavilion. They took out their phones and started watching videos. Then, they were also attracted by some videos.

it was the opening of the giant crop area today. many tourists who had arrived earlier had already entered to watch. these tourists had also taken a lot of videos and uploaded them.

Many tourists could be seen standing next to the pumpkins. They found that they were tiny in front of the pumpkins, and some even lay down to compare their length with the eggplants.

That scene was like a fairy tale world that he had dreamed of when he was young.

Who didn't have similar dreams when they were young?

After all, many fairy tales had stories about such giant crops. Now, the Linlin Scenic Area had told everyone that fairy tales were not lies.

Obviously, it was very interesting to watch the giant crops. The two best friends were interested and decided to go watch the next day.

There were many people who had the same thoughts as the two of them, especially the netizens on the internet.

Whether it was the lottery to taste the giant crops or the viewing of the giant crops, they were both very attractive.

This two-pronged approach also caused more and more tourists to rush to you city.

Naturally, the traffic police of you city wanted to cry but had no tears. They felt that their profession should be the most difficult in you city.

[Chapter 1438 You City Wants To Build A Metro Station And An Airport! Optimus Prime And Awe-Inspiring First Battle! 1](#)

Linlin Scenic Area.

While the tourists were going crazy over the five giant crops, you city was suffering for the entire traffic.

Linlin Manor.

Chen Li arrived at Qin Lin's office early in the morning and brought him two documents.

"Boss Qin, please take a look at these two documents. I need the cooperation of your Scenic Area." Chen Li said after handing the document to Qin Lin.

Qin Lin took the document and looked at it in confusion.

" regarding the you city light rail plan, to solve the traffic problems of you city, "

" regarding you city airport project: "

qin lin was a little surprised when he saw the two documents."We're going to build a train station and an airport in you city?"

this was shocking news.

Even small cities didn't have train stations, let alone an airport.

Now, a County actually wanted to build a light rail and an airport.

This was definitely shocking news.

chen li sighed. " it's all thanks to you, boss qin. without the linlin scenic area, we wouldn't have such a good opportunity to build an airport in you city! "

As he spoke, Chen Li's face was filled with smiles.

The light rail was decided by you Cheng. As long as they could afford it and it wasn't a waste, the city would easily approve it and even help fund it.

As for the airport, it was all up to Minister Lu. The documents from the capital had directly arrived.

He had thought that Minister Lu was just saying it for fun. He didn't expect that he would really help with the operation. Coincidentally, the you City Light rail plan had just finished a meeting, and they were implementing it together.

The other counties in Ming city would be extremely envious of the train and the airport being built together.

Naturally, this was a good thing for you city.

Because the document to build an airport was a sign that you city would rise in four years.

Chen Li explained, " boss Qin, the initial plan for the light rail is to pass through the Linlin Scenic Area, especially the newly contracted land. When the time comes, we will set up a special station for the

scenic Area. As for the airport, we will also set up a road leading directly to the scenic Area. We will need the cooperation of the scenic Area.

Qin Lin nodded and called Lin Lanzi over.

Lin Lanzi was in charge of the scenic Area.

She still needed to take over and keep an eye on things.

When Lin Lanzi arrived and saw the documents that Qin Lin handed to her, her face was full of surprise.

after knowing the whole story, she said excitedly, " don't worry, County Chen. Our Scenic Area will definitely cooperate with the county.

She knew how great this was for the scenic Area.

The scenic Area could apply for a 5A grade Scenic Area next year. By then, the light rail and airport would be repaired, and they would even pass through the scenic Area. That would definitely be double the joy.

Which scenic spot in the country had a light rail at the entrance at the same time and an Airport Road that led directly to the entrance?

Their Linlin Scenic Area was one of a kind, right?

even if there were, there wouldn't be many in other places.

After that, Chen Li and Lin Lanzi discussed the details in detail, and the two of them went to the work area of Linlin Manor together.

Qin Lin, on the other hand, looked at the screen in his mind and began to control the game character to go to the daily task. Then, he tried to trigger the plot task.

Unfortunately, he didn't find anything.

Then, he tried to upgrade the mutated land.

After his character leveled up, he couldn't level up the mutated land. He lacked leveling tools, which made him very distressed.

to be honest, he really wanted to know what was so special about this mutated land.

Still clueless, he controlled his character to go to the lake mine and excavate another layer.

This time, he had obtained a bag of special soil and a bucket of Earth Spring water.

It was better to have some gains than nothing.

The popularity of the giant crops remained high on the internet. After half a month, the trend started to decline. However, the roads in you city were still blocked. It was impossible to recover in a short time. Unless the popularity of the giant crops completely passed, that would have to wait until all the people who were curious about the giant crops came to Linlin Scenic Area.

...

In the new laboratory building of Linlin laboratory, academician Fang and professor Wang's excited voices could be heard.

"Great, I can control it now!"

"Haha, academician Fang, we've finally succeeded."

Next to him was a researcher with a sensor device on his body. He was moving.

The sensor device was different from the previous one because it was a breakthrough version that academician Fang and professor Wang made together.

This sensor device could be connected to the satellite and achieve the purpose of ultra-long distance operation.

The staff member was currently operating Optimus Prime in the capital.

Minister Lu had brought the design back to the Hua hospital and asked the people there to make it.

naturally, the chinese academy was also studying it and wanted to use a new appearance.

After all, if they were to use this technology to make weapons, they couldn't possibly use the images of foreign movie characters, right?

No matter what, they had to use their own country's appearance and image, whether it was a new design or the appearance of Sun Wukong or Zhu Bajie.

It was just that this transformation of the appearance seemed very difficult, and it also involved a lot of technical details.

after minister lu received the analysis from the researchers, he wanted to ask boss qin for help, but he held back in the end.

They couldn't rely on boss Qin for everything. If they had to look for boss Qin for even this kind of change in appearance, wouldn't it make their Hua \* Yuan seem too incompetent?

In front of academician Fang and professor Wang was a video call. On the other side was Minister Lu, and he could see that Minister Lu was also very excited.

He knew that Mr. Qin's Optimus Prime and Megatron technology was amazing. He even had many speculations about this technology, and these speculations could only be put into practice after academician Fang's ultra-long-range ultra-control technology was completed.

Now, academician Fang and professor Wang had completed the technology.

In the Hua \* Yuan.

Minister Lu also clenched his fists. He could see Optimus Prime doing the same thing as the Linlin laboratory researcher.

Even though the distance between the capital and you city was so far, he could still see that the movement of the induction was very smooth, and there was not much difference.

This could be put to use.

Minister Lu thought about it and said to academician Fang, "academician Fang, let's try out this sensor device. It should be able to be put to use.

As he spoke, he looked at Optimus Prime and Wei zhentian. The Hua Academy had used special metal to make these two.

That metal was a special synthetic metal, and its defensive power was amazing.

Academician Fang obviously understood what Minister Lu meant, so he subconsciously asked, "Do you have a target?"

there are a lot of pirates on the high seas," Minister Lu said. although they don't dare to provoke us, it doesn't mean that we can't find them to do an experiment. By the way, during the experiment, please invite boss Qin to come and watch. After all, he is the designer of this technology. He should be the witness.

"Understood," academician Fang nodded.

...

A few days later.

Linlin Manor.

Qin Lin received a call from academician Fang as he walked out of the office. He was surprised to hear what academician Fang was talking about, but he was also very interested.

He also went to the parking lot as soon as he could and got into the car to head to Linlin's laboratory.

When he arrived at the building where Linlin laboratory was located, professor Wang was already waiting for him. He led him into a special Multimedia Conference room.

There was a video call going on inside, and Minister Lu was sitting opposite him.

"Boss Qin, we meet again." Minister Lu greeted Qin Lin as soon as he saw him. "This time, I'd like to show you the results of your own design."

"minister lu, i'm also looking forward to it." Qin Lin said immediately.

He had seen Optimus Prime and Megatron fighting against humans with modern weapons in movies, but he had never seen them in real life.

This time, he would be able to see it. After all, he had brought this technology out of the game. He was really looking forward to it!

The few of them chatted through the video for some time. Then, they saw the image on the video change.

The screen changed. A special cargo ship appeared.

this was a satellite image, and there were no markings on the merchant ship.

this was because they had to conduct such experiments in the high seas, and they could not be discovered by other countries.

The key was that these ships without any national symbols were the first choice for Pirates.

Soon, the transport ship entered a certain area, and ships rushed out from all directions.

These ships were all small speedboats with pirate flags on them. They were obviously Pirates who had laid in ambush.

These Pirates were also the most patient hunters. They would set up an ambush in one place. Once a merchant ship appeared, they would go all out like a Hunter, making it impossible for the trespasser to escape.

Minister Lu's voice rang out. I got the information from the Special Forces. This group of Pirates is called Brigade Duoba. The head of the Pirates is called Duoba!

At the same time, in another special department, some people were also watching the same video.

this department was a little special as it did not have a special name for itself. however, a few leaders had come here just to watch optimus prime and megatron's debut.

Or, this technology would really change the situation in the next ten or twenty years.

After hearing Minister Lu's introduction, Qin Lin also watched the video carefully. It was a satellite broadcast. One by one, the pirate ships approached the merchant ship. They took out hook locks and threw them at the ship. They hooked the edge of the merchant ship and climbed up.

On the surface of the sea.

A group of Pirates shouted one after another.

duo ba looked at the merchant ship in front of him, his eyes filled with heat.

with such a large merchant ship, there would definitely be a great harvest this time.

"Go, GO, go, all of you, charge!" Doba shouted as he climbed up a rope hook onto the boat.

However, when he reached the deck, he was shocked because they didn't encounter any resistance.

This was not right.

Even if it was a merchant ship, if they encountered them, they would have security forces to fight back.

Without security, these merchant ships would not dare to set sail.

Now, such a large merchant ship didn't even have the slightest bit of defense power and dared to go out to sea. This was simply looking down on them.

However, when they reached the deck, doba felt that something was even more wrong.

There was no one on it.

Moreover, he found that there was no cargo on the deck.

"what's the deal with this ship?" Duoba frowned.

"Mr. Doba, there are two things here." A pirate's voice rang out.

doba ran over and saw two tall things covered by two large pieces of canvas.

"Open it and take a look!" Doba immediately shouted to his Pirates.

There was still some anticipation in his eyes. There were only these two things on the entire deck. They couldn't let them get nothing, right?

soon, the canvas was untied and pulled down, revealing what was underneath.

He saw two tall guys standing there.

They were Optimus Prime and Megatron, both of which had a metallic texture. They were so large that they even reflected a metallic luster under the sun.

These Pirates obviously knew these two guys. After all, they had watched movies before becoming Pirates, and the two guys in front of them were almost exactly the same as in the movie.

However, these two guys were completely useless to them.

"What's this?" Duoba was stunned. Annoyed, he directly kicked Optimus Prime.

however, after this kick, he realized that something was wrong. a metallic sound rang out, and the optimus prime in front of him still wanted to move.

#### [Chapter 1439 A Hint Of Justice? 1](#)

duo ba looked at optimus prime and was shocked to find that optimus prime was also looking at him.

"What the hell?" duoba felt that something was wrong and subconsciously retreated.

At this moment.

" pirates, " optimus prime said, " it's our first time meeting. i hope you have a pleasant robbing experience, even though this may be your last time. "

the voice attracted the attention of all the pirates, and they all looked at optimus prime.

Wei zhentian also moved.

He even took out a long axe from his back and arrogantly said to the Pirates, " "Pirates, congratulations on being surrounded."

the pirates were all stunned.

They didn't even know what had happened.

optimus prime and wei zhentian had appeared on the merchant ship, yet these two were still talking to them. or were they provoking them?

Naturally, this was a long-distance conversation between Optimus Prime and Megatron.

however, this really shocked the pirates.

Optimus Prime and Megatron were only characters in the movie, so why would they talk to them?

One of the Pirates thought of something and immediately said, " "Mr. Doba, this must be some model. There must be someone on the ship controlling them to play tricks."

Duoba felt that this was very reasonable and immediately shouted to his subordinates, destroy them! How dare they play this trick with us!

this model, no matter how mysterious it was, was just for show. what use could it be?

The Pirates did not hesitate either, as they raised their weapons and began to fire at Optimus Prime and Megatron.

Ding ding ding!

The violent sound of metal clashing rang out crazily. However, something that shocked Duoba and the Pirates happened. A series of metal clashing sounds and sparks exploded, but Optimus Prime and Megatron did not suffer any damage.

at this moment, the pirates realized that something was wrong.

"What's going on?"

"Why is it like this?"

"What are they made of?"

"....."

wei zhentian had already picked up his huge axe and said coldly, " Pirates, you've done too much evil. It's time to pay the price. Have a taste of my mighty axe.

The two pirates in front of it were stunned. They had been told by Wei zhentian that they had done too many bad things, so why did it seem so strange?

Naturally, this was the operator's words and had nothing to do with Megatron.

However, the two pirates 'eyes quickly widened. With a whistling gust of wind, Wei zhentian's huge axe had already swept towards them.

The two pirates turned pale with fright. Before they could react, they felt a violent impact on their bodies, accompanied by a deep pain in their souls. Then they flew out of the ship and spat out blood in the air.

wei zhentian and optimus prime's weapons were not sharpened.

Because it would be very bloody and unnecessary. Just the huge power alone was not something that people could resist.

Of course, when they entered the battlefield, they would definitely be sharpened, because the meaning would be different then.

Even so, the sound of bones cracking could be heard from the two pirates. After vomiting blood, they stopped breathing and fell into the sea, never to float again.

After Wei zhentian launched his attack, Optimus Prime followed suit. He kicked at Doba, who was in front of him.

Doba was not the main character of a movie, but he did not have the godlike reaction of the main character, who could Dodge the attack in an instant. In the face of Optimus Prime's attack, he could only cross his hands in front of his chest in an attempt to block it while feeling shocked.

At that moment, he felt his arms being hit by a violent impact, and he was sent flying.

His hands were in even more pain as they were instantly broken and blood gushed out.

The power of Optimus Prime's kick was evident.

When duo BA crashed to the ground, he was dumbfounded.

that was because Optimus Prime had swung his sword and giant axe, and his subordinates had been sent flying like balls. After vomiting blood, they were no longer breathing.

He had never thought that such a thing would happen.

In front of Optimus Prime and Megatron, his subordinates were like melons and vegetables. He even saw one of his subordinates throw a small melon at Megatron. After the small melon exploded, it did not cause any damage to Megatron at all.

quickly hide. They definitely can't move. Some smart Pirates shouted.

When the other Pirates heard this, they immediately distanced themselves from Optimus Prime and Megatron.

It was obvious that they did not know about the international news about Optimus Prime and Megatron. Otherwise, they would not have such naive thoughts.

Hence, something that the Pirates did not expect happened. Optimus Prime and Wei Zhentian actually caught up to them in a few steps. With a swing of their sword and an axe, they directly swept a few Pirates back into the sea. There was no more movement.

Wei Zhentian even somersaulted in the air and stood in front of the two pirates, kicking them away with one foot.

This made the remaining Pirates completely pale.

How was it inconvenient to move?

Who said they couldn't move?

The Pirates were all scared out of their wits. They all ran towards the sea and jumped in.

Seeing this, the operators controlling Optimus Prime and Megatron were helpless because they could not attack underwater for the time being.

However, there was naturally a backup plan. Some people in special uniforms appeared on the merchant ship. They also went into the water and began to deal with the underwater Pirates.

After all, the Autobots in the movie still needed the help of the main characters, so the combination of robots and humans was also necessary.

With the appearance of these people, the Pirates were surprised to find that they were no match for them at all. These people's strength was too terrifying.

#### [Chapter 1440 A Hint Of Justice? 2](#)

Duoba also knew that he was finished.

He risked his life and pressed a button on his body.

The button was a camera that he had specially used to record videos for the sake of demanding ransom.

This was something many Pirates would prepare. They wanted to prove which hostage or merchant ship they had successfully robbed.

Then, they would send the video directly to the media of those countries and create public opinion to ask for ransom.

this time, he directly chose to send it to the news media around the world that had external contact.

When the Optimus Prime attacked him, he saw madly: " optimus prime and megatron really exist. they've descended on earth, and some humans have joined them. optimus prime is a bad person, so humans must be prepared, huhu. "

As a pirate, he was also a human.

even if he had to die, he had to send out the message. he couldn't let these alien invaders succeed.

Beijing.

Minister Lu was all smiles when he saw the video. After he received a call, his smile grew even wider. It was a call from the special department.

Optimus Prime and Megatron's skills had been fully acknowledged.

in linlin's laboratory.

Qin Lin and professor Wang were shocked when they saw the video.

Optimus Prime and Megatron, which were made of specialized metal materials, were powerful killing machines to a certain extent. In close combat, they could probably kill all enemies with zero casualties.

"Boss Qin, this thing you've designed is beyond the times," academician Fang said.

Qin Lin didn't respond. He was touched by the scene of Optimus Prime and Wei zhentian killing everyone, but he didn't know if it was a good thing or a bad thing.

He felt as if he had pulled something from a certain field to a level that was not in line with the current era.

However, this feeling only lasted for a moment before he returned to normal.

No matter what, it was good that this thing was in his own hands, not in the hands of the enemy.

at the very least, if he had it in his hands, he would be able to make others even more afraid of provoking him.

While Qin Lin was sighing, many people in other places were stunned.

Minister Lu was one of them.

He had received news that the relevant media had received a video.

The video was sent by a pirate.

Most of the time, Pirates would send videos of their robberies to the media of related or unrelated countries in order to create world public opinion.

The foreign media of many countries would receive a lot of such news in a year.

when minister lu saw the news, he frowned.

This was because the video was of Optimus Prime and formidable heavens displaying their might against the Pirates. Did the Pirates leak the video?

At the end of the video, the pirate said with a strong sense of righteousness, " " optimus prime and megatron really exist. they've landed on earth, and some humans have joined them. optimus prime is a bad person, and humans can't let the alien invaders succeed. "

woosh! Woosh! Minister Lu was a little confused.

who knew that a pirate would think of doing something like this before he died, thinking of saving the world so righteously?

this was because they didn't understand the human heart enough.

Moreover, in order to not attract the attention of other countries, they did not use any signal blocking equipment.

after all, these pirate areas were often scanned by satellites from various countries.

If there were any abnormal signals, they would immediately scan over.

Perhaps someone would want to do something.

Otherwise, how would they know the location of these Pirates?

Why weren't these Pirates exterminated?

Minister Lu also laughed.

It didn't matter.

After all, when Optimus Prime and awe-inspiring Tianyou city were revealed, the whole world knew.

Who could not see the use of Optimus Prime and Megatron? Those who couldn't see it wouldn't be able to do the corresponding position.

This only proved that Optimus Prime and Megatron had such an effect, and their power was terrifying.

Even if the word of these Pirates spread all over the world, it would only help them show off their strength.

At the very least, it would be difficult for others to surpass this technology in a short time.

It might even cause other people to panic about technology and start a competition in robot research, disrupting the scientific research plans and progress of other countries.

Why did Briar and Bramble split into two? It was the technology research Competition.

A sci-fi movie had made them anxious, thinking that they really had that kind of technology. They had madly invested in research funds in that field, which had brought down the economy.

.....

After Linlin returned to the Linlin Manor, he controlled his game character to go to a mountain road on Mount goddess, and then entered the game with a thought.

He immediately headed for the damp forest where Elba often appeared.

After seeing Optimus Prime and Megatron deal with the Pirates, he thought that Elba might be even more powerful than doctor Dott's BUG.

It was a pity that he did not see Elba this time.

He could only return the way he came and exit the game with a thought.

He had yet to find any pattern in Elba's appearance.

qin lin went back to his office and took out his phone to scroll through the videos. he was stunned when he saw the latest hot search video on the internet.

"Optimus Prime and Megatron invade earth?"

There was something wrong with the title. Was it the news video of Optimus Prime and the event that shocked Tianyou city?

After clicking on the news video, he knew that it wasn't the case. It was a video of Optimus Prime and Megatron fighting against the Pirates on the merchant ship.

From the video, one could clearly see how powerful Optimus Prime and Megatron were.

It could be said that the weapons in the hands of those Pirates were fatal. If they had encountered anyone else, they would have been turned into a hornet's nest.

Now, these weapons could only produce the clanging sounds of metal against Optimus Prime and Megatron. They couldn't deal any damage to them at all.

Even the little muskmelons were useless.

This scene was even more awesome than the ones in the movies.

In the movie, Optimus Prime had to Dodge and run under the barrage of these weapons, but now he didn't even bother to Dodge.

Naturally, this news did not only appear on the Internet in China. It also appeared overseas. Moreover, it was even more popular overseas. When those news media received the news, they released the news immediately.

It could be said that after seeing the video sent by doba, if they had not known that the eastern country had already mastered this technology, they would have thought that they were the real Optimus Prime and Megatron.

They came out of the movies, otherwise, how could they be so powerful?

Of course, the most eye-catching thing was the last words of a pirate. " optimus prime and megatron really exist. they've descended on earth, and some humans have joined them. optimus prime is a bad guy! "

this shout stunned everyone. you're just a pirate, and you want to save all of humanity? It's a pity that everyone knows more than you.

however, this video also made many people unable to sleep well. after all, some people had to consider how terrifying this kind of combat ability was.

They had to consider the gap between their current robot technology and the other party's.

This was obviously the research direction of the next era.

Now that the other party had already entered the level of the next era, they were still at the same spot. This would make them feel insecure.

As a result, many places began to hold long meetings, as if all the plans had been disrupted.

Everyone in the country knew what was going on with Optimus Prime and weizhentian.

after all, it was something developed by linlin's laboratory.

Now that this thing was so terrifying, it made many people think of the pillar of the Linlin Scenic Area and the Megatron, and countless people were attracted to the Linlin Scenic Area.

The traffic that had just recovered to you city was once again in a state of paralysis.

Linlin Scenic Area.

When the tourists saw the video on the internet, they subconsciously ran to the entrance of the scenic Area. When they saw Optimus Prime and Wei zhentian, who were wearing security epaulets and shouting at the tourists through megaphone, their gazes turned strange.

These were the two mighty guys that dealt with Pirates? But now, he was working as a security guard at the Linlin Scenic Area.

Many people even subconsciously thought of some weird novels on the internet: The current king of soldiers had returned to be a security guard.

In particular, Optimus Prime and Wei zhentian were not only weapon Kings, but they were also security guards.

The key point was that when these two guys became ruthless, they could just pull out their weapons and cut people up?

Who would dare to cause trouble in Linlin Scenic Area?

Some tourists even wondered if they should apply to propose that Optimus Prime and Megatron of Linlin Scenic Area not be allowed to carry weapons.
