

The Game 1451

[Chapter 1451 658-An Obvious Contrast! The Revenge Of The Rich Man \(3\)](#)

Carlton took the report and immediately called for his personal doctor.

Because of the special experiment, he was not allowed to leave the place as a private doctor. Instead, he had been used as a Coolie to help the doctors and the rich translate.

"Mr. Carlton, your report is out as well?" The private doctor asked as soon as he came in.

Carlton nodded and passed the report to the other party. "Help me take a look,"

The private doctor took the report and looked at it. After a moment, he said, " Mr. Carlton, that's great! You've completely recovered from your late-stage cancer. You're now the healthiest person in the world. The other rich people have also recovered. Their tea leaves are indeed magical.

Carlton nodded. Indeed, how could the tea not be magical when it could cure his late-stage cancer?

Therefore, if he could get his hands on these tea leaves and cultivate them himself, he could easily earn back the wealth he had donated. He could even quickly become the richest man in the world.

As long as he could make this thing, he could make the tea leaves of this Eastern country not competitive at all in other countries. After all, the West was a world of capital.

What he needed to think about now was how to get these tea leaves.

It wasn't just the wealthy people like Carlton who burst into cheers. On the other side, the families of those who had participated in the treatment and made contributions to the country also burst into cheers after the report was released.

This time, they were crying tears of joy.

It was true that cancer had dragged down the entire family. Many times, she had thought of not dragging her family down even if she died.

Fortunately, the clinical trial saved them.

naturally, these people also had a special privilege. after the results were out, their phones were returned and they could report the good news to their families. after all, these people's families were all ministers who had contributed greatly to the country.

even their phones had been charged and they had paid the bill.

Hu city.

Li changgong was a Level-2 disabled veteran. He was originally a Special Forces soldier. His leg was blown up by a highly explosive weapon while pursuing border criminals. It was crushed and had to be amputated.

After he retired from the Army, he had been able to get by because of the special subsidies and benefits from the higher-ups. However, as his wife was in the final stage of cancer, his life became more and more like hell.

If he didn't have a daughter, he would have accompanied his wife to the hospital.

Fortunately, there were clinical trials from the Chinese Academy of Sciences and Linlin laboratory!

However, because it was a secret, he had not seen his wife for a long time and only contacted her occasionally through the phone.

At this moment, his phone rang. Seeing that it was a call from his wife, he immediately picked it up. A moment later, he said excitedly, "Really? really? It's all good, Yingluo."

After hanging up the phone, Li Changgong couldn't help but lie on the ground and cry tears of joy!

For the first time, he felt that his previous efforts were worth it.

After all, it was because of his contributions that he was regarded as a hero that his wife had the opportunity to conduct such clinical trials.

The same thing was happening all over the country. Countless heroes who had contributed to the country cried in excitement when they heard that their families had recovered.

Soon, the examination was over, and the patients who were treated signed the statement of completion of the treatment experiment and recovery. They could leave.

Carlton left the hospital as soon as he could. There were already people waiting for him in your city to bring him back to China.

When he saw his subordinates, he immediately ordered, "Find the number one thief in the world, Mike. I don't care how much it costs if I want him to help me!"

[Chapter 1452 659! Everyone's Hope! All Kinds Of Capable People Come To Your City](#)

Upon hearing the order, Carlton's men immediately took out their mobile phones and made a call.

As subordinates of a rich man like Carlton, it was inevitable that they would come into contact with all kinds of people from the dark side when they had to do all kinds of things for him.

Moreover, when working for a rich man like Carlton, many people from the dark side had to do things for his sake.

For example, the gang on the streets of America. He helped Carlton do some things, and with just a word, he could make those people submit to him. Otherwise, Carlton could easily take out a sum of money and make them disappear completely.

Of course, they also needed to know the contact information of some high-end people, such as Mike, who was the world's number one thief.

This guy was very famous internationally. There was nothing that he couldn't steal.

Therefore, this guy's offer was also very high.

However, this guy was wanted all over the world, and he was very secretive. They could only contact him through a middleman, so it was difficult to contact him directly.

Carlton's subordinate answered the phone and explained the reason. Finally, he said, " "As long as we can find Mike and get him to settle the matter, then the price is not a problem."

A sigh came from the other end. I'm really sorry. We really can't contact Mike recently. He seemed to have accepted a big order before. He's probably on vacation now.

you know, once people like them go on vacation, no one can contact them. Even the FBI can't track them down.

Carlton's subordinate had no choice but to hang up the phone and look at him.

The phone was on speaker, so Carlton had also heard it.

Mike couldn't find her, so he could only find someone else. He asked his subordinate, " "Who else is better than Mike?"

the underling thought for a moment and said, " there's a guy called Dominica. i heard that he's burly and has a bald head. he's good at flying cars. he even drove his car from a building that's dozens of stories high to another building. "

"Although he is not as strong as Mike in terms of individual strength, he has a team. Each of them has first-class flying skills and their own skills. Even if they work together, Mike can't beat them."

" they used to be involved in criminal activities and have been wanted by the FBI. now they've started doing bounty missions and are the best bounty hunters. "

Upon hearing this, Carlton replied without hesitation, " go to them and ask them to help me steal a tea tree that can treat cancer. I'll give them a billion or two billion dollars in compensation.

Compared to the more than 6 billion dollars that he had been forced to donate, this money was nothing.

moreover, as long as he could get his hands on the tea leaves that could treat cancer and cultivate them himself, the money he earned would be equivalent to one leaf among the dense leaves on a big tree.

During the treatment, he had not been idle. He had asked around for some information. Although it was not accurate, he knew that the tea trees were cultivated in an experimental site in Linlin's laboratory.

Carlton's subordinate did not hesitate either. He picked up his cell phone and contacted him again.

a moment later, he turned to carlton and said, " Mr. Carlton, the other party has agreed to your offer of one billion US dollars. It just so happens that Dominica's team is planning to retire from the game, so they're going to treat your mission as their last one.

Carlton nodded.

At this moment, another one of his men ran in and reported, " Mr. Carlton, there are a lot of reporters outside who want to interview you and ask about your condition. Would you like to accept the interview? "

carlton thought for a moment and said,"let's go!" Accept their interview. Since the tea leaves are effective, we should let everyone know."

Of course, he had a purpose for doing so. He wanted to prove the effects of the tea leaves. When he succeeded in stealing them and cultivated the same tea leaves, it would be equivalent to promoting himself.

In his mind, a team of bounty hunters that was more powerful than the world's number one thief should not fail in stealing in this small county in an Eastern country.

even if the other country had sent special people to protect them, they couldn't be much better than the FBI, right?

If Dominica and the others could play the FBI like a fool, it would be more likely for them to send superheroes to defend themselves.

thinking of this, carlton adjusted his collar and walked out.

there were indeed quite a few reporters outside. most of them were from the east, while a few were from overseas.

When the reporters saw Carl, they immediately surrounded him and asked, "

Mr. Carlton, you've donated more than six billion dollars for treatment. Has your cancer been completely cured? "

Mr. Carlton, has your illness really been cured by the tea? "

"mr. carlton, sob, sob."

"Carlton, whine."

"Carlton, cricket."

As Carlton listened to the reporters 'chattering, he could only wave his hand to calm them down. Then, he replied in unison, " everyone's questions are correct. Before I came here for treatment, I had late-stage cancer, but after the treatment, my cancer has been completely cured. I'm now the healthiest person, so I think it's worth spending more than 6 billion dollars to save my life.

after the interview, carlton also left immediately. he wanted to cause trouble, so he naturally had to leave first to avoid any unexpected situations.

it wasn't just carl; the other rich people were also interviewed by the reporters.

Because of Shen Li's special arrangement, many reporters poured into you city.

[Chapter 1453 659-Everyone's Hope! All Kinds Of Capable People Come To You City!](#)

Some reporters specifically went to interview the rich, while others went to interview the family members of heroes who had contributed to the country.

A one-armed middle-aged man, his daughter, and his family were approached by a reporter.

" i'm sorry to disturb you. i'm a reporter from qin zhuan news. can i interview you? " the reporter stepped forward and revealed his identity, asking, " have you accepted the clinical trial of tea leaves for cancer treatment? "

Upon hearing this, the one-armed middle-aged man nodded and said excitedly, " " that's right, my daughter accepted clinical trials, and now her cancer is completely cured. thank you to the country, thank you to the chinese people's hospital, thank you to the linlin laboratory, thank you to academician qin! "

The reporters could clearly see the one-armed middle-aged man's excitement and gratitude. They could even resonate with him because cancer was a disease that caused despair to countless people.

Everyone knew how terrifying the disease was, so no one wanted to get it for themselves or their family.

The reporter looked at the one-armed middle-aged man and asked curiously, " "Sir, as far as I know, the Linlin laboratory and the Chinese hospital are conducting a joint clinical trial against the family of a national hero. You must be a hero too. Can you tell me what happened?"

When the one-armed middle-aged man heard this, his eyes seemed to flash with memories of the past. " i'm a firefighter. i lost my arm in a huge fire, but i really don't regret it. because i lost an arm, i saved more than 30 people. moreover, the higher-ups have never forgotten about me. so, my daughter's late-stage cancer was treated free of charge and the disease was kept away from her. "

the one-armed middle-aged man's words were very sincere, and the reporter was very impressed. he hoped that he could save someone with one arm, and he even saved more than 30 people. who dared to say that he was not a hero?

Therefore, his daughter was the first to receive free clinical treatment for cancer. Who dared to say that this was not a privilege that he deserved?

with the interviews of these reporters, the news of the successful clinical trial of this group of late-stage cancer patients was soon broadcasted.

in an instant, the entire internet was in an uproar. many people had almost forgotten about this matter. it was undoubtedly a bomb when it was brought up again.

after all, this time, he had treated a large number of late-stage cancer patients, which meant that it was not an exception.

This also meant that as long as the tea leaves were cultivated, all cancer patients could be cured. Most importantly, it was also a guarantee for people who didn't get cancer.

after all, who would not be happy with such a guarantee? Who was not at ease?

The illness that was about to die seemed to have become as common as the cold.

The biggest Cancer Hospital in min province was the number one Cancer Hospital of min province.

It was an official Cancer Hospital.

The hospital director, Fu Changting, was a very kind lady.

although the outside world had always been talking about how hospitals and doctors were always dissing and receiving red packets, there would always be a group of selfless people, and there would always be some people who were willing to contribute to the patients.

These people lived up to their profession as doctors and their titles as angels in white.

this was the case for ms. fu changting. as the director of the cancer hospital, she had seen too much of the misery of many families. therefore, she had applied for many benefits for cancer patients. many cancer drugs had been reduced in price because of her cooperation.

As usual, Fu Changting was paying attention to the situation in the various districts of the hospital. A doctor ran in hurriedly. director, look at the news on the internet. It's big news.

fu changting was puzzled. she took out her phone and looked at the news online. she immediately saw that the hot search news had been unified:

the clinical trial of tea leaves treating cancer is a success!

Carlton and the other rich people have been successfully treated for terminal cancer and discharged from the hospital!

"late-stage cancer will no longer be a terrifying disease!"

" thank you, academician qin little, for eliminating the threat of cancer! "

"A simple tea leaf has saved the families of so many heroes!"

《.....》

All of them were about cancer and tea leaves. Moreover, it involved academician Qin, so Fu Changting immediately knew the reason.

She knew that academician Qin was a young man who was respected.

didn't the other party develop tea leaves that could treat cancer? previously, she had a skeptical attitude. after all, it had not been promoted.

Now, it was clearly true.

With so much news, so many rich donors, and so many heroes 'families being treated, this obviously couldn't be fake.

Fu Changting immediately revealed a look of surprise and said to the doctor, " inform the entire hospital to broadcast this news on tv. "

The doctor nodded and immediately went out to handle the matter.

the atmosphere at the cancer hospital was even more depressing than that of ordinary hospitals. there were several patients with late-stage cancer in one ward.

these patients were in pain, and so were their family members. some of them even cried.

However, today, at the same time, these patients and their family members saw the nurses turn on the TV in the ward. Even the TV in the corridor and the lobby was turned on.

The same news was being broadcasted on the screen, and it was about the clinical trials for cancer.

Not long after the news was broadcasted, the entire hospital burst into cheers.

Although he didn't know how long it would take for the cancer tea leaves to be Fully Promoted, at least there was hope. Sometimes, when there was hope, it was worth persisting, even if it was to sell cars and houses before the tea leaves were promoted.

[Chapter 1454 659-Everyone's Hope! All Kinds Of Capable People Come To You City!](#)

It could be said that the appearance of this news gave everyone hope.

not only in china.

the news also spread quickly abroad.

The news that Carlton and the other rich people had been cured of their late-stage cancer was soon broadcasted by the media all over the world.

The reason why this news could spread so quickly was mainly because the combined wealth of Carlton and the other rich people was simply too shocking. There was also the fact that cancer was really the Grim Reaper that threatened all humans.

germany.

As the largest tea manufacturer in Germany and one of the largest in the world, he also received the news very quickly.

When he saw the news, his expression turned ugly.

He had already known that the eastern country had tea leaves that could treat cancer. He had even applied to cooperate with the Linlin laboratory.

however, the other party ignored him.

moreover, he had been waiting for the treatment of the wealthy people like carlton, while he thought of a solution.

he just hadn't thought of a way to deal with it.

Most importantly, he did not expect the healing effect of Carlton and the other wealthy people to be so good and so fast.

The late-stage of cancer was cured so quickly just by drinking tea.

Therefore, he had to do something.

He immediately called for his Secretary and instructed, " "Contact the number one thief in the world, Mike."

Obviously, these rich people were the big customers of the International dark figures.

Now, hober also thought of Mike.

after the secretary contacted him, he frowned and said, " "Boss, I can't contact Mike."

"then contact the others. they have to be better than mike." Hober said immediately.

The Secretary nodded and said, " I heard that there's a team of bounty hunters. The leader is called Dominica. They're better than Mike. I'll try to contact them!

" boss, " the secretary said, frowning, " Dominica already has a mission, so we can't find them. "

When hobers heard this, he frowned and said, " "Then who else can I find?"

"we're the best bandit in germany. although we can't compare to mike, we're still very good!" the secretary immediately said.

yes! hobers nodded. contact the other party!

England.

Frey also saw the news in his Castle, and he also found an assistant immediately.

His family was the first tea merchant to steal tea leaves from the eastern countries. He was also the one who had been suppressing the tea leaves from the eastern countries with all his might and developing the tea leaves he had stolen.

Now that the eastern country had this kind of tea, they couldn't just sit back and wait for death.

When the assistant arrived, Fury asked, " "I want the tea leaves from that Eastern country. Help me contact some powerful people."

The assistant immediately said, " boss, we can look for the best international robber. I have news that the other party is an Englishman. We can contact him. Moreover, the other party only works in other countries and will not work in his own country. The quality of his work can be trusted.

When Frey heard this, he immediately said, " "Contact the other party. They can pay however much you want!"

"Okay, boss!" The assistant nodded and left immediately.

Fury frowned. The International tea leaves grew in their family's hands, and they were the ones who saved them from the hands of that Eastern country.

It was his family that saved the tea leaves, and he would never allow the tea leaves to be destroyed by the people from the eastern country.

[Chapter 1455 You City Prison Is Going To Be Lively](#)

Linlin's laboratory once again became the focus of the internet after the news of the tea treating cancer was broadcasted.

Academician Qin little also became the person who was mentioned the most on the internet.

If there was a person who was destined to go down in history, it must be the person who eliminated cancer.

In other words, academician Qin was destined to go down in history, but his age was really too young, and his achievements were so incredible.

Linlin Manor.

Minister Lu went to Qin Lin's office again and saw him. "boss qin, sorry to disturb you again."

Qin Lin invited Minister Lu to sit down and said with a smile, " " minister lu, there's no need to bother us. i'm happy that you're here. if there's anything you can help with, i'll be even happier. "

minister lu smiled. " i wouldn't have gone back if i had known this would happen. but this time, i really have to ask boss qin something. it's about the cultivation of the cancer tea trees. "

" now, not only does the whole internet know about this, but the whole world is also paying attention to this, especially those cancer patients. they're all looking forward to it. "

so, the higher-ups feel that we should release some information, at least to let the public know about the progress of the tea tree cultivation.

Qin Lin understood this, but he didn't pay much attention to the cultivation of tea leaves. He could only say, " "Minister Lu, I'll take you to the experimental site for cultivating tea trees!"

"that's good!" Minister Lu nodded.

The two of them left the office and headed to the laboratory together. Qin Lin gave Shen Li a call and asked him to make the necessary arrangements.

Not all of the experiments were conducted in Linlin's laboratory. Many of the experiments were conducted around the laboratory.

This was especially true for the experimental plots for large-scale production of finished products, such as the previous purification grass experimental plot and the current tea tree planting plot.

This was mainly because no one had expected the Linlin laboratory to develop so quickly, with one research result after another appearing.

For this reason, Linlin's laboratory had no choice but to arrange for a lot of security forces to patrol and protect these laboratories.

When Qin Lin and Minister Lu arrived at the experimental site, Shen Li was already waiting for them. Chairman Qin, Minister Lu, come over here. The test site of the tea leaves is over here!

Minister Lu followed behind curiously and soon saw the area with tea trees.

The tea trees had already grown to a certain size, and their leaves were very dense.

Qin Lin was a little surprised to see the tea trees, because they grew faster than he had imagined.

Under normal circumstances, it was impossible for tea trees to grow so quickly.

Now, these tea trees were growing at a faster than normal speed.

Shen Li brought Qin Lin and Minister Lu into the tea tree experiment field and explained, " Chairman Qin, Minister Lu, although these tea trees haven't grown tea leaves yet, our laboratory has a special experimental team that pays attention to them every day.

moreover, they did various tests on the tea trees and obtained various data. Then, they compared the data with the data of the two tea trees in Linlin Manor.

we've already come to a conclusion. Even if the tea leaves from these tea trees are not as strong as the ones from the two tea trees in the manor, they are definitely effective against cancer.

minister lu was overjoyed when he heard this and asked, " "President Shen, how long will it take for the tea tree to grow tea leaves?"

Shen Li said, " the tea leaves should be ready by next year. By then, we will have the first batch of tea leaves to be supplied to the outside world. Naturally, we can cut the leaves immediately and plant a new batch of tea trees.

"that's great," Minister Lu's face lit up when he heard the news.

The first batch of tea leaves would grow next year, and by then, the first batch of late-stage cancer patients would be able to receive treatment.

as for how many people it could heal, that would depend on the production.

There might be patients in the final stage of cancer dying during this period of time, but that was not something he could control. Sometimes, there were too many things that he could not do.

All he could do was to do his best to do what he should do.

then, minister lu followed shen li and began to walk around the tea tree field. at the same time, he asked shen li a lot of questions about the tea tree.

shen li naturally answered them one by one. before the cancer treatment of the rich people like carlton was over, he had specifically checked on the technology used to produce these tea trees. therefore, he was very familiar with the information on these tea trees. he could answer almost all of minister lu's questions.

When Qin Lin took Minister Lu to the tea tree experimental site, they were also attracted by the two security guards.

The security guards around them were all from Linlin laboratory, and they were all wearing the standard security uniform of the laboratory.

However, two of them were wearing the Linlin Scenic area's security uniform. Moreover, the color of the uniform was black, which was the uniform he had made from the game.

in other words, these two men were ma hong's subordinates.

That was indeed the case.

the news that the tea leaves could cure cancer had completely spread. the tea tree would soon become the focus of attention. it might even be targeted by people.

Before it was completely popularized, they had to pay more attention to the experiments. Therefore, Ma Hong had sent two people to help with the security of the laboratory.

qin lin also knew the reason why the two security guards came. after all, the news was too popular and there was too much attention.

He didn't pay much attention to this matter and continued to accompany Minister Lu to check out the tea trees.

however, he did not know that there were already people secretly spying on the test site for the planting of tea trees.

[Chapter 1456 You City Prison Is Going To Be Lively](#)

On a barren hill, a bald man was already looking at Linlin's laboratory with a telescope.

there were men, women, white people, and black people following behind him. these people were talking.

it's really too troublesome to come to this Eastern country. No wonder people in the industry say that they're not willing to come to this Eastern country no matter where they go for a mission.

" yeah, i've only heard of it before. now that i've personally sneaked in, i know how difficult it is. "

" it's a good thing we're here. as long as we complete this order, we can retire in peace. "

"Dominica, how's the observation going?"

when the bald man heard the question, he put down his binoculars and said, " Linlin's laboratory's security system is quite well-organized, but it's not difficult to break through. After all, no matter how organized it is, it's Just Security. However, we have to pay attention to two things now.

"Which two?" A black man asked with a frown.

Dominica explained, " one of the problems is the big guys at linlin scenic area. you all know what happened to optimus prime and megatron. those pirates had a terrible end. there are four of them at linlin scenic area. "

" when the time comes, our car won't be able to outrun them. if we encounter them, we'll be the unlucky ones. so, once we encounter them, we have to find a way to contain them. "

that's easy, " the black man said immediately. just send someone to the scenic Area to create chaos. I'll take care of this task.

Dominica nodded and said, " another problem. I seem to have found traces of my peers, so we have to find them. I think we have the same goal, so we can work together. There's no need to hinder each other.

"Dominica, leave it to me. I'll find their location," the black girl next to him said.

Dominica nodded and picked up the telescope again to observe, his eyes sweeping over the tea plantation base.

It wasn't hard to find this piece of land, and the other party had sent so many security guards here.

He glanced at the two security guards and was stunned.

These two security guards seemed to be wearing different uniforms from the other security guards, but he didn't care. They were just two security guards. No matter how powerful they were, they were just retired Special Forces soldiers.

To be honest, they didn't even care about active Special Forces, let alone retired ones.

However, Dominica didn't know that in the experimental tea plantation, two of Ma Hong's men were frowning.

Just now, they had clearly felt that someone was spying on them.

This was the intuition that they had gained after countless hellish training. This intuition often allowed them to respond in advance when they were assigned to protect their leaders.

They knew that this was not wrong. They looked at each other but did not do anything. They still pretended to be ignorant and reported in a low voice.

on the other side, Ma Hong was very excited when he received the news. He gathered everyone, including Zhuang Long and Li Xiang.

After hearing the news, the others were also excited.

Why was he excited? It was very simple. They had to have a chance to test out the combat suit and security suit.

There had been no target before, so it was obvious that someone had come to his door.

Since the other party was investigating the tea plantation, it was obvious that their target was the tea trees.

He suddenly felt a little excited and excited.

...

After an unknown amount of time.

In a place on the outskirts of your city, a few cars stopped one after another.

It could be seen that Dominica and his men, the world's number one bounty hunter Group, were the first to get out of the car.

After that, two more cars stopped, and two people got out.

The two of them were obviously not on the same side. After getting out of the car, they looked at each other, full of vigilance.

Then, they looked at Dominica and the others.

"Who are you people?"

"What's the purpose of luring us here?"

The two of them spoke one after another.

Dominica did not say anything. The black girl beside him walked out and said, "It's a pleasure to meet you two. The number one Bandit in Germany, Chris, and the number one Bandit in the world, Mr. Quelda."

Chris and quelda's expressions changed at the black girl's words.

They had a mission to infiltrate this country, and the reward for the mission was very high. However, they did not expect to be recognized as soon as they entered this place, and they were even found.

Dominica stepped forward. nice to meet you two. Let me introduce myself. My name is Dominick.

"You're Dominica?"

"Dominica?"

Chris and quelda said in unison.

Although they were the best Bandit in Germany and the world, they had heard of Dominica's name before. He was a tough guy, but also a very powerful guy.

Dominica continued, "I believe that our goals should be the same this time. It's just that we have different clients. Therefore, we can work together to get the tea tree. This way, we can both complete our respective missions.

Chris and quelda nodded in agreement.

After reaching an agreement, both sides were less on guard. Dominica then called for a discussion.

Actually, there wasn't much to discuss. They just had to send people to cause trouble at the Linlin Scenic Area and stop the four Optimus Prime and Megatron from taking action.

The rest of them took advantage of the night and rushed into the area where Linlin's laboratory grew tea leaves.

[Chapter 1457 You City Prison Is Going To Be Lively](#)

With the strength of the security guards, there was no way to stop them.

now that the plan had been agreed upon, all that was left was to act.

Time flew by, and two days passed.

The past two days had been peaceful, and Dominica only took action with his men when the sky turned dark again.

A car drove straight into the parking lot of the Linlin Scenic Area.

Two black men and women got out of the car.

This attracted the attention of the security guards of the scenic Area. However, foreigners often came to the scenic Area, including black people, so the security guards did not find it strange.

The Butler and the woman talked and laughed, just like normal tourists.

However, after the two black men were out of the security guard's sight, they began to talk in a low voice.

this parking lot is not bad. Just by doing something to these cars, it will attract attention.

"Yes, Dominica and the others will complete the mission in ten minutes."

"Check your watch. We'll act when the time is up."

"Alright," he said.

The man and woman looked at their watches.

At the appointed time, the black man took out his phone and sent a message. "Boss Dominica, I'm going to start now. You guys hurry up too."

After that, the two of them took out something from their bags and planned to install it on the two cars next to them.

It could be seen that there were a lot of such things in their bags.

Just as the two of them were about to start installing the equipment on the two cars, they suddenly froze.

The black woman turned around and he saw a shocking scene. A group of people had appeared behind her. Two of them were wearing black security uniforms, while the others were wearing ordinary security uniforms.

she subconsciously patted the black man's back.

The black man turned around in confusion, "what? what's wrong?"

Seeing the scene in front of them, the black man was also stunned. His mouth was wide open, and before he could understand what was going on, the two of them felt as if they had been hit hard, and then their entire bodies fell to the ground.

The two of them didn't even have time to react to what had happened.

On the other hand, Dominica, Chris, quelda, and the others had already snuck around the area where the tea leaves were being tested and were waiting.

As his phone beeped with a message, he immediately took out his phone.

After reading the message, he immediately said to the others, " "We can start now."

The few of them sneaked into the experimental ground as fast as they could. They were indeed very powerful, they actually dodged the surveillance cameras accurately, and their speed was also very fast.

However, Linlin's laboratory security wasn't to be trifled with. They were quickly discovered.

It was a pity that Dominica, Chris, and quelda were indeed very powerful. The security guards of Linlin's laboratory were all retired Special Forces soldiers. Although they could not maintain their peak performance, they were defeated by Dominick and the other two.

After Dominica knocked down a security guard, he did not forget to shout to his two teammates, " hurry up and do it. We'll leave after we're done digging up the three tea trees.

The two members of Dominica's team nodded and immediately took out their tools, ready to dig up the tea tree.

However, just as one of them raised his tool, he was shocked to see a figure appear out of thin air in front of him. This made him retreat in shock.

Even Dominica was the same. He had just knocked down a security guard when he saw a fist coming out of thin air.

"What?" Dominica was dumbfounded. He did not notice anyone here just now.

[Chapter 1458 ! 'M Afraid They'll Be Scared Out Of Their Wits! _1](#)

Dominica could not believe what he was seeing.

when he came in, he had observed the surroundings at the same time. other than the security guards, he did not notice anyone else around.

but what was with this sudden attack?

he couldn't react in time and could only subconsciously block his chest with his hands to block the punch.

Bang!

The muffled sound of the collision of two bodies rang out. Dominica felt a sharp pain in his hands, and he was forced to take two steps back from the impact.

He immediately knew that this was an expert.

At the same time, he also saw clearly that a human figure had appeared in front of him. However, after the human figure's outline appeared, it began to slowly hide in the night sky, making it impossible to see clearly.

ma hong was also looking at the bald man in surprise.

He was wearing a Security Guard Uniform and was in a hidden state to launch a sneak attack, but he didn't take down the other party with one punch. This meant that the person in front of him was not ordinary.

two screams were heard at the same time.

Dominica's expression was ugly. Those were his two companions, who were already lying on the ground. Beside them, there were also special human figures.

"Damn it, what the hell?" Chris.

"what's going on?" Quelda.

The number one bandits in Germany and the number one bandits in the world were also attacked. The two of them were also forced to retreat by the sudden appearance of the figure.

Dominica finally understood what was going on. He could clearly see that the two men were wearing special clothes and headcovers, which had the effect of blending in with the surrounding environment.

Therefore, they didn't notice these people who were lying in ambush.

But what kind of technique was this? They had never seen such a magical thing in all the countries. This kind of thing would only appear in movies, right?

"So that's how it is." Dominica thought to himself.

It was impossible for someone to appear out of nowhere.

Then, a strange look appeared in his eyes.

If he could get a set of these clothes, where would he not be able to go after he used them? Or he could sell his clothes to those organizations, which would probably be more valuable than the tea tree.

dominick actually had such a thought. the sneak attack from his opponent just now gave him confidence that as long as he put his life on the line, he still had a chance of success.

Moreover, his body was larger than his opponent's, so his strength and endurance were definitely stronger than his opponent's. Even if he went all out, he would still be able to kill his opponent.

At this moment, two mocking voices were heard, "

Captain MA, it seems like there's a difficult character. Let us do it!

"Yeah, just leave it to us."

They were Zhuang long and Li Xiang, who had taken the body-strengthening medicinal liquid.

The two of them even stopped the color-changing effect of their combat uniforms, because they didn't need it to take down these people.

The appearance of the two men made Ma Hong and the others back off, and they surrounded Dominica and the other two.

Ma Hong wasn't an idiot. These people in front of him weren't simple. In order to avoid any accidents, he had to take them down as soon as possible.

otherwise, he would not be able to explain to boss qin, minister lu, and the others if anything happened.

Dominica, Chris, and quelda also understood that the two men in front of them were going to fight the three of them.

Dominica felt that he had been looked down upon and said coldly, " Compared to the tea trees, I'm afraid their clothes are more valuable."

Chris and quidar were stunned by his words, and their eyes showed a brutal look.

Having been in the dark side of the world for so long, they naturally understood that if this thing was sold to the American side, the other side would be willing to pay no matter how much it was.

Moreover, they had also done something for the beautiful country in exchange for not being wanted in the country.

If he got his hands on this, the benefits would be unimaginable.

Seeing that Zhuang long and Li Xiang were already walking toward them, the three of them looked aggressive. Chris and quelda were the first to attack.

The two of them rushed toward Zhuang long and Li Xiang at the same time and attacked them with the fiercest straight punch.

In a battle of their level, there was not much fancifulness. Only the most direct attacks were the most useful. The rest was strength, speed, and reaction.

If he was lacking in these three areas, it would be useless no matter how many techniques he had.

The two men's fierce fists arrived in front of Zhuang long and Li Xiang in an instant. However, the next moment, the two of them were stunned. Zhuang long and Li Xiang easily raised their palms and caught their fists.

Then, Chris and quelda were both stunned. Their faces were filled with fear as they realized that their fists did not move at all.

How much strength did this require?

The two of them wanted to pull back their fists, but they also found that they couldn't pull their hands back at all. Their arms seemed to be firmly bound by an indestructible force.

Obviously, this was the difference between an ordinary person and a warrior who had taken the body-increasing potion.

Chris and quidar were definitely very strong. Otherwise, they wouldn't have been able to get such a reputation in the dark side of the world. Their physical strength had also been trained to the limit of ordinary people.

After all, they were able to fight evenly with Ma Hong and the others.

There weren't many people like him in the dark side of the world, but now they were all here in you city.

However, no matter how extreme they were, they were still ordinary people.

However, the soldiers who took the body-strengthening potion had broken through the limits of ordinary people, and the gap was obvious.

Zhuang long and Li Xiang attacked as well. With simple kicks, their knees hit Chris and quelda's chests.

Before Chris and quelda could react, they were hit hard. Their chests hurt, and they slowly fell to the ground. They covered their chests and coughed up blood.

[Chapter 1459 661-All Screwed Up! I'm Afraid They'll Be Scared Out Of Their Wits!](#)

Dominica was shocked.

He knew Chris and queda's power. Although they were not as strong as him, they were definitely international bandits and fiendish existences.

While he was still in shock, Zhuang long and Li Xiang had already appeared in front of him. He subconsciously wanted to make a move, but the two of them had already pressed on his shoulders.

Then, he also felt that his abdomen had suffered a series of heavy blows. Before he could react, his entire body stiffened, and he spat out a mouthful of blood before falling to the ground, losing his ability to move.

In a short time, the internationally famous Dominica, Chris, and queda were taken care of.

If the International criminals, mercenaries, bandits, and bounty hunters were to see this scene, they would definitely be scared out of their wits.

Dominica, Chris, and queda were also scared out of their wits. They knew their own strength and each other's strength.

Otherwise, they wouldn't have been able to dominate the international scene. With such a big name, even the FBI and Interpol couldn't do anything to them.

But now, facing these two people, they actually didn't have the slightest ability to resist.

How could there be such a strange and terrifying existence in Linlin's laboratory?

However, the employer did not mention this in the mission. If the other party had said so, they would definitely not have come. At the very least, they would have investigated first.

Ma Hong also walked forward and said to the others, " "bring them back first and investigate their identities."

the others nodded and cuffed Dominica and the others, then took them directly to the linlin scenic area police station.

after all, this was the only place that had a suitable interrogation room and a temporary cell.

The police station of the scenic Area.

Hong Bo was extremely busy.

However, he never got tired of it, because he was now at the stage of working for a long time. He had three international pirate-level achievements, so he was destined to be promoted. He was full of energy.

He was really glad that he had made the right choice back then.

In the beginning, when you Cheng wanted to send a team of scenic patrol police to Linlin Scenic Area, many people were hesitant because the credit of the patrol police was often linked to the scenic Area.

However, everyone knew that although the patrol officers of the scenic Area lived a comfortable life, it was very difficult to make enough contributions. It was almost impossible for anything big to happen.

Most of the time, there were trivial disputes between tourists. No matter how many of these cases were handled, they would only end up in the Civil Affairs Department, which was very limited.

He had chosen to come to the Linlin Scenic Area, but the area had developed in a way that shocked everyone. Soon, the security Office had been established, followed by the police station.

He had also been promoted all the way.

Although he was the director now, he still had to do many things personally. He also had to carefully look at the results of the mediation of the tourists in the scenic Area.

After all, he didn't want any trouble to happen at the scenic Area.

Hong Bo was looking at the mediation of the case when he saw two security guards of the scenic Area holding a black man and a black woman in.

black people were already used to the scenic area. many foreign tourists had been attracted here long ago, and there were also many black people.

However, when he saw the two security guards, Hong Bo immediately stood up and took the initiative to welcome them. "the two of you, who are they?"

He knew that there were special personnel sent by the higher-ups among the security guards of the scenic Area, and the two people in front of him were one of them.

The other party had personally escorted two foreigners over. He suddenly had a premonition.

One of the security guards threw a bag on the table and said, " I don't know who these two guys are for now, but they're definitely not good people. There should be more people coming in later. You should prepare a temporary prison and an interrogation room.

Hong Bo subconsciously looked at the things inside the bag and cold sweat appeared on his forehead.

He recognized what it was. With a press of the remote control, any one of the things in it could blow up a car.

f * ck! F * ck! F * ck! Hong Bo cursed subconsciously.

What were these two guys doing with so many of these things? Could it be that he had taken things too hard and wanted to kill Optimus Prime and Wei zhentian?

He also immediately knew that these two guys were absolutely vicious and evil. He didn't dare to hesitate and immediately sent people to lock the two people up in the temporary prison.

The two security guards also took out their computers and logged into a special website. After entering the password and going through a few rounds of verification, they began to search ...

A moment later, the sound of a car engine could be heard from outside.

Hong Bo went out immediately and saw Ma Hong and his men escorting a few foreigners out of the car. These people seemed to be in a rather miserable state, their faces pale.

Hong Bo didn't need to think to know that they were definitely the accomplices of the two people just now. He immediately said, "Captain MA, the cell and interrogation room are ready."

"Sorry to trouble you, inspector Hong." Ma Hong nodded and brought Dominica and the others in.

At this time, the two security guards from before saw Ma Hong and stood up. One of them looked at Dominica and said, "this guy is the leader. There are two other guys. We've captured the whole team."

"You've already found out who they are?" Ma Hong asked.

The security guard nodded. yes, we've also caught two guys here. Through them, we found out all the treatment for these people.

"this bald guy is called Dominica. he's even more famous and powerful than the world's number one thief, Mike. he's also known as the world's number one bounty hunter. he and his team are good at car racing and have done many big things."

at the side, Hong Bo was shocked when he heard this.

As expected.

He was the number one bounty hunter in the world, and he was even better than the number one thief in the world, Mike.

Why did all these people want to go to your city?

investigate the other two as well, " Ma Hong said. they don't seem to be in cahoots with this Dominica.

The security guard nodded and took a few photos of Chris and Quelda. Then, he went back to his computer and searched for information on the website.

not long after, a security guard said, "captain, I've found out. these two guys are called Chris and Quelda. one is the number one bandit in Germany, and the other is the number one bandit in the world. they are both wanted worldwide. "

When Ma Hong heard this, he immediately retorted, "Isn't this f * cking crazy? they're all swarming towards fault."

Hong Bo was completely dumbfounded.

What kind of people were they?

He was either the world's number one bounty hunter or the world's number one robber.

Even the police in your city wouldn't be able to control one person like this, right?

Now, these people actually came to your city like a swarm of bees. Without Captain MA, these people wouldn't even dare to imagine.

Ma Hong glanced at the security guards and said, "Interrogate them one by one!"

The security guards nodded, understanding what he meant.

These international bandits must have a lot of Black Gold in their hands, which must be plundered. In addition, these bandits must have some information that might be useful.

When Hong Bo heard this, he was very tactful and greeted the surrounding Scenic Area patrol police, "Let's go, my treat. Let's go to the scenic Area for a drink."

those on duty naturally knew that something was wrong and followed hong bo out to linlin scenic area.

At the same time, Hong Bo also took out his phone and reported this matter back to you City County.

You city.

Chen Li had just returned home from work. He had just taken a bath when he received a call. He had also returned to the county immediately and met with sun Xian.

"Sun Xian, are you telling the truth?" Chen Li asked in surprise.

Sun Xian nodded and said with certainty, "it's true. They've been captured by the people sent by the higher-ups and are being interrogated. We, you city's people, have no right to participate.

Chen Li heaved a sigh of relief and said, "that's good, but do these people have a problem with our you city?" They're actually swarming towards us like a swarm of bees."

sun xian sighed. "linlin's lab has so many good things. i think we should discuss with captain ma or the higher-ups to hold a public trial for these guys who have been caught. we can also let the outside world know that these guys have been caught for you city. let's see who has the courage to come. "

chen li was stunned when he heard this. he subconsciously said, "that will shake the world. I'm afraid all the crazy criminals will be scared out of their wits when they hear you city.

[Chapter 1460 You City Is A Forbidden Zone! Reality Is More Shocking Than The Movie](#)

By the time Hong Bo brought his men back to the police station, Ma Hong and his men had already finished their interrogation.

"It's a pity," Ma Hong sighed when he came out.

they had gained a lot from Dominica and the others.

Black Gold, information, and some information on international criminals.

The only pity was that they couldn't find out who was behind it.

These guys were all contacted through a middleman.

Only these middlemen knew who the boss behind the scenes was.

However, those in their line of work also knew that these middlemen were the most cunning people. It was very difficult to find them.

Otherwise, the FBI and Interpol would definitely look for these middlemen. Would they still dare to do this?

Ma Hong saw that Hong Bo had brought people back and said, " send these people to the special prison first. We've already made arrangements.

"alright!" Hong Bo nodded. At the same time, he felt a little emotional. Their you city prison was really going crazy. There were actually so many international thieves locked up in one place.

In other places, which prison could hold all these people in one place at once?

At this moment, Ma Hong's phone rang.

he had recorded this number.

It was you Cheng's number.

He pressed the answer button and heard the suggestion on the other end. He frowned and said,"Hold a public trial for these guys?"

He didn't expect you Cheng to have such an idea. After thinking for a moment, he said, " "do as you please."

The public trial of Dominica, Mike, and the others could indeed give those international criminals a shock.

these people had all been defeated, so they had to think it over and retreat in the face of difficulties.

This would save them a lot of trouble.

Of course, under such circumstances, there would definitely be some inexperienced guys who wanted to stir up trouble to make a name for themselves. After all, Dominica and the others had all been defeated. Whoever caused trouble and escaped safely would definitely be famous.

However, this kind of person was probably a hothead and was much easier to deal with than the bandits.

After hanging up the phone, Ma Hong ordered Zhuang long and Li Xiang to accompany Hong Bo and the others to take Dominica and the others to prison.

Soon, Dominica, Chris, and quidar were taken into the special cell in you city prison.

fortunately, the cell was big enough. it could accommodate more than 10 people.

Yamamoto Kazuo, shuoshu, and Mike also saw Dominick and the others in a somewhat tragic state.

Once Dominica and the others were locked in, they also frowned and looked at Mike and the other two.

They naturally knew that in the prison, it was easy for new people and old people to have some conflicts.

The giant rat looked at these foreigners and did not dare to be rash this time.

Mike and Yamamoto Kazuo had taught him a big lesson last time.

It was still Yamamoto Kazuo who stood up and asked Dominica and the others, "To be able to be locked up here, you must not be ordinary people, right? Tell me, did you also get caught by Linlin's security guards?"

Speaking of security, Dominica and the others thought of those guys in strange security uniforms.

Dominica looked at Yamamoto Kazuo with a frown. "Who are you people?"

Yamamoto Kazuo was somewhat dissatisfied. please, I asked first. We're seniors, after all. You should be more sensible.

Dominica frowned. the situation was unclear, and he was injured. he did not want to cause any trouble for the time being, so he said, "i'm Dominica, and this is chris, and quelda."

his words caught mike's attention.

He immediately walked up to Dominica and said, " "You're Dominica? The number one bounty hunter in the world? They all say that you're better than me, and are these two the top bandits in Germany and the top bandits in the world?"

Obviously, as the number one international robber, Mike was very well-informed. He reported the names of these people immediately.

His words made Dominica, Chris, and quelda look at Mike, and they became alert again.

"Who are you?" Dominica asked.

Mike waved his hand and introduced himself. "I'm Mike."

"The number one thief in the world, Mike." Dominica was shocked when he heard that.

He naturally knew of this person.

Chris and quelda were also looking at Mike in shock.

the two of them also knew about this person.

It could be said that this person was more powerful than them, but they didn't expect him to have been locked up here long ago.

it was no wonder that there were international rumors that he could no longer be contacted. everyone thought that he had retired and was hiding somewhere on vacation. they did not expect him to be locked up here.

Mike waved his hand again. what international number one thief? we're all prisoners now. Oh right, this is Yamamoto Kazuo, the number one assassin in the plaster country.

The reputation of the plaster country's number one assassin seemed to be much smaller than Dominica and the others, but they still did not dare to underestimate him.

This was because assassins specialized in killing people and were more ruthless than them.

Mike looked at the giant rat again, as if he wanted to introduce it.

The giant rat also looked at Mike with anticipation.

he was also shocked when he heard the identity of Dominica and the others. these people were the top people in their line of work.

what did he, the great rat, do to deserve to show his face in front of these people and even have his name mentioned?

mike glanced at the giant rat and said, " "yingluo is not important!"

squeak squeak " the giant rat felt like it had a mental breakdown.

"You guys haven't told me if you were caught by Linlin company's security guards," said Yamamoto Kazuo.

* Whoosh * Dominica.

"Yingying," Chris.

Kuelda.

Hearing this question again, these people collectively fell silent.
