

The Game 1471

[Chapter 1471 Thanking Little Qin? Freezing An Entire City? 2](#)

however, when he saw the banner, he felt that something was wrong.

Family bloodline, a man's hope, a blooming miracle, sea cucumber, little Qin Wanwan

What's the point of putting all these things together?

It looked like a telephone pole advertisement.

"f * cking ran ran!" qin lin wanted to curse.

What was going on?

It felt like his reputation had been damaged.

Why did he seem like a Sage of Andrology?

"What's going on?" Qin Lin was speechless.

Lin Lanzi smiled tenderly. Chairman Qin, these people ate the sea cucumbers you cultivated and were treated. They're thanking you.

"I'd rather not have this kind of gratitude." qin lin said with a face full of stories.

Lin Lanzi held back her laughter. She didn't dare to be too obvious or impudent in front of her boss, so she quickly changed the topic and handed a list to Qin Lin. "Chairman Qin, this is the name list of the security team. We need your confirmation. After all, it's a bit abrupt to form a football team in a Scenic Area. It can't be done without your signature!"

qin lin wanted to let people know about the effects of using special sea cucumbers and high-intensity training to increase one's physical fitness when he set up the security team.

Although it was troublesome and it would cost extra to form a football team, money was not a problem for him.

What was troubling him now was whether he should compete with the men's football team and then how to make the men's football team agree to play.

Qin Lin signed his name on the list and handed it back to Lin Lanzi.

With Qin Lin's signature, Lin Lanzi was naturally free to do whatever she wanted. Soon, the security soccer team was officially established and even had its own uniform.

What he lacked now was a competent manager.

Of course, this was not a problem, because after the official account of Linlin Scenic Area released the video, many applications for professional coaches had been received.

They were not there for the salary, but for the sea cucumbers.

Moreover, these people all exaggerated that they would train the soccer team in the scenic Area to be a first-class soccer team.

.....

Time flew by, and a few days passed in the blink of an eye.

Qin Lin received a phone call from professor Wang.

As soon as the call went through, professor Wang's happy voice could be heard, " " chairman qin, i've brought some people to research on ice-sealing technology and spray-spraying technology. there's a big breakthrough in combining the two. we can try to freeze a city. "

"Really?" qin lin was a little surprised to hear this news.

Had professor Wang's potential been stimulated or what? This time, it was quite powerful.

In the beginning, the ice-sealing technique was just a toy for the Goblin Elba's gloves. Later on, professor Wang expanded the scope of his research and could now seal the entire fairy tale mountain in ice.

After that, with the help of the cloud rain stone, the ice-sealing technique had even reached the level of snow in a small area.

At that time, Qin Lin had a sudden idea. If he could control the snow in a city and freeze it, what would it be like?

This might not be much in the North, but in the South, it would definitely be a fantasizing scene that would attract and shock everyone.

after all, most people in the south had never experienced the snow, the romance of a snowball fight, or the fun of rolling in the snow.

However, there was no way to use the cloud rain stone in that situation. He could only rely on the spray technique and the ice-sealing technique.

However, this was definitely not an easy task. Now, professor Wang had done it. One could only say that professor Wang was really awesome this time.

After Qin Lin heard the news, he drove to Linlin's laboratory. When he arrived, professor Wang and Shen Li were already waiting for him.

Even though professor Wang's technology wasn't as amazing as Chairman Qin's and academician Li Kai's, he knew that this technology had a bright future. Even scenic spots would want to buy this technology.

However, with Chairman Qin's character, he was afraid that this thing would not be sold and would only be kept for his own use. Just like the frozen fairy tale mountain, it was a unique feature to display it from time to time.

When Qin Lin arrived, he also asked professor Wang, " "Where are the things? Take me to see it!"

Professor Wang nodded and immediately led Qin Lin into a laboratory. The laboratory was strictly guarded.

In the middle, a strange thing that looked like a cannonball could be seen.

This fellow had a structure similar to a pair of wings when it spread out, and it was very strange.

Professor Wang explained, " Chairman Qin, to achieve the effect of snow, this thing is combined with ice sealing technology and spray technology. It can create snow in an instant when it is launched and controlled. However, you have to plan the height. Otherwise, the snow will melt when it falls.

Qin Lin had a rough understanding of the technique after hearing it. It was similar to the rain from cannonballs, but there were some differences.

Professor Wang took out a small Cannonball and said to Qin ran, " this is for the demonstration. Chairman Qin, shall we go and take a look first? "

"En!" Qin Lin nodded and followed professor Wang out of the laboratory building to an open space in Linlin's laboratory.

Under professor Wang's instructions, a few researchers immediately took out a special transmitter and started operating it.

When the special launcher was set up, professor Wang saw the demonstration of the small Cannonball being inserted into the launcher.

After doing all this, professor Wang went to Qin Lin's side, took out a remote control, and then pressed the button.

The next moment, the launcher let out a soft sound, and the small Cannonball was launched into the sky above Linlin's laboratory.

a moment later, he heard a muffled sound in the sky. he could clearly see a layer of ice-sealing energy spreading.

It was the ice-sealing technique.

Following the ice seal technique, a dense layer of snow appeared in the sky. The White snow still took a long time to fall, and it continued for some time.

Qin Lin kept watching until the snowflakes fell in front of his eyes. This sustained performance should be the most powerful part of this technique.

soon, he felt a chill. the area around linlin's laboratory had been dyed white.

Therefore, as long as the snow cannonballs made with this technology were large enough, with a large enough range of power, or a large enough number, it was absolutely possible to freeze an entire city in theory.

Now, he was only lacking an opportunity to experiment.

"Professor Wang, how much would it cost to freeze a city?" Qin Lin asked.

although he was not short of money, it was not good to be wasteful. this kind of technology would definitely cost a lot to snow a city.

When professor Wang heard this, he said with difficulty, "Chairman Qin, this technology has just been invented. To snow for a city, even if it's just a small city like you city, it will cost a lot. However, when the technology is improved in the future, the cost will definitely be much lower.

Qin Lin laughed when he heard this. it's okay if it's expensive. We want to try it out. We don't have to pay for it ourselves. We can find a big traitor, like you Cheng!

"Chairman Qin, are you planning to let you Cheng pay for the experiment?" Shen Li said with a smile.

"Will you city produce it?" professor Wang asked in surprise.

shen li said confidently, " they will rush to publish it. as long as we spread the news in linlin company that the laboratory has a new project and wants to cooperate with a city, you cheng will come to us immediately. "

"president shen, you can handle this!" Qin Lin understood Shen Li's meaning.

You city should be the city that enjoyed the most benefits from Linlin's laboratory. So, once the news got out, you city would definitely be the first to come to him. After all, Linlin's laboratory was in you city.

You Cheng was probably afraid that Linlin's laboratory would be taken away by other cities. If this opportunity was taken by other cities, would it be a signal?

Therefore, the laboratory only needed to spread a little bit of news among the staff in the scenic Area.

You city attached great importance to the scenic Area, so people must have been paying attention to it. They would be the first to receive the news.

"Alright, Chairman Qin!" Shen Li nodded and called Lin Lanzi.

Once the call went through, he said to Lin Lanzi, " President Lin, I need your help with something. I'm trying to fish for some fish, so I'll just ask your employees to help spread the news.

[Chapter 1472 668-Leading By The Nose!](#)

Therefore, it didn't take long for the news of the Linlin laboratory obtaining the city's snow technology to spread in the Linlin Scenic Area group.

In you city's Tourism Department, li Mingjie picked up his phone and checked WeChat as usual. His girlfriend sent him a message: "Hubby, there's a rumor going around the scenic Area that the laboratory is looking for a city to test out some snow technology."

His girlfriend was a Foreman in Linlin Scenic Area.

In you city, as a Foreman in Linlin Scenic Area, in terms of salary and prospects, even if they were of equal social status and had a job position, she was definitely worthy of being a civil servant.

Li Mingjie worked at the tourism Bureau, so he naturally had to know the situation of the scenic Area from time to time. Therefore, he asked his girlfriend to inform him as soon as possible.

after all, the county paid the most attention to the linlin scenic area, and opportunities were always left to those who were prepared, right?

When he saw his girlfriend's WeChat message, he smelled something different. In the past, you Cheng was the first to benefit from any technology from Linlin's laboratory.

Now, he didn't look for you city, but other cities?

this seemed to be a bad sign. the leaders of the county would probably be very concerned about this issue.

As soon as he heard the news, he immediately picked up his phone and called his leader. He had to report the news as soon as possible.

Obviously, li Mingjie didn't know that he only bit the hook that Shen Li threw.

Naturally, li Mingjie was not the only one who bit the fishhook.

However, li Mingjie was the first one to report it. When he got the news from his girlfriend, he had already reported it to his leader.

Not long after, Chen Li received the news. He asked his Secretary with uncertainty, "Are you sure the news is true?"

the secretary nodded. "it's true. the staff at linlin scenic area already know about it. it shouldn't be fake."
"

Chen Li Zheng was planning to get his Secretary to investigate this matter when sun Xian's phone rang."Chen Xian, Have you heard the news about Linlin's laboratory?"

"Sun Xian, you also know about it?" Chen Li was surprised.

"well, come over and have a head-on meeting!" Said sun Xian eagerly.

No matter what the technology was, Linlin's laboratory was planning to cooperate with other cities. This was not good news for you city.

Even if it was just a rumor, even if it was fake news, they couldn't help but be anxious. Because when the other cities got the news, they would definitely be like flies that saw the crack in an egg and madly rush over.

They could not give the other cities any chance.

This was just like a woman giving a hint to another man. How could the man not respond at all? he would give money, gifts, or prostitution. He had to get close to her no matter what.

Linlin's laboratory was like this now, and ning city was a good example.

It was because of their carelessness that the Linlin leisure tea factory was poached by ning city.

After Chen Li hung up the phone, he hurriedly ran to sun Xian's office. The moment he entered, sun Xian could not wait any longer and said, "have a seat. we have to think of a way. we have to discuss the technology of linlin's laboratory and test it in you city. "

Chen Li nodded, but he still asked doubtfully, "County sun, I don't know much about the specific situation. Tell me about it first.

Sun Xian immediately explained, " we don't know the exact situation, but from the information we've gathered, we can roughly guess what kind of snow technology Linlin's laboratory has. It can snow the entire city. The news is that Linlin's laboratory is going to bid for the project. They'll go to whichever city is willing to pay for the experiment funds.

When Chen Li heard this, he immediately shook his head and said, " linlin's laboratory can't be short of research funds. this is definitely fake news. maybe other cities got the news and are spreading false news. "

Sun Xian nodded and said, " that's very likely. Furthermore, the biggest possibility is that it was done by ning city. They have a criminal record. Now that the news has spread, we'll have to fork out the money to get this experimental opportunity.

I'm afraid that Linlin laboratory will really bid because of this news. So, County Chen, we'll have to rely on you this time. You have a good relationship with boss Qin, so you must go and have a talk.

"I'll talk to boss Qin about this even if I have to sacrifice my dignity." Chen Li nodded.

The two of them talked for a long time, discussing how to prevent other cities from targeting Linlin's laboratory.

Although you city mainly relied on traveling, Linlin's laboratory was of great significance to you city.

Just the fact that a place had such a laboratory meant that it was advanced, represented technology, and could represent many things.

Most of the big cities didn't even have the opportunity to own such a laboratory.

...

Linlin Manor.

Qin Lin came out of the inner area and had just arrived at his office when Chen Li called him.

the moment he picked up the call, he knew chen li's motive. he picked up the call and heard chen li's anxious voice, " "Boss Qin, are you free? I want to go to Linlin Manor to talk to you about a very important matter."

Qin Lin knew Chen Li's purpose and said with a smile, " "county chen, since you have something important to discuss, come over. i'm free."

On the other side, after Xian Chen answered, he hung up the phone and asked the driver to drive to Linlin Manor.

not long after, chen li saw qin lin. the moment he saw him, he said with some embarrassment, " Chairman Qin, there's something I really want to talk to you about, but it's a little embarrassing. I heard that your Linlin laboratory has developed a technology that can make the city snow at any time. I wonder if it's true? "

"How did you find out about it so soon?" Qin Lin asked, feigning surprise.

Although he said this, he was feeling rueful in his heart. News spread really quickly through the grapevine these days. Shen Li had asked Lin Lanzi to spread the news slightly, and the county would know about it immediately.

They were spreading the news for official business. If it was some gossip that everyone was interested in, wouldn't it spread even faster?

Today, a woman was having supper with a scumbag man. The news that would spread tomorrow or the day after would be that the woman had been taken to a hotel by the scumbag man ...

Therefore, sometimes, if it wasn't necessary, you had to be careful with your words and actions. No one knew which one of the people sitting at the same table as you had a big mouth or bad intentions.

There was no knowing what was in a person's heart.

boss Qin, " Chen Li said immediately, " didn't the county get the news that Linlin laboratory is interested in bidding? they'll test the snow technology in the city with the highest funding.

When Qin Lin heard this, he understood in his heart, but his face pretended to be completely ignorant. He even said righteously, impossible, this is absolutely impossible. Who is spreading the news? how come I don't know anything about it? "

Chen Li immediately believed her acting skills and subconsciously asked, " "chairman qin, could it be news from linlin's laboratory? Does President Shen have such plans?"

"President Shen would have informed me even if he had such plans." As Qin Lin spoke, he gave Chen Li a call in front of him and put it on speaker.

President Shen, " he said, " there are rumors going around that our Linlin laboratory is going to bid for snow technology. What's going on? "

when shen li heard this, he understood what was going on and immediately said with justice,"Chairman Qin, how could this be? Which bastard was spreading the news? With the relationship between our lab and you city, we'll test our technology in you city first!"

These words were extremely sincere, and when Chen Li heard them, he couldn't help but feel warm in his heart.

He would say that this was spread by people with ulterior motives. Those cities just couldn't bear to see you city doing well.

thinking of this, chen li hurriedly said, " i told you. those rumors were spread by people with ulterior motives. it's most likely from ning city! "

"Eh!" Qin Lin didn't know how to respond to this, so he pretended not to hear.

This matter was obviously spread by Shen Li's side.

Ning Cheng could only say sorry for being the scapegoat.

boss Qin, " Chen Li continued, " I wonder what's up with the snow technology at Linlin's laboratory? "

Qin Lin also explained, " it's a kind of technology that can make it snow. It's a rare experience for southern cities. Think about it. Southern cities have never snowed before. How sensational and attractive would it be if a controlled snowfall suddenly came? " it's also a good way to attract tourists, but after it snows, you have to control the cleaning and traffic."

When Chen Li heard this, he immediately said, " boss Qin, you don't have to be in charge of the cleaning and transportation. Let's put the experimental city in you city. We will pay for the experimental funds. Leave the rest to us.

chen li immediately guaranteed. he naturally knew the benefits of this snow technology. after all, it could snow anytime and anywhere.

For other cities and Northern cities, this seemed to be of no use. It would even cause trouble for ordinary people. For example, in the North, people were used to seeing snow and hated it. If snow suddenly fell on you, you would definitely be annoyed.

However, if they were allowed to go to you city to play, they would definitely be very happy and excited.

At the same time, there were many Southerners who had never seen snow before. They would be very excited if it suddenly snowed in the city. On this point, you city's people would definitely not have any objections. They might even be looking forward to it.

In addition, you city was a tourist city. All the people who came here were tourists with different mentalities. They didn't come here with pressure, but to relieve stress and have fun without restraint.

once it snowed, it would be a very romantic thing for these people.

With the current climate of you city, a sudden and controllable snow was a special feature, wasn't it?

When Qin Lin heard Chen Li's words, he knew that you Cheng had taken the bait. He smiled and said, " Xian Chen, with our relationship with you city, we'll naturally agree to your request. But you know, I don't care about these things. I'll help you contact President Shen, and you can talk to him.

"Boss Qin, I'll have to trouble you." Chen Li was satisfied and grateful. He even felt that it was very useful to have a good relationship with boss Qin.

he had no idea that he was just a fish that had taken the bait.

Qin Lin then called Shen Li. Naturally, Shen Li cooperated with him tacitly and tricked him into going to Qin Lin's laboratory.

Naturally, Chen Li had also readily agreed to the experiment funds that Shen Li had mentioned after making a phone call to sun Xian. He couldn't wait any longer as he felt that he had gotten a great bargain.

Not long after, you city released an official announcement that shocked everyone.

you city would soon snow, so everyone should be prepared for it.

When this news came out, everyone felt that it was very fake.

You city will snow? How was that possible?

Moreover, it was in this time and weather. What was the difference between this and snowing in June?

[Chapter 1473 669-You Say It's Snowing And It's Snowing?](#)

Time flew by, and in the blink of an eye, a period of time had passed.

Qin Lin came to Linlin's laboratory again and was led by professor Wang into the tightly guarded laboratory room.

chen li and shen li were also with them.

As soon as they entered, they saw cannonballs that were a combination of ice-sealing technology and spray technology.

During this time, after you city's funds had arrived, Linlin's laboratory had fully entered production and produced these artillery shells.

Shen Li explained, "these cannonballs are enough to be distributed to all parts of you city. When the time comes, as long as we choose the right time to fire them together, we can create a snow scene in you city."

" you city has also started to promote the snow, " chen li added. " we will try our best to not let you city be affected when it snows. "

Qin Lin wasn't interested in the details. He just wanted to see the wonderful scene of snow falling in you city.

You city.

Qin Ren left the company, got into his Panamera, and headed home.

A few years ago, being able to drive a Panamera in you city was definitely very cool, because there were very few people who could afford to drive such a car.

However, the past two years had been different. You city's people relied on the tourism industry. As long as they were smart, they could make a lot of money. There were already many people who could afford to buy high-end cars that cost millions.

There were even many people who could earn millions a year by selling tea and buy a sports car.

A teahouse would hire more than a dozen beautiful girls with good figures to sit down and make tea for the tourists. The rule was that they had to buy 5000 tea leaves to make tea.

This was obviously to entertain the great aggrieved species.

In the past, as long as the people of you city were not stupid, they would only go to this kind of teahouse to make tea.

However, it was different now. Some rich tourists liked to go to such places because they felt that it was classy. Most importantly, when they were tired from playing, they would be quiet in such places. They would not be disturbed and could even play with the girls who were making tea.

After the tea was brewed, the remaining tea leaves could be taken away. It was considered a special tea in you city, right?

You city had been attracting investment in the past two years, and there were many rich bosses. They came to this kind of teahouse to pick up girls and buy tea from them.

Many girls took the bait, and the teahouse became a place for rendezvous.

No wife would think that her husband would hook up with a woman when he went to the teahouse to make tea.

Therefore, business would be particularly good if there was an underground parking lot, a hotel, or a teahouse nearby.

The owners of teahouses would also consider places with such convenient conditions when choosing a location.

Anyway, there were many teahouses like this in you city in the past two years, and the boss had earned a lot.

Of course, in addition to the many people who could afford good cars in you city, the tourists who came to you city were rich, so good cars were even more common.

sports cars worth tens of millions had appeared before. when those tens of millions of sports cars entered you city, the surrounding area was almost empty, even when there was a traffic jam.

That area could probably fit several cars.

Therefore, most of the drivers knew how to be polite sometimes. Otherwise, why would they give so much space to a car? Shouldn't they be in a hurry to get in another car and stuff the other cars?

Qin Ren picked up his wife, Liao Li, after he got home. He then went to the hospital. Liao Li's stomach was bulging again. She was about to give birth to a second child.

Qin Ren was definitely a good man. His advertising company was huge, and he was a celebrity on the internet. He had millions of fans for his media account.

A person like him would have many girls around him, but he did not provoke them. He just stayed by Liao Li's side.

in this regard, he and qin lin were definitely very similar.

"It's best to have a boy this time." liao li mumbled to herself after getting into the car.

Qin Ren smiled. it's okay even if she's a girl. A little cotton jacket is good. As long as it doesn't leak out.

"Hmph!" Liao Li snorted when she heard this.

It hasn't been born yet, why is there a leak?

The red light came on.

Qin Ren's car stopped at the intersection. They could hear a publicity car driving along the street. However, the content of the publicity shocked the couple.

dear citizens and tourists of you city, please take note. At 12 o'clock the day after tomorrow, you city will welcome a snowfall on time. I hope everyone is prepared for it.

A sudden snowfall would make people uncomfortable. If they were prepared, they would be full of anticipation. Therefore, as soon as you Cheng and Linlin's laboratory reached an agreement, they began to promote in advance.

If the effect of the snowfall in the city was good, you city would have to hold it regularly every year, just like the food Festival.

When Liao Li heard the advertisement, she was surprised. "Honey, is this car a joke? will it snow in our current situation?"

Qin Ren was equally surprised. it shouldn't be snowing in you city, right? but this looks like a publicity vehicle from the county. Maybe Linlin's laboratory has come up with some new technology.

Qin Ren immediately thought of Linlin's laboratory.

then, he called the company to inform them of the matter.

Regardless of whether this was true or not, he should get the company to prepare for the shoot.

if it was true, such a wondrous scene should be recorded.

the green light came on.

The publicity car continued to move forward, and the publicity news spread like wildfire. The people of you city, including the tourists, all stopped in their tracks, showing surprise.

To be honest, not many people in you city thought it would snow in such weather.

Therefore, when they heard the news, they all started discussing in surprise.

"is what you said true? it's snowing in you city in this weather?"

[Chapter 1474 669-You Say It Snows And It Snows Just Like That?](#)

it's still snowing in June, so anything is possible. Otherwise, why would you city suddenly promote it like this? "

"it shouldn't be, but you cheng wouldn't make such a joke!"

"....."

at the same time, the internet was also boiling with excitement.

Because you city's official account had released the same news. Two days later, at 12 o'clock, you city would snow on time.

This announcement was too shocking.

Even the weather forecast didn't dare to announce it so arrogantly.

Not to mention the probability of snow in you city, how could it fall at any time you wanted?

You're a f * cking Weather Master?

...

In a University.

Chen Xue was already writing her thesis.

she had to finish her thesis in advance so that she could wait for her internship application with peace of mind.

while she was writing her thesis, a few of her close friends ran over in a hurry.

Xiaoxue, look at the hot news. one of them said in surprise.

"is it about linlin scenic area?" Chen Xue asked.

Every time his best friends made a fuss in front of him, it was because of the Linlin Scenic Area.

The other one immediately said, " it's not about Linlin Scenic Area. It's about you city. It's going to snow in you city in two days.

Chen Xue didn't know whether to laugh or cry. Huihui, are you kidding me? how can it snow in you city? " she asked. I've grown up in you city, but I've never seen it snow."

She felt that her best friend was just making fun of her.

If it still snowed in you city when the greenhouse effect was getting more and more serious, the probability of her not being able to find a boyfriend in this life was still small.

The girl called Huihui quickly handed her phone to Chen Xue and said, " Xiaoxue, watch the video first. This is the official promotion of your you City County. It can't be fake, right? "

Chen Xue took the phone in confusion and watched the official video of you City County. When she saw that the official of you city said it would snow at 2 O 'clock the next day, she was stunned.

With you city promoting like this, would it really snow at 12 o 'clock tomorrow?

How could such a thing happen?

If it's really snowing, Yingluo can't find a boyfriend?

When Chen Xue thought of this, her expression turned ugly.

Why was there such a bizarre thing?

huihui and the other girls started discussing happily, "

it's the weekend tomorrow. Let's go to you city to see the snow during the weekend.

"Okay, that's a good suggestion. Take out your ID cards, I'll buy the tickets for you."

"....."

They were both Southerners, and they had never seen snow before.

It wasn't that they didn't think about going to the North to see the snow, but the journey was too far, and they didn't have the right time to meet up.

If you city was really going to snow, it would be a great opportunity for them.

On the other side.

Wang yang had just finished his meeting with the branch manager of The Hangover grass in min province when he received a call from his wife, su Juan. "Honey, it's going to snow in you city at noon tomorrow. Let's go to you city to see the snow, okay? We haven't been to Linlin Scenic Area for a long time."

"You city watching the snow? Su Juan, you're sick? What nonsense are you talking about?" Wang Yan asked in shock. Was this a joke?

How many times had it snowed in the entire min province in the past ten years?

In any case, he had never seen it before.

it did happen once before, but it was at another place when the weather was very cold.

What month was it now? it was impossible for it to snow.

Moreover, with the current climate of you city, it was basically impossible for it to snow.

hubby, " su Juan hurriedly said, " look at the news released by you Cheng. They said it would snow.

Wang yang was stunned, he immediately turned on his computer and went online to check the news about you city, and as expected, he saw you city's announcement.

You city would snow at 12 o'clock tomorrow.

Not a joke?

"Could it be that Chairman Qin's laboratory has come up with some new technology?" Wang Yan muttered to himself.

Su Juan's voice was heard again, "Honey, did you see the news? It's really going to snow. Let's go to you city together."

"Yes, let's go together!" Wang Yan could only agree. After all, it had been a long time since he had accompanied su Juan out to play.

More importantly, he also wanted to try the sea cucumbers in Linlin Scenic Area.

linlin scenic area had a fixed supply of sea cucumbers every day. there was no surplus. he wanted to go to the scenic area this time and see if he could get some through his connections. it would be enough as long as it was enough for his daily meals.

Now, okra, medicinal wine, and leisure tea couldn't satisfy him anymore. Jiang Lingling and Li Jia Nan, these two women, were too torturous. Sometimes, he had just paid su Juan, and these two women would come to torture him one after another.

The pain of being squeezed continuously had to be added to the sea cucumber.

However, just as he hung up, his phone rang again. It was sister Lingling's number.

He was shocked when he saw the number. This woman must be going to you city to see the snow, right? he had promised su Juan, so how could he dare to answer the call?

He let his phone ring and called a few times, but he didn't pick up.

Without waiting for him to let out a sigh of relief, the phone rang again. This time, it was Li Jia Nan.

Wang Yan sighed. He truly regretted not controlling his second brother, causing him to be in such an awkward situation.

Really, who could understand the pain he was in now?

He really wanted to be free from this sea of suffering.

Li Jia Nan also had a few more calls, but he didn't dare to answer them. It was only when his phone stopped ringing that he was relieved.

Lingling and Li Jia Nan should understand what he meant, right?

[Chapter 1475 669-You Say It's Snowing And It's Snowing? A Bitter Life \(3\)](#)

Wang yang thought about it and started to call his subordinates to give orders. He was going out for two days, and even if it was the weekend, there would be people on duty in the company. He also had to give some orders.

Wang yang had just finished explaining the matter when he suddenly received another call. It was su Juan again.

it was his wife who called, so he had to answer it. once the call went through, su Juan's voice came through, " "Hubby, sister Jia Nan just called me to tell me about the snow in you city. She also wants to go and see, so I asked her to go with us."

"What?" Wang Yan felt helpless.

What was this silly wife doing?

Your husband doesn't care about her and wants to leave her, but you still take the initiative to take her away.

After hanging up the phone again, Wang Yan helplessly sat on the chair. This Li Jia Nan was really bold, wasn't he afraid that su Juan would find out his identity?

After a long time, wang yang finally came back to his senses. It was time to get off work. He went downstairs to the parking lot and drove home. When he entered, he was even more dumbfounded.

Other than Su Juan and Li Jia Nan, Jiang Lingling was also there.

Su Juan got up and immediately said to Wang Yan, "Hubby, sister Jia Nan sent a message to her friends. Sister Ling Ling saw it and said that she wants to go too. Her boyfriend is on a business trip and asked her to go with us so that we can take care of each other. We'll pack up tonight and leave early tomorrow morning."

He looked like a king.

As the news of the mountain gaze spread, people in all parts of the South saw the announcement issued by you city.

Everyone was in disbelief.

After all, it had been a long time since it snowed in the South. Now you city was saying that it would snow on time?

snow represented romance in many stories, movies, and even textbooks. scenes with couples in the snow seemed to be indispensable.

Of course, snow also represented the fun of children. In TV, movies, and textbooks, there was no shortage of scenes such as snowball fights and building snowmen.

However, to the Southerners, these things seemed to only exist in their imagination. There was no way for them to experience it for themselves.

If it could snow in you city, it seemed like they could make up for their regrets and experience the snowman building and snowball fight mentioned in the textbooks.

as you city developed tourism, its reputation was very good because of the Linlin scenic area. therefore, although this news was ridiculous, many southerners believed it.

Therefore, they all ordered tickets or drove to you city.

A day passed in the blink of an eye.

Almost early in the morning, Chen Li had just set off from his home when he saw that the streets outside had been blocked like a long line. He did not even have the chance to move forward.

This made him sigh.

He had already anticipated that the roads would be blocked when the snowfall was planned. The attraction of snow to Southerners was definitely huge, especially after knowing when it would snow.

You city's traffic was hopeless for the time being. They could only wait for the light rail to be built to see if it could alleviate the situation.

In the traffic.

wang yan was extremely helpless here. the car was blocked and couldn't move forward, but the topic of conversation between the three girls in the car made him snort coldly.

"Su Juan, your husband must be very good in that aspect, right?"

"I'm not. I'm better than most people. Sister Lingling, where's your man?"

that goes without saying, he's definitely powerful. On the other hand, sister Jia Nan has always been unconvinced, saying that her man is more powerful.

"humph, jiang lingling, don't you know how powerful he is?"

The three girls were all from nightclubs, so their words were more bold.

However, Li Jia Nan's words made Wang Yan cower. He could only get out of the car and hide outside.

He hid until it was almost 12 in the afternoon. Because the traffic was completely blocked, the people in the cars got out one after another, as if they had completely given up on moving forward.

Because it was almost 12 o'clock.

you city officials said it would snow at 12 o'clock.

"It's less than a minute to 12!"

"Do you think the snowfall in you city is that accurate?"

"Even if it's going to snow, it shouldn't really start at 12 o'clock."

"....."

Amidst the noisy chatter, it was 12 o'clock sharp. Almost at the same time, all over you city, strange cannonballs were suddenly launched into the air.

Then, something that shocked everyone happened.

[Chapter 1476 Ice-Sealing Technique Versus Constant Temperature Grass](#)

a series of special cannonballs were fired at you city at the same time.

this scene attracted the attention of many tourists.

There were many special cannonballs covering the entire you city. It really felt like a science fiction movie.

After a short while, the cannonballs disappeared. However, a moment later, these special cannonballs exploded in unison. Under the effect of the ice-sealing technology, a shocking scene appeared.

At that moment, a ring of snow-white frost spread rapidly in all directions. It was as if a sky curtain had suddenly condensed, covering you Cheng.

At that moment, everyone could no longer see the sky, only a layer of white.

The sunlight passed through the layer of snow and was refracted, forming a rainbow. It was a curtain of light formed by many rainbows.

The scene was really shocking. Even the special effects of the colorful lights when Buddha appeared in TV movies were not as shocking.

If it was in ancient times, this would definitely be considered an auspicious sign.

On a mountain.

Liu Hua was sitting in the courtyard at the top of the mountain that he had built himself, admiring his own country.

After the mountain was developed, one could not only see fairy tale mountain from another angle, but also the night view of fireflies in Linlin Scenic Area.

moreover, it was also very shocking to see the fireflies dancing in linlin scenic area at night from afar.

Therefore, after his mountain was opened to the public, it was also full of tourists, especially the few viewing areas that he had specially developed. They were full every day.

This was something he was very proud of.

This was the first time that he had managed to cut off that Qin guy.

He knew that luck would not mistreat people who worked hard. This was his reward.

as liu hua was thinking, he also saw the white light shield that appeared above you city. from afar, the light shield was even more shocking.

The rainbow light seemed to illuminate the entire cloud layer.

"What's the situation?" Liu Hua exclaimed in shock.

From his position, he could even see the snowflakes that were rapidly appearing above the clouds due to the spray technology and the ice-sealing technology.

If not for the fact that he was living in a modern society with technology, he would have thought that this was a great ice mage casting ice magic.

you city's people and tourists saw this scene and all looked up in surprise.

many people were stunned by this scene.

Those who had taken out their phones early to take pictures felt as if they had won the grand prize. If they had been a step late, they would not have been able to take anything.

Because after a short while, dense snowflakes fell.

On the business building, Qin Ren was full of smiles.

Because he had already instructed the company's people to prepare and set up the filming equipment on the business platform.

moreover, these equipment were the clearest recording equipment, even the snowflakes falling from the sky could be clearly captured.

The key was that he was the only one in you city who had this set of equipment. He was the only one who would prepare in advance and record everything from the launch of the special cannonballs to the snowfall. Everything was clear.

Not long after, the people outside could feel the coldness on their skin.

They were really snowflakes.

More and more snow fell, and the surroundings became colder.

"It's really snowing."

it must have something to do with the cannonballs. I knew it. Linlin's laboratory must have come up with some new technology.

"As a Southerner, I'm 25 years old. I can finally see snow."

"....."

The tourists' clamoring continued.

As a Southerner, the shock of seeing snow was like the excitement of Northerners when they saw the sea.

in an instant, the entire city was bustling.

On the road, the drivers had completely given up on moving forward. Since they couldn't leave, they might as well enjoy the snow in silence.

the king was like this. he reached out and quietly caught the snowflakes.

It was also his first time seeing snow.

When he was young, his family was poor. Later on, he managed to make a name for himself in the nightclubs. He had the money to go to the North to see the snow, but the journey always made him unable to have such thoughts.

this was also the common thought of many people. therefore, countless northerners had never been to the south, and countless southerners had never been to the north.

You Cheng and Linlin's laboratory had moved from the north to the south.

"Hubby, it's so pretty!" Su Juan had never seen snow before either. At this moment, when she saw the snowflakes floating down, she was filled with excitement. She couldn't help but hold his arm and lean on Him.

To her, this was probably what romance was.

However, she didn't notice that Jiang Lingling and Li Jianan were approaching the king.

They all reached out to Wang Yan's other hand, wanting to hold his hand.

the two of them even started to fight behind su juan and wang yan for the remaining hand, and even glared at each other.

Wang Yan could only feel cold sweat forming on his forehead.

These two women were too bold.

Su Juan seemed to have noticed the two women's movements as well. She turned around and looked at them in surprise.

Li Jia Nan and Jiang Lingling actually held each other's hands at that moment.

When su Juan saw this, she couldn't help but say with emotion, " "Sister Jia Nan, sister Ling Ling, you two have such a good relationship."

When Li Jia Nan and Jiang Lingling heard this, they grabbed each other's hands and squeezed them hard, causing them to gasp. It was obvious that they were in pain.

Wang yang could only pretend that he didn't know anything, looking at the drifting snow that was becoming more and more beautiful.

[Chapter 1477 Ice-Sealing Technique Versus Constant Temperature Grass \(2!](#)

Then, he felt a chill and immediately took out the coat he had prepared. Su Juan, Li Jia Nan, and the other two girls did the same.

most of the tourists around them also took out their jackets from their cars.

Although they felt that it was impossible for you city to snow on time, most of the tourists still brought their coats because they trusted you Cheng and Linlin's laboratory.

As for those who didn't believe it, they should be glad that they were by the car and could get into the car to enjoy the warm air.

however, someone else was unlucky.

On the mountain, Liu Hua immediately cursed, " f * ck, is it really snowing just because you say so? "

he did not take this matter to heart.

He thought that even if Linlin's laboratory had the technology to reduce the snow, they could just do it in a small area in you city, just like Linlin's company Annual Meeting.

Who knew it would turn out like this?

It was so cold now, but he was only wearing a short-sleeved shirt, so he could only jump up and down to warm himself up a little, and then hurriedly ran to a room.

The snow was getting heavier.

After a long time, the plants on the street were covered with a layer of silver equipment.

You city experimental primary school.

All the classrooms stopped teaching. As the cradle of education, the teachers were reasonable. They knew that it was almost impossible to see snow in you city.

the teachers also wanted to see this rare snowfall.

The students ran to the corridor one after another, all of them looking curiously at the White thing that fell from the sky.

Some students even asked excitedly, "

"Teacher, these snowflakes are different from the ones you see on TV."

"Can we build a snowman with this snow?"

"....."

Countless students asked.

The teachers smiled and nodded.

perhaps this was a different experience for the students. at least the students saw real snow.

You city experimental primary school.

"Can we build a snowman with this snow?"

"....."

Countless students asked.

the teachers smiled and nodded.

Perhaps this was a different experience for the students. At least the students saw real snow.

Linlin Manor.

Lin Fen and Zhao mochen had already carried little Qin Feng from the living room to the pavilion.

It was a unique mood to enjoy the snow here.

It was Zhao Moyu's first time seeing snow, so the snowfall was a huge surprise for her.

Lin Fen had seen snow before. She remembered that it was still very early back then. In the 90s, she didn't have a son and her husband was still alive.

The snow was really beautiful at that time.

But after that, she never saw snow again, and her memory of snow was completely blurred.

Then, she looked at little Qin Feng in her arms. The past was in the past. It was more important to look towards the future in life.

"My little darling, look, it's snowing." As Lin Fen spoke, she did not forget to shake little Qin Feng's hand. "Let's build a snowman later, okay?"

"Snowman!" Little Qin Feng seemed to be very interested, clapping and calling out.

Zhao mochen was also looking forward to it. When she was young, she had read many stories about building snowmen in her textbooks. When she was young, she had also dreamed of building snowmen in the snow.

She even dreamed that the snowman she had built was alive and playing with her.

With such heavy snow now, a layer of snow would soon be formed, and it would be no problem to build a snowman.

Indeed, the amount of snow that professor Wang had prepared for the special artillery was calculated. Not only could it ensure the viewing pleasure of the snow, but it could also make a snowman. It also had to ensure that the snow would not have a huge impact on the natural plants in your city.

Otherwise, it would be a snow disaster.

Very quickly.

A layer of snow piled up all over your city. At this time, the effect of the special Cannonball had also ended.

The snow stopped falling, but it left a layer of silver on the entire your city.

It was also the time for the tourists, your city people, adults, and children to have fun.

They ran to the streets one after another. The adults brought their children along. Many parents even had shovels ready, waiting to build a snowman with their children.

This was probably the rarest experience for them and their child.

Naturally, some of the more playful tourists had already picked up snowballs and thrown them at their companions.

Inexplicably, a snowball fight began.

Then, even more people were implicated. Just like the Water-Splashing Festival in a certain province, snowfights broke out everywhere all of a sudden.

This snow was clearly a gift to the Southerners.

The entire your city seemed to have become a sea of happiness.

Under such an atmosphere, even the northern tourists who were used to seeing snow couldn't help but join in. After all, they had fought a snowball fight before, but they had never fought a snowball fight with so many people.

Therefore, humans were really social animals. When people gathered together, their joy would really double. Moreover, it was not just one or two times, but countless times.

"you cheng really won't let us down!"

"Yes, I've finally experienced the feeling of having a snowball fight."

"You city is indeed a magical place."

"I wonder if it's possible for it to snow in my city like this."

"....."

In you City County.

Chen Li and sun Xian also walked out. It was already a little cold outside. The snow would bring down the temperature of the surrounding air.

In the courtyard.

Fortunately, both of them knew about the snowfall plan, so they had worn thick clothes and jackets early in the morning.

There were people who were in a hurry to show off, shoveling snow with shovels, as if they could dig out their own future.

Therefore, when he saw the two of them come out, he dug even harder.

When Chen Li and sun Xian saw this, they frowned.

"don't shovel anymore, leave the snow," chen li said directly.

"Go and do what you should be doing," sun Xian snorted.

The man's face immediately showed awkwardness. This was obviously not what he had expected. He could only walk inside in a sorry state.

Chen Li and sun Xian did not care about this person. When they reached the streets outside and came out, they saw two snowballs flying past their eyes. They could also hear the laughter of a child and his father.

The traffic on the street was still congested.

The traffic jam was extremely serious.

however, at this time, no matter how heavy the traffic was, it couldn't make those drivers feel frustrated, because with the snow, their mentality was different.

Because one of the drivers had suddenly thought of building a snowman on the front of his car, the other drivers followed suit. For a time, the traffic was busy.

"It seems like this snow fall event is a success." Sun Xian smiled.

"So, it's right for us to sign the contract with Linlin laboratory before the other cities," Chen Li said, nodding.

Sun Xian nodded. that's right. It's just an experimental fund. The success we have now will allow you city to gain more.

"It's all thanks to sun Xian's decisiveness," Chen Li said with a smile, "not giving those cities with ulterior motives in ning city a chance."

the two of them chatted and were very satisfied with their decision. however, they had no idea that the other cities did not know about this at all.

however, the two of them didn't know about this either. they treated this as the most decisive and correct decision, once again blocking the bad intentions of the other cities and obtaining victory.

While the entire you city was in a state of joy, Zhao moyin and Lin Fen were a little dumbfounded in Linlin Manor.

Ice and snow would melt, and once it stabilized, it would instantly turn into water.

Under normal circumstances, when it snowed on a large scale, the surrounding temperature would drop. Those things could naturally be preserved and would form snow.

But what if the surrounding temperature did not drop?

What would happen then?

When the snowflakes fell, they would immediately melt. The more they fell, the more they would melt.

And Linlin Manor was full of temperature-maintaining grass.

the effects of the eternium grass could adjust the surrounding temperature even in the middle of winter, maintaining it at a constant temperature.

Under such circumstances, how could the snowflakes be preserved?

Above 20 degrees, the snowflakes would melt immediately.

Therefore, the snowflakes were melting as they fell. It was hard to imagine the scene in front of them.

"Where's the snow Pixiu and the snow Pixiu?" Little Qin Feng seemed to be confused.

"Hehe." Zhao Mo hehe.

"Yingluo." Lin Fen.

[Chapter 1478 \[Upgrade Of The Mutated Land! Attribute-Desert! 1 \]](#)

Why build a snowman?

The two of them didn't expect such an embarrassing thing to happen. It could be said that man proposes but God disposes. They didn't take the herb away in advance.

Therefore, they could only remain silent when they saw little Qin Feng calling out for the snowman.

At the same time, the video of the snowfall in you city had already been posted online.

In the beginning, you Cheng's claim that it was snowing at 12 o'clock was questioned by many people. However, when they saw the video, everyone understood that you Cheng had some black technology.

Moreover, anyone who saw the video would immediately think of Linlin's laboratory. Only Linlin's laboratory could produce such black technology in your city.

However, when Qin Ren's advertising company uploaded the entire filming of the snowfall onto the internet, everyone was in disbelief.

The video included the launch of the special cannonballs, followed by the explosion of the cannonballs and the scene of the snow-white light screen.

Especially when the sunlight shone down, it formed a rainbow-like light, which shocked everyone.

Following that, the scene of snow falling from the light barrier was much more shocking than just snow. Furthermore, who had ever seen such a shocking scene on a snowy day?

If it weren't for the fact that many tourists had taken videos of the rainbow and uploaded them, people would think that the video was special effects.

However, it turned out that this was not a special effect.

Therefore, for many people, even the Northerners who were used to seeing snowy days, this was very shocking.

It could be said that such a scene would never appear on a normal snowy day.

It could only be said that the technology in Linlin's laboratory was too shocking.

While the outside world was shocked by the snow technology, Qin Lin was already sitting in his office, looking at the screen in his mind, his eyes showing surprise.

This was because the dwarf, ah ni, had reappeared with the plot mission exclamation mark above his head.

He hadn't triggered any plot quests for a long time, but this dwarf had sent himself to his door. Ah ni was indeed a big quest.

Qin Lin immediately controlled his game character and clicked on ah ni. However, a row of question marks appeared above ah ni's head.

[ah ni seems to have something to say to you!]

Qin Lin knew what was going on when he saw this scene. He immediately locked the office door and entered the game with a thought.

Because of the previous BUG, the game's plot and quests seemed to have become a little messy. As long as it involved dwarves and gnomes, it seemed that they would often have to enter the game.

After replacing his game character, the first person he saw was ah ni.

Ah ni's voice rang in his ears, " "Why are you in a daze? Have you considered the matter I mentioned?"

"What did you just say?" Qin Lin asked, stunned.

"So you weren't even listening to me?" ah ni had a different opinion.

Qin Lin had to explain. I'm sorry. I was in a daze just now. Can you please repeat it? "

Ah ni then helplessly started to narrate, " friend, I found a piece of land in your farm that hasn't been developed for a long time. That piece of land seems to contain a special power. I found a special crystal in the ruins of Mount goddesses, which seems to be helpful to your land. It's just that I'm not tall enough to reach that crystal. Do you want to go and see it? "

Qin Lin was stunned for a moment, then he was overjoyed. Ah ni was talking about the land that had changed after his character leveled up, right?

Previously, he had no idea how to upgrade this piece of land. Now that ah ni had brought him news, there was a way to upgrade this piece of land. The most important thing was the crystal.

Qin Lin naturally answered yes.

Now that there was a chance to upgrade this piece of land, he naturally had to grasp this opportunity. Previously, he had not even had a single clue.

Seeing that Qin Lin had agreed, ah ni immediately looked at Qin Lin with a sneaky expression. He did not say anything, as if he was saying, 'you understand.'

Qin Lin naturally understood and asked directly, " "tell me, how many design drawings do you want this time?"

Ah ni was instantly overjoyed. my good friend, you're really a good friend. This trip is a little far. It's not too much for me to ask for 10 greenhouse tree designs, right? "

Qin Lin nodded decisively. He didn't expect that the dwarf's price was not measured by the quality of the item, but by the distance.

Didn't that mean that the gold price of a 100-meter flight was higher than that of a 10-meter flight?

Moreover, there were only 10 greenhouse tree designs. He could get as many as he wanted.

Ah NI's face was filled with joy when he saw Qin Lin's decisive agreement. as expected of good friends. Let's go now!

Ah ni immediately walked out of the farm after he finished speaking. Qin Lin immediately followed after him.

this time, ah ni brought him to a place he had never been before. the forest in this direction was not dense, and there were more dense bushes everywhere.

These shrubs were lush with leaves and branches, and there was only a narrow path that could be used. This path did not exist in the game.

After a long time, they seemed to have reached the other side of the goddess mountain. A cliff appeared in front of them.

There was a crack in the cliff wall that provided passage.

He followed ah ni inside and was greeted by a pile of ruins.

this ruin was a historical site. there were obvious signs of work done by an axe. one could even see some collapsed houses and stone artifacts that were already broken and covered in moss.

"Come with me, the crystals are over there." Ah NI's voice was heard again as he quickly walked towards a stone wall.

Qin Lin quickly followed him and saw a statue in front of the stone wall. The statue had lost its head and its upper body. It was holding a special fluorescent crystal in one hand.

"it's this crystal. the runes on it seem to be similar to the runes recorded in the ancient records of our dwarves." The dwarf, ah ni, pointed at the crystal in the statue's hand.

qin lin was staring at the statue. he felt that there was something wrong with the statue. or rather, it was not a human. have you ever seen a human with hands and feet shaped like a gong?

That was impossible.

The statue was already a little tall for Qin Lin, let alone the dwarf.

However, Qin Lin had eaten two fruits of the tree of power, so this height was nothing to him. He easily got the crystal.

at the same time, he also saw the remark of the crystal:

[special crystal: special!]

[this is a special crystal with a mysterious origin. It was brought by a mysterious guest who appeared out of nowhere. However, it seems to contain special energy that can transform some special land. The specific conditions need to be matched with the special land to be used.]

When Qin Lin saw the note, he thought of the special land that he had not leveled up yet. That must be the special land.

Thinking of this, he wanted to go back the way he came and check the situation.

Ah NI's anxious voice immediately sounded, " "My good friend, you can't forget anything!"

As he spoke, his face was filled with worry, as if he was afraid that Qin Lin would go back on his word.

Qin Lin clearly understood ah NI's expression. The dwarf probably didn't know that those greenhouse tree designs were worthless to him.

"Good friend, what are you talking about?" he deliberately teased.

" you can't do this! " ah ni panicked when he heard this. " you must have a good reputation when doing business. "

"Let's go!" Qin Lin smiled and beckoned ah ni to head out of the goddess mountain.

Ah NI's face brightened up once more as he realized that Qin Lin was just teasing him.

Of course, Qin Lin wouldn't go back on a dwarf's words. After all, if he did, he might lose the trigger of the plot quest.

He understood the principle of being full after every meal.

Moreover, the greenhouse tree design was not really precious to him.

After returning to the farm, Qin Lin logged out of the game and took out 10 greenhouse tree designs from his office.

after some thought, he took out two more designs and put them in.

He planned to give 12 to ah ni, not because he had a guilty conscience, but because he wanted to let the dwarf ah ni take advantage of him.

this was because once a person had taken advantage of someone, there was a high probability that they would want to take advantage of someone a second time, or even a third time.

So, as long as the dwarf ah ni had this kind of mentality, it would be easy to deal with. After this, he would definitely think of taking advantage of her again.

And what if he wanted to take advantage of her? In that case, he could only continue to make deals with him. That way, he would be able to trigger more dwarves 'plot quests.

If that was the case, then what was the big deal about giving the dwarf ah ni two more designs?

With that thought in mind, Qin Lin entered the game with the designs.

Seeing the greenhouse tree designs in his hands, the dwarf ah ni's urgent voice immediately sounded, "Are these my designs?"

Qin Lin also handed the design to the dwarf ah ni. "Here, it's all yours,"

The dwarf ah ni immediately took the design book excitedly and immediately familiarized himself with it. "1、 2、 3、 4、 5.....10、 11、 12....."

As he counted, he felt that something was wrong. There were two more cards.

Little Aran ah ni's eyes brightened at that moment. It was simply unbelievable. There was even an unexpected surprise?

He subconsciously wanted to return the two designs to Qin Lin, but when he looked at Qin Lin, he realized that Qin Lin didn't seem to have noticed anything, so he immediately retracted his message.

The other party didn't notice anyway.

Thinking about it, the dwarf quietly put away the design drawings and said to Qin ran, "my good friend, you are indeed a man of your word. it's such a pleasure to trade with you."

As if he had a guilty conscience, the moment he said that, he quickly slipped away.

Seeing this, Qin Lin exited the game with the same thought. Then, he immediately controlled his game character to go to the special land where he could level up!

[congratulations, you have discovered a special substance. Do you want to upgrade the current mutated land?]

Qin Yu felt that this question was nonsense and immediately chose "yes." After searching for so long to find the way to upgrade this land, only a fool would choose to reject it.

[congratulations, you have successfully upgraded the current mutated land. The land property is randomly generated. Congratulations, the mutated land's property is: the desert!]

[Chapter 1479 The Magical Desert Mutation \(1\)](#)

Qin Lin was slightly confused when he saw the note.

Then, he saw that the land began to transform rapidly, and then a land made of sand appeared on the game screen.

compared to the ground before, this sand-formed ground looked a little out of place, because there were also special patterns covering the ground.

However, these lines did not seem to be drawn on the ground. It was as if they were printed on the space of the ground, which was very magical.

That feeling was indescribable, or it was indescribable in the words of reality. It was impossible for such a scene to appear in reality.

qin lin had never seen such a scene before.

However, what could be grown in this desert?

After all, there were no plants in the desert. At best, there were cacti.

thinking of this, qin lin controlled his game character to go to the seed shop in ore town. he wanted to see what kind of seeds had been opened here after the desert land had been upgraded.

However, when he opened the list of seed shops, his frown deepened.

He scrolled down the list, but he did not find any new seeds.

This was not right.

In the past, when the land was upgraded, even if it was paddy fields or normal land upgrades, there would be new seeds appearing.

There really wasn't a single new seed right now.

In order to confirm if the other seeds had hidden attributes related to the desert, he even checked the attributes of each seed.

However, none of the seeds had any desert-related attributes.

In other words, the upgrade of the desert land did not open up new seeds.

"How did this happen?" Qin Lin was puzzled.

This was different from the previous land upgrade.

Or was this desert different from ordinary land?

With that thought in mind, Qin Lin controlled his game character to go to the farm to see what was going on with the desert transformation. However, he found a special message on the desert transformation.

[this is a special desert mutation site. You can try to plant the seeds on this land. Any seed in this land has the chance to mutate and become a plant that can survive in the desert. It might have a wonderful effect on desert management!

[hint: the higher the level of the seed, the higher the probability of mutation!]

seeing this special information, qin lin suddenly revealed a look of disbelief.

Was this the true effect of the desert transformation?

It didn't open the seeds, but it was effective on all seeds.

In other words, any seed could be planted in this desert, but whether they could survive depended on probability.

However, as long as they could survive in the desert transformation, they could become plants that could survive in the desert and even manage the desert.

this was a very impressive attribute.

One had to know that the living environment for humans was getting worse by the day.

The sea level rose year by year, and the land area decreased.

The loss of nutrients in the soil and the serious geological damage.

Of course, the main danger was still the danger of desertification.

At present, the global area of desertified land was about 36 million square kilometers, which accounted for about 25% of the total land area on earth, and this area was still increasing.

In fact, the desertification could even turn a very rich place into a barren land.

And the main reason for this was because of humans. Humans were wantonly destroying their own homes.

For example, the korqin grassland was originally a very rich land. After the Khitans established their regime here in the 9th century A.D., They captured the Han and Bohai people to cultivate. Because there was no scientific cultivation, the country's cultivation caused serious desertification.

With the shift of the political and economic center of the Khitans to the South, the land here was restored to animal husbandry, and the land's desertification was somewhat reversed. However, during the Qing Dynasty, a large number of farmers in the pass poured into the kurqin grassland to open up new lands, which further expanded the area of the desertified land.

another reason was that the land turning into deserts was also a product of a dry climate. there had been deserts on earth long before the emergence of humans, but there was no insurmountable line between desolate deserts and rich grasslands.

With water, lush plants could grow on the desert and become an oasis full of vitality. Without water and plants, green space could quickly degenerate into a gravel.

in order to obtain more food, people, regardless of the climate and land conditions, would simply open up new lands, farm, and overshadow. in order to solve the fuel problem, they would willfully cut down trees and cut grass, no matter what the consequences were. this caused irreversible damage.

now, when people realized the severity of the problem and wanted to salvage it, it was too late.

This was like a daughter who was determined to leave you. It was too late for you to make up for it when you realized it now.

Unless you could make a woman unable to resist the temptation, then it was possible for her to redeem herself. For example, if you suddenly became rich and had a small goal.

Now, a desert transformation had appeared in the game.

of course, it wasn't just the world that was facing serious desertification. qin lin knew that the desertification in china was also extremely serious.

The area of desertification in China was about 2.67 million square kilometers, which accounted for about 29% of the total area of the country, which had exceeded the world's average value of desertification.

The key is the ratio of desertification. In terms of overall area, China has the largest area of desertification in the world, the largest affected population, and the most damaged country by sandstorms.

"Currently, our country has cultivated a" sand-swallowing beast "that can make 40 mu of sand disappear in a day.

This was a very scary thing, but the key was that they did not have much effective technology to manage desertification.

Due to the large area of their land, such severe desertification had no effect on most of the people.

However, the desertification of some countries could really kill people. The desertification problem in Egypt and Algerians was very serious. The area of desertification accounted for more than 94% of the country's land area.

It was easy to imagine how difficult it would be to survive in such a place.

It was hard to imagine how shocking it would be if a company could grow plants in the desert one day.

If they could contract the entire desert, then even if they built their own kingdom, it would be the largest Kingdom in the world.

Qin Lin thought about it and immediately controlled his game character to go to the seed store in ore town, intending to buy seeds to try.

he immediately bought the seeds from the high-level soil. after all, there was a note in the desert mutation site. the higher the level of the seed, the higher the probability of survival in the desert.

Therefore, he did not consider buying the seeds of the Level 1 and Level 2 plots.

After buying more than ten seeds, Qin Lin returned to the farm and started to plant the first seed in the desert.

After that, Qin Lin also got up and left the office, planning to go back to the inner area of the manor to take a shower.

He and ah ni had traveled through a large forest in the game, and their bodies were covered in dust. Moreover, the first seed they planted didn't germinate that quickly.

Qin Lin had just walked out of the office and into the living room when he saw Zhao mochen, Lin Fen, and little Qin Feng, who was calling out for a snowman.

Naturally, they saw that the snow in the manor couldn't stay because of the constant temperature grass, so they went out of the manor and played around elsewhere.

from qin feng's happy yells when he was young, one could tell that he had a lot of fun too.

"Hubby!" Zhao moyin saw Qin Lin and went up to him, that professor Wang is too amazing. He was actually able to create such a technology.

Lin Fen nodded. the snow is unbelievable. Technology is too advanced now.

Qin Lin smiled but didn't say anything. It wasn't the current technology that was powerful, it was the external hack that was powerful.

Technology now had the technology to make snow, but many people had seen it on TV and movies. It was different from real snow.

This thing that professor Wang had created was the real snowfall.

However, the prerequisite was the ice-sealing technique, which was not something that could be created by modern technology. It was all thanks to the Goblin's toy gloves.

Otherwise, this technology wouldn't have been available.

qin lin and zhao mo chatted for a while and played with little qin feng for a while. then, he went back to the inner area and took a bath.

According to the time ratio in the game, the seeds should have sprouted by now.

qin lin put on his clothes and looked at the desert transformation in the game, only to find that it was empty. he controlled his character to go over and check, but he got a prompt instead: The seeds in the land had already dried up and could not grow.

in other words, the mutation of the first seed had failed.

qin lin wasn't discouraged. he knew that this kind of probability-based problem required patience, and it definitely wouldn't be successful in one or two tries.

when you play a game, sometimes you will fail eight to ten times to upgrade your weapon.

Qin Lin thought about it and tried to plant the second seed.

This seed was from a level 4 plot, called wasabi, and was a special crop in the ointment country.

Perhaps the initial version of the game was created by the plaster country, and many of the high-level seeds were unique to the plaster country. After all, their programmers had not seen many other seeds, so they could only use the ones they were familiar with.

After the seed crops of the various versions were integrated, in order to save time, the new company not only added many new seeds, but also directly used the old seeds.

Therefore, many special crops were unique to the paste country.

Wasabi was one of them, and it was one of the most difficult vegetables to grow in the world. However, the country of jiangyao was very skilled in growing wasabi.

perhaps most people didn't know much about wasabi, but he believed that many people knew about wasabi. wasabi was the raw material for making wasabi.

Furthermore, wasabi was expensive, ranging from 200 yuan to 800 Yuan.

It was also because of the unique techniques of planting wasabi in the plaster country that their mustard industry was very large. Many people around the world believed that the mustard from the plaster country was the most authentic.

If wasabi could be planted in the desert, it would be equivalent to cutting off an industrial chain in the country of ointment.

By then, the price of these expensive wasabi would probably not be 200-800 Yuan, but 2-8 Yuan.

At the thought of this, Qin Lin suddenly looked forward to the successful mutation of the wasabi. He could then gift it to a desert country to grow.

Although this was a little unkind, why did he feel so happy when he thought about it?

[Chapter 1480 673! Special Status! Wasabi Really Mutated](#)

Qin Lin had also planted the wasabi seeds in the desert mutation site. As for whether the seeds would mutate, it was a matter of probability and luck.

After planting the wasabi, he controlled his character to go to ore town and try to touch on the plot again.

Although he knew that he had just completed the dwarf plot quest and it was impossible to trigger another plot quest immediately, there was no problem giving it a try.

Naturally, the ending was just as he had expected. He did not trigger any plot quests.

If one wasn't extremely lucky, it would be very difficult to trigger a second plot mission immediately after the first one.

Qin Lin sighed and retracted his gaze from the game in his mind. Then, he went out. He planned to go to the county to check out the situation. After all, the snowfall in you city was also under his instructions.

Because of the snowfall, you city's roads were very congested.

Fortunately, there was a special passage from the manor to you city. The passage was not very big, but it was enough for the people inside to pass through.

this road was specially built, and it didn't even exist on any map. it was specifically requested by minister lu.

Therefore, no matter how serious the traffic jam in you city was, it didn't affect Qin Lin.

However, entering you city was different. There were no special roads.

Qin Lin had no choice but to Park his car in a newly constructed parking lot, put on a hat and mask to prevent people from recognizing him, and then walked into you city.

You city was very lively today, and the impact of the snowfall should continue for a while.

You city was so lively now that Qin Lin felt a little accomplished. After all, it was related to him and he had contributed to it.

If he hadn't taken out so many things from the game and changed the climate of you city, you city wouldn't have developed to this day.

naturally, he was somewhat proud to be able to lead the development of his hometown, which had given birth and raised him.

Qin Lin entered you city and soon arrived at the central Street of the red Convention Center.

A few years ago, this place was a Leisure Square. After the renovation, it had become bigger and had many leisure and entertainment facilities.

All kinds of shops had opened on the streets around the square, and even high-end luxury shops were not uncommon. Moreover, the business was surprisingly good.

Therefore, many tourists would come here when they visited you city.

when qin lin entered the square, he saw you cheng playing all kinds of small games, such as air guns, rings, darts, shooting, and so on.

This was a small project that all kinds of lively squares had. Whether a place was lively or not depended on whether there were such projects.

In a deserted place, such projects could only starve to death. Only a place with enough people could support these projects.

The more such small projects there were, the more lively the place would be.

For example, there were enough small projects in the red venue.

It was just that there would be many opportunistic people in this kind of project, and these people could easily ruin the reputation of this place.

he remembered that such a situation had occurred in sichuan before. because a small shooting event booth owner had bad intentions, it directly destroyed many people's jobs. this caused a very lively entertainment event every night to become unpopular, and it even made the news.

Qin Lin also went to the stalls to check, but he didn't find any stalls with such a problem.

You city was quite strict in this aspect. The entire you city's tourism industry had developed to this point, and integrity was the most important.

Especially since you city was so popular now and received a lot of attention, if something happened, it would have a huge impact.

Qin Lin was also very satisfied with this. Since you city had also received benefits from external hacks because of him, he didn't want anything that would ruin their reputation to appear here.

moreover, it was even more lively here now. because of the snowfall, there was a thick layer of snow all around. because the square was empty, there were tourists playing in the snow all around.

Many places on the ground had been built with snowmen, and the sound of laughter was endless.

Qin Lin nodded with a smile.

No matter what, this snow technology would bring joy to people.

just as he was about to walk out, he suddenly heard the sound of an argument.

"Don't you have eyes? You actually hit me?"

"I'm sorry, I'm sorry!"

" if an apology works, what's the point of the police? "

"....."

Qin Lin walked over with a frown. He saw a young man with tattoos all over his body and two other young men with the same tattoos surrounding a person who was obviously a tourist.

It was obvious that the tourist had knocked into the tattooed young man. The tourist had apologized, but the tattooed young man had not let it go.

The key point was that the tattooed young man seemed to have drunk too much and was not clear-headed.

Qin Lin frowned when he saw this.

Although the country had been cracking down on the underworld and had cleaned up all those scums, there were still some people with brain problems who thought that with tattoos on their bodies, they could be arrogant and domineering and think that everyone would be afraid of them.

These people thought that they were the boss of the heavens and the second boss after drinking a little wine, causing trouble everywhere.

These three young men were obviously the same.

he didn't know if the three were tourists or you city locals.

At this moment.

ah long and the other two! a vendor frowned. they're always causing trouble!

lower your voice, " another stall owner said. it's better not to provoke people from society.
