

The Game 1501

[Chapter 1501 A Request For Help From The Whitening Fish 1](#)

The hottest news on the internet these days was definitely the announcement of the hot spring fish therapy program by Linlin Scenic Area.

In the beginning, after everyone knew that the four special fish were specially bred by academician Qin, everyone's attention was attracted.

The effects of the kiss fish, in particular, were amazing. It could relieve fatigue and cure insomnia.

And because of academician Qin, no one doubted the effect of the kiss fish.

This also made everyone very curious about the effects of the other three kinds of fish.

Very quickly.

The Linlin Scenic Area once again released a video to let everyone know what the other three kinds of fish were.

Whitening fish, filthy fish, immune system fish.

Just the names of these three fish gave people a feeling that they were not simple.

When they saw the effects of absorbing the skin's Black pigment, removing dirt and viruses, and clearing the virus in the immune system, everyone was in disbelief.

was this really the effect of fish therapy?

It must be known that if these effects were to be shown in the hospital, it would cost a lot of money. For example, the hospital would sometimes need to use a knife to treat meaty.

There was a possibility of failure if he moved his saber.

Even if it was successful, it might cause the skin to look unnatural.

It was unbelievable that he could achieve it with just some fish.

But the key was that this was the masterpiece of academician Qin.

Academician Qin little seemed to be a synonym for inconceivable.

...

pu qing university was a famous university in the country.

Liu Qing drove a sports car into the school gate and parked it in the parking lot.

To be honest, a college student driving a sports car to school was definitely something to be envied.

but this was her daily life.

It was because her father was really rich.

Liu Qing got out of the car, revealing her long legs. She had a good figure, and her family was rich. She should have been a fair, rich, and beautiful woman in University. Unfortunately, the black spots on her face and skin affected her beauty, making her look a little ugly.

It was meaty from an accident when he was young, and he had been treated countless times.

When she got out of the car, she received the attention of many girls around her.

"She's that Liu Qing!"

that's right, it's her. She likes to show off when she's ugly!

"You've been driving around all day, but you don't even look at your own face."

"....."

Liu Qing frowned slightly, but she didn't care. She knew that she was driving a sports car and had a very handsome school hunk as her boyfriend. All the gossips in the school were jealous of her.

She went straight to her boyfriend's dormitory.

The best way to take revenge on these gossipmongers was to bring her handsome boyfriend and show off their love in front of them.

However, when Liu Qing walked out of her boyfriend's dormitory, the conversation that came from inside made her stop in her tracks with a pale face.

"Wang Fei, don't you already have a Rich Girlfriend like Liu Qing? why are you still asking me out? you're too much."

" qianqian, do you know what liu qing looks like? her face is full of freckles. who would like her? i like you more. "

"You're really a scumbag. That Liu Qing is still dragging you around to show off their love all day long!"

that's just her wishful thinking. If she didn't have a bit of money, do you think any man would care about a spotted woman like her? "

These words were like a sharp sword piercing into Liu Qing's heart.

At this moment, she had a mental breakdown.

For a moment, the thing that made her proud seemed to have become the thing that made her most depressed.

She knew that she had been slapped.

She didn't even have the courage to go in and give that scumbag a slap, because the spots on her face and body were the things that made her feel the most inferior since she was a child.

Her eyes were red and tears were flowing down her face. She could only run to the toilet in despair and hide in a cubicle, sobbing.

originally, her family was rich, and having a handsome school hunk as her boyfriend was her best shield to hide her inferiority, but now it had become the source of her breakdown.

Wang Fei might have thought of her as a fool from the beginning because of her money.

The sound of footsteps was heard, and Liu Qing even stopped sobbing.

Her inferiority complex had completely exploded.

However, the conversation outside attracted her attention.

"Did you guys see the latest video on Linlin Scenic Area? The information on the other three types of fish has been revealed!"

"I saw it. the white fish is really effective. it might be the greatest blessing for us girls. I don't know if I'll have the chance to experience it."

that's right. The Whitefish can absorb mecoloring, but can't it make our skin white and wet? "

"I just don't know if it'll really work!"

don't doubt it. After all, it was specially trained by little Qin. Also, there's news on the internet that we can't experience this program. Only VIP guests can make reservations, so the price will definitely not be low!

When Liu Qing heard this from the cubicle, she subconsciously turned on her phone and opened a special app.

The APP was called the Linlin Scenic Area VIP version.

this special APP was known to many tourists. it was specially provided for vip tourists in linlin scenic area, which meant that tourists who had spent a certain amount of money in linlin scenic area at one time would be able to use it.

VIP guests also had to scan the code to install the APP, while ordinary tourists did not even have the chance to download it.

She had gone to the Linlin Scenic Area and played all the attractions there. Then, for the sake of the lucky draw, she bought a lot of things and finally reached the standard of a VIP visitor.

The APP naturally had all kinds of services for scenic spots. Some time ago, there were even some tickets and accommodation rooms available for reservation.

the success rate of these people booking the APP was much higher, at least the competition was not that great.

[Chapter 1502 A Request For Help From The Whitening Fish 2](#)

Otherwise, it would be extremely difficult to make a normal reservation.

after liu qing opened the APP, he immediately saw the hot spring fish therapy section through the tourist service section.

However, this project was currently grayed out and out of control. The introduction to this project was very detailed.

Liu Qing quickly read the introduction of the fish and saw the effect of the fish absorbing meaty substances.

She immediately became anxious. If the fish could really absorb mecoloring, would it have any effect on her?

It was not that her family had no way to treat meteoric black, but the treatment was not very effective unless she had plastic surgery, which was very risky.

The key was that there were too many black spots on her body.

The white fish seemed to be her last hope, as she knew that little Qin was very powerful.

That was little Qin.

Liu Qing hurriedly opened the toilet cubicle and walked out with tears on her face.

The people outside were stunned. They all knew Liu Qing and looked at her in shock.

This spotted girl was the girlfriend of the school hunk, a rich second-generation heir, and was also an influential figure in the school.

Liu Qing lowered her head and left in a hurry. She walked to the parking lot, but when she went downstairs, she met a gossip girl.

"That looks like Liu Qing. She seemed to have cried!"

seems like it's true. Lin Haoyu has been using her. He's already with another girl.

what a self-righteous woman, driving a sports car to show off in school. She deserves it. Why don't you take a look at yourself!

These words were very harsh.

liu qing couldn't care about that now. she went straight into the sports car and went home immediately.

When she got home, she immediately took out her phone and started taking pictures of the spots on her face, hands, and legs. After taking the video, she uploaded it to a certain voice and wrote the title: can the whitening fish save me? I'm in despair now because the spots on my body have been smeared by the scumbag.

After she was done, she clicked send.

She knew that once she posted it, she would expose herself to more people, especially since there were too many people on the internet who didn't have a good mouth. She might be exposed on the internet.

But she really wanted to know if the white fish could help her.

The video was uploaded, but it didn't seem to have much effect and didn't have many views.

She immediately did 'do +' to the right.

20,000 Dou+ promotion costs.

She was still not satisfied. She wanted the video to be seen by Linlin Manor.

Dou+ continued to pull to the right!

It was another 20000.

...

He changed his number.

another 20,000.

...

Borrowing an account.

Another 20,000.

...

In the end, she actually invested 200000 Yuan worth of Dou+ to promote her video, including her pocket money for the entire month.

With such a price, no matter how bad the video was, it would still be popular.

Soon, the number of views of Liu Qing's video increased rapidly, and the number of likes and comments also increased rapidly.

However, there were very few comments that scolded Liu Qing. After all, in this situation, everyone's focus was not on this.

the blogger is very courageous. I also want to know if the Linlin Manor's whitening fish can help the blogger. Help @ Linlin Scenic Area.

"I'm also very curious, I'll help @ Linlin Scenic Area too!"

"I'll help too @ Linlin Scenic Area."

"Ran ran @ Linlin Scenic Area."

although they knew the reputation of linlin scenic area, and that their hot spring fish treatment would definitely be effective, now that someone had asked for help, and the spots on their face and hands were so terrifying, everyone was also curious about whether the white fish would be effective.

If it could even cure such black spots, it went without saying that the effect of the whitening fish was extremely terrifying. If the other three types of fish were released together with the Whitefish, the effects would be obvious as well.

...

linlin scenic area.

Lin Lanzi was very busy now and had been staring at the hot spring project area of the scenic Area.

The hot spring project was located to the North of the new square. Mountain spring water could be directly introduced here. By installing a filter, the mountain spring water could be turned into the best hot spring water.

because you city didn't have a natural hot spring, he could only use this method.

however, such man-made hot springs were not competitive in this project. it was also because of this that he had been troubled about the promotion of the hot spring.

Now, they didn't have to worry about it anymore. With the four kinds of fish that Chairman Qin had brought out, everything would be solved easily. Linlin Scenic Area would have another world-famous project.

the color over there is lighter. This color looks too tacky. Lin Lanzi immediately directed the people from the engineering department.

"Okay, President Lin." The engineering department responded immediately.

Lin Lanzi's phone rang at this moment. It was someone from the multimedia department. After picking up the call, she was stunned for a moment. She hung up the phone and hurriedly opened WeChat.

The person from the multimedia department sent a video link.

When he opened it, he saw a female university student with spots on her face, hands, and feet asking for help. She had even been hit by a scumbag because of the spots on her body.

This attracted the sympathy of many people, and the comments section was full of @ 's of their Scenic Area.

Seeing this, Lin Lanzi felt that it was another good opportunity for publicity. After all, for this female voice's video to be so popular, it meant that even the heavens were helping her.

Otherwise, mouyin's popularity wouldn't be so easy to get on.

However, she immediately put away her phone and went to the Linlin Manor to find Qin Lin. "chairman qin, take a look at this video."

She didn't know the specific effects of the whitening fish, so she didn't dare to agree immediately. She had to ask the boss first before she knew what to do.

"This girl's courage is commendable." Qin Lin was also surprised when he saw the video. This was a good opportunity to show the public the whitening fish.

he also asked lin lanzi, "president lin, i'm sure you have an idea?"

Lin Lanzi nodded. I'm inclined to agree. It's just that I don't know the specific effects of this Whitefish. I don't dare to make a decision.

"Let this girl try!" Qin Lin said with a smile.

Absorbing meteoric black +2 attribute, as long as this girl's body was really meteoric black, it would definitely be effective. If the first time didn't work, he would do it a second time, and if the second time didn't work, he would do it a third time.

The things that came out of the game system were no laughing matter.

"Alright, Chairman Qin." a smile appeared on Lin Lanzi's face. With the boss's approval, it meant that the whitening fish would definitely be able to help that girl.

She knew very well what it meant and how terrifying it would be if fish healing fish had such an effect.

Hence, as soon as she returned to the office, she found the multimedia department and asked them to send a video in response to the girl named Liu Qing.

The media department naturally took action immediately. Now that this matter was so popular on the internet, the media department naturally knew to seize the opportunity.

The multimedia department responded by directly @-ing Liu Qing's account and asked her to come to Linlin Scenic Area. There would be a live broadcast of the fish therapy.

Linlin Scenic area's response immediately pushed this matter to a new high.

This made everyone even more curious, especially the women.

Linlin Scenic Area was so confident that they could even cure such spots with fish therapy. Wouldn't the problem of the dark yellow skin and not fair enough be solved easily?

Fish therapy was a novel thing to begin with. For many people, it was a very fun and enjoyable thing. It was much better than beauty treatments and injections.

Liu Qing had been staring at the situation on the internet the whole time. After getting the reply from Linlin Scenic Area, why would she hesitate? The first thing he did was buy a plane ticket to Ming city and then take a train to you city.

As soon as she arrived at Linlin Scenic Area, she contacted the scenic Area.

Naturally, Liu Qing's appearance in the Linlin Scenic Area quickly attracted the attention of tourists. With the current popularity, Liu Qing was already considered an internet celebrity. As her popularity increased, more and more people followed her.

"It seems to be her!"

"She was the one who asked for help from Linlin Scenic Area. She really came."

"She has a good figure and good facial features. If those spots can be cured, she'll definitely be a beauty."
"

"I'm really looking forward to it."

Hearing these discussions, Liu Qing's attitude was different this time. After all, she was going all out. She didn't even wear a mask.

This time, she had gone all out.

Soon, the staff of the scenic Area received Liu Qing and took her to the multimedia department of the scenic Area.

The head of the media department asked Liu Qing to fill in the information, then took out a contract and handed it to her, " miss Liu Qing, this is the contract for the treatment. During the treatment process, we will do a live broadcast of the comparison to let everyone know the effects of the whitening fish. I hope you can cooperate with us.

Liu Qing signed the contract decisively.

she didn't care about these things at all. she only hoped that beauty bai would be effective on her.

After signing the contract, the scenic Area was relieved.

Not long after, the Linlin Scenic Area started the live broadcast, and in a short time, countless people entered the live broadcast room.

They would soon find out whether the whitening fish could cure the spots on Liu Qing's body.

Soon, everyone would be shocked by the effects of the fish.

[Chapter 1503 Terrifying Effect! Effective Against HIV? 1](#)

The Linlin Scenic Area was rarely livestreamed, but once it was, the number of online viewers would explode.

Even though the scene at the beginning was empty, without a single person in sight.

The livestream on the official account of Linlin Scenic Area had only started for a while, but the number of viewers increased rapidly, and soon the official account of a certain music station was alarmed.

This was because the number of people online in the live broadcast room had already reached 10 million.

This was a terrifying number.

It could be said that even if all the big internet celebrities were added up, the number of people in the live broadcast room would still be far from reaching this level.

In the end, mouyin could only put the official account of Linlin Scenic Area on the top page of the hot search list, feeling both love and melancholy.

Any platform would want a livestream like Linlin Scenic Area to have a livestream audience, but if the livestream room wasn't controlled, it would be very worrying.

After the livestream of the official account of Linlin Scenic Area was placed on the top page, more people saw it, especially those who saw the " whitening fish treatment livestream! . More people were attracted to the news.

In a short time, the number of viewers in the live broadcast room had reached 20 million.

One could see how terrifying the attention was.

Other than ordinary people, there were naturally many people who specialized in whitening skin who were following this live broadcast.

In a beauty and whitening hospital in the Eastern Province, director Li Mei and a few directors were watching the live broadcast.

dear directors, do you think the white fish will work? " Li Mei asked the directors with a frown.

her hospital was earning money from women under the guise of beauty and whitening.

now that there was a white fish that could absorb the black pigment in the skin and whiten the skin, wasn't this destroying their jobs?

If it were any other company, she would have joined forces with other people in the whitening and beauty industry to target them and criticize them to death.

But the other party was Linlin Scenic Area, he didn't dare.

Thinking back to the Henry's ketchup, the two colas, and the big glasses Giants, there were still traces of them?

He thought back to the time when the air conditioner magnate had only leeches on Linlin villa's popularity and the other party had created an everlasting warmth grass.

What was their whitening and beauty industry?

now, they were only using the whitening fish to absorb the meaty substances. at most, they would lose a part of their business. if they really angered linlin company, they would target all of their main products and you would not even have a place to cry.

At the same time, many people from the beauty and whitening agencies were watching the live broadcast and felt the same helplessness.

That was Linlin's company.

If they wanted to target the other party, they would have to wait until academician Qin and Li Kai were no longer at Linlin laboratory.

Naturally, the people who paid attention to the live broadcast were countless netizens.

It was under such circumstances that a female host appeared in the live broadcast room. She had been specially hired by the multimedia department of Linlin Scenic Area. After all, Lin Lanzi had become the person-in-charge of the scenic Area and could not host the event herself.

The female host's words were also very simple and clear. welcome to the livestream room of Linlin Scenic Area. I'm sure you don't want to see me as the host, so the Whitefish livestream officially begins.

the female host left after she finished speaking. this made the audience secretly praise her. this female host was very tactful and knew her own limits.

Therefore, the hosts of the TV stations could learn from this. In the future, they should stop complaining and go on the show at night.

The scene in the livestream room quickly changed, and a coy figure walked in.

it was liu qing.

She put on a bikini and appeared in front of everyone.

It was also the first time she appeared in front of the public like this, because the spots on her body made her never have the courage to appear in front of the public like this.

Liu Qing's appearance caught everyone's attention. At the same time, it made many people frown.

Because there were really many black spots on her face and body, especially when she was wearing a bikini. The number of black spots looked even more, which made people feel nauseated and disgusted.

naturally, there were also those with unique eyes.

she's very tall. She's more than 1.6 meters, right? "

"It seems like her ** is very big, and her ** is very meaty!"

her facial features look pretty good too. What do you guys think? if the lights are turned off!

"Upstairs, I understand in a second!"

"Instant comprehension +1!"

"I understand instantly, Zhenzhen."

For a moment, the comments seemed to turn into a car speeding by.

Soon, Liu Qing walked into the hot spring area, and the livestream viewers could see the situation inside.

The hot springs in Linlin Scenic Area were divided into male and female hot springs, with men on the left and women on the right. The two sides were separated.

The key was that there was a couple's hot spring area in the middle.

This layout had considered all possibilities. After all, this hot spring project was a high-end one. Many of the male guests should have brought their guests, and the female guests should have come with their best friends.

It was very important for men and women to be separated.

Of course, there were couples who came together, so they added a couple's hot spring area.

When the audience in the live broadcast room saw this arrangement, they became lively again.

although I understand the layout, why does the couple's hot spring area remind me of a certain District mini-movie? "

"Haha, it's the cream bath Series, right?"

"There's also the travelling" strong "series!"

"Upstairs, what are you talking about? He looks very powerful!"

"Excuse me, do you have the license plate number?"

Obviously, this was another unlicensed car driving past the live broadcast room. What was the most abundant thing on the internet these days? He was naturally an experienced driver.

These experienced drivers drove around all day long.

liu qing also entered the women's hot spring area with these vehicles.

There were man-made hot springs inside, and because they were led in by mountain spring water, the Red Hot spring pool's water was so clear that one could see the bottom.

[Chapter 1504 686-Terrifying Effect! Effective Against HIV? 2](#)

However, the hot springs were not open yet, and none of the hot springs were heated up. Only one of the hot springs was heated up and was emitting steam.

The temperature on the thermometer had already reached 40 degrees Celsius.

This was also the temperature set for most hot springs. This temperature was good for metabolism.

Beside them were two waitresses who had been waiting for a long time. They were in the same uniform, and because they had to appear on camera, they had very delicate facial features.

however, at this time, the audience in the live broadcast room was not in the mood to look at the waitress. most of them had their eyes on the temperature of the hot spring.

the water is 40 ° C. The fish therapy wouldn't put fish in the hot spring, would they? "

"It shouldn't be possible, right? Wouldn't the fish die at this temperature?"

"Yeah, when it's above 30 ° C, the fish can't stand it."

"At this temperature, it will be half-cooked in half an hour, right?"

"....."

Everyone's topic was drawn to this point. Indeed, it was difficult for fish to survive in such a high temperature.

It would be unbelievable if Linlin Scenic Area was really going to pour the fish into the hot spring.

This was against the survival principles of fish.

However, just as Liu Qing entered the hot spring, the two waitresses picked up the bucket next to her and poured the fish into the hot spring that was 40 degrees Celsius.

At this time, everyone saw the appearance of the white fish. It was white all over and had a sharp mouth.

To everyone's surprise, nothing happened to the fish after they were poured into the hot spring at 40 ° C.

Under normal circumstances, these fish would not be able to adapt to this temperature and would be dispirited. However, after entering the hot spring, these fish were swimming quickly as if they were very happy.

This was a little magical.

Were the fish really fine in this temperature?

Then, the whitening fish seemed to have noticed Liu Qing. As if something on Liu Qing's body was attracting them, they swam towards Liu Qing happily and surrounded her body.

In the eyes of the audience in the live streaming room, that scene was very spectacular under the HD camera.

Moreover, the audience discovered an unbelievable scene. The fish surrounding Liu Qing were not random, but rather, they were following a pattern.

They were all gathering near the spots on Liu Qing's body.

This seemed to be very selective.

The audience seemed to have thought of something at this moment and started to comment.

it's only surrounded by spots. Are you really attracted by the meteoric black inside? "

this selective gathering makes me believe that the Whitefish really has whitening effects.

"I can only say that this scene is too unbelievable."

"..."

The audience watching the live broadcast was shocked, especially when many fish experts explained it to them, making them understand how incredible it was for fish to survive in a temperature of 40 ° C.

Even tropical fish couldn't survive in such temperatures for long.

At this moment.

liu qing also felt that something was wrong. when the fish surrounded her, she felt a cool feeling on her skin, especially when the fish's mouths were on her skin. he could feel that it was very comfortable and satisfying.

Soon, she seemed to feel some small tentacles in the mouths of the fish that were whitening her skin, causing her to feel numb and itchy.

It wasn't an uncomfortable feeling, but he wanted to scratch his face, especially several areas.

She remembered that those spots were where the spots on her face were, so she held back.

Gradually, she got used to this feeling.

she didn't know how much time had passed, but the whitening fish had left her body. it seemed that she had worked to the limit.

The waitress had been briefed on the situation, and one of them immediately said, "Miss Liu Qing, today's fish therapy session has ended. We can continue tomorrow."

"Oh, oh!" Liu Qing nodded and immediately walked out of the hot spring.

She left the hot spring area and immediately went to the wall mirror outside. She couldn't wait to see the condition of the spots on her body.

When she saw the situation in the mirror, her face immediately revealed a look of disbelief.

Even the audience in the live broadcast room was surprised.

The spots on her body were much lighter than before, and it was a change that could be seen with the naked eye.

"This Gu's effect!" Liu Qing simply couldn't believe it. Before she came here, she was only hoping that the white fish would have an effect on her, but she didn't expect the effect to be so strong.

Lin Lanzi was also watching the livestream. Seeing this scene, she also heaved a sigh of relief. She could only secretly say that this was indeed something that the boss had cultivated. The effect was simply amazing.

In this case, the horrifying spots on Liu Qing's body would be completely clear after two more times.

It was just as Lin Lanzi had thought.

The next day, Liu Qing entered the hot spring again for the fish therapy program.

After the fish therapy, the spots on her body were only a little faint. She could not help but want to cry.

The source of her low self-esteem that had troubled her since she was young seemed to be disappearing.

On the third day, Liu Qing had her third fish therapy session.

When she came out of the hot spring this time, the audience in the live streaming room was completely shocked.

All the spots on her body were gone.

A 1.6-meter tall girl with delicate facial features, big breasts, and a chubby chest without the scary spots was a goddess-level girl.

Coupled with the temptation of the bikinis, there was a brief silence in the live broadcast room.

[Chapter 1505 686-Terrifying Effect! Effective Against HIV?](#)

When Liu Qing walked to the mirror, she subconsciously covered her mouth and couldn't help but jump up in joy. It's really done. This fish is too magical.

With that jump, her *** trembled and trembled. Without the influence of those terrifying spots, it was truly tempting.

f * ck, it's only been three days. It's unbelievable that a car was washed clean just like that.

"It seems like it'll work without turning off the lights."

upstairs, I understand now. It doesn't matter if you Don't Turn Off The Lights. You can even turn on the brightest light.

"I suddenly thought that if I had pursued her three days ago, would I have made a fortune now?"

"Not only did I earn a lot, I hit the jackpot, okay?"

"....."

However, this was not the end.

On the fourth day, Liu Qing underwent another fish treatment. Since there were no more spots, the whitening fish no longer targeted her. Instead, they began to absorb the meteoric black that was present in Liu Qing's body.

This time, not only did the spots no longer make her look beautiful, but even her skin began to turn white and watery.

Liu Qing's facial features were exquisite, her figure was good, and she was beautiful without the spots. She didn't have that terrifying and disgusting feeling, and now she was fair. She had really become a goddess.

The audience watching the live broadcast was completely dumbfounded.

How was this a good car?

It was a super luxury car.

More people lamented that they had stopped pursuing Liu Qing four days ago.

If Liu Qing had a boyfriend four days ago, her boyfriend would have laughed in his dreams.

In a short period of time, the effects of the whitening fish were edited out by many netizens. They specifically compared the spots on Liu Qing before and after.

After four days, he was a completely different person.

With that, everyone who saw the video knew about the terrifying effects of the whitening fish. The video started to go viral on the internet.

When the whitening agencies saw the results, they could only sigh in silence. They felt that winter had not come yet, but they were already feeling a little cold.

Not only on the internet, but the University of Puqing, where Liu Qing studied, also spread her video like crazy.

"Is she really Liu Qing? How did she become so beautiful?"

"Why did such a good thing happen to an ugly person like her?"

How did she become so beautiful?? "

"....."

These were the reactions of the girls.

"F * ck, I really regret not pursuing her before."

"Liu Qing must be very rich, right? Now that she's so beautiful, I'm also regretting not pursuing her. "

"Doesn't she have a boyfriend? it's that wang fei."

haha, Wang Fei dumped Liu Qing and got together with Qian Qianqian. He must be regretting it now, right? "

how is this regret? my intestines must be green with regret, right? "

"....."

...

It could be said that in a short period of time, the terrifying effect of the whitening fish was known all over the internet. All the women who loved beauty were attracted, especially those with dark yellow skin and bad skin color. It was as if they had seen their Savior.

If Liu Qing could become like this in her condition, they should be fine too, right? After all, it was just their skin color that was not good.

Wasn't this kind of fish therapy better than doing those beauty programs and buying beauty products?

Because of the terrifying effect of the whitening fish, everyone was even more curious about the effects of the other three kinds of fish. After all, the four kinds of fish could be put together, and they were all cultivated by academician Qin little, so the effect would definitely not be much different, right?

if the effect was really too different, academician qin and linlin scenic area wouldn't put these four kinds of fish together, right? That would affect the style.

At this moment, an organization on the internet @ Linlin Scenic Area: this fish with the immune system said that it can clean up the viruses in the immune system. Will it be effective against HIV?

This was an HIV research Institute.

This time, everyone's attention was once again attracted. The effects of the white fish were terrifying good, but the problem of HIV was even more of a concern.

if one of these fish could be effective against HIV, then it would be even more terrifying. what was the effect of the whitening fish in front of this?

[Chapter 1506 Is There Such! Possibility? 1](#)

On the internet, the popularity of the fish therapy in the Linlin Scenic Area was at its peak. The live broadcast of the whitening fish therapy had become the most popular video.

Naturally, this popularity also created an internet celebrity, and that was the first person to experience the whitening fish, Liu Qing.

She was originally covered in spots, self-abased, unconfident, and ugly.

Now, the spots on her body were gone. She had a good figure, big breasts, chubby cheeks, exquisite facial features, and fair skin. She was definitely on the level of a goddess.

all kinds of frivolous praises from those experienced people on the internet had helped her regain her confidence.

She had attracted more than a million fans after posting a few sexy videos on youyin.

It could be said that just this alone was worth the 200000 Dou+TUI promotion she had spent before.

It was as if a new door had been opened to her life.

As the effect of the whitening fish became known to everyone, the hot spring fish therapy program in Linlin Scenic Area also began to be opened.

Naturally, only VIP guests could book it through the app.

After the first batch of visitors had experienced the fish therapy, there was no end to the praises for the fish therapy program. Almost all of them would share their experience on their WeChat moments or online.

After all, they were the first batch of experience tourists and one of the few VIP guests who had the opportunity to experience the Linlin Scenic Area. Everyone was a little proud.

naturally, the whitefish and the kissing fish were the ones who received the most praise.

the effect of the whitening fish is really strong. I only did the fish treatment once, and my dark yellow skin turned white. All the beauty treatments I've done before were useless.

I'm a serious case of insomnia. After experiencing the 'kiss fish project', I slept well that night.

《.....》

This was because the effects of these two fish could be seen directly, while the effects of the dirty fish and the fish with the immune system could not be seen immediately on the surface.

The hot spring project in Linlin Scenic Area had also become the hottest topic.

liu qing also returned to pu qing university very quickly.

She drove her sports car into the school as usual.

Many people remembered her car plate number, not because they had a good memory, but because they were jealous and envious.

This time, Liu Qing was different from the past. She had a pair of long, snow-white legs, sexy clothes, and a confident face.

In the past, the spots on her body made her only dare to wear very conservative clothes, and she was even unwilling to reveal more skin.

This scene made many girls, who were used to Liu Qing's former appearance, envious and jealous. They wished they could go to Linlin Manor to help themselves.

Liu Qing felt the envious gazes of the four weeks, and was even more glad that she had chosen to ask for help from Linlin Scenic Area.

When she reached the teaching building, she was stunned and stopped in her tracks.

She saw a handsome boy being surrounded by people. There were Rose Hearts under his feet and a bouquet of roses in his hand.

His posture made many young girls' hearts beat faster. After all, he was still the school hunk.

Liu Qing's brows were tightly furrowed, because the boy was Wang Fei.

When Wang Fei saw Liu Qing, he immediately ran forward and explained, Qingqing, let me explain. I don't like Qian Qianqian at all. She seduced me. You know that I've always liked you. These roses are for you!

At this moment, he was extremely regretful.

At first, he was indeed with Liu Qing for her money. That was why he hooked up with other girls. After all, no one could bear to see his girlfriend in such an ugly state.

However, he had never expected that there would be a type of whitening fish in Linlin Scenic Area. Not only did it cure Liu Qing's spots, but it also made her so fair.

There were many experienced people on the internet who had their eyes on Liu Qing.

It could be said that Wang Fei's intestines were green with regret.

Liu Qing took the Rose with a smile. Then, she threw the Rose on the ground and stepped on it a few times.

then, she walked past wang fei without looking at him.

Her attitude had changed, and she didn't know why she had taken a fancy to him before.

The news of Liu Qing's return to school spread quickly, and countless students couldn't help but come to watch.

Countless girls had seen the change in Liu Qing and had the idea of doing whitening fish therapy.

There were even people who called home and asked their parents to sell their cars and houses for fish therapy. They also promised that they would buy a car and house for their family when they became beautiful and got a rich boyfriend.

There was no lack of weirdos in this world.

Minister Lu from the Chinese Academy of Medicine also noticed the commotion caused by the whitening fish.

After knowing that Qin Lin had cultivated three other special fish and had experienced the effects of the kiss fish, he was naturally curious.

In the beginning, he was only curious about the three types of fish. Later, he was shocked by the effects of the whitening fish.

After that, he was attracted by another topic on the internet, which was HIV.

After the HIV organization @ 'd Linlin Scenic area's immune system fish had no effect on HIV, this topic became more and more intense.

...

Linlin Manor Office.

Qin Lin frowned slightly as he watched the video Lin Lanzi sent.

HIV research institute.

He had not expected such a scene to occur.

In the video, the HIV organization was asking if the fish in the immune system had any effect on HIV.

This video was now a hot topic.

many people were also very curious about this, especially after seeing the terrifying effects of the whitening fish.

After Qin Lin finished watching the video, he asked Lin Lanzi, " "President Lin, what do you think of this?"

lin lanzi said decisively, " chairman qin, we're in a scenic area. even if we can treat them, we can't. otherwise, if HIV patients come in, it will definitely cause panic. "

[Chapter 1507 Is There Such! Possibility? 2](#)

" naturally, if the fish with the immune system is really effective and can cure HIV, it will definitely be a great merit and the greatest mockery to some western people. "

Because HIV was prevalent in the West, it was also because some people who didn't love themselves brought this disease from the West to China.

by now, the proportion of HIV patients in the country was already very high.

Based on the known data, the number of HIV patients in the country had already reached 1.05 million, and the number of unknown patients was still unknown.

Most importantly, if one's attitude was good, then they would actively treat patients, actively live, and not harm others.

Those with a bad mentality were doomed.

There was a very beautiful woman who got this disease and was unwilling to give up. She started using all kinds of software to ask men out.

The result was self-evident. Because of her beauty, many men couldn't resist the temptation and went to the date. Then everyone understood.

Not only did the man contract HIV, but he also brought it to his family, which eventually caused his family to face a disaster.

There were even wives who could not take it and chose to commit suicide.

So, who was to blame for this?

Later, the woman was also arrested and charged with endangering Social Security.

What was even more perverted was that they would use needles to prick themselves and then use the needles to prick others. They would use this method to spread the news and take revenge on society.

there was a news report that a woman had contracted this illness and used needles to prick many children, causing many children to contract this illness and ruining their lives.

If the men who attended the appointment deserved it, these children were too pitiful.

Therefore, HIV was a time bomb for the entire society.

If this problem could really be solved, he believed that anyone would be willing to give it a try.

Qin Lin thought for a while and said to Lin Lanzi, President Lin, I've heard about this. I'd like to take a look at it. We'll talk about it later.

"Alright, Chairman Qin." Lin Lanzi nodded.

After she left, Qin Lin also began to look up information on HIV.

HIV was a very dangerous infectious disease. It was a virus that could attack the human immune system.

It targets the most important CD4t lymphatic cells of the human immune system as its main attack target, destroying a large number of these cells, causing the human body to lose its immune function.

Therefore, the human body was susceptible to various diseases and malignant tumors, with a high mortality rate.

The incubation period of HIV in the human body was an average of eight to nine years. During the incubation period of HIV, one could live and work for many years without any symptoms. This was a very terrifying incubation period. Therefore, before the disease completely broke out, no one knew if their boyfriend or girlfriend or the people around them had contracted this disease.

qin lin then looked at some experts 'research on HIV distributed on the internet.

This illness had been studied for a long time, but there had been no results. Therefore, the experts in this area would tacitly release the research data, and everyone would work together.

This was an impossible situation for other research projects.

But even so, the research on HIV had no effect, whether it was in China or in the world.

The main reason why HIV was so terrifying was that it would attack the immune cells and paralyze the immune system.

Clearing the HIV virus was equivalent to clearing out all the cells in the immune system, which would destroy the immune system.

Therefore, even though the theory behind HIV had long been clear, it had never been cured.

Now that he knew that the fish of the immune system had no effect on HIV, he just had to see if the fish of the immune system would only clear the virus, or if it would also clear the immune cells that were infected with the virus.

If it was only the former, then the fish with the immune system was likely to be effective against HIV. If it was the latter, then he could only say sorry.

After Qin Lin finished reading the information, he could totally ignore this matter. No matter how many people on the internet paid attention to it, no one would say anything about it.

After all, it was HIV.

However, when he thought of a piece of news he had once read about children who had their voices destroyed by needles and how miserable they were, he felt that he could not just ignore it.

What if the fish with the immune system really had such an effect?

After all, he had never tried it before.

There shouldn't be any problem trying, right?

There was a saying in the ancient times, "the accomplished can benefit the world!"

When people had the ability, they would always do something meaningful.

Qin Lin thought about it and called Shen Li, who was in Linlin's laboratory. As soon as the call went through, he asked, " President Shen, are there any experts in Linlin's laboratory who are researching the immune system? "

When Shen Li heard this, he was stunned and immediately asked, " "President Qin, is it because of the fish and HIV in the immune system?"

"yes, although i don't know if it's effective for HIV, i still have to take a look," qin lin said without hiding anything.

" understood, i'll make the arrangements immediately. the laboratory just hired an expert in the immune system a while ago. "

Shen Li hung up the phone and immediately made a call.

soon, a middle-aged professor came to his office.

"chairman shen!"

The two of them greeted him in unison.

"Professor Lin, have you paid attention to the topic of HIV and the fish with the immune system on the internet?" Shen Li asked.

Professor Lin nodded and said, " yes, I've seen it. The special fish cultivated by academician Qin is amazing. I can't help but admire it. Although the subject of my research on the immune system is not targeted at HIV, I'm still very curious about whether it will be effective.

Shen Li nodded. yes. Academician Qin is very curious now. He needs help. So, the laboratory is going to ask you to help him.

"really?" Professor Lin's face was filled with surprise.

For researchers like them, being able to participate in an academician's research was something they were looking forward to, not to mention HIV.

Shen Li nodded and said, " Oh right, there's one more thing. You might not know this since you're new here. Academician Qin is actually our boss. When the time comes, perform well and don't tell anyone about this.

"Ah!" Professor Lin's surprised expression immediately turned into shock.

He had just arrived and didn't know about this. He also thought that the middle-aged man in his forties was the boss.

Now, boss Shen was actually telling him that academician Qin little was the boss?

That young man!

This was too shocking.

At such a young age, not only did he have such a terrifying talent for research, but he had also created so many businesses and wealth?

"Let's go!" Shen Li said as he left the office. Professor Lin immediately followed him.

The two of them soon arrived at Linlin Manor and met Qin Lin.

Shen Li also introduced, " Chairman Qin, this is professor Lin. He's an expert in the study of the immune system. Although he doesn't study HIV, he has some knowledge in this area.

"Chairman Qin, if there's anything you need me to do, please let me know," professor Lin immediately replied respectfully.

Regardless of whether the other party was the boss or not, who would not be respectful to such a terrifying young man?

Wouldn't people without any achievements feel pressured when standing in front of the other party?

"Let's go to the hot spring and experience the fish with the immune system first." Qin Lin said as he led the two out of the office. At the same time, he called Lin Lanzi.

Because the hot spring project had not been opened yet, they still needed to make arrangements in advance.

He headed to the hot spring project area and asked Lin Lanzi to arrange fish therapy for the fish with the immune system.

It was funny to say that he had brought the fish out of the game himself, but he had never experienced the fish with the immune system.

When the three of them arrived at the hot springs area, Lin Lanzi had already made the arrangements. Three hot springs with steam wafting from them had already been prepared in the male Hot Springs area.

The three male waiters were already on standby with the fish with the immune system.

Qin Lin changed into a special pair of shorts. When he came out to enter the hot spring, professor Lin and Shen Li also entered the hot spring.

A water temperature of 40 ° C was just right for the human body. It would give people a comfortable feeling.

At the same time, The Three Waiters poured the fish with the immune system from the bucket under their feet into the three hot springs.

Almost instantly, the fish with the immune system in Shen Li and professor Lin's hot spring swam around their bodies.

But Qin Lin was stunned.

The three waitresses were also stunned and confused when they saw the scene in the Qin Lin hot spring.

[Chapter 1508 It's Really Strange! It Might Really Be Effective Against HIV](#)

the three waiters looked at the hot spring where qin lin was in surprise.

Since the hot spring had been open for the past few days, there were already many VIP guests who came.

Naturally, they had all seen and even experienced the situation of fish healing fish.

It could be said that as long as the fish were poured into the hot spring, no matter what kind of fish it was, they would quickly surround the tourists.

it would be normal for him to be like the other two.

Shen Li and professor Lin were surrounded by the fish of the immune system.

on the other hand, the fish with the immune system were wagging their tails leisurely around qin lin, as if they were completely ignoring him.

This was obviously not normal.

Even Qin Lin himself knew that something was wrong.

He immediately knew the reason.

kiss fish, whitefish, filth fish, and fish with the immune system all had one thing in common, and that was that only people with problems would go for fish therapy.

Now that he was lying in the hot spring, these fish with the immune system had ignored him. There were only two reasons.

One was that the fish with the immune system were all blind.

The other was that there was no problem with his immune system.

He naturally knew that it was the second reason.

He had eaten two fruits of the tree of strength, and his body had been transformed. Even the soldiers who had used body enhancement potions were far inferior to him.

Therefore, there was no problem with his immune system.

Since there was no problem and no virus inside, it naturally wouldn't attract these fish with the immune system.

qin lin sighed. what was going on? he didn't even have the chance to enjoy fish therapy if he was in good health?

On the other side, Shen Li and professor Lin had already closed their eyes comfortably.

Even Chen Li couldn't help but let out a comfortable mumble, "Yes, yes, yes."

Although the fish therapy didn't have an obvious effect on the immune system, it was definitely very comfortable to have a direct effect on the immune system.

After all, if there was poison in the body, there would be something wrong with the body. When the poison was removed, the sense of comfort would be very strong.

It was an indescribable feeling.

However, Qin Lin couldn't feel it, so he could only watch Shen Li and professor Lin enjoy it.

After an unknown period of time, when the fish immune system on Shen Li and professor Lin's bodies had dispersed, the two of them opened their eyes and stretched their necks comfortably.

"Chairman Qin, after the virus in the immune system was cleared, my body feels much more relaxed," Shen Li exclaimed.

that's because the virus has been cleared, " professor Lin explained. the immune system is in its best condition. Naturally, it will affect the body.

"Chairman Qin, now that we've experienced the fish, what should we do next?" he asked Qin Lin.

"professor lin, the biggest reason why HIV is difficult to treat is that the virus will infect the immune cells," qin yang said."when you destroy the virus, you must also destroy the immune cells. this is equivalent to destroying the human immune system, which is also a disaster for the body."

so, I want to know how the fish in the immune system removes the virus and see if it only removes the virus or removes the virus and the infected immune cells.

Professor Lin studied the immune system, so he immediately understood what Qin Lin meant.

if he wanted to know if the fish with the immune system had any effect on HIV, he had to be clear about this.

In general, viruses of the immune system would not infect the immune cells and would be blocked by the defense system formed by the immune cells. However, HIV was different. It would infect the immune cells in succession.

If the fish of the immune system were cleaned up along with the HIV-infected immune cells, it would accelerate the patient's death.

Therefore, it was important to figure out how the immune system fish got rid of the virus.

"Professor Lin, I'll leave the test to you," Qin Lin said.

"Chairman Qin, leave this to me. Give me a few fish with the immune system, and I'll figure it out as soon as possible." Professor Lin immediately assured him. He knew that this was what he was here to help Chairman Qin with.

He couldn't let Chairman Qin do this kind of work himself, right?

He also didn't think that Chairman Qin wouldn't understand this. After all, Chairman Qin had cultivated this kind of fish, so it was easy for him to figure it out.

After all, this kind of test was not too difficult. With the help of someone, the conclusion could be drawn very quickly.

Qin Lin nodded. He immediately prepared a few fish of the immune system and brought them back to professor Lin's laboratory.

After making the necessary arrangements, Qin Lin returned to the manor.

As soon as he arrived at the hall, Zhao mochen was already waiting for him. He stepped forward and said, "Honey, take a look at these. They're all you city's teachers."

qin lin took the information and looked at it. zhao moyin was very concerned about little qin feng's first teacher.

Since she was not at the age to go to kindergarten, she wanted to find a teacher to teach at home.

Qin Lin could only give his poor child a sympathetic look.

He hoped that his son would not be crushed by the pressure of his studies in the future.

However, Zhao Moyu had already made up his mind, so he could only read the information seriously.

The information was all about you city's outstanding kindergarten teachers.

However, Qin Lin was not satisfied.

no matter how good your city's teachers were, they were only teachers in small places. there was always a big gap between them and the well-known teachers.

Since Zhao Moyu's determination could not be stopped, it was better to find the best one.

Qin Lin expressed his opinion, and Zhao moyin immediately agreed. He even gave him a kiss, thinking that he should reward him tonight for being interested in his son.

As for the reward, it could only be understood.

after qin lin and zhao moyu had finished their discussion, they returned to their office and sat down to control their game characters to complete their daily tasks.

Naturally, he was not lucky enough to trigger the plot mission today.

However, when he controlled his game character to return to the farm, he was surprised to find that sprouts had appeared in the desert transformation again.

Another seed had mutated and sprouted.

Qin Lin controlled his game character to step forward and found out what the seed was. It was a mutated apple seed.

These apple seeds should be called desert apples in the future.

Seeing this, Qin Lin returned to the workshop in the inner area and entered the game with a thought. He saw the apple tree seedlings on the desert ground.

He took out a new flower pot and transplanted the mutated Apple sapling into it. Then, he brought it out of the game and called Yu Shui over to give him the Apple sapling.

Yu Shui wasn't surprised by the plants that her boss created from time to time that could survive in the desert.

in his heart, it would be strange if his boss couldn't do it. after all, his boss was the famous academician qin.

As soon as Qin Lin entered the manor's Hall, he heard a series of chattering voices.

"Master!" Xiao Wu.

"Master!" Little treasure.

"Main engine, main engine," Dabao!

The two treasures of the human puppet human puppet!

This was the sound of the two big parrots and the little parrot. Since the little parrot was born, it had been able to speak human language like its parents.

It meant that they had inherited their parents' talents.

The days passed just like that.

After professor Lin brought back the fish with the immune system, he had been doing tests on them. With the help of the researchers arranged by Linlin's laboratory, he quickly got the results and went to Qin Lin with the results.

Professor Lin solemnly handed the test report to Qin Lin and said, Chairman Qin, this is the test report of the fish clearing the virus of the immune system.

Qin Lin took the test report and felt a little embarrassed because he couldn't understand it.

He didn't even know the professional term for the immune system.

Fortunately, he was experienced in dealing with this kind of situation. He put on an act and said to professor Lin, " " professor lin, why don't you just introduce it to me orally? it's more direct this way. "

Professor Lin didn't doubt him and started to introduce, " Mr. Qin, I've taken some people to figure out the fish's condition. The fish doesn't remove the virus in a destructive way, but more like a treatment method, which is the latter one you mentioned before.

"Tell me the details." Qin Lin's eyes lit up.

I simulated the human skin and put it in the water, " professor Lin explained. I also simulated the immune system and injected the virus to monitor the fish in the immune system.

we found out that fish with the immune system are cleaned by injecting a special mucus into the human immune system during fish therapy.

this slime is harmless and has a great effect on the recovery of the immune system. It can strengthen the immune cells in a short period of time, allowing the immune cells to activate their immune system to eliminate the virus.

Qin Lin finally understood. It meant that the fish of the immune system could spray a liquid that was very useful for the immune cells, just like a drug that pumped the immune cells.

originally, the immune cells couldn't resist the virus, but after taking the stimulant, his strength increased greatly, and he could clear the virus.

Although this explanation was very rough, it was roughly based on this principle.

"In other words, this special slime is the root cause." "professor lin, what's with this sticky fluid?" qin lin was curious.

Professor Lin shook his head. we've also discovered that there's a special part of the fish's immune system that produces this mucus.

this mucus exists in the bodies of fish with the immune system. It seems to make them feel uncomfortable and they are eager to release it.

also, under normal circumstances, fish with the immune system can't spray this mucus out. They can only use the special organs in their mouths to Pierce into the human skin. Under the pressure of the friction, the mucus will be catalyzed by the virus in the immune system.

"This is definitely a very magical thing. It's like a miracle created by the Creator, allowing the fish and the man to reach a relationship of mutual help."

"Will the special liquid affect the fish's immune system?" Qin Lin asked.

But professor Lin said something that made Qin Lin's face look strange. "Chairman Qin, do you think there's any harm in releasing a man after he's done it?"

" ? ? ? "Qin Lin was stunned.

What the hell?

Why did this description sound a little off?

However, according to professor Lin's description, the fish with the immune system might be effective against HIV.

Therefore, not long after, a video posted by an official account of Linlin Scenic Area caused a sensation in the country, and even the world.

[Chapter 1509 689-Too Shocking! It Seems Like We Can Pick Up The Leftovers](#)

The popularity of the four special fish in Linlin Scenic Area had not died down, especially the whitening fish, which had a whitening effect that women would go crazy for.

Liu Qing, the first person to experience it, had become a big internet celebrity.

This was because anyone who saw her would be reminded of how she looked at the beginning.

As a result, countless women followed her and asked her about experiencing the whitening fish therapy.

of course, there was an interesting incident on the internet regarding the whitening fish. a female celebrity named ying actually @ linlin scenic area and expressed that she wanted to experience the whitening fish.

She seemed to want to learn from Liu Qing. If Liu Qing, an amateur, could be taken care of, then she, a celebrity, should be able to, right?

What was embarrassing was that she didn't get any response from Linlin Scenic Area. Instead, her comment was ridiculed by many people.

After all, this Ying was one of the female stars who did not know her own limitations. Her acting was obviously terrible, but she still thought that she was the best Actress.

In the end, Ying had no choice but to delete the post and close the comments.

The other matter was still a hot topic, and that was whether the fish with the immune system had any effect on HIV.

this should be something that the public was very concerned about, but there was still no response from linlin scenic area.

the linlin scenic area did not deny it, which seemed to represent some kind of hope.

In short, it was ambiguous.

It was also at this time that the official account of Linlin Scenic Area released a video, which caused a huge wave.

The largest HIV research institution in the country was located in Guangdong-Guang, called the Guangdong-Guang HIV research Center.

The reason was simple: this area had the highest ratio and number of HIV patients.

There were three possible reasons for this.

First, the area used to be chaotic. There used to be too many illegal items circulating in the area, which harmed many people. These illegal items could cause HIV.

Secondly, there were many black-skinned foreigners here. Many women didn't have any self-respect and sought excitement. They gave themselves to these black-skinned foreigners and got sick.

Third, this place used to have the most number of young ladies in the country who dressed in cool clothes and gave warmth to countless men.

This was the result of all the reasons.

This was also the place where many children were injected with HIV to take revenge on society.

Liu Xiangyuan was an intern researcher at the HIV research Center.

She was a beautiful woman with a good figure, a beautiful face, and a very elegant temperament. In fact, if she didn't work as a researcher, she could have an advantage in any industry with her appearance alone.

However, she was the most outstanding intern researcher in the Research Institute.

From the moment she chose this path, she was ready to dedicate her life to HIV research.

She also had two younger sisters and brothers who had inherited her parents' good genes.

Under normal circumstances, the younger sister could find a boyfriend who loved her very much in the future, and the younger brother could also find a girlfriend who was as beautiful as her in the future.

but now, his younger sister and brother could only spend their days in the hospital.

The reason was simple. Her brother and sister were victims of the injection and became one of the children infected with HIV.

She still remembered the time when her family received the bad news. It was as if the sky had fallen, and her mother had fainted.

she could clearly remember her younger brother and sister's increasingly haggard bodies at a young age. sometimes, they would be in pain and helpless in the isolation chamber.

at such a young age, his brother and sister had suffered the greatest disaster in the world.

This was one of the reasons she decided to become an HIV researcher.

she didn't know if she would have the chance to see her brother and sister being saved. she only hoped that such a tragedy wouldn't happen again.

Some time ago, the fish with the immune system in Linlin Scenic Area had attracted a lot of attention.

The first thing she noticed was that the fish of the immune system could clear the virus of the immune system.

At that time, she thought about whether the fish had any effect on HIV. She didn't doubt the effect of the fish with the immune system. After all, it was something that academician Qin little cultivated and researched.

as a researcher, how could she doubt academician qin?

That was academician Qin little, the idol of all the young researchers. If it wasn't for the lack of opportunities, she would have pursued academician Qin little.

After all, academician Qin was the ultimate ideal partner for researchers like her.

Therefore, she also @ Linlin Scenic Area in the name of the Research Institute to ask about this.

it was just that he had not received a response from the linlin scenic area.

Just as Liu Xiangyuan was thinking about this, a male intern researcher ran in and said,""Liu Xiangyuan, quickly take a look at the new video released by the official account of Linlin Scenic Area. It's about the fish with the immune system and HIV."

When Liu Xiangyuan heard this, she immediately took out her phone and clicked on the video posted on the official account of Linlin Scenic Area. Sure enough, she saw the new video.

after Linlin laboratory studied the fish of the immune system, they found that all fish of the immune system have the possibility of HIV. They sincerely invite the Chinese hospital to conduct a cooperative experiment.

Seeing this video, Liu Xiangyuan suddenly revealed an excited expression. In other words, the fish with the immune system might really be effective against HIV.

In other words, her younger brother and sister might be saved?

not only liu xiangyuan, but the people on the internet were also attracted by the video.

When it came to cancer, HIV was really a disease that made people's faces change.

Cancer would only cause him pain, and he would die if he died, but HIV would really affect everyone in the family.

Most importantly, HIV was one of the most difficult diseases to cure in the world. It was incurable, and once it broke out, it would be completely useless.

Now that the Linlin Scenic Area had released such a video, it meant that it was very likely that the fish with the immune system really had an effect.

Everyone could only sigh with emotion. This was truly too miraculous.

Then, he sighed again. Academician Qin was too awesome.

After all, this was the fish cultivated by academician Qin. It wasn't the first magical thing that academician Qin made.

However, some people felt that it was a pity for the original HIV research Institute.

After all, he was the one who had @ Linlin Scenic Area to ask this question in the first place. Otherwise, no one would have paid attention to this question at the beginning.

Now that Linlin's laboratory seemed to have tested this possibility and was looking for someone to cooperate with the experiment, they had skipped the HIV research Institute. Wasn't that the same as making the other party pay the wrong amount?

However, after thinking about it, everyone could understand. HIV was too big a matter, so it was not wrong to go to the Chinese hospital, which had the largest research strength in the country.

Qin Lin indeed had such thoughts.

HIV was too deeply involved in the illness.

There was no cure for this disease before this, and the whole world was deeply threatened by this disease.

This was especially true for a certain dominant country, where the number of HIV patients was terrifying to the extreme.

Think about it, what would people do if they knew about this?

He would definitely think of ways to get it.

Therefore, without the Linlin laboratory's scientific research strength in this area, it was not safe to cooperate with anyone. The only safe option was to cooperate with the Chinese People's Hospital.

Moreover, only by letting the state control it would those people with ulterior motives not dare to have any ideas. This would give him the greatest protection.

Very quickly, the Hua * Yuan also received the news.

minister lu was inspecting a research project. the project was top secret, and he couldn't bring his mobile phone. he only knew the news after his secretary reported it.

The first thing he did was rush back to his office.

"Leader, the Linlin Scenic Area has just released a new video. Also, President Shen from the Linlin laboratory has called us." The Secretary took out his phone and showed Minister Lu the video of Linlin Scenic Area.

minister lu took the video and watched it. he immediately instructed his secretary, " "Hurry up and make an announcement, say that our Hua Xia Institute will complete the cooperative experiment with Linlin laboratory as soon as possible."

He knew what this meant.

That was HIV, after all. If they could solve it, they could make a certain domineering country suffer. Who asked them to be the country with the most HIV patients in the world?

Minister Lu then turned to his Secretary and said, "hurry up and organize the relevant researchers to go to your city. Also, choose HIV patients and prepare for it."

"Leader, are there any requirements for the selection of patients?" the Secretary asked.

Minister Lu thought for a moment. Let's pick some innocent victims first. Those cases where we take revenge on society with injections. Those children shouldn't have all died, right? "

"Alright, leader!" the secretary understood what he meant.

If these children could be cured, the significance would not only be to cure several HIV patients, but also a kind of redemption.

Not long after, the Chinese Academy's official account also released a piece of news, which completely caused a sensation on the entire internet.

The Chinese People's Hospital has reached an agreement with Linlin laboratory. Now, they are gathering excellent HIV researchers in the country to solve the difficult HIV problem together.

This announcement meant that the treatment of HIV had to be put on the agenda.

Who knew how many HIV researchers saw this and immediately had ideas.

They knew very well that this was a research that transcended the era. If they could participate, it would be very meaningful to their research careers, and it would also have indescribable benefits for them.

When Liu Xiangyuan saw the Chinese Academy of Sciences' announcement, she immediately filled in the application form and hurriedly handed it to the head of the Research Institute.

In addition to gathering excellent HIV researchers, the Chinese People's Hospital also gathered some intern researchers. This was an opportunity for them.

She hoped that she would be chosen.

If she could personally participate and see her younger brother and sister's illness be cured, it would be of the greatest significance to her.

There were many HIV researchers like Liu Xiangyuan. After seeing the information from the Chinese hospital, they filled in their application information as quickly as possible.

Of course, the researchers weren't the only ones taking action. Sometimes, people would get different gains from different perspectives.

Lin Qijin was such a person. The first thing he did when he saw the news was to go to a nearby florist and buy a large bouquet of 99 roses, then rush into the community.

Of course, he wouldn't buy these 99 roses for no reason. This time, he wanted to get a bargain.

"Lin Qijin, who do you want to give this rose to?" his friend asked when he saw it.

"Huang Yanfang," Lin Qijin said happily.

His friend's eyes widened, "are you crazy?" everyone knows that she has HIV, and the people in the community are eager for her to move out, yet you're still giving her flowers?"

Lin Qijin immediately retorted, "you're the one who's crazy. Besides, did she think of that?" It's just a random boyfriend, why do you have to anger her to death?"

"Weren't you the one who looked down on her the most in the past?" his friend asked, speechless.

"If you keep talking nonsense, I won't be your friend anymore." Lin Qijin was instantly enraged. He ignored his friend and continued walking forward.

The image of Huang Yanfang's beautiful face and great figure had already appeared in his mind.

"Has Lin Qijin gone crazy?" His friend mumbled to himself as he watched Lin Qijin's back, then walked into the neighborhood. He had only taken a few steps when he heard someone beside him say, "Academician Qin is really amazing. The fish he researched seems to be able to treat HIV."

The friend stopped in his tracks in shock.

The image of Huang Yanfang's *** also appeared in his mind.

That was really alluring. In the past, I only felt that it was a pity, but it's different now, Yingluo.

f * ck, Lin Qijin is a dog, " his friend immediately reacted.

Then, he went straight to the flower shop to buy flowers.

He also knew that one of his classmates had contracted HIV, and it was because of his husband's blind meddling that the family was able to solve the problem.

The key was that she had a good figure and a good temperament.

He didn't understand why the other party's husband still wanted to sleep with such a good wife. It made a single man like him want to hit someone.

But now, it seemed like he could pick up a bargain.

[Chapter 1510 Linlin Laboratory's Reputation In The World](#)

While the internet was in an uproar, the Chinese People's Hospital in reality had already begun their preparations. They sent people to the home of the little victim who had been injected to take revenge on society at the fastest speed possible.

Those little angels should have been living happily, but because of a demon, their wings were broken, and they were cursed with the most terrible curse.

Some of them had already died painfully from the curse, while others were still in despair, experiencing the greatest malice and pain in the world.

Therefore, the first batch of test subjects had to be these little angels.

Liu Xiangyuan had gotten off work early from the Research Institute. Her face was full of smiles because her application had been approved as soon as it was sent to the higher-ups in the Hua * hospital. She was asked to report to the capital immediately and register her information.

This also showed how much importance the Hua hospital placed on this matter.

When Liu Xiangyuan returned home, she found that there were guests in her house, and they were wearing special uniforms. She was shocked when she saw the logo on the uniform.

It was impossible for the domestic research Institute to not recognize the logo.

Because that was the symbol of the Hua * Yuan.

The people from Hua hospital actually came to her house.

She suddenly thought of something, and an indescribable joy appeared on her face.

a middle-aged man and woman immediately walked towards her. they were her parents.

"Daughter, they say it's the people from Hua Yuan, Zhenzhen."

"Yingluo, take a look and see if this document is real. The Chinese hospital wants to treat your brother and sister Yingluo."

Liu Xiangyuan took the document and looked at it. She immediately said to her parents, "Dad, mom, if these comrades have any requests, you must try your best to cooperate."

His parents clearly understood and immediately cried tears of joy. Their faces were filled with indescribable joy.

If her daughter said so, it was true.

How big of a surprise would this be for his parents?

Liu Xiangyuan also immediately turned to the people from the Hua Yuan and said, "My comrades, you are looking for my younger brother and sister. I am also an intern HIV researcher. I have already applied for approval and will be heading to Beijing."

a few people from the hua * yuan were a little surprised.

in fact, at the beginning of the HIV research, they did not call for intern researchers. after all, rookies could not help much.

However, HIV research was definitely a huge project, and it would be a great contribution even if it was just hard work.

That's why Yingluo had some young people born into good families.

After that, in order to cover up, they gathered a few more intern researchers outside so that no one would say anything.

This kind of thing was very normal in a society where human relationships were the most important.

He didn't expect the person in front of him to be so lucky.

Another person from Hua * Yuan also said, that's great. We can go to the capital together.

While the news was spreading like wildfire in the country, it also spread like wildfire overseas.

In the beginning, foreign countries did not pay attention to domestic affairs. However, ever since the use of Willow duckweed to treat the water environment, foreign countries had begun to pay attention to Linlin laboratory and Linlin company.

Especially after the incident with Optimus Prime and Megatron, the foreign media, especially the Western media, began to pay close attention to the Linlin laboratory.

After all, the previous incident had caused a huge sensation in the West.

Therefore, as soon as HIV and the fish with the immune system were posted on the internet, the media in Western countries took notice.

In a short period of time, the media from all over the world reported it like crazy.

This was especially true for the American media, as their country had the most serious HIV infection and they were the most threatened by HIV.

as the news spread, the beautiful chinese man was also very shocked and couldn't believe it.

They, who claimed to be the most technologically advanced in the Dominator country, couldn't cure HIV, and it was solved by the people from the eastern country?

"really? Can those Eastern countries even cure HIV?"

" this is unbelievable. didn't a professor in our country say that there's no way to solve it within 30 years? "

"What right does that Eastern kingdom have?"

"It seems to be the Linlin laboratory's research again."

"They're from Linlin's laboratory?"

they created Optimus Prime and Megatron, and even cultivated that kind of duckweed. If that's the case, then there's really a chance that they'll fail.

It seemed that the Linlin laboratory had a certain prestige and reputation in America.

Just based on the news, there were actually people in America who believed it.

They didn't want to believe that the eastern countries had the ability to solve HIV, but they believed that Linlin's laboratory had the ability to do so. This was a very strange paradox.

While everyone in the West was discussing in amazement, the Beijing Chinese People's Hospital had completed the gathering of HIV research elites. After selecting HIV patients, they took them to you city.

At the same time.

The official website of the Chinese hospital also released an announcement about the first batch of HIV test patients.

This was because after the Linlin Scenic Area released the video and the Chinese Academy of Sciences released the announcement, countless people had their eyes on the list of the first batch of test subjects.

Some people even made some malicious speculations.

This was a very bad situation.

it was obvious that some people had contracted HIV and had some power. they wanted to become the first batch of experimental treatment, so they were using some tricks.

minister lu naturally wouldn't let these people get away with it. he immediately made an announcement. he believed that no one would object to the first batch of experimental treatment subjects.

" yingluo and the others are angels with broken wings. they faced the darkest disaster in the world at a young age, and now the world has given them the brightest light of dawn. "

When the announcement from the Chinese Academy came out, everyone was silent. Who could say anything?
