

The Game 1541

[Chapter 1541 How Did You Do This? 1](#)

Prince Tala smiled and confirmed again, "are you sure? You're going to pay the 20 billion?"

He was very happy because these people were his brothers who were most afraid of the beans. They had even studied how to eat the beans.

Therefore, if they could grow them in the desert, they would be able to grow them all over the desert. That would be a wonderful thing.

Obviously, it was only 20 billion, which was not a big deal for the people of Prince Tala's family. They quickly transferred 20 billion into Prince Tala's account.

After Prince Tara received the money, he said to the family, "then i'll go to that eastern country immediately. i'll definitely bring back the chicktooth. "

Of course, he wasn't going to bring some Chrysalis. After all, he had already paid for it. Even if he didn't go, Mr Lu had promised that he would bring it over.

The reason why he wanted to go to the eastern countries again was because he missed the Linlin Scenic Area. That's right, it had only been a short time, but he missed it.

Moreover, with another 20 billion, he felt that he could ask academician Qin to cultivate two more plants, right?

he was considering what he liked to eat and what he should choose.

Of course, if others knew about his thoughts, they could only say that he was willful because he was rich.

After all, who could be more willful than them when they put on the headscarf? Then there was definitely nothing else.

prince tala also quickly booked a plane ticket and was a little impatient.

...

Hua hospital.

After Minister Lu called Prince Tara, an internal phone call came in. He saw that it was academician qu.

He did not dare to delay academician Hao's call, so he immediately answered it.

The rocket project jointly led by academician Hao, academician Zhu, and academician Fei was the largest project in the Chinese Academy of Sciences.

This project was also called the future.

They represented the future of the eastern people.

Now that he thought about it, academician Hao's Department was already transforming that small planet. If the transformation was completed and people could live on it, what else would they have to worry about?

At that time, if they were enraged, they could directly use Earth's ***. They wouldn't be afraid even if earth was destroyed, as they had a way out.

Naturally, this was just a thought, and he couldn't really do such a thing.

However, when that time came, if a certain country made a fuss and directly took the stance of using strategic weapons, would the other party be afraid?

The other party would probably be dumbfounded when the time came. Why was the opponent so brave?

When the call connected, academician Hao's excited voice could be heard. "minister lu, those optimus prime and megatron have been transported to that planet. they're already working. some images have been sent over from the signal transmitted through the space folding satellite. "

"really?" Minister Lu was excited when he heard the news. He immediately went to the special department of the rocket project.

After passing through layers of security checks, he entered the building. Academician zou, who had been waiting for him, led him to a huge screen in the inner area.

replay the video. Academician Hao immediately said to a researcher.

&Nbsp; the researcher nodded and immediately replayed the video. One of the videos appeared, and the environment in the video was a little dark. There were rocks all around, and it seemed to be very desolate.

Moreover, the camera angle of the video was very strange. When the camera angle shifted to the side, they roughly knew the reason. There were a few Optimus Prime and Megatron next to them, and they were all holding huge tools to hammer the surrounding rocks.

Looking at the situation around him, it seemed that they were building a foundation.

In other words, this view was also from a Megatron or Optimus Prime.

"minister lu, these optimus prime and megatron have played a huge role after they were sent there, "minister kui said. " they've been of great help in expanding the base and planting bubble grass and color-changing trees. "

"That's good." Minister Lu nodded with emotion.

The video in front of him actually looked like a scene from a sci-fi movie.

Or rather, in reality, it was impossible for such a scene to appear at the moment. This was beyond the era.

He could only admire boss Qin's power, academician Li Kai's power, and the benefits of Linlin Manor.

After all, academician Hao and the others were in the Linlin Manor. They relied on the special environment of the Linlin Manor to calm their minds and gain unexpected insights, which led to the breakthrough in rocket technology.

it's a pity that the Institute hasn't been able to modify the appearance of this Optimus Prime and Megatron, " academician Hao said. it's not our own, so it's a bit annoying to use.

Minister Lu could only sigh when he heard this. Who asked boss Qin to make these two big guys so complicated?

The mechanical researchers in the Academy were completely helpless. If they wanted to redesign the exterior, it seemed that they would have to rearrange the internal structure.

It wasn't difficult for these researchers to replicate the appearance of this kind of epoch-making thing, but it was difficult to redesign and modify it.

Minister Lu, " academician Hao said with a smile. why don't you put down your pride and ask boss Qin for help? "

His words made Minister Lu feel a little awkward.

after all, he had wanted to ask boss qin for this from the beginning, but that would make the researchers in the chinese academy seem useless.

However, he obviously overestimated the researchers. After all, not every researcher had the ability to solve problems that were beyond their time like academician zou and the other two.

[Chapter 1542 708-How Did You Do This?](#)

yes, that's the only way. I'll go to Linlin Manor and talk to boss Qin personally. Minister Lu nodded. He could only blame his own people for not being able to live up to expectations.

Then, he said,"academician Hao, why don't the three of you make a trip to Linlin Manor?" After all, we haven't been able to come up with a solution for the spaceship's propulsion system. Maybe we can go to Linlin Manor to relax for a few days and gain some insights."

Academician Hao nodded.

Spacecraft research was not something that could be done overnight. It was a project that transcended time and took a long time. Just the problem of the spacecraft's propulsion system alone had to be carried out in several steps.

They didn't even have the most basic draft.

It wasn't that they weren't capable enough, but that after the sudden enlightenment in Linlin Manor, the three of them had brought space technology into a new era.

There was nothing to learn from spaceships, so he could only try to figure it out.

Academician Hao sighed and said, " Minister Lu, why doesn't boss Qin study machinery and power? otherwise, with his talent, he might be able to develop something magical.

Minister Lu could only sigh when he heard this.

Boss Qin's personality was just like that.

After making his decision, he instructed his Secretary to arrange his schedule and let academician Hao and the others arrange things. They would go to Linlin Manor together.

Then, he left academician Hao's special department and went to another immune system research Department.

As soon as he entered, an academician came to greet him and brought him to a pool.

There were purple fish with the immune system swimming in the pool, which were now very famous internationally.

Everyone knew that this fish was effective against HIV, but its effect was not only on fish with the immune system, but also on various viruses in the immune system. It had great research value.

Minister Lu looked at the fish and sighed again. This was another masterpiece of boss Qin.

Now, the Chinese Academy of Medicine had been studying boss Qin and professor Li Kai's research results for countless projects.

"How's the cultivation of the fish with the immune system going?" Minister Lu asked with a sigh.

It's already starting to lay eggs," the academician replied immediately. The fish's egg-laying and growth cycle are not slow. It can be promoted very soon.

"Yes, Minister Lu nodded.

...

The Linlin Scenic Area had been in an uproar for the past two days.

Because the incident of the stall in the Botanic Garden had still been spread by people, everyone knew about it, and even many tourists knew about it.

The news about Liu Tang had also spread, accompanied by a popular meme: Because she had been in the rain before, she wanted others to be in the rain too.

Wasn't that so? Liu Tang's father died of an illness because he ate organic food, causing the family to fall into poverty. Now, Liu Tang was doing the same thing and making this kind of money without caring about other people's health being hurt. He would become like his father.

Qin Lin looked at the news about Liu Tang on his phone helplessly. To be honest, he didn't want this matter to blow up. After all, it was not good for the reputation of the scenic Area.

This incident also showed that Linlin Scenic Area did not do a good job in checking the surveillance cameras.

After watching the video, he left the office in frustration and went straight to the Linlin Manor's sales center.

There were already several sales centers in the Linlin Scenic Area, and the Linlin Manor was the earliest. Moreover, each sales center also had a lot of products imported from outside.

After all, with such a large number of tourists, Linlin Manor's goods were not self-sufficient.

Therefore, there were hundreds of manufacturers supplying the sales centers of Linlin Scenic Area alone.

linlin scenic area was also the largest sales assembly line in you city.

no supermarket's traffic could compare, so many vendors in you city racked their brains to put their products in the linlin scenic area's sales center.

After the Liu Tang incident, Qin Lin also wanted to know if there was any problem with the Linlin Scenic area's own sales center.

in such a situation, there might be people who would specifically go to the sales center of the scenic area to crack down on counterfeits, whether it was for the sake of profit or traffic. after all, there were many crazy people now.

Naturally, he did not want such a problem to happen to the sales center of his Scenic Area. Otherwise, it would become another super hot search. Linlin Scenic Area was too popular and famous now.

...

[Qingnan prestige biscuits: normal!]

[this is a mid-tier cookie. It's not cheap. Because there's a slight flaw in the quality, it can be purchased at an extremely low price. Many vendors will also send it to various shopping malls through the back door to achieve the purpose of selling it as soon as possible. It comes from Youcheng's West district's Chengcheng.]

Qin Lin had thought that there would be no problem with the sales center of his Scenic Area, but when he picked up a few products, he saw the remark. It seemed that everything was different from what he had expected.

[Huizhong juice: normal!]

[this is a low-end drink with a very simple production process. The cost is 2 yuan. It is produced in you City Red Land Industrial Park, No. 45]

Qin Lin looked at the position of the juice. It was a shelf for high-end drinks, which were sold for 25 Yuan.

This was obviously not right.

Moreover, he also found a problem. The problems he found were all from you city's manufacturers or sellers.

This seemed to be a very annoying question.

[Chapter 1543 708-How Did You Do This?](#)

there was a saying that the strongest city was often broken through from the inside, and this was clearly very reasonable.

Your city was now developing very fast by relying on the tourism industry. All industries were promoted, and it was getting easier to earn money.

However, just like the stall area, some places had rotted, and now it had rotted into the Linlin Scenic Area.

Some people had already become rat sh * t.

Qin Lin didn't allow this.

He didn't care about money. He didn't know how to spend the 40 billion that the higher-ups had spent on the technology, and Prince Tara had spent another 30 billion on the desert plant technology.

Money was just a number in his eyes.

Therefore, he didn't need to care about profits, and he definitely wouldn't allow such a thing to happen to his Scenic Area.

He was a little annoyed and called Lin Lanzi.

Lin Lanzi was in a management meeting at this time. After the Liu Tang incident was on the news, she naturally thought about what would happen if something happened to the scenic Area.

Therefore, she called for a management meeting.

The meeting had just ended, and he didn't expect his boss to call.

She hurriedly picked up the call and her face darkened when she heard the words on the other end of the phone.

After hanging up, he turned to a man and said, " Zhuang Lin, wait a moment. Come with me to the manor's sales center.

Zhuang Lin was the manager of the procurement department of the scenic Area. He was a native of your city and had been promoted step by step.

When Zhuang Lin heard Lin Lanzi's words, he was a little confused at first. He didn't understand why she suddenly went to the sales department. He even wondered if his Commission had been found out.

However, he quickly denied it. He had done it very discreetly and didn't leave any traces behind. It was impossible for him to be discovered.

He heaved a sigh of relief and followed Lin Lanzi to the manor's sales center.

When he arrived, he saw his boss, Qin Lin, and Chen dabe, the manager of the security Department. There were a few security guards beside Chen dabe, all carrying bags.

Lin Lanzi came to Qin Lin and said, "Chairman Qin, this is the manager of the procurement department, Zhuang Lin!"

Qin Lin said to Chen dabei without hesitation, " take him under control. After he's done explaining, hand him over to the police station of the scenic Area to handle.

Chen dabei nodded and led his men to grab Zhuang Lin.

Zhuang Lin was stunned. Sensing that something was wrong, he immediately struggled and said, "Why? I didn't do anything wrong."

Qin Lin looked at him coldly and took out a bottle of juice.

the cost is 2 yuan, produced in you City Red Land Industrial Park, No. 45 qinhuang.

As he spoke, he took out another box of flatbread.

"Is there a flaw in this pancake? Was it about to expire, or was there a problem with the materials? it comes from the wufu in the west street of you city."

As he spoke, he took out one product after another.

These products were more or less problematic. Although the problem wasn't big, they shouldn't be included in the sales system of the scenic Area. After all, the scenic Area was high-end and high-quality.

In other words, the procurement department definitely had some problems with these products. As the person in charge of the procurement department, it was impossible for Zhuang Lin to not have any problems at all.

"How did this happen?" Zhuang Lin's legs went soft when he saw Qin Lin take out the products one by one and even accurately point out the source of these products.

He didn't understand how things had suddenly happened. He had been very subtle, and those people had promised him.

It was impossible for those people to cut off their source of income to snitch on him.

Moreover, it was normal for one or two problems to be discovered. How did all the problems in front of him be discovered, and even the source was found out?

the most important thing was that they had already investigated so thoroughly, but he did not sense any movement at all. how could such a thing happen?

[Chapter 1544 The National Style Transformers!](#)

In the Linlin Scenic Area security Department office.

Chen dabei sat to the side and watched as Ma Hong interrogated Zhuang Lin.

After all, the boss wanted Zhuang Lin to be honest.

He was not good at interrogation.

However, he knew very well that Ma Hong was an expert in such matters. It seemed like those international thieves would confess everything once they were interrogated.

naturally, Zhuang Lin couldn't withstand Ma Hong's interrogation. It could even be said that he was on the verge of a mental breakdown. He didn't understand how things had suddenly turned out this way, and he didn't even have the time to react.

"Manager Chen, this is the other party's order." Not long after, Ma Hong handed over a set of information to Chen Dabai.

Chen Dabai took a look at the information and was a little surprised. He immediately took out the bags of products and compared them with each other. Then, the expression on his face became more and more surprised.

Because the products in Zhuang Lin's statement were exactly the same as the ones that the boss had found.

The boss was a God.

After Ma Hong left, two more people came to the security office.

One of them was Director Hong of the Scenic Area, and the other was Chu Feng.

Chu Feng's status in the Quan Jin law firm was getting higher and higher, and the specific reason was naturally because of Linlin's business.

Therefore, he often came to your city to deal with related legal matters. Linlin company was getting bigger and bigger, and there were more and more legal businesses. He almost always came with a team.

In addition, the Quan Jin law firm would also send a few permanent lawyers to your city to deal with Linlin's company.

This time, he had just brought someone to deal with the documents and found out about the Linlin Scenic Area incident. He immediately rushed over to deal with it.

To be honest, it was a bit of a waste to let a great lawyer like Chu Feng handle this kind of case.

However, this also meant that someone was going to be unlucky. After all, this kind of rebate case could be big or small, and it all depended on the lawyer's ability.

Moreover, Zhuang Lin wasn't the only one to be sued. The manufacturers that had given Zhuang Lin kickbacks were also going to be sued.

After Chu Feng understood the ins and outs of the matter, he immediately called his lawyer to prepare the letter of complaint.

Naturally, Qin Lin also handed over the information of those manufacturers to Chen Li.

So, very quickly, a piece of news came out. "Your city conducted a large-scale inspection of the production of goods and seized many problematic videos. For such behavior, your city will not tolerate it and will deal with Wuwu."

When this news came out, it indeed caused a sensation. However, Chen Li had also turned this bad thing into a good thing. At least, the comments online were mostly good.

You Cheng didn't cover up the matter and instead dealt with it in public, which made countless tourists like it.

As for whether or not there was someone secretly guiding the evaluation, it was unknown.

After that, Qin Lin didn't care about this matter anymore. After all, he had found the problem, and Lin Lanzi knew how to deal with it. Otherwise, she would be completely unqualified as the person-in-charge.

Linlin Manor.

Qin Lin, on the other hand, had been waiting in the parking lot since early morning.

Because Minister Lu had already called, academician Hao, academician Zhu, and academician PEI were coming over again.

He really admired these three old academicians.

That was why he activated the moonstone for the three academicians. The three academicians' abilities were indeed admirable. They were able to develop a new rocket technology after just one attempt.

Soon, a fleet of cars arrived.

The car stopped, and Minister Lu came out with three old academicians.

"Minister Lu, I've been waiting for you for a long time." Qin Lin hurriedly went up to him. He then said to the three old academicians with a hint of respect, "Three old seniors, we meet again."

"Boss Qin, we meet again. We missed you so much," academician Hao replied with a smile.

"Yes, in the hospital, we've been listening to your achievements, boss Qin," academician Zhu said.

"Boss Qin," academician PEI said, "your continuous achievements have really shocked us old guys."

Qin Lin heard the praise from the three seniors and hurriedly shook his head. "The three seniors must be joking. How could my little achievement be praised by the three seniors like this?"

Academician Zhu directly shook his head and said, "Boss Qin, if this is a small achievement, how many researchers would be ashamed?" They might as well just hang themselves."

To be praised by an old senior like academician Zhu, it was enough to show that Qin Lin's achievements were really amazing.

While they were chatting, a man with a headscarf suddenly got out of a car. It was Prince Tara.

"Academician Qin, we meet again." Prince Tala ran to Qin Lin excitedly.

"I didn't expect you to be able to cultivate the chickpeas so quickly and let them survive in the desert."

"Boss Qin," Minister Lu explained, "Prince Tala came here specifically for the chickpeas. If possible, he would like to stay in the manor for a while. Naturally, he would like to see the chickpeas often."

"That's not a problem," Qin Lin nodded with a smile.

we can go and take a look now, " academician Hao said. I also want to see the 10 billion-Yuan chicktooth bean sprout.

Minister Lu also looked at Qin Lin with pleading eyes. Qin Lin naturally wouldn't refuse. He led his men to the simulated desert field.

At the same time, he also informed Ma Hong to come and protect them. After all, Minister Lu and the three old academicians were not ordinary people.

In fact, even without Qin Lin's reminder, Ma Hong was already there with his men when Minister Lu and the others arrived. He was a professional.

[Chapter 1545 The National Style Transformers!](#)

Soon, the group arrived at the simulated desert field and saw the seedlings inside.

With the constant mutation of seeds in the desert, the simulated sand farm had more and more seedlings.

Among them were a dozen or so chicktooth bean sprouts.

Academician Hao, academician Zhu, and academician PEI walked to the front of the sand farm and looked at the seedlings inside with surprise on their faces.

they knew about boss qin's achievements in plants. they had also learned from minister lu that boss qin seemed to have the ability to do whatever he wanted with plants in the desert.

It seemed that boss Qin wanted some kind of plant to survive in the desert. As long as he cultivated it, the plant would soon be able to survive in the desert.

The plants in the simulated desert sand farm were the best proof.

To be honest, before boss Qin's research on this project, there was no plant in the world that could survive in the desert.

But now, boss Qin had cultivated so many of them at once, not to mention that these plants were still thriving.

This was absolutely unbelievable.

prince tala naturally recognized the eagle tooth bean sprouts. after all, they were his favorite plants, so he immediately ran to the dozen or so eagle tooth bean sprouts and exclaimed, " "It's real, it's really a sprout of ivory beans. It's really grown in the desert. Academician Qin, you're amazing. 10 billion for each, I can give you the money immediately."

His words immediately made Minister Lu, academician Zhu, academician Hao, and academician Fei look at him.

Asking for 20 billion right off the bat was shocking even for them, okay?

One must know that in the Chinese Academy of Medicine, 20 billion was definitely a big research project.

Now, this Prince with a scarf on his head had asked for 20 billion as if the money did not belong to him. He said it so easily.

Moreover, they all knew about boss Qin's ability to cultivate plant genes, so in their eyes, Prince Tala was a fat sheep, rushing to give boss Qin money.

he could only sigh at how easy it was to earn this money.

But thinking about it, only boss Qin could earn this money. After all, no one had the ability to cultivate plants like boss Qin.

However, Prince Tala did not seem to know this.

Naturally, the three of them looked at the headscarf on each other's head. Perhaps they knew, but they didn't care.

The three old academicians observed the plants in the sand farm and were amazed. They were even more amazed that boss Qin was really a foodie, just as Minister Lu had said.

Most of the seedlings in the sand farm were really gluttons.

after observing the sand farm, they returned to linlin manor with qin lin.

As soon as they arrived at the manor, Qin Lin called Gao Yaoyao over. "Go and tell Master Lin to prepare the ingredients. Tell him that I'm going to personally cook medicinal dishes to entertain the three old seniors."

"Okay, boss!" Gao Yaoyao nodded immediately and went to the kitchen.

The three old academicians' eyes lit up when they heard this.

what an honor, " academician Hao said with a smile. I'm able to eat boss Qin's personally made herbal dish as soon as I come here.

Academician Zhu and academician PEI also nodded.

yes, I miss the herbal dishes made by boss Qin. The National banquet chefs in Beijing can't even compare to boss Qin's cooking.

"I've eaten it once before, but I can't forget boss Qin's herbal dishes."

They were obviously looking forward to it. No one could resist the temptation of such a delicious dish.

Minister Lu smiled and said, " academicians, you might be surprised this time. Boss Qin's cooking skills have improved. The herbal dishes are more delicious than before.

"really?" "Then I'm looking forward to it," academician Hao said in surprise.

Academician Zhu and academician PEI were also looking forward to it.

They had eaten boss Qin's herbal dishes before and knew how delicious they were. They couldn't imagine how tempting it would be.

When it was close to noon, Qin Lin went to the kitchen and began to cook. He made a pot of Emperor's Supreme medicinal cuisine. After adding the Magnolia spice, this pot of medicinal cuisine also reached the level of quality 4.

naturally, this pot of medicinal cuisine also made academician hao, academician zhu, and academician pei exclaim in surprise, and they almost bit their tongues.

After eating the herbal dish, they finally understood what Minister Lu meant.

Compared to before, the taste had simply risen to another level.

"Academician Qin, I want to tip you again." Prince Tala wiped the corners of his mouth without a care for his status. He was about to throw money away again, but Qin Lin stopped him.

After all, this guy still wanted to give him 20 billion. He was still considering whether to agree to it, so he didn't care about the 100 million.

At the end of the meal, Minister Lu suddenly said, " "Boss Qin, I'm here to get the three old academicians to recuperate in the manor, but I also need to get rid of you for something."

Qin Lin nodded. Minister Lu, with our relationship, just tell me if you need anything. I'll try my best to do what I can. I can't do anything if I can't.

boss Qin, " Minister Lu said with a smile. this shouldn't be a difficult task for you. Didn't you create Optimus Prime and Megatron before? " These two big guys are very useful, but they're not from our country."

" originally, i wanted to let the people in the courtyard try to create their own appearance with our own country's characteristics. unfortunately, the people in the courtyard are not up to expectations and have no results so far. "

"so, i can only rely on you for this matter, boss qin."

Qin Lin was shocked when he heard this. How the hell did he know how to do this?

optimus prime and megatron were only able to come out because elba, the little goblin, was playful. if he were to do it, what could he do?

He couldn't even understand a mechanical part.

however, he didn't reject her completely. instead, he said, " " minister lu, i'll give it a try, but i can't be sure of the time. after all, i still have other research to do. "

After all, with the Goblin as a cheat, there might be a way.

If he could, it would be a simple matter. After all, he didn't have to pay any price for it. At most, he would just pretend to inadvertently give Elba some videos.

At that thought, Qin Lin came up with a plan. Of course, the premise of the plan was to enter the game and meet Elba.

He didn't know how many times he had gone in, but he had never seen the Goblin.

After the meal, Qin Lin welcomed Minister Lu and the others. He brought them to make some tea and asked Gao Yaoyao to arrange accommodation for them. Meanwhile, he started to search for some videos online.

Optimus Prime and Megatron's appearances did not have any national style, but he remembered that there were many National-style special effects videos on the internet.

If he could get the video down and send it to Elba, maybe Elba would beg the Father of the number one Goblin craftsman to make it.

At that time, he could just wait to check the price.

Sure enough, after searching for a while, he found a video of a special effects master. Almost all of his videos were about Transformers.

Of course, his Transformers were different from worldwide's. He created his own special effects, so the same Transformers would all look different.

Among them were the appearances of Sun Wukong, Erlang Shen Yang Kuai, Bull Demon King, and so on. The transformation process in the special effects video was super cool, and the appearance was also very cool, not inferior to the Transformers in worldwide.

In fact, because of the National culture, many netizens even said that these National-style Transformers were more handsome than worldwide's.

Qin Lin immediately downloaded the videos and brought them back to his office in the inner area. He locked the door and entered the game with a thought.

Now, he could only hope that these videos would work and attract Elba's interest.

He immediately left the farm and walked along the damp forest where the gnomes had appeared. It took him half a day to pass through the forest. When he reached the wet forest, he heard some sounds.

Qin Lin's eyes immediately brightened. He hurriedly walked into the damp forest and saw the scene inside.

When he saw Elba and the scene inside, his eyes immediately showed surprise.

[Chapter 1546 You've Even Made This Thing?](#)

When Qin Lin entered the damp forest, he could see Elba controlling a sky-supporting pillar.

Besides Optimus Prime, Megatron and a yellow mech were standing next to Elba.

If it wasn't Bumblebee, then what was it?

Elba had more toys now, and his old man had even brought out Bumblebee.

Moreover, Bumblebee looked better than Optimus Prime and Megatron.

Given enough time, Elba would have a full set of Transformers toys.

Moreover, his full set of Transformers would probably make all the children in the real world envious, jealous, and hateful. After all, who wouldn't be envious?

Even adults would be envious and jealous of this toy.

Qin Lin's appearance naturally attracted Elba's attention.

"My good friend, you're here again?" Elba immediately walked over to Qin Lin.

Elba, nice to meet you again! Qin Lin greeted him with a smile. you have a new toy!

Elba, however, shook his head. what a pity. I don't really like the shape of these Transformers. My good friend, can I ask you for a favor? "

Qin Lin was stunned when he heard this. Was this a disguised task?

"Elba," he asked hurriedly, "I wonder what you need my help with?"

Elba also stated his purpose. can you help me find some videos of Transformers? but I want one in the shape of an animal, because I'm a Goblin who likes animals.

" ? ? ? ? "Qin Lin was stunned.

Wasn't this sending himself to the door?

When you're sleepy, you get a pillow.

Didn't he bring Sun Wukong and the Bull Demon King's transformation diamond this time?

Before he came in, he was still thinking about how to attract Elba and make him interested in this national style transformer. Who knew that Elba would bring it up himself?

This would save him a lot of time.

Most importantly, he had the initiative now.

Elba had made this request himself, so did that mean he could state his conditions?

Elba seemed to see that Qin Lin was in deep thought and thought that it would be difficult, so he immediately said, " when the time comes, I can even steal dad's design for you. If you have any requests, I can do it. I can also vote for you for Bumblebee's design, Yingluo.

Elba immediately promised.

Qin Lin's heart was full of smiles. He was even more clear that it was better to be in the leading position when discussing matters.

Otherwise, he would have to pay a higher price if he was in a weaker position.

Now that he was in the leading position, the one who was anxious was Elba, and he had achieved his goal without saying anything.

Elba, I'll go back and take a look at this, " he said immediately. I'll try my best. As for whether there'll be a video like that, I'm not sure.

"Then I'll really have to trouble you!" Elba said hurriedly.

"Alright," he said. Qin Lin agreed with a smile, then pretended to leave the wet forest.

In fact, the Transformers video of Sun Wukong and the Bull Demon King was on him.

He could take it out directly.

However, in order to make elbado wait, he was not in a hurry.

Therefore, he also strolled around the surrounding forest, deliberately dragging out the time.

However, as he walked around, Qin Lin was suddenly attracted by a forest. The trees in the forest were very strange. They were all only one meter tall, with branches that were crisscrossed and crossed in a special way.

Moreover, it seemed that every tree looked almost the same, as if they were carved from the same mold.

This situation was somewhat unbelievable.

The leaves of the trees were also colorful.

This was not the strangest thing.

The strangest thing was that he found that the tree was covered in bread.

Yes, it was bread.

Qin Lin was dumbfounded.

Although " the story of the farm " was a fantasy-like farming game that even included creatures like goddesses and Kappas, wasn't growing bread on a tree a little too magical?

qin lin couldn't help but walk forward curiously and see more clearly.

Not only were there long loaves of bread on the tree, but the bread was also multicolored and oval in shape, with the tips connected to the branches.

This was very magical.

Qin Lin curiously picked up a piece of bread and immediately saw the remark:

[sand pistil fruit: Grade 2]

[a type of fruit that looks like bread. The skin is soft and the flesh is loose, but the taste is excellent. It also has the taste of fruit bread, so it is also called breadfruit: Taste +1, nutritional value +2, growth speed +2!

[environmental restrictions: limited by the soil of the equator environment. After planting, it will adapt to the soil of the equator environment and will not be able to survive in other environments. Therefore, please consider carefully before planting.]

After reading the notes, he finally understood why the fruit looked like bread.

Qin Lin immediately picked one and put it in his mouth. He chewed it. As the remark said, it felt a little like fruit bread.

This was a little magical.

The key was that the bread had A +2 nutritional value attribute and was only one meter tall, which could be grown at home.

Many office workers didn't have time to eat breakfast in the morning. Many children went to school, and parents had to get up early to make breakfast. It was a very painful thing.

It would be a completely different story if he had the sarin fruit. He could just plant one at home and pick one in the morning to eat. It had A +2 nutritional value attribute, which was better than anything else.

[Chapter 1547 You've Even Made This Thing?](#)

The +1 texture attribute would definitely be better than any bread.

The key was the +2 growth speed attribute, which meant that planting was easy to promote.

Although this thing wasn't as amazing as the plants from before, one thing was for sure. If it were in Western countries, it would be crazily sought after.

Unfortunately, this thing also had environmental restrictions.

Limited by the equator, it probably meant that the plant could only be grown in the country it was first grown in. It was impossible to grow it in other countries.

Our country is located in the eighth District of the East, at 3 ° 52 north latitude. If the equator of this area is used as the boundary, then the stamen fruit can only be planted in this area. At most, it can be planted in some areas around our country, but it can't be planted in other places.

He liked this restriction very much. After all, this kind of thing would definitely be stolen after being planted on a large scale.

This was different from the tea tree that treated cancer.

After all, cancer patients were only a small number. So, as long as they planted it in you city, they could meet the needs of cancer patients in the country and even export it to other countries.

After all, you city itself was an area rich in tea planting, and the area for growing tea trees was very large.

Therefore, such a small area could be controlled. Although he didn't know much about it, he knew that there were special soldiers patrolling around the area where the cancer treatment tea trees were planted.

now, there were soldiers standing guard at the station and the expressway entrance to you city. they claimed that it was because there were too many tourists and wanted to maintain order, but he knew the reason. it was a special arrangement by the higher-ups.

but the stamen fruit was different.

Once this thing was taken out, it would definitely be promoted on a large scale. It might even become the mainstream breakfast in the country in the future.

this plant had been planted all over the country, so it would definitely be stolen, especially by those people in the west.

at that time, it would be very easy to get the seeds and saplings of the sarin fruit.

However, due to the environmental restrictions, the Westerners had no way to crack the cultivation system. After all, it was something created by cheats and was not easy to cultivate.

When the other party stole it and was rejoicing, he would be dumbfounded if he planted it.

Thinking of this, Qin Lin hurried out of Mount goddesses and returned to the ranch. He took out the transplant pot he had prepared earlier, brought the tools, and went to the sand pistil fruit forest again.

He immediately dug out a few sand stamen fruit trees that had just bloomed, or one or two that had just borne fruit of disaster, and transplanted them into the flower pot.

The soil in the flower pot was naturally special soil to ensure the survival of the sand pistil fruit tree.

As for the sand pistil fruit that had one or two fruits, Qin Lin had also picked and eaten them before he slowly moved the sand pistil fruit trees back to the farm.

Fortunately, the tree was only one meter tall, and he had eaten two fruits of the tree of power. Otherwise, he wouldn't be able to do this.

But even so, he was covered in sweat when he was done.

Then, he looked up at the sun in the sky and felt that it was time. He returned to the damp forest again. It was time to meet Elba, hand over the video, and make a deal.

When Qin Lin returned to the wet forest, Elba was still there, operating Bumblebee.

Seeing him return, Elba hurriedly went up to him. Seeing him sweating profusely, he immediately said, "Friend, why are you sweating all over?"

Qin Lin smiled. I went to great lengths to find the video. In order to send it to you, I rushed here. That's why I'm sweating all over.

Elba was so touched by his words that he wanted to die. you're really a good friend. Thank you so much.

"Elba, since we're friends, there's no need to thank me," Qin Lin said politely. "I'll show you the video. Take a look!"

As he spoke, he took out the tablet he had brought in, turned on the video, and showed it to Elba.

Elba also turned on the video at once. At the beginning of the video, a road covered in clouds appeared.

then, there was the sound of a car.

Then, he saw a golden sports car speeding over.

This sports car was very cool. It wasn't something that could be found on the market. It was a model that the blogger had designed himself. It could only be said that the owner had some ability in terms of special effects ...

Of course, some people wondered why no car manufacturers were interested in it. This was a problem. All car products had an external appearance that served the internal structure. Only when the internal collusion was done could the external design be possible.

If they first designed the exterior and then designed the internal structure for the exterior, the car manufacturer must be crazy.

The cool sports car charged out and appeared in the center of the video. The sports car leaped up and then underwent an even cooler transformation.

The transformation process attracted Elba's attention. Then, he saw a great sage equal to heaven's transformer appear and land on the ground with a somersault.

He saw the great sage sun reach behind him and a golden cudgel appeared in his hand.

"Monkey? man kiking?" Elba cried out in surprise, and actually began to clap.

Monkey King; This was the English name for the Monkey King.

Qin Lin was surprised that Elba knew about the Monkey King, but it didn't take long for him to understand.

The story of the farm was originally a product of the plaster nation. The plaster nation also had a story from Journey to the West and a story from the Monkey King.

The new version was based on the old version, so it wasn't strange that the story of Journey to the West was included.

Therefore, it was normal for Elba to recognize Sun Wukong.

Looking at The Great Sage, Heaven's Equal's transformer in the video, Elba was already applauding wildly.

Obviously, this was beyond his expectations. He just liked animals and wanted a transformer in animal form. Who knew that his good friend would get him a divine monkey?

then, he clicked on the next video. it was a black sports car with a protruding horn on the front of the car and a bull-headed logo in the middle. it looked a little like a lamborghini, but it was not a lamborghini.

Moreover, the car model was also not available on the market.

The black ox-cart came out and transformed as well. After the cool transformation, a Black Ox-headed transformer appeared, holding a huge axe in its hand.

He was the Bull Demon King.

the third video was naturally god erlang's. the model of the video was a cool blue sports car. after the cool sports car transformed, erlang's transformer also appeared in elba's eyes.

this is great, this is great! I want daddy to make them all! elba said excitedly and expectantly.

But he also remembered something and immediately said to Qin Yang, "My good friend, do you have any requests? i can give you the bumblebee's design first."

as he spoke, he took out a stack of designs and handed them to qin lin. they were bumblebee's designs.

bumblebee design: special

[this is the Bumblebee blueprint created by the first Goblin artisan. With this blueprint, you can create Elba's toy-Bumblebee!

[because it's a toy, it doesn't have the soul of a real transformer. It still needs someone to control it with a sensor.]

Qin Lin saw the message as soon as he got the blueprint.

Elba, " he said bluntly, " if your father can make the great sage equal to heaven, the Bull Demon King, and Erlang Immortal King's Transformers, remember to give me the drawings and send them to my farm. Is that okay? "

Qin Lin added at the end. After all, he had come to find Elba himself, so he had no idea when Elba would be there.

This was the first time he had seen Elba after coming in so many times.

Who knew when they would meet Elba again?

asking elba to send him to the ranch now was like sitting on the fishing boat.

Elba was very happy now and did not refuse. He immediately agreed, " "Alright, I'll send it over when the time comes."

when elba finished speaking, another goblin girl suddenly appeared. she seemed to be elba's little girlfriend.

This little girlfriend had a cute and adorable thing with her.

Qin Lin's eyes widened in surprise when he saw the item. "You even managed to get this thing out?"

[Chapter 1548 711-This Is Big White! _1](#)

Qin Lin looked at the White figure in surprise.

If this wasn't da Bai, then what was it?

It was exactly the same as the movie.

Elba, thank you so much for your gift. I really like this big white. the goblin girl happily hugged elba and gave him a kiss.

seeing this, qin lin made another request. " "Elba, this big white seems to be very cute!"

Elba immediately said,"my good friend, you think so too, right?" after my dad made this for 9th mom, she really liked it. the other mothers also wanted it, so i asked dad to make one for me. "

Qin Lin looked at the little goblin girl. Elba asked his father to finish it so that he could give it to his little girlfriend, right?

This guy had a bright future.

thinking about it, with a good father as a role model, she already had nine mothers.

Qin Lin was just about to ask about Great White's design when Elba said, " "My good friend, do you want da Bai's design? I can go to dad's place and steal it for you."

Qin Lin's eyes lit up when he heard this. He had been waiting for you to say this.

"Elba, thank you so much," he said, nodding.

Elba was also very decisive. He immediately got up and walked inside, disappearing in the blink of an eye.

Qin Lin didn't even have time to catch up.

He wanted to follow them into the Goblin's house, but Elba's speed was so fast that it was somewhat magical.

He didn't know if it was due to the restrictions of the game.

Qin Lin had no choice but to walk towards the Goblin girl and asked, " "Can you show me the effects of this white?"

The Goblin girl was very polite, and she nodded before fiddling with da Bai.

A moment later, da Bai's voice was heard. Hello, I'm da Bai, your personal health assistant. When you say 'ouch', I can sense that you need medical care!

This familiar voice made Qin Lin's eyes light up even more.

This was da Bai from the movie.

He suddenly thought of making a da Bai for Zhao moyin and little Qin Feng, especially little Qin Feng, who would probably like it very much. He just didn't know if little yang, the crocodile, would be angry and fight for da Bai's favor.

It didn't take long for Elba to return with a stack of designs.

"Good friend, this is for you." elba handed the design in his hand to qin lin.

[big white design: special!]

[this is a special design for big white. It's a design made by the number one Goblin craftsman. You can make big white by following the design!]

Qin Lin quickly put away the design. This was an unexpected gain.

The Goblin technology was indeed amazing.

Otherwise, it would have been impossible to create something like Da Bai with modern technology.

With the items in hand and his goal achieved, Qin Lin bid Elba farewell. Now, he was waiting for Elba to send him the designs of the Great Sage Equal to Heaven, Bull Demon King, and Erlang Immortal Transformer.

Qin Lin retraced his steps and returned to the farm. With a thought, he brought Da Bai's design out of the game.

After that, he returned to the game and moved the transplanted sand pistil fruit trees out of the game.

These sand stamen fruit trees would definitely cause a storm in the country in the future. Therefore, he called Yu Shui immediately and asked her to bring people over to help transplant them.

Yu Shui went to the inner area of the manor immediately and brought two experts from the plantation department.

"Chairman Qin, do you have any orders?" Yu Shui said as soon as they met.

Qin Lin pointed at the sand stamen fruit trees. "Yu Shui, move these trees outside the manor's hall,"

Yu Shui subconsciously looked at the sand stamen fruit trees. He was a little surprised because he had never seen such fruit trees before.

After he was in charge of the plantation Department, he had done some research on various fruit trees.

The two experts from the plantation Department were also a little surprised.

They had a deeper understanding of all kinds of fruit trees, but they had never seen this kind of fruit tree before and could not tell what kind of fruit tree it was.

However, since their boss had given the order, they wouldn't ask too much. Everyone in the plantation Department knew that their boss was an expert in plant genetics.

This might be the fruit tree that the boss had just cultivated ...

Yu Shui led her people and moved out. It took some time for all the sand pistil fruit trees to be transplanted outside the hall.

After that, Qin Lin also found Gao Yaoyao and instructed her, "Yaoyao, remember to water these fruit trees every day."

Yes, boss! Gao Yaoyao nodded and replied seriously. Sure!

After Qin Lin made the arrangements, he returned to the inner area and took out two stacks of design drawings to check.

First, it was Bumblebee's design.

Bumblebee's design was similar to Optimus Prime and Megatron's. Even if Qin Lin was not an expert in Mechanical Engineering, he had at least seen and studied it before, so he could more or less make comparisons.

Therefore, he put it aside after checking Bumblebee's design.

After that, he picked up da Bai's design and examined it.

Da Bai seemed to be simpler than the Transformers, but in reality, it was more complicated.

Da Bai's design structure was simple, but the materials required for its design were not simple. It was definitely not a purely mechanical design for Transformers.

Da Bai's outer shell was made of a type of mutated tree sap, which needed to be synthesized using a special method and then produced using a complicated technique.

[Chapter 1549 This Is Da Bai! 2](#)

This material not only had a very strong defensive ability, but it also had a very strong shrinking function.

Also, da Bai's internal structure was made of some kind of polyethylene material, which wasn't something that modern technology could provide.

Da Bai's designs were all about the techniques to make these materials.

but when he read the last part, qin lin frowned.

That was because it was a problem regarding da Bai's system. Everyone knew that da Bai's system was an artificial intelligence.

Previously, when he saw the Goblin girl display da Bai in the damp forest, he thought that da Bai was using artificial intelligence. He didn't expect it to be the case.

Qin Lin saw that the design for da Bai's AI was filled with scribbles and scribbles. There was also a crystal material marked on the design, but he couldn't understand it at all.

What the hell was this?

Qin Lin picked up the design and looked at it with the eye of truth. He was dumbfounded.

[Goblin rune description: mysterious!]

[these words are written in a type of Goblin rune. There seems to be some special Goblin rune technology recorded in it. It seems to be able to create similar artificial intelligence without any harm. This rune technology can only be understood by the Goblin. It seems that outsiders can't understand it at all.]

" ? ? ? "Qin Lin was completely dumbfounded. What was he supposed to do?

He didn't even understand Goblin runes.

In other words, he could only create an external appearance for da Bai, but he couldn't create an intelligent one?

Moreover, even if he understood the Goblin rune technology, he couldn't take it out. There was no way to explain the Goblin runes.

Qin Lin studied it for a long time and finally sighed.

However, even if it was only for the appearance, da Bai had to do it because da Bai had all kinds of medical abilities. These medical skills were very useful, especially the companion function.

Elba's father was going to give this big white to his wife. It had all the accompanying functions and all the silly and cute functions.

By then, he could spend money to hire someone to make an intelligent system.

After all, intelligence technology was developing very well now. Although things like little du could not be considered artificial intelligence, they could at least be used, right?

Moreover, even if these things didn't work, he could still ask for help from Minister Lu. The artificial intelligence of the Chinese hospital was definitely stronger than the ones outside.

Thinking of this, Qin Lin took out his phone and called professor Lin.

In Linlin's laboratory, professor Lin was working on the Goblin Gloves with some people. Because of the Goblin Gloves, he had also developed the ice-sealing technology and the urban snow technology.

these two technologies had made professor lin famous.

After that, he helped Qin Lin make Optimus Prime and Megatron. It could be said that in the domestic scientific community, at least everyone knew that in addition to academican Qin little and academican Li Kai, professor Lin also came from the Linlin laboratory.

However, professor Lin knew very well that this was all given to him by Chairman Qin. If Chairman Qin didn't give him the technology to crack it first, he would be nothing.

When he saw that his boss was calling, he immediately answered, " "Chairman Qin, do you have any orders?"

"Come to the manor," Qin Lin ordered.

Professor Lin did not hesitate. After hanging up the phone, he went to Linlin Manor.

Qin Lin went to the office to pick up professor Lin. He first handed the Bumblebee design to professor Lin. "professor lin, please help me make this bumblebee first."

Professor Lin took the Bumblebee's design and nodded.

He was quite confident in this kind of item. After all, he had already made Optimus Prime and Megatron.

Professor Lin took the blueprint and left.

Qin Lin didn't give professor Lin the blueprint for big white. He planned to wait until professor Lin had created Bumblebee. Besides, without an intelligent system, he didn't want to reveal big white for the time being.

professor lin returned to linlin's laboratory and immediately went to the special laboratory building. he gathered the research team and began to look at the design plan.

He could only make Bumblebee if the mold was produced first.

With his previous experience, everything was very simple. It didn't take long for him to create Bumblebee, which also required a special sensor to control.

With his previous experience, it would be easy to train another operator.

After Bumblebee was ready, professor Lin informed Qin Lin immediately.

After Qin Lin got the news, he also called Lin Lanzi and took her to Linlin's laboratory.

"Chairman Qin, what did the lab come up with this time?" lin lanzi was considered experienced. she knew that if her boss brought her to linlin's laboratory, it meant that there was something good.

"You'll know when you see it." Qin Lin said and brought Lin Lanzi in. As soon as they entered, they saw the giant hornet transforming.

"Bumblebee?" Lin Lanzi was surprised.

She had watched Transformers before and was naturally familiar with Bumblebee. When she saw Bumblebee, she knew that Linlin Scenic Area was going to be on the hot search again.

Although Optimus Prime and Megatron had already appeared, it was still shocking to see Bumblebee.

Moreover, Bumblebee's popularity in the Transformers series was higher than Optimus Prime and Megatron.

Otherwise, universal wouldn't have specially made an independent film for Bumblebee.

Chairman Qin, " professor Lin greeted him. the testing of Bumblebee is almost done. It can be sent to Linlin Scenic Area tomorrow.

Qin Lin nodded and said to Lin Lanzi, chief Lin, let Bumblebee appear at the entrance of the scenic Area tomorrow. Remember to make the necessary arrangements.

Lin Lanzi nodded. okay, Chairman Qin. I'll make the arrangements.

After checking on Bumblebee, Qin Lin also left the laboratory with Lin Lanzi. After Lin Lanzi returned to the office in the scenic Area, she found the multimedia department and gave some instructions.

In the evening, the official account of Linlin Scenic Area posted a video, " tomorrow, there will be another surprise at Linlin Scenic Area!

Once this video was released, with the popularity of Linlin Scenic Area, it immediately became a hot topic.

many of the tourists had seen the video. because of the previous performance of the linlin scenic area, everyone was looking forward to it.

Minister Lu also saw the video. He was now very concerned about the videos of Linlin Scenic Area. He realized that sometimes, boss Qin's big moves could be seen in the news of the scenic Area first.

Prince Tala, Dongfang Tong, also saw the news. He hurriedly went to Minister Lu and asked, " "Mr Lu, there seems to be an event at the Linlin Scenic Area tomorrow. Can we go and take a look?"

He was obviously looking forward to it, but due to his special status, he had made an agreement with the higher-ups to follow Minister Lu's arrangements.

Minister Lu was also curious. He nodded and said,"But you have to wear a mask and a hat. You can't wear a headscarf, and you have to change your clothes."

What a joke. If Prince Tara went out of the scenic Area with a headscarf, tourists would definitely surround him. People were still talking about how he paid for the food.

Time passed, and the second day arrived.

It was early in the morning, and it was obvious that there were many tourists coming to the scenic Area. The number was obviously higher than before, and they were obviously attracted by the video.

However, when these tourists arrived at the scenic Area, they obviously looked puzzled because they didn't see anything different about the scenic Area. There didn't seem to be any signs of activity.

This confused many tourists.

At the same time.

A yellow Camaro sped through the third ring Road of you city.

Camaro was Bumblebee's car, a very delicate and beautiful sports car.

After the Camaro entered the third ring Road, it quickly attracted everyone's attention. After all, this kind of sports car was really rare in China. Because it stopped selling very early, it was rarely seen on the market.

A Ferrari was driving. When it saw that it was overtaken by Corona, it couldn't help but take a few more glances. It even stepped on the gas pedal and chased after Corona.

The Ferrari's owner was a young man and a sports car enthusiast. He immediately recognized that the two Camaros were limited edition.

The Camaro sports car had stopped selling a long time ago. Although there were a lot of ordinary ones, there were very few limited editions like this.

The young man obviously wanted to see what kind of person the owner of the car was.

However, when he accelerated and drove alongside the two Camaros, he was dumbfounded when he looked at the driver's seat.

There was no one in Camaro's driver's seat. It was empty.

This car was unmanned?

[Chapter 1550 This Is Definitely A Scammer \(1\)](#)

The young man was shocked. He couldn't believe it. There was no driver and this car was driving by itself?

He immediately thought of autonomous vehicles.

Now, many car dealers were promoting the autonomous vehicle technology.

but thinking about it, it didn't seem right. although autonomous driving technology was highly praised, it was absolutely impossible to be so smooth on a busy road.

Just this year alone, many people had lost their lives because they believed in autonomous vehicles too much.

The young man suddenly had an idea.

He immediately said to the girl in the passenger seat, "Baby, this car is not simple!"

"How is it not simple?" The girl had a pair of long legs and asked doubtfully. She had been holding her phone the whole time and didn't pay attention to the scene inside the Camaro.

this is you city, " the young man replied. Linlin's laboratory is here.

He thought of a possibility and immediately followed in his Ferrari.

As he moved forward, just as he had expected, Camaro went straight in the direction of the Linlin Scenic Area and entered the entrance.

The young man understood that it was Bumblebee.

This might be the surprise that Linlin Scenic Area was talking about. Linlin's laboratory had created another transformer.

At the entrance of Linlin Scenic Area.

More and more tourists arrived, but the scenic Area was as usual, and no one noticed anything unusual.

It seemed that the surprise at Linlin Scenic Area this time was a little mysterious.

When Prince Tara and Minister Lu arrived at the entrance of the scenic Area, they also looked around.

minister lu knew about the linlin scenic area.

According to the customs of the scenic Area, there would definitely be a prompt at the entrance when there was a new activity.

There was nothing at the entrance of the scenic Area.

"mr. lu, where do you think the surprise will be?" prince tala asked.

minister lu shook his head.

At this moment, one of them noticed that there seemed to be a staff member fiddling with the filming equipment at the entrance of the scenic Area.

As soon as the equipment was set up, Optimus Prime and Megatron seemed to have noticed something as well. They looked in the direction of the scenic entrance at the same time.

This attracted the attention of even more tourists, and they all looked towards the entrance of the scenic Area.

At this moment, a yellow Camaro could be seen driving over. The two sides seemed to be working closely together.

The Camaro sports car was really attractive.

To the tourists' confusion, the Camaro drove straight into the entrance of the scenic Area.

This was not logical.

Because the security guards wouldn't let them, they would stop them and they could only go to the parking lot.

How did this car get in? There was even a Ferrari behind them.

Just as everyone was feeling puzzled, the yellow Camaro actually leaped up and began to transform in a cool manner in mid-air.

This scene caught the attention of all the visitors. A moment later, the extremely attractive Bumblebee appeared in front of everyone.

at this moment, the tourists seemed to understand that this was the surprise that Linlin scenic area was talking about.

It was a new transformer.

Now, the tourists finally understood why the people in the scenic Area suddenly set up filming equipment. It was to film this scene.

Bumblebee walked over to Optimus Prime and Megatron. Oh, Optimus Prime, you're actually here? everyone's looking for you, but why are you with that bastard Wei zhentian? "

Wei zhentian seemed to be dissatisfied with this, and he shouted, " " optimus prime, this guy's tone really pisses me off. i want to kill him. "

no, no, Wei zhentian, you're still at work, " Optimus Prime immediately said. if you fight at work, you'll get your pay deducted.

"Damn it, I'll kill it after I get off work." Wei zhentian said in frustration.

bumblebee let out a surprised sound. " "Work? What work? optimus prime, what's going on?"

This conversation was very interesting.

Many of the tourists were amused and laughed.

Prince Tara immediately exclaimed, " so cool! This Bumblebee is even more cool than Optimus Prime and Megatron!

his opinion was obviously the same as the other tourists. the other tourists around him also gave the same evaluation. this was probably why bumblebee was more popular than optimus prime and megatron.

Minister Lu looked at Bumblebee with a face full of resentment. This was the appearance of worldwide, not the National style. If he had asked boss Qin for help earlier and asked boss Qin to design a national style, it would probably not be Bumblebee on the stage now. It might be a national style Transformers.

But who would have thought that boss Qin's design ability was so strong, and that the creation cycle would be so short? in such a short period of time, he actually created a transformer?

At this time, many tourists were already regretting that they didn't take a picture of Bumblebee's transformation.

after all, they were all shocked in that short period of time just now. there was no time at all.

At that moment, everyone saw a Ferrari behind them.

At this time, the young man in the Ferrari was also hurriedly fiddling with the dashcam. He did not have the time to film, but the dashcam captured the entire process.

This should be a first-hand video.

However, when he was done with the car record, he looked up and saw that he was surrounded by a dense crowd of tourists. These people were all pointing their mobile phones at his car.

What was the meaning of this?

Indeed, the tourists around them were already pointing their phones at the Ferrari, and many of them were even shouting, "Hurry up and change shape, my hands are getting sore."

Obviously, the tourists had mistaken the Ferrari for another transformer.
