

## The Game 1551

### [Chapter 1551 This Is Definitely A Scammer \(2\)](#)

The young man in the Ferrari was a little anxious, because the girl in the passenger seat was his brother's girlfriend. Fortunately, the glass of the car could not see inside.

He quickly started the car and drove away at top speed.

What the hell? why didn't it change? He even ran away?

.....

The news of another Bumblebee in Linlin's Scenic Area quickly spread on the internet and naturally became a hot search.

However, at this moment, someone raised an opinion.

"the pirates are the best proof that academician qin can create bumblebee, optimus prime, and megatron. they even have the ability to fight.

"but these transformers are all foreign. i'm not saying that academician qin worships foreign countries. after all, i also like transformers. i just think that if academician qin wants to make more transformers, can you make some national-style machinery?"

To be honest, the National pride in China was very strong. Therefore, many people did not think that foreign products were good. Many domestic products had also begun to develop. Many people even pursued the National style and created their own unique characteristics.

This proposal obviously received a lot of approval from the netizens.

Previously, on the matter of desert plant cultivation, the netizens voted for the plant that they wanted academician Qin to cultivate. In the end, academician Qin really went to cultivate it.

This time, the netizens also thought of this matter and hoped that academician Qin would make a National-style transformer machine.

What if academician Qin saw it and really went to produce it?

Therefore, with this thought in mind, the voices grew louder and louder. In a short time, it also became a hot search.

...

Linlin Manor, as night fell, the whole Manor began to become a little magical. After all, there were fluorescent lights from space plants and fireflies flying past.

After having dinner, Minister Lu couldn't help but go to Qin Lin's office. He took out his phone and played a video on the internet that called for the production of a national style transformer for Qin Lin to see. boss Qin, look at this video. Everyone wants to see this National-style transformer.

"Minister Lu, you'd love to see it too, wouldn't you?" Qin Lin laughed.

Minister Lu smiled awkwardly.

Was there even a need to say this?

This was one of his goals for coming here.

After watching Bumblebee's performance today, he finally knew how fast Qin Lin was able to design and make the Transformers.

Therefore, it was stupid of him to let the people in the hospital try it out. He wanted Qin Lin to get a stylish transformer as soon as possible.

Qin Lin naturally knew what Minister Lu was trying to do. He smiled and played a video for him. Minister Lu, I'm also looking for the National style appearance on the internet. Look at these national style mechas, they are all made by special effects bloggers. I actually think the appearance is not bad.

and I'm not good at design, so I'm planning to design a new transformer by looking at the shapes created by these bloggers.

Seeing that Qin Lin had already started to take action, Minister Lu suddenly became interested. "Boss Qin, let me see!"

Qin Lin also handed the videos he found to Minister Lu.

Of course, there were videos of the great sage equal to heaven, Erlang immortal master, and the Bull Demon King transformer posted by the blogger named 'ancient style sci-fi', which were the three videos he had given to Elba.

he took out these videos to cover it up and to give minister lu a buffer. at the same time, he also prepared the source of the ancient style transformers.

Moreover, this would also give Minister Lu a sense of participation. By then, he would only be a little surprised and would not think too much about it.

After all, these National-style Transformers did not exist before. They were different from the famous Transformers like Optimus Prime and Megatron.

It would be a little abrupt to take it out rashly, and it would be even more shocking.

However, if other people, or even countless people on the internet, joined in, it would not be sudden, but a sense of accomplishment and participation ...

Now, Minister Lu and so many netizens were involved. Therefore, if he could find a source for the three Transformers, everything would be solved. All he had to do was wait for Elba to send the design drawings of the great sage, Bull Demon King, and Erlang immortal.

At that time, everything would naturally be resolved.

Minister Lu was already watching the videos.

Of course, Qin Lin had intentionally made these videos, because out of all the videos, the three he gave to Abba were the best, while the others were not as good.

with minister lu's judgment, he would definitely choose those three videos.

When the time came, it would be chosen and designed by Minister Lu to increase his participation.

Qin Lin saw that Minister Lu was looking at him seriously, so he asked, " Minister Lu, what do you think of the exterior of these videos? I plan to choose three to design.

When Minister Lu heard this, he naturally chose three. With his insight, he could naturally see that three of them were more unique and better.

Just as Qin Lin had thought, the three videos Minister Lu had chosen were the ones he had given Elba.

Qin Lin pretended to be surprised when he saw the three videos. Minister Lu, these three videos are all made by the same blogger, called 'ancient style sci-fi'.

"Since you've chosen these three, I'll get someone to contact the other party and discuss the issue of copyright. After all, it's not good to use their copyright casually."

When Minister Lu heard this, he immediately said, " "Boss Qin, leave this to me. I'll get it done for you immediately."

As he spoke, he couldn't wait to take out his phone and contact the person.

He was even more anxious about this than Qin Lin.

As soon as the call went through, he began to give instructions.

After Minister Lu's Secretary received the order, he immediately looked up the information and contacted this 'ancient sci-fi style'!

...

'Ancient sci-fi' wasn't actually a person, but a Blogger account created by a special effects team.

After all, both the great sage equalling heaven and the Bull Demon King transformer were of very high quality and could not be made by one person.

Naturally, there was a person in charge of the team called Gu Yue. Other than having the technology, he was also in charge of creativity.

After Gu le went to work in the afternoon, he started to gather the team for a meeting. He had a new idea, so he naturally wanted to let everyone discuss it.

Gu le said, " as everyone knows, our nation's Journey to the West's Transformers series are a lot on the internet. A few of their videos have gone viral. So, I plan to continue this system. If our special effects can catch the attention of any film company, we'll be famous.

The other members agreed with him. They did special effects not only because they wanted to attract fans through special effects videos, but also because they wanted their special effects to be more effective and have a wider market.

However, it seemed to be very difficult. Everyone knew the situation in the domestic film industry, so they could only rely on videos to attract fans and make money from traffic.

Just as Gu Tian and the others were in the meeting, a phone rang. It was a call for an external cooperation. If someone wanted to cooperate, they would either do it through the company's WeChat or through this phone.

One of them immediately picked it up and heard a voice from the other end. "Hello, I'm from the Hua hospital, and I want to cooperate with you!"

The man was stunned when he heard this and said to Gu Tian, " "Boss, the other party said that he's from the Chinese Academy and wants to cooperate with us."

Gu Tian laughed when he heard this, "what does the Hua \* Yuan want from us?" Isn't this a scammer? Don't tell me that the Chinese People's Hospital is interested in our special effects and wants to make our National-style Transformers movie. They must be a liar."

The person who answered the phone nodded and said directly into the phone, " even if you're a liar, you should at least make up a good identity. Do you think we're stupid? "

After that, he hung up the phone and returned to the conference table.

In the Chinese hospital, Minister Lu's Secretary was holding the phone. He was dumbfounded. This was not what he had expected. How did he become a scammer?

#### [Chapter 1552 Let Little Academician Qin Produce Big White?](#)

"It's my first time being treated as a liar!" Minister Lu's Secretary was a little helpless. In the past, when he made a call, who would not be respectful when they heard that it was a call from the Hua hospital?

However, when he thought about it, he realized that the ones who had called in the past were either those laboratory institutions or those researchers.

This time, it was a special effects team that had attacked him, so it was understandable that they thought he was a scammer.

So, he patiently called the other party.

On the other side.

In the 'ancient style sci-fi' company, Gu le and the others heard the phone ring again.

"It might be that scammer again!" Gu Yue frowned.

The man from earlier picked up the phone again and said, ""Hua \* Yuan again?"

Minister Lu's Secretary immediately said, " yes, I'm indeed from the Chinese Academy of Sciences. Please don't suspect that we're scammers. We're working with academician Qin to find a design for a National-style transformer. We're interested in your special effects and want academician Qin to make such a National-style transformer!

The person who picked up the phone was stunned when he heard the conversation. He subconsciously said to Gu Yue, ""Boss, the other party also said that he's from the Chinese Academy of Sciences. He also said that he likes our special effects and wants academician Qin to make our National-style Transformers."

These words stunned Gu Yue and the others.

"Boss, I think there's a rumor on the internet saying that academician Qin is going to make the National wind machinery!"

"Indeed, the discussion seems to be very intense," another person added.

"Could this phone call be real?" Gu le asked in disbelief.

The others looked at each other and subconsciously looked at each other. After a while, they nodded with uncertainty.

Seeing this, Gu le stood up from his chair and hurriedly ran forward to take the phone. "Hello, I'm the person in charge of 'Hu Feng sci-fi'."

Gu Yue was still more knowledgeable. After a few questions, he was basically sure that the person on the other side of the phone was real, and then immediately said, "we agree to give the design to academician Qin for free. We only have one request, and that is to let us publicize this.

He immediately thought of the impact this incident would have on 'ancient sci-fi', and his face was full of excitement.

Originally, they just thought that a film company would like their special effects, but they didn't expect it to be the Chinese People's Hospital. The key was that they wanted academician Qin to make the special effects Transformers they designed in reality.

Who was academician Qin?

There was no one who didn't know of such a character.

Furthermore, the other party had already created Optimus Prime, Megatron, and Bumblebee. He had no doubt that the other party would be able to replicate the special effects that they had created.

Gu Yue only felt that he was blessed by the heavens. He had thought that he would be satisfied if he could put the special effects he made on the screen, but who would have thought that it would be made in reality?

Minister Lu's Secretary smiled and said, "of course. You can carry out publicity. We will also send you a cooperation document. The official website will also announce this.

He could still make a decision on such a small matter. Moreover, their Chinese medical Hospital would cooperate with them, and they would not let them suffer losses. As for the publicity, even if the other party did not publicize it now, when the product was out, there would be people to publicize it.

Like his leader, he had never doubted boss Qin's ability to make those National-style Transformers.

He was so surprised that he couldn't believe it after he hung up the phone. He even pinched himself subconsciously.

It would hurt.

Which meant it was real.

"Boss, there's a fax." "He's from the Chinese Academy of martial arts!" One of them shouted.

Gu Yue immediately walked over. When he saw the special seal on the fax, he immediately said, "Quickly, look at the Chinese hospital's official website!"

Someone immediately logged into the official website of the Chinese Academy of Medicine and stared at it. Soon, he exclaimed, boss, the official website of the Chinese Academy of Sciences just released the latest news. They mentioned us and said that they're going to cooperate with us on the appearance of the National style Transformers. They'll also give the appearance of the National style Transformers to academician Qin.

Gu Yue immediately went forward. After seeing the announcement, he heaved a sigh of relief.

He immediately turned to a member of the team and said, "hurry, hurry up and announce this news. Say that academician Qin is interested in our special effects and wants to make our designed transformer.

The team member knew that this would be of great help to the company, so he immediately started working on the computer, logged into the official account of a certain sound company, edited the content, and sent it out.

The content was naturally about their 'national style science fiction' cooperation with the Chinese Academy of Sciences and academician Qin to jointly create a national style transformer.

The first people to see this content were naturally the fans of the 'national style sci-fi' account.

Because of those National special effects, this account also received a lot of attention, especially after the special effects of the Transformers in the Journey to the West Series such as the great sage, heaven's equal and the bull Demon King were released.

Therefore, when they saw the content, many fans were surprised and left comments of disbelief.

"Really? That's academician little Qin we're talking about."

it's a little unbelievable. The internet is discussing this matter. The blogger isn't trying to gain popularity, is he? "

"Yeah, why did academician Qin suddenly look at you?"

"What if it's true? Their great sage, heaven's equal is really cool."

".."

The voices of the discussions were getting louder and louder. Some chose to believe it, and some chose not to believe it. In an instant, the entire internet became very lively.

#### [Chapter 1553 Let Little Academician Qin Produce Da Bai \(2\)](#)

This also allowed Gu Yue's account to receive a lot of exposure, and the number of fans following them was also increasing rapidly.

After all, he had to pay attention to it.

After all, the Transformers are foreign. Optimus Prime and Megatron's images were not created by their own country.

If he could create a National-style transformer, it would be a very sensational event.

It was also this kind of argument that pushed the video of Gu le and the others to the top search, which also attracted the attention of many technology reporters.

Lu Feng was such a reporter. After he found the content posted by the 'national style sci-fi' account, he went to his editor-in-chief. chief editor, quick, take a look at this video. We can't be sure if it's real or fake. Do we need to follow up on it? "

As he spoke, he passed the video that was posted by gule's account to his chief editor.

The chief editor took a look and said,"follow them immediately. Also, send someone to Linlin Scenic Area to check it out."

"Chief editor, Are you sure?" Lu Feng was surprised.

However, the editor-in-chief said,"go and see the official news released by the Chinese hospital yourself!" It's impossible for this news to be fake."

Lu Feng didn't waste any time when he heard the news. He rushed to the computer, logged into the official website of the Hua Yuan hospital, and saw the news announced by the Hua Yuan hospital.

There was no need to guess whether it was true or not.

At this time, the Chinese Academy of Sciences released an announcement, which meant that the 'national style sci-fi' account's post was real.

Moreover, the Chinese Academy of Sciences 'announcement was even more detailed. That was, academician Qin little had selected the great sage equal to heaven, Erlang immortal master, and bull Demon King as the three outer appearances to make the National style Transformers.

When Lu Feng saw the news, he immediately opened the three videos attached to the Chinese hospital.

These three videos were the ones that Qin Lin had chosen.

Lu Feng clicked on the video of the great sage, heaven's equal and was immediately attracted by the cool and shocking transformation of the great sage.

It really wasn't any worse than the Transformers at worldwide.

The bull Demon King and Erlang Immortal King transformer at the back were both very cool. When they thought about how academician Qin little was going to make them, they felt their blood boiling.

Not only Lu Feng, but more and more people on the internet also saw these three videos. When they thought that these three Transformers were about to be made by academician Qin little, all of them were shocked.

This also allowed the three videos to become the most searched topic at the fastest speed. Moreover, they were the most searched topic of the day.

It was evident how shocking this matter was.

The number of fans of 'national style sci-fi' also began to grow rapidly in a short period of time, which brought a lot of benefits to Gu Yue and the others.

Gu le and his team were all in a state of excitement. They knew that they had blown up. After this incident, they would become the hottest topic online.

As expected of academician Qin, the other party just took a fancy to his design, and he could actually achieve such an effect.

They were also glad that academician Qin was interested in the mechanical exterior they made. Otherwise, they wouldn't have had such a good opportunity.

If academician Qin took a fancy to other people's designs, then other people could also benefit from it.

boss, we've gained another million fans in such a short time. The three videos have more than 50 million likes now. One of the team members looked at Gu le with excitement, and the others were also smiling.

Another team member also said, fortunately, boss had a sudden idea to create this national style Transformers movie from the Journey to the West Series. Otherwise, there wouldn't be such a good thing now.

Gu Yue didn't want to claim any credit. this is all thanks to everyone. If it wasn't for everyone's hard work and the good special effects, we wouldn't have been chosen by academician Qin.

Just as Gu le and his team members were happy, a phone call came in. Gu le picked it up personally. He was afraid that it was another call from the Chinese Academy.

As soon as the call went through, an anxious voice came from the other side, " Hello, I'm the director of tianxin entertainment. My surname is Wang. I saw the special effects of your Transformers movie, Journey to the West. I think it's very good, so I want to shoot a Transformers movie that will involve my own country!

for example, in ancient times, there were many planets in the universe, where mechanical bodies known as Immortals lived. However, the mechanical bodies of this planet had internal strife and were scattered all over the universe. In order to revive the planet's race, we have to find something called the Tinder ...

When Gu le heard this, he directly hung up the phone.

What the hell? Wasn't this the background of the transformer, cybertan? It was just a slight change, and he treated it as a script to trick people?

He had already received a few such calls. Obviously, some people wanted to make use of this popularity and their " Journey to the West " and " Transformers " to make a wave of money.

These people were all very evil and treated others as fools.

Gu le was very calm.

He knew that at this moment, his mind had to be clear.

He also knew that the Transformers he made had no background story, which meant that it had no cultural support.

Previously, he didn't think it was necessary to do this, but now he felt that it was necessary. After all, academician Qin took a fancy to their work and wanted to make it.

By then, there would be National-style Transformers in real life. If there was a rich story, these Transformers would have more Foundation.

Therefore, it was naturally good to make a movie like Universal, but the story had to be good. It also had to rely on Journey to the West. The most important thing was to satisfy academician Qin little.

He believed that with this kind of popularity, many big film companies in the country would definitely be willing to invest. As long as academician Qin little produced these Transformers, the film would definitely not lose money. It might even break the record.

Gu Yue suddenly had an ambition.

It was even more lively on the internet because some people were celebrating. The reason for the celebration was naturally because their demands had once again been satisfied by academician Qin junior.

Previously, when they voted for desert plants, academician Qin little satisfied them.

This time, they voted for the National style Transformers, and academician Qin was actually satisfied. Moreover, he had already chosen the appearance with the Chinese People's Hospital.

Didn't everything show that academician Qin little was still very concerned about public opinion?

This also made them feel very much involved.

In the future, they could proudly say that they had voted for the National style Transformers movie.

"What do you guys think? should we vote for something else?" Some netizens took advantage of this moment to make a suggestion.

"How's da Bai?" A well-known female blogger suddenly joined in. I watched the movie again, and I think big white is so cute. If there's another big white, I can give up on a boyfriend.

Immediately, there were netizens who participated.

Regardless of whether he was big white or not, he would support them first. He just didn't know if his beloved academician Qin would satisfy them again.

.

In the Linlin Manor, Qin Lin had naturally paid attention to the news on the internet. After all, this was the effect he wanted.

Now, everyone knew that the Chinese Academy of Sciences had taken the lead and reached an agreement with that 'National-style sci-fi'. He was going to start producing those three National-style Transformers.

Wasn't this the reason?

No one would be bothered by anything else.

When he took out three Transformers, people would only think that he was very smart and powerful.

As Qin Lin was thinking, Minister Lu came in with a stack of documents. As soon as he came in, he put the documents in front of Qin Lin and said, "boss Qin, these are the rights to the copyrights for the few Transformers movies in the National style sci-fi genre. You can start designing and producing them without worry now.

Obviously, Minister Lu was also in a hurry to make this happen, because he also wanted to see how long it would take to redesign a new transformer.

He had a feeling that boss Qin's design of these Transformers was as simple as growing desert plants.

Minister Lu took out another video and handed it to Qin Lin. "Boss Qin, take a look at this. What do you think?"

Confused, Qin Lin took the video and saw that it was a video about da Bai.

The netizens had actually voted for him to make Great White. Wasn't this a coincidence?

[Chapter 1554 714-Welfare Mission: Book Of Winning Streaks](#)

This was really a coincidence.

After all, he already had da Bai's technology. He only lacked an intelligent system. If he wanted, he could ask the Chinese hospital to help with the artificial intelligence technology. Then, they could make a low-end da Bai.

Most importantly, it was obvious from Minister Lu's expression that he wanted him to make da Bai.

Of course, Minister Lu wanted Qin Lin to make white.

After all, research on sci-fi products was being carried out in various countries. For example, da Bai's body required mutated materials such as ethanol and polyethylene, which could be used in various ways.

Think about it, White's skin and the retractable bone armor, how much use could they be?

Qin Lin knew Minister Lu's purpose, so he smiled and said, ""Minister Lu, what do you think of this big white?"

Minister Lu's eyes naturally brightened, and he immediately nodded. that's great. If boss Qin is the one doing it, he should be able to make da Bai in no time.

Qin Lin chuckled. Minister Lu, I don't know much about da Bai. I wonder if the Chinese Academy has studied this kind of movie product. If you do, can you give me some information for reference? "

Naturally, his acting skills were back on track.

After all, he had the complete design information of big white, and he only did this so that he wouldn't be as shocked when he presented the technology.

This way, it would be more logical to bring up the intelligent system later.

He just didn't know if the Chinese Academy had any research materials in this area.

When Minister Lu heard this, he stood up and said, ""Yes, I'll go back and apply for it now!"

After that, he hurriedly took out his phone and made arrangements. He left Linlin Manor and returned to the capital.

As soon as he arrived in Beijing, he was assigned to a special Department.

This Department specialized in research on science-fiction technology, such as big white and even Iron Man's nuclear fusion battery.

This kind of technological competition had existed for a long time, the first being the movie star Wars.

Back then, there was a country that was too hot-headed and had to pay a heavy price for it ...

Therefore, other countries had similar research, but they were not as fanatical as that country.

However, these only existed in movies at the moment. There was no technology in reality at all. Even if the current stage of technology was developed, it was only in the initial stage.

For example, the research on da Bai's body materials.

Those who could conduct such research were undoubtedly not the best researchers.

When Minister Lu arrived, the person in charge immediately greeted him, ""Minister Lu, what brings you to our Department today?"

Due to the special circumstances of their Department, there were almost no finished products. Because they were researching the future and not the present, the higher-ups rarely came to their Department except for the allocation of funds on time.

Minister Lu also went straight to the point. help me get the research data on big Bai, especially the research data on resin and polyethylene. I'm going to give this data to academician Qin.

The person-in-charge seemed a little unhappy when he heard this. Minister Lu, those are the data we've researched. How can we just hand them over to outsiders? "

Minister Lu immediately said, " academician Qin is not an outsider. The technology he donated has proven that he is worthy of trust. Moreover, with his help, maybe this big Bai (\*-\*) technology can be realized very soon.

The person in charge was still unhappy. Minister Lu, I've heard of academician Qin. I also know that he donated a lot of technology. But this doesn't mean that he's really omnipotent.

big Bai doesn't belong to the modern era, it belongs to the future. Our department's ability to research future technology isn't any weaker than foreign countries. I don't think academician Qin can surpass us.

Minister Lu seemed a little helpless and could only sigh, ""This is an order!"

The person-in-charge was helpless and could only say, " since it's an order, our Department will obey it. However, Minister Lu, you've made a major mistake and leaked research secrets. I will report this to the higher-ups.

Obviously, the person in charge was very proud and confident.

Minister Lu didn't care about the other party at all. He left after getting the information and data.

The person-in-charge of that Department became more and more dissatisfied the more he thought about it. He actually took out a cell phone and dialed a number, saying,"I'm going to report to Minister Lu that I've secretly leaked the research data to outsiders."

The person on the other end of the phone seemed to be a little anxious when he heard this."What's going on? How could Minister Lu make such a mistake? who did he leak the confidential research data to?"

it's academician Qin, " the person in charge immediately said. he has already left with the information.

The person on the other end of the phone was surprisingly silent for a moment, then asked, "What information did Minister Lu give to academician Qin? "

it's research data on a movie character, big white, " the person-in-charge answered honestly. it's research data on resin and polyethylene.

When the person on the other end of the phone heard this, he laughed."I see. Minister Lu, are you trying to trick academician Qin to help immediately? That's it, it's fine."

The person-in-charge felt that something was wrong when he heard this. What did he mean by that was it?

However, the call was hung up before she could say anything more.

He was stunned.

However, he also understood the leader's meaning, so he could only look unwilling.

[Chapter 1555 714-Welfare Mission: Book Of Winning Streaks](#)

..

At Linlin Manor, Linlin also welcomed Prince Tala into his office.

Prince Tala also brought a lawyer with him this time. As soon as they met, he asked, ""Academician Qin, do you still remember what I told you before? I'll spend 20 billion to ask you to help cultivate two types of plants that can survive in the desert."

Qin Lin smiled and nodded. of course I remember. It seems that Prince Tara wants me to help you cultivate some plants? "

20 billion, it would be a waste if he didn't earn it.

This was equivalent to money being delivered to the door, and his conscience would hurt if he refused it.

Prince Tara nodded immediately. He took a contract from the lawyer's hand and handed it to Qin Lin. "Academician Qin, this is the contract. I want to ask you to help me cultivate the milk trees and date palm trees that can survive in the desert! The research funding is 20 billion!"

Qin Lin was curious and looked up the Milky tree and date palm tree. They were both trees unique to oil countries and were very valuable cash crops.

The products and fruits produced by these two crops were very popular with the rich in oil countries, and could even be considered a regular benefit for the rich.

That's right, the products related to these two things were benefits for oil countries.

Just like a company's labor insurance, the employees would have labor insurance every month.

If this oil country was regarded as a company, then the rich people of this oil country would be the company's employees, and the benefits they received would be labor protection.

In a country like an oil country where money was not important, the fact that these two things could become welfare was enough to show how much these two things were loved by the people in the oil country.

After Qin Lin finished looking up the information, he smiled and said, " Prince Tara, I can help you cultivate it, but I still have my original request. I need seeds to cultivate it. Otherwise, I can't do anything without seeds.

Almost as soon as Qin Lin finished speaking, Prince Tara put two bags on the table in front of Qin Lin. "Little Qin, academician, I'm ready."

"Prince Tala, you're well prepared," Qin Lin said with a smile.

Prince Tala immediately smiled happily. Of course, he had to be prepared for this.

Qin Lin also signed his name on the contract, and not long after, Prince Tala transferred 20 billion into his account.

After Prince Tara's 20 billion was transferred into his account, the liquid funds in his account had also reached 90 billion. To be honest, he had no idea how to spend this 90 billion because it was too much.

What was the concept of 90 billion?

That was equivalent to the 28th place on the list of the richest people in the country.

However, the 28th-ranked rich man had assets, while he had liquid assets, so he was not considered a Linlin company.

From this, it could be seen that the list of rich people did not have much credibility. After all, the country was so big and had been passed down for so many years. Who knew how many hidden rich people there were?

Someone like him was not on the list. He did not think that he was the only invisible rich man. He believed that there were many such invisible rich people in the country.

After Qin Lin signed the contract, Prince Tara left with satisfaction.

This time, in addition to observing the chicktooth bean sprouts and bringing them back, he also asked academician Qin to help him cultivate these two plants.

Naturally, after the cooperation was settled, Prince Tara had another presumptuous request. He hoped that Qin Lin could make a medicinal meal to celebrate.

For Qin Lin, who got 20 billion for free, this would naturally satisfy Prince Tara.

Therefore, he personally made a Supreme Emperor's medicinal cuisine in the evening.

Academician Hao, academician Zhu, and academician PEI, who were recuperating in the manor, naturally benefited as well.

.

The next day.

Qin Lin got up early in the morning. He looked at the screen in his mind in surprise because there was a situation in the game.

In the game, his character was lying on the bed, but the TV next to him lit up on its own.

This was not right.

This was because the TV in the ranch house could only be triggered when the game character walked over and clicked on it.

Now that it had been triggered automatically, there was only one possibility. A plot quest had been triggered.

"What are you daydreaming about so early in the morning?" Zhao mo asked as he sat up and saw his husband staring at the ceiling.

Qin Lin came back to his senses, leaned close to Zhao moyin's ear, and made up an excuse, saying with a hint of evil, "I want to have sex with you!"

Zhao mochen understood and snorted, "it's early in the morning ..."

Qin Lin smiled as he pointed at Zhao mochen's lips.

Zhao moyin understood and immediately pinched Qin Lin's waist hard, everything was clear without words.

(. Omitted.)

Qin Lin took a deep breath and looked at the screen in his mind. He immediately controlled his game character to walk to the TV.

A piece of content immediately appeared on the television program.

[ do you want to win the title of King of winning streaks? [ come and join the rock-paper-scissors game. Only if you win consecutively will you be able to obtain a special mysterious scroll. I heard that the mysterious scroll also has a special luck power! ]

Qin Lin understood what was going on when he saw this.

It was actually a welfare mission!

In the story of farm, there was a book of winning streak in the form of a scroll.

In the old version, players would control the game character and play rock-paper-scissors with the goddess. Winning 100 times in a row would give them the book of 100 consecutive wins.

As for the use of this item, the boss didn't explain it. After all, the old version was full of loopholes. Many items were actually just decorations and had no use. They could only be sold for money in exchange for seeds, young animals, and so on.

This kind of mission was also called a welfare mission, which was equivalent to giving away money.

Now that the new version had a system, it should be different.

He just didn't know if the old version of the incantation would work.

That's right, even if it was the old version, it was not easy to win 100 times in a row.

He could only repeatedly save and read. If he won, he would save. If he lost, he would read.

However, there were some people who managed to sort out the incantation, which was the order of each punch in the game. It seemed to be repeated for 20 rounds.

In other words, the first time and the 21st, 41st, 61st ... And so on, he had to use the same punch.

Qin Lin immediately took out his mobile phone and began to search for the order of the old version on the internet.

He just didn't know if the designer of this new version had been lazy.

If they weren't slacking off, the designers would definitely reset the order. If they were slacking off, even if the mini-game's template changed, the order of the rock-paper-scissors game wouldn't be reset. They would just copy and paste the code over, right?

For a small game like this, if a designer could slack off, there shouldn't be any designer who wouldn't.

After finding out the order of the punches, Qin Lin endured Zhao moyin's \*\*\*\* and immediately controlled his game character to participate in the game.

Soon, a person appeared on the TV. According to the introduction, he was also a participant in the game.

Qin Lin followed the order stated on the internet and controlled the game character to be the first to punch. The NPC on the opposite side really did punch simple.

He won the first round.

In the second round, he controlled his character to use paper. This round, the NPC opponent used his fist and won again.

The third round

The fourth round

The fifth round.

.

As the game went on, Qin Lin heaved a sigh of relief as the order was still the same.

So, he had to thank the designer of this version of the mini-game for being lazy.

After that, he followed the order on the internet and won 100 games in a row. A message appeared on the TV again:

[ congratulations on winning the king of winning streak game, you have won the mysterious scroll. We will send the prize to you by express delivery! ]

Seeing that the task was completed, Qin Lin also put down his phone. He was also almost done with Zhao Mo's teasing, so it was time to do something.

(. Omitted.)

Qin Lin came out of the bathroom after washing up and had breakfast. Suddenly, a voice appeared in his mind. It was an express delivery.

According to the time ratio of the game, it was almost time for the reward of the King of rock-paper-scissors.

Therefore, after eating, he went into his work room and entered the game with a thought. He saw the package. It was from the rock-paper-scissors event.

After opening the box, he saw what was inside. It was a scroll.

[ book of winning streak: special! ]

[ this is a special scroll, a strange item found in the depths of Mount Saint missus. After using it, you will have special luck and your luck will be explosive. You can win any event that requires luck: Number of attempts (100/100)! ]

[Chapter 1556 Book Of Winning Streak Is A Super Big BUG](#)

It was indeed the book of winning streaks.

Qin Lin saw the note and understood.

The old version of the book of winning streaks didn't have any use, but the new version was obviously different. Moreover, with the system's effect, this thing seemed to be a bit extraordinary in reality.

He could win anything that relied on luck.

Think about it, rock-paper-scissors, right? Can I guess correctly just by guessing?

Gambling, right? Would he be able to win just by randomly betting?

This was just a simple way to use it.

For example, to dismantle a bomb, he didn't know which one to cut, but he should be able to cut it randomly, right?

In addition, blocking the ball, anyone could hit it with a random bet, right?

"Yi!" Qin Lin suddenly thought of a possibility.

Isn't the World Cup coming up?

What would have happened if he had blocked the men's soccer team from the start of the qualifiers?

Would the men's soccer team be able to make it to the World Cup?

It was important to know that buying the World Cup also required luck. The book of winning streak could be used. If he could buy to win, did that mean that the team he bought would win?

Then, if they kept betting on the men's team winning in the world Cup, with the help of the book of winning streaks, they would definitely win whatever they bet on. Wouldn't the men's team win all the way to the World Cup?

Qin Lin suddenly wondered if he had discovered a super big BUG.

He felt that he could become the Super behind-the-scenes hand that controlled the World Cup.

But very quickly, he felt that he had been too unorganized. If that was the case, why did he bet on the men's football team to win?

As for why he didn't bet on the men's soccer team to win, it was because he didn't want to waste any props on the men's soccer team. He just didn't like them.

He clearly didn't have any abilities, but he could still find excuses and eat sea cucumbers.

Also, why did he have to choose the men's soccer team?

It must be known that there were four spots for the Asian region in this world Cup.

On the other hand, many Asian countries did not participate in the competition. Not only was their football culture low, but they also did not have enough money.

So, if they could discuss with a small country at this time and invest some money in them to make a football team and then participate in the world Cup qualifiers, what would happen?

Qin Lin immediately thought of the security team that he had set up in his Scenic Area.

What if the security guard soccer team was used as foreign aid and the team from that small country participated in the competition?

Wouldn't that be a very interesting thing?

Thinking of this, Qin Lin looked at the book of winning streaks in his hand.

[ do you want to use the book of winning streaks? ]

Qin Lin immediately chose "yes."

The next moment, the book of winning streak reacted and turned into a ray of light that drilled into Qin Lin's body.

At the same time, a set of data appeared on the game interface.

[ book of winning streak: 100/100! ]

There was another option below. As long as he chose to use the book of winning streaks once, the 100 chances would be reduced by one.

After Qin Lin understood, he also logged out of the game.

After leaving the inner area, he went straight to the manor's Hall. As soon as he entered the hall, he found that Prince Tala was studying something on the computer.

Qin Lin took a closer look and was stunned. It was the lottery.

What was this bandana-wearing Prince of an oil nation doing researching this?

"Academician Qin, you're up?" Prince Tala was very respectful to Qin Lin and immediately greeted him.

Qin Lin leaned closer and looked at the computer screen in confusion. Prince Tara, why are you studying the Big Lottery? "

Prince Tara said confidently, " academician Qin, I like to gamble sometimes. I've also studied this kind of lottery, especially the lottery in America. I once studied some rules and planted many prizes.

of course, I don't care about the money I won. I just enjoy the process of cracking the rules. So, I'm studying the Big Lottery now.

trust me, I've been studying it for the whole night. I already have some ideas. Maybe I'll win the big prize soon.

"Prince Tala, you won't win the prize. Don't waste your time!" Qin Lin could not help but remind Prince Tara.

The other party studied how America's lottery was able to hit the jackpot, which meant that the other party had some ability. This also meant that America's lottery was fair to a certain extent.

This was also the reason why so many highly intelligent geniuses in the United States could calculate the lottery numbers and make a lot of money, forcing the lottery companies to change to props and rules many times.

Therefore, some lottery companies in America did not make money.

However, it was different in China. Winning the lottery did not depend on any rules or luck, but on the mood of a certain someone in the lottery.

After all, there were rumors in China that whoever won the lottery would be arranged in advance.

If other people wanted to win the lottery, the number they bought had to be the same as the pre-arranged number in the lottery.

The possibility of this was very low, because once a number won, especially the one with a big prize, the director would immediately change the number.

In other words, even if you knew the winning lottery number in advance and went back half an hour ago to bet on the winning number, you might not win.

This was a paradox.

He clearly knew the winning number, so why didn't he win when he bought the number before the lottery draw? This was the power of a Department Director.

Although this was only a rumor, a lot of news pointed to this as true.

For example, the lottery staff would go on stage to collect the prize, or the lottery Center would accidentally release the news of winning the prize before the prize was drawn.

Wasn't this amazing?

Therefore, even if Prince Tala was capable in this aspect, it was impossible for him to win.

"Yi!" Qin Lin suddenly thought of his book of winning streaks.

#### [Chapter 1557 Book Of Winning Streak Is A Super Big BUG](#)

Buying a lottery ticket was also a matter of luck. Did that mean that one could win the lottery by randomly buying a number?

Thinking of this, Qin Lin was a little eager to try.

The Big Lottery was 5 million in one bet, and the additional stakes were 10 million.

Then buying 10 additional stakes would be 100 million.

If it was 100, that would be 1 billion.

Qin Lin took out his phone and checked the internet. He found that there was still 1.25 billion Yuan in the sports lottery pool.

This made him eager to try.

He did not care about the money.

But the lottery had always been used as a charity, so it shouldn't be a problem for him to donate one billion Yuan in one go, right?

He wondered if some people would faint from crying?

Naturally, he didn't know if this would work.

If this was possible, then the World Cup plan should also be feasible. He would have to gather the scenic area's security team to take a look.

Thinking of this, his eagerness to try became even stronger.

Prince Tala seemed to feel that Qin Lin did not believe him, so he immediately said, ""Academician Qin, I know you're very smart and can do any kind of research, but I'm definitely a professional in this area. Let's have a competition and see who will win more numbers in the lottery. Also, we can have a bet, how about 20 billion?"

Prince Tala said with a smile on his face. Obviously, he had a wicked idea. He wanted to win back the 20 billion he had given to Qin Lin with what he was good at.

Qin Lin seemed to have seen through Prince Tara's mind. He smiled and said, ""Sure, let's make a bet!"

He was curious about how much money Prince Tara had. From 30 billion at the beginning, he had already taken out 50 billion, and now he had another 20 billion to bet with.

Was a Prince from an oil country that rich?

However, he had earned so much money from Prince Tala for nothing, so it didn't matter. Besides, he had the book of winning streaks, so he had a high chance of winning.

Academician Hao, academician Zhu, and academician PEI walked out and heard the conversation between the two.

"Boss Qin, what are you guys betting on?" academician Hao asked curiously.

Qin Lin didn't hide anything and explained with a smile, " Prince Tala has studied the rules of the lottery and is very confident in winning, so he wants to make a bet with me to see who buys a set of numbers and has a higher chance of winning. The winner will win 20 billion.

"What?"

"Bet on this?"

"That's right!"

The three of them looked at Prince Tara in shock, as if they were looking at a sucker.

Even if they rarely came into contact with the lottery, they had heard some things about it. There was no technique or pattern to speak of, okay?

"Maybe I can really win." Qin Lin said with a smile. He didn't forget to say to the three old academicians, "Three seniors, why don't each of you write two values, and I'll write another number, so that we can buy one? If the four of us were together, maybe God would give us some face and let us win?"

Obviously, he was looking for scapegoats, and the three old academicians were the best scapegoats.

He only needed to combine the numbers of the three academicians and add one to himself. As long as he was the one who bought it, he would be able to trigger the book of winning streak.

He could just say that the three old academicians had chosen six numbers and he had only chosen one. It had nothing to do with him.

It was really wonderful.

Academician Hao and the other two didn't know that Qin Lin was plotting against them. They only felt that it was interesting to get involved in this matter.

After all, they had always been engrossed in research and had never participated in such matters. Now was the perfect time to experience it.

.

Time passed.

Night soon fell.

Because of the bet, the group gathered together and chatted. When the atmosphere was right, Qin Lin also made a pot of +4 delicious Emperor's Supreme medicinal cuisine for them.

Just as the medicinal cuisine was ready and the few of them sat down at the dining table in the hall, a voice rang out, "this fragrance is from the emperor's Supreme medicinal cuisine. It seems that I have come at the right time.

Minister Lu rushed in with a surprised look on his face and sat down.

The waiter at the side also went to add a pair of chopsticks and a bowl.

"It's this delicious again." Prince Tala ate the herbal dish with a face full of emotion. "This kind of delicacy can only be eaten at academician Qin's place. If only I could eat this kind of delicacy every day."

Minister Lu also agreed with this idea, but he knew it was impossible. Besides, sometimes he didn't want boss Qin to have too much contact with cooking.

He still hoped that boss Qin would do research.

After the meal, Minister Lu invited Qin Lin to his office.

As soon as Qin Lin sat down in the boss's chair, Minister Lu took out a USB flash drive and handed it to him. boss Qin, these are all research on (xx-xx) da Bai. I'm giving them to you now, but you're the only one who can read them. No one else can. After all, these are confidential research materials.

Qin Lin nodded with a smile.

In fact, he didn't want to read it himself. After all, he couldn't understand it at all. He just used it as a cover.

However, in front of Minister Lu, he still connected the USB to the computer and opened it to check the information inside.

In an instant, a dense amount of information jumped out.

As expected.

He could not understand it at all.

However, he still put on an act in front of Minister Lu and said, ""Minister Lu, the people from the Hua \* Yuan are quite capable. They've already reached this level."

Anyway, with the complete technology, he was not worried at all. Now that he could install it, he would do it.

Minister Lu naturally didn't doubt that Qin Lin couldn't understand it. In his heart, Qin Lin's identity as a demon was real.

He saw Qin Lin reading the information seriously and immediately said, ""Boss Qin, I'll leave you to it."

After that, he went out to the living room and wanted to talk to the three old academicians.

Qin Lin also locked the office door and took out Great White's technical information. He compared it with the information from the Chinese medical Academy.

He had to admit that the people from Hua hospital were very capable, because there were indeed many similarities in the foundation of the information.

If the people in the Chinese Academy were given some time, they might really be able to develop the materials needed to make da Bai in the future.

Qin Lin compared the information of both parties and roughly understood what was going on. However, da Bai's technology was beyond the current era, so it wasn't appropriate for him to reveal it immediately.

Therefore, he needed to wait for a period of time to buffer. Otherwise, it would be a bit shocking to take it out immediately. He was also afraid that it would be too big of a blow to the people in the Hua \* Yuan.

Time passed.

Qin Lin looked at the time and put away the (xx-xx) da Bai's design. He then opened the office door and walked out.

In the hall, Minister Lu and the three academicians were talking, while Prince Tara was still studying the lottery.

When he saw him come out, he immediately said, "academician Qin, should we go and buy the lottery tickets now? it seems that the deadline is at 20 O'clock. We can't buy any more tickets. If that happens, our bet can't be carried out.

The three old academicians also looked over. After all, they were also participants. They each gave boss Qin two numbers.

"What bet?" Minister Lu asked curiously.

Academician Hao explained what happened to Minister Lu.

Minister Lu looked at Prince Tala in shock as if he was looking at a fat sheep. This guy was actually thinking about studying the lottery and making a bet? The other party didn't know much about their country's Affairs.

Of course, he couldn't say those things. After all, they weren't from the same system, and there were too many things involved.

However, he was also interested in the 20 billion bet.

After all, it was 20 billion. These headscarf-wearing people were really willful.

However, on second thought, it seemed that boss Qin's odds of winning in this bet were not high, but about the same. After all, everyone depended on luck.

yes! Qin Lin nodded and suggested, " this bet is our own fun, so let's go to you city's lottery shop and buy it ourselves!

Minister Lu didn't refute, and academician Hao and the other two also nodded.

Therefore, two cars left Linlin Manor and went straight to you city's lottery shop.

MA Hong and the others secretly followed them all the way to a lottery shop.

He didn't understand why these people would bet on buying lottery tickets.

Even the three academicians were so bored?

Looking at this lottery shop, MA Hong could only sigh with emotion. What kind of high incense did this lottery shop offer in his previous life? It actually made Minister Lu, the famous academician Qin, three senior academicians, and a Prince come?

If the boss of the lottery shop knew the identity of these people, he would be so shocked that his jaw would drop.

Moreover, it was an honor for these people to visit the lottery shop. Perhaps they could really win the prize.

#### [Chapter 1558 The World Cup Plan! 1](#)

In the lottery shop.

Qin Lin and Minister Lu had already arrived in front of the boss.

Prince Tala gave the boss a set of numbers he had written. "Boss, I want to buy this set of numbers."

Qin Lin also wrote down the 5+2 numbers of academician Hao's group and handed it to the boss.

However, he added, " buy me 100 additional stakes for this set of numbers. Add all of them. I might win.

The boss didn't suspect anything. It wasn't uncommon for people to raise their stakes randomly. These people always thought that they would be lucky and win the prize.

But obviously, it was not easy to win the lottery.

Seeing Qin Lin's actions, Prince Tara also shouted, ""My group also has 100 additional stakes. I'll raise all of them too."

After the boss received the money, he also began to operate.

After a while, the boss printed the lottery tickets and handed them to Qin Lin and Prince Tara.

When the lottery was printed out, Qin Lin also found that the number of winning streaks in the book of winning streaks in his mind had changed from 100/100 to 99/100.

In other words, he had used up one book of winning streaks.

This time, the lottery numbers worked.

After buying the lottery tickets, Qin Lin and the others left the lottery shop and returned to Linlin Manor together.

At around eight O'clock, the large-screen TV in the hall was turned on, just in time to switch to the live broadcast of the lottery.

This open broadcast was also to show fairness and let everyone know that they were randomly drawing the prize.

However, it was obvious that someone had already explained that there was actually a way to control the lottery machine. One could get whatever number one wanted.

There was even a Big Shot who made a lottery machine like that. Then, as long as he did something to the machine and the prize ball, he could shake out the desired prize ball in order.

Naturally, the Big Lottery company had also hired two notaries to notarize the prize and prove its fairness.

When the live broadcast started, Qin Lin, Minister Lu, academician Hao, and Prince Tara all arrived early.

But apart from Qin Lin, Minister Lu and the others were all focused, and they seemed to be in an inexplicable mood.

Only Qin Lin knew that with the book of winning streaks, he would definitely win.

Soon, the lottery machine on the TV was turned on, and the prize balls were stirred up one by one. After a while, a prize ball rolled out and fell into the rolling groove.

Seeing the number of the prize ball, Prince Tara looked annoyed. "Damn it, it actually hit. How could it?"

"Did I win?" academician Hao exclaimed.

He also looked at Qin Lin, because the first number was one of the numbers he had chosen.

Qin Lin also nodded at him.

The first number was chosen by academician Hao.

The second number started shaking the ball again. After a while, the second ball was also shaken out and rolled down the rolling trough.

"I chose this number," academician Zhu said in surprise.

Prince Tala could not believe it because he had missed two numbers in a row.

He felt that it shouldn't be. He had carefully calculated it, so why didn't he get it? instead, it was the other people who randomly chose two in a row?

The third ball, the fourth, the fifth ...

As the prize balls were shaken out, academician Zhu, academician Hao, and academician PEI all exclaimed in surprise.

The further they went, the more disbelief they had on their faces, because the numbers they had chosen were all correct.

The frustration on Prince Tala's face grew stronger and stronger because none of the numbers he chose hit the mark.

Similarly, Minister Lu was also in disbelief.

This was a joke. The three academicians were really lucky. All the numbers they chose were correct.

However, he couldn't find any problems. After all, the three academicians had randomly chosen their numbers. He could only say that they were lucky.

Minister Lu and the others were dumbfounded when all seven numbers were rolled.

Qin Lin's last two numbers also hit the mark.

"This can't be, right?" Academician Hao couldn't believe it.

"Are you kidding me?" Prince dala was completely shocked. He didn't even hit one of his seven numbers, but now the two numbers that academician Qin and the others chose were all hit.

"Did he win 5 million?" Academician Zhu subconsciously asked.

"100 stakes. With additional stakes, it's 1 billion!" Academician Hao said.

there's still my 20 billion, " Prince Tara said dejectedly. I lost 20 billion to academician Qin again.

Qin Lin called Lin Lanzi after the lucky draw was over.

He had won a billion in one lottery ticket, and he was worried that the lottery company would play tricks. Therefore, he had to control the public opinion first.

No matter what, he had to get the lottery company to donate this one billion.

At the same time, his face was also full of smiles. He could win the prize with this, which was enough to show the power of the book of winning streaks.

In that case, the World Cup plan could really be carried out.

He still had 99 chances of winning. He could control the world Cup alone for who knew how many times.

Prince Tala had also quietly walked to the other side.

He had been hit hard. He had clearly studied some patterns. Even if he couldn't hit all of them, he could at least hit one or two, right?

Who knew that none of them would hit the mark.

The key was that he still had to lose 20 billion to academician Qin.

He didn't really care about 20 billion, but he was not willing to lose like this.

He made a long-distance phone call and said, "Academician Qin said that he can help our family grow milk trees and date palm trees that can survive in the desert, but he needs 30 billion Yuan.

.

On the other hand, the Big Lottery company was in complete chaos.

Just as the lucky draw was over, there was a piece of news. All the higher-ups were called to the conference room. This time, something big had really happened.

In the meeting room, once everyone was present, the director shouted angrily, ""Dammit, what's going on? Why would someone bet 100 on this number? you guys didn't even notice and even gave this number?"

None of the high-level management around them dared to raise their heads.

One of the managers was already in despair. He was in charge of this matter, but when he checked, he did not even notice the 100 notes.

He was really remorseful to the extreme.

At that time, he thought that nothing would happen in the last bit of time. At most, he would just let the two lucky ones win the prize.

At that time, his Secretary was really annoying and insisted on doing it in the \*\*\*.

Who knew that someone would make such a huge bet during this time? this was a one billion bonus flying away.

He couldn't afford to take this responsibility, so he knew he was finished.

"We have to find a way to solve this problem," the director said with a frown.

"Why don't we do what we always do? just say that we didn't receive this number," one of the managers said immediately.

"Or we can say that someone in the company colluded with the lottery players and tampered with the machine, so we need to re-roll the prize," another person said.

Although the money in the prize pool was supposedly charity funds, it didn't matter whether the money was in their company or not. They didn't want the money to leave their company.

Therefore, this award must not be given out.

But at this moment, a person dressed as a Secretary rushed in. Oh no, hurry and watch the latest video on the official account of Linlin Scenic Area.

These words confused the people inside. They were in the middle of such an important meeting, why were they watching the official video of Linlin Scenic Area?

"Do you even understand the situation now?!" The Dean questioned with a dark expression.

The Secretary hurriedly said, "it's about winning the lottery, academician Qin junior. The other party has already released the lottery numbers. Furthermore, the other party said that he wants to donate all the money to charity. He doesn't want a single cent. He even asked the public to supervise it.

"What?"

"Why is he here?"

"We're finished!"

When the people in the meeting room heard this, they all stood up in shock. Then, they hurriedly took out their phones and logged into the official news video of Linlin Scenic Area.

Soon, they saw the video posted by the official account of Linlin Scenic Area.

The video was a lottery ticket with 100 additional stakes for the same number.

"I'm finished, I'm finished." The director was completely paralyzed in his chair.

They could play tricks on anyone, but only people like academician Qin little couldn't play any tricks at all, and they didn't dare to play ...

That was academician Qin little. Not only did he get the attention of the higher-ups, but he also had countless netizens who worshipped him.

It could be said that in everyone's eyes, this academician Qin was selfless. He donated too much technology and helped too many people. His results time and time again were too much for the people.

Those technologies could not be produced overseas at all.

Now, who would have thought that academician Qin little bought their lottery ticket and won 1 billion Yuan? they had to pay the money even if they didn't want to. Not to mention that the other party had donated it all to a charity organization and even let the public monitor it.

If they dared to do anything at this time, there would be countless eyes on them immediately. Public opinion would appear immediately, and they would die without even knowing how they died.

While these people's expressions were ugly, the internet was completely boiling.

The great lottery was a controversial item. Who would have thought that the great lottery would suddenly release such a bomb?

Winning 1 billion Yuan, how many people dreamed of this?

Now, someone actually won the prize. The key was that the person who won was academician Qin junior. Moreover, academician Qin junior was going to donate all the 1 billion that he had received and even invited the public to supervise it.

This caused an even bigger stir.

In a short period of time, this incident became the most searched topic and was the most sensational event of the day.

"I never thought that one day, I would be able to supervise a billion Yuan fund as a member of the public!"

academician Qin asked me to supervise this one billion Yuan. I must keep an eye on the Big Lottery company!

"Academician Qin is really generous. If it were me, I would definitely not be willing to donate!"

".."

In the face of such a sensational situation, the Big Lottery company was completely helpless. Under the supervision of the major media, they very unwillingly donated 1 billion Yuan to various major charity organizations.

Qin Lin didn't pay any more attention to this matter. The next day, he directly contacted Lin Lanzi and said, "President Lin, could you please gather the soccer team in the scenic Area?"

Since the book of winning streaks had such an effect, the World Cup plan must be carried out.

#### [Chapter 1559 Let The Security Guards Play In The World Cup](#)

The next day.

When Qin Lin got up, he wanted to scroll through his phone, but he saw a piece of news that surprised him.

academician Qin, you earned 1 billion from high school. The Big Lottery works with you for charity!

Qin Lin was a little confused.

His original intention was to make da le bleed and use the money for charity.

One billion should be a huge lesson. Who knew that the Big Lottery would start to use this as publicity?

He had already given them 1 billion, why would he still be short of 5 million? He wanted to use this method to show his fairness, was this what he meant?

Qin Lin was a little helpless.

There's an expert in the Big Lottery.

Therefore, people's vision and vision were different. Some people could see different opportunities in bad things.

This loss of 1 billion was a huge blow to the Big Lottery, right?

But now, it had helped promote the lottery?

Qin Lin suddenly felt remorseful.

The key was that this lottery couldn't just keep his name on it and keep promoting it, right?

You can't be so lazy, right?

The more Qin Lin thought about it, the more likely it was. The more he thought about it, the more bitter he felt.

If the Big Lottery really dared to force him, he would flip the table and say that the 1 billion was arranged by the Big Lottery.

"What are you looking at? why are you so angry?" Zhao Moyu asked in confusion.

"I was bitten by a dog." Qin Lin sighed.

After breakfast, Qin Lin left the inner area and went to the manor's Hall.

In the hall, Minister Lu, academician Zou, academician Zhu, academician PEI, and Prince Tara were making tea and chatting.

Seeing Qin Lin, Minister Lu teased, ""Boss Qin, did you see the news today? I'm afraid you'll become the promotional signboard for the great lottery after today."

When Qin Lin heard this again, he was immediately speechless. Minister Lu, please give us a heads up. What is this? "

Minister Lu smiled and said, " I've already called back to Beijing. Don't worry. However, they've paid a billion Yuan. They'll still need to promote it for a few days.

Qin Lin nodded.

This was probably the way of the middle. The existence of the great lottery had a certain inevitability and function, and the higher-ups obviously did not want to kill it in one blow.

At this moment.

Lin Lanzi called to ask if they should bring the soccer team to the manor now.

"Bring him over!" Qin Lin instructed. After hanging up the phone, he said to the others, Minister Lu, Prince Tara, academician Hao, academician Zhu, and academician PEI, do you want to watch our soccer team? "

These words piqued the interest of a few people.

Prince Tara even asked, "academician Qin, is there a soccer team in the scenic Area?" Have they ever participated in a competition?"

He also liked football.

Because he had so much money that he had nowhere to spend it, he often went to block the ball.

Minister Lu and the others were also interested.

They had all heard about the Linlin Scenic Area forming a football team, but they didn't know the details.

In Linlin Manor, a group of people in neat sportswear had attracted the attention of all the tourists.

Looking at the soccer balls in their hands, everyone knew that they were probably the Linlin Manor soccer team.

This also made many tourists pick up their mobile phones and start to film. After all, this was the first time the Linlin Manor football team had made a public appearance.

Many people uploaded the video to the internet and it quickly became a hot topic.

If it was just a team made up of the scenic Area security team, it would naturally not be so popular.

However, it was different now. As the World Cup was approaching, everyone's attention to football had increased.

In addition, the Linlin Scenic Area was very popular, so even the security soccer team was enough to attract attention.

There were even many posts that caused a huge response on the internet.

"I wonder if the Linlin Scenic Area soccer team can play a question with a certain team?"

"Haha, I'm looking forward to a match between Linlin Scenic area's soccer team and a certain soccer team!"

looking at the energy in the video, I feel that the Linlin Scenic Area soccer team can play with a certain team!

This title seemed to be comparing the Linlin Scenic Area soccer team to a certain soccer team, but the truth was that the team was so bad that it was disappointing.

Therefore, another post went viral on the internet.

the World Cup is coming. I'd rather the Linlin Scenic Area soccer team enter the World Cup than a certain soccer team.

This was a post filled with sorrow and an unknown disappointment in domestic football. That was why there was such a comment.

However, this post received the support of countless people and became a hot topic.

This made him feel very helpless.

..

Lin Lanzi had already called a few people over to the office in the manor.

These people were the coaching staff of the manor football team.

If there were any outsiders present, they would be very surprised, because the head coach was Lu Tong.

He was a very famous person. He used to be famous, but now he was notorious. The reason was that he was the manager of a certain football team and then was scolded and stepped down. Because a certain football team made several big mistakes in that World Cup, everyone put the blame on him.

However, he had always believed that his tactics were not wrong. It was just that those people were unable to execute them.

It was a surprise that he could be the head coach of Linlin Scenic Area. He had seen the Linlin Scenic Area soccer team training.

When he first heard that it was just a soccer team made up of a group of soccer-loving security guards, he did not pay much attention to it.

#### [Chapter 1560 Let The Security Guards Play In The World Cup \(2\)](#)

However, he was shocked when he found out that the soccer players in the scenic Area were all very flexible and had very strong physical qualities. Their strength, speed, and endurance had all reached the standards of domestic soccer players.

What these people lacked was skill.

He could even see the potential of the soccer team if they could play in a professional competition.

Besides, didn't those rich people like to own a football team? Once they became a football powerhouse, it would be a great help to their business.

Although Linlin's company wasn't listed, everyone knew that their strength was definitely not weaker than any super company in the country.

Therefore, if he could make this scenic team play in professional competitions, or even enter the top clubs, or even crush those guys, he could wash away the shame.

Therefore, he made a bet and joined the security soccer team of the scenic Area, becoming the head coach.

However, after joining the team and getting to know the security team, he was shocked. These people also ate sea cucumbers, but the sea cucumbers they ate seemed different.

It was a waste for those guys to eat sea cucumbers, but the sea cucumbers that these security soccer players ate, coupled with their hard work, had increased their endurance and physique. They were completely better than the soccer players in China.

The only thing they lacked now was technical proficiency, but they could definitely participate in domestic football competitions and were definitely first-tier players. If they were skilled and completely understood the tactics, they would be super first-tier players.

Lin Lanzi also asked Lu Tong when she saw him. coach Lu, the thing you've been talking about before. Maybe today is an opportunity. The boss wants to see the performance of the football players.

She had already heard Lu Tong mention a few times about letting the security team play in professional competitions.

She also knew that if a tourist attraction had a professional football team, it would be beneficial in all aspects.

However, she didn't know much about soccer, so she didn't dare to promise Lu Tong or tell Chairman Qin. After all, it was just a soccer team made up of a group of security guards.

Therefore, she reminded Lu Tong of what Chairman Qin had arranged for her.

Lu Tong naturally understood Lin Lanzi's meaning. He immediately nodded and said, "Don't worry, I won't let you down."

After chatting for a while, Lin Lanzi also brought her people out. They met the soccer players and walked towards the manor together.

These soccer players were also a little nervous. Although they were veterans and had seen big battles, it was their first time as soccer players.

Moreover, they did not expect that one day, as a security guard, they would be able to play football full-time, and the treatment was better than before.

On the way, Lu Tong began to think of more and more excuses in order to convince his boss to let the security team play football.

Soon, he also saw a huge Manor in front of him. The moment he saw the manor, he was attracted.

He had heard of the Linlin Manor and had seen videos of it on the internet. The beautiful scenery was very attractive.

It was a pity that he was not qualified to come to this kind of Manor to spend money. It was not that he did not have money, but that he was not qualified to spend money in this kind of place even if he had money.

It was rumored that a rich man on the list of rich people had confidently said that his application for treatment at Linlin Manor would definitely be approved. After all, he was very famous.

However, the result was that when he applied for it at the drinking session, the other party immediately rejected his application, making him a joke at the drinking session.

It was evident that not everyone could go to Linlin Manor as they wished. Compared to that rich man, 99.999% of the people were nothing.

But obviously, the boss of Linlin company didn't belong to the 99.999% of the people who came, and this rich man didn't dare to offend him.

Lu Tong didn't expect to enter Linlin Manor in such a way. He was looking forward to it.

Soon, after the security check, Lin Lanzi entered the manor with the security team.

As soon as he entered, Lu Tong could feel the different air quality and temperature. It was even better than the manor.

Immediately after, he was also attracted by the beautiful scenery of the manor's grade 2 and Grade 1 plants.

A paradise on earth was the only description he could think of.

He had been to many places in his life, but this was the first time he had seen such beautiful scenery.

He really admired the person who could build such a beautiful Manor.

Outside the hall, Lu Tong also saw his current boss, the young man who was famous as academician Qin.

But no one in the outside world knew that he was the boss of Linlin's company.

Qin Lin was also surprised to see Lu Tong.

Although he did not watch or pay attention to football, it was now the age of the internet. If you took out your mobile phone to browse the news and videos, there would always be the most popular videos pushed to you.

For a period of time, Lu Tong was the most popular player in football. He was the one who was scolded the most. He was the one who took the blame.

In the beginning, everyone was scolding him and felt that he was the one to blame. However, as the competition went on, he had done something that made people speechless. No one could blame him anymore. No one scolded him anymore.

However, he didn't expect that Lu Tong would come to his scenic spot soccer team.

"Academician Qin, is this the soccer team of your tourist attraction?" Prince Tala looked at the security team players curiously. "They seem to be pretty good. Academician Qin, why don't we find a team and let them compete?"

When Lu Tong heard this, he added, "although there is a big gap between the players of the scenic Area football team and the International players, they definitely meet the requirements of domestic professional players. Their physical strength, endurance, and strength are even better. The only thing they lack is technique. If they have a good opponent in actual combat, they can quickly become proficient in their technique.

Qin Lin suddenly turned to Prince Tara and asked, ""Your Highness, what do you think of the strength of a certain force in our country?"

"Pfft!" Prince Tala suddenly sneered and asked in surprise, ""Academician Qin, I didn't do it on purpose. I'm really just telling the truth. Is your country's football team really capable?"

This made Minister Lu and the others feel very awkward, but it was only a fact. What could they do?

Prince Tara, "Qin Lin said with a smile, "who do you think will win if the security team plays a game with someone from a certain football team?"

When Prince Tara heard this, he actually started to think seriously. "That's really hard to say. We'll have to see if it's the security team or some other team that's doing better."

"Prince Tara," Qin Lin suggested, "let's play a more interesting game."

Oh? " Prince Tala's interest was piqued. what game? " Is it related to football?"

Qin Lin nodded and said, "what do you think about letting my scenic spot's soccer team participate in the world Cup qualifiers?" They might even make it to the World Cup."

"What?" Prince Tala was shocked by Qin Lin's words. it seems that amateur teams can't participate in the world Cup, not even professional teams. They must be based on countries.

Qin Lin said, " we have four spots for the World Cup in Asia. All the countries in Asia can participate. There's a country called vanidoa in Asia. It's not big and has a football team. However, due to its financial situation, it can't gather enough players.

Prince Tara's eyes widened when he heard this. "I understand. Let these security players be foreign aid and then participate in the game?"

He was a person who loved to play, so he understood this point after a while. He even became very interested. "It's just that these procedures are difficult to handle. It requires the procedures between the two countries. I'm afraid it won't be in time before the world Cup qualifiers."

"That ... I can request for help from the higher-ups." Minister Lu suddenly said.

He was also inexplicably interested.

To be honest, he knew a lot about the club, and everyone knew what was going on in the dark. However, he was not qualified to meddle in it, and there were many things that were involved.

Moreover, this 11-man sport was really popular, but they didn't care.

However, if these security teams could participate in the world Cup qualifiers with a certain football team, it would be fun if a certain football team did not enter the World Cup and these security teams did.

When the time came, some people should really reflect on themselves. Otherwise, they would really have no excuse and public opinion would make them unlucky.

I'll take care of vanidoa, " Prince Tala said. they're not financially stable, right? " I'm going to throw in some money."

The Prince was really domineering when it came to money.

Seeing this, Qin Lin also directly said to the security football team, " alright, you guys can start preparing now. We'll be participating in the world Cup qualifiers!

.

The security guards were dumbfounded. They were only security guards, and how long had it been since they formed an amateur team?

They were going to play in the world Cup just like that?

Lu Tong was also dumbfounded. He had wanted the security team to play in professional competitions, not the World Cup.

This jump was a Little Big.

The key was that these people wanted to send a team of security guards to play in the world Cup. Was this the world of the big shots?
