

The Game 1611

[Chapter 1611 Brainwashing! The Street Lights Aren't On! 2](#)

"What's the matter?" asked Qin Lin.

Zhao Moyu immediately said, "it's all because of little Qin Feng. Didn't we agree to let him go to the kindergarten earlier? I wanted to discuss with you which kindergarten he should go to, and then whether we should hire a primary school teacher for him to teach him the primary school curriculum first. We can't waste his talent.

When Qin Lin heard Zhao moyi's words, he looked at her in shock. He even wondered if little Qin Feng was her biological son.

This was too ruthless. How old was he? he had already hired an initiate teacher and now he wanted to hire a primary school teacher.

He looked at little Qin Feng with sympathy only to find that little Qin Feng, who was playing with da Bai, was already looking at him pitifully. There seemed to be tears of grievance in his eyes.

Qin Lin immediately understood. In fact, he did not need little Qin to have much achievements in the future. Moreover, with the influence of the fetus, he was not worried that little Qin Feng would not have any achievements.

Moreover, he didn't think that a person's future achievements would be determined by their studies at such a young age.

Therefore, he also said to Zhao mochen, "wife, some things can't be done quickly. Moreover, our son has inherited my talent. You shouldn't worry about his future achievements. Do you think I'm working so hard? "I hope that our son will be like me in the future, playing and doing whatever he wants. He will even produce results and do whatever he wants."

Although Zhao moyin hoped that his son would succeed in life, he had to consider his husband's words. In the end, he could only sigh and say, "You can just pamper this little guy!"

With that, she returned to the bedroom.

When little Qin Feng saw this, he immediately ran over and hugged Qin Lin's legs. He said happily, ""Daddy, you're the best."

Qin Lin glanced at the bedroom and said to little Qin Feng, "my good son, go play by yourself. Your mother is angry. I want to go in and help her calm down.

Qin Lin was about to walk to the bedroom when he saw the paper in Qin Feng's hand. "Let daddy see the paper in your hand!"

Little Qin Feng nodded and handed Qin Lin a piece of paper with something drawn on it.

Qin Lin took it and looked at it. Although the drawing was crooked, it was obviously a mechanical diagram of gears, which surprised him.

"Son, how do you know how to draw this?" Qin Lin couldn't help but ask.

"I can see it. I like it, so I drew it." Little Qin Feng replied innocently.

Qin Lin didn't ask any more questions after hearing this. Little Qin Feng had a good memory. He could remember where he saw it, and it was possible for him to draw it down. It was just that his drawing skills were not up to standard.

After that, he also entered the bedroom to look for Zhao Mo. It did not matter whether he was comforted or not. He just wanted to take a shower.

In the living room, little Qin Feng had returned to Great White's side. He looked up at the empty ceiling, then lowered his head again and again, drawing on a piece of paper with the pen in his hand.

It was another gear mechanical diagram.

Unfortunately, halfway through the drawing, little Qin Feng mumbled, "'I can't see it."

As he said that, he even reached his hand up to his head.

After that, he also put down his pen wash before hugging da Bai and playing with it.

On the side, the Yangzi called little yang obviously wanted to join in on its master's fun, but it was too timid to get close to da Bai. After biting da Bai last time, the other party didn't suffer any injuries, so in its eyes, da Bai was probably an extremely terrifying creature.

Qin Lin entered the room and locked the door. Not long after, a strange sound came from inside.

. (200,000 words were omitted).

The sky gradually darkened. When Qin Lin and Zhao Moyu came out of the bedroom, Lin Fen had already prepared dinner.

After Qin Lin finished his dinner, he waited until late at night before he went up to the roof again. He locked the door, entered the utility room, and began to move a trimmed street lamp tree out of the game. Then, he moved it to the roof outside.

Repeating this process, he took out more than 10 street lamp trees that he had pruned and arranged them on the roof.

After doing all this, the entire rooftop was illuminated by the light of the street lamp tree, as bright as day.

At this time, most of the people in the manor were resting. The waiters on duty in the hall did not notice the situation on the roof at all. However, inside the manor, the two security guards patrolling the area were attracted by the situation on the roof.

"Why is the rooftop so bright?"

it's very bright. It should be something that Chairman Qin put on it, right? "

The two of them looked at each other curiously, but they didn't care much. After all, it was just a light, and they didn't think there was a problem.

.

The next day.

Qin Lin got up early in the morning and called Yu Shui. As soon as the call went through, he ordered, "get someone to open a crane to the manor. I have some cultivated trees to move down from the roof.

Yu Shui never questioned her boss's orders. She would always execute them immediately.

So, not long after, Yu Shui brought some people to the manor, along with a crane. This crane was also checked by MA Hong and the others before it was let in.

Yu Shui gave Qin Lin a call and led her people into the inner area. Qin Lin took them to the rooftop.

As soon as he reached the rooftop, he saw the trimmed trees.

I've been cultivating these trees for a long time. They're almost done growing now. Take some people with you to get these trees down and plant them next to the street lights in the manor. Qin Lin pointed at the streetlight trees and said.

These words were also a little brainwashing. 'The tree was cultivated long ago'. This was the key.

As long as someone asked Yu Shui, Yu Shui would spread the exact words, creating an illusion.

Yu Shui had never thought that her boss would dig such a hole for her. She had already begun to arrange for people to take action. At the same time, she had also quickly raised the crane below.

These things were very simple for the people of the plantation Department. It didn't take long for Yu Shui and the people of the plantation Department to remove the street lamp trees.

Yu Shui also led her people back down to the bottom at the first moment.

After all, his boss had said that he had to plant these trees next to the street lamps in the manor.

Although he didn't know why he had to be by the roadside lamp, he would faithfully carry out his boss's orders.

The actions of Yu Shui and the others obviously aroused the curiosity of academician Hao and the others.

Academician Hao came out and looked at the streetlight trees. They were not botanists, so they could not see what was wrong with these trees. They were not trees that existed at the current stage. Moreover, even a botanist might not be able to remember all the trees.

"Manager Yu, what is this for?" Academician Hao asked Yu Shui curiously.

academician Hao, " Yu Shui immediately said, " the boss has been cultivating these trees for a long time. They've just matured, so he asked me to transport them down from the roof.

"En!" Academician Hao looked at the streetlight trees and nodded. Even if these trees grew very quickly, it would still take at least three years for them to grow so tall. They probably started cultivating them after the manor was built ...

They just didn't know what was so special about this tree. After all, it had been cultivated by a monster like boss Qin for such a long time. They didn't notice this thing on the rooftop before.

However, it was not strange. They had never been up there, so it was impossible for them to know.

Obviously, academician Hao didn't know that Yu Shui's words were just a ruse.

Yu Shui didn't waste any time. She began to plant the seeds of the street lamp trees next to the street lights in the manor.

However, the people from the plantation Department were very confused.

"What do you think this tree is? Why do you have to plant it next to the street lamp?"

who knows? the things that Chairman Qin is training are definitely not ordinary.

".."

Naturally, the staff of the manor, as well as people like academician Hao, were also curious.

There should be a purpose for planting it next to the street lamp, right?

Qin Lin sent a message to Lin Lanzi and asked the electrician in the scenic Area to come over and take care of all the street lights in the manor.

He planted the street lamp tree next to the streetlights to see the effect, so he naturally had to turn off all the streetlights.

The night slowly descended.

Academician Hao and the others finished eating Master Lin's herbal dishes in the manor's Hall. Although Master Lin's herbal dishes were not as good as boss Qin's, they were still better than many other foods and herbal dishes outside.

He, academician Zhu, and academician PEI were used to going for a walk around the manor after eating.

The three of them went out as usual. The street lights in the manor had long been lit up, illuminating the surroundings.

"Something's wrong. This Deng Guang!" Academician Zhu suddenly said. Then, he looked at the streetlight in the manor, and a stunned expression appeared on his face. The streetlight was dark, and it was not turned on at all.

[Chapter 1612 The Remaining Tens Of Billions! Mutant Bird! 1](#)

Academician Zhu was surprised to see that the streetlight was not turned on.

The street lights were not on, so where did this light come from?

He looked left and right, and then saw an even more incredible scene. The light in the surroundings was actually coming from that tree.

And wasn't that the tree that boss Qin had been cultivating for several years, the one that manager Yu had just taken down from the rooftop?

They had been curious about the tree's function before, but now he knew that the tree could be used as a street lamp.

It was simply unbelievable that a tree could actually light up at night, and it was like a street lamp, illuminating the surroundings.

It was completely different from the fluorescent lights on fairy tale mountain. It could be used on the main road as a street lamp.

The scene in front of him explained everything.

Academician Hao and academician PEI were also in disbelief.

They also noticed the abnormality of the streetlights and the streetlight trees that illuminated the surroundings.

"Is this the new result of boss Qin's research?" Academician Hao said in disbelief.

this tree can be used as a street lamp! academician PEI exclaimed. if this tree can be promoted, how much money and energy can we save for the country in a year? "

Academician zou and academician Zhu nodded in unison. That's right, the annual consumption of street light electricity in the country was a terrifying amount.

And more importantly, why were there so many worldly problems with the National and village roads? It was because it was dark and there were no street lights.

However, the country couldn't possibly build street lamps for the National and rural roads, right?

How much would that consume?

However, with the tree in front of him, it was different. Even if all the roads were planted with green plants, it would still be fine. After all, many national Roads had roadside green plants.

If that was the case, the whole country could probably be illuminated by road lights.

That would definitely be very shocking, right? When they looked down from the plane, they would see the roads connecting all parts of the country. The endless light would be an absolutely unimaginable scene.

Academician Hao couldn't help but take out his phone and take a video of the street lamp tree. He then sent the video to Minister Lu.

I'm sure Minister Lu will be very interested in this tree.

Beijing.

In the Chinese hospital, Minister Lu came out of his office and was about to attend a Research Meeting on the soaking grass and color-changing tree.

They had already developed a way to plant and spread the kimchi grass on a large scale. It would not be long before the fire protection system in all parts of the country could be used. The fire fighting suits could also be completely reformed.

On the other hand, the research progress of the color changing tree was very slow. After all, it was very difficult to rely on the color changing tree to completely develop the stealth combat suit. During the process of changing color, the combat suit would more or less reveal flaws.

Fortunately, the current combat uniform had a terrifying effect at night. Furthermore, they had secretly tested it out a few times.

As for the unlucky ones, they were the International mercenaries. They didn't even understand what was going on before they died.

Minister Lu looked at the message he received on his phone. When he saw that it was from academician Hao again, he was a little conflicted.

Nowadays, academician Hao was a little mischievous. He liked to send videos to provoke him.

He thought about it and clicked on academician Lu's video. It was one thing to be excited, but what if there was an unexpected surprise?

Therefore, he clicked on the video and saw the glowing tree.

"This tree ..." At first, Minister Lu subconsciously thought of the fluorescent plants on fairy tale mountain, but he immediately found that something was wrong. The light they emitted was not right, and then the range of the light curtain.

'This ...'

He realized something and immediately called academician Hao. The moment the call went through, he asked, ""Academician Hao, is the tree in the video boss Qin's new product?"

Academician Hao smiled and said, " Minister Lu, you're right. It's boss Qin's new product. Also, boss Qin has been cultivating this tree for several years. This is probably the finished product that he has spent the most time on. This tree can completely replace street lights. Do you know what this means? "

Minister Lu naturally knew what this meant. All over the country, tens of billions of dollars were spent on street lights every year.

Don't think that this money isn't a lot. How many things can tens of billions do? He could even create a super-rich person on the rich List.

This was only a year, and this tree could replace the street lights, which meant that he could save that much every year.

At the thought of this, Minister Lu didn't care about the meeting anymore and asked his Secretary to book the fastest flight ticket.

So, the next afternoon, Minister Lu appeared in front of Qin Lin with a tired face. "Boss Qin, that tree can replace the street lights?"

Qin Lin looked at Minister Lu's anxious look and said, ""Yes, it can be completely replaced."

"Are there any restrictions?" Minister Lu asked immediately.

Qin Lin shook his head and said, "no, these street lamp trees, well, I named them. They should be able to be planted everywhere. It's just that they're not used in different environments, so their growth rate will be affected. However, they grow very fast, and the light they emit is very clear on rainy and foggy days. This effect is much more useful than street lamps.

"It's more than just useful. This is very useful, okay?" Minister Lu said in disbelief.

There were no environmental restrictions, fast growth, and clear light on rainy and foggy days. This was what he wanted.

"Boss Qin, can the branches of the street lamp tree be transplanted?" Minister Lu asked in a hurry.

[Chapter 1613 Tens Of Billions Left! Mutant Bird! 2](#)

"I haven't tested this yet." Qin Lin said honestly.

then hurry up and do the experiment. If it's successful, then this thing will be awesome. Your reputation can be comparable to Edison. Minister Lu urged impatiently.

Why would Edison be remembered by people all over the world? It was because he had developed light bulbs that everyone was using. Whoever saw light bulbs would think of him.

If this street lamp tree could be promoted, everyone would be able to see it. When foreigners saw it, they would definitely bring it in. Boss Qin would not be far from becoming a world-famous scientist.

Otherwise, even if boss Qin had come up with so many things, his reputation abroad was still very small, because the Western countries had blocked all the research and information about boss Qin.

There were many things that they couldn't study or crack, so they simply used this method.

Qin Lin saw that Minister Lu was in a hurry and smiled. He stood up and left the office with him.

Experimenting with transplanting branches was actually very simple. Anyone who knew a little about planting would know how to do it. Moreover, this street lamp tree had an attribute of growth speed +2. If it could be transplanted, it would survive very quickly and grow roots.

Qin Lin called Yu Shui over and told her about this.

Yu Shui didn't hesitate. She immediately got busy with two employees of the plantation Department. Not long after, rows of street lamp tree branches were transplanted to a field in the plantation Department.

Minister Lu also stayed in Linlin Manor and went to check on the transplanted street lamp tree branches every day.

A few days later, he ran to Qin Lin excitedly. boss Qin, this is unbelievable. It's only been a few days and the transplanted branches are still alive. Furthermore, the transplanted branches are even glowing.

Qin Lin did not expect this. According to his original plan, the transplanted branches should grow again and then mature before they would shine.

Who knew that the transplant would light up after it survived?

He thought for a while and roughly knew what was going on.

Because this branch had been cut from the mature street lamp tree.

There must be a reason why the street lamp tree would only glow when it was mature. Some kind of hormone must have been catalyzed to completion.

This branch was a part of the mature street lamp tree, and it had also been catalyzed to completion, so it could emit light.

If that was the case, the street lamp tree would be promoted even faster.

After all, it also had the attribute of growth speed +2.

At night.

Qin Lin and Minister Lu went to the fields of the plantation Department to have a look. Sure enough, the transplanted branches were shining brightly in the dark.

"Boss Qin, ask manager Yu to help me cut some more branches tomorrow. I'm going to take them back to the capital." Minister Lu immediately said.

Qin Lin nodded and called Yu Shui to make the arrangements.

On the second day.

Minister Lu pulled Yu Shui to trim the street lamp trees, then hurriedly left the city with the cut branches and returned to the Hua Yuan in the capital.

As soon as he returned to the Chinese hospital, Minister Lu called the person in charge of the plant Research Department.

"Minister Lu, what's your order?" The person in charge of the plant Research Department asked as soon as he came in.

Minister Lu immediately pointed at the branches and said, ""Take some people and quickly transplant these branches. Also, take good care of them."

The person in charge looked at the branches in confusion and asked, ""Minister Lu, what are these things?"

"This is boss Qin's latest research," Minister Lu explained.

"Ah. Academician Qin's latest research?" The person-in-charge was shocked. He immediately called for someone to transport the branches back.

What a joke, this was academician Qin's research.

If one had to say which Department in the Chinese Academy of Sciences was most convinced by academician Qin, it would be the plant Research Department.

They had long been convinced by academician Qin's Plant Research ability.

In their eyes, there was no other Plant Research expert in the world who was better than academician Qin. Even academician Li Kai was not better.

Now that academician Qin's research product had appeared, they naturally had to check and study it immediately.

Academician Qin's every successful Plant Research would benefit them greatly.

Soon, the branches of the street lamp tree were transplanted to an experimental site in the Hua * Yuan.

A few days later, Minister Lu found an old leader. This old leader was a little old, but he was full of energy. He was the leader in charge of energy.

"Little Lu, why are you here?" The old leader was surprised to see Minister Lu. "Could it be that the Chinese People's Hospital has made a breakthrough in their research on energy?"

old leader, I have a surprise for you, " Minister Lu said with a smile. do you mind being a guest at the Hua hospital tonight? "

The old leader was even more curious when he heard this. He agreed and followed Minister Lu to the Chinese courtyard.

In the night, at an experimental plot in the Hua * Yuan, the old leader and Minister Lu saw the transplanted branches.

In the darkness, the incandescent light emitted by the branch was unusually bright.

"Little Lu, this is?" The old leader hurriedly asked, as if he had some guesses about the branch. He had managed the energy all his life, so naturally, he had not managed it for nothing.

old leader, " Minister Lu explained, " that's a street lamp tree. The light it gives off can replace street lights, but it can only do so when it grows up.

"Really?" When the old leader heard this, he was obviously a little unsettled.

As the roads developed and the number of street lamps increased, the consumption of electricity had always been a matter of great concern to him.

He had also been troubled by this matter, so he had tried to promote the solar lamp technology. Unfortunately, this technology had too many restrictions, and to a certain extent, it had not yet matured, so there was no way to promote it.

However, he did not expect to be told that the power consumption of the streetlights could be solved today.

However, he knew that little Lu would not speak without thinking in this regard.

The old leader could not help but ask, "little Lu, this ..." Who developed this thing?"

"It's that boss Qin!" Minister Lu said immediately.

"He's the one ..." The old leader was surprised. He had heard of this person a long time ago. The higher-ups said that it was a lucky thing for the country to have such a young man.

..

Linlin Manor.

After Qin Lin was done with the streetlight tree, he looked at the game screen again and controlled his character to go to the ranch.

There were also new buildings in the ranch.

The building was a little strange. It was called a mutated bird house.

Qin Lin didn't know what a mutant bird was. He only saw the note of the mutant bird house:

[the mutated bird is a special type of bird. It was found by bird experts in ore town on Mount goddesses. It's a very beautiful bird that likes to land on sycamore trees.

Moreover, this mutant bird house is also made of Sycamore wood. After the mutant bird house is built, you can raise mutant birds, but there is a limit. One character can only buy four mutant bird hatchlings.]

This was the first time Qin Lin had encountered such a situation.

In the past, no matter if it was for planting or breeding, there was no limit to the purchase of seeds and Cubs, no matter how rare they were. What was the meaning of this? There's actually a purchase limit of only four?

However, this piqued his curiosity and he chose to build a mutated bird dormitory.

[building mutant bird dormitory ...]

Qin Lin didn't have to wait long before the notification appeared again.

[the construction of the mutant bird dormitory is completed. You can now purchase mutant bird hatchlings.]

Qin Lin immediately controlled his character to go to the store of ranches 'young birds and found the NPC. There was indeed an option for mutant bird young, and there was a limit to the number of mutant bird young that could be bought. Only 4 mutant bird young could be bought.

Qin Lin didn't buy four at once. Instead, he bought two.

These mutant birds were obviously abnormal. He wanted to buy two to check out the situation first. Leaving two slots to buy them, he could still have some space to operate.

[the two mutant birds you bought have been sent to the farm!]

Qin Lin saw the notification and controlled his game character to go back to the farm. When he arrived at the mutant bird house, he was stunned by the two young birds.

But what was wrong with these two cubs? Two of them were bald, without any fur.

And why did he look like Chicky?

Yes, there was a picture of chicks eating rice on the internet, and the two mutant birds looked exactly like the chicks in the picture.

What the f * ck is this?

A mutant bird?

The game wouldn't cheat the players, would it?

[Chapter 1614 Is This A Man-Eating Flower?](#)

Qin Lin looked at the game screen. The two naked baby mutant birds were pecking at the ground as if they were looking for insects to eat. He was speechless.

In front of him was a picture of a living chicken pecking at rice.

Damn it, the mutant bird that could only be bought with a limit of four for viewing purposes was this ugly thing?

Qin Lin felt that this was a prank by the game designer, so he simply controlled the game character to go to the seed shop in ore town to check the seeds.

After his character leveled up and the special land was developed, the street lamp tree wasn't the only special seed that would be released.

[mutant flower seed: special]

[this is a special seed. It's a mutation of a certain flower and has special effects. You'll only know its specific attributes after it matures.]

Alright, he didn't even know the rough attributes of this seed. Just like a blind box, he had to guess blindly. He could only know the attributes of this plant after planting it.

He didn't even know if it was good or bad.

So, was the game producer a fraud?

His answer was certain.

But no matter what, with an asterisk and a special one, this seed was definitely not ordinary.

Moreover, there were new seeds, and the street lamp tree had been planted, so he definitely had to buy them to plant.

After buying the seeds, Qin Lin controlled his game character to return to the farm and planted the mutant flower seed on the newly opened special land.

After doing all this, Qin Lin left the office.

When he arrived at the hall, he saw that academician Hao, academician Zhu, and academician PEI were busy again.

It was obvious that the experiment arranged by Minister Lu had made progress and verified the results of the three academicians.

Qin Lin was a little happy to see this.

He knew how great the three academicians' research project was. It was a technology that could allow humans to enter space.

If humans could really enter space and the transformation of the small planet could be successful, then their people really would not need to worry about the worsening environment and the lack of energy on earth.

Then, even if the earth was destroyed, their people would still be able to survive.

Academician Hao and the others were researching this kind of technology.

Even though it would take a long time for the research to succeed, the three old academicians were still moving forward step by step.

Therefore, he had to show respect to these three academicians.

Qin Lin strolled around the manor and returned to his office. He had nothing to do, so he locked the door and entered the game world with a thought.

Feeling the gentle breeze from all around and the fragrance of the ranches and fields, it was really a different feeling.

To be honest, even if the Linlin Scenic Area had developed to its current state, it was still next to the city. The problems of the modern world were too serious, and it was impossible to have the feeling of the game world.

Qin Lin left the farm and went to ore town again.

Now that he had leveled up, it was a real town.

There were all kinds of shops.

It could be said that there was no difference between him visiting you city and ore town.

Qin Lin soon entered a Street that specialized in clothing.

It should be a special clothing area.

However, a Clothing store quickly caught his attention.

"Make your other half unable to ***, **** clothing!"

This Clothing store's signboard and clothes were a little cool, and they attracted the attention of men.

Qin Lin walked in subconsciously and was immediately attracted by the clothes in the store. He was dumbfounded.

Those sexy silk stockings and sexy pajamas, why did they look so familiar?

His mind was filled with attributes like tear resistance and happiness.

Previously, these stockings and pajamas could only be bought from television auctions. It had to be said that Zhao moyin had a lot of fun wearing those clothes.

However, it had been a long time since he had seen a TV show that filmed these clothes.

He didn't expect to see a shop that specialized in this kind of clothing when he strolled around in ore town today.

This was a pleasant surprise.

However, he still had to look at the attributes.

He immediately stepped forward and touched the stockings.

[special silk stocking: Grade 2]

[this is a special pair of silk stockings. Made with special threads and craftsmanship, it has special attributes:[tear resistance +2, tear pleasure +2, arouse desire +2]

Then, she touched her pajamas.

"Special pajamas: Grade 2"

[this is a special nightgown. It is made with special threads and craftsmanship. It has special attributes:Trigger desire +2, trigger blood flow +2, stimulate men's **+2]

Qin Lin looked at the two remarks and was stunned.

Not only that, but it was also an upgraded version.

In the past, it was only +1, but now it was +2.

He was so happy in the past, so wouldn't this +2 increase his happiness?

Most importantly, the designs this time were different. The designs of each style really showed that the designer understood men.

It was perfect.

At the thought of this, Qin Lin hurriedly took a cart and quickly loaded the two types of clothes.

The shop assistant looked at Qin Lin in surprise.

Was he here to buy these clothes or to restock?

Moreover, could his body take so much?

Qin Lin didn't care at all. He paid for it right after he made the purchase. However, he didn't leave immediately after paying. Instead, he asked the shop assistant a lot of questions.

For example, how to purchase the clothes and the contact information of the manufacturer.

Finally, Qin Lin managed to get the contact information of the manufacturer.

He couldn't wait to call the other party. As soon as the call went through, the other party's voice came through, " Hello, this is dream clothing company. May I know what you need? "

[Chapter 1615 Is This A Man-Eating Flower?](#)

I have a question, " Qin Lin asked directly. if someone wants to buy your company's production technology, will you sell it? "

"toot du du!"

The blind tone was heard.

".. "Qin Lin was stunned.

This was also ... He didn't give them any face.

Even if you don't want to sell it, you can at least talk it out, right?

Name a price.

Giving him a price that he couldn't accept was also a tactful rejection.

Or did the other party think that he was making a nuisance call to make fun of him?

It shouldn't, right?

He had no choice but to take the clothes he bought back to the farm.

When he logged out of the game, he didn't take the clothes out immediately. Instead, he went to his bedroom and locked the door before entering the game. He took all the clothes out and stuffed them into his closet.

There were so many of them, one set a day, and it was enough for Zhao mochen to change for a long time.

The key was that he was not afraid of losses this time, so he could go back to ore town to buy more.

After some thought, he took out another set and took out his phone to take a picture.

He felt that these designs were really designed for men's aesthetic, so he also took photos one by one and felt that he should share them for the benefit of men.

He directly uploaded the photo to a popular website, and he believed that it would be promoted very soon.

Sure enough, at night, Qin Lin returned to his office after dinner. He took out his phone and scrolled through a Short Video. He found a video of those photos.

It was actually reposted and made it to the hot topic. It was very popular. Clearly, many men were working hard.

Even in the comments section, there were many messages from clothing manufacturers wanting to contact the manufacturer to buy the copyright of the appearance.

These were still law-abiding people. Some of them might have already started to make pirated copies.

Qin Lin smiled, feeling that he had done a great thing.

Then, he looked at the game screen in his mind and controlled the game character to go to the farm to see the two mutant bird fledglings.

At this time, the two mutant bird hatchlings had grown a lot and had grown a lot of feathers. However, they were gray and did not look pleasing to the eye.

More importantly, it was not like a chick pecking at rice anymore, but a pheasant pecking at rice.

If the last mutated bird was like this, he would have already cursed the lousy game producers if they had anything to do with viewing.

After that, Qin Lin controlled the game character to go to various places to touch the plot tasks, but unfortunately, he didn't get anything. Then, he controlled the game character to go to the lake mine to mine.

After the game character leveled up, the natural mine opened up to a new level.

It was a pity that after digging two layers, he didn't get anything other than ores and special soil.

He really didn't lack special soil.

Therefore, he decided not to dig any more and took out a design.

Looking at the design plan, he pulled up the development progress of the sci-fi Park from the computer.

This is the special Science Park design drawing.

As long as the sci-fi attraction was developed according to this design and the similarity reached 80%, a special attribute would be generated: Shock of technology +2, sense of technology +2, sense of science +2, scientific research worker's technological enlightenment +1, state of technology +1, technological atmosphere +2 attributes.

Naturally, this was only the overall design. The detailed changes in the internal design would not affect the overall.

For example, the accommodation of Transformers such as the bull Demon King and the great sage equal to heaven was only a small project and did not affect the overall structure.

However, he still had to be careful.

Qin Lin looked at it once and found no problems with it. Then, he put away the design plan and left the office to go back to the inner area. He might as well go home and spend time with his wife. After all, he would be sorry if he didn't play all night.

Lu Feng returned to the inner area of the manor. As soon as he entered, he heard little Qin Feng say, "daddy, mommy seemed to be angry just now. Quickly go and let mommy calm down.

Lu Feng was stunned. Why was Zhao mo angry?

Could it be that this little fellow had provoked her again?

However, it was just to calm down. There was nothing that anger couldn't be resolved.

Moreover, today wasn't as simple as just one night.

Lu Feng entered the bedroom and locked the door. He saw Zhao mochen sitting in front of the computer and was busy. He went up and asked, "What's wrong? Little Qin Feng said you're angry."

Zhao Moyu was a little speechless when he heard this, "this little guy even knows how to show off to his mother. I forgot to save the financial statements I made yesterday and turned them off. I have to do it again today, so I just mumbled a few words when I thought of it."

"I'm just concerned about you!" Qin Lin said with a smile. He then walked to the wardrobe, opened it, and took out a set of pajamas and stockings. He handed them to Zhao moyin and said, try it on. This is the pajamas I bought for you.

Zhao mochen subconsciously looked at the set of pajamas, and his pretty face instantly turned red.

Naturally, she recognized it. She had an impression of the pajamas. It was that kind of pajamas.

In the past, her husband would always go crazy when he had this.

"Bah!" Zhao Moxi rolled his eyes at Qin Lin, but he still took the initiative to pick up the pajamas and stockings.

They were already an old couple, but she wasn't embarrassed. Instead, she felt a little excited. After all, a married couple also needed new fun, right?

.. (Deleted after review, 50000 words omitted).

The next day.

Qin Lin's entire body felt comfortable.

He had to admit that the +2 attributes really made him experience what true happiness was.

Really, it would be such a pity if he couldn't purchase the production method for this item.

However, after the game had been upgraded, the ore town had become real. There must be a way to buy the technology, right?

It was said that Women's Business was easy to earn, but men's business was just as easy to earn, especially in this kind of product.

So, do you know what one of the pillar industries of the country of medicine is?

Only when this technology is created will it really become popular, okay?

Qin Lin glanced at Zhao moyin, who had no strength left in his body and did not want to get up, and smiled proudly.

The man's fighting strength was enough to make him proud.

This was all thanks to the two fruits of the tree of strength, otherwise, that kind of happiness would have really destroyed his body.

It was just that Zhao Moyu's physical fitness could not keep up, and he was not happy enough. Maybe when he could get her a fruit of the tree of strength to eat?

He would never be stingy with his wife.

After letting Zhao Moyu rest, Qin Lin took a shower and went out of the hall. He checked out the game world and was suddenly stunned. He looked at the newly opened dream-like special land.

There were many huge flowers growing on the ground. The flowers were colorful and beautiful, and they were very pleasing to the eye. But what was with the structure of the middle opening and closing like a mouth?

"Man-eating flower?" Qin Lin was stunned.

The so-called mutant flower was a man-eating flower?

Wasn't the lousy game producer cheating people?

If you don't have the skill or ability, don't come and make games.

He probably couldn't even take this out. Even if he did, he would probably scare people.

However, what made him feel strange was that the seven Dwarves were already busy in the special land, harvesting the man-eating flowers.

The man-eating flowers surprisingly did not attack the 7 dwarves, otherwise, they would have been swallowed by the man-eating flowers.

Even the dwarves couldn't resist it.

Soon, the dwarves harvested the man-eating flowers and placed them in the yard that was specially used to store plants.

Qin Lin entered the game world with a single thought. He went to the courtyard and saw the man-eating flowers.

These man-eating flowers' roots were wrapped in soil and plastic, but he could still see the roots that were exposed. They were very special, like water pipes, but also like a transformation system. The structure was very strange.

As he walked forward, the man-eating flowers did not attack him. They seemed to be very gentle and did not attack him at all.

This did not match the characteristics of the man-eating flower. After all, the man-eating flower had the attributes of a Hunter. In the eyes of the man-eating flower, he should be a delicious piece of nutritious food.

He touched one of the man-eating flowers and immediately saw the remarks on its attributes, which made his face reveal a look of disbelief.

[trash man-eating flower: +3]

[this is a special mutated man-eating flower. It seems to have been subjected to some special light radiation in the goddess mountain, giving it the characteristic of liking garbage.[soft garbage digestion +3, hard garbage identification +3, recyclable garbage soil nutrient conversion +3, non-polluting conversion +3!]

[Chapter 1616 The Magical Man-Eating Flower \(1\)](#)

[trash man-eating flower: +3]

[this is a special mutated man-eating flower. It seems to have been subjected to some special light radiation in the goddess mountain, giving it the characteristic of liking garbage.[soft garbage digestion +3, hard garbage identification +3, recyclable garbage soil nutrient conversion +3, non-polluting conversion +3!]

Qin Lin was a little surprised when he saw the note.

What was the meaning of this?

Was this the attribute of the mutation?

In the beginning, he felt that this man-eating flower was strange.

Now, he felt that this thing was a little awesome.

Moreover, it was a f * cking +3 grade. With those attributes, it was simply awesome.

Digestion of soft garbage +3, identification of hard garbage +3!

This seemed a little difficult to understand, but after thinking about it, it seemed to make sense.

The soft garbage was made of plastic and fruit peels.

And this man-eating flower could actually digest this garbage, what did that mean? Garbage processor.

One must know how much the world had to pay for garbage disposal every year.

Moreover, a garbage processor was not cheap, and it consumed a lot of energy.

Now, the mutated man-eating flower actually had such an effect.

In addition, the man-eating flower also had the +3 attribute of identifying hard garbage. This should mean that it could also distinguish iron and copper garbage, which was equivalent to the function of garbage classification. It was simply too powerful.

When the time came, he would find a place to plant a pile of mutant garbage man-eating flowers, and then he would just have to throw the garbage into it.

The mutated man-eating flower could even eat and digest the food.

Those that couldn't be eaten or digested were definitely hard garbage, so they could be directly taken away and sent back to the furnace.

This was both f * cking convenient and fast.

Of course, if that was all, it could not be said that the mutant man-eating flower was awesome, but it also had the attribute of +3 nutrient conversion from recycled garbage soil and +3 uncontaminated conversion.

This was a heavenly Bull.

In other words, after the man-eating flowers ate the soft garbage, they would turn the garbage into nutrients that were beneficial to the soil.

It was the land where the man-eating flower had mutated.

He immediately thought of the man-eating flower's special roots. Their structure was not right. Now, it seemed that they were used to release nutrients from the digestion of garbage.

It was like a pipe.

He suddenly thought of something. What was this converted paint? It couldn't be the man-eating flower's poop, right?

'This ...'

However, this was not important. The key was that this transformation was not contaminated.

There was a lot of harmful garbage in the soft garbage. After the man-eating flower digested it, the harmful substances were probably absorbed by themselves and converted into nutrients.

Moreover, the uncontaminated transformation was A +3 attribute. One could imagine how awesome this effect would be.

He just didn't know how much nutrition this kind of absorption would provide to the man-eating flower itself?

However, one thing was for sure. If he found a barren land and planted such mutant Piranha flowers, not only would he have an additional garbage disposal site, but it would also become fertile after a period of time.

For example, long-term farming would cause the soil to lose nutrients and become barren.

Just like the Linlin watermelons now, many fields in you city and villages grew Linlin watermelons. Because the watermelons were not seasonal, they could be planted in the winter. If they were planted continuously, the land would be wasted.

Therefore, after the people of you city harvested a season of watermelons, they had to let the land rest for a while. They also had to fertilize the soil and reduce the amount of plant ash.

However, it would be a different story if he had the mutant man-eating flower.

then you city could plant mutant man-eating flowers in the fields and throw rubbish for them to eat. The man-eating flowers would constantly replenish the nutrients in the fields.

In this way, even if they planted Linlin watermelons all year round, it would not cause any damage to the soil.

On the contrary, if the mutant man-eating flower were to be promoted, even a country would cry immediately, because that country's main industry was to recycle and dispose of garbage from all over the world.

As he thought about it, Qin Lin took out another transplant pot and transplanted a man-eating flower into it.

Then, he logged out of the game again and returned to the main hall of the inner area. He saw his son, little Qin Feng, writing and drawing something.

Qin Lin walked past it and took a look. It looked like a gear, but the structure of the gear seemed a little strange.

Little Qin Feng had only drawn half of it, and it was crooked. He couldn't see anything at all.

He didn't know where the little fellow had seen the gear diagram.

Could it be from academician Hao and the others?

Academician Hao and the other two were doing research in the manor. MA Hong and the other security guards would check anyone except for little Qin Feng.

Even academician Hao and the other two seemed to know that little Qin Feng had inherited Qin Lin's talent, so they were very happy for the little guy to come and watch, as if they wanted to attract the little guy's interest in scientific research.

Even the recorder sent by the Chinese Academy of Sciences would often take pictures of the three academicians teasing little Qin Feng. He even joked that if the little guy became a scientist in the future, he would definitely be influenced by the three old academicians.

In the future, these photos might become very powerful proof.

However, the recorder didn't know how many people would be shocked when these photos were exposed decades later.

Qin Lin had something important to do, so he didn't think about it. He went straight to the rooftop of the manor and went into the utility room. Then, he entered the game with a thought and brought the transplanted mutant man-eating flower out of the game.

[Chapter 1617 The Magical Man-Eating Flower \(2\)](#)

At the same time, he controlled his game character to go to the seed store in ore town and bought a lot of mutant man-eating flower seeds.

He had bought a lot of them.

He felt that it was necessary to promote this thing as soon as possible. A large part of the Earth's current ecological problem was the problem of garbage.

He didn't know when he started to care about the Earth's crisis. This was probably done unconsciously. After all, his ability was there.

Just like how people donated money, when they were poor, they didn't even want to donate 5 yuan. If they were rich, they could donate a few billion Yuan without feeling the pinch.

After that, Qin Lin took the seeds out and moved the mutated man-eating flower out of the storeroom and put it on the roof.

After doing all this, he called Yu Shui and asked her to get another hanging machine.

Yu Shui's work was very efficient, and she quickly brought the crane over.

Academician Hao and the other two were attracted by this scene. After all, they had already heard about the streetlamp tree incident, so he was naturally curious about this scene.

"Manager Yu, what kind of research results did boss Qin come up with?" academician Hao asked Yu Shui.

Academician Zhu and academician PEI also looked over and were shocked by boss Qin's speed.

This street lamp tree didn't seem to have been successful for long, right?

How could Yu Shui know why the boss had called her here? The boss did not say anything, but he wanted to act profound in front of the three old academicians. He said, " dear old academicians, don't you think that my boss spent so many years studying street lamp trees? he only studied one type of street lamp tree? "

Academician Hao and the other two were stunned.

That's right.

The study of the street lamp tree would take several years, so boss Qin couldn't have only studied one type of street lamp tree for several years, right?

Some long-term research results might just be left aside like the street lamp tree, slowly maturing and waiting for the results.

So, manager Yu was right.

They couldn't figure out the situation for a while.

Yu Shui saw that she had successfully fooled the three old academicians, so she left in a hurry. She didn't want to miss out on anything and make a fool of herself.

The first thing he did was to bring his men into the inner area and then to the rooftop.

However, as soon as he entered the rooftop, he was stunned to see the man-eating flower with its mouth wide open.

The man-eating flower naturally couldn't really have a mouth. After all, it was a plant, but the two sharp thorns really looked like a ferocious mouth.

"Chairman Qin, this ... This is a man-eating flower?" Yu Shui asked in shock.

Such a huge man-eating flower was really scary. Its big mouth could swallow his head in one bite.

"Hang this man-eating flower and bring it down!" Qin Lin ordered with a smile.

"Chairman Qin, it won't attack people, right?" Yu Shui asked, worried.

He had heard that the man-eating flower had a stress system. When people got close, as long as the man-eating flower was big enough, it would be a kind of nutritious meat for them.

In the past, there had been many videos of man-eating flowers eating animals in the primitive forest.

"Don't worry, the man-eating flower won't attack people," Qin Lin said with a smile.

As he spoke, he even walked into the man-eating flower to demonstrate,

Sure enough, the man-eating flower did not attack Qin Lin. It was very docile.

Yu Shui was relieved when she saw this scene. She hurriedly went up to the crane, then began to hold the transplant pot with a rope and used the crane to send the man-eating flower down.

Downstairs, academician Hao and the other two people, the staff who assisted them, the rope Manor's staff, and MA Hong and the security guards all came over and looked up curiously.

The streetlight tree from last time had given them too much of a shock. They all wanted to know what it was this time.

When the mutant man-eating flower was brought down, the timid researchers and waiters subconsciously distanced themselves.

The man-eating flower was too big, and to a timid person, it was really ferocious.

When academician Hao saw Qin Lin, he immediately went up and asked curiously, ""Boss Qin, is this a man-eating flower? It should be mutated by you, and it's a little different from normal man-eating flowers, right?"

Qin Lin nodded, but he made it up. "This man-eating flower has mutated. Didn't we find meteorites on fairy tale mountain? There's a meteorite with a high level of radiation, so I thought that the soil around it was affected. I asked people to bring the soil back and try to cultivate many seeds."

Unfortunately, many of the seeds died after being planted. We spent a long time studying them but didn't find anything. Later, we accidentally used the seeds of a tropical man-eating flower and it finally survived. This mutated man-eating flower was born.

Academician Hao and the other two suddenly remembered this.

The success of the second stage of their rocket research was also due to the meteorite. Otherwise, the propulsion structure would not have been able to proceed.

Moreover, they all knew that one of the four meteorites had a strong radiation.

He only heard from Minister Lu and the others that they were so excited about the meteorite that they didn't pay attention to anything else. He didn't expect boss Qin to pay attention to the affected soil.

The key was that the other party had also relied on the affected soil to cultivate something.

This wasn't just talent, but also a very strong ability to discover things.

Otherwise, without in-depth research, who would have known that the soil was affected by the meteorites and that it could be used to cultivate finished products?

At least, at that time, Minister Lu and the others were completely focused on the meteorite and did not notice this at all. It was as if they had picked up a watermelon and completely ignored the sesame.

However, when you finished eating the watermelon, she used that sesame seed to grow a sesame tree.

It was no wonder that boss Qin could have his current achievements.

It was true that all aspects had proved that boss Qin's success was not by chance, and it was definitely not entirely due to talent.

Academician Hao couldn't help but ask, ""Boss Qin, what are the effects of the mutant man-eating flower?"

Qin Lin smiled and ordered several waiters in the manor, you guys go and bring all the trash cans in the manor over. Remember to bring a pair of pincers.

As the boss instructed, the waiters naturally took action immediately. Although they didn't understand what this had to do with the man-eating flower, they quickly pushed the trash cans over.

"Chairman Qin, iron pincers." A waiter handed a pair of pincers to Qin Lin.

After Qin Lin took the metal pincers, he picked up some trash from a trash can and sent it to the man-eating flower under everyone's shocked gaze, as if he was going to feed the man-eating flower.

However, what shocked everyone was peanut. The man-eating flower actually opened its mouth and swallowed the trash on the metal pincers.

'This ...'

"Boss Qin, does this man-eating flower eat garbage?" academician Hao asked curiously.

Qin Lin nodded with a smile. not only can they eat, but they can also digest. However, they can only eat soft garbage. They have no effect on hard garbage.

As Qin Lin spoke, the man-eating flower spat out two rusty nails from its big mouth. When they hit the ground, the sound of them hitting the bluestone floor was very clear.

This surprised academician Hao and the others. Boss Qin really did what he said.

Then, everyone stared at the man-eating flower, wanting to see how long it would take to digest the trash.

However, to everyone's surprise, it didn't take long for the man-eating flower's big mouth to open again.

+3 attributes. This digestion speed was obviously very fast and unexpected.

Qin Lin picked up some more trash and put it into the man-eating flower's mouth again.

The man-eating flower closed its mouth again to digest the garbage.

"Boss Qin, this man-eating flower can't just digest garbage, right?" Academician Hao asked curiously.

Qin Lin smiled and nodded. of course not. This man-eating flower has many other functions ...

Qin Lin told academician Hao and the others about the effects of the man-eating flower.

When they heard the full effects of the man-eating flower, academician Hao and the others were dumbfounded.

How could it be so magical?

Wouldn't they not have to worry about the land being barren in the future?

Academician Hao subconsciously took out his phone and started taking pictures.

He immediately knew how useful this man-eating flower was, and it was probably even more useful than the street lamp flower.

Once Minister Lu knew about the existence of this thing, he would probably jump up in anger.

[Chapter 1618 The Seeds Are Stored In Gunny Sacks?](#)

Beijing.

Hua hospital.

Minister Lu was surprisingly busy.

The research Meeting on the soaked grass and color changing tree went on for two days, and the researchers finally came up with an effective research plan for the next stage.

Only then did he heave a sigh of relief. Who knew that with a video call from academician Hao, another street lamp tree would appear out of nowhere. He had no choice but to rush to Linlin Manor.

After he brought the streetlight tree back, the old leader dragged him to do special experimental predictions every day. He was busy with the power supply every day.

The result of the prediction was naturally very good.

The old leader was also very satisfied.

However, he was about to die of exhaustion.

If there was something that made him restless again, he felt that he could let his family make preparations. If he suddenly died, he would not have to be flustered.

As Minister Lu was thinking about this, he received a WeChat message. When he saw that it was another message from academician Hao, he suddenly had a bad feeling.

He opened the WeChat message and there was a video. In the video, there was a man-eating flower. Boss Qin was using pincers to pick up some garbage and put it into the man-eating flower's mouth.

Without much thought or asking, Minister Lu knew that boss Qin must have made something strange.

Otherwise, academician Hao wouldn't have made such a big fuss and sent him another video.

After hearing this news, he suddenly felt a little tired.

Boss Qin's speed of production was too fast.

Even though this was something he had started researching years ago.

He didn't know why, but he felt that it wasn't a bad thing for boss Qin to waste his talent. It was fine to be a little lazy. Otherwise, when Qin Lin worked hard, he would be so fast that he would have to run until his legs broke.

What the f * ck.

He didn't understand why his thoughts had changed so quickly.

But thinking about it, boss Qin was so lazy, but his efficiency was already so high. If he got serious, he was afraid that he would really be exhausted to death.

The key was to contact boss Qin. He didn't feel at ease to leave it to others.

If there was any brainless, unruly, or self-righteous person who was sent to clash with boss Qin, then the good relationship that he had been maintaining for so long might be in vain.

He was very clear about the character of some people.

It was because of these guys that many aspects of the country were in a mess.

Because of the recent achievements of the Hua * Yuan, many of these people were arranged to enter the Hua * Yuan, just to benefit and gain some gold.

Minister Lu thought to himself as he took out his phone and called academician Jin.

After the call went through, academician Hao's laughter could be heard. "Minister Lu, I'm telling you the good news as soon as I can again."

"Boss Qin, you're researching man-eating flowers, right?" Minister Lu immediately asked. Why did you feed it garbage?"

Academician Hao immediately explained, " Minister Lu, it's because the man-eating flower can eat garbage. It can digest soft garbage and also classify hard garbage. The key is that after digesting the garbage, it can transform it into harmless matter and fertile land. Moreover, it has a very high efficacy. Do you know what this means? "

"Really?" Minister Lu almost exclaimed when he heard the news.

Garbage was one of the country's biggest headaches now. The cost of garbage a year was several times that of electricity.

This was still too low, because most of the garbage was still shipped abroad for the country that specialized in garbage disposal to dispose of.

But what news did he hear now?

Boss Qin had developed a kind of man-eating flower that could digest garbage and transform it into a substance that could fertilize the land.

This was simply heaven-defying. Not only could it solve the garbage problem, but it could also solve the problem of barren land and increase the economic benefits of various crops.

It must be known that the land shortage in the country was very serious. Many high-value cash crops could not be planted for a long time because of land problems, so they needed to let the land rest for fertilizing.

If the man-eating flower had such an effect, not only would it solve the garbage problem, but it would also greatly improve the Land's barrenness and increase the planting efficiency of cash crops.

How could the benefits of this be compared to the street lamp tree? The economic value it would create for the country would probably be more than ten times more than that.

At the thought of this, Minister Lu immediately called his Secretary and asked him to book a plane ticket to Ming city.

However, before the call was made, he suddenly stopped.

The you City Airport project had been decided, but it hadn't started yet. The reason was that you city, Ming city, and the higher-ups paid for the airport.

However, this was the first time that a large airport was being built in a County, so the approval from the higher-ups was very slow.

If no one urged him, it might drag on for a long time, even for years.

This was also the reason why some local infrastructure projects could not be completed even though the country's infrastructure capacity was very strong.

Minister Lu had not paid attention to this matter before. After all, it was not under his jurisdiction.

However, these few high-intensity trips had caught his attention.

Every time he took a plane to Ming city, he had to take a bus to you city, then take a bus from you city to Ming city, and then take a plane to Beijing. It was simply torture.

It would be much more comfortable if they could reach you city directly.

Moreover, the airport also needed an express passage that led directly to Linlin's Scenic Area.

Minister Lu returned to his office.

[Chapter 1619 The Seeds Are Stored In Gunny Sacks?\(2\)](#)

He wanted to rush this matter because he had to persuade the leaders in this area with the information. The information was simple, it was boss Qin's research results.

Not to mention, there were three old academicians working on the project.

Why didn't they hurry up and finish building you city's airport? Definitely not.

Soon, Minister Lu went to the office of a leader with some information.

"Little Lu, what brings you here?" The leader was surprised to see Minister Lu.

Due to the special nature of the Chinese Academy of Sciences, the leaders of almost every department had connections with Minister Lu. This was because the research projects of the Chinese Academy basically covered all aspects.

Minister Lu went straight to the point, "leader, isn't there an airport project in your city? why hasn't it been approved yet?" We can't delay this airport."

When the leader heard this, he knew that Minister Lu had come to look for him. He operated the computer and searched for it.

He also quickly saw the construction project of your City Airport, but there were so many projects on it, and many of them had to queue up. It was obviously not the airport's turn yet.

Xiao Lu, I'm afraid it'll take some time, " he said honestly. we'll have to go through many of the projects you know one by one.

Minister Lu didn't say a word and directly handed the information he prepared to the leader. "I'll make an exception for you Cheng, or for boss Qin!"

" ? ? ? "The leader frowned.

He had heard of boss Qin's name. Recently, many leaders had been talking about this name, but he didn't know much about it. After all, they didn't have any interactions. He only knew that this was a very powerful scientist and that the higher-ups valued him very much.

Seeing that Minister Lu came to him, the leader also picked up the documents and read them.

This information was all about the success of boss Qin's research, and he had donated it to the Chinese medical Academy. It could be said that he had made a great sacrifice.

It wouldn't be an exaggeration to say that this person was selfless and that he was a famous scholar of the country.

Especially when he saw the results of the research, the leader was shocked. He seemed to understand why the leaders kept talking about boss Qin.

This latest streetlight tree solved the problem of the streetlight power. No wonder the new power up-to-date laughed so happily.

"Are you going to make an exception?" by the way, boss Qin has developed a special man-eating flower, " Minister Lu said. it can digest garbage. The final economic value it can produce is more than ten times that of the street lamp tree.

Upon hearing this, the leader immediately said, ""An exception! I'll immediately approve the procedures!"

What a joke.

He already knew the value of the street lamp tree. There was another plant that could produce an economic value that was more than ten times higher. This was not an exception. It would be fine if the higher-ups did not pay attention to it.

Once they noticed this, they would say that he was inflexible and stubborn.

Minister Lu laughed.

Soon after, she returned to her office with a document and asked her Secretary to book a plane ticket to Ming city for her.

.

The next day.

Minister Lu rushed to you city, but he didn't go to Linlin Manor immediately. Instead, he asked the driver arranged by Ming city to go outside you City County and then made a call to sun County.

Sun Xian brought Chen Li and the other leaders for a meeting.

With the development of you city, Sheng city had broken through the barrier and entered a new assessment. They were also very busy and had to pay attention to all kinds of things.

When sun Xian received Minister Lu's call, he immediately announced the end of the meeting. He brought Chen Li and the other leaders to welcome them.

He knew that this person had helped you city.

Although it was all because of boss Qin, without the help of this Minister Lu, you Cheng wouldn't have reached the current level in many aspects.

Therefore, they respected Minister Lu very much.

Minister Lu, let's rest in the county today. We'll invite you to see the changes in you city. Sun Xian immediately extended a warm invitation.

Minister Lu shook his head and said, " it's not like you Cheng hasn't seen enough. What's there to see? I'm here to give you a document.

As he spoke, he handed the document about the airport to sun Xian.

Sun Xian took the document and opened it. His face revealed a happy expression."Minister Lu, has this document been approved?"

The you City Airport plan had been carried out a long time ago, but the capital from the city and the higher-ups had not been in place. In addition, there were problems with the procedures and procedures, so the airport had not been really carried out.

With this document, the funds from the higher-ups would arrive soon, and the airport could be built immediately.

As long as he had enough money, he could land the plane in you city next year.

Naturally, when Minister Lu personally sent the document over, they knew that he must have done something for them. This made them even more grateful to him.

The construction of the airport would be a huge help to you chengsheng city.

Minister Lu didn't forget to give an order. remember to build a fast passage from the airport to Linlin Scenic Area. Look at the traffic in you city. Once you reach Linlin Scenic Area for activities, it's so congested.

These words made sun Xian and the others feel embarrassed. What could they do?

They've already fixed their fifth-ring, alright?

Five points.

This was enough for some first-tier cities, but they didn't even have enough for a County.

Who would have expected the Linlin Scenic Area to be so amazing?

They were practically sucking up to the Linlin Scenic Area to solve the traffic problem.

Recently, the county had been considering building the sixth and seventh ring roads again.

Otherwise, when the science fiction viewing Park in Linlin Scenic Area was built, it could accommodate more tourists and there would be traffic jams again.

They had to be on guard against the unexpected. They couldn't always be said to be a burden to Linlin Scenic Area.

don't worry, Minister Lu, " sun Xian quickly promised. we'll definitely build a fast passage from the airport to Linlin Scenic Area.

After making the arrangements, Minister Lu let the driver drive to Linlin Manor with satisfaction.

I'll have a good rest this year. There should be a direct flight next year.

In order to make him suffer less, was it easy for him?

Minister Lu soon arrived at Linlin Manor. He immediately went to check on the mutated man-eating flower and was shocked.

Then, he hurriedly went to find Qin Lin."Boss Qin, I'm here again ..."

As he said that, he gave Qin Lin a knowing smile, which made him look like a fool.

Qin Lin naturally knew Minister Lu's purpose. He smiled and said, " Minister Lu, I've prepared the mutant man-eating flower seeds. The promotion of this thing can be led by the higher-ups, but I still hope that Linlin laboratory can participate in it!

He knew very well how much profit the mutated man-eating flower would bring if it was promoted. It was almost at the National strategic level, and the probability of private management was not high.

If Linlin's laboratory wanted to operate, the higher-ups would naturally agree. However, Linlin's laboratory would also have some trouble, which was certain.

After all, human nature was there for all to see.

Therefore, it was better to let the higher-ups lead and let Linlin's laboratory participate.

When the time came, the transformation and promotion of public areas would be handled by the higher-ups, while the private life would be handled by Linlin laboratory.

Minister Lu immediately nodded. boss Qin, this is a small matter. I just want to know how long it will take for the mutant man-eating flower to be promoted on a large scale.

it should be very fast this time, because I've prepared quite a few seeds. Qin Lin said with a smile.

He had indeed bought a lot of seeds in the game. He would just treat it as if he was doing his best to contribute to the garbage problem of society.

This was probably what it meant to be a talented person helping the world.

He didn't know when he had such an attitude, but now, it was like this. Other things, whether it was money, honor, or status, didn't seem to mean much to him.

On the contrary, if he did more of these things, he could forge layers of golden bodies on his body.

This would be more meaningful to him.

"Boss Qin, where are the seeds?" Minister Lu asked hurriedly.

Qin Lin pointed to a corner of the office.

Minister Lu subconsciously looked over and his eyes revealed a look of disbelief. He saw three sacks in the corner.

Three sacks?

"Boss Qin, are these all seeds?" Minister Lu asked subconsciously.

"En!" Qin Lin nodded with a smile. I've studied this mutated man-eating flower for a long time. What's so strange about it having more seeds? " he said.

This was what he meant when he said there were many seeds.

Minister Lu was dumbfounded when he saw the three sacks of seeds.

[Chapter 1620 The Legendary Animal](#)

Minister Lu was shocked when he saw the three big bags of mutated man-eating flower seeds.

Boss Qin's research results had always required a lot of effort for the sake of seeds. He had to wait for the crops to mature before he could harvest the seeds and promote them.

This was a long cycle.

Now that he was given three sacks of the mutant man-eating flower seeds, he could simply bring them back and destroy them.

This was a little too blissful.

However, he also knew that boss Qin would not joke about this.

So, he immediately made a call to Beijing. As soon as the call went through, he said, " leader, escort me to you city. Yes, boss Qin has developed something magical again ... A private plane is fine too ... I don't mind ..."

After hanging up the phone, Minister Lu couldn't wait to check the seeds.

Although he didn't know anything about seeds, it didn't stop him from loving them.

Qin Lin looked at the screen in his mind again and controlled his game character to go to the farm to check the mutant bird's nest.

The two mutant birds were not mature yet.

It could be said that this was the first time he had seen a farm animal that had not grown up in such a long time.

Was this the reason why they could only buy four?

He could only hope that the mutant bird would not disappoint him after the surprise from the flower.

The next day, an escort vehicle arrived at Linlin Manor early.

The first thing Minister Lu did was to load the mutated man-eating flower seeds onto the escort vehicle.

At the same time, he also took away the mutated man-eating flower that had already matured. Qin Lin had agreed to this after he had shown goodwill to him.

After all, this thing was nothing to Qin Lin.

It was just a mutated man-eating flower. If he wanted it, he could take it out of the game and say that he had actually cultivated two.

It was just that there was no need to do so.

Minister Lu rushed back to Beijing's Hua hospital as fast as he could after a series of travel arrangements.

When the plant Research team received the news, they were stunned when they saw the mutated man-eating flower that Minister Lu had brought back.

Only academician Qin would research this kind of strange thing. Moreover, only academician Qin could research this thing to have a magical effect.

When they received the notice and heard about the effects of the mutant man-eating flower, if they didn't know that academician Qin was researching it, they would definitely think it was a joke.

Soon, several leaders also came to the Chinese hospital together. After all, they had received a report that the effect of the man-eating flower had surprised even them, so they had to come to see it in person.

"Little Lu, let's see the specific effects of this man-eating flower!" A leader said the moment they met.

Minister Lu nodded and immediately ordered someone to bring two trashcan.

Then, in front of the three leaders, he picked up the garbage and put it into the man-eating flower's mouth.

The three leaders were very surprised to see the man-eating flower close the trash in one bite.

What surprised them even more was that the man-eating flower actually opened its mouth again after a while, but it was empty inside. The garbage had been consumed.

The speed at which he digested it was truly unbelievable.

After that, Minister Lu even mixed some hard garbage into it to feed the man-eating flower. Without exception, all the hard garbage was spat out.

After several experiments, the three leaders couldn't help but clap and praise, "

"It's really worthy of being something researched by academician Qin!"

"Yeah, this young man is too powerful."

".."

The leader's praise naturally received the approval of the others, especially Minister Lu, who knew best how amazing boss Qin was.

In his heart, if boss Qin wanted to, the other party could make him run until his legs broke and die of exhaustion.

At this moment.

One of the leaders said to Minister Lu, " little Lu, a Princess from a country is coming to visit these few days. She is mainly here to discuss the matter of the street lamp tree. You are in charge of entertaining her.

There was no doubt that the street lamp tree could not be kept. As long as it was promoted, it would definitely be stolen by foreigners in the end.

Therefore, what they had to do was to take the initiative and discuss the matter of the street lamp tree with some foreign countries first to grasp the initiative.

This visiting Princess was the little princess of Kalia country. She was not to be underestimated as she controlled a large corporation in the country and could participate in many matters.

It was precisely because it was about the street lamp tree and was related to technology that the leader wanted Minister Lu to receive him.

"Alright, leader." Minister Lu also agreed to the leader's order.

A few days later, Minister Lu also received the news that the little princess had arrived.

However, looking at this little princess Kalia, Minister Lu was really shocked. A 40 year old little princess was really young.

Only then did he realize that he had misunderstood.

She was called little princess because she was the youngest, not because she was young.

Minister Lu's task was to explain the uses and benefits of the street lamp tree to the little princess in her 40s.

This little princess Kalia was called Lydia, a very common Western name.

Lydia was completely shocked after hearing the effect of the street lamp tree.

Therefore, her first decision was to give her the exclusive rights to the tree.

This way, she could plant street light trees on all the streets and then openly propose a bill so that the people could pay her a certain number of street light trees every month to enjoy the enjoyment.

After all, the country had to spend money on electricity to build street lamps. He would just charge less, which was better than before.
