

The Game 1631

[Chapter 1631 How Can You Do This? 2](#)

The two subordinates nodded and immediately went to investigate.

Not long after, the two of them came in with two documents and handed them to MA Hong.

"Boss, maybe we really made a mistake," one of them said.

The other man nodded. they're real scientists. They study birds. Other than that, there's nothing else worth suspecting.

MA Hong was dumbfounded, 'then why did they want to break into Linlin Manor? Just to study the Phoenix?"

This result left MA Hong speechless.

He had thought that he had encountered two tough opponents, but it turned out that he had been wrong. What was he supposed to do now?

if you're sure there's no problem, then let him go. He's f * cking messing around. MA Hong frowned and ordered his two subordinates, " also, send a message to the organizations and departments related to bird research. Tell them that the Phoenix in Linlin Manor has nothing to do with them and that they shouldn't come here to study it. Also, help boss Qin get a Phoenix breeding certificate. This can also dispel some people's thoughts.

The two subordinates nodded and immediately went to do it.

One of them also brought people to release Wang Shen and sun kui. Naturally, they had to be sent to the hospital in their current condition.

However, MA Hong still gave Minister Lu a call.

After all, they had used the wrong torture on the wrong person, so it could be considered a loss.

It was embarrassing for elites like them to treat two ordinary people as experts.

Therefore, under such circumstances, he felt that it was better to find another person to memorize.

The people who had the highest endorsement were Minister Lu and the people from the Chinese Academy of Sciences. After all, the three old academicians were from the Chinese Academy of Sciences, and they were also protecting the research secrets of the Chinese Academy of Sciences.

When chief Lu received MA Hong's call, he was stunned. There were still scientists who wanted to enter Linlin Manor to study phoenixes? what the hell was the bird experts Bureau doing?

The Chinese Academy of Medicine hadn't even sent anyone to study it yet. Moreover, these two guys weren't even academicians, so what right did they have to go to Linlin Manor?

He hung up MA Hong's call and dialed another number immediately. Then, he started cursing at the other party.

Time passed.

The next day.

Wang Shen and sun kui woke up from the county Hospital. When they thought of their encounter yesterday, they almost collapsed.

The first thing they did was to call the police.

The phone was in disguise. Wang Shen said, I want to call the police. We were abused by the Linlin Manor's security guards yesterday. They're breaking the law.

However, when the other party heard this, he immediately said, " Sir, I'm really sorry. The content of your report is not clear, so we can't accept it.

" ? ? ? "Wang Shen hung up the phone and was a little dumbfounded. What did he mean by his report was not clear enough?

He had made himself very clear, alright? He had been abused by the Linlin Manor's security guards, who had broken the law.

"Old Sun, use your phone to call again." Wang Shen said to sun kui.

Sun kui nodded and immediately took out his cell phone to make a call. He said, " I want security. We've been illegally detained by the Linlin Manor's security!

"Du du du!" A beeping sound was heard.

" ? ? ? ? "Sun kui was dumbfounded.

Wang Shen was also dumbfounded.

How could these people be like this?

Obviously, the two didn't know that MA Hong had already made arrangements. Who would dare to interfere with the special department's orders?

Therefore, the two of them could only be dumbfounded.

"Old Sun, they can cover the sky with one hand!"

old Wang, we'd better leave this place quickly. Let's escape!

"Mm, let's go! We'll Sue them at the Beijing headquarters."

After the two finished their discussion, they left the county doctor immediately and left you city to go back to Jing.

When they arrived in Beijing, the two of them went to the bird research Institute immediately and met the highest-ranking official.

Seeing this leader, Wang Shen hurriedly said, " leader, you have to stand up for us. The Linlin Manor's security is too much. They actually illegally detained us.

"Yeah, we can't let them go," sun kui also said.

When the leader heard this, his face turned gloomy, as if he had been suppressing his anger for a long time. When he saw the two of them, he couldn't help but say angrily, ""Professor Wang, professor sun, didn't I tell you before that you must greet and build a good relationship with Linlin Manor when you go there? What are you guys doing? Are you trying to get me killed?"

Wang Shen and sun kui were a little dazed.

They felt that there was something wrong with this leader. In the past, he had always made decisions for them. Why did it feel like he was not going to care about them today?

"Professor Wang, professor sun, take a good rest. You don't need to be in charge of the next research project. I'll find someone else." The leader suddenly said, then turned to the two of them. "You can go back and rest now."

Are you kidding me?

In this short period of time, the special Department had called to warn him, and several departments, including the Hua hospital, had called him several times to talk bad about him.

At that time, he almost thought that he was going to die and be finished.

Who knew that the trouble was caused by the two professors in front of him?

This also made him instantly regret. Why the hell did he approve the document to study the Phoenix in the first place?

At that time, he had also been shocked by Phoenix.

Who knew that he would almost ruin his own future.

Wang Shen and sun kui were completely dumbfounded when they were kicked out of the office.

No matter how stupid the two of them were, they knew that they had made a mistake. But they only wanted to enter Linlin Manor to study the Phoenix. Why did this happen?

They were bird experts. It was their right to study phoenixes.

In the outside world, a piece of news attracted everyone's attention at the same time.

The news was about Phoenix.

A special Department released a piece of news to the public, promoting that Linlin Scenic Area had become a protected area for the special species of phoenixes, and would issue a Phoenix breeding permit to Linlin Scenic Area.

Not only that, but countless bird research departments in the country had also received a warning, which was that they were not allowed to disturb the normal life of the Phoenix in Linlin Scenic Area.

In other words, it was a warning not to have any ideas or think about researching.

With such a large-scale warning, those departments were not fools. They naturally knew the seriousness of the matter and realized that they must not touch the Phoenix.

At the same time, he was also moved by the power of the Linlin Scenic Area.

One must know that they had the idea to study it in the beginning. They even thought about getting a Phoenix. Now, there was no need to study it. There was no chance at all.

Linlin Manor.

Qin Lin woke up early in the morning and was dragged by Zhao mo to see the four phoenixes.

At the same time, Zhao moyin also gave the four phoenixes names: Phoenix one, Phoenix two, Phoenix one, and Phoenix two.

The four phoenixes became his new pets.

But Qin Lin really wanted to ridicule the name. What the hell? This name was not even as good as the names he had come up with, ah da, ah er, ah San, ah si.

But what could he do? the name he came up with was rejected by Zhao moyin.

These four phoenixes could not be blamed on him. It was Zhao moyin who gave them such old-fashioned names.

Naturally, he and Zhao moyin had no idea what had happened to MA Hong and the others, because MA Hong and the others had no need to tell them about it.

However, after feeding the four phoenixes, Qin Lin received a call from professor Lin.

"Professor Lin, is the transformer ready?" he asked immediately.

"Yes, Qin Lin, the three Transformers are done. Do you want to come over and take a look?" professor Lin's voice was heard immediately.

"Alright, I'll be there immediately." Qin Lin naturally wanted to see it, and he asked Zhao Moxi, there's a new transformer model. Do you want to go and see it? "

"Alright!" Zhao Mo's eyes lit up.

She was more interested in Transformers since it would be the main project in the next stage of the scenic Area Development.

Seeing that Zhao Moyu was interested, Qin Lin immediately took her to Linlin's laboratory.

Professor Lin was already waiting for them. He welcomed them into the laboratory as soon as he saw them.

Soon, Qin Lin and Zhao Moyu were brought to the laboratory that specialized in making Transformers.

As professor Lin revealed a black screen, he saw a very domineering black Gorilla. The metallic exterior design made Zhao moyin's eyes light up.

[Chapter 1632 Gorillas Kidnap Beauties \(1\)](#)

The strong and tall black Gorilla was really eye-catching. If it was bigger, it would probably make people think of a creature, the king Kong.

Moreover, professor Lin and his men had done a good job in building it, making the gorilla look very strong.

"Chairman Qin, President Zhao, this is the ventilation Saint." Professor Lin explained.

It was true. If professor Lin hadn't said so, outsiders wouldn't have known that this was a demonic Saint. Even if they didn't think it was a Vajra, they would have thought it was an orangutan warrior.

Zhao Moyu even subconsciously asked, ""There are still new buildings in you city, right? Can the ventilation Saint climb a building?"

This made professor Lin look at her in surprise, not understanding why the lady boss suddenly asked this.

Moreover, he didn't know any of this. After all, he had been locked up in Linlin's laboratory and didn't pay attention to these things.

Qin Lin could understand what Zhao moyin meant. He smiled and said, when the time comes, contact County sun and County Chen and make some arrangements. I believe it will work.

After all, King Kong climbing up the Empire State Building was a classic scene.

When Zhao Moyu saw the great sage of ventilation, he was obviously going to create a hot topic.

After all, recently, the popularity of Transformers had dropped. Many netizens were wondering why Transformers didn't cause any trouble recently.

Then, professor Lin brought Qin Lin and Zhao Moxi to see the other two Transformers.

One of them was Zhu Bajie.

However, Zhu Bajie's appearance was not an ordinary pig. He was a black pig with a ferocious face and a pair of ferocious fangs.

Moreover, in Qin Lin's memory, in the design plan, this pair of fangs would become the two longest saw teeth in Zhu Bajie's weapon rake.

If such a huge wild boar were to run out, it would probably scare a lot of people.

The last one was Erlang xiansheng.

It could be said that this was the first divine transformer. After all, the previous ones were all monsters.

However, the one that Erlang xiansheng had given to Elba at the beginning was still in the shape of an autobian, and it was still a car, but it was a cool blue sports car.

More importantly, Erlang xiansheng still owed a dog.

Moreover, when the dog transformed into a car, it actually became a very cute pendant hanging on the back of a sports car.

After the transformation, the pendant would turn into a dog and run around Erlang xiansheng. Although it didn't have any other functions, it was very impressive.

At the very least, the other Transformers didn't have such a function. It was definitely interesting.

Professor Lin said with a hint of pride, "boss, after I got the design you gave me, I rushed through the night with my men to get the molds for these three Transformers and started production.

Qin Lin smiled and nodded. well done. I'll hand over the job to Linlin Scenic Area and see what kind of publicity they're planning.

Every time a transformer like this appeared, it could be said to be a big hit, especially the kind that Zhao Moxi was thinking of. If a Gorilla climbed up to the top of a building and was photographed, it would cause a sensation.

After that, professor Lin arranged for the operators to operate the three Transformers and let them transform and check.

For Zhao Moyu, the Transformers were really amazing.

Zhao Moyu even called Lin Lanzi directly. She naturally had to tell Lin Lanzi about her thoughts.

She felt that it would definitely be very interesting.

After all, you Cheng had already experienced the real story of Transformers. If something really happened, the tourists would feel honored to participate in it without any problems.

..

After watching the three Transformers, Qin Lin returned to Linlin Manor.

The four mutant birds seemed to have sensed his return, so they flew down from the top of the manor. They liked to come to the top of the manor again these days.

On the internet, the topic of Phoenix became even more popular.

However, there was a voice that came from a family that raised birds.

This family was also famous for raising birds. It seemed that they had raised many birds that were on the verge of death.

The family name of this family was Lin, and the current head of the family was called Lin Tao. He had also published a very famous book on birds.

Lin Tao, on behalf of the Lin family, posted a video: everyone knows that the four phoenixes did appear in the Linlin Manor. Moreover, it seems that the relevant departments have tacitly agreed that these phoenixes were raised in the Linlin Manor.

but that's not right. We don't know what kind of environment phoenixes used to live in. They're a newly discovered treasure. Linlin Manor doesn't have any experience in breeding phoenixes.

so, we have to be careful. We need to slowly study what they like. No one is better at this than our family.

"So, I hope that this kind of Phoenix can be given to a suitable person to breed so that these phoenixes can survive better."

This comment quickly spread on the internet, and many people agreed with it.

Qin Lin also saw this comment and was speechless.

He had brought the mutated bird out of the game, so why did he need the noble family to nag at him?

Was this a joke?

He didn't say much and directly asked the official account of Linlin Scenic Area to post a video in the name of academician Qin little. There was only one sentence: "I'm a Beast Tamer and I can tame birds too. Do you want to see who can make a Phoenix listen to me? If you lose, you'll get the title of bird breeding family."

[Chapter 1633 Gorillas Kidnap A Beauty \(2\)](#)

The video quickly spread on the internet and became a hot topic.

No one thought that academician Qin would directly respond to the Lin family. Those who were watching the show immediately joined in and called out to the Lin family.

Everyone could see that the Lin family definitely had ideas about Phoenix, so they used this kind of green tea method to reason with her. Unfortunately, academician Qin little didn't seem to pamper them.

The Lin family was in an awkward position.

After all, they didn't expect people like academician Qin to come and talk back to them. Logically speaking, the other party was in research, so they shouldn't care about this.

However, they didn't refute academician Qin. Instead, they found another reason and immediately released a video: raising birds is not a show. For animals like phoenixes, you shouldn't think about training them, but protecting them. Building their nests is more important.

the f * cking Phoenix likes parasol trees very much. We need to plant some parasol trees. The Phoenix will definitely like them. This is the right way.

This video was posted on the internet and went viral again.

Under such circumstances, everyone was paying great attention to this kind of thing, so it went viral again.

Those who aren't afraid of trouble @ Linlin villa.

Qin Lin naturally saw the video very quickly. He was a little speechless. What the hell was this Lin family?

'This mutated bird is so evil.'

He directly asked the official account of Linlin Scenic Area to release another piece of news in the name of academician Qin little: "I'm going to research and cultivate a parasol tree that this Phoenix likes. Shall

we compete to see whose parasol tree is more popular with this Phoenix? If you lose, you'll be removed from the bird breeding family."

This caused another sensation.

The internet was once again filled with calls for the Lin family.

When Lin Tao got the news, he was speechless. What the hell? academician Qin, you're amazing, but you can't keep thinking about taking away their reputation as a bird-raising family. That's f * cking cowardly.

But in the face of this academician Qin, they didn't have any temper.

Because this academician Qin had this ability. It seemed that if he really couldn't deal with it, it wouldn't be worth it to have any more ideas about Phoenix.

However, they felt that this was too aggrieved, so they could only send a video with bad intentions. I hope there's really such a sycamore tree in Linlin Scenic Area. Otherwise, it'll be really disappointing.

Was he asking for a general?

All of a sudden, all the attention was focused on Linlin Scenic Area. Everyone wanted to see how this Linlin Scenic Area and academician Qin little would respond.

Qin Lin's reply was very simple. it's done. I'll plant it immediately.

These words immediately caused a sensation.

This topic had just come out, and you've already finished training it. How could you do it so quickly?

Are you a genius?

However, when everyone thought of academician Qin's achievements in plants, wasn't he a monstrous genius?

Moreover, in the field of Plant Research, if academician Qin said that the cultivation was done, who would dare to refute? He was publicly acknowledged as the number one person in Plant Research.

Qin Lin went to the office as soon as he finished speaking. He controlled his game character to go to the seed store and found the Sycamore saplings that had been found before.

Previously, the description of the wutong sapling was enough to make the mutant birds like it. He had wanted to transplant the wutong tree, but the mutant birds had not been produced, so he did not do it.

Now that the Phoenix had been summoned, he naturally had to summon the parasol tree.

Not long after, Qin Lin controlled his game character to buy the Sycamore saplings and transported them to the ranch.

Moreover, he had bought a lot of them. However, he did not plant the Sycamore trees directly. Instead, he left Linlin Manor and went to the remote warehouse that he had bought previously. Then, he entered the game and moved the special Sycamore saplings out of the game.

Then, he called Yu Shui and asked him to drive a truck over.

Yu Shui answered the call immediately. However, it took him a long time to find the warehouse Qin Lin was in. It was very remote.

He was a little surprised when he saw the Sycamore saplings in the warehouse.

"Boss, are these the Sycamore saplings you're cultivating?" Yu Shui looked at the wutong saplings and said, " when you said that you've cultivated the Sycamore saplings, I knew that you must have other cultivation sites outside. There must be other things that you've cultivated nearby, right? "

"Eh!" Qin Lin didn't expect Yu Shui to think so much, but he didn't refute her. Instead, he smiled and said, ""It's good that you know, don't tell anyone else."

"Okay, boss!" Yu Shui promised immediately with a sense of accomplishment on his face. After all, he knew that his boss had a secret place to cultivate things, but others didn't know. This meant that he and his boss were closer.

Very quickly, Yu Shui pulled the Sycamore saplings back to Linlin Manor.

However, Qin Lin was also worried that the saplings would not be able to grow if they were planted like this. Therefore, he went into the warehouse where special soil was stored and took out a few bags of special soil for Yu Shui to mix them with the saplings and plant them.

Otherwise, he really didn't know if the Sycamore tree sapling could survive.

After that, Yu Shui led some people to start planting Sycamore saplings in the Linlin Manor and the Linlin Scenic Area.

This scene naturally attracted the attention of many tourists. Those tourists took videos and uploaded them on the internet.

This also made it to the hot topic in an instant.

After all, academician Qin just said that he was going to cultivate the Chinese parasol tree. It was really cultivated so quickly, and he had even started to plant it.

At this moment, there were even more people calling out to the Lin family. Clearly, they wanted to watch a show and not mind the matter blowing up. They really wanted to see the Lin family and academician Qin junior fight. That would be the liveliest. Otherwise, it would be too boring if there was no show to watch.

Unfortunately, Lin Tao didn't respond at all this time.

This academician Qin was too serious. If he continued, he was afraid that the Lin family's reputation would be ruined.

Since he couldn't get his hands on this Phoenix, he had to give up decisively. There was no other way.

Just like that, after Yu Shui planted the Sycamore saplings, there was no more news about the Lin family.

After all, the Lin family was just a bunch of clowns. They weren't famous people, and they didn't have any popularity. Who would pay attention to them?

However, just as everyone on the internet was paying attention to Phoenix, a piece of news started to circulate on the internet.

"A huge black Gorilla appears in you city!"

Originally, gorillas wouldn't attract attention. After all, there were so many gorillas in the world. However, the key was that this Gorilla was very large. Although it was far away, it was really scary.

However, this Gorilla still appeared in you city, so it was a different story.

After all, there were so many tourists in you city. What if such a big Gorilla rushed out and hurt people?

This immediately caused an uproar on the internet.

However, no one knew that this was just an intentional act.

The gorilla was the ventilation Saint.

This was all Lin Lanzi's plan.

After Zhao Moyu had told her about the great sage of ventilation's transformer, she and Zhao Moyu had started to plan.

After all, writing a script wasn't difficult for them. After all, the multimedia Department of Linlin Scenic Area needed scripts for many videos.

In addition, she was adding fuel to the fire behind the scenes. Soon, the news about the giant Gorilla in you city exploded, and it was even more popular on the internet.

The internet was filled with curiosity, but they didn't realize that you city's officials didn't have any intention of taking action.

If such a Gorilla really appeared, you city's officials would have taken action long ago and even captured it.

You city officials didn't take any action, which meant that this was fake news.

But sometimes, why would ordinary people care about such things? Especially those who weren't in you city, they would rather believe it. After all, anything that happened in you city wasn't strange.

It was said that fish had been extinct for a long time, but there were so many of them in you city, and even phoenixes appeared.

What was so strange about a giant Gorilla?

Soon, another piece of news caused a sensation.

today, a chimpanzee found in you city has captured a beauty!

Netizen 1

Netizen 2

Netizen 3

[Chapter 1634 755-The Golden Chest \(1\)](#)

this is you city. As everyone can see, at the foot of the mountain, there is a girl who met the gorilla and was caught by it. The situation is unknown.

The news about you city spread quickly on the internet. Everyone who saw the news was in disbelief.

After all, it was a girl who had been captured by that Gorilla, and there were even videos of the truth.

The girl in the video was in danger.

This kind of animal attacking people often attracted public opinion.

This also made all the netizens start to ask and argue. Then they scolded you Cheng for not giving any response.

Sun Xian and Chen Li naturally felt that they had been wronged.

After all, they knew what was going on.

It wasn't that they didn't want to give a response, but they didn't know how to.

If there were really animals hurting people, they would hold a press conference and organize people to deal with it.

There was no such thing as gorillas catching people now.

However, this was about to trigger public opinion.

Who asked you Cheng to have such a high level of attention now, with so many eyes watching.

Chen Li had no choice but to call Lin Lanzi and ask if there was any next step in the plan. Otherwise, he would not be able to hold on.

Lin Lanzi had no other choice.

She had wanted to wait a little longer to make the news more popular.

There was no other way now. The county was worried, so they could only proceed to the next step.

Therefore, it didn't take long for people to see the huge black Gorilla on the streets of you city.

That black gorilla's body was really huge, and it immediately attracted a lot of attention.

Naturally, with the previous incident of the black Gorilla injuring people, at first sight, everyone subconsciously wanted to escape.

After that, the people and tourists of you city who saw it finally reacted. They took out their phones and started to take pictures of the gorilla.

But at this time, everyone also realized that it was not a chimpanzee, but a mechanical Gorilla.

When the gorilla walked, he could even hear the sound of mechanical friction.

"It looks like a robot!"

"Yeah, it's not a real Gorilla!"

I understand. It's the gorilla warrior, the transformer!

".."

All of a sudden, many people reacted.

This should be the real story experience of a transformer.

It was here again. The Transformers hadn't caused trouble for a long time, and now they were obviously doing it again.

This discovery made everyone excited.

They hadn't encountered it before, but they did this time. They were really lucky.

Soon, the tourists quickly posted the video on the internet. The internet was still abuzz, and people really thought that there was a Gorilla in your city who had caught a beauty.

Who would have known that this was just the real plot experience?

Moreover, the story experience was so real that the entire internet was involved.

At this time, the black Gorilla was strolling on the street. It should be the next step of the plot, right?

At this moment, all the tourists noticed that a helicopter had appeared in the sky.

The helicopter flew directly above the gorilla, and a voice rang out, ""Discovered black Gorilla, discovered black Gorilla, do you want to capture it?"

This sound seemed to have startled the black Gorilla, causing it to quickly escape.

The tourists were excited.

It was indeed a real plot experience. This was the same as before, and they were going to experience the next step of the plot, right?

Then, everyone saw the black Gorilla run quickly in one direction.

Some people from your city recognized that it was the direction of the new district.

"That's the direction to the new server."

"Where did the black Gorilla go!"

".."

Soon, the videos were quickly uploaded to the internet.

This time, the entire internet was in an uproar.

Everyone's eyes were drawn to the gorilla. They had roughly understood that it must be another transformer.

Therefore, the Linlin Scenic Area easily attracted the attention of the entire internet.

The music department was helpless about this. They couldn't control the popularity at all, unless it was limited, but they didn't dare to.

The black Gorilla very quickly entered the new server.

There were fewer people living in the new district. The black Gorilla ran even faster, and the helicopter followed quickly, forcing the black Gorilla to retreat.

The helicopter was borrowed from the scenic Area. Moreover, with Linlin company's ability, it was easy to borrow one, and it was even easier to buy one.

It was just that he had never had such a need.

The scene of the helicopter being chased by the media was naturally captured by the chimpanzee tribe and uploaded to the internet in real time.

This also made the people who were watching the fun watch with great interest.

Although he couldn't go to you city to watch the real story of Linlin Scenic Area in person, he could still enjoy it online.

But very quickly, a video shocked everyone and made them exclaim in shock.

That was because the black Gorilla had started to climb up a building that was not completely built yet. With the helicopter circling it, it was climbing higher and higher.

This was very shocking.

A lot of people recalled a movie about gorillas climbing a building.

"Is this the Vajra?"

haha, I also think of King Kong climbing the Empire State Building!

you know how to play in Linlin Scenic Area, and the key is that you Cheng also cooperated. Amazing!

".."

In the video, the black Gorilla was climbing higher and higher as the helicopter flew.

At this time, more and more tourists had gathered at the scene. These tourists looked at the building from afar and took out their mobile phones to film.

Soon, everyone saw the black Gorilla climb to the top of the building and stand on it. It howled at the helicopters and slapped its chest.

[Chapter 1635 755-The Golden Cabinet \(2\)](#)

This made the tourists focus their cameras.

At this moment, everyone was shocked to see that the black Gorilla had transformed. A transformer in black armor appeared and pulled out a black iron rod from its back.

"I'm the great saint of ventilation. Do you want to die?" The black-armored Transformers waved their iron rods and shouted at the helicopters.

The voice was transmitted far away through the loudspeaker.

Everyone couldn't help but be stunned.

Although they had guessed that it was a transformer, they had thought that it was a Gorilla warrior or something. Who knew that it was the ventilation Saint from the game console?

This was the brother of the great sage, heaven's equal!

The helicopters seemed to be intimidated by the aura of the ventilation great saint and retreated one after another.

However, at this moment, the loud sound of a car engine was heard.

Then, he saw a cool sports car speeding over.

This sports car was definitely a model that had never appeared on the market before, and it made the eyes of everyone who saw it light up.

It was precisely because they had never seen this sports car before that they could guess that it was probably a transformer.

Sure enough, the cool sports car didn't have a driver. It ran straight to the bottom of the building. Then, the sound of the sports car began to change, and another cool transformer appeared.

Surprisingly, after the transformer changed its voice, a small mechanical dog landed and barked around the transformer.

Upon seeing this, everyone subconsciously reacted. This was Erlang immortal master.

After true Lord Erlang completed his transformation, he shouted towards the building, ""Wind Sage, as a demonic Saint, how dare you disrupt the order of the human world? you deserve to die!"

When the ventilation Grand Sage saw Erlang immortal master, he also shouted, "So it's Erlang immortal master, you really like to meddle in other people's business."

With that, the ventilation Grand Sage turned back into a black Gorilla and fell from the building.

At first, everyone thought that the ventilation great saint was going to fight with Erlang immortal master. Who knew that the gorilla would turn around and escape after coming down?

He had no intention of fighting at all.

Seeing this, Erlang immortal master could only give chase.

Although they knew that this was the plot and the script written by Linlin Scenic Area, the tourists still couldn't help but boo at the ventilation Saint when they saw this scene.

This scene was also spread online.

The netizens were speechless.

I thought you were going to fight with Erlang immortal master when you shouted so loudly. Who knew you would run away so decisively? how embarrassing.

However, just when everyone thought that this was the only thing that could happen, something that surprised them happened. Another huge black wild boar suddenly ran across the street.

Wild boar?

Then, the wild boar transformed into a fat transformer with a rake on its back.

Everyone knew who this person was.

Sure enough, the transformer opened his mouth. I heard that master Erlang is hunting down the ventilation Saint. I must watch the show.

As he spoke, Zhu Bajie turned back into a pig and ran off into the distance.

This was the end of the story experience.

Although the script for this time's Linlin Scenic Area was relatively short, it still shocked everyone. It also made everyone know that three more Transformers had appeared in Linlin Scenic Area.

..

Linlin Manor office.

Qin Lin didn't pay attention to what was happening on the internet. There were so many models of Transformers that he had lost his enthusiasm.

He sat in his office, controlling his game character to go fishing by the sea.

The fish he caught now were basically the ones that had dropped in the past. They were not very attractive to him, but sometimes he would just treat it as a daily mission.

After Qin Lin finished fishing for the day, he controlled his game character to go to the lake mine to mine.

After his character leveled up, many levels of the two mines had been opened up, but he had not yet excavated many levels.

Even though the game character was excavating, the game kept getting notifications that special soil was being excavated.

During this time, he also dug out a few buckets of earth spring water.

Naturally, there were also a lot of jade stones.

However, things like jade stones were no longer attractive to him. Even if he had more, he could pile them up into a mountain and use them to show off his wealth. Otherwise, what use would this thing have?

However, if he could find the legendary Jade, it would be useful. He could make it into jewelry or sculptures, and it could even be placed on the bookshelf as an ornament.

Qin Lin continued to control the game's character to dig, but suddenly, a different scene appeared in the game. There seemed to be a clang, and then he saw the game character in a dizzy state while waving the hoe.

It seemed that he had used too much force and had dug into some metal, then suffered a backlash.

[there seems to be something down there ...]

Qin Lin also saw a prompt in the game.

He didn't hold back and immediately controlled his game character to start digging again. The hoe swung down, and another clang sounded.

This was the first time he had encountered such a situation.

Qin Lin had never encountered such a situation before when he was controlling his game character to dig a mine.

He controlled his character to swing the hoe again and dig at the same spot.

This time, the game's screen was different. The excavation site emitted a strange golden light. The Golden light was very dazzling.

Then, a rare animation appeared.

The game character pulled things out of the hole as if he was pulling out a carrot.

This scene meant that they had dug up something good again.

After all, only special items or good items would be accompanied by a small animation. Otherwise, the items would be like a backpack, and there would be no image at all.

Soon, in the mini-animation, a cabinet-like object was pulled out of the soil by the game character ...

At this point, the short animation ended. At the same time, a notification appeared:

[congratulations, you have discovered a mysterious item. This item seems very mysterious and has an unknown history. However, there is an icon of a cross on it. You can go to the church to take a look. Who knows, you might have an unexpected harvest.]

When Qin Lin saw the notification, he did not hesitate to put the cabinet into his game character's backpack. Then, he controlled his game character to go directly to the church.

When he arrived at the church, he saw the priest praying to a statue of Jesus. Naturally, he was not sure if it was Jesus in the game.

He immediately controlled his character to move forward and talk to the priest.

[how can I help you? Yes! [no!]

Qin Lin selected "yes" and then another option appeared. He clicked on the item that he wanted to check and directly chose the cabinet that he had just dug out.

In the game, the cabinet was placed on the ground of the church.

The priest started to walk around the cabinet in circles.

".. "There was even a row of ellipses on the farm.

This seemed to indicate that the cabinet was not simple.

This was something that had never happened before. Even when he was appraising something, he had never seen such a scene.

After an unknown period of time, the priest's figure stopped and then he let out a voice of disbelief.

[No. It was impossible ... How could it be this kind of thing? it shouldn't still exist ... It had clearly sunk into the sea with the legendary wind and waves. It was a legend ... It has already disappeared ...]

Qin Lin looked at the priest and knew that this cabinet was definitely not simple.

Then, the priest started to operate the cabinet. Not long after, the cabinet filled with mud began to change. Slowly, the mud disappeared, and a golden cabinet appeared. The cross icon on it was unusually clear.

it's really this thing, " the priest exclaimed. it has reappeared.

[Chapter 1636 756-It's This Thing](#)

Following the priest's actions, a golden cabinet appeared.

Moreover, with the appearance of this golden cabinet, another small anime appeared.

The cabinet flashed and was even spinning.

The priest said in disbelief, "

[this is incredible. This is the Ark of the Covenant. You've found the legendary Ark of the Covenant. This is God's guidance. Can you donate the Ark of the Covenant to the church? [yes, no?]

Qin Lin directly chose No.

After all, this was the Ark of the Covenant. Even if he was not familiar with the religion, he had heard of it.

So, why should I donate to your church?

After seeing his choice, the priest immediately looked disappointed.

[that's such a pity. I hope you can keep the ark safe. It's a treasure given to me by God!]

Qin Lin didn't hesitate. He controlled his game character to carry the Ark of the Covenant back to the farm.

Then, he locked the office door and entered the game with a thought.

Qin Lin saw the Ark of the Covenant.

The cabinet was about 113 centimeters long, 68 centimeters wide, and 68 centimeters tall. It seemed to be made of a special kind of wood. It had been buried underground for a long time, but it had not rotted. This was amazing.

Moreover, this special wood was wrapped in pure gold, which seemed to provide some protection.

Qin Lin tried to open the Ark of the Covenant, and an even more magical scene appeared. There were two stone slabs in the ark, as well as a golden jar. On top of the Golden jar, there was a cane.

On the outside of the Ark of the Covenant, there seemed to be a carving of an angel with its wings spread out, covering the lid of the ark.

All in all, the Ark of the Covenant was exquisitely made, and it was very attractive.

Qin Lin pressed his hand on the Ark of the Covenant and immediately saw the remark:

[Ark of the Covenant: special!]

[this is a special item. It seems to be very valuable. If it were to appear, it might make some forces go crazy.

[warning: if you obtain this Ark of the Covenant, it's best to hide it. Some people will go crazy over it. Perhaps this thing can be used as a bargaining chip for a country.]

Qin Lin didn't find it strange when he saw the note.

The Ark of the Covenant was a sacred object of a certain sect, and this sect had a very high status internationally.

Even in a certain Western country, many people believed in this religion.

The headquarters of this cult was even a small country, and it was a well-known wealthy country.

Although this country didn't have much military power, it could definitely cause a lot of public opinion in the West.

Therefore, if the Ark of the Covenant were to appear, it could really cause this country to go crazy.

Qin Lin exited the game and went online to search for information about the Ark of the Covenant.

After all, the information on the Ark of the Covenant in the game was different from the outside world.

He didn't even know if they looked the same.

However, after some investigation, Qin Lin also saw the picture of the Ark of the Covenant in real life, which was exactly the same as the one in the game.

However, there was more detailed information about the ark on the internet.

The Ark of the Covenant was a sacred object of the ancient monoliths. covenant " referred to the contract between God and the monoliths.

The Ark of the Covenant was the cabinet where the contract between God and the people of the same color was placed. This contract referred to the two copies of the Ten Commandments that the Prophet Moses had obtained from Lord God on Mount Sina.

They were the two slates from the Ark of the Covenant in the game.

The Ark of the Covenant was a cabinet made of honey locust wood and wrapped in gold from the inside and outside.

Qin Lin knew what kind of wood it was.

Other than that, there was also a sprouting staff that Moses' brother, Aaron, had once used. There was also a jar made of gold. These all matched the items in the Ark of the Covenant in the game.

There were two angels made of gold on top of the cabinet-kilubes. The two angels faced each other and used their wings to form a space. This space represented the place where God lived.

Its appearance was exactly the same as the one in the game.

The Ark of the Covenant had a special position in the XXX sect. It was said that wherever the Ark of the Covenant was placed, it represented the existence of God.

In other words, if the Ark of the Covenant appeared in their country, the God would be in their country.

This was definitely a very ironic thing.

It was no wonder the remark said that a certain country would go crazy.

It would be strange if he wasn't crazy.

If the Ark of the Covenant went missing and none of them were around, then the cult could be said to have been taken back by God, and they would still be Orthodox.

However, the Ark of the Covenant had appeared in another place. They could not justify their actions. Did it mean that they had been abandoned by God?

If that happened, the cohesion of their sect and their faith would collapse.

Under such circumstances, the cult would definitely try their best to get the item back. If they couldn't, they would definitely do crazy things to the person who had the Ark of the Covenant.

After all, these religious people were sometimes the craziest for their beliefs.

This was probably what the note said, to pay special attention to this, and even gave a warning.

However, since he had obtained this item, he had to make use of it. Even if he handed it over to the country in the end, it would still be used for the right purpose.

Otherwise, putting it in the game, or taking it out and hiding it, it would be no different from trash.

Thinking of this, Qin Lin entered the game again and took out the Ark of the Covenant from the game.

After that, he did not hesitate to call Minister Lu.

Beijing.

Minister Lu was busy again. Recently, the mutated man-eating flowers had been progressing very quickly.

[Chapter 1637 756-It's Actually This Thing](#)

Since Qin Lin had given them enough seeds, the Chinese Academy of Sciences had already planted them in large areas. Soon, they could try to experiment with them at the garbage treatment plant.

After all, even though this thing was powerful, it still needed to be tested to know how far it could go.

Minister Lu had asked the Chinese Academy of Sciences to set up a special experimental team to deal with the mutant man-eating flower.

He had just left the group when he received Qin Lin's call.

"Boss Qin, I didn't expect to get a call from you today. Do you have any good news for me?"

Qin Lin's voice was heard immediately. there is good news. Minister Lu, take a look at the message later. I'll send you a video.

Minister Lu was confused and wanted to ask more, but Qin Lin hung up the phone.

He even began to wonder what kind of research results boss Qin had come up with this time. He even wanted to ask his Secretary to book a plane ticket as soon as possible.

If boss Qin didn't call him personally, he would have to make a trip. Now that boss Qin had called him personally, the research must be something extraordinary.

Minister Lu was waiting when he received the message and immediately checked it.

However, he was stunned when he saw the message. Boss Qin did not find out anything at all. Instead, he had sent him something that looked like a cabinet.

[Minister Lu, I spent a lot of money on this thing through special channels. I think it's real, but I can't be sure. Can the higher-ups find some experts to prove it?]

" ? ? ? "Minister Lu was a little stunned when he saw this.

Was this cabinet an antique? Boss Qin had spent a lot of money to buy it, and he wanted to distinguish the authenticity?

However, why would they look for him, who was in charge of the research department, to appraise antiques?

Besides, he could find experts to appraise antiques. Boss Qin was rich, and he could find any expert he wanted.

Minister Lu even replied to a message, ""Boss Qin, What's this?"

"The Ark of the Covenant!" Qin Lin replied with two words.

"The Ark of the Covenant!" Minister Lu muttered.

He did not react at first, but after a while, he exclaimed. He had naturally heard of the Ark of the Covenant.

Moreover, he could analyze some situations more thoroughly than Qin Lin. He naturally knew what it meant if it was really the Ark of the Covenant.

However, didn't the Ark of the Covenant disappear in the legends? It shouldn't have appeared.

However, boss Qin said that he had spent a lot of money on it through special channels. Could boss Qin have found out about the ark? Someone had sold it to boss Qin?

But why did the Ark of the Covenant appear in their country?

If someone had gotten their hands on this, they should have gone to the West to sell it. That way, they could sell it for a better price.

But no matter what, boss Qin bought it. Besides, boss Qin wasn't a fool. If it was too fake, he wouldn't have spent money to buy it ...

Since boss Qin had bought it with money, it meant that there was a slight possibility that the Ark of the Covenant was real.

At the thought of this, Minister Lu made a call.

At the same time, in a Museum in the capital, an old man was carefully protecting the collection inside.

These collectibles were not antiques from China, but from foreign countries, with most of them being from Western countries.

This old man was the person in charge of the museum, his name was Liu Xu.

Liu Xu had studied Western ancient studies as well, so he was very attentive and good at protecting these foreign antiques.

However, he did not worship foreign objects. Instead, he wanted to have a Museum in his own country that specialized in displaying foreign collections.

After all, too many national treasures in their country had been stolen and taken abroad. Moreover, those countries had even openly built museums with these national treasures.

This was a huge irony and a tragedy for their country.

Therefore, he hoped to build a Museum made of foreign antiques. He traveled everywhere and had many patriotic businessmen supporting him, adding a lot of collection to the museum.

Liu Xu was in the middle of repairing an antique when he received a call from an unknown number.

However, this number was his personal number, and strangers usually wouldn't be able to call him. So, even if it was an unknown number, it was possible that someone he knew had given the number to the other party.

Moreover, the number that was calling had a special prefix. It was obviously a Department of the country.

This number can't be forged.

He immediately picked it up and a voice came from the other side, ""You're professor Liu Xu? I have a task for you, can you come to the Hua hospital?"

"The Hua * Yuan?" Liu Xu was stunned for a moment.

He's not a scientist, what's he doing in the Chinese medical Academy?

This seemed strange.

Liu Xu immediately asked, "excuse me, did you call the wrong number?" I'm just a scholar of ancient literature, and I'm studying Western ancient literature. I don't know how to do scientific research."

professor Liu, that's right, " the voice on the other end immediately said. we need your help to identify a Western antique. This item is very unusual. We can't be sure.

When Liu Xu heard this, he nodded in agreement.

Not long after, he received another phone call. He saw a car with the Hua hospital's logo driving to the museum, and the other party showed him his id.

The Chinese Academy had actually sent someone to pick him up. This didn't seem to be a simple matter.

Liu Xu got into the car and was taken to the Hua hospital. Soon, he was brought to a meeting room.

When he arrived at the meeting room, he found that he was not the only one there. There were also several well-known foreign ancient literature experts in Beijing.

These people were also very knowledgeable about foreign antiques.

When Liu Xu entered, these people also noticed him.

"Professor Liu, you're here too?"

"Professor Liu is the most capable. He will definitely be invited."

"Yeah, I just don't know what the Chinese Academy of Medicine wants us to help them with."

".."

These people were all surprised and curious.

Under normal circumstances, it was impossible for them to have any contact with the Chinese Academy in their entire lives.

At this moment, Minister Lu came in with a leader who was in charge of the cultural relics.

The leader's face was still filled with joy. When he saw Liu Xu and the others, he said, ""Professor Liu, you're here. And all the other professors, I really need your help this time. Furthermore, the item this time is very important."

These words piqued the professor's curiosity.

Liu Xu knew this leader and immediately asked, ""Leader, I wonder what it is?"

The other students also asked, "

"Yes, leader, what do you want us to help you identify?"

"It must be something important for you to ask us out so seriously, right?"

"Yeah, I don't know if this thing has anything to do with the Chinese Academy of martial arts."

".."

The leader immediately said, " everyone, this thing is really important. If it's real, it's definitely an incredible thing. However, it has nothing to do with the Hua hospital. It's the person who has this thing who contacted the hospital. The other party is the boss of Linlin company.

The boss of jinglin company?

The professors couldn't help but be surprised.

They had naturally heard of jinglin company. This company was already a giant company in the country.

Some people even said that if the boss of jinglin wanted to, he could become the richest man in the country by listing any of his subsidiaries.

Some people even said that even if he didn't go public, he was already the richest man in the country.

Who knew that the reason they were called over this time was actually related to this person? they didn't know what situation had involved this person.

At this moment, the leader turned on the remote control and pointed it at a screen. The screen lit up and a video appeared.

The video was of a golden cabinet with an Angel on it. The wings were very eye-catching.

The appearance of this thing in the video stunned everyone.

"This thing ..."

"That's impossible, right?"

"Are you kidding me?"

".."

Liu Xu's face was also full of surprise. As the country's most powerful expert in Western ancient literature, he naturally had a deep understanding of Western ancient literature.

Therefore, he recognized what the cabinet was at a glance.

It seemed to be the Ark of the Covenant, the most Grand legend in the West, and also the most legendary thing.

However, this thing had long disappeared in the long river of history. Why did it appear here?

This thing couldn't be real.

[Chapter 1638 The Rice Cooker Technology 1](#)

Liu Xu was certain that the Ark of the Covenant was fake.

However, he heard the leader say, " dear experts, the main reason I called you here today is to let you verify whether the cabinet of the covenant is real or fake. Furthermore, Linlin company has basically confirmed that the cabinet of the covenant is real.

Liu Xu and the other professors were in disbelief.

And you're even certain that it's mostly true?

However, they had no choice but to go since the leader had organized it. Furthermore, going to the Linlin Scenic Area was just a vacation. After all, it was rare to go on a vacation.

It was mainly because the Linlin Scenic Area was really good for tourism.

Not long after, Liu Xu and the others were arranged to board the plane to Ming city.

When they arrived at Ming city, the subordinate Department had already arranged a car for them to take them to you city.

Soon, these people arrived at the Linlin Scenic area's office.

Naturally, Qin Lin had already prepared a special office for him.

After the professors arrived, he asked MA Hong to move the cabinet of appointment over and wait for the news.

He was certain that the Ark of the Covenant was real, but he needed the professors to say it.

Liu Xu and the others were immediately attracted when MA Hong and his men carried the Ark of the Covenant into the office.

The Ark of the Covenant was too eye-catching.

The leader immediately went up to MA Hong and said, ""I'll have to trouble you."

Then, he eagerly asked Liu Xu and the others to check the Ark of the Covenant.

If the Ark of the Covenant was real, he knew very well what kind of stir it would cause in the domestic cultural relics world, and he also knew how much benefits this thing could bring them.

Liu Xu and the other experts nodded.

Although he felt that the possibility of the Ark of the Covenant being real was low, he still checked it carefully.

However, as he checked, the expressions of Liu Xu and the others were obviously not right.

"What's with this thing?"

"Yeah, it seems to be true."

"This is unbelievable."

Liu Xu's mouth was wide open in disbelief.

After checking it, he, like the others, actually felt that it was real.

But how could it be real? furthermore, it was so new.

Liu Xu immediately asked the leader to arrange for someone to bring over the appraisal tools he had brought. He wanted to test the age of the Ark of the Covenant.

Even if the appearance could be imitated, the age and precipitation of time could not be faked.

The other professors also came to help.

It took a lot of time to use the equipment to test the age. They finally got the results after a day and a night.

Then, Liu Xu and the others were in complete disbelief.

Because the Ark of the Covenant was real.

How could it be true?

Why was it true?

Liu Xu felt like he was dreaming.

Because under normal circumstances, it shouldn't be true.

When the leader received the news, he felt like he was going crazy. "Really? Is it true?"

After the leader received the news, he immediately took out his phone and made a call, reporting to the inside, " leader, that Ark of the Covenant is real. It's unbelievable.

Then, the leader talked on the phone for who knows how long. After hanging up, he turned to MA Hong and said, " Sir, I want to see the boss of the Linlin company. I want to talk to him about this date. We want to display this thing in the National Museum.

When MA Hong heard this, he immediately said, " Sir, the boss has already instructed us. You can take the Ark of the Covenant away. This Ark has been donated to the country. We will send someone to deliver it to your door.

The leader's face was filled with joy when he heard this.

He had thought that it would take a lot of effort to bring the item back, but he didn't expect the other party to donate it directly. This was really a surprise.

"Then help me thank your boss." This leader obviously didn't know Qin Lin's identity. After all, he was only in charge of the cultural relics and his status wasn't high enough.

Not long after, the Ark of the Covenant was taken away by the leader.

MA Hong had also sent people to escort the items. They arrived in the capital very quickly, and then delivered the items to the National Museum.

When the owner of the National Museum saw the Ark of the Covenant, he was in disbelief.

Liu Xu and the others also followed them to the National Museum.

They studied foreign ancient languages, so they were naturally more enthusiastic about this.

Not long after, a piece of news quickly spread in the country. Then, with the help of the higher-ups, a lot of news about the Golden cabinet spread all over the world.

On the internet, all the netizens who saw the cabinet were shocked.

The internet was well-developed, and a lot of information could be found. When the Ark of the Covenant appeared, the relevant information had been spread.

The netizens couldn't believe it. This was the f*cking Ark of the Covenant, something that was rumored to have been left behind by God.

Furthermore, this was the Holy relic of the church of X.

Now, this sacred artifact was actually being displayed in their country's Museum.

If this was true, how shocking would it be?

However, if it was displayed in the National Museum, it couldn't be fake, right?

In the West, people from many countries also saw the news and were shocked.

When Adolphus saw the news, he was dumbfounded.

As a citizen of a beautiful country, he had quite a bit of power. Naturally, he knew the influence of the Ark of the Covenant on the West.

Especially in their beautiful country, most people believed in the church of X.

Even though he did not believe in it, his family believed in the church of X.

Therefore, he knew very well what the Ark of the Covenant would represent if it was real.

[Chapter 1639 The Rice Cooker Technology \(2\)](#)

The believers of church X all over the world would want to get the ark back.

If the eastern Kingdom did not return it, many people would go crazy. At that time, the entire Western world would have to give the eastern Kingdom countless benefits in exchange.

At that time, he was afraid that the Western countries would have to return the National treasures that they had stolen from the eastern countries, and those countries would have to do as they were told.

Otherwise, if all the believers of church X in the West were to cause a ruckus, every country would be in turmoil.

The appearance of the Ark of the Covenant had indeed caused chaos in the Western countries.

In particular, in the headquarters of the church of X, in a certain tigan, a few red-robed archbishops and the Pope immediately held a meeting.

The next day, a red-robed Cardinal sent a notice to the eastern country.

This was also the first time.

Tigan city had never been in contact with the eastern Kingdom. This time, they contacted the eastern Kingdom for the first time because of the Ark of the Covenant.

Furthermore, they had to confirm the authenticity of the ark as soon as possible.

Naturally, the country had also confirmed it at the first moment and invited him to come over. They would receive him at the National Museum in the capital.

When the arch-Cardinal arrived in the capital, he was immediately invited to the National Museum.

Upon seeing this, the arch-Cardinal had a bad feeling. The Ark of the Covenant might be real.

If it wasn't true, this man from the eastern Kingdom wouldn't be so confident.

This was a terrible thing for them.

That's right, they didn't want the Ark of the Covenant to be real. If it was real, the eastern Kingdom would have to put forward some conditions for them to take it back. They definitely wouldn't take it back easily.

Moreover, the other party had made such a big display, so they should have some other purpose, and it was not a small one.

Soon, the Ark of the Covenant was carried out. The leader had accompanied the red-robed Cardinal to inspect the ark.

As a member of tigan's management, the cardinal was naturally very familiar with the Ark of the Covenant. Therefore, he knew that things were going to be bad the moment he saw the ark.

Because the Ark of the Covenant was real, he could recognize it at a glance.

As their church had secret records, they knew how to identify the ark. Therefore, he could quickly confirm that the ark was real.

The arch-Cardinal hurriedly asked the leader, ""Sir, may I ask if we can take the ark back? We're willing to pay the price in exchange.""

When the leader heard this, he immediately smiled and said, " I'm really sorry, but this is not something I can decide. However, our leader said that if you are willing to trade with our country's national treasure, we are willing to do so. However, it depends on how much you like the Ark of the Covenant.

The red-robed Archbishop sighed. He had already guessed this would happen when he came.

Therefore, he didn't say much. He took out his phone and contacted them as soon as he left the National Museum.

If the Ark of the Covenant was in another country, they might be able to seize it by other means, even by force.

However, there was no way to use this method in this country, and no one dared to get close to the mission in this country.

He then looked at the two huge Transformers standing at the door. It was obvious that they were telling him not to have any ideas. Otherwise, no matter how many people came, they would all be killed. Even if he was lucky enough to make it here, he would still have to face the two Transformers.

Soon, the red-robed Cardinal also sent the news back. Not long after, a tigan spread the news that they needed the National treasure of that country to exchange for the Ark of the Covenant. They hoped that all believers would actively help.

This also meant that the Ark of the Covenant was real, and it was also a request and order to all believers.

At this moment, the entire Western country was in an uproar.

Not long after, a piece of news came that a certain tigan had used all the National treasures of the eastern countries in the Andalibo Museum to exchange for the Ark of the Covenant.

This Museum had also collected many treasures that had been seized by the Allied forces in the past. It had always been promoted as a display of the National treasures of mysterious Eastern countries.

Now, a certain tigan could actually make the museum take out those national treasures to exchange for the Ark of the Covenant.

Unfortunately, the country did not care about this proposal at all because it was not enough.

The Ark of the Covenant was a treasure left behind by a God. In the West, it was like an axe left behind by Pangu.

Although this was just a story made up by the Westerners to give it a sacred color, who asked this thing to have a sacred color?

So, if it wasn't enough, not responding meant that you had to use more things to exchange.

Soon, tigan also sent out an offer to exchange for the eastern National treasures of two museums. Unfortunately, there was still no response, indicating that it was not enough.

He needed more.

Qin Lin had been paying attention to this matter for some time. After all, the Ark of the Covenant had come out from him.

However, after seeing the news, he was relieved and stopped paying attention to it.

It was good that the Ark of the Covenant had worked.

If the National treasures in the two museums were not enough, then he would have to bring more.

In any case, he would get it back in one wave.

Linlin Manor.

After Qin Lin completed his daily mission, he locked the office door and entered the game with a single thought.

Naturally, he planned to go back to the game world and take a look.

In the outside world, he really wanted to go to you city for a walk. Because of academician Qin's popularity on the internet, he would definitely be recognized. Then, there was the risk of being surrounded, and it would be difficult to go shopping ...

However, it was different in the game world.

Ore town was no different from the real world now. When he strolled around in it, it was no different from strolls in you city.

The key was that he would not be recognized. Moreover, the shops in ore town were better, more advanced, and sold more items.

There might even be tear-resistant silk stockings and pajamas like before.

Therefore, when Qin Lin passed by a square, he saw a video playing on a platform in the square.

There were many people gathered around the platform.

Qin Lin walked forward curiously and saw the content of the video. It was a video auction.

The people around them also said, "

"It's an electric rice cooker!"

haha, this auction video is getting more and more interesting. It's getting more and more stingy. Can't they auction something good? "

This is not an auction for rice cookers, but the manufacturing technology of rice cookers.

".."

Qin Lin heard the discussion in the crowd and suddenly became interested.

The rice cooker technology was naturally the technology to make rice cookers.

He didn't know how good the technique was, but he didn't lack in-game money. He just wanted to buy it and see how it went.

"How are we going to film this?" Qin Lin asked the person beside him.

The man looked at Qin Lin in surprise and said, "brother, did you just get internet access at home? or have you not been out for too long?" Place your card into the slot on the platform, and you can start the operation once you have enough money."

Hearing this, Qin Lin also took the bank card from the game, went to the platform, and put the card into the groove.

As for gold coins, he definitely had enough. After all, his gold coins in the game were calculated in the hundreds of millions.

Soon, Qin Lin received a prompt on the screen to enter the amount. So far, someone had already entered 150000 gold coins. If the price was higher than 150000 gold coins, then the rice cooker technology could be auctioned.

Qin Lin couldn't help but be surprised. This kind of auction was somewhat similar to online auctions in real life, but it was obviously more advanced than online auctions.

After all, it was impossible to sell such technology in an online auction, and there was no guarantee.

However, the auction of this video could give a complete guarantee. Moreover, the technique was certified. As long as the auction was successful, you would definitely be able to get the technique.

Moreover, if the auction was successful, the data would be directly printed using the data transmission technology.

Qin Lin directly entered 200000 gold coins.

It seemed that someone was also interested in this technology, and the gold coins were immediately raised to 210000 gold coins.

Qin Lin did not hesitate and immediately entered 250000 gold coins.

This time, no one was competing with him for this auction.

Soon, he saw the notification on the screen.

[congratulations on winning the bid for the special rice cooker manufacturing technology. You can now print the technical information through the auction equipment!]

Qin Lin didn't stand on ceremony. He immediately followed the procedure and printed the information out of the auction machine. Then, he looked at the information of the information.

Then, his face was full of surprise as he exclaimed, "'F * ck ... You're awesome!"

[Chapter 1640 This Rice Cooker Is Too Incredible _ 1](#)

[rice cooker technology: special!]

[this is a relatively advanced rice cooker technology. After it is made, this rice cooker will have a special effect on the rice: Sweet +1, taste +1, soft +1!]

When Qin Lin saw the note, he couldn't help but feel that it was awesome.

It was not surprising that the quality of the food was good and the game's products could increase these attributes. Even if you obtained a skill, it would not be strange for the skill to have these attributes.

After all, wasn't this the attribute of cooking? Can increase the deliciousness attribute of food.

But now, a rice cooker with this attribute was amazing.

The originally ordinary rice could be made very delicious by putting it in this rice cooker, right?

This was awesome.

If the Linlin rice, which was already more delicious, was cooked in this rice cooker, it would undoubtedly be more delicious.

Therefore, after the game was upgraded, the exploration of the game world was much more noticeable.

Just by coming in and shopping, he could obtain this very good technique.

[do you wish to use this technical information?]

Qin Lin naturally didn't choose "yes" immediately. Instead, he brought the rice cooker technology out of the game.

Back in his office, he first printed a copy of the rice cooker technology.

Then, he re-entered the game and chose to use the technical information.

In the next moment, the technical information turned into light spots and dispersed. Then, a dense amount of information began to appear in his mind.

It was all about the rice cooker technology, from a small screw to a big structure, and it was very detailed.

Moreover, the technical principles of these parts were also very clear in his mind, allowing him to understand them very clearly.

Even if he didn't know anything about electrical appliances, he should be able to understand it with some basic knowledge.

Qin Lin only picked up the printed information after he had thoroughly understood the rice cooker technology.

Now, he was thinking about which company to hand over the technology to.

Logically speaking, if this technology was handed over to Linlin's laboratory and analyzed by the people in the laboratory, they could set up an electronics company in the shortest time possible.

However, Linlin's laboratory already had a lot of business to do, so there was no need to hand everything over to Linlin's laboratory.

Therefore, he decided to hand over the technology to Linlin food company.

Moreover, the rice cooker itself was related to food, so it was normal for Linlin food company to make it.

As he thought about it, he dialed Deng Guang's number.

At that moment, Deng Guang was at the headquarters of Linlin food company, reading the information Gao yaoyao had reported.

The Linlin icy cool company that Gao yaoyao was currently in charge of had already been established in various places, and the selected stores were all under renovation.

Moreover, some of the stores had already been renovated, and business was still very good.

After all, it was under the name of Linlin company, and those recipes were specially made by Chairman Qin. The taste was very good, and the similar products on the market could not be compared at all.

Therefore, as long as Gao yaoyao chose the location, renovated, and opened the store step by step, it would be fine.

As more and more stores were opened, the turnover would naturally increase, and the assets of this subsidiary would become stronger and stronger.

It could be said that this was Linlin company's natural advantage. After all, their products were indeed good, and they had the brand endorsement of Linlin company.

Naturally, it would be good if he could not play any different tricks during this process.

"Yaoyao, good job. Just continue with the plan." Deng Guang also smiled and praised Gao yaoyao. He then gave her some encouragement.

When he received Qin Lin's call, Deng Guang answered it immediately. "Chairman Qin, what are your orders ...? Linlin Manor? Alright ... I'll be there immediately!"

Deng Guang gave Gao yaoyao a few more instructions before leaving the office building of Linlin food company.

Because of the development of Linlin food company, you Cheng had long planned an industrial area for Linlin food company.

The office building of Linlin food company's headquarters could be seen from a distance on the 5th Ring Road.

Deng Guang immediately drove to the Linlin Manor to see Qin Lin.

He was getting busier and busier with his business, so he didn't come to Linlin Manor often. However, every time he came, he would have a different feeling.

After all, he was a veteran like Gao yaoyao, who had accompanied Linlin company from the initial ketchup factory to the present.

The 5% option reward that he had received now represented a terrifying amount of assets.

"Chairman Qin, I'm here." "What can I do for you?" Deng Guang asked when he saw Qin Lin.

Qin Lin passed the documents on the table to Deng Guang. director Deng, take a look at this information. I've been developing this technology in my spare time. I want to help your food company run it.

Deng Guang took the information in surprise. He was shocked to find out that it was about the rice cooker technology.

This was the first time that Chairman Qin had given him such skills.

Rice cookers were definitely common in modern society. After all, every family had one.

But he knew very well that since Chairman Qin took out this rice cooker, it must be something special. Otherwise, Chairman Qin wouldn't have specially called him to come here.

Therefore, this rice cooker was definitely not simple, and it must be a high-level technology.

Deng Guang didn't even ask Chairman Qin any more questions. He took out his phone and made a call.

As soon as the call went through, he ordered, " go and investigate the rice cooker companies immediately. See if they have any factory production lines to sell and buy them immediately. It's best if they are in Ming city and min province. Also, move a production line to you city as soon as possible.
