

The Game 1661

[Chapter 1661 It's Just A Competition Of Acting Skills, And This Is Incredible](#)

Linlin Scenic Area.

In the technology Park.

Academician Hao and the other two were writing various formulas on a drawing board. The more they wrote, the more excited they became, and the more smoothly they wrote.

They were doing an experiment, not studying some formula.

They wanted to experiment with what they had discovered. If they could get confirmation, it would be too incredible.

Before this, they had an epiphany here and suddenly wrote down the second step of the deep space rocket research formula and theory. They had a familiar feeling.

It felt like he had an epiphany in Linlin Manor.

Therefore, they had been experimenting, wanting to know if it was true.

The state of enlightenment they had encountered in Linlin Manor was very rare. No matter how much they studied it, they couldn't figure it out.

He could only attribute it to his environment and state of mind.

That was why it was so difficult for them to grasp it and find any patterns.

Of course, they didn't know that it was because of the moonstone. If Qin Lin didn't activate the moonstone, they wouldn't have been able to study anything.

This time, they could clearly feel the difference.

Therefore, they tested it on the drawing board.

They did not expect to discover something and grasp some patterns.

One could believe that doing research here would be smoother and clearer than anywhere else outside. It would be easier to write out some formulas and data.

Their experiment method was very simple. They found some small problems that they usually encountered, solved one outside, and solved another inside.

There was no doubt that it would be easier to solve the problem here.

Moreover, in order to be more certain, they also settled the same problem by staying inside and outside alone.

Their abilities were similar, but the people inside were easier to deal with.

If it happened once, it would be a coincidence. If it happened many times, it would not be a coincidence.

Moreover, they even tried to switch people, but the result was the same.

The key was that every time he was in the science and technology Park, he could more or less enter that state of enlightenment.

This was unbelievable.

Thinking about it carefully, if this was the case, how much help would it be for researchers like them? If even the country's scientists could do research in such an environment, how terrifying would that be?

How long would it take for their country's technology to surpass the West? Or rather, he would be able to crush the West very soon?

Soon, academician Hao and the other two stopped their actions and looked at each other in disbelief.

"It's really like that,"

"It's already confirmed."

"This can't be boss Qin's doing, right?"

yes, the construction of this Science and Technology Park was not led by boss Qin. He even made a lot of last-minute changes.

it's unbelievable. Although it might be a coincidence, we still have to test boss Qin!

".."

In the end, the three of them nodded in unison and decided to test Qin Lin.

Therefore, they arrived at Linlin Manor as fast as they could. The staff inside couldn't help but look at the three of them when they saw how anxious they were.

When academician Hao and the other two arrived at the office, they saw Qin Lin, who was in a daze.

Qin Lin was not in a daze. He was looking at the game screen in his mind. He was controlling the game character to complete the daily tasks.

Unfortunately, he still did not gain anything today.

When the three academicians arrived, he snapped out of his daze and asked, " academicians, you guys look very anxious. Did something happen? "

"Boss Qin, you've been to the science and technology Park, right?" academician Hao immediately asked. It's amazing there. Through the construction of your design, the technology Park can actually help with scientific research. Only you can create such a place."

Qin Lin knew the reason when he heard this. The three academicians probably found that the science and technology Park could increase perception.

He immediately realized that the three academicians were testing him.

Qin Lin immediately put on his acting skills and asked with a face full of doubt, ""Academician Hao, what are you saying? What had happened? I'm a little confused by you guys."

Academician Hao and the other two looked at each other in confusion.

They seemed to have made a mistake.

That state of mind had nothing to do with boss Qin.

Boss Qin also looked very confused.

If he had a connection with boss Qin, boss Qin would definitely not be in such a state.

Indeed, the environment of Linlin Manor was designed and built by boss Qin. It made sense that the magical feeling was related to boss Qin.

What did this Technology Park have to do with boss Qin? it had nothing to do with him, okay?

The three academicians were completely deceived by Qin Lin's acting skills. The more they thought about it, the more they realized that they were right.

After that, the three of them left Qin Lin's office and called Minister Lu.

They felt that they had to report this to Minister Lu.

After all, boss Qin's Science and Technology Park had such an effect, so he had to make good use of it. This kind of thing could only be negotiated by Minister Lu with boss Qin.

Very quickly.

Minister Lu's call was connected.

academician Hao, you guys are too amazing. You actually completed the second step of the deep space rocket research just like that. I've already arranged for people to start the experiment immediately. Once the data is calculated and the mold is ready, we can make the real body. Minister Lu said excitedly as soon as he picked up the phone.

[Chapter 1662 It's Just A Competition Of Acting Skills, And This Is Unbelievable](#)

As the person in charge of the Chinese Academy of Medicine, he naturally knew the significance of this research breakthrough.

This directly cast the Western countries even further away.

When those people saw that the rocket they made could actually turn freely in space, what would they feel?

The breakthrough at this step would also allow their yearning for a spaceship to take a step further.

Academician Hao didn't respond to the compliment. Instead, he immediately told Minister Lu about the abnormality in the technology Park.

Minister Lu was still excited about the breakthrough in rocket technology.

When he suddenly heard this news, he was completely shocked and in disbelief.

He knew that Linlin Manor had this function. When the situation was good, one could enter enlightenment.

It wasn't just academician Hao and the other two academicians who had this experience. The other academicians also had this experience.

It was just that this kind of enlightenment depended on luck and couldn't be controlled. If it could be controlled, how powerful would their country's scientific research be?

What was academician Hao saying now?

The technology Park in Linlin Scenic Area could actually allow people to freely enter a state of enlightenment?

This was simply unbelievable, alright?

He definitely had to make good use of this place.

"Does this have anything to do with boss Qin?" Minister Lu asked.

Academician Hao immediately explained, " Minister Lu, I can guarantee that this has nothing to do with boss Qin. The three of us went to test boss Qin, and he was also very confused. If it has something to do with him, he can't fool our eyes!

Academician Hao was very confident when he said this.

Minister Lu naturally chose to believe it. After all, it was academician Hao and the other two old seniors. They had eaten more salt than boss Qin had eaten rice. If there was anything abnormal, then the three old seniors would confirm it.

However, with this discovery, Minister Lu was also very anxious. He immediately asked his Secretary to book a plane ticket to Ming city, and then rushed to you city to see the three seniors.

He went to the science and technology Park with the three seniors to check the situation and confirmed that the science and technology Park did have such an effect.

Then, he went to see Qin Lin and asked, "Boss Qin, you really don't know the state of the tech Park?"

"I know!" Qin Lin replied.

Minister Lu's eyes widened and he looked at the three old academicians.

Didn't she say that it had nothing to do with boss Qin?

Why did boss Qin say he knew?

The three old academicians were stunned. They subconsciously looked at Qin Lin as if to ask, "were you fooling us before?"

Qin Lin immediately said seriously, " it's all over the internet. They're saying that my Technology Park has suddenly changed. I don't know what's going on. Everyone's talking about it.

Minister Lu, academician Hao, and the others were stunned.

So this was what boss Qin was talking about. But was this what they were talking about?

Boss Qin was really on a different channel from them.

Minister Lu chimed in, " boss Qin, we're not talking about that. It's just that your Technology Park is a little magical. We don't know the reason for it yet, but it's probably related to the environment or the magnetic field that stimulates the human brain. It allows the human brain to be used better and conduct scientific experiments with a clearer mind.

"What?" When Qin Lin heard this, he pretended to be very shocked.

Anyway, his acting skills were as superb as they could be. Minister Lu and the three old academicians were stunned.

"Boss Qin, don't you understand?" Minister Lu couldn't help but ask. It's just that your Technology Park is really amazing!"

He repeated what had happened.

Qin Lin pretended to be shocked and said, ""How is that possible? Then how did the science and technology Park have such an effect? Isn't this too unbelievable?"

"Right?" Minister Lu nodded. Boss Qin, you also find it unbelievable, don't you? So, we plan to build a small Research Institute in your Science and Technology Park, and it will be a branch of our Chinese hospital."

This was also the reason why he had to come over immediately.

He didn't ask Linlin Scenic Area to give him the entire Science and Technology Park. After all, if they really relied on this function, the researchers might slack off, and then their research might not be serious.

That was a very terrifying thing.

If it was really caused by a magnetic field, the function would be gone. By then, the researchers would get used to it, and it might be useless.

Therefore, this kind of thing had to be used on the edge. For example, the major research of academician Hao and the other two could be arranged here.

Or when one was about to make a breakthrough in their research but encountered a critical problem that was difficult to solve, they could arrange for the person to come over with the excuse of traveling and let the other party study inside.

In that case, with the help of the special effects here, those researchers would be able to make breakthroughs. They would be able to maintain their advantage in scientific research, but they wouldn't be used to it and lose their autonomy in case this function suddenly disappeared.

This arrangement was much more reasonable, and most importantly, it would not attract any attention.

Otherwise, with so many people from the Hua * Yuan coming here for a long time, it would be difficult not to attract attention.

Qin Lin naturally knew that was the purpose of Minister Lu's visit, so he nodded with a smile. After all, he was well prepared.

After getting Qin Lin's approval, Minister Lu immediately took out his phone and called the People's Hospital to make arrangements.

Therefore, within a few days, good news came from the Chinese Academy of Medicine. The research of academician Hao and the other two researchers had been preliminarily verified, and the first formula had been verified.

This also made the three old seniors busy, analyzing and verifying all the formulas in the second step together.

Of course, Minister Lu also called some people from the Hua hospital. Then, they went to the you city government together and discussed some things with sun Xian.

Not long after, a cordon was suddenly drawn in the central area of the technology Park. Moreover, this area was marked out with a boundary, and there were guards around to prevent people from approaching.

This made many tourists confused. As soon as they got close, they were warned by the guards. This was the first time they had encountered such a situation in the scenic Area.

"What is this? Why are there guards?"

"Are the guns in their hands real?"

they're standing so upright. They should be real soldiers, right? "

".."

Many tourists noticed it and took photos and videos to upload on the internet.

There was no way to hide it in such a place. Therefore, it didn't take long for the internet to be in an uproar again.

Everyone was curious.

Was he going to build a Research Laboratory here? Moreover, there were guards with weapons watching, so it should not be ordinary, right?

However, at this moment, someone noticed that there was an additional sign at that position. On it were the words: A special and mysterious research base for research and sightseeing.

Moreover, the higher-ups even introduced that this was a mysterious tourist attraction, a project that simulated a mysterious research base. The soldier was also a retired soldier and was specially recruited.

Naturally, this project could only be seen from afar and not up close, which meant that one could only look at it from the outside and not enter. This also required a project fee of 100 yuan.

When these were uploaded to the internet, all the tourists were in an uproar. How many years did they have to have a stroke of brain to come up with such a project?

Many tourists could not help but leave comments on the official account of Linlin Manor, suggesting that the planner of this project should be fired.

This suggestion actually received the approval of many people.

Therefore, the mastermind who did not exist should be terrified.

It was also because of this that the people on the internet no longer paid attention to this matter. They were easily fooled.

Qin Lin had been paying attention to the situation on the internet. He wanted to know how Minister Lu and the others were going to solve this problem. He did not expect the problem to be solved in such a simple way. It was a little unbelievable.

It could only be said that this netizen was really easy to deceive. It was not difficult to influence the thoughts of netizens.

This was probably why so many netizens with a strong sense of justice were often easily guided and used as knives.

[Chapter 1663 769-Flight Stone](#)

If the Chinese Academy wanted to build a branch, it naturally wasn't as simple as building a building. It had to be specially designed and built with special materials.

After all, the research results here would be top secrets, and they would need absolute defense.

The construction process would be very complicated, and special materials would be used. This might attract attention again, and they would need the cooperation of Linlin Scenic Area.

Otherwise, if some sharp-eyed tourists recognized some of the building materials, it would cause a stir on the internet.

However, Qin Lin didn't get involved in this kind of thing and handed it over to Lin Lanzi.

He didn't have the mood to care about such things.

After all, he didn't have that much time to manage everything. He was young and old.

Linlin Manor.

In the office.

Qin Lin continued to control his game character to complete his daily tasks for the day.

He had quite a harvest today, including a special-quality tree and two special ornamental fish.

Unfortunately, he had already caught the trees and fish, so he didn't think they were precious.

After Qin Lin finished his usual task, he planned to enter the game to have a look.

After all, professor Gao's research had been fruitless for a long time, so he decided to enter the game to take a look.

Even the planetary gravity technology had produced results so quickly, so why were there no results for the cosmic ray particles so late?

It was at this moment that he noticed that Mayor Thomas had appeared at the entrance of the ranch.

This meant that there was another plot quest.

Seeing this, Qin Lin immediately controlled his game character to go to Thomas's place. He clicked on it and a dialogue appeared:

[it's great that you're here. Your dog won the flying disc competition, so I'm sure it's a very powerful expert. Can you help me with something with your dog? Can I? I can't?]

Every time Qin Lin saw this choice, he would think that the game producer was out of his mind.

Didn't he have cerebral thrombosis for many years? why would he design it like this?

If there was a plot quest, he would have definitely accepted it. Why did he have to ask?

Qin Lin chose "yes."

The next moment, the conversation appeared again.

[where's your dog? [why don't I see your dog?]

Qin Lin was helpless. He just had to take care of it. He would naturally solve the dog problem. Who knew where that bastard wangcai was messing around in Linlin Scenic Area?

Thinking of this, Qin Lin went straight out of the office. When he saw the two mutant birds outside, he took out the mysterious special broken horn and began to play.

Naturally, he used the mysterious broken horn's ability to command animals to order the two phoenixes to call the dead dog back ...

With the mysterious broken horn blowing, the two phoenixes flew out decisively and began to circle around the Linlin Scenic Area, looking for wangcai's traces.

In Linlin Scenic Area, those popular animals on the internet were familiar to everyone. The first was wangcai and snowy, a dog and a fox. They were jokingly called the " Fox friends " group by netizens.

The other one was red hair and the group of squirrels behind him.

They were the most popular among tourists. After all, they did not like smart little things.

There were two parrots, a white Horse called little lion, and happy elephant.

Naturally, the most popular one was still wangcai.

After all, this dog knew how to let people scan the QR code. He didn't know when it had hung a tablet specially recommended for mutes around its neck. The key was that it knew how to use it.

At a scenic spot.

As soon as Wang Cai and snowy appeared, they attracted the attention of the tourists around them.

The two guys stopped and squatted there, showing the QR code hanging around their necks. Then, wangcai pressed the tablet on its neck and a sound began to be made.

"I'm a small business performing, so I'm taking a photo!"

"I'm a small business performing, so I'm taking a photo!"

His voice continued to ring out.

The tourists around them also took out their phones to take pictures.

This dog was also a wonder of the scenic Area. However, this dog wasn't always in business, and business depended on whether it was happy or not. Therefore, this kind of opportunity was still very rare.

Naturally, there were also many tourists who had already started to move.

Since this dog was trying to survive, they naturally had to support him, right?

After scanning the QR code, these tourists began to take photos with wangcai and snowy. The two guys were very cooperative, posing in cooperation and even showing cute looks.

The tourists were very surprised to see this.

When the tourists behind saw this, they also came forward curiously and also started to take photos to help the dog take care of business.

Just as the tourists surrounded wangcai and xiaoxue, there was a sudden melodious bird chirping in the sky. Following the chirping, two beautiful birds appeared in the sky.

The tourists were immediately attracted.

"It's a Phoenix!"

"It's really them!"

"I'm so lucky to have the chance to see them today."

".."

All of a sudden, the surroundings became lively.

Everyone knew about phoenixes, but before this, there were no phoenixes in reality. This kind of bird did not exist at all.

It was the sudden appearance of four phoenixes in you city that let everyone know that phoenixes really existed.

There were even people who were specifically looking for traces of other phoenixes in you city. There were also people who were specifically looking for all kinds of information about you city. They wanted to flip through all the information about you city.

Moreover, someone had actually found some clues, because there was a record in the county records that a county magistrate of you city had once caught a magical bird and presented it to the Emperor at that time.

[Chapter 1664 The Flight Stone \(2\)](#)

Now that he thought about it, this strange bird should be the Phoenix.

The person who made this discovery immediately posted the information on the internet, and this discovery was approved by many people. Naturally, there were also some who opposed it.

After all, if it was a Phoenix, it was impossible for the county magistrate not to know that it was a Phoenix and to record some strange bird.

However, the more they argued, the higher Phoenix's popularity on the internet became.

When the tourists took pictures of the phoenixes, the dog seemed to be dissatisfied. It barked at the two phoenixes in the sky, as if it was cursing.

It was as if it was saying that the Phoenix's appearance had interrupted its business.

The two phoenixes didn't attack it, but instead let out a crisp cry.

This surprised the tourists. Was the scenery communicating with the dog?

That was obviously the case.

When the dog heard the Phoenix's cry, it was obviously stunned for a moment. Its arrogant and grinning appearance became silly and cute.

Obviously, animals had their own way of transmitting information.

Then, the dog barked at the little fox. Then, the scoundrel friend quickly left in front of the tourists and returned to the manor not long after.

More importantly, these two guys even knew to meet Qin Lin in his office.

As soon as he arrived at the office, the dog barked at Qin Lin.

When Qin Lin saw the young paparazzo, he also closed the office door directly. Then, he picked up wangcai and entered the game with a thought, leaving the little fox to spin around in the same place.

After Qin Lin logged wangcai into the game, he left the dog and logged out of the game.

This time, he controlled the game character to go to Thomas. Wangcai followed him and accepted Thomas's task again. The conversation appeared again:

[your dog is still so energetic. It's great that you agreed to bring your dog to help. Here's what happened. There seems to be a very strange thief in the town. Every time he steals, the police can stop him, but he escapes every time. Also, the surveillance camera found that he brings a stone with him every time. It's very strange. I hope your dog can help to find the thief. This is something that the other party has taken. There should be a lot of smell left, right?]

"Is it that thing?" When Lu Feng saw the conversation, he was surprised.

There were many magical items in the story of the farm, such as the Kappa Jade, the goddess stone, and so on. He had seen all of these magical items.

Aside from these items, there was an even more powerful item that every player wanted to obtain: the flight stone.

This was because these flying stones could save players a lot of time.

Although the story of ranches was a farming game that focused on a slow pace, just think about it. In the later stages of the game, the players had to run around the map from the inside out. Farming would be tiring, and running would become a source of frustration that would make players give up on the game.

However, in the later stages of the game, a type of levitating stone item appeared.

This item was very useful. The general function was that after using it, he could instantly appear in a place he had been to before. For example, in the story of ranches, he could instantly fly to the top of Mount goddesses.

This was the effect of the flight stone.

Thinking of this, Qin Lin was eager to give it a try. If he could get this Aerolite, he could bring it out of the game. Then, why would he need to drive a car in the real world?

Wasn't this flying stone even better?

Thinking of this, he immediately controlled the game character and took wangcai to the ore town to find someone.

The thief had a flight stone, so it was normal for the police in the town to be unable to catch him.

After all, a thief would definitely bring a flight stone with him when he committed a crime. He would leave with a thought after he was done with the crime.

However, he was different. He knew that the flight stone had a cooldown time. As long as he caught the thief during the cooldown time, the thief would not be able to escape.

Following the next task, Qin Lin controlled the game character to let wangcai smell the things left by Thomas. Then, wangcai ran out excitedly and entered ore town.

The game even provided a route to point them in the right direction.

Qin Lin immediately controlled his game character to follow.

Obviously, this was a very simple task and he didn't need to waste much effort. He just needed to let Wang Cai find it.

Not long after, Wang caicai shouted outside a house. Obviously, the thief was inside.

Qin Lin immediately ran in with Wang Cai and saw a man wearing a mask.

The thief couldn't always wear the mask, but the game plot required it, so the game designer must have planned it.

When the thief saw his game character arrive, he was shocked. He immediately took out a stone, and with a flash, the thief disappeared.

Qin Lin frowned. This wasn't right. The opponent's flying stone should be on cooldown.

However, wangcai seemed to be excited. It rushed out of the house, ran past two houses, and barked at another house.

Qin Lin rushed in with Wang Cai again and saw the thief. The thief took out the stone again and disappeared.

Qin Lin was a little stunned. Was there something wrong with this thief's head? If the flying stone could fly to the house next to the house, it would be impossible to find it if it couldn't fly to the goddess mountain.

Could it be that this time, it was also nearby when it flew away?

But what Qin Lin didn't expect was that after wangcai ran out of the door, it went back to the original house and started barking at the house again. It was a little embarrassing.

This thief's brain was really full of holes.

Normal people wouldn't do such a thing ...

He felt that the game producers had to take the blame. Otherwise, how could they come up with such a brainless mission plot?

Qin Lin followed wangcai out of the house and entered the previous house. They saw the thief again.

This time, the thief didn't run away, and the flight stone didn't light up again. Then, the animation appeared.

On the animation, wangcai pounced on the thief and caught him. The thief was so shocked that he dropped the flying stone on the ground.

Then, he saw Thomas appear with the police from ore town.

As soon as the police officers came out, they pounced on the thief, arrested him, and took him away.

Thomas's conversation reappeared.

[thank you so much. I knew your dog could do it. If we catch this thief, I think the shop owners won't be so afraid. Thank you for your dog's contribution. This is a medal for your bravery. Please accept it.]

When Qin Lin saw the notification, he immediately started cursing. This Thomas was wasting his time again. This time, the plot mission only gave him a medal of bravery.

What was the difference between this and a reward of 500 Yuan for digging up an antique and handing it in?

However, Qin Lin saw the meteor that the thief dropped and immediately controlled his game character to pick it up.

[congratulations, you've received a special item, the flight stone.]

This must be the special reward.

Seeing this, he directly entered the game and found that he was holding the medal of bravery that Thomas had given him.

[medal of bravery: normal!]

[this is a useless thing. It's just a prop used to fool ordinary people, but it can give some people with a sense of justice a boost.]

Sure enough, Qin Lin couldn't help but laugh when he saw the remark. The system also knew what the southeast relationship was.

Qin Lin then looked at the remarks of the flight stone:

[flight stone: special!]

[this is a special item. It seems to be a mysterious item left behind by the goddess. The runes on it have a special function that can teleport people to places they have been to before.

[teleportation cooldown: 0/4 (can be used again after cooldown)]

Qin Lin's eyes lit up when he saw the note.

This was unbelievable.

In the story of farm, the flight stone did not have such a function. It only had a cooldown time after flying once, and there was a limit to the number of times it could be used.

Now, there was no limit to the number of times the flying stone could be used. After cooling down, it could be used again.

[Chapter 1665 The Magical Teleportation Effect! 1](#)

Qin Lin looked at the attributes of the flying stone and roughly understood why the thief could use the stone continuously.

As long as there was enough cooldown time, it could be stacked four times, which meant that it could be used four times in a row.

This thief obviously used it when he was stealing and used it twice when he was escaping. So, he ran out of uses and was caught by wangcai.

This thief was probably the unluckiest character in the game. After all, the game designers had forgotten to give the thief a brain when designing the plot mission.

So, he was caught so easily.

If it was him, he would have been caught on his first trip out of ore town without even going to Mount goddesses. How could he have been wronged?

The moment Qin Lin saw the flight stone, he even thought that a small planet was being transformed.

If he had this flight stone, would he be able to use it to travel back and forth on that small planet?

That would be awesome.

Forget being a thief in a small town, he could even be an interstellar pirate.

Qin Lin was eager to try the flight stone.

Unfortunately, the cooldown of the flight stone had not ended yet, and the number of times it could fly had not been restored.

Woof! Woof! Woof! Wangcai's voice sounded.

Qin Lin looked at it. It raised its paw and pointed at the ore town, its eyes full of curiosity.

It obviously knew where this place was. After all, it had become smarter in the game world. However, it had never been to ore town, so it was extremely curious about this place.

Seeing this, Qin Lin had no choice but to take the dog for a stroll in the town. He teased the dog as a reward for this time.

The area of the mine town in the real world was very large. Qin Lin and the young paparazzo had been shopping for a long time, but they had only explored half of it. However, they found many special shops that sold some special things.

For example, the small shop in front of him was selling a type of candy.

[happy candy: special!]

[this is a special kind of candy that can make people or animals happy after eating it. Effect:Happy mood +3!

[restrictions: limited purchase. No recipe. Can not be copied!]

This thing was very awesome.

Wasn't it amazing that a piece of candy could make both humans and animals happy?

This was simply a good thing to comfort people or animals.

Unfortunately, the number of sweets sold was limited. There was no recipe, and it was limited and could not be copied. He had no way of bringing this thing into the real world.

Therefore, when she met him, she bought all the remaining happy candies. After all, there was a limited amount.

After that, he brought the dog back to the farm and placed the Aerolite in the farm's house. The faster the game time passed, the faster the cooldown time of the Aerolite.

Qin Lin and the young paparazzo exited the game and returned to the office. They saw the little fox, snowy, walking around in circles.

Snowy was obviously very dissatisfied. When it saw Qin Lin, it barked, as if it was saying his fault for not bringing it along after going out to play for so long.

He actually left it behind.

This made it extremely impatient.

Qin Lin was a little embarrassed by the little Fox's behavior and immediately squatted down to comfort it.

"Squeak, squeak!" However, the little fox cried out. It was clearly angry and did not accept this apology.

Qin Yang flicked the little Fox's forehead. This little guy was so difficult to appease when it was angry?

Then, he thought of something and immediately took out a happy candy to comfort the little fox. "Little guy, don't mess around. I brought you something good."

As he spoke, he took out a happy candy and fed it to the little Fox's mouth.

The little fox had absolute trust in Qin Lin. Seeing this, it ate the candy in one bite. It was very happy when its master fed it.

"Squeak, squeak!" After the little fox ate the candy, it also began to call out. It was obvious that the taste was still very good.

Moreover, as the little fox ate the candy, its eyes began to light up and it actually squinted happily. It no longer had any temper.

Then, as if he had forgotten his unhappiness, he started to play with Wang Cai.

When Qin Lin saw this scene, he couldn't help but sigh at the power of this happy candy. The effect was immediate.

He allowed the two little ones to play with him as they pleased, and then he walked straight out of the office.

When he arrived at the hall, he clearly heard the sound of crying. When he got closer, he saw little Qin Feng crying, and Zhao mochen was comforting him.

This time, Qin Feng was crying so sadly that he looked like he was rolling on the ground.

He didn't even need to think to know what had happened. Zhao mochen must have been forcing him to study again.

What a sin, poor child.

As soon as Qin Lin came over, little Qin Feng saw him and immediately ran up to him. He hugged his thigh and cried, "dad, mom doesn't love me. She doesn't love me ..."

Seeing that he couldn't coax her anymore, Zhao mochen said anxiously, "hubby, please coax him. This little guy can't stop crying."

"Hubby, what did you do to him this time?" Qin Lin immediately asked in a low voice.

Zhao mochen said helplessly, "I just want him to learn the piano again. Men need to be versatile. Only then can they be liked by girls in the future. They won't have to worry about not being able to find a wife."

"Eh!" Qin Lin was a little helpless when he heard this. What the hell?

Would little Qin Feng be afraid of not being able to find a wife?

Did he earn this family fortune for nothing?

Did Zhao mo eat the fetus-beneficial gene for nothing?

[Chapter 1666 Happy Candy! Magical Teleportation Effect! 2](#)

Under these conditions, if little Qin Feng still couldn't find a wife, then he really had a stroke, right?

Otherwise, why would he be like this?

Qin Lin said helplessly, " even if he can't find a wife outside, the daughters of brother Li and the others can't wait to be your son's wives. Didn't you see that they were forcing the engagement? "

Zhao mochen thought about it and said seriously, "Who knows what their daughter will look like in the future? What would he be trained to? There's an entire forest outside, and there are so many choices. We can't give up other choices for a few trees, right?"

what if there's someone better outside and our son likes her? wouldn't that be better? then the wife we marry will be better and make others envious!

"..Qin Lin was stunned and didn't know how to answer.

Most importantly, what he said made sense. As parents, who wouldn't want their son to marry a good wife? Having more choices was also a good thing, wasn't it?

However, wasn't Zhao Moyu thinking too far ahead? How old was his son?

"Hubby, hurry up and comfort this little guy. He's still crying!" Zhao Moyu immediately said.

Seeing this, Qin Lin had no choice but to take out a happy candy from his pocket and handed it to little Qin Feng. "Son, daddy will give you a candy. Don't be sad."

When little Qin Feng saw the candy in his mouth, he subconsciously opened his mouth and ate it, chewing.

The happy candy was soft candy. After chewing it, he swallowed it directly into his stomach, so he didn't have to worry about the little guy having teeth.

After little Qin Feng ate the happy candy, he immediately stopped crying and even smiled.

This scene shocked even Zhao Mo.

She had tried to persuade this little guy for a long time, but to no avail. Who knew that her husband would be happy after feeding him a candy?

Seeing this, Zhao mochen felt that he should prepare some candy next time.

Since this guy was so easy to coax, if he continued to make a fuss, he would feed him candy.

Qin Lin did not know what Zhao moyin was thinking. Otherwise, he would definitely spit out a mouthful of blood and slowly grieve for his son.

After that, he went to see academician Hao and the other two seniors.

He was very respectful to these old seniors. The three of them had been in the science fiction Technology Park these days, accompanying Minister Lu in building the Chinese Academy.

When he arrived, there was already a sign in the area: The mysterious Research Institute's long-distance viewing project!

Yes, this was one of the ornamental projects in the science Park.

There were already people voting for the Linlin Scenic Area on the internet to choose the most popular and least popular project. The mysterious Research Institute's project of viewing from afar was the least popular.

Moreover, this event was honorably named the stroke event.

However, no one knew that in the future, the core research of the Chinese Academy of Sciences would come here.

Many people would be shocked if they knew.

How was this a stroke project? It was simply a Holy Land for scientific research.

Moreover, as time passed, this kind of thing would be discovered one day. When that day came, it would be very interesting.

The construction of domestic infrastructure was very fast. As for how fast it was, it was only a short time since the decision of the project of the Chinese Academy of Sciences, but the first model had already been built.

This was also the reason why the tourists were complaining.

The construction speed was so fast that it was obvious that it was just for show. The tourists were not fools. How could they buy it?

They didn't think that their country's infrastructure was powerful, nor did they think that it was because of their country's infrastructure.

"Boss Qin, you're here." Minister Lu greeted Qin Lin with a big smile.

He was very excited.

This was because he had already called other researchers to verify this. The results were just like what academician Hao and the others said, this place really had that special effect.

Therefore, their country's scientific research would encounter fewer difficulties in a short period of time. To a certain extent, they were about to achieve a technological boom.

Therefore, he couldn't wait to share the good news with Qin Lin and told him everything.

Qin Lin pretended not to know anything and asked, "Minister Lu, I wonder if you've found the reason? I'm very curious as to what caused this. It's simply unbelievable."

Her acting was absolutely perfect.

Minister Lu immediately explained, ""Boss Qin, we're not sure about this yet. We haven't found out the reason yet, but I think it should be related to some kind of magnetic field that can affect the brain. We're now investigating the magnetic field, and I believe we'll find the reason."

It would be a wonder if he could find it.

Qin Lin thought to himself, but he said anxiously, "Minister Lu, if you find the reason, you must tell me. I really want to know the reason now."

"Alright," he said. Minister Lu immediately nodded and said.

Qin Lin observed the Hua * Yuan's branch for a while, then went back to his office. Although he would show some concern, it was impossible for him to keep it up.

In the evening, Qin Lin controlled his game character to pick up the flying stone to check the information.

The cooldown time of the flight stone was over, and the entire flight stone had recovered its flight count of 4 times.

Seeing this, he also entered the game with a thought and took out the flying stone.

When he arrived at the office, he chose to use the flight stone. He wanted to see if the flight stone could be used in reality.

However, as soon as he chose to use the flight stone, a magical thing happened. A virtual image appeared in his mind. The image seemed to be a map.

From the map, it was the places he had been to, including all the places in you city and the cities he had been to.

Of course, not all of the maps were lit up. Many of them were dark, and only a few places were lit up. Those were the places he had really been to.

Even you city had many places that were pitch black, and nothing could be seen.

Qin Lin looked directly at a place on the map. It was a barren mountain. He had been to the top of this barren mountain once before.

Therefore, he decided to see if he could use the flying stone to fly there.

After all, there would be no one in that kind of place at night, and he didn't have to worry about being seen.

Qin Lin stared at that position and used the flight stone with a thought.

The next moment, the flight stone lit up. The runes on it had been activated.

Under this light, Qin Lin could feel a special tearing force.

Then, he felt a very mysterious feeling. It was the same feeling as when he was about to enter the game.

Under this feeling, he disappeared from where he was.

When he reappeared, he was no longer in the office. Instead, he was in a dark forest, on top of the barren mountain.

He was completely surprised.

This flying stone was actually so magical.

This kind of teleportation was almost no different from entering the game. It was simply convenient and fast.

But then, he was stunned. He saw that there was a tent in front of him, and a man and a woman were having sex in front of the tent. The woman was holding onto a tree, and the man was having sex.

Qin Feng was dumbfounded. What the hell? how could there be people in the middle of the night in such a deserted forest?

More importantly, did these two guys have to play such an exciting game? Aren't you afraid of encountering snakes or other animals?

It was a pity that he could only see the silhouettes of the two figures and nothing else.

Hence, he missed a live movie demonstration.

The man and woman stopped moving. They also saw Qin Lin, but they couldn't see him clearly either. They could only see his silhouette.

More importantly, this person had appeared out of nowhere. How could he have suddenly appeared?

Unless the other party was not human.

Thinking of this, the two of them felt their hair stand on end.

Therefore, the atmosphere was a little off.

"Um, sorry to disturb you." Qin Lin apologized, turned around, and left. He activated the flight stone again, and in a flash of light, his figure disappeared in front of the pair of wild mandarin ducks.

This scene caused a man and a woman to widen their eyes in shock.

"Ah ..."

"Ghost!"

A man and a woman's exclamations also sounded in an instant.

Presumably, this night's encounter would become a nightmare for the two of them.

[Chapter 1667 771-The Completion Of The Gravity Technology, Leaving Its Name In History](#)

Qin Lin returned to his office.

Thinking about what had happened just now, he really wanted to complain.

Who knew that there would be a couple up there in the deep mountains and old forests so late at night?

Fortunately, he could not see anything, or he would have been exposed.

Then, he used the true Jade's function to check the information of the flight stone.

[flight stone: special!]

[this is a special item. It seems to be a mysterious item left behind by the goddess. The runes on it have a special function that can teleport people to places they have been to before.

[teleportation cooldown: 2/4 (can be used again after cooldown)]

After using it twice, there were only two stacks left.

However, he also knew the effects of this flight stone. It could be said to be very terrifying.

Then, he chose to use the flight stone and looked at the virtual map that appeared in his mind. He looked at another city thousands of miles away.

That was the city where he studied. He chose the school he studied in, and he chose a storeroom.

He had been in this storage room before when he was studying.

Qin Lin used the flight stone again. With a thought, he used the flight stone. The next moment, his figure disappeared from the office again. When he reappeared, he was already in a dark utility room.

Hualala!

It was actually raining outside.

It seemed that the weather was different in cities that were thousands of miles away.

After all, you walk in the rain and I run in the sun. This meant that the weather of the two cities was different, which also meant that the climate of different places was different.

However, as soon as Qin Lin appeared, he was speechless.

There was a man and a woman inside, and there was a strange sound. With the help of the phone's microscopic view, the two seemed to ...

What the f * ck.

Qin Lin was helpless. A message about rainy night and not returning appeared in his mind.

He had used the flight stone twice, but the place he chose was always occupied. This was extremely unlucky.

* Cough * * Cough *

Qin Lin coughed twice. As he coughed, he used the flight stone and disappeared from the utility room.

This caused two more exclamations to ring out from the storeroom, as well as the sound of tables and chairs falling.

Qin Lin returned to his office again.

The stack count of the levitating stone became 0 again.

However, he also knew how amazing the flight stone was.

With this flight stone, as long as he could stack it, he seemed to be more powerful than monkey.

The monkey could travel 108000 miles with a somersault, and it seemed that he could travel more than 108000 miles with the flight stone. After all, the condition of the flight stone was that he had been to a place before.

Therefore, when the country finished modifying the small planet, he could go to the planet and return in an instant.

Qin Lin entered the game with a single thought and placed the flying stone back into the house in the game.

The cooldown time was even faster in the game.

Qin Lin exited the game and returned to the inner area.

As soon as he entered the inner hall, Qin Lin heard little Qin Feng crying.

"Son, why are you crying?" "Mommy will give you candy. Can you stop crying?" Zhao moyin said with a distressed expression.

As she spoke, she stuffed a piece of candy into little Qin Feng's mouth.

However, after little Qin Feng ate the candy, he continued to cry and did not stop.

This made Zhao Moyu even more distressed.

He was still crying.

She had made the same thing as her husband, feeding candy to her son. Why was there no effect?

"What's wrong with him again, Motian?" Qin Lin walked in and couldn't help asking.

Zhao mochen frowned. it's all because of him learning the piano. I came back and told him, and he cried again. I clearly fed him candy, but he still cried. What's wrong with that? "

Qin Lin could not help but smile bitterly. What was wrong? The candy used was wrong.

How could ordinary candy be useful?

As he thought about it, he also took out a happy candy from his pocket and walked towards little Qin Feng. "Son, be good, don't cry!"

As he spoke, he fed the happy candy into little Qin Feng's mouth.

Little Qin Feng chewed and swallowed it.

Then, under the effect of the happy candy, little Qin Feng stopped crying, and there was an immediate effect.

"Don't cry." Qin Lin comforted her again.

"Yes, don't cry." Little Qin Feng nodded, and a happy smile appeared on his face.

Zhao mochen was dumbfounded as he watched from the side. This scene of a loving father and a filial son made her a little jealous.

What did this son mean?

She would cry after eating the candy she fed her, but she would stop crying after her husband fed her candy.

Who was this father and son doing this for?

The more she thought about it, the more jealous she got. She snorted and walked into the bedroom.

"Go and play by yourself!" Qin Lin also said to little Qin Feng.

Little Qin Feng immediately clapped his hands and happily ran over to Great White. He happily bumped into Great White's soft stomach.

The little yang crocodile ran out and followed closely behind Qin Feng.

Seeing that the matter had been resolved, Qin Lin immediately went to the bedroom. Just as he was about to open the door and talk to Zhao moyin about the exercise between husband and wife, he found that the bedroom door was locked from the inside and could not be opened at all.

"..Qin Lin was stunned. This?

He felt like crying but had no tears. It was too early to be happy.

That night, Qin Lin decided to teach this woman a good lesson.

So, early the next morning, as soon as Zhao moyin opened the door, he came up and carried her in his arms, then closed the door.

.. (The content was omitted).

[Chapter 1668 771-The Completion Of The Gravity Technology, Leaving Its Name In History](#)

A few hours later, Qin Lin looked at Zhao moyin and asked, ""Do you know your mistake?"

Zhao mochen's face was red, and he nodded obediently, ""I don't dare to!"

"It's good that you know." Qin Lin nodded in satisfaction. He washed up and went out of the door. When he got to the office, he picked up his phone and scrolled through today's video news out of boredom.

However, when he saw a piece of news, he was stunned.

in a barren mountain in you city, a couple accidentally fell and injured themselves while camping in the mountains. They claim to have seen a ghost!

"Eh!" Qin Lin was dumbfounded when he saw the news.

What the hell?

He immediately thought of the couple from last night.

The two of them were injured?

What the f * ck.

Although he felt a little guilty in his heart, after all, it was because of him, he felt that he should reprimand this man and woman.

Don't you know it's dangerous to go camping in the middle of the night?

There were snakes in the wild, and they liked to drill holes. How dangerous was that?

Just as Qin Lin was thinking about this, Lin Lanzi called. "Chairman Qin, have you seen the news about the couple? "The man broke his leg on the mountain. He said he was scared by a ghost and ran too fast. He called for help overnight and was sent to the hospital by the rescue team. The relevant departments also know about this and asked us to cooperate with you Cheng to promote it. It's probably to advise everyone not to go camping in the wild mountains.

When Qin Lin heard this, he said righteously, " what's there to say? we have to cooperate with the safety propaganda. Moreover, we have to condemn such behavior. In addition, we have to promote positive energy. We can't be feudal. We have to let everyone eat the melon rationally. There are no ghosts in this world.

"Alright, Chairman Qin." Lin Lanzi immediately said.

Not long after, a video announcement for Linlin's Scenic Area was seen by everyone.

everyone, eat the melon rationally. You must believe in science. There are no ghosts in this world!

The video made it to the top of the search list. In a short while, the couple's encounter with the ghost also made it to the top of the search list. Instead, it caused everyone to discuss it.

It could only be said that there were too many people who were bored.

However, everyone was just watching the show. They still believed that there were no ghosts in this world.

However, at this time, in a school in a city thousands of miles away, a teacher and student pair also made the news.

It was said that the teacher and student had encountered a ghost while they were taking shelter from the rain at school. The two of them had run into the utility room while being chased by the ghost, and the female teacher had been crushed by a cabinet. Even the silk stockings on her legs had been torn into pieces while she was running away.

This news immediately made the topic of whether there were ghosts even more popular.

Naturally, more people's attention was no longer on the ghost, but on the teacher and student.

There was no shortage of experienced people online, and they could guess what had happened.

Qin Lin also saw the news and could only sigh. All of this was a sin.

He didn't do it on purpose.

..

Time passed.

In the science fiction Technology Park, the Chinese Academy of Sciences branch had already been built.

In a month's time, an experimental division was built. This speed was the strength of their country's infrastructure.

Qin Lin was invited to a multimedia conference room.

That's right, as soon as the sub-hospital was built, Minister Lu put it into use. With the purification grass, there was no need to worry about any harmful substances. Not to mention, the project that the Chinese Academy was personally responsible for would not have any harmful gases.

Academician Hao and the other two had already brought their team in and entered the experimental state.

Qin Lin, on the other hand, was invited to stand in front of a multimedia screen.

boss Qin, I have two pieces of good news for you today, " Minister Lu said with a smile. the first is the desert transformation plan. Take a look at the video I sent you.

The video showed a vast grassland.

It was obvious that they were dog tooth grass. The only difference was that the leaves seemed to be bigger, not as delicate as the ones in Linlin Ranch.

When Minister Lu saw this, he said proudly, ""Boss Qin, can you believe that this place is actually a desert? This is the result of our modification. Many foreign reporters went there to film it and were shocked by the scene in front of them."

of course, this is all thanks to the dog's tooth grass that you cultivated that can survive in the desert. With the catalytic agent from the Chinese Academy of Medicine, this dog's tooth grass has grown.

according to this trend, we will soon be able to transform the entire desert into a grassland, which will greatly reduce the pressure on the use of land in our country.

next, we should try to graze on this transformed desert land. After the dog tooth grass has been catalyzed, although its nutritional value is not as good as before, it is still higher than the average pasture.

Qin Lin could see Minister Lu's excitement.

It must be known that the Land's desertification had always been a global problem. It was difficult for countries all over the world to overcome this problem, and they could not conquer deserts.

But now, the desert was about to be conquered by them.

This was a great achievement.

After sharing the good news of the desert transformation with Qin Lin, Minister Lu pulled Qin Lin out excitedly. Chairman Qin, apart from that, we're going to Linlin's laboratory. The planet's gravity research is in its final stages.

Minister Lu became more and more excited as he spoke.

According to the Chinese Academy's plan, it would take a very long time to complete the planet's gravity technology.

However, after boss Qin led the team to research it, the project was completed in a short time.

This was truly unbelievable, and it further proved boss Qin's demonic talent.

One had to know that even a technology a hundred times simpler than the planet's gravity technology could not be completed in such a short time.

Boss Qin did it as if he wasn't a person of this era, as if he had known about this technology for a long time.

However, everyone knew that it was impossible.

This result was also within Qin Lin's expectations. After all, he had a complete set of skills, and the theories, data, and formulas he gave were completely accurate.

The researchers only had to follow the instructions and conduct their research.

If the researchers still couldn't do their research quickly, they would be able to eat for free. Perhaps he should suggest to Minister Lu to fire them.

Qin Lin and Minister Lu left the school and went straight to Linlin's laboratory, to the laboratory building dedicated to the study of planetary gravity technology.

As soon as he entered the laboratory building, he heard the excited discussions inside.

"It's actually completed!"

"Such a short period of time, it's too unbelievable."

"Yeah, did we really do that?"

It's not us, it's academician Qin junior. If it wasn't for academician Qin junior, we wouldn't have been able to do this.

"Yeah, academician Qin is too amazing. I've never seen such an amazing academician before."

"Everyone, under the leadership of academician Qin, we will leave our names in history."

".."

The words "leave your name in history" made everyone even more excited. Who didn't believe that their names would be written into history books?

Now that academician Qin had led them to do this, they would definitely leave their names in history.

This was all thanks to academician Qin.

Therefore, when they said the words "academician Qin junior," their tone was full of respect.

At this time, someone noticed Qin Lin and Minister Lu walking in.

"Academician Qin, you're here."

"It's academician Qin, he's here."

".."

All of a sudden, everyone stopped talking and looked at Qin Lin.

At this moment, Qin Lin seemed to be the center of attention. Everyone was looking at him with respect.

That kind of gaze was not fake at all. It was the worship of the king by scientific researchers.

These researchers had also developed a deep admiration for Qin Lin after their research on the planet's gravity technology.

Team leader Chu also ran to Qin Lin immediately and reported, ""Academician Qin, we've succeeded!"

Qin Lin saw that the other party had a new share, so he nodded and said, " since it's a success, I believe in your results. Next, we'll build the gravity room and complete this research.

Hearing Qin Lin's words, team leader Chu immediately responded loudly, ""Alright, academician Qin!"

All of a sudden, everyone was full of energy and began to take action.

In fact, they were already building the gravity room. They just hadn't activated the gravity system yet. They would be done soon.

[Chapter 1669 Gravity Room Completed! Gravity Experiment! 1](#)

Linlin's laboratory.

In the planetary gravity Technology Department, everyone was working with all their might to make the final breakthrough.

As long as the gravity room was completed, they would make history.

This news naturally spread to the capital very quickly.

Beijing.

In a conference room, a few leaders had already gathered together.

If an outsider saw these people, they would definitely find them familiar and even more surprised, because these people were often seen on TV.

"Everyone, have you all heard the good news?"

"I heard it. Xiao Lu has already reported back."

I didn't expect that boss Qin would agree to help us with the technology that was supposed to take decades to complete. He and the researchers completed it so quickly.

These words made the few of them feel a little emotional.

After all, this was unbelievable and also proved that boss Qin was a monster.

In the field of scientific research, if there was a God of science, then boss Qin was undoubtedly the God of science of this era.

Boss Qin had developed many technologies before, and those technologies were epoch-making.

However, no matter how powerful those technologies were, they were not the ones that created history. Therefore, they could not be compared to the previous gods of science in terms of status.

The gods of science had long been a must-learn topic in the textbooks of students all over the world.

They were all well-deserved geniuses in their own era, the most outstanding scientific research leaders at that time.

Boss Qin had many skills, but he lacked someone who could create history.

This time, the completion of the planet's gravity technology would create history. It would allow mankind to completely transform the gravity of a planet and allow mankind to leave earth.

As long as their country completed the transformation of the planet and completed the first batch of immigrants, the whole world would be shocked and terrified.

The same strategic weapon would be more threatening because they had a way out.

Although everyone usually used strategic weapons to threaten people, they didn't have the determination to use them. They were just scaring people.

"However, when one side has a way out, it's different. I really dare to use it.

it's our country's fortune to have such a genius researcher like boss Qin, " a leader said. we must protect him well.

yeah, " another person nodded. once the outside world knows of his achievements, I'm afraid many countries will want to kill him.

Someone else said, " how about this? tell the others to keep boss Qin under tight protection. However, we can't get close to him. We can't monitor him. We can't let him feel disgusted. We can't affect his life or his research.

At first, the leader said, " that's not a solution. After all, no matter how we control it, there will still be flaws. It's better to increase the security of you city and prevent people from sneaking into you city. After all, boss Qin usually doesn't leave you city.

Everyone agreed to this suggestion.

They had already started to consider boss Qin's safety.

Indeed, the safety of such a person was worth their concern.

there's one more thing, " the leader said. Xiao Lu has requested to gather all the soldiers to experience the gravity room after the research is completed.

although the gravity room is only a simulation of a simple planet's gravity, it can be used for Warrior Training. With the help of the body-increasing liquid, the effect should be very good. We can train more and more powerful Warriors.

This was naturally agreed by everyone. After all, this was something they were very willing to see.

Therefore, this matter was carried out at the fastest speed possible.

Time passed.

Ten days later, in Linlin's laboratory, a loud cheer was heard.

"The gravity room is finally completed."

"Yeah, it's not easy."

"Academician Qin junior is too amazing."

"It's all thanks to academician Qin."

After that, it became a compliment to Qin Lin.

Then, team leader Chu reported to Minister Lu immediately, and Minister Lu also invited Qin Lin to come.

Qin Lin was very curious about the gravity room.

After all, he had also watched Dragonball anime and knew that begita and sun Wukong had used this thing during their training.

However, when they arrived at Linlin's laboratory, the gravity room was different from the one in the anime. It wasn't like the one in the anime. The power room built by team leader Chu and the others had been transformed into an entire laboratory.

The entire laboratory was wrapped in a special metal sheet, and under the metal sheet were various facilities installed with gravity transformation technology.

As long as these facilities were activated, the gravity room would be filled with power.

When Qin Lin arrived, team leader Chu showed him and Minister Lu a display. He pressed a button and the whole gravity room was in a state of zero gravity. All kinds of things placed on the ground quickly floated up as if they were in space. Even the water left the cup and floated in the air.

However, after he pressed another button, these things fell quickly and smashed to the ground. They were affected by gravity.

On the other side.

Under the orders of the higher-ups, a group of people was arranged to take a plane from Jing city to Ming city, and then transfer to you city.

When these people arrived, Minister Lu personally went to receive them.

This was because these people were the strongest soldiers selected by the higher-ups from all over the country. Furthermore, they had all taken the body-increasing medicinal liquid.

This group of people could be called super soldiers to a certain extent.

Their strength was much stronger than the special Forces in the past. They were really strong. It would not be a problem for them to take on a team of traditional Special Forces soldiers alone.

[Chapter 1670 Gravity Room Completed! Gravity Experiment! 2](#)

If this kind of soldier participated in military competitions and sports games, he would crush the world's Special Forces King.

It was a pity that there were still these people hidden up there, and they had no intention of using them.

At least, he did not plan to do so for the time being.

Linlin laboratory. With the arrival of these people, Linlin's laboratory became more lively.

After all, these people were the strongest weapon Kings in their respective regions. Here, it was a battle between weapon Kings. Naturally, it was full of provocation, and no one was convinced of the other.

However, with the rules in place, they could only behave themselves and did not dare to do anything out of the ordinary.

It was just that they didn't know why they had been gathered here and what their purpose was.

The next day, Minister Lu came to see these people.

These people had been ordered to cooperate with Minister Lu, so they saluted him at once.

Minister Lu smiled and said to these people, " I heard that you are all competing. It just so happens that I need you to cooperate with an experiment today. In this experiment, you can see who is stronger. Come with me!

With that, he walked out.

The soldiers looked at each other and walked out together, their eyes filled with anticipation.

They also wanted to see if they were the strongest.

Soon, the soldiers were brought to the gravity room.

A group of people had gathered outside the gravity room.

These people included Linlin's laboratory security guards and ordinary waitresses.

They were also very confused, not knowing why they had been called here.

A moment later, team leader Chu came out with some people. He also brought some equipment with him, which seemed to be good for carrying on one's back.

Team leader Chu asked his men to put down the things and said to everyone, " before the experiment, everyone would like to wear one of these devices. These are gravity devices, you will need them later.

The soldiers, waiters, and security guards were all confused, but they still followed the order and went to pick up the equipment.

After these people had brought the equipment, team leader Chu began to introduce them, " this time, I need you to cooperate with an experiment, which is the gravity room inside. When the gravity is activated, we will slowly adjust the gravity.

as the amount of gravity increases, your endurance will quickly reach its limit and you will be suppressed by the gravity. So, when you can't take it anymore, you can press down the equipment you're wearing. At that time, the gravity acting on your body will disappear instantly.

After that, team leader Chu added more information about the gravity room, which also let everyone know what was going on.

Many people were even surprised after hearing it.

After all, many people had seen the Dragon Ball. Even if they had not seen the Dragon Ball, they had seen the plot of the gravity room in some science fiction movies.

He didn't expect such a sci-fi thing to be created.

Naturally, after hearing this, these people were eager to try out the gravity experiment. After all, it seemed to be a very fun thing to do for them.

Of course, they didn't know that the gravity room was more impressive than they had imagined. After all, this was only a simulation. In the future, they would transform the entire planet into a gravity room.

As long as the entire planet was modified, the gravity would be adjusted to a suitable level for human survival. With the artificial atmosphere, the planet would be habitable.

"Alright, you can all enter the gravity room now." Team leader Chu also said to those people.

Those people immediately followed a researcher into the gravity room.

"Give me one of this equipment too." Qin Lin's voice was heard at this time. He walked to leader Chu's side, picked up a piece of equipment, and put it on.

This stunned leader Chu.

However, they couldn't say anything since academician Qin wanted to experience the gravity room for himself.

Qin Lin entered the gravity room with those people, which attracted the attention of the Linlin Scenic Area staff and the laboratory security. After all, they all knew who this person was.

Many of the soldiers were surprised. Many of them had heard of this academician Qin.

Outside, team leader Chu had already brought his men to a multimedia screen on the wall, which was divided into small screens.

One could see that on the small screen, corresponding to the number, rows of numbers began to appear.

These numbers were the numbers of the people who were wearing the equipment. The equipment was attached to a device that could detect the physical data of these people.

It could be seen that most people's physical values were in red. The lower the value, the weaker the value. It didn't even reach the normal value of an ordinary person.

Those were the numbers of the waitresses.

Many of them were green, which was the number of normal people. These people were the security guards.

After that, it was the blue numbers again. These people's numbers were very high. They were those Warriors. These people had used body-enhancing potions, so their physical values were much stronger than ordinary people.

But very quickly, a researcher surprisingly said, ""Team leader Chu, quickly take a look at academician Qin's value."

Team leader Chu looked over in confusion, and his eyes narrowed slightly.

Academician Qin's value was actually purple, and the various values were scarily high.

The purple level value was suddenly added by them, representing the inhuman level.

At first, they were also holding back. After all, who knew if they would use some animals for experiments in the future? the values at this stage would be useful.

They didn't expect that someone's physical value could reach this stage, but who knew that academician Qin's value could actually reach such a terrifying level.

"How terrifying." After the initial surprise, team leader Chu could guess the reason.

After all, his status in the Hua * Yuan was not low, and he had never heard of the body-increasing medicinal liquid. This thing was absolutely confidential, and not many people in the Hua * Yuan knew about it.

This time, for the experiment, Minister Lu had told him a little about how the soldiers had also used the body enhancing liquid.

He only knew that this thing could increase a person's physique.

And this thing was made by academician little Qin. So, was it strange that the person who made this thing could use this thing to increase his physique?

This wasn't strange, but his body's data was terrifying.

In the gravity room, when Qin Lin walked in, he also felt that several parts of the equipment on his body contracted and lit up. He guessed that the equipment had other functions, probably to detect physical conditions.

Qin Lin's entrance naturally aroused the curiosity of everyone inside.

Only the Warriors ignored him. After all, they were still competing to see who was the strongest.

Outside.

"Activate gravity," team leader Chu had already ordered.

Now, the gravity inside was normal, and the detected gravity was as follows:0。

As one of the researchers activated the gravity room, the display changed to:1。

At this time, everyone in the gravity room also felt it and found that their bodies were heavy.

After that, the degree displayed changed to 2.

At this time, the people inside also felt the pressure on their bodies increase again.

the soldiers didn't feel anything, but the waitresses were panting. Their bodies felt tired, as if they had been working for a long time.

The weight kept increasing, and it soon reached 3.

At this time, the waitresses couldn't stand it anymore and immediately started the equipment on them.

The weight increased again, reaching 5.

At this time, the ordinary security guards couldn't take it anymore. They used their equipment and were called out of the gravity room.

In other words, 5 degrees of gravity was the limit for ordinary people.

Soon, the gravity increased again, quickly increasing to 10,11,12,13 ...

At this moment, it was the start of the competition between these fighters. Especially when the gravity reached 30, these people started to feel breathless.

They could also feel each other's fighting spirit. At this time, they were even more energetic and full of fighting intent.

But at this moment, they also looked at Qin Lin in surprise. They couldn't believe it. Why was he still inside?
