

The Game 1681

[Chapter 1681 778-Target Locked On, It's That Security Guard](#)

[congratulations on completing the skill storing of the mysterious stone book. Do you want to use the mysterious stone book? yes?] [no?]

Qin Lin decisively chose to use the mysterious stone book.

Wasn't the purpose of him doing so much to learn about animal genes?

Now that he had finally finished, he naturally had to use the stone book, and then deal with the two dinosaur fossils.

After obtaining those two items, he had always wanted to extract the genes from them for research.

When the time came, he would have some results that would truly shock the world.

Moreover, he did not obtain any technical information this time. Other than the two bone fossils that could be used to extract the genes, there were no shortcuts.

Therefore, he had to plan how to extract the genes from the two bone fossils and how to use them for research in the future.

This was a real challenge.

Hence, he had to rely on the 50 books on Animal Genetics to obtain the knowledge.

As soon as he chose to use it, the mysterious stone book instantly dissipated, turning into specks of Starlight and drilling into his mind.

At the same time, streams of information began to appear in Qin Lin's mind.

This information flow contained abundant and complicated knowledge, all of which were related to animal genes.

Moreover, he could easily comprehend this knowledge because of the system. He could understand it with a single thought.

He even thought of little yang and the reason why he liked to eat grass. He even thought of the possibilities of his genetic mutation.

It was a wonderful feeling. It was the feeling of mastering knowledge.

After a while, Qin Lin had completely absorbed all the information about animal genes.

This made him very excited.

The genetic experiment could begin.

However, he did not obtain any technology this time, so he did not dare to rashly extract the genes from the two pieces of bones.

He still had to do some genetic research and training.

After that, he would go deeper into the genetic research step by step. After all, extracting the genes from the fossilized bones was not a simple matter.

From the genetic knowledge he had obtained, he knew that this type of extraction was the most difficult.

So, he immediately logged out of the game, put on his Bluetooth headset, and called Chen dabei.

As technology became more and more advanced, people no longer needed to hold a cumbersome mobile phone to talk all the time when they wore Bluetooth earphones.

Even if her phone was left in the drawer, she could still cross her legs and talk to people through the Bluetooth headset.

If he wanted to extract animal genes, he first needed to have some experimental animals.

Actually, it would be best to leave this matter to Linlin's laboratory. After all, they had lab rats for special experiments.

However, there was a group of animal genetic researchers gathered there, and he was worried about attracting attention.

After all, everyone thought that he was an expert in Animal Genetics. It would be strange if he was still proficient in Animal Genetics research.

Anyway, Chen dabei could also buy the animals for his experiments. He also had the tools and equipment for extracting the genes in his office.

When he received Qin Lin's call, Chen dabei came over immediately. "Boss, what's your order?"

Qin Lin handed a piece of paper to Chen dabei and said, ""Help me buy everything on the list and send them to the interior of the villa."

Chen dabei took the paper and saw the words written on it. Without hesitation, he took the paper and left the office.

He saw Minister Lu walking over with a few people.

"Minister Lu," Chen dabei immediately greeted him.

He knew the identity of this person. After all, the other party had come so many times that it was impossible for him not to notice.

"Manager Chen, how are you?" Minister Lu also greeted him with a smile.

He also knew that this person was in charge of the security of the Linlin Scenic Area and the manor.

The key was that the other party had a very good relationship with boss Qin. When boss Qin experimented, he would ask the other party to buy a lot of things.

Therefore, he would naturally be more polite to the other party in this situation.

All of this was for boss Qin's sake.

The few people behind Minister Lu were naturally the group leaders of the animal Genetics research team.

Since they were here to assist boss Qin in his research, he naturally had to bring them to meet boss Qin. After all, boss Qin didn't have the time to go to Linlin's laboratory.

Minister Lu and Chen dabe's warm greeting and conversation made sun Tao take a second look.

He had some doubts in his eyes because he knew the identity of Minister Lu. Manager Chen seemed to be a security guard, and his badge showed that he was in charge of security.

However, there was something wrong.

Even if he was the head of security, Minister Lu didn't need to be so respectful to him. He didn't deserve it.

Minister Lu entered the office and saw Qin Lin.

"Minister Lu, why are you here?" Qin Lin greeted her in surprise.

"Boss Qin," Minister Lu said with a smile, "you don't have time to go to Linlin's laboratory, right? So, I brought a few team leaders to see you personally."

As he spoke, he handed Qin Lin several documents. They were all information about the team leaders, their abilities, and the Honors they had won.

Qin Lin read through the information and remembered all of them, especially the expert named sun Tao, who had attracted his attention.

The other party's achievements were greater than the others, and he was not even as good as the experts from the Chinese People's Hospital.

[Chapter 1682 778-Target Locked On, It's That Security Guard](#)

This was also related to the research category of animal genes. The Chinese Academy of Medicine's focus was not on animal genetic research at all during this period, so the experts in this area were relatively weak.

team leaders, you've come at the right time. I'll be entertaining you at the manor today. Qin Lin also smiled and said to sun Tao and the other team leaders.

In the future, these people would be good tools for him to cover up, so his attitude would naturally be very good.

Therefore, at noon, in the manor's Hall, Qin Lin asked Master Lin to make a sumptuous medicinal meal.

Although Master Lin's medicinal cuisine wasn't as good as Qin Lin's, it was still very delicious to sun Tao and the others. After eating, they couldn't help but exclaim, "

"It's said that the food in Linlin Scenic Area is delicious. It's true."

the taste of this medicinal cuisine is really unbelievable. The ones I've eaten before can't even compare.

"Indeed, this medicinal cuisine is too delicious."

".."

"If you like it, you can have a special car to pick you up and eat here in the future," Qin Lin said with a smile.

This was considered a benefit for these people.

This made the few of them overjoyed.

Especially sun Tao, this would allow him to better investigate the situation.

After the medicinal meal, the few of them started to chat with Qin Lin.

As long as a few people wanted to test Qin Lin's knowledge.

Everyone said that this academician Qin was a demon. He was very good at any research, including animal genetic research.

Therefore, they were all here to ask for his help in this large-scale animal genetic research.

Now that he had seen her, he naturally couldn't help but be curious about her knowledge.

Qin Lin noticed this, but he also knew that this was normal. After all, in the past, when a general led an Army, he had to pay attention to convincing the masses.

Fortunately, he had just obtained the knowledge of animal genes from the mysterious stone book. He also wanted to have a debate to see what he had mastered.

Therefore, whether these people talked about genes that code for proteins, genes that have not been translated, or genes that do not transcribe DNA fragments ... Qin Lin was able to answer all kinds of questions fluently.

Many times, Qin Lin could even ask questions in return, which made it difficult for the team leaders to answer.

This made the group leaders completely convinced. Just the mastery of animal genetic knowledge of this academician Qin alone made them gasp in amazement. It was not something they could compare with.

Sun Tao almost thought that Black star's information was wrong. Was this academician Qin really so amazing that he did not just quit to cover it up?

But thinking about it, how could people like black Star be wrong?

The moment they took action, it meant that they had confirmed it.

In other words, this boss Qin was really just using it as a cover.

This made him look at the Bluetooth headset Qin Lin was wearing. Suddenly, an expression of understanding appeared on his face.

Someone was manipulating them from behind the scenes.

Minister Lu was really cautious. He didn't even trust these people and still played this trick.

But thinking about it, if there really was such a genius in scientific research, any country would protect him like this.

He was a little envious. After all, he did not have the ability to enjoy such protection.

It was just that this so-called academician Qin had some skills. Even if he cooperated with the person behind it, this academician Qin also cooperated very well.

This was probably the reason why the other party was pushed out, right?

Qin Lin didn't know that sun Tao was thinking so much. Just then, his phone rang. It was Chen dabei. He knew that the other party must have bought what he needed.

When she picked up, she heard Chen dabei's voice. boss, everything has been sent to the office. I'll show you the invoice list. Take a look and see if it's correct. If it's not, I'll go change it.

As they spoke, Chen dabei was already waiting at the corridor leading to the office.

Qin Lin immediately got up and walked toward Chen dabei.

Chen dabei immediately handed him the list.

He also took a look at the list. There was no problem with the items on the list. He was relieved and put the list into his pocket.

This scene fell into sun Tao's eyes again, and he subconsciously looked at Chen dabei.

He felt that academician Qin was a little mysterious with this person just now.

There was a problem.

This security guard.

However, sun Tao wasn't sure yet. He still needed to pay more attention to it later. After that, he followed Minister Lu back to Linlin laboratory.

Qin Lin returned to the inner area and went to the workshop to see the things that Chen dabei had bought. Then, he began to experiment with them.

The first thing he did was to extract the genes of those animals.

This extraction process was very simple for professionals. However, outsiders would not even know what genes were, let alone extract them.

Qin Lin was very familiar with the extraction of animal genes with the knowledge that he had obtained in his mind. He quickly extracted the genes of the animals one by one.

As he extracted the genes, the number of actions he took increased. However, he did not have enough drugs to extract the genes. After all, he had only obtained them during the plant gene extraction experiment.

Therefore, he also asked Chen dabei to make a trip to Linlin's laboratory and bring the things directly to the inner area of the manor.

Naturally, he would also give Chen Li a call and ask him to prepare the things.

When Chen dabei heard Qin Lin's order, he immediately went to Qin Lin's laboratory.

Shen Li had already prepared the things Qin Lin needed to hand over to Chen dabei.

In Linlin laboratory, sun Tao and several other team leaders went out of the laboratory building. Minister Lu had gone back these days, but academician Qin hadn't come to preside over their work yet. Instead, he let them get used to each other and first conduct animal gene extraction experiments, and become proficient in the extraction of various animal genes.

This wasn't difficult for them, but it was a bit torturous. They came here to assist academician Qin, but who knew that other than having a meal with them before, academician Qin didn't come to the laboratory.

When sun Tao came out, he saw Chen dabei from a distance.

Sun Tao was naturally Shen Li, the person in charge of Linlin laboratory. When the laboratory building was arranged, it was Shen Li who personally arranged it.

This time, he saw the head of security again.

Something was wrong. President Shen was also very polite to the head of security.

This should not have happened. After all, director Shen's status was far higher than Chen dabei's.

Shen Li was indeed very polite to Chen dabei when he handed over the position.

Although Chen dabei was only the Linlin Scenic area's security Manager, he was a senior member of the Linlin company. More importantly, he was a close official of the Emperor.

Everyone knew that the security Manager had a good relationship with boss Qin and often ran errands for him.

This was similar to the eunuchs of the ancient emperors, and no one would want to offend them.

Shen Li was naturally the same.

However, in the eyes of sun Tao, who had ulterior motives, he felt that something was wrong.

"Don't tell me ..." Sun Tao couldn't help but be suspicious, especially when he saw Chen dabei leaving with some things. Those things were obviously experimental supplies.

What did a security guard need this for? He couldn't say that it was for academician Qin, right?

That academician Qin was just a cover-up.

So ...

Sun Tao suppressed this thought at first, but after that, when he went to Linlin laboratory with a few team leaders for meals and medicine, he always saw the security guard named Chen dabei and academician Qin acting mysteriously.

Even when academician Qin received Chen dabei's call while he was entertaining them, he left in a hurry.

It was absolutely impossible for him to be a Security Manager. Otherwise, how could the other party be able to move this academician Qin?

The more sun Tao thought about it, the more he felt that something was amiss, and the more certain he was of his thoughts.

So, he took the opportunity to go to you city. With the excuse of buying some daily necessities, he took a taxi there. As soon as he got in the car, the driver said something strange, ""It's not raining, why did you come to get a taxi?"

If other people had heard this, they would have been speechless. If they were taking a taxi, couldn't they take a taxi without rain? What did he mean?

I need you to help me investigate someone, " sun Tao said immediately. it's urgent. You have to do it immediately.

[Chapter 1683 Everyone 007! Everyone Bond?\(1\)](#)

The driver was stunned when he heard sun Tao's words. He immediately asked, ""Who do you want to investigate?"

The reason why he was hiding here was to help this person. As long as he could complete this task, he would be able to go through the procedures to leave the country. He would be completely at ease and would not have to be on tenterhooks!

However, he had no choice. Back then, he was caught red-handed because he was addicted to gambling. He was even caught and trained for a few months before he became a Walker with 500000 Yuan.

Now, he was afraid every night when he slept. He was afraid that he would become someone else's 500000 Yuan.

Sun Tao did not hesitate and immediately told the other party Chen dabei's identity, ""You should know who this person is, right?"

The driver nodded. yes, I do. He's the security Manager of Linlin Scenic Area. He's quite famous in you city.

Sun Tao nodded and said, " tell Black star's people to investigate Chen dabei's identity. He might be the person they're looking for. Not only can he contact Minister Lu, but he can also contact Shen Li from Linlin laboratory. He can even call academician Qin over.

understood, " the driver replied immediately. I'll inform Black Star.

Sun Tao got off the car in your city, then pretended to buy something and called a car back to Linlin's laboratory.

However, he had no idea that two figures were watching him through binoculars in the distance. "That direction ... Get someone to follow him, the license plate of the car is ...!"

At the same time, the other person's gaze followed the taxi driver as he left. "The prey has entered the triangular field. Remember to keep up."

Soon, in the Linlin Manor, MA Hong was checking the surveillance cameras in the manor's control room when he received a call.

When he saw the phone, he immediately picked it up. "Speak!"

Yes! The other side immediately replied, "Someone is already in contact with that guy. His cover-up is still too obvious!"

"Very good!" MA Hong's face lit up. "Who is the other party?"

These people were professionals. Before, someone had targeted you Cheng so obviously. They had sent so many people in, but they were all caught. How could they have left only a Fake Taxi driver?

This was just on purpose.

Moreover, the higher-ups had sent more people down to your city to protect boss Qin. Their surveillance of the taxi driver had reached 24 hours without any blind spots.

He just didn't expect someone to come in contact with him so quickly.

Thinking about it, this time, he could get a lot of credit. Even if it was a bonus of 500,000 Yuan each, it should be a lot.

Who's that person? "A voice came from the other side. He's still following us, but he seems to be heading in the direction of Linlin's laboratory."

"Linlin's laboratory?" MA Hong frowned.

He hung up the phone and immediately called Minister Lu. Since it involved Linlin's laboratory, he had to inform this man.

Moreover, he had to be extremely careful.

After all, he knew the importance of boss Qin.

He had protected many leaders, and even a few of the most important ones.

However, in a broad sense, these leaders were not as important as boss Qin.

Those leaders would have a change in leadership, they would retire, and even if they were dead, they could be replaced.

However, there was only one boss Qin, and he was the only one who could be this monstrous.

Boss Qin was a man who could change their country and even the technology of the world.

Even the higher-ups knew that boss Qin could make them stand above all the other countries in the future.

Otherwise, the higher-ups wouldn't have sent people down again.

Not long after, Minister Lu arrived. He asked with an ugly expression, ""Who is it? Do you know his identity?"

However, he was still sweating.

He didn't expect such a thing to happen. A spy had infiltrated Linlin's laboratory.

If these were the people he had reviewed, then he would have made a major mistake.

"We'll know his identity soon." MA Hong answered.

As soon as he finished speaking, the computer in the control room beeped with the sound of an email being received.

MA Hong immediately stepped forward and opened the email. A picture appeared on the screen. It was a person's information.

"Sun Tao?" Minister Lu couldn't believe it when he saw the information.

Sun Tao was one of the most famous animal geneticists in the country. How could the other party offer 500000 Yuan? The other party didn't even need 500000 Yuan.

Minister Lu's forehead was covered in cold sweat.

It was a good thing that boss Qin's research had not yet begun. Otherwise, boss Qin's research might have been stolen by these people.

At the thought of this, Minister Lu clenched his fists. He had almost lost his life.

It shouldn't be.

This meant that there were still loopholes in the Chinese Academy's review of foreign cooperation, and they had to be perfected immediately.

"Team leader MA, what should we do now?" Minister Lu immediately asked. Should we immediately take control of sun Tao?"

MA Hong shook his head. since the other party has activated the chess piece that they left behind, there must be a purpose. We have to know what their purpose is first.

Minister Lu nodded.

He knew that MA Hong was a professional, so he could leave this matter to MA Hong.

It didn't take long for MA Hong to receive another set of information. At the same time, he received a call. The voice on the other side said, ""Team leader MA, the other party has investigated a person's information. Take a look at the email I sent."

MA Hong opened the email.

Minister Lu also came forward immediately.

[Chapter 1684 Everyone 007! Everyone Bond?\(2\)](#)

When they saw the information that popped up, both of them were stunned.

Chen dabei? "

"Manager Chen?"

The two of them looked at each other in shock.

They all knew Chen dabei's identity and status. If not for boss Qin, he would still be a security guard.

But why were they investigating Chen dabei?

Activating such a chess piece and sending someone like sun Tao with 500000 Yuan to infiltrate just to investigate a security guard? Wasn't this like using a cannon to kill a mosquito?

For a moment, MA Hong didn't know what to do.

Could it be that the other party had discovered them and was trying to deceive them?

MA Hong immediately said, " something's not right. They wouldn't investigate a security guard. They must have a motive. Maybe this is just a smokescreen, a test to see if we've found out.

so, we can't be fooled. Let's see what the other party's purpose is.

Minister Lu totally agreed with MA Hong.

If it were him, he wouldn't go through so much trouble just for a security guard.

Therefore, the other party's investigation of Chen dabei was definitely a smokescreen to test them.

"Then we must first stabilize the other side." MA Hong said.

Minister Lu nodded.

Not long after, he left the qinglin Manor and returned to the Linlin laboratory.

He intentionally looked for sun Tao.

To be honest, when he saw sun Tao, he was a little nervous. After all, he knew that the other party was offering 500000 Yuan.

However, in order to find out the other party's true motive, he had to pretend that he didn't know. He didn't forget to ask sun Tao, ""Professor sun, do you have any suggestions for the experiment? when academician Qin comes, we can talk to him."

"Academician Qin, you already have a plan, right?" Sun Tao was also a little nervous facing Minister Lu, but he also suppressed his nervousness. After all, he had already begun to take action.

He could not relax before he got rid of Chen dabei.

However, Minister Lu and the others did not know that Chen Dabai, who he had tried his best to hide, had already seen through him.

The two of them each had their own plans, and they chatted casually before they separated.

Seeing that Minister Lu had left, Sun Tao pretended to leave Linlin's laboratory. Then, he received a message. He immediately went to the side of the road, and then a taxi stopped in front of him.

Sun Tao quickly got into the car.

However, the driver was the first to say, "Are you mistaken? He's just a security guard. Moreover, he has been a security guard for a long time. His family background is even simpler. He's just an ordinary farmer.

When Sun Tao heard the news, he laughed, "A security guard born as a farmer can talk and laugh with someone like Minister Lu? A security guard with a farmer's background can let Linlin experiment on him, so why would the person in charge, Shen Li, be so polite?"

"You also know the academician Qin Junior that's spreading outside, right? A security guard who's born a farmer can call such a person over with a phone call?"

The driver immediately shook his head and said, "That's impossible!"

Sun Tao nodded and said, "That's right. So, this is not right. The information must be forged. The best way to protect someone is to make him look ordinary so that no one will think that there is a problem with him.

It's obvious that the other party has done very well in this regard. If Black Star and the others had not already guessed it, the other party's identity would never have been known.

The more the driver thought about it, the more he felt that it made sense. Then, he immediately said, "I'll investigate it in detail and report it to Black Star. As for whether it's true or not, they'll decide.

Sun Tao nodded his head.

That was the only way.

After all, he couldn't participate in what was going to happen next.

..

Not long after.

Ma Hong received another message. He opened it and saw the name of a company.

It was a foreign company.

Now that the guy who had been pretending to be a taxi driver had contacted the company, it meant that the company had a lot of 500,000 Yuan.

That's good. We've found a group of people.

MA Hong immediately gave the order. pay attention to this company's people. I'm sure they'll make a move soon. When their people come to you city, we'll catch them all in one fell swoop.

This order was quickly carried out.

On the other side.

In a foreign company, Black Star also received a piece of information."Chen dabeai ..."

Black Star looked at the information and immediately confirmed that this was the person they were looking for.

How could the security guard talk and laugh with the person in charge of the Chinese Academy? How could the person in charge of Linlin laboratory be so polite to the other party?

Most importantly, it was impossible for the other party to move that academician Qin.

Although this young man was just a shield, there was only one possibility. The security guard's identity was not simple.

Otherwise, a Security Manager in their country would only be able to meet his boss at most. Those big shots in the government would not give him any face.

Also, Chen dabeai's information was too clean, too clean.

However, this also exposed him. This was a fatal detail.

Black Star directly picked up a special phone and sent a message. target locked. Everyone, sneak into you city.

This time, it was their biggest operation. The newly formed Department had sent the most elite of the country.

If one were to talk about how elite these elites were, they were all like 007 and bond.

If these people couldn't complete the mission, then no one could.

Naturally, if these people were to fail, they would not be able to do anything in that county. They would not have the ability.

However, he believed that those people would definitely be able to do it.

.

A few days later.

In the Linlin Manor's surveillance room, MA Hong quickly found Minister Lu. The first thing he said when he met him was, ""Minister Lu, there's a situation!"

"What's wrong, leader MA?" Minister Lu asked with confusion.

MA Hong frowned and explained, " chief Lu, the company we're monitoring didn't do anything. They just sent out a message, but we couldn't track down the person who received it. They might have other

people, and they're not ordinary people. We haven't reached them, but they might have entered your city.

Minister Lu was shocked when he heard this, "maybe we've reached your city?" You still haven't found anything?"

He was very clear about the abilities of MA Hong and the others. To be able to sneak into your city without being discovered, how powerful must they be?

Those people had sent such powerful people to deal with Chen Dabeai, a security guard?

How could this be? it didn't make sense.

Or were they crazy?

That's not right. I think their target is boss Qin. I just don't understand why they are targeting Chen Dabeai! Minister Lu quickly thought about it.

MA Hong naturally knew that the people they had sent this time were the most powerful. Otherwise, they would have made it in the end. If it wasn't related to boss Qin, he wouldn't believe it.

However, the other party had been targeting Chen Dabeai, which was puzzling.

"Go and discuss with boss Qin." Minister Lu said and hurried to Qin Lin's office.

MA Hong immediately followed.

Soon, Minister Lu told Qin Lin what had happened.

When Qin Lin heard his words, his face revealed a look of disbelief. "What did Chen Dabeai do to attract such a person? Or is he being misunderstood?"

MA Hong immediately replied, "he must have been misunderstood. Otherwise, he's just an innocent security guard. Who would target him?" However, we don't know the exact details."

Qin Lin was stunned.

This was rather intriguing.

It was like a movie.

Even movies wouldn't dare to act like this, right?

Since you think they're already in your city, "Qin Lin suggested, "they must be watching us now, right?"

"Then why don't we create an opportunity for the other party, so that leader MA can catch all of them in one fell swoop?"

"Boss Qin, do you have an idea?" Minister Lu immediately asked.

Qin Lin took out his phone and called Chen Dabeai. As soon as the call went through, Chen Dabeai's call came through. "Boss, what's your order?"

"Chen Dabeai, I want to eat fish," Qin Lin said into the phone.

"Boss, what kind of fish do you want to eat? I'll buy it immediately!" Chen dabei said immediately.

"What kind of fish do you want to eat? can you buy something better than mine?" Qin Lin said unhappily. Let's go fishing together tomorrow. I want to eat the fish I catch."

MA Hong immediately understood what Qin Lin meant when he heard his words. He immediately picked up his phone and made some arrangements.

[Chapter 1685 What Genes Is Academician Qin Researching?](#)

Chen dabei did not know why his boss suddenly wanted to eat fish and was even in the mood to ask him out for fishing. But since it was his boss's order, he had to be prepared.

This was an opportunity to get close to his boss, and others couldn't get it even if they wanted it.

After Qin Lin made an appointment with Chen dabei to go fishing the next day, he turned to MA Hong and asked, " leader MA, where should I go fishing with Chen dabei tomorrow? "

MA Hong knew what Qin Lin meant. He immediately asked someone to bring him a computer. He found a detailed map of you city and found a location.

The location was a natural fishing ground in the new reservoir of you city.

With the development of you city, in addition to the reservoir next to the Linlin Scenic Area, a new reservoir was built.

There were two purposes for the construction of the reservoir. One was to divert the electricity pressure, and the other was to control the water quality of min river's Urban area.

After all, there were so many extinct national treasures in this area, such as Atlantic sturgeons and Atlantic pufferfish ... Which one of them wasn't a national treasure, and had very high requirements for the water quality?

Qin Lin had invited Chen dabei to fish here to lure the snake out of its hole. Besides, this was a good place for an ambush.

The next day.

Qin Lin personally drove Chen dabei to work.

Chen dabei was flattered. This was the first time he had enjoyed such treatment.

Which employee could get his boss to drive him to go fishing? this meant that he was still highly regarded by his boss. He was not comparable to Yu Shui and the others who followed him and ran errands for their boss.

Chen dabei put the fishing gear in the trunk and got into Qin Lin's car.

In the dark, in a house, someone saw this scene and said into the headset, " to think that the young man would personally come to pick him up. It seems that this target is right. However, there should be people protecting him in the dark. Let's search for him.

A reply immediately came from his headset. A moment later, another report came in. They had discovered the people who were secretly protecting him. When the time came, they could deal with these people first.

After receiving this news, he was even more certain.

If they were just ordinary security guards, they wouldn't need to go through so much trouble to get people to protect them in secret.

Therefore, the target of their operation this time could not be wrong.

On the other side.

MA Hong was already waiting in one of the cars, a smile on his face.

He had deliberately let a few people reveal their flaws. The other party should have discovered it and thought that he had the overall situation under control, right?

At that time, those people would probably make the first move on these people, but they were all super soldiers who had used the body increasing medicinal liquid.

He really wanted to see how wonderful the expressions of those people would be when the time came.

While both parties were planning, Qin Lin had already started the car and was taking Chen dabei to the new reservoir.

He knew the purpose of today's visit. The only person who was kept in the dark was Chen dabei. He was still sitting in the front passenger seat, talking to Qin Lin about fishing.

Therefore, knowing too much would only be a problem. Chen dabei, who knew nothing, was actually a very lucky thing.

The car stopped.

Qin Lin got out of the car and brought Chen dabei to a remote place to fish.

"There aren't many people here, so no one will disturb us." Qin Lin said with a smile.

that's right, " Chen dabei agreed. it's noisy with too many people.

It was obvious that he did not know that he was being used as bait and that he was being exposed to the other party.

In the dark, those people had already followed him.

These people were the most powerful elites. They were all 007s and bond, so it was too easy for them to keep an eye on one person.

One of them said, "lock onto the location of the people who are secretly protecting you. We'll take action in ten minutes."

The next moment, a series of replies came from the headset.

A moment later, a few figures appeared on the edge of the reservoir. These figures, intentionally or unintentionally, sneaked toward the places where the other figures were hiding.

The person-in-charge was watching everything in secret. Those people were protecting him in the dark, so they definitely didn't know that he had been exposed.

They should be dead now.

Once these people were dead, the target would not be able to resist, and he could take the target away with ease.

He naturally understood that a living God of technology was more useful than a dead God of technology.

The fact that so many good things had appeared in this Eastern country in recent times proved that they also wanted these good things.

One of the spies sneaked up to a tree, where the person he was secretly protecting was hiding.

The spy almost instantly stabbed the man with the dagger in his hand.

However, at that moment, his expression changed. His hand stopped in mid-air as it was caught by a hand.

The dagger in his hand was also unable to get any closer.

The spy's expression changed instantly. He wanted to pull back his hand, but he couldn't do it. He immediately raised his foot to kick the other party away, but just as he raised his foot, it was blocked by the other party. Before he could react, a fist had already landed on his head, knocking him out.

This scene happened in several places.

The spies felt as if the heavens were playing a joke on them. They were facing a terrifying person. They had been trained for a long time, and even as elites, they were not this person's match.

The person-in-charge was observing this in the dark and was shocked.

What was going on?

He had clearly seen that the people he had brought with him had been killed by the other party during the assassination.

Furthermore, why were those people so strong?

[Chapter 1686 What Genes Is Academician Qin Researching?](#)

He knew very well how powerful the people he brought here directly were.

They were all in 007, bond.

Why were these people no match for him and were easily taken care of by him?

The person-in-charge suddenly felt that something was wrong. He immediately called out to the people around him. They were about to leave.

He felt that he had been exposed.

However, just as he was about to turn around and leave with his men, he suddenly realized that a few figures had appeared out of thin air in front of him.

These people were wearing special combat uniforms, but they seemed to be invisible. He didn't notice anyone around him just now.

The other party had appeared just like that.

Before the person in charge could react, those people in special combat uniforms had already rushed towards them.

He couldn't care about anything else. He pulled out his weapon and shot at those people.

The bullets hit the bodies of those people.

However, something shocking happened. Those people didn't seem to be hurt and directly rushed in front of them.

The person in charge was dumbfounded.

Why aren't they afraid of bullets? are they Supermen?

Immediately after, the person in charge received a punch and fainted.

When he was faced with the punch, he actually wanted to Dodge it, but he realized that he couldn't avoid it at all. His head received a heavy punch, and in the end, his vision went black and he fainted.

Next to the library.

Chen dabei was shocked when he heard the loud bangs. "Boss, what's that sound?"

"It's probably someone setting off firecrackers. It's none of our business," Qin Lin said with a smile.

"Boss, are they really firecrackers?" Chen dabei asked.

However, he only said one sentence and then looked at the water seriously.

If the boss said so, then so be it.

Qin Lin's mouth showed a trace of a smile. He was wearing a headset and there was good news from it. The person in the dark had been dealt with, which meant that there was nothing to worry about.

To be honest, with a special combat suit and a warrior who used body-enhancing potion, he would feel abnormal if he couldn't solve this problem easily.

On the other side, a taxi was also forced to stop. The driver looked at the few big men who had arrived at the side of the car, and his face turned ugly.

He knew that he had been exposed, so he sighed and got out of the car. Then, he was pressed down by the men.

In Linlin's laboratory.

Sun Tao, on the other hand, was a little nervous.

He knew that those people had already made their move. They should have taken care of Chen dabei by now.

As long as Chen dabei was killed, the large-scale experiment would not be able to continue.

However, his eyes lit up when he thought about it. If Chen dabei was not around, he would have to find a new person to take charge of the experiment.

He felt that he was suitable. If he could seize the opportunity, this would also increase his reputation.

This large-scale experiment must be led by the Chinese People's Hospital. If it could be completed, the benefits for him were self-evident. After all, it was very dangerous to earn 500000 Yuan. If he could have an official relationship, it would be much safer.

Just as sun Yao was thinking, she saw Minister Lu walking in with a small team and walking straight towards sun Tao.

At this moment, sun Tao felt that something was wrong, and his expression changed.

"Sun Tao, you've committed a crime. Go!" As expected, Minister Lu waved his hand at his men. Then, the group of men walked forward and took sun Tao outside.

At that moment, sun Tao's body went limp. He didn't explain himself. He knew that since Minister Lu had personally brought people here, there must be conclusive evidence. Those people had failed and implicated him.

This scene made the experts in Animal Genetics clamor.

"What's going on?"

"Why did you arrest professor sun?"

"Minister Lu, why is that?"

Seeing this, Minister Lu immediately said, " everyone, please calm down. This sun Tao is a spy. He wants to sabotage our experiment and has sneaked in. There is conclusive evidence.

This made the others even more shocked.

It was actually like this?

Then, they thought of something. Someone actually made someone like sun Tao a spy for this experiment. This large-scale experiment must not be simple.

The more he thought about it, the more excited he became.

After all, with their status, they really wanted to participate in such a large-scale experiment.

It was just that academician Qin hadn't appeared yet, so they didn't know how to start.

Qin Lin and Chen dabei soon returned to Linlin Manor. They had a good harvest today. They dropped two fish, and Chen dabei generously let Qin Lin bring them all back to eat.

Qin Lin was a little speechless. Why did he have to eat this fish when he had so many +2 fish?

However, she had put on a good show and could not disappoint Chen Dabe.

This guy had been kept in the dark from the beginning to the end.

Very quickly, in one of the cities, a foreign investment company was also directly shut down, and a blonde foreigner who was the General Manager was also arrested. He was Black Star.

Black Star was even a little dazed when he was caught.

Even if the mission failed, it would take some time for them to be caught with their skills.

They were all 007 and bond, so they should be able to escape.

However, it seemed that things were different from what he had expected.

What was going on?

The news of Black Star's defeat naturally spread very quickly.

In a special Department in America.

Adoxi rushed to a screen. There were lines of information on the screen, and there were even green dots flashing on it.

However, when he entered, the green dots quickly extinguished.

The information needles in the elite soldiers' bodies had been discovered and taken out.

In other words, they had failed their mission and were captured.

Adoxi fell back into his chair.

He had been high-spirited, thinking that he could accomplish something.

Those people were all carefully selected elites, so why did they fail so quickly? Could it be that we really can't enter your city?

This was not right.

Adolphus was furious. There was absolutely no problem with his plan this time, which meant that these people were not the so-called elites at all. Those departments were just fooling him and did not give him the real elites.

If the most elite soldiers were like this, the people from those departments could hang themselves.

..

In the Linlin Manor, Qin Lin had once again entered the workshop in the inner area to begin the gene extraction work.

As there were only two fossils, he had to be very familiar with the gene extraction technique before he extracted the genes from the two fossils. There could not be any accidents or waste.

This time, after Qin Lin had extracted the genes from the two bones, he suddenly remembered that there was a problem with the animal gene experiment.

Therefore, under normal circumstances, it would require the gene moving body fluid. However, the ordinary gene moving body fluid shouldn't be able to meet the gene requirements of ancient times.

It was just like what science said. Dinosaurs adapted to ancient environments and might not be able to survive in modern times. If one created dinosaurs through genes, one must change the dinosaur genes to adapt to the modern environment.

Therefore, the genetic liquid had to be specially researched and prepared.

Qin Lin sighed. That was why he had to do the incomplete techniques himself, which was time-consuming and laborious.

Most importantly, he could not split himself.

At this moment, he remembered that there was a group of free labor that he could use.

He left the manor and went to Linlin's laboratory. For the first time, he met the animal Genetics experts gathered by Minister Lu.

Minister Lu had come to MA Hong's place to find out more about the spy. When he heard that Qin Lin was going to Linlin's laboratory, he ran over immediately and gathered all the animal Genetics experts to wait for Qin Lin.

As soon as Qin Lin came in, these people were also in awe. After all, they all knew academician Qin's reputation. In addition, academician Qin was the leader of this large-scale experiment.

Moreover, they had finally picked up this person. This also meant that a large-scale research was about to begin, right?

Seeing these animal geneticists, Qin Lin went straight to the point. everyone, I know that you're all experts in the research of animal genes. This time, I'll have to rely on you. Now, I need a type of genetic liquid. Moreover, it's a type of genetic liquid that can allow ancient genes to survive and increase their activity.

The experts couldn't help but start whispering to each other.

They understood that the genetic liquid was a rare material for the research of animal genes.

But what did this academician Qin say? A genetic liquidized fluid that required the genes of the ancient era to survive?

What kind of gene does academician Qin want to research?

[Chapter 1687 How Is It Possible For These Genes?](#)

academician Qin, what genes are you planning to research? "

"Academician Qin, can we find ancient genes now?"

yeah, even if we reverse-extract the genes of those animals 'ancestors, it can't be helped!

".."

The experts in Animal Genetics were all shocked because it was unbelievable to them.

Or rather, none of the experts in Animal Genetics had ever thought about this.

Don't be fooled by foreign sci-fi movies that often talk about the dwarf era. They're all nonsense and are just the imagination of Westerners. The real situation is that how could things like dinosaurs come into being?

He couldn't get it just from the genes.

Getting dinosaur genes in the scenes in the movies was nonsense.

If one day, the water really created dinosaurs, they wouldn't be ancient dinosaurs. At most, they would look the same, but that was still very difficult.

Naturally, they were only thinking about this problem.

After all, it was impossible for academician Qin junior to make dinosaurs. If he could really make such a thing, then they would be willing to become the lackeys of academician Qin junior.

In the future, if academician Qin had any research, they would respond immediately no matter what they were doing.

If they really created dinosaurs, would they still be as simple as scientists?

In some movies and novels, this was the creator.

Minister Lu looked at the experts' words and immediately said, ""Have you forgotten what you're here for? You're here to assist boss Qin in his research."

"Haven't you been looking forward to boss Qin's research? Now that boss Qin has given you a mission, are you not confident in getting it out?"

These words triggered the experts in Animal Genetics, and they all said, "

how is that possible? Minister Lu, academician Qin, you have to believe us.

that's right. We have so many people. How can we not do it? "

"Academician Qin, you have to give us some time."

".."

In an instant, the experts all took action, and some were discussing with each other.

Seeing this, Qin Lin also left with satisfaction.

It would be fine as long as someone helped him with the gene body fluid.

Moreover, although this was time-consuming, it was not very difficult. It just needed to be deduced repeatedly.

It just so happened that there were a lot of people.

The truly difficult part was still the genes.

As these people had said, the biggest problem was whether or not there could be ancient genetic research.

boss Qin, do you want to take a look at those spies? " Minister Lu followed him out. your plan to lure the snake out has really worked.

"Let's go and take a look!" Qin Lin was curious. After all, he had never seen a spy in his life.

"Let's go!" Minister Lu invited.

Soon, Qin Lin and Minister Lu arrived at the Linlin Scenic Area police station. The police chief had left with his men long ago. After all, he knew the identity of MA Hong and his men.

Now, they naturally had to cooperate well.

Qin Lin also saw the people who were caught, but they were all tortured to the point that they didn't even look human anymore.

MA Hong saw that Minister Lu had arrived and took out a document in surprise, " Minister Lu, these people are really capable. They are the elites of the various departments of that country. Each of them can fight against an international pirate. If they were to carry out missions elsewhere, no matter what it is, they should be able to succeed easily.

MA Hong's words carried a hint of pride.

After all, he was the one who caught this person. If he praised these people like this, was he really not praising himself?

"Minister Lu, what should we do with these people?" MA Hong asked.

it's up to you, " Minister Lu said. after all, I'm not in charge of this. It's your department's business.

MA Hong nodded when he heard this. He'd just lock them up in you city's prison. The world's number one thief was already locked up there anyway.

After that, Qin Lin left with Minister Lu and returned to the Linlin Manor. When they reached the living room, they saw Gao yaoyao.

He saw her playing with two parrots and a few other little parrots.

This girl had been very busy recently, and the company was developing well.

Qin Lin chatted with the girl for a while and went back to the inner area. Then, he went back to the workshop and continued to extract the gene time.

Time passed.

In the blink of an eye, a month had passed.

After you city's airport was completed, it became more and more lively. During this period of time, it was even more lively because you city's official made an announcement.

The new food Festival was about to begin.

Naturally, this was just publicity.

However, it had also attracted countless people. The previous Food Festival was still fresh in their memories, and it had even attracted the famous celebrity surnamed Xie who loved to cook.

Moreover, with the popularity of the livestream of Linlin Scenic Area and you city on the first day, there were countless internet celebrities who came to the livestream to gain popularity.

It could be said that the food Festival was the most popular event in the country.

What was even more amazing was naturally that there were several TV stations broadcasting it live. Even academician Qin little made glowing beef and was regarded as the God of cooking by the world's gourmets.

Was you city going to have a Food Festival again?

Since the first food Festival was a success, Chen Li and sun Xian would naturally not give up on such a Festival. Therefore, it was almost a year and they decided to restart the food Festival.

The current publicity wasn't actually done by them. They were just letting some people spread the news.

The reason for this was to see the netizens' reaction and then let those TV stations know. After all, there were people who took the initiative to look for him in the first batch, so it was impossible that there would be no one this time, right?

[Chapter 1688 How Is It Possible For These Genes? 2](#)

However, who knew that once the news came out, it really attracted a lot of people. Many chefs from all over the country had already inquired about the news in the county government, wanting to occupy a good stall at the food Festival.

Obviously, last year's Food Festival had left a deep impression on people, and this was a good opportunity to promote himself.

What surprised sun Xian and Chen Li even more was that they had attracted a few TV stations, including nanhe TV station, which had become very famous recently and claimed to understand the aesthetics of ethnic groups and audiences the best.

This nanhe TV station actually wanted to turn you City Food Festival into a food sleep program, and then invite some chefs with positive values and good cooking skills, such as Lei, and last year's big star with the surname Xie.

This was a pleasant surprise for Chen Li and sun Xian.

If that was the case, then the meaning of their Food Festival was even more different. It was as if it had been elevated to a higher level.

There were even two other television stations that wanted to join in and form a joint project.

The two of them had some understanding of the TV station. This kind of scene was really rare, which showed the influence of you City Food Festival.

This made the two of them feel at ease. In the future, you City Food Festival would become a famous brand.

However, the three TV stations also had a request, which was to let boss Qin cook a dish during the food Festival.

After all, only boss Qin could make glowing dishes.

Moreover, the International gourmets who had tasted the beef were still unable to forget it. They had been promoting it everywhere, letting countless Taotie overseas know that there was a master chef in the eastern countries.

The celebrity with the surname Xie was originally very proud. He also tried it and said in the program that the best Chef he knew didn't have one-tenth of the cooking skills of academician Qin little.

The gourmets who came to the food Festival again also asked for boss Qin to make that kind of beef again.

It could be said that this Food Festival could be made into a Festival of international civilization, which was of great significance to promote their food culture.

Therefore, Chen Li had no choice but to make a trip to Linlin Manor.

After all, they couldn't agree to such a thing. Whether they were willing or not, boss Qin had to decide for himself.

.

The inner area of Linlin Manor.

Qin Lin's surprised voice was heard. Several special gene containers were placed in front of him, and some genes were being extracted from them.

This gene was the one he had extracted from the Brachiosaurus 'skeleton.

He immediately used the Jade of truth's ability to search for information.

Brachiosaurus gene: special!

[this is the Brachiosaurus gene extracted from a Brachiosaurus fossil. This is a very magical gene. If you study it, you will be able to discover something that will shock the world.]

Qin Lin's smile widened when he saw the message.

He had been in contact with gene extraction for a long time, and this was his first attempt at extracting the genes from the brachyponera's skeleton, and he had actually succeeded.

It wasn't that he was amazing, it was the mysterious stone tablet that allowed him to obtain such amazing knowledge about animal genes.

At the end of the day, the mysterious stone book was still the most amazing.

Just as Qin Lin was feeling excited, he received a call from Chen Li. The other party had arrived at the manor's main hall and wanted to meet him.

He had no choice but to set up a protective layer around those genes before leaving the inner region.

"Boss Qin, I have something important to tell you!" Chen Li hurriedly said when he saw Qin Lin.

"What is it?" Qin Lin asked, puzzled.

"It's about the food Festival. The county is planning to hold another Food Festival this time ..." Chen Li immediately said.

He told Qin Lin everything about the food Festival. Also, the final competition of the food Festival would not be held in Linlin's Scenic Area, but in the stadium built in the new district.

After all, the stadium could accommodate more people.

It's precisely this time that we need boss Qin to go up and cook the glowing beef again," Chen Li continued. Only then can we attract the gourmets from both the country and abroad.

Towards the end, Chen Li's words were already a request.

Qin Lin was in a good mood after successfully extracting the Brachiosaurus gene, so he agreed to the request. It was just a meal of beef, so it was no big deal.

Seeing that Qin Lin had agreed, Chen Li also left while continuously thanking him.

Not long after, you Cheng officially made an announcement that the food Festival was starting, and academician Qin little was joining.

This news quickly became a hot topic, and everyone was discussing it.

This news naturally spread to other countries, especially the special Department that was established by the beautiful country, Adoxi.

The previous batch of elites had failed, and Adoxi had formed another batch.

Moreover, the previous departments had given him an excuse and not the elites. This time, he had personally selected the strongest.

In fact, those departments were also very wronged. They had indeed given the elites before. How could they dare to resist when the higher-ups had instructed them?

On the contrary, this time, the people that Adoxi personally chose were the ones who came in second from the previous round.

They even felt that it was because of the failure of the mission that caused the death of all those people, so they were trying to shirk the responsibility, saying that they didn't give the elite soldiers.

They didn't know what kind of mission it was that could actually cause those elites to fall. Therefore, they simply kept quiet so that they wouldn't be dragged into such a difficult mission.

They were almost certain that the previous batch of people couldn't complete it, and this batch couldn't either. The first batch was truly the elite, and they were truly stronger.

Adossi and the man who supported him didn't know about this. At this time, they were reading a message from the eastern country.

It was about the food Festival.

"Sir, do you think that if this academician Qin is the God of science, the other party will still let him cook in public?" Furthermore, it's possible that he has such good cooking skills?"

This time, the man was even more certain that Adossi was right. That's right. If there's such a God of science, we will never agree to him doing this. Instead, we should stop him from contacting the outside world as soon as possible and protect him closely. Not to mention, he still has time to learn cooking, and he's even the God of cooking. Such cooking skills will take a lot of time.

That's how it should be," said Adolf with a smile. So, the other party is using this young man as a shield. We can't be fooled.

The man immediately ordered, "We must get the last communication from Black Star's group. They must have found the person behind them for them to choose to take action. However, for safety reasons, they did not send any messages. We did not receive any messages.

But I know Black Star. Even if he's captured, he'll definitely leave behind important information. This time, we must first find out who the other party is before we make a detailed plan.

Qin Lin didn't know that he had been ignored again. When he returned to the inner area, he saw that the Brachiosaurus gene in the gene dish had begun to become inactive.

He hurriedly took the gene containers out and put them in the experimental box for security. At the same time, he asked MA Hong to drive him directly to Linlin's laboratory.

He was also very cautious about the Brachiosaurus gene, which was why he called MA Hong over.

MA Hong didn't know the reason, but since Qin Lin had given him an order, he had to do it. It was an order from above, so they had to cooperate with boss Qin in all aspects.

Qin Lin arrived at Linlin's laboratory. Shen Li had already answered his call and was waiting for him.

Tell the experts in Animal Genetics to gather. Qin Lin didn't say anything and directly gave instructions to Shen Li.

Shen Li immediately nodded and took out his phone to make a call.

The animal gene research experiment was arranged to be in a laboratory building in the North. Security guards had been deployed here long ago.

Anyone who entered had to undergo three rounds of inspection.

However, since Shen Li and Qin Lin had personally come, this was naturally unnecessary.

When Qin Lin entered the laboratory, the experts in Animal Genetics were already waiting for him.

They had been working together to research the gene body fluid for the past month, and they had already developed more than 20 types of body fluid that could allow ancient genes to survive.

These were all deduced, and they were not sure which one would work. It all depended on what genes boss Qin had in his hands before they could match them through tests and comparisons.

Qin Lin came in and took out the experiment box containing the Brachiosaurus gene. test the genes inside and see which of your living body fluids can be used.

When the three team leaders heard this order, they immediately stepped forward and took out the genes inside. They then led their men to start testing.

However, after the testing, all the experts in the laboratory were shocked. They all looked at these genes in disbelief.

[Chapter 1689 Only Now Do I Know What A Monster Is](#)

how is this possible with the genetic sequence? "

'Their activity doesn't exist in this era at all.'

hurry up and start the sequence tracing ...

In an instant, the entire laboratory became rushed. It was as if a train that was originally calm had suddenly been stimulated and accelerated to maximum speed.

Shen Li looked at this scene in shock.

These were all well-known Animal Genetics experts. For them to be like this, they must have come up with something extraordinary.

This could be seen from their excited expressions and their high enthusiasm.

When these experts in Animal Genetics worked together, they could calculate the time of a genetic era very quickly.

As long as the activity and sequence of the cells were detected ... After some data, they could trace it through the formula of the sequence.

This was also the crystallization of human wisdom.

Not long after, a group leader shouted, " all the data has been detected. Quickly summarize and trace back the year.

The animal geneticists cooperated very well.

After some time, another group leader couldn't help but Mutter, " unbelievable ... Sequence tracing, this was ... One ... A gene from hundreds of millions of years ago!"

In an instant, the entire experiment was in an uproar, and the experts 'voices were deafening.

They were all in disbelief, and their excited expressions became more and more exaggerated.

They had always been curious about what genes academician Qin wanted to research. He actually needed a genetic living fluid that could allow ancient genes to survive.

They didn't believe that academician Qin little could take out the genes from ancient times.

In fact, they had even made countless possible guesses.

But now, they were completely dumbfounded.

This was truly an ancient gene.

A gene from more than 100 million years ago. If it wasn't an ancient gene, what was it?

A team leader in charge came to Qin Lin and asked, ""Academician Qin, could this be dinosaur genes?"

This was what they subconsciously thought.

After all, that was the era of dinosaurs. They also thought that it was impossible for academician Qin to produce dinosaur genes.

Therefore, he asked subconsciously.

Previously, they were still thinking that it was impossible for academician Qin to take out dinosaur genes.

But Qin Lin nodded.

This answer made all the experts in Animal Genetics suffocate for a moment, and then they all widened their eyes.

Was it really the dinosaur gene?

And the dinosaur gene?

That was something that had been around for hundreds of millions of years, yet it still existed?

At this moment, the animal geneticist in the laboratory felt his entire body go numb. Then, he felt as if all the cells in his body were boiling.

How great of an honor would it be to be able to participate in the research of such a thing?

If they could succeed, it would be a great honor.

Their names would be remembered in history.

Now they might know why the gravity research team leader Chu admired academician Qin so much.

The moment academician Qin took out the dinosaur gene, they were completely convinced by him.

An expert couldn't help but ask curiously, ""Academician Qin, you ... How did you extract the dinosaur gene? What kind of dinosaur gene is this?"

this is the Brachiosaurus gene! Qin Lin didn't try to hide anything. He started to make up a story, this was extracted from the Brachiosaurus 'fossil.

at first, I was just fantasizing about whether I could develop dinosaurs. After all, when I was young, I dreamed of riding dinosaurs and shopping.

so, I've been looking for dinosaur fossils for a long time. I've spent almost ten billion to buy all kinds of dinosaur fossils.

even though this seems a little naive from a scientific point of view, some things only know if it's possible after trying. Fortunately, God seems to care for me. It took me a long time to retrieve the fossil bones from the deep sea and I really managed to extract the gene.

Qin Lin's words were full of loopholes.

Moreover, would someone really spend ten billion on something unrealistic?

Not to mention anyone, even the state departments would not spend tens of billions of Yuan on research for an unrealistic reason.

Moreover, could it really be possible to extract genes from bone fossils that were salvaged from the deep sea?

This was also not in line with science.

However, sometimes, even if there was no scientific reason, as long as someone succeeded, there would be scientific reason.

As for the same thing, if others succeeded and you couldn't, it was a matter of probability, or you were not as good as the other party.

Now that academician Qin was successful, there was a scientific reason for this.

Or it was a matter of probability. You could spend a million dollars to waste, but you still had to try a probability, and then you could still succeed.

Or, that's because you're not good enough and far inferior to academician Qin. Then don't talk about whether there's any scientific reason or not, or it'll be a very ridiculous thing.

But no matter what, no one would do such a crazy thing.

"Hurry up and analyze which gene body fluid is suitable for these genes," Qin Lin also ordered.

At this moment, after hearing Qin Lin's instructions, the experts in Animal Genetics all got into action.

It was a complete order.

In this experiment, they were completely academician Qin's lackeys.

If academician Qin pointed to the East, they would definitely not go to the West.

This was the holiness of scientific research. As long as one's knowledge surpassed everything, as long as one's scientific knowledge was better than everyone else's, then one would be the king, and everyone would listen to one.

[Chapter 1690 Only Now Do I Know What A Monster Is](#)

No outsiders were allowed to interfere in scientific experiments. Even if an official was assigned to the experiment, the other party had to step aside obediently during the experiment.

Not long after, the animal Genetics experts were done with their tests.

However, all of them had ugly expressions.

One of the team leaders reported to Qin Lin, "academician Qin, among the genetic body fluid we've been researching, only one can barely meet the survival needs of these genes. This might not be enough for future research.

This made the genetic experts in the surroundings somewhat depressed.

After all, academician Qin even managed to create such a gene. So many of them worked together, but they couldn't even figure out a single genetic living fluid.

This was really a blow to him.

Qin Lin obviously saw through these people's thoughts and also smiled. you don't have to be like this. It's enough that it can be used for the time being. Now, I'll study it with you and create a living body fluid that can be used by the Brachiosaurus gene.

Now, not only did these people not suspect Qin Lin, but they were also excited when they heard this. Their work enthusiasm was high. In short, they were immediately on stimulants.

This was the power of an idol.

A really convincing idol had this kind of charm.

Now, in this research, academician Qin was their idol.

The reason why Qin Lin joined in was because he didn't want to waste time. With his knowledge, these people would be faster.

He took the data from these people's previous research and after reading it, a plan for how to continue emerged in his mind.

The mysterious stone book had allowed him to learn knowledge, and it was this way that he was able to master it.

Therefore, in front of those animal geneticists, he directly wrote a series of experimental plans for the living body fluid on a computer.

When the experiment plan was written out, the genetic experts were completely shocked.

There were so many of them, and they had spent so much time researching this data. Even if many of them wanted to keep up with the progress of the experiment, they had to spend a lot of brain power to pay attention to, record, and integrate this data.

Now, academician Qin just took the data and looked at it once, and he could smoothly write the next experimental plan.

In fact, it was a plan to end it directly without any probing.

He was so confident that this plan could directly achieve his goal.

The experiment plan was out, and these people didn't dare to waste time. They entered the research as quickly as possible.

However, as they studied it, they became more and more restless. From time to time, they would look in Qin Lin's direction.

Academician Qin's research plan was frighteningly perfect in every step. Not a single step could be carried out smoothly.

This was like mathematics in middle school, where the answers were separated at the back of the text. As long as one followed the answer, it was impossible to make a mistake.

How unbelievable was it for them to have such a feeling in their research?

Since when did scientific experiments become so simple?

As each step was completed, they reasonably developed a genetic living body night.

They compared the attributes of this live gene with the Brachiosaurus gene and quickly came to a conclusion. They were actually perfectly compatible. Moreover, the effect was very good. It could allow the Brachiosaurus gene to survive for a long time, enough for them to conduct research.

At this moment, the animal Genetics experts looked at Qin Lin with even more shock and admiration.

Now, they finally knew why people called this academician Qin little a demon.

Only by working with him would you understand the true meaning of the word 'monster'.

No one would believe that this academician Qin was not a demon.

let's fuse the Brachiosaurus gene into the new living body fluid, " Qin Lin ordered. we still have to carry out the next step of the research plan.

The experts did not hesitate when they received the order, and quickly infused the genes into the body fluid.

The living body fluid could allow these genes to survive well.

Next, he could spend some time researching these genes.

Academician Qin, which direction should we focus our research on next? " One of the team leaders immediately asked.

Perhaps it was because academician Qin's ability was too strong, they were already convinced and habitually followed the other party's instructions.

Qin Lin didn't hesitate and said directly, " first, let's test the completeness of the Brachiosaurus gene fragment!

Although the Brachiosaurus gene had been extracted, it was only extracted from a piece of bone fossil. The completion of the gene fragment was definitely not perfect.

Or rather, it would definitely not be perfect.

Therefore, it was very important to first determine the completeness of the gene fragment.

The animal Genetics experts also immediately started researching the Brachiosaurus gene fragments.

This process would take some time.

Qin Lin also left Linlin's laboratory and returned to the Linlin Manor.

The two bone fossils he had obtained, other than the Brachiosaurus, also contained the bones of the ancient saicha Dragon.

He still had to find time to extract the remains of the ancient saicha Dragon and obtain its genes.

Now that he had obtained it, he naturally had to make use of it.

Moreover, the Brachiosaurus 'skeleton was not useless after he had extracted the genes. The remark indicated that he could continue to extract the genes from the skeleton until all the genes contained in it were extracted.

When Qin Lin returned to the main hall of the manor, he saw an unexpected person, Chen shengfei.

"Old Chen, why did you come over today? Has the matter with the corporation been resolved?" Qin Lin asked in surprise.

Previously, Chen shengfei had been working on the group's reform, and had even borrowed 30 billion from the bank.

Because of the Linlin laboratory's shares, he could easily borrow 30 billion.

And this 30 billion was for the group's reform. As long as it was successful, the market value of his group could double several times. If it was well-managed in the future, the market value could increase tenfold in a short time.

Therefore, Chen shengfei devoted himself to it and did not even come to Linlin Manor.

Now, looking at Chen Sheng Fei's smiling face, the result was obviously very good.

Chen shengfei laughed as well. it's a success. So, I'm going to have a good rest here for a while. I really miss the medicinal cuisine you make.

"That's easy. I'll make it for you tonight," Qin Lin said with a smile.

He rarely cooked, and no one could ask him to cook. It depended on whether he was willing or not.

With this friendship with Chen shengfei, he was naturally willing to do this.

In the evening, Qin Lin personally cooked a herbal dish for Chen shengfei. It was made with +2 ingredients.

Chen shengfei was having a great time eating. Qin Lin, your food is still the best. You have no idea what kind of garbage I've been eating during the reform of the group. The taste is so different from your herbal dishes. Why is it that some of the food here is so delicious while some are so bad? "

Qin Lin could only smile when he heard this.

How could this be explained? One had a system, while the other didn't.

If you tell the cheat this, will the cheat answer you?

After Qin Lin had entertained Chen shengfei, he returned to the workshop in the inner area the next day and started working again.

With the gene extraction from the Brachiosaurus 'skeleton, Qin Lin was even more satisfied with his work this time. It did not take long for him to finish his research on the ancient sacchara dragon's skeleton. He could now perform the gene extraction.

However, compared to the Brachiosaurus, the ancient saicha dragon's gene extraction process was much more complicated. It took him a full week to extract the ancient saicha dragon's gene.

He immediately used the Jade of truth's effect to check the remarks of these genes.

[saichalong gene: special!]

[this is a special gene extracted from a piece of saicha dragon's skeleton. If you use this gene for research, you'll be able to discover a structure that will shock the world!]

Seeing the note, Qin Lin knew that he had successfully extracted it again.

He immediately placed the saichalong gene into the laboratory box and brought it to Linlin's laboratory.

The animal Genetics experts were still excited about the Brachiosaurus gene. He wondered what kind of expressions they would have when they found out that there was another type of saicha Dragon gene.
