

## The Game 1781

### [Chapter 1781 The Third Fruit Of Power!](#)

He directly used the flying stone to head to the front of Mount Goddesses and arrived in front of the damp forest where Elba had appeared.

As soon as he arrived, he heard the sound of laughter and laughter in the forest.

He knew Elba was definitely inside.

This time, he didn't miss.

Qin Lin saw Elba in the damp forest. Other than her, there were many other gnomes playing with Transformers. There were also many Da Bai accompanying them.

Apparently, after the videos he brought in were made into toys by Elba's father, these things quickly spread among the goblins. As the earliest owner of these toys, Elba would definitely have many friends around him.

This was actually a very simple question. When a person had nothing, he would be alone around him. However, when he suddenly became rich and had all kinds of entertainment, naturally, many people would slowly gather around him.

Sometimes, even if it was just renting an office to make tea, many people would go to your office every day to make tea.

"Friend, you're here again. I'm really happy to see you!" Elba soon saw Qin Lin and even pulled Qin Lin to the side mysteriously.

When Qin Lin saw Elba's expression, he knew that something must have happened to the gnome. He asked, "Elba, say what you have to say."

Elba's thoughts were seen through, and he immediately said awkwardly, "Friend, can I ask you for something? It's very important!"

"Elba, tell me, what's the matter?" Qin Lin asked with a smile.

Elba immediately explained, " Friend, can you help me make some interesting videos? I'll show them to my father and ask him to make them for me. I want them to be unique! "

" Now, things like Big White and Transformers are not exclusive to me. Everyone in the clan knows them, especially Gilda's father. He's very rich. He made more Big White and Transformers than me and even gave them to others. "

"Now everyone else is better than Gilda."

Qin Lin could not help but laugh when he heard this. This was obviously a farce between children.

Moreover, Elba was clearly jealous because of this.

After thinking it through, Qin Lin teased, " Elba, wait for me. I want to go and take a look. "

This saved him a lot of effort. Otherwise, he would still be thinking about how to give the video to Elba and then fool him.

He did not expect Elba to deliver himself to his doorstep again.

Qin Lin made an excuse to leave and returned to his office to wait for some time. He wanted to make Elbado anxious.

After all, Elba had taken the initiative to beg him.

However, he did not let Elba wait for too long. He entered the game with another thought and found Elba again.

"Friend, how is it?" Elba looked at Qin Lin expectantly.

Qin Lin also smiled and handed the tablet in his hand to Elba. "Look at these two videos!"

Elba eagerly took the tablet and clicked on the video.

In an instant, Marvel's movie clips appeared in Elba's eyes.

The image of the falcon flying in the air instantly appeared. That cool pair of wings, as well as that elegant flying posture, made Elba excited.

"This thing is good. Let daddy make it." Elba immediately shouted excitedly.

Gnomes obviously had a dream of flying.

Falcon's video was soon finished, and then Iron Man's video appeared.

At the beginning of the video, Tony pressed a button on his body, and then pieces of red armor flew over quickly and assembled on Tony's body.

In the end, a red steel armor was put on Tony.

In an instant, Tony controlled the steel armor to fly up, flying and darting around the city.

This scene stunned the Gnome. "Alright ... So powerful...Alright. So cool..."

"Friend, thank you. I like it so much. I want Dad to make both of these things so that others can only wear the wings and I can wear the steel armor myself!"

Qin Lin laughed when he heard this.

He really had the temperament of a child. He just had to be better than his other companions, right?

As Elba spoke, he ran inside. He did not forget to turn around and shout at Qin Lin, "Friend, don't worry. After Dad makes these two things, I'll share them with you. I'll steal the technical information for you."

With Elba's promise, Qin Lin was also relieved. Elba's credibility was really unquestionable.

Then, he logged out of the game and returned to his office.

Now that the Batmobile was out, wouldn't it be a little too much to add the Falcon and Iron Man?

He was afraid that a certain country would be angered to death.

While Qin Lin was thinking about it, a video quietly spread on the Internet in various countries in the West.

This was especially so in a certain country. Once the video was spread, it immediately exploded and countless people saw it.

" Maybe you don't believe it, but there really is a batman in this world. We saw batman. It's true. He destroyed an entire army..."

Obviously, this was taken by some Jianghu person in Dara Town and then spread.

After all, not only were ordinary people gossipy and liked to show off, but so were the people in the martial world.

This video was of Qin Lin and the others testing the Batmobile.

The terrifying scene displayed by the Batmobile in the video shocked countless people who saw it.

The netizens from Beauty Nation were even more stunned.

" Oh my god, there's really a batman. He's really batman. "

" Only Batman can be so powerful. That Batmobile doesn't exist in reality. "

" Haha, our country really has a superhero. He must be smaller than our country's Batmobile!! "

".."

For a time, the entire Beauty Nation was in an uproar.

Who would have thought that such a thing would happen?

He thought that the story of the movie and the comic book was about the existence of the batman. Who knew that the batman really existed?

If that wasn't the case, why was he wearing that combat uniform and driving the Batmobile?

That's right. If there was no batman, then where did the author of the comic get the inspiration to draw batman?

He must have seen the real batman.

Unfortunately, the author of the movie was dead, so there was no way to ask.

Soon, someone thought of a question. Could the batman of that era still be alive in the modern world?

That's right, batman is a superhero. Maybe there's a way to extend his life, or maybe he's the successor of batman.

Countless people in the Beauty Nation thought so.

They even gathered together in an organized manner and began to march. They held up banners with only one sentence on them:

"We need Batman!"

This trend was getting more and more intense.

In the Research Strategy Department, when Jiayis saw the video, her expression turned ugly.

According to the information she had gathered, that was not their batman at all.

The Batmobile's hover technology and the eastern country's hover car technology.

With just a glance, he could tell the key.

No other country had developed hover car technology. Only that country had it.

However, the Batmobile was not a simple hover car. She did not dare to imagine the terrifying scene.

She just couldn't understand why the people from the eastern country would create such a batman.

Was this disgusting?

Otherwise, why would they choose to be with Batman when there were so many things they could do?

She felt a headache when she saw the news about the marching team that wanted to be the batman.

How were they supposed to tell the countless people that they didn't own him?

There was no way to explain it.

Wasn't he playing with people?

Qin Lin did not care about this at all.

After the Batmobile experiment, he stopped paying attention to this matter. He didn't care about how the Batmobile would be used in the future.

If he really wanted to experience the hover car, he could just enter the game to experience it. There was one in every game, and there were no restrictions on flying in the ore town.

In the office, Qin Lin was looking at the game screen as usual. Just as he was about to do his daily mission, he suddenly saw Mayor Thomas appear at the entrance of the ranch.

[I'm so happy to see you. There's a Hercules competition in our town. Do you want to participate? The winner will be rewarded with a fruit of the Tree of Strength found in the town from the Goddess Mountain!]

Fruit of the Tree of Strength.

The third one?

[Chapter 1782 How Can This Be Explain With Science?](#)

Qin Lin looked at the game screen in surprise.

After all, he didn't feel anything when he got more.

Whether it was those Special Items or those techniques, the more he obtained them, the calmer his mind became.

Instead, it was the fruit of the Tree of Strength that made him look forward to it even more.

Compared to those external objects, this thing could increase his physique.

A person's health and physique were stronger than anything else.

Thinking about it, just two fruits from the Tree of Strength had made his physical fitness much stronger than those special forces soldiers who had used body-enhancing potions.

Ma Hong was the strongest person who had used the body strengthening potion.

With the help of the gravity room, he had also broken through the limits of his body.

However, the other party was still easily killed by him.

This was the difference.

What would happen if he got another fruit from the Tree of Strength?

Moreover, there were 15 fruits of the Tree of Strength in the game.

What would happen if he obtained all 15 fruits of the Tree of Strength?

Superman?

One-punch Superman?

Slayer Tyrant?

For some reason, Qin Lin was looking forward to it.

He immediately clicked on Thomas at the entrance of the ranch and accepted the mission.

"With you joining, this event will be even more exciting," Thomas added immediately.

After accepting the mission, a special instruction appeared.

The direction pointed to the central square of Ore Town.

He controlled the game character Tea to the central square of Ore Town. Soon, he arrived at the central square.

This place was indeed packed with people.

There were also many NPCs that had never appeared before.

Naturally, these NPCs were also very strong. They were originally here to participate in the competition, but the game screen had been turned into reality, so these NPCs were also very real.

If I were in the modern world, I would be able to crush those so-called bodybuilding champions with their muscles.

Qin Lin controlled the game character to Thomas's side and clicked on the mission. Then, there was a prompt to start the mission and get ready.

Finally, the game character entered the central square.

Beside him were a few burly men, and the game characters were the same as them. They all had a number tag on them, which was the order of the competition.

The following match was a test of hand speed and reaction speed.

However, because the game was in his mind, he could just read it out loud. In other words, the outcome of the competition was already decided. It was not difficult for him at all.

Therefore, after the competition began, these strong men were all eliminated by him one by one.

He also naturally won the championship.

Thomas was the first to arrive in front of him. "" Ah, you're amazing. I knew I would invite you to participate in the competition. You'll definitely win the championship. This is the championship gift you deserve. "

[Congratulations on obtaining a fruit from the Tree of Strength.]

After Qin Lin received the notification, he entered the game with a thought and saw the fruit of the Tree of Strength.

[Fruit of the Tree of Strength: Mysterious!]

[Rumor has it that it's a fruit borne by a strange tree on Mount Goddess. This tree was a seed left behind by the goddess and was carefully taken care of by the dwarves. Later, for some reason, the tree disappeared, and the fruits on the tree were scattered around Mount Goddess. If anyone can obtain the fruit, they can increase their physical fitness after eating it.]

Qin Lin saw the fruit of the Tree of Strength. The note was the same as before.

It also decisively consumed the fruit of the Tree of Strength. It was still as sweet as a white sweet potato.

However, after consuming the fruit of the Tree of Strength, he had a wonderful feeling. It was as if all the muscles in his body were being washed by a wave of energy, as if his cells had become very active.

He had eaten two fruits of the Tree of Strength before and had experienced this feeling before.

But this time, it was unusually strong. There was even a warm current flowing through his body until it gathered in one part of his body.

This feeling was even more wonderful.

Moreover, after the warm current gathered in that part of his body, it actually stopped, as if it had taken root.

As the warm current entered, there was actually a slight stinging sensation. However, after the stinging sensation, there was a very comfortable and wonderful feeling. It felt as if his body was strengthening bit by bit, becoming stronger and stronger.

The feeling of increasing strength was unusually clear.

This was the first time he had felt this way.

Qin Lin's eyes lit up.

He thought of something.

This feeling lasted for a long time.

He even felt that the warm current that would gather in that part of his body was already like an ocean.

His body was obviously only that big, and it was impossible for him to be the size of an ocean. However, that feeling was very wonderful and indescribable.

He could even clearly feel that warm current, but there was one thing that he could not touch or control.

"What exactly is this thing?" As Qin Lin thought of this, he thought of many martial arts scenes in movies.

When those people in the movies cultivated, didn't they gather their internal energy and true energy in their dantian?

"If that's the case." Qin Lin muttered. The next moment, his message was still there, but he suddenly appeared in the office.

As soon as he left the office, he went online to search for information.

#### [Chapter 1783 How Can This Be Explain With Science?](#)

They were all information about internal force cultivation.

He even started to try out the information one by one.

Unfortunately, he couldn't understand it at all. He didn't know how to operate it, let alone control the warm current.

This undoubtedly meant that the information was wrong, or he had misunderstood it.

Thinking about it, he went to find a human acupuncture point structure diagram.

He made a comparison and was surprised to find that the warm current was located in the dantian.

Therefore, to a large extent, his guess was correct.

However, the information he found online was all wrong.

Thinking of this, Qin Lin continued to investigate on the internet. He went to an official metaphysics website to investigate.

The officials had once vigorously promoted Qigong.

However, it was later proven that qigong was nonsense, so it was abandoned.

However, if a country would vigorously promote this thing, it must have entered the attention of the higher-ups before.

There was a reason for that.

Perhaps there were some wonderful things about it, but it was difficult to put them into practice.

Therefore, they had found many cultivation techniques related to Qigong and even posted them on the Internet.

Qin Lin found the cultivation methods of these qigong and then began to try one.

Unfortunately, these official Qigong cultivation methods still had no effect.

That was until he cultivated a cultivation technique called the "Tai Chi Category General Instruction."

This was obviously a cultivation technique related to Taiji.

Tai Chi was considered very awkward in China.

In the movies, Taiji was praised as a godly skill, but in reality, Taiji was like a dance.

Martial arts turned into dance from this Tai Chi

This time, he cultivated according to the Taiji technique. It was not a mental cultivation technique, but a Taiji call in the Taiji Superclass, combined with a special breathing technique.

Something shocking happened.

As he performed this Taiji technique, he could clearly feel the warm current in his dantian being affected a little.

This made him happy.

In other words, this was possible?

As he thought about it, Qin Lin familiarized himself with the Tai Chi moves. Then, he left the office. He couldn't use it at all here, so he went to the sports field.

Qin Lin went outside. Under the greetings of the waiters, he went to the sports field filled with special dog grass. Then, he began to perform the Tai Chi moves and the breathing technique.

This scene made the waiters and Academician Chu who were passing by a little confused. They didn't understand when he started practicing Taiji Fist.

"Isn't it a little strange? Academician Qin was practicing Tai Chi." Academician Chu asked Academician Zhu, who was beside him, in confusion.

Academician Zhu also felt that something was wrong.

Taiji Fist was supposed to be soft, but when Academician Qin performed it, although it looked soft, it didn't feel soft at all.

This was very strange.

Qin Lin himself could feel that as he performed Tai Chi and breathed, the warm current in his body was mobilized and flowed into every part of his body.

As the warm current flowed in, he could clearly feel that the area around him had become stronger.

Moreover, with just a light dance of his arms, there was actually a kind of air explosion.

Can you believe this?

When he had two fruits from the Tree of Strength, he felt that he could kill a cow with one punch. His current strength could not be described with normal words.

Minister Lu walked in from outside the manor and came to Academician Chu's side. He asked curiously, "What are you looking at?"

"He's watching Academician Qin practice Tai Chi," Academician Chu pointed at Qin Lin.

"Tai Chi?" Minister Lu was confused. Although Boss Qin was unreliable and always made a fuss, he had done something before.

What the hell was this Taiji cultivation?

Beast taming, cooking, horse riding ...

Why are you practicing martial arts now?

It couldn't be that Boss Qin could practice real martial arts, right?

That shouldn't be possible. It would be a joke if that were the case.

Minister Lu thought about it and walked towards Qin Lin.

However, when he got close to Qin Lin, he suddenly froze on the spot. His face was filled with disbelief because he saw an unbelievable scene around Boss Qin.

The dog tooth grass around Boss Qin seemed to be affected by some force, and it was actually pushed and swayed irregularly.

There should be no wind now.

Qin Lin didn't pay attention to Minister Lu. He had been feeling the warm current in his body. As he continued to practice Tai Chi, it was obvious that the warm current was being guided deeper and deeper. It was as if he himself had a feeling, a feeling that he was proficient in it.

He even found that he could slowly control the warm current.

This was a surprising discovery.

In other words, the warm current in his body was similar to internal energy and true qi.

Moreover, as he was able to control the warm current a little, the scene that was like a vast ocean seemed to be a little turbulent.

At the same time, he also felt his body become much stronger, and an increasingly stronger airflow appeared around him.

It was as if the air current was changing as he moved his Tai Chi, swirling in all directions.

Finally, Qin Lin stopped.

He had a feeling.

However, in order to control the power of the fruit, he needed to practice Tai Chi slowly. Slowly, he would be able to control the power of the fruit.

However, Qin Lin was suddenly a little stunned. The situation was not right. Why did it change to the rhythm of martial arts?

In other words, the Qigong cultivation method that the officials had previously released was acceptable.

However, why was it that no one had managed to cultivate the popular Qigong?

That was a problem.

If there was no problem with the cultivation technique, then was there a problem with the person?

"Hey, Minister Lu!" When Qin Lin came back to his senses, he also saw Minister Lu. When did he arrive? Minister Lu looked around Qin Lin in shock, because the dog tooth grass there had already fallen to the ground, and a Tai Chi pattern had obviously appeared.

Was this a f \* cking joke?

Was Boss Qin sure that he wasn't filming a movie?

Although the Batmobile, Da Bai, and Transformers were all shocking, they were almost all scenes from movies.

However, these were all sci-fi products after all, so the shock was still a little lacking.

After all, those could be explained by technology.

But how could he explain this scene with technology?

Qin Lin asked curiously, " Minister Lu, why are you here? What orders do you have this time? "

Minister Lu came back to his senses and said, " Boss Qin, I'm here to give you something. It's specially given to you by the higher-ups. "

Minister Lu took out a medal and a certificate and handed it to Qin Lin.

"What is this?" Qin Lin asked curiously.

Minister Lu immediately explained, " Mr. Qin, this is a special medal for scientific research. It's specially awarded to you. In our country, there are only five people who have received this medal! "

The higher-ups didn't know how to reward Boss Qin, so they could only give him this medal.

To be precise, this medal couldn't express Boss Qin's contribution.

However, this was all the higher-ups could do.

Qin Lin was a little surprised when he heard this because he knew that one of the people who received this medal was the senior who controlled the two strategic weapons.

It could be said that in China, being able to receive this medal was definitely the highest honor in scientific research.

"Boss Qin, were you practicing martial arts just now?" Minister Lu finally couldn't help but ask.

Qin Lin did not hide anything and nodded. ""I guess so!"

"Ah?" "Then what did you cultivate to?" Minister Lu asked hurriedly. You can really practice martial arts?"

When he said this, he was obviously looking forward to it. The scene of Boss Qin's cultivation just now was obviously not simple!

"I cultivate Taiji!" "Yes, it's the Qigong and Taiji that you guys released!" Qin Lin said again.

After saying that, he walked out of the manor. He also wanted to see how much he could withstand in the gravity room after taking the third fruit of the Tree of Strength.

"What?" Minister Lu was stunned.

#### [Chapter 1784 Illusion!](#)

(Minister Lu didn't allow me to write Mr. Lu!)

..

Qin Lin had already walked out of the sports field.

He planned to go to the gravity room to experience his current physical condition.

Seeing this, Mr Lu immediately followed.

He still had a lot of things to ask Boss Qin!

After Qin Lin arrived at the hall, he directly entered the gravity room.

After the gravity room was developed, Jinglin's laboratory had specially assembled a gravity room for the manor.

This gravity room was usually used by Mahone and the others.

When Qin Lin came in, Ma Hong was also using the gravity room.

Ma Hong was the first to break through the limits of the human body.

Moreover, he had only broken through under the pressure of the gravity room.

Therefore, the others followed suit and wanted to break through the limits of the human body under the pressure of the gravity room.

However, no one had succeeded until now.

Mahone was the only one who succeeded.

When Lin Qin and Mr Lu came in, Ma Hong and his men stopped and greeted them.

Qin Lin also looked at a screen on the wall of the gravity room.

It showed 30 degrees of gravity.

When the gravity room was first developed, they had already tested it.

Under normal circumstances, normal people, especially those who had not trained, could not even withstand five degrees of gravity.

A normal person who had gone through some training might be able to reach the level of five degrees of power, which was the legendary combat five slags.

Those elite special forces soldiers who had taken the body strengthening potion could withstand a gravity of about 30 degrees.

For example, after breaking through the limits of his body, Ma Hong could withstand up to 40 degrees of gravity.

Qin Lin came in and said to Ma Hong and the others, ""Captain Ma, I need to use the gravity room now. Please leave for a while."

Mahone led his men out of the gravity room.

They knew very well that the gravity in the gravity room was not something they could withstand.

When Ma Hong and the others exited the gravity room, they went to a room outside.

There was a device here that could control the gravity room.

Mr Lu followed him in and watched as Mahone started operating the equipment.

"How much do you want?" Ma Hong asked.

" Set the gravity to 60 degrees first. " Qin Lin said.

He had thought about this carefully.

When he had consumed the two fruits of the Tree of Strength, his physique had already been able to withstand 50 degrees of gravity.

Now, with the addition of a fruit from the Tree of Strength, he could easily withstand the 50 degrees of gravity.

The gravity began to increase and soon reached 60 degrees. However, he did not feel any discomfort under this gravity and easily endured it.

In other words, the power of the three fruits of the Tree of Strength allowed him to easily withstand this degree of gravity without any pressure.

When Ma Hong and the others saw this, they couldn't help but look incredulous.

One had to know that they could only withstand 30 degrees of gravity at most.

Even someone like Mahone, who had broken through the limits of the human body, could only withstand 40 degrees of gravity.

However, Director Qin could easily withstand 60 degrees of gravity. The difference was too great.

"Continue to increase the gravity." Qin Lin didn't feel any pressure at all and immediately said to Ma Hong and the others.

Outside.

When Ma Hong received the notification, he immediately adjusted the equipment to increase the gravity.

61、62、63、64.. 80..

"Chairman Qin, is that enough?" Ma Hong asked worriedly.

After breaking through his limit once, he could only withstand a maximum of 42 degrees of gravity.

He would not be able to withstand any higher gravity.

Now that he saw that Chairman Qin could withstand 80 degrees of gravity, his jaw dropped in shock.

How strong was Director Qin's physical fitness?

"Continue." Qin Lin said calmly in the gravity room.

The 80-degree gravity still did not give him too much pressure.

When Ma Hong and the others heard this, they were completely shocked.

Even though Mr Lu had never experienced this degree of gravity, he knew how unbelievable it was.

After breaking through the limits of the human body, Ma Hong could be said to be a monster.

Now, Boss Qin had completely surpassed the category of a monster, right?

Soon, Mahone continued to operate and increase the gravity in the gravity room.

The gravity soon reached 90 degrees.

However, when the gravity reached 90 degrees, there was still no way for him to feel any pressure.

He could only order Mahone to keep increasing the gravity. When he couldn't take it anymore, he would activate the protective gear.

Mahone could only do as he was told.

In an instant, the gravity in the gravity room began to increase rapidly.

91、92、93.. 94、95.. 100..

Qin Lin finally felt some pressure when he reached 100.

Mahone's jaw dropped as he looked at the data on the device.

Because of this gravity, all kinds of data in Chairman Qin's body began to fluctuate.

The key was that the fluctuation of the number was not very large. It was still within Chairman Qin's tolerance range and did not cause too much of a fluctuation.

In other words, Director Qin could still withstand such gravity.

101、102、103.. 110..

At this point, Ma Hong finally saw a violent fluctuation in Chairman Qin's body data. All kinds of numbers were beginning to lean towards red.

#### [Chapter 1785 Illusion!](#)

In other words, this was already Chairman Qin's limit.

For some reason, Mahone suddenly heaved a sigh of relief.

After all, Qin Lin's physical fitness was already so terrifying. If this continued, his confidence would be hit.

After all, how could he possibly catch up to Chairman Qin with such a gap?

Even if he had already broken through the limits of the human body once.

In the gravity room, Qin Lin also felt a huge pressure.

This pressure made him feel a little breathless.

He knew that this was his limit.

In the next moment, he began to move. He began to perform the Taiji moves according to the Taiji Superclass. One Taiji move after another was executed by him.

This scene stunned Ma Hong and the others. Why was Mr. Qin practicing Tai Chi all of a sudden?

Moreover, he could still practice Tai Chi under such gravity?

One had to know that the gravity was still increasing.

But suddenly, Ma Hong was stunned. He looked at Lu Feng's actions and suddenly said, "Taiji Superclass?"

When Mr Lu heard this, he was stunned for a moment and asked, "Captain Ma, you know about this?"

Ma Hong nodded. " I've dealt with cases like this before. It's related to Qigong. I've seen some Qigong cultivation techniques that the officials once released. I think one of them is the one Chairman Qin is using now. "

"But this cultivation technique is a lie...But Chairman Qin used it..."

Mahone suddenly felt that something was wrong.

Because Chairman Qin was using it.

If it was fake, would Director Qin still use it?

Just as he was thinking about it, a security guard beside him shouted in surprise, "Captain Ma, look at Chairman Qin's numbers." Mahone immediately looked at the numbers and was shocked. ""How is that possible?"

"Captain Ma, what's wrong?" Mr Lu asked curiously.

" Mr. Lu, " Ma Hong said in disbelief, " Mr. Qin was in the gravity room just now. He was at his limit, but suddenly, his body data started to get stronger again. "

"Moreover, the data has quickly entered the safe zone. In other words, Chairman Qin can continue to withstand stronger gravity."

When Mr Lu heard this, he also reacted. "Is it because of that Tai Chi?"

He had already felt that it was not simple. After all, Chairman Qin had performed Tai Chi on the sports field. In the area around him, the dog tooth grass had appeared in a regular pattern.

In other words, the Taiji technique had a special effect?

At this moment, the gravity in the gravity room was still increasing rapidly.

135、136、137.. 140、145.. 150^

Finally, when it reached 150, Qin Lin could not take it anymore.

However, when he saw this value, he was shocked.

One had to know that the previous two pills could only withstand a gravity of more than 50 degrees.

Now that he had taken the third pill, he had actually increased by more than 100 points.

This ratio seemed a little off.

Unless, after consuming the third fruit of the Tree of Strength, his physical fitness had a qualitative breakthrough.

After all, when the third fruit of the Tree of Strength strengthened his physique, the feeling in his body was even stronger.

Finally, Qin Lin stopped performing Tai Chi and pressed down on the protective device on his chest.

At that moment, the gravity on his body disappeared and returned to normal.

Ma Hong looked at the gravity data, his face full of shock.

Under such gravity, even if he stayed inside, his internal organs would explode and he would die.

Qin Lin could actually withstand this kind of gravity?

"This is unbelievable." Mahone muttered to himself.

Qin Lin knew that he had reached his limit and left the gravity room.

He was naturally in a very good mood.

After all, only normal people could withstand a gravity of 5.

However, he could withstand 150 degrees of gravity.

The difference was 30 times.

It was not that his physique was 30 times that of an ordinary person. After all, the increase in physique was not calculated in this way.

However, this could also prove how powerful this physique was.

Qin Lin left the gravity room and greeted Ma Hong and Mr Lu.

However, after he left, it took Mahone and Mr Lu a long time to react.

Ma Hong left in a hurry and went back to his place. He remembered that he could find the Tai Chi Superclass on the Internet. He wanted to try it.

Mr Lu did not hesitate and immediately took out his phone to contact the leader.

When the leader received a call from Mr Lu, he was used to asking, "What's the situation with Boss Qin?"

"Boss, Boss Qin has started practicing martial arts again today," explained Mr. Lu immediately.

"Martial arts? What the hell?" The leader was stunned.

"He practices Tai Chi," Mr Lu said. "And when he practices Tai Chi, he can stay safe and sound in an environment with a gravity of 150 degrees!"

"What?" The leader exclaimed.

After the gravity room was developed, the planet modification technology had been perfected. The materials needed for the technology had been transported to the asteroid.

Moreover, the realization of the gravity room could be used in many ways.

However, the gravity room was currently only used for physical training and soldier training.

However, they also knew the basic situation of the gravity room.

For example, a person who had undergone basic training could only withstand 5 degrees of gravity.

Now, Mr. Qin could actually withstand 150 degrees of gravity.

This was definitely abnormal.

The key was that even using body strengthening liquid couldn't have such an effect, right?

"What's so special about Taiji?" The leader asked.

"I think they said we posted it online!" Mr. Lu replied.

"Could it be those? How is this possible?" The leader suddenly thought of something.

Mr Lu naturally knew what it meant.

A moment later, he hurriedly went online to search and found the Taiji Superclass.

He looked at the pictures on the Internet and thought about it. The starting stance was exactly the same as Boss Qin's.

This should be it.

He immediately went to find Ma Hong.

Mahone was also looking for Mr Lu and said, ""Mr. Lu, take a look at this Taiji Superclass. This should be what Boss Qin is practicing."

Seeing that he was thinking the same thing as Mahone, Mr Lu immediately nodded and instructed, ""Ma Hong, take them to practice the Superclass of Taiji and see if it works."

Ma Hong nodded and gathered his men to practice Tai Chi.

The few days that he remembered.

Ma Hong and the others spent almost 10 hours on Tai Chi. Other than the time they spent on shifts, they spent most of their time on cultivation.

The 'security guards' naturally knew that this was the kind of training that Chairman Qin was practicing, so they were also practicing very seriously.

Unfortunately, after a few days, they did not feel that the Taiji Superclass was of any use. It was absolutely useless for them to do more entertainment and exercise.

When Mr Lu asked, these people also replied,

" Mr Lu, we've been practicing, but we didn't feel anything special!! "

"I don't think it has anything to do with Taiji!"

" That's right. Chairman Qin's body is so strong. It shouldn't be related to Tai Chi! "

When Mr Lu heard this, he could not help but feel a little disappointed. He asked, "Where's Captain Ma?"

"He's in the gravity room!" One of them answered.

Mr Lu walked towards the gravity room and soon saw Mahone.

At this moment, in the gravity room, Ma Hong's brows were tightly furrowed as he frantically cast the Taiji Superclass.

It had been a few days, and he felt that it was impossible for it to be related to Taiji.

After all, he didn't have any special circumstances.

He practiced for 10 hours every day. If there were any special circumstances, they should have been reflected long ago.

However, just as he was thinking about this, he suddenly froze. He felt an almost imperceptible warmth in his body.

"Is it an illusion?" Mahone muttered to himself.

Qinglin Manor, inner area.

Qin Lin walked out of the internal workshop. He did not have any special experiments today, but he had learned so much knowledge from the mysterious slate book. He had to use it occasionally and experiment.

Today, he did some basic experiments.

The moment he stepped out of the studio, he saw Little Qin Feng playing with Da Bai.

This Great White was no ordinary Great White. It was a Great White that had been installed with a real artificial intelligence, even though it was a goblin runic system.

Qin Lin was about to greet his son when he raised his hand and suddenly looked at the scene in front of him in shock.

Little Qin Feng carried Da Bai and disappeared from his sight.

[Chapter 1786 Little Qin Feng's Factory Section!](#)

Qin Lin's eyes widened in shock as he watched little Qin Feng and Da Bai disappear.

This ...

He was shocked, alright?

The horse walked to the spot where little Qin Feng and Da Bai had disappeared, but there was nothing unusual.

This scene was very familiar to him. It was as if he had entered the game and disappeared on the spot.

At the same time, he also thought of something. Little Qin Feng's body seemed to have obtained the factory section of his " Ranch Monogatari ".

Therefore, he had no choice but to open the factory section.

Could it be that little Qin Feng could also enter the factory section?

This was the only possibility he could think of.

He immediately waited on the spot.

If little Qin Feng entered the factory section, he would definitely come out again. At that time, he would be the first to notice.

Qin Lin waited for a while, and sure enough, he saw little Qin Feng and Da Bai suddenly appear at the same spot again. The key was that little Qin Feng was still dirty, and he was holding a wrench with engine oil in his hand.

Seeing this scene, how could Qin Lin not understand?

Little Qin Feng could really enter the factory section of the game.

This made him f \* cking distressed.

After all, little Qin Feng was still young. If he were to do this in front of outsiders, it would be a little troublesome.

"Dad, look, I brought it out from that strange place!" Little Qin Feng even took the wrench and shook it in front of him.

Qin Lin took the wrench and immediately checked it with the Jade of Truth. He immediately saw the note:

[Banshou: Grade 1!]

[This is a wrench that has been dipped in engine oil. It has a special effect when used:Support +1, Effect +1!]

Qin Lin looked at this wrench and suddenly felt that the factory section that Little Qin Feng had obtained seemed to be quite impressive.

When he got the farm, the watermelon he planted had a quality of 1. In this factory section, did the wrench also have a quality of 1?

What if it was a sword, a gun, or a rocket launcher? What if it was a +3?

Unfortunately, he had no way to enter the factory section and had no idea what was going on inside.

With that thought, Qin Lin turned to look at Da Bai. Perhaps he wanted to get some ideas from Da Bai.

After all, the Great White in his house was different from the Great White that faced society outside. His Great White had real artificial intelligence.

They could talk normally, communicate normally, and even think!

"Da Bai!" Qin Lin immediately called Da Bai over.

"Sir, what can I do for you?" Da Bai immediately walked up to Qin Lin and asked.

"Da Bai, where did Little Qin Feng take you?" asked Qin Lin.

"Sir, " Da Bai immediately replied. " There's a factory there, and there's a very strange old man there! "

When Qin Lin heard this, he thought to himself that it was true.

As for the old man, he might be an NPC like Thomas, the mayor.

At this thought, Qin Lin instructed Da Bai, "" Da Bai, I'll give you a camera later. Next time little Qin Feng brings you in, turn on the camera and record it! "

"Yes, sir!" Da Bai immediately agreed.

Then, Qin Lin saw little Qin Feng and asked, ""Little Qin Feng, was it fun to enter that place just now?"

There were more important matters at hand.

He had to solve the problem of little Qin Feng entering the factory.

Otherwise, there would definitely be trouble.

When little Qin Feng heard his father's words, he immediately replied, ""It's not fun, but I promised that grandpa!"

Qin Lin did not know what was going on with Little Qin Feng's factory section, so he could only remind him, "" Little Qin Feng, you can go in there, but you can't go in in front of others. You have to sneak into your own room and lock the door. Otherwise, you can't even go in front of Mom and Grandma. "

"Why?" Little Qin Feng asked curiously.

Qin Lin didn't know how to answer. He could only scare her, ""Because if you don't do this, Mommy will sign you up for tutoring. Ten tutoring classes a day!"

" ? ? ? ? "Little Qin Feng looked on in shock as if he was thinking about something. Then, he nodded thoughtfully at Qin Lin."Daddy, I know."

Qin Lin wasn't at ease, so he instructed Da Bai, "" Da Bai, remember to remind little Qin Feng that if he enters that place from the outside, you'll be considered incompetent, and I'll tear you apart! "

Clearly, he was threatening Da Bai.

"Yes, sir!" Da Bai actually replied.

Although it was an artificial intelligence with high intelligence, it clearly had no emotions. Faced with such a threat, it did not know fear at all.

However, little Qin Feng panicked when he heard his words. He was so frightened that he panicked."Daddy, don't open Da Bai, don't open it!"

Qin Lin smiled when he saw this. " Then you have to be good and listen to me. You can only go there in the room and lock it from the inside. Otherwise, I'll tear apart Great White!! "

Obviously, this threat was more effective than tutoring.

This was good.

Little Qin Feng was so threatened that he couldn't help but nod.

Then, Qin Lin took out a camera and handed it to Da Bai.

After Da Bai took the camera, he could only wait for Little Qin Feng to bring Da Bai to the game factory section again.

He didn't have to wait for long. The next day, he saw little Qin Feng sneakily glance at Zhao Moqing and Lin Fen before taking Da Bai to his room.

Little Qin Feng matured earlier than most children. Even though he had not started kindergarten yet, he still dared to sleep alone.

Some children, even if they were in primary school or seven or eight years old, still did not dare to sleep alone. They needed their parents to accompany them.

#### [Chapter 1787 Little Qin Feng's Factory Section!](#)

Generally speaking, this kind of 7-or 8-year-old child did not dare to sleep on his own. It was either because of his personality, the burden was small, or he had a personality defect.

If he didn't change this situation, he would get used to it in the long run. His personality would be fixed. If he didn't know how to change it, or if he wasn't stimulated by anything, his personality would be a weakness for the rest of his life.

After little Qin Feng entered the room, Qin Lin also went to his door. He tried to open the door and realized that this little guy knew how to close the door.

This was good.

A child worth teaching.

Qin Lin did not do anything else and waited for little Qin Feng in the hall.

About two hours later, Qin Feng came out of the room with a wrench in his hand.

"Dad, this is for you. Little Qin Feng handed the screwdriver to Qin Lin.

After Qin Lin took the screwdriver, he also saw the note on the screwdriver:

"Screwdriver: Grade 1"

[This is a good screw driver. After using it, there are special effects:Endurance +1, Effect +1~]

Qin Lin was stunned when he saw the attributes of the screwdriver. Previously, it was a wrench, and now it was a screwdriver. Was it going to be a factory set?

Then, he could bring this set into the factory and screw it without getting tired.

If there was such a set of tools that could be mass-produced, the capitalists would definitely cheer.

Qin Lin and little Qin Feng learned about the factory section, but little Qin Feng didn't describe it very clearly.

" Where's the video I asked you to take? " he asked.

Da Bai nodded and passed the camera to Qin Lin.

Qin Lin took the camera and turned it on.

A sci-fi factory appeared in front of them.

After Qin Feng entered the factory, he ran to an office.

After he arrived, there were even security guards protecting him carefully.

Qin Lin did not expect his son to receive such treatment.

This was much better than when he entered the ranch.

Soon, little Qin Feng entered an office in the building.

In the office, an old man was sitting on an office chair. When he saw little Qin Feng, he shouted enthusiastically, "My dear grandnephew, you're here again. I have another task for you today, and that is to screw the screw."

As he spoke, the old man took out a screwdriver and handed it to little Qin Feng.

When Qin Lin saw this scene, he could not help but want to complain.

So that was how the screw driver came about.

Who was this old man? He actually asked his son to screw a screw.

Grandnephew?

Little Qin Feng must have replaced the game character. Originally, the factory section did not go to Little Qin Feng. This old home and should be called grandnephew was him, right?

This felt like the hierarchy was suddenly a little chaotic.

Also, what was a grandnephew?

Qin Lin was then attracted by the game screen.

He saw Qin Feng pointing at the void with a screwdriver.

Seeing this scene, he naturally knew what it was.

Little Qin Feng must have chosen something that no one else could see.

It was just that this little guy's operation was a little difficult to describe in a few words. After all, he could do it with just a thought, but this little guy still had to randomly point his fingers.

After ordering, little Qin Feng excitedly took the screwdriver to the side.

There were actually rows of screw plates there. He really let little Qin Feng screw the screw.

His son wouldn't be so stupid as to twist it, would he?

As expected, when little Qin Feng arrived in front of the screw board, he actually started to screw it happily as if he was playing a game. He was even very happy.

However, he suspected that this old man was using child labor. With so many screws, wouldn't it tire little Qin Feng out?

Indeed, not long after, little Qin Feng was obviously tired and wanted to rest.

However, at this moment, the old man actually brought a cup of water and handed it to little Qin Feng.

The key point was that after Little Qin Feng drank this cup of water, Ma Shan became lively again and then began to screw the screw excitedly.

What the f \* ck.

That water should have similar effects as Qinglin's medicinal liquid, right? It could restore one's physical strength.

Qin Lin watched helplessly as little Qin Feng was treated as a child laborer and screwed all the screws.

However, thinking about it, this was also a good thing. It was also a form of training for little Qin Feng.

A kid who hadn't even gone to kindergarten had such endurance and patience. It was much better than a kid who didn't dare to go to the balcony and had to carry him when he walked.

Moreover, because of the child's genes, his physical fitness was much better than ordinary children. It was good to have more of this kind of exercise.

When little Qin Feng finished fixing the screw plates, the old man actually brought a small fish tank to little Qin Feng and said, "Little guy, you did well. This is your reward."

Little Qin Feng happily hugged the fish tank.

Qin Lin's eyes lit up when he saw this scene.

This was obviously a reward.

However, little Qin Feng did not bring this thing out. Instead, he only brought a screwdriver.

Most importantly, the small fish seemed to be the reward.

Through the video taken by Da Bai, it could be seen that little Qin Feng had actually placed the fish tank back on the table in the office before going to get the screws.

This silly child.

When Qin Lin saw this, he immediately said to little Qin Feng, ""Little guy, where's the fish? Why didn't you bring the fish back?"

Little Qin Feng immediately took the screwdriver and said, ""Daddy, but I don't want fish. I want this!"

"..Qin Lin was speechless. He immediately said, " Then you can bring that fish out for Daddy. Daddy wants that fish. Can you bring it out next time? "

"Oh!" Little Qin Feng nodded his head in a half-understanding manner.

Qin Lin felt a sense of guilt. As a father, he was actually thinking about his son's fish.

However, it was a waste to give the fish to little Qin Feng. He didn't want it at all. He took the fish and considered it a waste.

Most importantly, the fish was produced by the system, so it should be something good.

Therefore, he also wanted to see the attributes of the fish.

Seeing little Qin Feng nod his head, he was also somewhat expectant.

Therefore, the moment he saw Qin Feng enter the game, he immediately waited outside his room.

When little Qin Feng's door opened, he was still looking forward to it.

However, he was dumbfounded when he came out because Little Qin Feng was not holding a fish tank in his hand, but a pair of pliers.

"? ? ? ?"Qin Lin was dumbfounded.

What he wanted was fish, not pliers!

What did this son mean? Was the factory addicted to twisting screws?

[Pincers: Grade 1]

[This is a very useful pair of pliers. After using it, it has a special effect:[Endurance +1, Effect +1]

"Son, where's the fish tank?" Qin Lin was stunned.

"I forgot!" Little Qin Feng replied in embarrassment.

" Then you must not remember it next time. " Qin Lin had no choice but to remind him again. At the same time, he looked at Da Bai and asked for new camera equipment. He then checked on little Qin Feng's situation in the factory section today.

This suddenly made him feel like he was playing a game.

In the next few days, little Qin Feng entered the factory section again. However, this time, he still forgot about the fish and brought out a small hammer.

This troubled Qin Lin. It made him wonder if the gene score really had an effect on little Qin Feng. Or could it be that there were side effects to the gene score?

That shouldn't be the case. After all, there was no problem with the attributes.

But why was this little fellow's memory so bad?

He could only continue to remind the little fellow.

Finally, when little Qin Feng entered the factory section again, he was still waiting outside the room.

Zhao Moqing looked at him in confusion.

After some time, he saw Da Bai open little Qin Feng's room and walk out with him.

What surprised Qin Lin was that this time, little Qin Feng was holding a fish tank in his hand.

The fish tank wasn't small, and the little guy could carry it, which meant that there was no problem with the number of genes that could help the fetus.

What surprised him was that there was not only one fish in the fish tank, but three. They were obviously of different species.

"Daddy, fish!" Little Qin Feng handed the fish tank to Qin Lin with an expectant expression on his face.

When Qin Lin saw this scene, he suddenly understood why little Qin Feng had forgotten to take out the fish.

#### [Chapter 1788 That's A Legend!](#)

Qin Lin now knew what little Qin Feng was thinking.

After he said that he liked fish, Little Qin Feng deliberately left these fish in the factory section and waited for a few more to give him a surprise.

Looking at little Qin Feng's expectant gaze, Qin Lin immediately smiled and took the fish.

Then, he saw the information about the fish:

[Special environmental fish No. 1: Special]

[This is a special type of environmental fish. It's a type of fish that can purify and transform the water quality of the environment. They can also secrete a substance that can produce fungi that can build an underwater ecosystem. No one knows their origin, but they suddenly appeared in the pond near the factory in the west of Ore Town. Because the pond there was very polluted, the water quality there had completely improved because of the appearance of these fish. Some people guessed that these fish were the rhythm of the goddess.[Or Kappa's prank: Underwater survival ability +3, underwater environment modification ability +3, underwater ecological environment construction ability +3]

[Special environmental fish No. 5: Special]

【.. Construct No. 5 underwater ecological environment ability +3!]

[Special environmental fish No. 13: Special]

【.. Construction of No. 13 underwater ecological environment ability +3]

When Qin Lin saw the introduction of these three kinds of fish, his face immediately revealed a surprised expression.

Because the effect of this fish was really too magical.

Putting aside the problem of water quality and environment, it was incredible that he could create an ecosystem out of thin air.

He just couldn't figure out what underwater ecosystem No. 1, No. 5, and No. 13 meant.

This was beyond his knowledge.

But thinking about it, with this kind of vitality, coupled with this effect, even if the environment was very harsh, it could still survive, right?

However, thinking about it, the alien planet did not have the oxygen that fish needed to survive. Even if they were strong and powerful, they would not be as cold as the living conditions.

But even so, it was still very powerful.

Purify the water environment, build an underwater ecosystem, and have strong vitality. Just like the pond near the ore town factory that was heavily polluted, this fish could completely purify the pond.

These fish should be the favorite of capitalists.

Even the capitalists would cheer for them, right?

One had to know that the pollution caused by factory production in society was also very serious.

Moreover, the factory needed to invest a lot of money to carry out pollution control and water control.

This was also why many companies would go against their conscience and shut down sewage treatment systems.

It was to save money.

This also meant that the consumption in that aspect was very large.

Some companies didn't even want to use willow leaf duckweed after they had the willow leaf duckweed. They wanted to save money.

If he had this kind of fish, he could just raise them in the sewage discharge pond.

As long as there were enough of them, they would be able to treat the sewage well.

That would save a lot of money.

The key was that all three types of fish were pregnant and could lay eggs.

This would allow him to quickly nurture a batch.

He didn't expect little Qin Feng to get so many good things from the factory section.

Only then could he enter the game and get this good item of Grade 3.

Now, he could think of a place where he could use these fish.

Jinglin Company definitely did not need it. Their company's sewage treatment system was probably the best in the country. There was probably no one better than them in the world.

He paid great attention to this aspect and would never earn money that went against his conscience.

He did not need this kind of money. He had so much money that only numbers were left.

After thinking for a long time, he couldn't think of a place where he could use these fish.

When the time came, he could ask Mr. Lu to see if there was any place where he could use these fish.

With that in mind, he took the camera from Da Bai and began to examine it.

He wanted to see what little Qin Feng had experienced in the factory section this time.

This was also a very interesting thing for him.

After watching for a long time, Qin Lin did not find anything new. Little Qin Feng was still being instructed by that old guy to do things.

They were treated like child labor.

After doing that, he immediately called Mr. Lu to ask if there was any need for this kind of environmental fish.

As soon as the call connected, Mr Lu immediately asked, ""Boss Qin, what can I do for you?"

Qin Lin said helplessly, " Mr. Lu, can you not say that every time? I don't dare to give orders. I just accidentally made a kind of fish. It has very strong survivability and can purify water. It can even secrete special substances to build an ecosystem. I can't find a particularly bad place to test it, especially since our Qingfeng Company's sewage treatment is very strong. We don't need this kind of fish at all. "

"So, I want to ask if the higher-ups need this kind of fish. If they do, I'll give this fish to you. You can take it and test it out. Just tell me the results."

Hearing this, Mr Lu was stunned.

Just based on what Boss Qin said, it was obvious how powerful the fish was. It was much stronger than the willow leaf duckweed that purified water.

But what did Boss Qin say now?

Was this thing accidentally made?

Who would accidentally create such a product?

At least, he didn't know who could, except for Boss Qin.

Fortunately, he wasn't a researcher, but only in charge of research. Otherwise, as a researcher, or even a researcher of the same kind, he would have been deeply shocked by Boss Qin's words.

### [Chapter 1789 That's A Legend!](#)

The reporter said anxiously,"Boss Qin, of course I need it. Besides, there's a special place that needs this kind of fish. You've really told me good news. I'll bring people to You City right away. Wait for me!"

"Yes, I'll wait for Mr. Lu to come over." Qin Lin nodded when he heard this.

Beijing.

After Mr. Lu hung up the phone, he hurriedly took out a specially encrypted phone. This phone could be used to contact a special leader.

Because the modification of the alien planet had entered a critical period, the higher-ups had specially sent a leader to supervise this matter.

The call was connected, and the leader's voice came through. "Xiao Lu, you suddenly called me. Is there a solution to the problem we encountered?"

"I just talked to Boss Qin on the phone," said Mr. Lu with a smile.

"So there's a solution?" The leader was delighted.

Obviously, the higher-ups had a consensus about Boss Qin. Once Boss Qin took the initiative to call, it would definitely be good news.

Minister Lu smiled and said, "Leader, you're right. Maybe we can solve the problem of modifying the water quality of the alien planet. Boss Qin accidentally created a fish with strong vitality that can modify the water quality and even build an underwater ecosystem. You should know that if Boss Qin said that, he would definitely be conservative. The real effect would definitely be stronger. "

The leader agreed and immediately said, "Then hurry to You City. I'll tell them the good news too. "

The higher-ups had a meeting with Boss Qin, and they trusted him no less than Xiao Lu.

This Boss Qin was really amazing.

After the leader hung up, he immediately made a call.

This phone was from the same secret laboratory.

In the laboratory, a group of researchers in special research uniforms were doing tests seriously.

It could be seen that this laboratory was different from the other laboratories.

The surrounding walls were made of transparent glass with special water inside.

The quality of the water was obviously very bad. It was actually purple, as if it was heavily polluted.

However, after the researchers tested it, there was no trace of Earth's pollution in the water, because the water came from the alien planet.

Back then, the main reason why he chose to modify that alien planet was that it also had water. Water was the source of all things.

Unfortunately, during the modification, they discovered that the water quality of this alien planet was difficult to modify with their technology.

At first, they thought that the willow leaf duckweed produced by Qinglin's laboratory could be modified.

After all, the willow leaf duckweed could even suck out the gasoline in the water.

Therefore, they used rockets to cover up their tracks so that other countries wouldn't find out. They transported a lot of willow leaf duckweed there.

However, after the willow leaf duckweed was used in the water of that planet, although the water quality had improved somewhat, the water quality was still very bad. There was no way to build an ecosystem. The fish, aquatic plants, and various fungi were added ... There was no way to survive.

Therefore, their research lab was established to study and solve this problem. The water was brought back from that alien planet.

However, their abilities were limited. They had no way to solve this problem. Or, it was impossible to solve this problem in a short period of time.

This gave them a lot of pressure. After all, they didn't want to delay the planet's transformation.

At this moment, the person-in-charge received a call. When he saw the number, he immediately picked it up and said, "Leader, what are your orders?"

The leader's voice came from the phone. "Academician Liu, there might be a solution to the water quality problem on this planet. Xiao Lu has already gone to You City. "

"Mr Lu, You City?" Academician Liu was surprised. "Leader, did Boss Qin come up with something?" he asked.

He could only think of this.

After all, everyone had heard of Academician Qin and knew how powerful he was.

Therefore, he could totally believe that Academician Qin had developed some technology that could solve the water quality of this planet.

The leader did not hide anything. "Academician Little Qin has developed a special type of fish. Not only is that fish strong, but it can also purify the water and environment. It can even build an underwater ecosystem! "

Academician Liu was stunned. He said in disbelief, ""Leader, how is this possible? You have to know that the construction of an underwater ecosystem requires a complete ecological chain or suitable fungi to allow underwater creatures to survive."

"Otherwise, even if we put fish in there, they won't be able to survive. Especially the water on this alien planet. It's not suitable for life at all. "

The leader immediately explained, "I don't know much about this. Maybe that's the case. However, this is Academician Qin's research after all. We still have to try our best. "

Academician Liu immediately said, "That's true. We really have to try Academician Qin's research. Maybe we'll get some unexpected results. After all, he can even develop something like willow leaf duckweed. "

Academician Liu's leader chatted for a long time. After hanging up the phone, he heaved a sigh of relief. If Academician Qin was willing to participate in their research, it was possible for their research to succeed quickly.

After all, many academicians had already proven it.

Academician Liu said to the other researchers in the laboratory, ""Everyone, let's put aside the work at hand first. We have to make some new preparations. Soon, a batch of special fish will be sent to our research department."

"When the time comes, we will have to study these fish. These fish may be of great help to us. They will help us successfully modify the water quality of the alien planet."

These words stunned the researchers. They were in disbelief.

"Academician Liu, how is this possible? There can't be life in this water."

"Yes, this water can't survive in the water. What's the use of those fish?"

"Indeed..."

These researchers had no way of understanding this kind of thing that violated common sense.

Or rather, they felt that it was impossible.

Academician Liu knew what these people were thinking, so he explained, "This fish was developed by Academician Qin. It can even construct an underwater ecosystem. It's very different, so I have to give it a try."

These words stunned the researchers.

Fish can build their own ecosystem? What kind of joke was this?

However, Academician Liu mentioned Academician Qin again.

That was an incredible person. They had all heard of his legend.

Therefore, if that was the case, he could really look forward to it.

.

Qinglin Manor, inner area.

Qin Lin thought that the environment was divided into No. 1, No. 5, and No. 13. There should be other numbers. The underwater ecological environment that could be constructed by each number should be different.

Although he didn't know what these meant, he felt that if he could get more and more, it would be different.

Therefore, when they were alone, he reminded little Qin Feng, "Son, I really like the fish you gave me. If there are any, I want more."

He felt that with Qin Feng's intelligence, he should be able to understand. When he entered the factory section again, he should be able to help him bring some fish out.

Following that, he also left the inner area. Mr Lu would be coming over from the capital today, so he had to arrange for him to receive him.

Moreover, the other party was in such a hurry to rush over. Presumably, this environmental fish would be of great help to some of the research above.

This was also the reason why he reminded little Qin Feng that he wanted more fish.

With more environmental fish, the higher-ups would need them, and they would definitely be able to play a greater role.

To be honest, at his level, some things were no longer meaningful to him, but he was willing to do something meaningful.

#### [Chapter 1790 This Fish Lives On That Alien Planet, Right?](#)

Qin Lin looked at the game screen, held the fish tank, and entered the game with a thought.

These three fish were pregnant and could lay eggs immediately.

The best way to breed them quickly was to use the time ratio of the game.

Qin Lin moved the fish tank filled with three environmental fish into the farm building.

Then, he logged out of the game and counted the time.

After some time, he entered the game again and saw that the three environmental fish had already laid eggs. A dense number of small fry were wandering in the fish tank.

Therefore, sometimes the time ratio of the game could be used well. The effect was obviously very good.

Qin Lin logged out of the game again and waited for some time before entering the game.

At this time, the eggs had already grown into normal fish. The three fish at the beginning could even lay eggs again.

In this way, these environmental fish could be cultivated very quickly.

Qin Lin also took a new fish tank and loaded it with a large number of environmental fish before bringing it out of the game.

..

Not long after, Mr Lu rushed over in a hurry.

He and the higher-ups believed Qin Lin's words without a doubt.

Boss Qin was really good at studying fish.

Back then, Boss Qin's research on beauty fish and healing fish had surprised the higher-ups. Now, Academician Chu and the others often used healing fish in the manor.

Moreover, a batch of them had been specially nurtured and sent to the capital for the use of the leaders.

Later, Boss Qin developed a fish that could cure AIDS. This fish was even more magical.

Therefore, the higher-ups were absolutely excited about studying fish.

Was it strange for Boss Qin to come up with this fish?

If Boss Qin said that he had figured it out, they believed that Boss Qin had definitely figured it out.

"Boss Qin, where is the fish you mentioned?" Mr. Lu asked hurriedly as soon as he saw her.

"Mr. Lu, don't be so anxious. The fish can't run away," Qin Lin joked.

"Boss Qin, how can we not be anxious?" Mr. Lu said hurriedly. Don't you know how magical that fish is? How would you know how magical this fish is? Perhaps this fish will have a far-reaching impact on the transformation of the alien planet above us."

"The higher-ups have been having a headache over the matter of modifying the planet. The water quality of that planet has been miscalculated. There's no way to purify it now, let alone build an ecosystem."

Qin Lin's eyes lit up when he heard this. He had been wondering if this fish could survive on an alien planet.

If it was a modified planet, then there would be the living conditions for this fish. At that time, this fish could be used to modify the planet.

Qin Lin saw that Mr. Lu was so anxious, so he did not waste any time. He directly brought him to the inner area and brought out a very large fish tank.

The fish tank was densely packed with swimming environmental fish. These were not the original three environmental fish.

It turned out that the three fish were still in the game's pasture, continuing to lay eggs.

Soon, other fish would be able to lay eggs when they grew up.

He hoped that these fish would be handed over to Mr Lu so that the higher-ups could play their role.

"Boss Qin, the higher-ups are in a hurry to test this fish. I won't chat anymore. I'll come again next time!" As Mr Lu spoke, he also made a call.

This time, he had also brought a special escort.

This was the treatment Boss Qin was going to give them in the future. Otherwise, they would regret it if they suffered any losses.

After Mr. Lu left, Qin Lin saw his son, Qin Feng, walk out of his room with a fish tank in his hand. There were two fish in it.

"Daddy, fish!" Little Qin Feng brought the fish to Qin Lin.

Obviously, this little fellow was very filial.

Qin Lin took the fish tank and immediately saw the information of the two fish in the tank.

[Special environmental fish No. 3: Special!]

[Special environmental fish No. 24: Special!]

Sure enough, there were two different types of environmental fish. Moreover, the number of environmental fish was actually ranked 24, which meant that there were many types of environmental fish. There were at least 24 types.

In that case, he could slowly hand it over to Mr Lu.

Since the higher-ups wanted to use the environmental fish to modify the water quality of the alien planet, it might really succeed. To be honest, he really wanted to see what the alien planet would look like after it was successfully modified.

When that time came, their people would be above everyone else, completely above the other civilizations on this planet.

After that, Qin Lin also entered the workshop and brought the two fish that little Qin Feng had brought out into the game. He continued to cultivate them according to the proportion of the game time.

On the other side, after Mr. Lu brought the two fish out of Qinglin Manor, he was also escorted to the airport by some people waiting outside.

There was already a private plane waiting for them. After Mr. Lu arrived, the private plane took off and headed to the capital immediately.

When the private plane landed in Beijing, there was already a group of specialized escorts waiting.

They loaded the two fish that Mr. Lu had brought back into the escort vehicle and then drove to the specialized laboratory.

Along the way, there were also specialized escort teams, which was enough to show their importance.

In the capital, all the cars tactfully moved aside when they saw this scene.
